

## Mana 651

Chapter 651: 651

THUMP!

Noah seemed to have fallen asleep for a long time, the skill he cast having forcefully made his consciousness shut down as he was waking up slowly while he felt abundant strength coursing through him .

Both his bodies had experienced something similar as his body floating in the Chaotic Void right outside of the Novus Galaxy was the one that shone with the most glimmering colors, his body as Alexander in the Nexus Galaxy using all possible covert abilities before he inexplicably passed out to make sure that his rapid comprehension of multiple laws wasn't noticed by anyone else .

He didn't know that because of his single cast of a skill that affected an entire Galaxy, a bright green light had shone for an instant as it acted like a beacon! Powerful beings that were termed Entities observed this light as they mistook him for someone on their stage because of the scale of this one skill he had cast!

The only saving grace was that either these Entities were too far away to even be able to track back this source of light, or the one that was near was simply too busy with their own goals . But ignorance was bliss as he continued on without any worries . . .

Both of his bodies from the two different Galaxies rose as Noah saw a shimmering ancient tree vibrantly sprinkling green essence into his Nebula and everything around him, his body feeling immensely heavy and tout with strength as he glanced at his stat panel .

[Noah Osmont][Title(s): Infernal Lord(Variant), Grand Controller(Fate),Grand Controller(Chaos), Controller(Fire, Water)]

[Trait(s) : Infinite Mana, Protagonist(Incomplete)]

[Bloodline(s): Vampyre Progenitor]

[Primeval Tree of Old- Yggdrasil: Young Tree Stage]

[Aether Particles(s) : 8,926,354]

[Karma Line(s) : 4,145,526]

[Fate Line(s) : 10,000,000]

[Chaos Particle(s) : 10,000,000]

[Origin Core(s) : Light-5, Dark-5, Fire-10, Water-10, Earth-8, Air-8]

[Domain(s) : Life, Aether, Karma, Fate, Chaos, Light, Dark, Space, Time, Fire, Water, Earth, Air]

[Vitality: NEBULA]

[Focus: ∞ ]

[Strength: NEBULA]

[Law(s) : Life-25%, Aether- 89%, Karma-41%,Fate-100%,Chaos-100%, Light-52%, Dark-52%, Space-61%, Time-57%, Fire-100%, Water-100%, Earth-85%, Air-85%]

[Authority(s) : Aether Lord, Fate Lord, Chaos Lord, Space Lord, Time Lord, Light Lord, Dark Lord, Flame Lord, Water Lord, Earth Lord, Air Lord]

He had cast a single that affected an entire galaxy as his mind was forced to take a nap, and he woke up to find out that he had become a Controller in another Supreme Law as he also gained the authority of multiple other laws!

'Ayy, I'm becoming too much of a genius!' Taking a nap and waking up multiple times stronger, Noah could not help but let his thoughts run wild as he laughed .

His stat panel was vastly different with many laws being boosted simultaneously, his body sensing a unique aura as the essence of a Grand Controller of two laws swam freely around him .

Being a Controller in two normal Laws and a Grand Controller of two Supreme Laws was something he didn't know if anyone else had done, but it boasted many questions when it came to using |Intent| to utilize the essence of these laws as a Controller .

As he continued forward in the future, would he simply be limited to |Intents| of two words or is he now able to utilize |Intent| with an even larger number of words? There were many things left for him to experiment on but he set his eyes below him where a shimmering Galaxy now lay, a strong essence of Life permeating throughout this Galaxy as it became the first to be [Endowed] in the long eons that passed!

This meant there were a great deal of things to watch out for, the boosts for the [Life Essence Endowment] skill being so enormous that Noah knew the growth for the creatures of this Galaxy would be simply monstrous as they lived in an area so extremely abundant in the essence of an Ultimate Law, as well as the boosts of Atmospheric Essence on top of denser Universal Laws Essence and Increased Comprehension .

"Haaa..."

He gave a content sigh in the Chaotic Void as he saw nothing had gone wrong, with many beings simply just beginning to acclimate to the wondrous changed environment they were in as Noah knew in any normal creatures were living in this Galaxy, that was soon about to change as nearly everyone would soon become 'awakened'!

With such an abundant Life Essence granted to them and the heavily enhanced essence of the Galaxy, even if a being did not want to- their bodies would naturally drink in the immense amounts of essence as they awakened to a new power .

[Not just that, with such an increased concentration of Life Force and Universal Law Essence, the essence of a Galaxy required to awaken Traits was elevated by a large factor, meaning that the Traits born in beings will be of high quality and even more abundant than other Galaxies . ]

The voice of the Novus Galaxy rang in his mind as the effects of Noah's actions were still being studied, the wide ranging results they would provide being something he would continue to monitor and observe with the passage of time!

He continued to observe the vibrant essence and changes of the Novus Galaxy from the Chaotic Void as he looked at his stat panel again, this time wanting to observe the other side of the Inheritance of the Law of Life .

Naturally, it was the Skill Tree that was responsible for the ridiculous boosts that [Life Essence Endowment] had, the one under the name of [Primeval Tree of Old- Yggdrasil]!

