

Mana 1081

Chapter 1081 - Merely The Universal Realm! I

Across the vast rivers of time, a single being was shining brilliantly as he began to do something extremely shocking.

"Many of you are seeking Antiquity...let me show you exactly what one can do when they achieve such power."

The Great Usurper uttered coldly his consciousness thrummed powerfully! From it, one could see vast clusters of swirling Universes, some of these Universes clearly having 100 Billion Galaxies that weren't just normal Galaxies.

A cluster of Universes...this was a being in the Universal Filament Realm!

Within these clusters of Universes, there existed the unique ones that had different colored galaxies. The 100 Billion connected Galaxies of some of the Universes actually shone with a rainbow colored shape as they were fantastically Dao Galaxies!

Dao Galaxies!

Not just in one Universe, but in multiple of them.

But in the next second, the Great Usurper did something shocking as he uttered out emotionlessly while focusing on one of his Universes.

"Burn. Burn in the void of turbidity and be the fuel for my descension."

RUMBLE!

Appallingly, an entire genuine Universe began to burn powerfully as essence of immense proportions flew out, tugging on the thick string that connected this Antiquity to the Primordial Cosmos!

The face of the Antiquity was without any emotions as he watched the burning of a Universe, his voice ringing out coldly.

"I shall sacrifice one of you for a Cosmic Treasure."

The Great Usurper spoke simply as he didn't burn a normal Universe among the clusters of Universes.

He actually burnt one that was filled with Dao Galaxies as it was termed a Splendiferous Universe! A Universe that was completely filled with Dao Galaxies that could only be born from 100 Billion Marks of Antiquity!

Yet the Antiquity burnt such a Universe because he knew for the task ahead, burning normal Universes would not be enough for it.

The action of burning a Universe was something that only those in the Universal Filament or Cosmic Realm could do, and even then...very few would ever decide to do so as it was a frightening thing. It was only done by beings at this level to release a shocking burst of power that could change the tides of a deadly battle.

Only when it was the last resort did such a thing happen!

For the Primordial Cosmos and the Cosmic Treasure within it, the Great Usurper heartlessly burnt a Universe that would be the prized possession of many beings, the immensity of the essence burned from it causing the line of connection he held with the Primordial Cosmos to expand multiple times over as golden crimson flames now lit upon it.

"With this...my descent would only be within a day!"

RUMBLE!

His eyes released the gorgeous burst of cerulean light as he spoke terrifying words, his actions having horrifying effects in the Primordial Cosmos at this moment as the 8 remaining Universal Constructs shone and began to expand at a rapid pace.

The authority of an Antiquity spread out at an even faster pace as the fusion of now 8 Universes accelerated, the Universal boundaries beginning to come ever closer with each other as they nearly fused!

From a possible descent of a few days, it was now reduced to less than 24 hours? as the might of the Antiquity seemed unstoppable!

Within the Chthonian Universe, Noah and his summons were atop the bubbly body of the Blue Slime as they tore apart the void of space, moving at the speed of light as their figures glimmered brightly amidst the increased pressure of Antiquity.

The Universal Construct they were going towards had increased in power and might as it expanded rapidly, but even with such changes...Noah continued forward!

His eyes flashed with a golden light of destiny and fortune as his main body did a myriad of calculations, shockingly coming to the same conclusion that with the current changes, the descent of the Antiquity was not too far away.

They had to move, and they had to move fast!

WAA!

Their figures broke through the layers of the void as they arrived a few hundred miles away from the pulsing and expanding Universal Construct that was protected by the Chthonian Hegemony that had sided with Chronos.

"..."

The Hegemony was looking towards their party with a difficult expression, his red eyes focused on the unsurpassable might displayed by the Blue Slime!

This Chthonian shared a similar name as the Great Old Nazzagath, his moniker being Great Old Kubo as this being had a cylindrical body that was a planetary sized worm with glistening abyssal black scales, its face simply being an opening that held millions of sharp teeth and eyes that were surrounded by black tentacles!

The jaws seemed capable of swallowing entire galaxies as the terrifying eyes that seemed displaced in between all the teeth looked towards them carefully. These eyes held hesitation with them as they looked at the Universal Emperor Slime, this aged Chthonian recalling the might of such creatures and their terrible devouring abilities in the past.

He truly didn't want to face such a being, nor did he want to do it alone as he had already sent word to Chronos and the others!

Yet...it seemed they were occupied with something at this moment as none of them sent back word. Within the vast wisdom of the Great Old Kubo, his mind buzzed as he was actually the first to speak in the tense standoff.

"We can talk amongst each other as equals first. Do you know why we are seeking Antiquity?"

RUMBLE

The millions of eyes and teeth of the enormous worm tentacled creature trembled with power at the Universal Realm as he spoke, his voice containing an ancient power that seemed capable of enticing anything!

"Do you know why we go as far as to-"

Before his words could even finish, there was an abrupt reply. Not from the powerful Blue Slime, but the figure of Noah's starry Chthonian body that was situated atop it.

"Shut the fuck up."

...!

WAA!

A simple and direct message, and one that cut apart the honor of a Hegemony!

But Noah didn't care about this as he waved his hands, bringing forth the reason why they even had a stand off to begin with.

It was because in the Dark Universe where his main and the main body of the Blue Slime was located...he had been using vast amounts of mana to produce more Clones of the Blue Slime at the Universal Realm!

The ridiculousness of the [Blood Clone] ability of the Blood Lord Skill Tree shone again at this moment as it was now producing clones of such a shocking rank.

When Noah finished his disrespectful words against a Hegemony in the Chthonian Universe, he waved his hands as to the sheer horror of everyone...an identical Blue Slime releasing terrifying waves of power at the Universal Realm appeared.

...!

The millions of eyes of the Great Old Kubo trembled.

Essence erupted out wildly as a terrifying lesson was about to be taught on this day!

It was a lesson on something these beings didn't know, but would come to etch in their minds soon after.

It was the lesson that the moment Noah gained the power of a Hegemony, many things were as good as over!

Chapter 1082 - Merely The Universal Realm! II

Clones!

Other beings could utilize them to a very little extent, as it logically took too much resources to bring forth something with the exact same level of power and origin as yourself.

If a normal Hegemony were able to utilize an ability of cloning another being that could display 100% of their original body's power and might, it meant they had to replicate their whole origin to be able to do so. They would have to drain nearly all of their mana reserves and spend hours doing it until such a process was complete!

But since the clone came from the same source, it would be utilizing the essence that was filled up within its origin and then also using the essence of the main body when its essence was drained.

So for many existences, it was essentially creating another source of drainage for their Mana Reserves that they couldn't really afford unless they had enormous reserves of Mana!