[Primeval Tree of Old- Yggdrasil] :: A skill tree that includes a set of techniques meant only for a being that holds a growing Primeval Tree within their Origin . Abilities include [Life](5/5), [Yggdrasil](5/5), [Primeval Propitious Physique Forging ](5/5), [Ashes to Ashes](5/5) .

[Life](5/5) :: All abilities pertaining to the Law of Life are enhanced by ten times . (+5 Skill Point boost increased enhancement from two to ten)

[Yggdrasil](5/5) :: An ability that most beings cannot keep active for longer than a few minutes because of its immense mana requirements, but a worthy ability of a user of the Law of Life . Project your comprehension in the Law of Life outwards as you take on the form of an ancient tree lost in the vicissitudes of time . In this form, the user gains +3000% Physical and Soul Defense, +3000% to All Damage, +5000% Health and Mana Regeneration, +3000% Increased Area of Effect on all Abilities, +3000% Increased Attack Speed, +100% Universal Laws Resistance Penetration, +100% to all Universal Laws Resistance, +10% Vitality Returned Each Time an Enemy is hit by an Attack . All enemies struck by your branches gain the [Withered] status effect . All Allies struck by your branches gain the [Boosted Life Force] status effect . The user will also gain a Life Shield after every 10 minutes this ability is kept active . (The skill is currently being enhanced by the [Life] ability . )

" . . "

'This . . . I...'

Speechless .

For the first time in a while, Noah was genuinely speechless as he stared at horrendous percentages of a single skill that was being boosted ten times by another skill!

Chapter 652: 652

Noah could not even finish looking at the remaining two skills as he stared dumbly at the one simply termed [Yggdrasil]!

Even he himself was out of words as he stared at the percentage of numbers that simply looked unreal in front of him, the skill called [Yggdrasil] being simply too monstrous .

The abilities were ridiculous to begin with, but the greatest root and the cause of the ridiculous numbers were the skill points that took the single skill that was called [Life] from just increasing the effectiveness of all abilities under the Law of Life from 2 to 10!

This was the reason why the boosts of something like [Life Essence Endowment] were at a crazy number like +1000% Increased Atmospheric Essence, +500% Increased Universal Law Essence, +500% Increased Universal Laws Comprehension, and +100% Increased Life Force for all creatures residing in this area after a certain amount of time . It was because originally, the numbers were respectively +100%, +50%, +50%, and +10% Increased Life Force of all creatures .

Yet even this original percentage increase was sought after in a Life Law Master, and if they utilized the [Life] ability without Noah's skill points, they could even double the effectiveness . But Noah could ridiculously use the ability at 10 times effectiveness because of the unique features that he held!

This stayed true for the ability of [Yggdrasil], its crazy boosts in the thousands being explained this way .

He understood most of the percentages and the boosts they gave, but he was still unclear on the last portion of the skill that stated- [All enemies struck by your branches gain the [Withered] status effect . All Allies struck by your branches gain the [Boosted Life Force] status effect . The user will also gain a Life Shield after every 10 minutes this ability is kept active . ]

His eyes shone as he focused more on the three things mentioned .

[Withered] :: A status effect where the one affected will momentarily leak out their life essence as their bodies become withered .

[Booster Life Force] :: A status effect where the one affected will overflow with life force momentarily as injuries are healed at a rapid rate .

[Life Shield] :: A circular shield of Life essence that forms 10 minutes after [Yggdrasil] is activated . It can take in a set amount of damage before it can be broken . Those within the life shield experience constant healing and rejuvenation .

'Sheesh...'

Just the status effects given by the skill and the Life Shield were powerful by themselves, but they simply added on to the complete insane ability that was [Yggdrasil] .

He looked forward to the time he could use this as he expected a lot from it in battle!

His shock simmered down as his eyes went towards the remaining two skills, but even they did not hold back in their ridiculousness compared to the first .

[Primeval Propitious Physique Forging ](5/5) :: Those embarking on the Ultimate Law of Life cannot profane it by having such weak bodies . This ability allows the user to forge their body into the ancient Primeval Propitious Physique, which when cultivated to completion grants one an unfettered body that can freely traverse through Galaxies and the Chaotic Void, among many more possibilities . (+5 Skill Point boost grants 50% enhancement to the speed of forging) . (The skill is currently being enhanced by the [Life] ability, increasing enhancement to 500%)

[Ashes to Ashes](5/5) :: An ability that is incomplete, with its counterpart, [Dust to Dust], lying with the techniques under the Law of Death . This ability allows the user to remain alive for as long as a drop of their blood remains, being capable of complete health regeneration as long as mana is provided

thereafter . When the user learns of the techniques under the Law of Death, the !#\$%@\$ Skill, [Ashes to Ashes, Dust to Dust], shall be born . (The skill is currently being enhanced by the [Life] ability)

He carefully read over the two skills as he had a lot to look forward to when it came to [Ashes to Ashes], this skill having a grand name with unknown implications when he thought about its counterpart that he would obtain whenever he learned the Ultimate Law of Life . He would be able to utilize the star shaking name of [Ashes to Ashes, Dust to Dust] thereafter!