An example was Valentina that had just learned the Blood Clone ability, and even with her expanded Mana reserves under her position as Noah's Vassal, she was only able to form and provide essence for a single Clone that she sent repeatedly over to the Animus Universe for battle.

Normal existences like her could only afford a single clone.

But then...you had Noah.

You had an existence that could provide all the mana required for even changing the nature of a genuine Universe, and such a being was connected to a Hegemony at this moment!

The brilliant Universe of the Blue Slime had heavy requirements to reproduce, but Noah had no problem reproducing it as he had no problems with mana. So the Blue Slime simply pulled along the connection it had with its Master as within seconds, a clone with a genuine Universal Origin was formed.

Then a second...

And a third!

This went on until 4 brand new clones were produced, reaching the maximum limit of 5 Clones that the Blood Clone ability provided when one took into account the already active clone in the Chthonian Universe.

So right after Noah told a Hegemony to shut up within this Universe, he waved his hands as he teleported one of the clones of the Blue Slimes over, the aura of another fantastical Hegemony spreading out.

...!

The black scales of the Great Old Kubo shook at such a scene, and they shook even harder when in the next moment, Noah's eyes continued to wave forth multiple times.

RUMBLE!

A third Blue Slime appeared...a fourth...and a fifth one!

In a short period of a few seconds, enormous Blue Slimes reaching over tens of thousands of miles in diameters appeared to surround the single Great Old Kubo as shockingly, a fearful yelp released from this aged existence!

"Ah...!"

The Chthonian horror was actually feeling immense stupor and fear at this moment, and it wasn't alone as outside the boundaries of the Chthonian Universe, the huge body of the Hegemony of Smithing was also shaking as he nearly dropped his hammer.

He had just been talking about how it was just one Universal Emperor Slime, and that they didn't all have to be jittery when the time came that this being questioned them of their actions hundreds of thousands of years ago!

Yet...he was now seeing the genuine auras of 5 Hegemonies that each looked like the Blue Slime, and all of them were called forth with a wave of a hand from the Apex Paragon.

"...The fuck is this?!"

The Hegemonies were confounded to an extreme as too many natural laws were broken to bring the current reality to fruition!

We can talk about many aspects of this fantastical reality and how it came to be at this moment, but the source of it remained the same.

The clones of the stupendous Universal Emperor Slime were connected to their main body, being kept alive and receiving mana from this main body that they could utilize at all times. This main body they depended on...it was connected to a single being that was then the true source, a being capable of providing enough mana to the Origins of multiple Universes!

Noah alone was sustaining the Origins of the original Universal Realm Hegemony and all 5 of its clones!

What might!

What ridiculousness!

"I...I..."

It seemed like everything was thrown to a stupor as the aged Great Old Kubo was stuttering when faced with the power and might of 5 genuine Hegemonies, each having the terrifying form of the Universal Emperor Slime.

A Hegemony brought down to the point where they could only stutter!

Noah looked at such a scene as while his body lay on top of one of the Blue Slimes majestically, his face became filled with dignity and might as his domineering eyes gazed upon the shaking Hegemony while he shook his head and uttered even more disrespectful words.

"You thought you were something special within your Realm of power? It is merely the Universal Realm...and I can call forth a myriad of such beings with a wave of my hands!"

RUMBLE!

The words smashed onto the Chthonian Hegemony like a brick as he seemed injured before the battle even began, Noah merely shaking his head as he gave a terrifying command.

"Decimate this old fogey and the construct he protects."

WAA!

His command was given.

So the Blue Slime moved.

5 illusory manifestations of a Universe descended down with ease.

The Universal Authority of 5 Hegemonies was used at once as it pressed down on the Chthonian Hegemony with such might and power that the abyssal scales protecting this worm like creature trembled and fissured!

"Wait..!"

The terrifying bellow of an old existence resounded out, but the eyes of the 5 Blue Slimes were cold as they uttered forth in synchrony.

"Skewer."

BZZZT!

From the bodies of the Blue Slimes, millions of terrifying blue spears extended from their viscous bodies as they travelled even faster than the speed of light and seamlessly pierced into the worm like body of the Great Old Kubo!

...!

This being felt intense waves of pain from the attacks of 5 Hegemonies and their manifested Universal Authority, his origin actually feeling terror as he bellowed out and shocking might blasted from him.

"OOOOOH!"

It was a bellow of a being actually fighting for their life, a Universe blooming from him as it also wanted to manifest outside!

Chapter 1083 - Merely The Universal Realm! III

"OOOOOH!"

A majestic scene of a Chthonian horror bellowing out could be seen, the planetary sized worm like body having its pierced abyssal scales vibrate as its millions of teeth and jaws that made its head shone with multicolored luster.

From this figure, a manifestation of a Universe bloomed as this Hegemony had to actually resort to this if he was to obtain even a hint of survival against 5 other Universal Experts!

BZZZT!

The glorious 100 Billion galaxies of his Universe tried to stretch out wildly to withstand against the cerulean blue Galaxies that numbered 500 Billion from the 5 Blue Slimes.

Over a billion of them were actually vibrant Dao Galaxies as they shone with a rainbow colored luster, these ones being the only thing that even allowed his Universal Authority to be able to display itself briefly under the pressure of 5 other manifested Universes!

But...this was all it did.

The universe of a Hegemony that had the moniker of 'Great Old' was actually only able to display itself for a brief few seconds before the 5 slimes that had the spear like extensions of their bodies still stabbing into this being harrumphed.

RUMBLE!

The 500 Billion Galaxies of the manifested Universes of the Blue Slimes shone with a terrifying cerulean glint as in the next second, something terrifying occurred.

With the Great Old Kubo trying to manifest his Universe outward, its many galaxies were flickering in and out as in the next second, it was dominated by the 5 already manifested one and this wondrous Universe...faded!

WAA!

The Hegemonies outside of the boundary of the Universe watching this scene were breathless as they now saw the unhindered pressure of the 5 Blue Slimes fall upon the single Chthonian Hegemony, even more spear like extensions releasing from their bodies and skewering this being left and right.

When? few seconds passed, the scene became clear as the enormous worm like body of the Hegemony was pierced on all sides, a dazzling array of light displaying itself thereafter as all those watching were able to see...an innumerable number of blue spears surrounding the deeply hidden and protected Universe within the body of the Great Old Kubo!

The spear like extensions of the viscous slime had actually entrenched themselves into the Universe of this being, into his very Origin as in the next second...

"Universal Devouring." "Universal Devouring." "Universal Devouring...."

5 synonymous voices rang out from the splendid Blue Slimes.

After the advancement to fully become a Universal Emperor Slime, these existences could even swallow genuine Universes when enough of such a thing happened- they might be capable of becoming Apocryphal Antiquities and forming their Universal Filaments in this manner.