But the other skill made him even more excited as it was actually something he could utilize right now, the [Primeval Propitious Physique Forging] that allowed him to forge his body into the Primeval Propitious Physique .

To get the full benefits, he passed back through the boundary of the Novus Galaxy as he reappeared inside and left behind the Chaotic Void, sensing the abundant essence and Life Force that he was the cause of as he floated in the starry space .

In this starry space near the boundary of the Novus Galaxy and in the hidden mountains outside the Imperial Citadel of the Brightgold Monarchy Realm of the Nexus Galaxy, two of Noah's bodies got in a seated lotus position as a single word was uttered .

[Primeval Propitious Physique Forging] .

RUMBLE!

Waves of essence erupted out as dense Life Force converged around him, this life force moving in mysterious ways as it came to form extremely colorful green runic circles that swirled around Noah's body .

The green runic circles had ancient designs as they shone with luster, multiple of them forming around all of Noah's body as they rapidly spun and caused the abundant Life Essence to enter every part of Noah's body down to the cellular level, where some cells shone with a brilliant luster as they were strengthened while at the same time causing destruction to some cells as they quickly imploded!

A cycle of destruction and reformation, that was what the [Primeval Propitious Physique Forging] technique provided as all it would leave behind when cultivated sufficiently was a Physique of shocking proportions, a Physique that would allow a being to move unhindered in the Chaotic Void as if it was his home, as a being garnered a body filled with such strong vitality and strength that he could take on powerful experts purely on the strength of his body!

And Noah . . . could progress through at 500% speed while using this skill because of his skill points .

OOOM!

He felt the pleasurable feeling of old skin and muscle falling off as even stronger muscle reformed and even smoother skin returned, the process of destruction and reformation actually not giving a net painful effect as he rather enjoyed cultivating the Primeval Propitious Physique!

In his stat panel, a whole other section had appeared as it displayed wondrous details .

[Noah Osmont] . . .

... .

[Body Cultivation: Primeval Propitious Physique- . 0005%]

A long and arduous journey of cultivating and strengthening his body to insane degrees had begun, even though its length was bound to be 5 times less than everyone else as he traversed through it at shocking speeds .

He could choose to have his clones cultivate it in the Time Space of the Infinite Realm as he used means very few beings could utilize, with their results being something that would shock the forces in the coming future .

As he cultivated the Primeval Propitious Physique with both his bodies and watched the newly appearing percentage go up, ancient green runic circles swirled around his body as Noah officially considered his perception and review of everything he gained under the Inheritance of the Law of Life completed for now!

There was still much to experiment with and observe when it came to the effects of [Life Essence Endowment] over the days to come, as well as monitoring the strength of his body as he forged this new physique .

But he felt like he was heading in the right direction of strength as he had a wide smile everytime he saw the +3000% and +5000% percentage boosts in a particular skill!

He really itched for an enemy to come, he really itched to try [Yggdrasil]!

Chapter 653: 653

At the center of the Imperial Citadel, a terrifying force of power that oversaw the entire Brightgold Monarchy Realm and the Nexus Galaxy itself lay .

To enter further in towards the center where the enormous archaic castles stood strong, one would have to be granted permission or have a sufficient rank which allowed them to do so, where if you wandered in without permission- you might have your life lost in the span of a few seconds!

Among the many archaic and grand castles in the Central region, in the largest one that shimmered with the colors of green and gold- one woman was walking across one of the many halls with vigor and strength not seen in many beings .

This largest castle was one of the many that a particularly powerful Household of the Imperial Citadel resided in- the Dannicus Household where the Imperial Adjudicator stemmed from!

This was the castle known as the Dannicus Fortress!

Above this archaic castle, one could observe a shimmering illusory flag being portrayed above it, the flag holding the symbol of a golden axe and a green sword crossing in a stellar fashion .

The woman walking within the halls of the Dannicus Fortress was naturally the Imperial Princess herself, Anna Lexalius Dannicus . Her two maids were sent away to prepare a few things as her veiled figure went towards the inner parts of the castle, passing through multiple doors as she took out an Emblem

unique to her and shone it on a panel of a particularly large green-gold door, slowly walking through the opening pathway as she entered into a small room .

This room did not have much to boast, but it did have an exquisite table surrounded by six chairs, and the center of the table held a hexagonal dark crystal that shone with an enticing luster!

The moment that Anna entered this room, the dark crystal shone brightly as she pulled out one of the seats and watched as the light transformed into the shape of a strong figure of a man, a being that began to emanate a presence even though he was only being portrayed as an illusory image from this dark crystal!

"My Little Anna..." A strong voice that would have caused the legs of the strongest Generals to tremble rang out with extreme love and affection, looking towards the Imperial Princess with the eyes of a father that were filled with immense love and guilt .

". . . Hey Daddy . Where are you now?" A small voice that seemed like it was coming from a being who could not harm even a fly came out of Anna, her veiled head looking towards the figure of her Father, the Imperial Adjudicator!