Even though it was not the natural process of Antiquity and was even given a word that meant false, it was still Antiquity! So...what would happen when a Universal Emperor Slime didn't devour a genuine Universe, but the Universe that an existence had built within their Origins?

The answer....

"AHHHHHHH!"

Was the resonating and loud cry of an aged being that could visibly feel it's Universe being devoured.

The worm like figure of the Great Old Kubo trembled with such intense pain and fear at this moment as his screams reached the ends of the Chthonian Universe!

Meanwhile, Noah provided all the mana required as the bodies of the 5 Blue Slime caused the few light years around them to turn a beautiful cerulean blue, the screams of a Hegemony being drowned out as their spear like projection sucked dry a Universe.

The Galaxies within it went dark one by one as in a matter of seconds, the appalling sight of a dimming Universe that eventually cracked and began to fall apart played out!

It was bright red and black to begin with, but in a matter of seconds it turned gray and lifeless as it began to disappear as if it were dust.

"..."

It was a breathless scene as the screams thereafter stopped.

The millions of eyes and jaws that were vibrating fearfully dimmed as they lost all luster.

The enormous planetary sized body of the worm like Chthonian then began to crack and splinter as without the support of a core, it faded away!

"..."

Like this, a Hegemony was shockingly put to rest.

If one kept track of the time, they would also be able to notice that it didn't take longer than a minute!

Ah!

To elevate the matter even further, a single humanoid Chthonian that shone with a starry galactic luster with his Cthulhu form just sat on top of a Blue Slime while watching the scene playing out with eyes shining with brilliant lights.

At such a reality, Noah's voice resounded out as he shook his head in a dissatisfied manner.

"What a disappointment!"

BOOM!

His words were like strikes of thunder to the watching Hegemonies that just observed an ancient existence ganged up on by 5 Blue Slimes and then decimated in less than a minute, their own Origins shaking at such a scene as a pervasive feeling entered their hearts when they looked at these beings!

"That...the Universal Emperor Slimes couldn't do that before, right?!"

The voice of the Hegemony of Smithing resounded out, seemingly at a higher pitch than his usual deep voice as a trace of stupor and fear was hidden within!

Of course, he was referring to the fact that the Blue Slimes were actually capable of devouring the entire Galaxy of a Hegemony and reap their life in a matter of seconds! It truly wasn't something they came across in the past.

But...there was nobody to answer his question as the rest of the Hegemonies had extremely somber expressions after witnessing the harsh reality. Many of them were asking themselves- if they were the ones to face the descent of 5 Universal Authorities...would they fare any better than Great Old Kubo?!

What caused them to become somber was the fact that each of them wfound themselves answering no to this question! None of them could see any other pathway except for death if they were in the same situation.

This was why they were so somber as at this moment, the glimpse of fear of the cerulean light of a Blue Slime had begun to bud within their hearts and Origins!

But things were not over.

There was the fact that the Blue Slime had just devoured the Universal Core of a genuine Hegemony just minutes after it entered this Realm, and the fact that a Universal Construct lay unprotected at this very moment!

Chapter 1084 - Unceasing Fortuity! I

The moment the Universal Core of a Hegemony was absorbed, all 5 clones of the Blue Slime glimmered in a dazzling fashion.

They were clones, so of course their Origins and everything they obtained all went towards the Origin of the main body, and the main body sent back even more feedback to make the clones just like it thereafter!

At this moment, the main body and the clones of the Blue Slimes had their Origins letting off waves of powerful light, the Universal Origin of the Hegemony being digested in a terrifying manner as a spectacular phenomenon occurred from it.

There was already the vibrant Universal Origin of the Blue Slime, but at this moment...a second illusory one began to form right beside it!

...!

Against all known and established laws and structures of power, a second illusory Universe was actually forming as for it to truly come to fruition was incredibly hard.

This was because one had to always achieve a complete set of Dao Galaxies, which meant obtaining 100 Billion Marks of Antiquity- before they could step on the path to Antiquity and begin forming other Universes!

This was the natural way.

Yet the slime was defying all this as before he even obtained a single Mark of Antiquity, he already wanted to Construct another Universe through his racial skill.

It was a nigh impossible reality he brought to fruition, but only an illusory Universe formed from his efforts as for it to be actualized and become a genuine one...it seemed like he would have to devour multiple other Hegemonies!

THRUM!

The bodies of the 5 Slimes emanated even greater levels of power after Devouring a Hegemony, all of their gazes then looking towards the singular huge structure standing before them.

One must not forget that after all their efforts, there was now a Universal Construct pulsating madly before them unprotected.

A Construct that was filled to the brim with the Aura of the Antiquity that wanted to descend through them!

Noah looked at this cocoon like structure as his main body carried out a myriad of calculations, and his dominant voice still came out in the end as he spoke to the Blue Slime carefully.

"Devour it..."

..!

Yes!

Not to destroy or tear apart, but to devour it! In the past days, there had been many things that rose in succession for the Blue Slime to devour, each of them elevating its level to what it was now.

Currently, the glimmering blue eyes looked at the pulsating Universal Construct as it mattered not to it what benefits there would be and only followed the words of its master.

BZZZT!

The 5 bodies of the Blue Slime expanded at a pace faster than the speed of light as they began to cover the vast surface area of the Universal Construct.

From Noah, essence madly surged as he made it possible for the bodies of the Blue Slime to continue expanding, the Universal Construct being larger than most Galaxies as it towered over 100,000 light years!

It meant that the Blue Slime would cross the diameter of millions of miles and become a gargantuan creature, with the diameter of its clones expanding rapidly as each one came to cover over 20,000 Light years.

The circular figures of the Blue Slimes then layered themselves on top of each other as they covered the Universal Construct completely and then uttered out...

<<Universal Devouring>>.

...

WAP!

A flash of blue light, and a Universal Construct disappeared!

...!

The overpowering might of an Antiquity and authority that prevented other Hegemonies from entering that was permeating across the Chthonian Universe...disappeared!

Seamlessly! Beautifully!

This cocoon like Universal Construct had contained within it the dense aura and authority of an Antiquity, so when the Blue Slime devoured it...

BZZZT!

It allowed for something wondrous to occur within its Origin.

One by one, Hundreds of millions of the Galaxies within its Origin began to light up with a rainbow colored luster as they became genuine Dao Galaxies.

Dao Galaxies that represented bound Marks of Antiquity!

In a matter of seconds, Billions of Galaxies were transformed as by the end of it, the figure of the Blue Slime let out terrifying waves of power as in an instant, 10 Billion of its Galaxies became branded with Marks of Antiquity!

One tenth of what one needed to become an Antiquity in just an instant.

"..."

Even Noah was speechless at this as he shook his head at the ridiculous capabilities of the Blue Slime.

He didn't know that the only reason the number was so high was because of the Antiquity wanting to descend even faster had actually burnt a Splendiferous Universe that was filled with 100 Billion Dao Galaxies, and it was actually a portion of this that the Blue Slime absorbed!

If the Antiquity had not done anything, the Blue Slime would have only been capable of getting a few hundred million Marks of Antiquity from the base aura of the Antiquity within the Universal Construct.

Yet events coincided as they brought about the current reality, the Antiquity just continuing to benefit Noah and the Blue Slime more and more without him even knowing it!

RUMBLE!

Noah gazed at the empty spot where the Universal Construct used to be, feeling the much lighter air around them as he nodded passively.

Since he was on a time crunch, he didn't waste any time as while monitoring the changes of the Blue Slime in real time, he utilized its waves of power to begin releasing the Dao of Fealty across the Chthonian Universe!

He released this Dao Essence with the trace aura of a Hegemony that also contained memories of them brutalizing the Great Old Kubo that half of the Chthonian revered, Noah wanting to fully bring this Universe under him as well in a quick manner.

Outside of the boundary of the now freed Chthonian Universe, the figures of multiple Hegemonies watched this blatant scene of authority as they made no moves...only staring with a myriad of thoughts and expressions.

The authority that prevented them from entering the Universe in front of them had disappeared, and yet....none of these Hegemonies entered the Chthonian Universe!

Chapter 1085 - Unceasing Fortuity! II

It was an extremely unique situation where even though the authority of an Antiquity had disappeared, these Hegemonies still didn't enter the boundary of the Universe as if another invisible barrier existed that prevented them from doing so!

Of course, it was the presence of the 5 clones of the Blue Slimes that were currently releasing waves of power and essence across the Chthonian Universe, the Star of Conquest above them and on the Apex Paragon shining brilliantly as their auras pristinely emanated out.

This was power.

This was might!

Being capable of causing an entire group of Hegemonies to not even dare to step into the same Universe as a being that had just advanced to the Realm of a Hegemony minutes ago.

Minutes after the advancement...they also butchered another being that had lived millions of more years more than them!

Ah!

Within the Chthonian Universe, Noah was focused on gaining fealty at this moment, the terrible waves of power and prompts were appearing on the few quintillion Chthonians within this universe as with his display of power, they all acquiesced.

As he gained the recognition and fealty of more and more beings, he gradually approached the same Realm that his summon had already reached, the number of Marks of Antiquity he held currently surpassing 22 million!

He was more than halfway there as the number still increased, many calculations crossing through his mind as a few minutes passed.

WAA!

The eyes of his Primordial Clone then blazed open as they released gorgeous crimson-gold light, uttering forth coldly.

"All the quintillions of Chthonians have pledged fealty, now..."

The moment his words finished, even more mana flew out of him as if he was uncomfortable if he wasn't spending insane units of mana constantly, this time the essence being that of the spatial type as it flew out faster than light to wrap the quintillions of beings that had just pledged their Fealty to him!

He located them all nigh instantaneously with them being his Vassals, the bodies of enormous Chthonians of all types being wrapped by this silver spatial light.

First was them becoming Vassals, and thereafter it was transporting them into the Dark Universe so that Noah could go towards the goal of upgrading the Universal Core!

He required 100 Quintillion existences, and he would obtain them without fail within the Primordial Cosmos.

In the case of the Chthonians, he had already begun utilizing the [Architecture] feature of the Universal Core that had moved on from just being able to design buildings and landmass to now being able to design entire star systems and galaxies.

In preparation for bringing these Chthonians into the Dark Universe, his main body had already been using this feature in the past day to design enormous Galaxies and star systems that fit with the Chthonians!

The glorious Universal Core simply pulled in the boundless mana and essence it was able to call upon from Noah as things were shocking done with utter ease.

As these Chthonians were transported into another Universe...they would find that it doesn't look all that different from their old homes!

"..."

The surroundings were quiet except for the sound of the surging essence around Noah's body.

Outside the boundary of the Chthonian Universe, Great Old Nazzagath watched as those he had influenced or lorded over in the past pledging fealty to someone else and even being taken away thereafter.

Towards such a thing...he did nothing as he simply looked at such a scene with a reminiscent expression!

His bright eyes shone a bright golden luster of destiny as he didn't stop Noah's actions, this being's monstrous form actually being the first to begin walking towards the boundary as he looked to be the only one brave enough to enter!

His Chthonian form of an enormous crimson star shaped monstrosity with purple flames constantly burning throughout its vibrant fleshly mass seamlessly passed through the Universal barrier as he entered into the Universe he called his home.

Unlike others, he wasn't fearful. After all, he held the moniker of a Great Old One, the Star of Destruction, and the Hegemony of Venerable Chaos!

RUMBLE!

Towards his speedy descent, Noah's eyes only raised up to watch this being slightly as he continued with his work of teleporting all the remaining existences within this Universe into his Dark Universe.

The star shaped Chthonian traveled a myriad of light years as he soon arrived near Noah and the figures of the 5 Blue Slimes and all the other Animus Summons. His focus was on the Blue Slimes as his eyes flashed with a regal purple light, his voice resounding out.

"Hegemony of Devouring...it is my honor to be among the many that witnessed your birth!"

WAA!

The body of Blue Slimes released a lustrous blue light as he was given a title from this ancient Hegemony, and it truly fit him so as he specialized in the aspect of devouring! The pressure that the Blue Slime was releasing eased up when it came to this being after such a compliment as the Great Old Nazzagath then turned towards Noah.

Towards the being that actually controlled a terrifying Hegemony!

"You're taking them to a safe place."

...!

He spoke slowly, but he was naturally speaking of the few Quintillions of existences that Noah had just snatched away.

He also spoke as if he was sure of it, causing Noah to turn his Cthulhu form towards him as he gave a light nod while wrapping up the last few trillions of beings. The Great Old Nazzagath nodded at this as he didn't question what his own light of destiny told him, simply questioning again.

"What will you do now?"

"..."

A simple question, but it was one with immense implications!

The essence coming from Noah was reeled in at this moment as he finished his work, leaving an empty Universe behind as he turned towards the questioning ancient being- the only inhabitant of the Chthonian Universe that wasn't taken away by him.

"Chronos and whatever Antiquity he called forth are getting desperate...with the descent of the Antiquity not being too far away."

RUMBLE!

His gaze was filled with power and might as he rose while waving his hands, causing the disappearance of the other Animus Summons and 4 clones of the Blue Slime as only he and one other Blue Slime Clone remained.