"I'm in the Sanguine Galaxy right now, just about to finish establishing order across their realms as we get everything operational . Say, which gift do you want when I come back? They have resources that can promote a faster growth rate for both Laws and Traits here, oh and their food is..." The Imperial Adjudicator was looking doting towards his daughter as he spoke, but he was interrupted when she shook her head lightly .

"Daddy, my Trait is already powerful enough as it is and you know I get bored when I comprehend laws . But I did want to work on my Realm..." Anna spoke as she seemed to have slight hesitation .

"Oh, you want to enter the Realm of Black Hole?" An expectant reply came from the illusory image of the Adjudicator as he said these words as if it was the simplest thing in the world!

"Yeah, I wanted to quickly finish forging the required stars and then breakthrough, and I know we took over the Stellar Sky Galaxy that has treasures which easily allow one to forge stars . . . and I wanted to take a trip there..."

RUMBLE!

". . . "

Vibrant waves of power released from just the illusory figure at this moment as complete silence overcame the room!

". . . You want to step outside the Galaxy? Anna, just wait a few weeks for me . I'll be back and I can personally take you wherever you want to go-"

"No daddy, I just wanna make a quick trip to grab the resources and I'll be back . You can even send a few experts to accompany me if you're worried . "

". . . " A stern silence was from the other end as the Adjudicator seemed to be thinking heavily, this simple question making him more thoughtful than when he discussed with Imperial Rulers on their management of Galaxies!

"Please daddy, I've been cooped up in this castle since I was born and only just went out to see our Imperial Citadel . Nothing bad happened here, and now I just wanna explore another Galaxy while upgrading my realm to another stage..." Anna spoke lightly with an imploring gaze as she thought about the incident her father might not have heard yet, her eyes glimmering behind the veil as a sigh could be heard from the illusory figure of the Imperial Adjudicator .

Anna looked expectantly towards it as she waited for an answer, and spoke one last time to erase any more reservations there could be!

"You also know about my Trait, even Black Hole experts have a hard time dealing with me . . . you know I'll be safe . "

Sound words that shockingly could not be denied rang out, the illusory image putting on a thoughtful expression as a strong voice reverberated from it .

"Alright, but only for a few days! You need to be in and out, and multiple Blessed and Law Masters will be escorting you!"

"Yay!" Anna rose triumphantly in her seat as she jumped across the table and made a cute motion to hug the illusory image, hearing a sigh from it as she laughed happily .

"You're the best! I'll let Maya and Raya know and start preparing now! Be safe in the Sanguine Galaxy!"

Her figure bounced out of the room as she seemed to be filled with excitement, leaving behind a sighing father who felt like he was played .

"Hmm . " His expression straightened up as he stared around the simple room, sending out essence as it alerted numerous powerful experts in the Dannicus Fortress, numerous commands starting to be sent out .

In another location, the veiled Imperial Princess was walking across the halls of the castle with even more vigor, many thoughts coursing through her as she actually got permission to go out exploring outside of her Galaxy for the first time!

As she planned and prepared, the image of one particularly interesting and confident genius entered her mind as a devilishly cute smile crossed her lips, knowing who she would be taking towards this Stellar Sky Galaxy that held powerful resources to promote the forging of Stars in a Nebula as it created many Black Hole experts!

Chapter 654: 654

Across the vast Dark Universe, there existed an unknown number of Galaxies, each with their own uniqueness and qualities .

Over the eons of time, some Galaxies developed in different directions as they obtained unique realms or resources, these differing resources and treasures being one of the major reasons why you had some powerful forces spreading their power to multiple Galaxies in the Dark Universe .

Some Galaxies had unique systems of power, others were blessed with realms that made traversing universal laws much easier, and you even had some with resplendent treasures that would cause the greed of any powerful force .

The treasures that caused greed were mostly ones that increased the realms of beings rapidly or increased law comprehension, and there was even an ancient myth that there existed Ultimate Treasures in some unique galaxies that granted Traits!

This caused some galaxies in the Dark Universe to be given more attention than most .

One particular Galaxy of interest was the Stellar Sky Galaxy, a prominent and powerful Galaxy that was fought over by multiple forces intertwined with the Nexus Galaxy, the Fiends from the Burning Domains Galaxy being one of the bigger losers as the eventual winner was the dominant Imperial Adjudicator of the Nexus Galaxy!

The reason that many forces sought over the Stellar Sky Galaxy was for a rare treasure that was only fostered amongst unique stars present only in this Galaxy, the treasure known as the Effulgent Star Pearl!

The Effulgent Star Pearl was a unique treasure that allowed beings to easily forge stars in their Nebula, these treasures being birthed in planets known as Stellar Stars- and it was these treasures that allowed the power of the Nexus Galaxy to spread even further as they produced multiple Black Hole Realm experts over the past years since bringing the Stellar Sky Galaxy under their control .