"We only have a time limit of a day, so I will be taking it upon myself to decimate the remaining Universal Constructs and any Hegemonies standing in my way until the descent of this Antiquity is stopped."

...!

A glorious answer to a simple question, the figure of the Great Old Nazzagath trembling as he stared at the unbound confidence and demeanor of this Apex Paragon that seemed above that of any Hegemonies!

This being...wasn't even at the Universal Realm, and yet the way he carried himself was as if he was even beyond it in power!

Ah!

Chapter 1086 - A Race Against Time! I

The Apex Paragon would take it upon himself to destroy the remaining Universal Constructs and any Hegemonies that stood in his way!

The words were extremely grand as the Hegemonies that heard them would normally find them unbelievable...but they actually couldn't refute them at this time.

After all, they had just seen a scene of those exact actions occurring moments ago!

As for how he would do it with the limited amount of time he had? Naturally, Noah had already made plans that were being carried out at this instant.

Before he left the Chthonian Universe that he had managed to conclude the events of in less than an hour, Noah looked at the Great Old Nazzagath as his eyes flashed with a mysterious light.

This was a powerful Hegemony, and a sensible one as well as he had paved the way for Noah to gain the fealty of half the Universe with utter ease even before he met him. Towards such a being, Noah smiled mysteriously as he voiced out.

"Say...why don't you pledge Fealty to me? Your power can be increased multiple times over, and you'll even be able to see all the Chthonians from your Universe again."

"...!"

The Great Old Nazzagath looked towards Noah with utter stupor at such words, this powerful existence not even knowing how to answer!

He was actually given the same treatment as the few Quintillions of Chthonians had just received, but someone of his might and caliber naturally could not have the same answer.

Noah saw the troubled expression on the face of the Great Old Nazzagath as his body and the figure of the remaining Blue SLime began to be covered with a spatial light.

"Take your time and think about it. I'll ask you again when the time is right."

WAA!

With these words, Noah's figure disappeared as he left behind a befuddled Hegemony and many more outside of the universal boundary of the Chthonian Universe in shock.

For the conquest of the Chthonian Universe, not even an hour had passed before it was completed as Noah already forged ahead to the next one.

This was because he was racing against time before a terrifying Antiquity descended and did whatever he wanted to the entire Cosmos that his Dark Universe stemmed from!

At the same time Noah left the Chthonian Universe, his enemies were recuperating in the Liberated Universe after facing an appalling amount of successive losses.

The Liberated Universe was vast, with its nature being unique in the Primordial Cosmos as it was one where its existences established very clear lines of two factions throughout the Universe.

These factions were labeled Heroes and Villains as interestingly, the Hegemony that was the head of the faction of Heroes had sided with Chronos for their search of Antiquity!

After the shocking battle against the Oathkeeper and watching him destroy a Universal Construct, Chronos and the others left the Microbial Universe that didn't have the authority to keep out Hegemonies anymore as they arrived in the abode of the Heroic Hegemony that was right beside the Universal Construct within this Universe.

The mood was grim as these powerful beings were all on a glimmering flat star that shone with a red and gold luster, its surroundings beautifully matching with the Heroic Hegemony that had a costume with a cape shining with the same colors of red and gold.

It was a grim mood as it became grimmer soon after when Chronos seemingly stood up in shock, having received information as he looked towards the far away direction of the Chthonian Universe with unbridled stupor!

"The Universal Construct of the Chthonian Universe...has also been destroyed!"

...!

"What?!"

RUMBLE!

The atmosphere became extremely oppressive as powerful auras rose and question this stated reality, Chronos being surrounded by the figures of the Goliath, Heroic Hegemony, Cerulean Hegemony, Hegemony Dark Shadow, Microbial Hegemony...and multiple other Hegemony at this moment as the total number within this Liberated Universe actually towered over 20 Universal Realm experts.

None of them could believe the words of Chronos as the ancient voice of the Goliath rang out with somberness.

"Oathkeeper is this powerful with the Cosmic Treasure? To be capable of facing all of us and even resisting the authority of a Hegemony that he can so quickly destroy two Universal Constructs in such a short period of time?"

WAA!

The somber voice of this ancient being was actually filled with hidden amazement at such power, but Chronos quickly shook his head as he replied.

"No. It wasn't the Oathkeeper that destroyed the Universal Construct in the Chthonian Universe...but the Apex Paragon!"

...!

Ah!

The faces of all Hegemonies blanked out for a second as they absorbed the words, Chronos relaying the information that a Hegemony under him in a nearby Universe had observed within the Chthonian Universe as the reality was one that nobody listening could believe!

"The contracted Summon under him has somehow achieved Hegemony, with their battle power being enough to kill Great Old Kubo before they destroyed the Construct..."

Chronos has his hands massaging his forehead as he spoke, the sequence of events seemingly making this powerful being so frustrated that he had to do this humane action!

Still, his words could barely be believable when he said them as they seemed like rubbish to these powerful existences.

The Summon of a Paragon had risen to the Universal Realm and gone ahead to kill a Hegemony right after? Someone as old and powerful as Kubo?

Some would think it was a joke if it wasn't for the seriousness that Chronos said the words with!

As they all absorbed his words, Chronos had a terrifying light cross through his eyes as they became firm and decisive, turning towards all the Hegemonies and looking at them with calm eyes that seemed utterly devoid of emotion.

"The mission we have all worked very hard to achieve is right before our eyes, with the Great Usurper feeling the changes even faster than us as his authority within the occupied Universes has even increased, his descent being within a matter of hours!"

WAA!

Hours!

A measure of time that these Hegemonies considered nothing!

To beings like them that lived for millions of years, the set of hours within a day was akin to them blinking before they passed.

But in the coming hours, these powerful existences would come to feel as if the hours were stretched into years!

Chapter 1087 - A Race Against Time! II

In the Liberated Universe, the voice of Chronos continued to resound out as he looked at many powerful Hegemonies.

"Within the remaining hours of this day...all of us will have to put our lives on the line to defend the remaining Universal Construct."

His gaze was somber as his eyes were devoid of emotion, but his voice captured their hearts as it held with it something they all dearly wanted!

"We all want Antiquity, and now it is time to put that want to the test. If you can risk your life for Antiquity as we pass through these few hours within a day, the process of Amalgamation will be complete as the Antiquity will descend."

"The enemies that stand against us are few, but they are most likely the weapons of the Primordial Cosmos themselves to prevent us from getting what we want! There is the Oathkeeper with his Cosmic Treasure, and then the Apex Paragon that controls a Hegemony!"

RUMBLE!

"Stand against them for just a matter of hours...and we succeed."

His words finished as the faces of all the Hegemonies were filled with an intense light.

Only a matter of hours.

This was all they had to do to defend!