This was the same the Galaxy that the Imperial Princess had just gotten permission to go to, and she sent word to one of the beings she would be taking right away as far from the Imperial Citadel in a mountainous region surrounded by trees, Alexander felt the crystal he received from her shine as her voice resounded out .

"Boastful genius! The time has come for you to pay back that favor . Follow the signal of the Imperial Medallion I gave you and come over to my place . We're going exploring!" The commanding voice of the Imperial Princess filled with excitement rang out from the other end as Noah lifted up the medallion while numerous thoughts crossed his mind .

"Exploring what, Princess?" His words were light as he stretched his body and stood up, having just finished forging his body through using the [Primeval Propitious Physique Forging] ability .

His body felt like it was brimming with overwhelming strength as the density of his bones and muscles felt extremely heavy, yet at the same time, he knew he could move multiple times faster than before!

And this was just the initial stages of the Primeval Propitious Physique that he was now forging, the percentage in the stat panel not even having reached 1% yet .

"The Stellar Sky Galaxy where they have treasures to quickly turn those in the Nebula Realm into the Realm of Black Hole . Hurry up or I'll change my mind and leave you behind!" The voice of Anna rang out again as Noah stood up abruptly and replied .

"Coming!"

BOOM!

A sonic boom could be heard as he disappeared into a streak of light, the words of the Princess being extremely enticing .

He thanked [Blind Luck] and [Memorable Visage] of the Protagonist Trait as this wondrous opportunity seemed to have fallen out of nowhere, even though he knew the princess said she would call for him just yesterday .

But the opportunity of using the Universal Rift of the Nexus Galaxy to explore another galaxy that held treasures that would quickly push beings in the realm of Black Hole? That was something he couldn't say no to!

He looked at the direction of the signal that the Imperial Medallion given to him by the Princess released as he teleported multiple times while moving at great speeds, soon passing by the Imperial Library as he went further in land into the Imperial Citadel .

Everything around him was becoming richer and more exquisite as grand archaic castles of nobility populated his sight, slowing his advance as he went along the central golden-green road without making too much noise . The further in he went, the quieter the streets became as an aura of elegance and power permeated!

The Imperial Medallion that he was carrying seemed to be releasing some sort of signal that allowed none of the powerful auras of beings protecting these inner lands of the Imperial Citadel to stop him, his path continuing as passed numerous beings brimming with power along the path and he soon came upon the central archaic castle that the signal was leading to .

Numerous guards were lined up and down on the fortress-like wall of the Dannicus Household as Noah came to a stop, looking over each of the guards that were adorned with a spectacular set of armor as he stopped in front of an enormous fortress gate .

Each of the guards released powerful auras at the Nebula Realm, and he could see that just the two lead guards that had locked their eyes towards him were at the rank of Black Hole!

He saw these powerful pressures delve onto him as he was about to send a message in the medallion once more, but this was exactly when he felt movement as the enormous fortress gate in front of him opened .

OOONG!

With a grand air filled with majesty, what appeared after the opening on the gate of the Dannicus Castle was an exquisite Imperial Vessel clad in white and gold, numerous aurora-colored gems covering the outside!

This Imperial Carriage was being pulled by creatures Noah had seen in the Central Realm of his own Galaxy- Pegasi with grand white wings and luscious mane who released an aura of serenity and strength .

[Void Beast- Light Pegasus] :: A rare creature of the void that is proficient in the law of light . Currently tamed by the...

Details of the Nebula Rank Void Beasts pulling the Imperial Vessel flowed in front of Noah's eyes as he kept Eyes of Truth active at all times, his gaze only being pulled away from the majestic beasts when the Imperial Vessel stopped not too far from him and opened along with a sonorous voice ringing out .

"Come on now, we don't have all day . "

The voice of the Imperial Princess pulled Noah forward as he stepped into the Imperial Vessel to a grand sight inside of it, the Pegasi pulled it flapping their wings as it rose to the skies and shot off at rapid speeds!

At the area it just left, the gates of the Dannicus Household closed as the two guards at the Realm of Black Hole looked at each other .

"Does His Highness know the Princess is inviting a guy to her ventures?" One of the experts spoke in a low whisper as if he did want to be heard saying this .

"Hmph, you want to be the one to tell him? Go ahead and sign your own death wish . " The other guard replied with a rough voice as these two experts of high ranking continued sitting guard for the most powerful Household of the Brightgold Monarchy, and of the Nexus Galaxy by extension .

The Imperial Princess of this household had just embarked on an Imperial Vessel with a being holding two shocking Traits, this Vessel heading towards the Sanctuary of the Watchers where the Universal Rift lay, a grand and shocking adventure waiting for them!

Chapter 655: 655

In the Imperial Vessel that was closely resembling a regal carriage, shockingly powerful personage were traveling with a being that was relatively not well known in the minds of the beings of the Nexus Galaxy as of right now .

This being currently held the name of Alexander, and he was looking at the Imperial Princess that many beings never even got the chance to be in the presence of all their lives while sitting opposite to her on the vessel being carried to the skies by Void Pegasi!

Anna was still veiled as always, but the colors of her clothes had changed as she adorned a red tight-fitting battle suit that was covered by a shimmering red and black cape which covered all the goods she was blessed with .

The Maids Maya and Raya were sitting beside the Princess as they tried not to stare at Alexander, occasionally sending telepathic messages to the Princess as they tried to dissuade her from taking an entire trip with this new being she considered a friend .

These two had only met a few days ago, yet they were now on a vessel that was heading towards the Sanctuary of the Watchers with the goal of exploring another Galaxy!

Yet every time the two maids raised their points, they were quickly shut down as Anna simply told them not to worry about it . The gaze of this Princess was as always on Alexander as she spoke with piercing eyes .

"How come your life force is nearly five times what it was when we left you? You couldn't have made even faster progress in the Law of Life right?" Anna asked a question that puzzled her as she sensed the boundless aura of Life rampaging from Noah

On the Vessel, Noah was spreading his aura as he looked around him, noticing the great speeds the Void Pegasi were traversing as the enormous Imperial Citadel was just a far dot as they soon left the boundaries of the Brightgold Monarchy Realm .

"Naturally, Princess . I was just cultivating the Primeval Propitious Physique that comes with the techniques of the Law of Life, it seems I'm also suited for body cultivation and have some skill extending to this as well . " Noah spoke naturally as the veiled princess gave a light laugh, the two Maids Maya and Raya simply shaking their heads as they were now getting used to his boasting .

"Very well, keep your secrets . We're now stepping out of the Brightgold Monarchy Realm as we take a straight path to the Sanctuary of the Watchers, that being the last place we need to pass before we can take the Universal Rift towards the Stellar Sky Galaxy . " Anna spoke languidly as she sent out her senses to their surroundings, their vessel finally passing through the boundary of the realm they were in as they appeared in the starry space of the Nexus Galaxy!

This would be the first time that Noah with his identity as Alexander stepped out of the Brightgold Monarchy Realm, his gaze bright as he looked all around him . The Princess noted his fascination with a sharp light as she continued .

"What do you know about the Stellar Sky Galaxy?"

Noah pondered this question thoughtfully before he replied, "Not too much . Enlighten me, Princess . "

"Well..."

A conversation continued in the exquisite Imperial Vessel that streaked towards the Sanctuary of the Watchers as Noah was given more information on the uniqueness of the Stellar Sky Galaxy and the Effulgent Star Pearls that were sought after, the Maids chipping in their knowledge every now and then as a fun atmosphere overtook the vessel, the beings within expectant for an adventure!

They traversed through the Nexus Galaxy as they passed countless worlds and Realms, the Void Pegasi pulling the Vessel shooting forth at Light Speed as great distances were covered in a short amount of time .

Occasionally, their Imperial Vessel even entered Teleportation Rifts that were set up all over the Nexus Galaxy to allow for faster transportation across vast distances, their party soon nearing the Sanctuary of the Watchers that surrounded an enormous aurora colored Universal Rift .

The Sanctuary of the Watchers was a mystical sight to come across, and extremely busy at that as numerous Vessels could be seen entering and leaving constantly . It was unique as it wasn't a planet or realm, but an enormous structure the size of a world that surrounded the hundreds of miles long Universal Rift at the very center .

It was designed in a circular manner as ten enormous large humanoid statues were built on top of an obsidian disc facing towards the Rift, these statues having wide halls and rooms as they acted like the base which beings moved in!

A large black obsidian disc the size of a small world enclosing a Universal Rift in the center, 10 enormous Statues built upon this obsidian as they focused their gold-green eyes and faces towards it . This was the Sanctuary of the Watchers!

This was the location that numerous Vessels visited daily as they were assigned to specific Watchers before being granted permission to use the Universal Rift to explore the Dark Universe .

Today, it was particularly busy as in the central area of the exquisite structure that was the Sanctuary of the Watchers- ten Watchers were assigned to a single departing party, with a group of Guards being prepared to escort this party on their exploration outside of the Nexus Galaxy .

Those considered Guards for this mission were shocking to say the least, where among those included- 10 were in the Black Hole Realm, with double the amount being at the Nebula Realm!

A collection of Blessed and Law Masters were prepared for the journey that a single being wanted to take, and such a powerful defensive escort force was created because of the identity of the being stepping out of the Nexus Galaxy for the first time .

As the unique Imperial Vessel containing this party arrived at the Sanctuary of the Watchers, many beings finally understood the reason for the seriousness and the commotion around this grand place for the last few hours!

Powerful Blessed, Law Masters, and even other Watchers looked on at the unexpected sight of the Imperial Vessel with the design of the golden axe and green sword that represented the House of Dannicus land on the Sanctuary, simply waiting to be received and granted the permission before setting off into the Universal Rift . . .

Chapter 656: 656

General Zadan had been notified the moment the Watchers received word that the Imperial Princess would be setting off for another Galaxy, his presence being the reason why so many powerful beings were assigned to protect the Imperial Vessel that would soon be setting off .