Sometimes, the battles of Universal Realm experts could even be drawn out to days depending on how they fought, so them standing against a Hegemony that was under the control of a Paragon should not be too much of an issue.

As for the Oathkeeper...

"The Oathkeeper will not be able to make another move until at least some hours from now, which gives us ample time for preparation. Whichever Universe he appears in next, the majority of us will head there and stop his descent into it as much as we can."

As if he could read their minds, Chronos spoke with an impassive expression and continued.

"Same thing for the Hegemony under the Apex Paragon. It is a Universal Emperor Slime that I nearly eradicated with you all before, we will just have to do it again. This one should be even easier to deal with as they just newly advanced. Dark Shadow, you can reinforce Ambrose in the Animus Universe when the time comes. Microbial Hegemony..."

Chronos began delegating tasks and how they should move when the eyes of the Cerulean Hegemony began to tremble off to the side.

He recalled the words he just heard from Chronos as he was first confused, and then they opened in shock as he remembered a particularly unique scene a few months back in a Universe that had detached itself from the Primordial Cosmos!

He thought of a certain existence that had actually gotten his hands on the pieces of a Cosmic Treasure and had utilized his contracted summon- a Blue Slime, to actually destroy a minor piece of his soul in the end.

He recalled this very clearly as he had cursed at how a being could get his hands on a Cosmic Treasure and an existence like a Universal Emperor Slime at the same time, promising to rip them apart if the time ever came!

But not too long after, all Hegemonies felt the cry of the Primordial Cosmos as the Dark Universe should have been destroyed, and the Cosmic Treasure RUINATION should have been lost in the Ruination Sea.

But as the Cerulean Hegemony heard the words of a Blue Slime that was also under the control of another being...as he put many pieces together and the fact that the entire race of Universal Emperor Slimes should be eradicated, the Cerulean Hegemony actually arrived at the conclusion that somehow, the Noah Osmont of the Dark Universe had survived!

He had survived along with his contracted summons as the Blue Slime with the special devouring ability that even killed him had somehow come into the Primordial Cosmos!

...!

His shocked gaze only became more and more immense as put many things together, a singular thought appearing in his mind.

It was the thought of a second Cosmic Treasure actually being in the hands of a newly risen Hegemony, a second Cosmic Treasure appearing in the Primordial Cosmos once more!

Coming to such a conclusion, the shocked light gradually faded from the eyes of the Cerulean Hegemony as it was replaced with immense greed.

His expression became normal as he wiped away his shock, actually choosing not to share his shocking findings with the other Hegemonies around him as he actually rose and spoke up powerfully.

"I will lead the force against the Apex Paragon and the Hegemony he controls!"

WAA!

His actions caused many being to look towards him unhappily, many of them and especially Chronos recalling the fact that this being was right in front of the Universal Construct when the Oathkeeper struck, but he was frozen in fear as he couldn't even make a move, and he ran even faster than the rest of them after the Construct was destroyed.

Chronos looked at the Cerulean Hegemony with disappointed eyes as he spoke out.

"You'll be in the team that the Heroic Hegemony will lead against the Universal Emperor Slime and the Apex Paragon, not leading it!"

...!

Even with such an admonishment, the Cerulean Hegemony smiled and nodded as he returned to himself, many thoughts crossing his mind as it had begun to buzz with many ideas of a Cosmic Treasure.

A Cosmic Treasure that could allow one to survive in the Ruination Sea!

When he got his hands on it, what prevented him from leaving the Primordial Cosmos and exploring the vast Ruination Sea?

As for the Apex Paragon and the Universal Emperor Slime...they would have to face his main body and the multiple other Hegemonies this time around, so the Cerulean Hegemony concluded they would have no chance!

'Noah Osmont...I won't let it end the same way a second time!'

RUMBLE!

A Hegemony plotted at this time as Noah's enemies paved a plan to counter a defensive, this Hegemony not sharing crucial details that would have changed many things.

The sharing of knowledge about the Cosmic Treasure RUINATION being in the hands of a Paragon was dangerous enough for his teammates.

But the withholding of knowledge about this Paragon himself? Withholding the name of [Noah] that even an Antiquity was extremely cautious of and had warned Chronos about beings with such names in any Cosmos?

This was actually the most dangerous thing!

Chapter 1088 - A Race Against Time! III

The enemies hatched plans as they began to move soon after.

Meanwhile, Noah made his own plans as at this moment, he actually appeared in the Microbial Universe with the body of one of the clones of the Blue Slime.

His figure was still in the terrifying starry Cthulhu form as he sat above the wobbly body of the terrifying Hegemony of Devouring, his intrusion causing many of the Hegemonies still within this Universe towards him with sharp eyes!

THRUM!

The essence was palpable as Noah was entirely calm, observing the universe around him as he affirmed another Universal Construct was actually destroyed, and it wasn't by him!

He used the senses of the Blue Slime as he gazed over the entire Universe, finding the shimmering body of the Oathkeeper that was pulsating with a glorious aura of white Primordial Essence while situated in a meditative position near the destroyed pieces of the Universal Constructs.

Noah ignored the auras of the many Hegemonies that had landed on him as his figure teleported away from the region of the void he was in and appeared near the recovering Oathkeeper and the very Hegemonies that surrounded him.

The gaze of this domineering being opened as his eyes landed on Noah, especially at the glimmering Star of Conquest that released a dazzling array of white light onto Noah's body constantly as he called out lightly!

"Apex Paragon."

RUMBLE!

He called out such words while also locking his golden eyes onto the powerful aura of the Blue Slime, Oathkeeper and the others having long since received the news of Noah and the actions of the Blue Slime from the Hegemonies that had been watching everything outside the boundary of the Cthonian Universe!

He knew that this being and the Hegemony he controlled had somehow been capable of destroying a Universal Construct that required someone like him who held a Cosmic Treasure to be able to do so.

It was a surreal action that made the Oathkeeper continue to reevaluate everything he thought he knew about this being.

He looked up towards Noah's new form as he saw the glorious head of the Cthulhu nod nonchalantly.

"I didn't expect you to be able to take down a Universal Construct."

...!

Such words escaped Noah's mouth as the surrounding Hegemonies beside the Oathkeeper looked towards such a scene with some dissatisfaction, thinking Noah should pay this powerful being of their Cosmos much more respect!

But the Oathkeeper's golden eyes remained placid as he replied simply towards Noah.

"Neither did I expect a Paragon to be able to command a Universal Emperor Slime."

He actually spoke to Noah in equal terms, not talking down to this being in any way purely from his achievements! At such a being, Noah's eyes shone brightly as he replied.

"And yet I do. I'm also ready to head to another Universe and destroy another Construct, but I see you...will take a significant amount of time before being able to do so. Even though the descent of the Antiquity is in less than a day!"

RUMBLE!

His words caused fluctuations of essence and destiny to erupt out as the eyes of the Oathkeeper constricted, questioning slowly as mana undulated across his golden wings.

"What exactly are you getting at?"

"I'm getting to the fact that you have a problem in mana...and I have the solution! You saw this with the Hegemony of Summoning first hand, she pledged allegiance to me as soon after...she had her Mana Reserves and Regeneration enhanced by tens of times."

...!

Yes!

This was the reason why Noah had come into the Microbial Universe and even took the time to talk to the Oathkeeper!

He was actually planting seeds of possibilities similar to what he had done with the Great Old Nazzagath!

"I'm extending that same offer to you, Oathkeeper. Pledge fealty to me...and you will gain all the Mana you need to be able to go across the Primordial Cosmos to destroy the rest of the Universal Constructs."

RUMBLE!

Stupor appeared on the faces of all listening Hegemonies as the Oathkeeper's eyes flashed with a glorious golden light.

"..."

Utter and pervasive quietness arrived in the area as his aged and ancient golden eyes locked with Noah's from far away.

He looked at this being and the Hegemony he was standing on, a myriad of thoughts crossing in his mind as this domineering being that could be considered the pillar of the Primordial Cosmos seemed to actually be entertaining the words of the Apex Paragon!

...!

The seconds passed as Noah and the Oathkeeper had their eyes locked onto each other tightly, the Oathkeeper ultimately shaking his head as he spoke.

"That is not my path."

WAA!

"In another two to three hours, I will be ready to descend onto another Universe and do the same as I have done right now. If you are truly capable of doing again what you did in the Chthonian Universe...we should be able to stop the descent of the Antiquity!"

His words were strong and mighty, giving off the will of an ancient being that couldn't be steered to another direction!

Noah only smiled and nodded at this as a spatial light began to cover his body, his eyes dazzling with the light of conquest as he finished planting his seeds and waited for them to sprout.

"Let me know if anything changes. The offer will always be there!"

WAA!

With such words, the Apex Paragon and the Hegemony of Devouring below him disappeared.

Before they did, the Origins of many of the watching Hegemonies shook as they actually felt a deadly killing intent from the Blue Slime below the Apex Paragon, all of them recalling the history of this existence and what its resurgence meant!

But at this moment, Noah had fully delved into his mission that was considered to be divided into two parts that really went together.

One was to stop the descent of the Antiquity and devour the Universal Constructs, and the other was to make the inhabitants of multiple Universes pledge Fealty to him as he then took them out of the Primordial Cosmos!

To work efficiently with the little time he had, he had divided these tasks to his most powerful weapons yet- namely the clones of the Blue Slimes that he had already teleported to different Universes as he was speaking with the Oathkeeper!

Chapter 1089 - Delivered On A Platter! I

Out of the 9 Universes that were affected by the Universal Amalgamation of the Antiquity, the Microbial and the Chthonian Universes were the only ones to be freed as it left behind 7 Universes that still had Universal Constructs standing strong within them.

From these 7 Universes...Noah had completely conquered three of them as they didn't even have any existence living within their vast stars, only having the Universal Constructs and the Hegemonies that protected them!

These three were the Animus, Necrotic, and the Automaton Universes. They left behind the?Liberated, Euthenia, Omicron, and the Abyssal Universes as for Noah, these Universes that contained Universal Constructs and existences that he could have pledge fealty to him to gain the remaining half of the Marks of Antiquity he needed...he considered these Universes to be the fat sheep that he wanted to milk.

All of them would involve battles with Hegemonies, but the latter mentioned 4 would also grant Noah billions of Marks of Antiquity as it was within these 4 Universes that Noah sent a clone of the Blue Slime in each.

THRUM!

Simultaneously, a glimmering Blue Slime appeared within the?Liberated, Euthenia, Omicron, and the Abyssal Universes as the Hegemonies protecting the Universal Constructs within them were alerted en masse.

One might wonder, what happened to the authority of Antiquity that prevented any Hegemonies aside from those that branded their Origins onto the Universal Constructs or were already within the Universe when the authority descended? How could the Blue Slime at the level of a Hegemony so seamlessly enter 4 vastly different universes?!

The answer was of course, the seamless assimilation of the Universal Construct devoured through <<Universal Devouring>>.

Aside from the gift of 10 Billion Marks of Antiquity for the Blue Slime, it also took in and assimilated the aura and core of the Universal Construct as it understood them inside and out, with even more depth than those that merely branded their auras onto them!

So the 4 clones of the Blue Slimes appeared seamlessly in the Universes with Quintillions of beings and Universal Constructs, their auras reverberating out wildly as their shining cerulean figures shot towards the Universal Constructs where the defending Hegemonies were located at with fervor.

Noah's other subordinates that had entered these 4 Universes to begin the conquest before continued unhindered, the Seven Deadly Sins, Legions of Undead, Automaton Sentinel Legions...all of the forces went forward from galaxy system to galaxy system as they already took the first steps to spread Noah's domination!

The Blue Slimes were the topping on the top as they would face the defending Hegemony at each of the Universal Constructs, the defeat of these Hegemonies meaning Noah could widely spread his essence of Fealty out across the Universe like he did for the Chthonian Universe and bring the conquest to a close on these Universes as well.

This was the mission of the 4 Clones and Noah's subordinates that were given for the sake of efficiency.

You then had Noah himself and the 5th clone of the Blue Slime that appeared...in the Animus Universe!

WAA!

When he teleported away from the Oathkeeper and others in the Microbial Universe, the Chthonian figure of Noah seated upon a Blue Slime appeared in the Animus Universe as he was soon joined together by an alluring figure of a Hegemony that had this same Universe as her home.

The vibrant clone of Valentina looked towards the mountainous figure of the Blue Slime at the realm of a Hegemony in a daze as she questioned everything she knew about cultivating the power of Realms, sighing endlessly in her heart about how such a thing could even become a reality!

The three of them appeared not too far from the Universal Construct, the figure of Ambrose coming to attention and looking towards them with cold eyes as he wasn't alone. The Hegemony that had broken the Oath and initiated the chase across the Universe while holding onto Noah was also there, Hegemony Dark Shadow looking towards them with baleful eyes that shook with the aura of Tenebrosity.

But even this wasn't all.

It was because at this very moment, Chronos received information on all the happenings of the 5 affected Universes that Noah's forces arrived in as his expression changed, and he spoke towards the many Hegemonies around him and gave out commands!

Numerous figures flashed and disappeared, a particularly jubilant Cerulean Hegemony being one among the party of Hegemonies that went towards the Animus Universe while others went to reinforce the defenders in the other 4 Universes.