He had a somber expression as he stared at the doors of the Imperial Vessel opening and watching the veiled Anna descend down, and this expression became one of annoyance when General Zadan also observed the genius proficient in the Law of Life that he had met just prior!

"Little Anna, I don't think I or your father knew would be taking company with you . " His gaze was locked on to Alexander as the Imperial Princess bowed her head towards him .

"Don't worry about him, Uncle . He's also here for my protection! Even though I see you may have already gone overboard with that..." The Imperial Princess spoke with a sweet tone as she saw the 10 Black Hole experts with 20 more in the Nebula Realm stationed near them ready to board two other Vessels .

"These Imperials have sworn their lives on keeping you safe, and it is more of a precaution from the Imperial Adjudicator . Even though we have conquered the Stellar Sky Galaxy, it doesn't hurt to be safe . " General Zadan pointed to the protectors standing by their side as they bowed in acknowledgment .

As General Zadan introduced the party to protect them, the Princess nodded as she expressed her gratitude, the Watchers assigned to them giving them coordinates that could be used on a unique map that outlined the numerous zones around the Nexus Galaxy that had been explored!

While all of this was occurring, Noah glanced around the Sanctuary of the Watchers as Eyes of Truth granted him boundless information, but his gaze was overtaken when he turned towards the mystery that was the Universal Rift itself .

[Chaotic Void Rift] :: A Lesser Universal Rift that is currently being used to grant a Void Aura over those passing through it, giving them safe passage in the Chaotic Void for 30 days . Forming randomly throughout the Dark Universe, these Void Rifts can be utilized for a variety of means when powered by the essence of the Tools of Ruination . When properly used with the aid of the Tools of Ruination, one can [email protected]^#%#\$ . . .

...!

Alarm rose in his eyes as he read over the information numerous times, not having expected the Rift that the powerhouses of the Nexus Galaxy termed a Universal Rift was actually a Chaotic Void Rift that was a lesser type of a Universal Rift, and the shocking thing was the terrifying name of Tools of Ruination popping up again!

Whenever this term popped up while Noah used the [Eyes of Truth] under the Protagonist Trait, it was the only thing that would always be followed by incomprehensible words that could not be read . He would have to elevate his Protagonist Trait to the next level if he wanted the chance to pierce through the veils of secrecy that came with the terrifying Tools of Ruination that made both of his two Traits possible!

As Noah became lost in the glimmer of the Lesser Universal Rift, much of the process behind him finished as they were soon ready to head out .

"We have been mining the Effulgent Star Pearls for a while now as we still face limited supply, so I'll be sure to send a message ahead to have the recently mined ones saved for your arrival . " Many things were outlined for them for the sake of safety, going through numerous words of advice and regulations before they could reboard their Imperial Vessel and get ready to enter the rainbow-colored Universal Rift .

"I'll be back soon, Uncle Zadan!" Anna voiced out joyfully as they boarded the Imperial Vessel once more, the exquisite carriage being pulled by two Void Pegasi rising to the skies as two more Imperial Vessels floated behind it .

General Zadan watched this scene with cold eyes as he wished them a safe and boring journey, as someone like him much preferred when things were boring and nothing drastic occurred!

RUMBLE!

The three Vessels shot forth towards the Lesser Universal Rift as they set off towards the Stellar Sky Galaxy, nobody among those watching realizing that this event marked the beginning of a drastically changing future...

---

Light years away from the Nexus Galaxy, in the Burning Domains Galaxy that had the Fiends which Noah met during his Blessed Imperial Selection .

This unique Galaxy was among the many that the Imperials of the Nexus Galaxy had made enemies of, with many casualties occurring on both sides as even now, multiple Fiends were locked in places like the Devouring Hells Realms in the Nexus Galaxy, and Imperials taken prisoners were also locked in hellish realms within the Burning Domains Galaxy!

Most of the conflict occurred when it came to these two Galaxies trying to impose their influence onto nearby regions, the numerous clashes over the years being a result of territorial battles!

Deep within this Galaxy that had a calm exterior, shocking movements were happening within as the Fiends born with immense talent to traverse ranks with the handicap of not being proficient in Laws were being grown in large numbers .

In a Realm near the Center of this Galaxy, a Fiend Emperor that normally ruled over multiple Realms of the Burning Domains Galaxy was kneeling down while bowing to a mountainous figure that seemed to be focusing on a page floating in front of its eyes .

"Master, we have gotten word of new developments on the side of the Imperials . It seems that a Royal of the Dannicus Household is setting off a mission of conquest with more than three Vessels seen leaving the Nexus Galaxy, granting us a perfect chance to carry out our plans . "

The Fiend Emperor had a unique body that thrummed with tremendous physical strength, where those knowledgeable would know that it surpassed the Realm of Nebula and Black Hole purely on strength alone, with his rank even being above that!

Yet this Fiend Emperor was bowing towards another creature, the Entity who had been focusing on the dark floating page with immense concentration as the words recently released grabbed its attention .

"Mmm . . . It might still be too early..." The voice coming out of the Entity surrounded like searing metal clanging against each other, its voice extremely unnatural and grating, but one could make out it was slightly feminine .