As for Chronos and the Goliath...their eyes were on the Oathkeeper that could make his move at any moment, these powerful beings also conserving their power as they got ready to fight with everything on the line to achieve their dreams.

Their actions meant grand changes in the Animus Universe as Noah's eyes raised up when he began to see the light of teleportation call forth multiple Hegemonies to stand beside Ambrose and Dark Shadow.

There was Solerno, two other Hegemonies Noah hadn't yet met, and the Cerulean Hegemony!

The two that Noah was seeing for the first time was the caped Heroic Hegemony and the Hegemony of Fire, a being from the race of Flame Spirits that shone brighter than many suns.

But even with all of these new faces...Noah's eyes perked up when they landed on the Cerulean Hegemony.

The eyes of the Cerulean Hegemony also landed on him and the Blue Slime as this Hegemony with the blue crown brilliantly floating on his head looked towards them with immense hidden greed and fervor!

Enemies that had known each other months ago met again on this day!

"Haha!"

Noah couldn't help but let out a boisterous laugh that shook the surroundings as he looked at the Cerulean Hegemony that was delivering himself to him on a platter.

The figure of the Cerulean Hegemony also buzzed with power, this being seemingly not being able to wait amidst his excitement and greed as he was the first to vibrate with essence before he shot out towards Noah and the 2 Hegemonies surrounding him- as he shot out to what he considered a free Cosmic Treasure!

Chapter 1090 - Delivered On A Platter! II

A beautiful sight was opening itself up at this moment in the Animus Universe.

On one side was an Apex Paragon and two Hegemonies, the other side actually having 6 Hegemonies standing against them as their very aura caused the surroundings to distort and fracture!

The Heroic Hegemony shone with a glorious aura as his caped costume shimmered gold and red, looking like a valiant hero that was standing against immense evil.

You then had Ambrose bounded on both sides by Solerno and Dark Shadow, with the Hegemony of Fire floating beside them as he raised the temperature of the surrounding hundreds of miles.

Then there was the Cerulean Hegemony!

His body had actually turned into a vast Sea at this moment, building up immense momentum as it expanded to become bigger than 50,000 miles, and it continued to stretch out endlessly!

One must recall that when the Cerulean Hegemony was first introduced within his Universe, this being had been sitting down on a Galaxy as he could expand his body to vast sizes.

This was an innate nature of his body that seemed to be made from an endless sea, the color of this destructive sea shining an illustrious blue as it was fighting for supremacy against the glimmering color of the Blue Slime!

Such was the fantastical scene currently in play! A vast Sea filled the essence of a Hegemony rolling towards a planetary sized Blue Slime that had a starry galactic Cthulhu sitting atop it, a beautiful Hegemony of Summoning expanding her body as it also began to thrum with power!

"Hoo..."

Towards such a scene, Noah breathed out slowly as his fused clone that was with the Blue Slime resonated with each other, their connection becoming crystal clear.

The chaotic undulations of the void around them seemed to slow down as they nearly came to a stop, Noah's mind being the only thing that was moving millions of times faster than anything else!

The Star of Conquest above him shone brightly as it cascaded down waves of the essence of Conquest.

He had gone through multiple other Universes since he last used the essence of Conquest, and it had built up immensely again as when faced with the shocking number of 6 Hegemonies, Noah was actually unfazed.

Against 6 Hegemonies, he wasn't the least bit worried!

His eyes glimmered brightly as in this slowed time, he turned towards the glimmering Star of Conquest as he thought of enhancing another one of the strongest skill trees he held at this moment so that he could carry out a certain fantastical plan.

It was the skill tree that allowed the smooth and simplified usage of the Dao of Chronos...the Dao that he could now use to play with these Hegemonies in a myriad of ways!

It was a Dao that was only a level below the Primordial Dao and the Dao of Ruination, and the Blue Slime at the level of a Hegemony could now utilize it to call forth a shocking array of results against other Hegemonies.

With the descent of an Antiquity on the line, Noah was planning on going entirely crazy for the battles to come as just too many things were in play.

His fight for his own Universal Realm, the fight for the Universal Constructs, and the fight for the Fealty of multiple Universes!

With such things in the back of his mind, Noah gave the command for the pure essence of Conquest to flow into a skill tree.

"Fill the [Wielder of Chronos] with the Light of Conquest."

RUMBLE!

His main body that was floating in the skies above the huge stadium that the main bodies of his subordinates were observing everything in gave the command.

A pristine white color shone as the Star of conquest buzzed, half of its current essence rushing into Noah's soul and Origin as it searched for the Wielder of Chronos skill tree that was entrenched into Noah!

Thereafter, Noah's body shone a glorious cacophony of colors as a powerful skill tree of a Cosmic Dao was enhanced, its effects becoming crystal clear in the next instant.

[Wielder of Chronos] <EMPOWERED>:: A skill tree geared towards a basic application of the Cosmic Dao of Chronos. Abilities include [Temporal Looping] (5/20), [Instantaneous Age Regression and Progression](5/20), [Temporal Manipulation Perception](5/20), [Temporal Halt](5/20), [Temporal Inversion](5/20)

...!

First was the fact that after the empowerment of this skill tree, the cap on its skill points for how strong its abilities could be was enhanced from 5 to 20!

Such an enhancement allowed for crazy possibilities, and Noah would have to undertake many tests just to know the full quantitative effect of such a thing.

But at this moment, he just clicked the plus button as he filled all the skills to their new max skill point cap before viewing their details once more!

None of the abilities of the skill tree, whether it was Temporal Looping or Temporal Halt- had any numerical quantifiable number for the resultant of their skill effects.

So when the Light of Conquest filled them, these skills simply all gained a percentage of the enhancement they received attached to them, as well as a few unique boosts of their own!

[Temporal Looping] 20/20 <Enhanced>:: Depending on the mana used, the user can place a certain area or being on a temporal loop that is extremely hard to escape from. Only those capable of releasing strength to shatter the effects of time itself of beings proficient in the workings of time can seamlessly escape Temporal Looping. Mana requirements are reduced by 90% for this ability while its effectiveness is increased by 20,000%

20,000%.

That was an effectiveness increase of 200 times, and it was written like so for the rest of the skills under the Wielder of Chronos!

Noah felt the strength of these skills scream out from his soul as he finally came out of his reverie.

He looked at the vast Sea that was the Cerulean Hegemony rushing towards him, this being seemingly not caring about the fact that Hegemonies could not hurt those of the lower Realms under the rules of the Universal Constructs!

The Cerulean blue sea should have been extremely beautiful to look at in the darkness of the chaotic void, but it was actually tinged with the green of greed and envy as this being only had one thought in mind.

That was the thought of a Cosmic Treasure!