The Fiend Emperor bowed even lower while continuing to speak . "Master, the Vessels are heading towards a galaxy you wanted us to conquer before . . . the Stellar Sky Galaxy..."

RUMBLE!

A fearsome pressure appeared with the mention of this, the Entity glancing at the Fiend Emperor as it replied after thoughtful consideration .

"The only Royal in the Dannicus Household aside from the Imperial Adjudicator is his daughter, yes? Mmm . . . this could be sufficient enough to keep his attention while we finally act . He is the only one among the few Galactic Rulers who shows any capability, and one that has hindered my plans the most . . . "

...!

With these words, the Fiend Emperor nodded with vigor, the voice of the Entity continuing to ring out!

"These fools prancing around as Rulers of Galaxies do not know a thing about the Truth, believing Supreme and Ultimate Laws are the peaks of strength and that Blessings from Galaxies are sufficient to traverse the wide Dark Universe . They do not even have knowledge of the @\$, nor could they even

imagine the shocking truth of this Universe! . . . Yet the things they covet are also those I want, and there should be another Page from the Book of Ruination in the Stellar Sky Galaxy..."

The Entity said these words as she waved her hands and caused the movement of the floating page in front of her, her gaze locking with the excited Fiend Emperor as she relayed her command .

"Gather your brothers and sisters and all the Fiends we have managed to produce over the last thousands of years, and let your Elders know . I still cannot move with my injuries yet . . . but I should have raised more than enough of you all to cause some commotion and stand against these puny Galactic Rulers, even the Imperials . "

RUMBLE!

"You shall go forth and conquer all the Galaxies we have our eyes on at once, not giving the Imperials time to even know what is happening . Use the daughter that the slightly able Imperial Adjudicator raised as a bargaining piece, or even kill her if you must as you occupy the Stellar Sky Galaxy . Your mission there will be to specifically locate a page like this . "

The glimmering dark page that represented another page from the Book of Ruination floated and imprinted itself in the eyes of the Fiend Emperor, his heart thumping as he seemed completely enamored by the figure of the powerful Entity as he replied with conviction!

"Whatever you want shall be yours, Master!"

OOOM!

This was the conviction of a Fiend Emperor, a being not in the Nebula or the Realm of Black Hole, but a being in the QUASAR Realm! Such a being gave strong words of conviction as he chose to lead the force that would occupy a particular Stellar Sky Galaxy that a party was adventuring towards .

After the Nebula Realm and the creation of a Black Hole, the next Realm thereafter was something of shocking stature and strength . . . the realm known as QUASAR .

Also, one must recall that the Entity told this Fiend Emperor to gather his brothers and sisters, and even let his Elders know!

This meant that there were multiple beings with power at the QUASAR Realm like this Fiend Emperor, and there were even unknown Elders standing above beings such as this .

To top it all off, there was an Entity that was also trying to collect more information on the Tools of Ruination as they looked for the pages of the Book of Ruination! Even though one would not know the power of this Entity as she was injured, what did her ability to raise multiple Fiend Emperors at the QUASAR realm such as the one bowing before her say?

The race of Fiends that had no advancements in the Universal Laws but could rapidly advance through the Realms of Power . . . these beings began showing movement after remaining hidden for thousands of years, choosing to move in the most explosive fashion in response to a single action that caused their plans to align .

The daughter of the most powerful Galactic Ruler standing in their way had left her home for the first time ever, her actions providing unique opportunities as a powerful Entity saw uses of this Royal against one of their most powerful enemies!

The Imperial Adjudicator would have never expected a possibility of a terrifying injured Entity lying behind the Fiends, one of the many forces he fought over the thousands of years . Nor would he have known that these fiends only ever sent out their surface-level pawns on their many battles . Nor could he predict allowing his daughter to simply go to another Galaxy already under their control . . . would be the spark for such a shocking sequence of events, the spark that made a deeply hidden force choose to move at this moment!

Chapter 657: 657

The Imperial Vessel Noah was on passed through the Lesser Universal Rift with ease as in the next moment, it appeared outside the Nexus Galaxy .

A unique essence covered the vessel as it protected them from the Chaotic Void outside, even though the essence of a Grand Controller or even something like having a powerful physique similar to Noah would be more than enough to withstand the terrifying pressure and terror of the Chaotic Void outside of Galaxies .

The Vessel left behind the Nexus Galaxy that Noah had only been on a few days as it began heading towards one of the locations that were under the control of the Nexus Galaxy- the Stellar Sky Galaxy!

The veiled Imperial Princess within the Vessel was spreading her aura out as she stared at everything around them with wonder, even the darkness of the Chaotic Void seemingly interesting to her . Being given permission to travel out of her native Galaxy for the first time was naturally something that made Anna very happy!

Even the maids Maya and Raya stared at the glimmering lights the Void Pegasi pulling the carriage were releasing as they streaked across with the speed of light, following a predetermined path towards the Stellar Sky Galaxy as they would pass various relay stations holding portals that were set up for smoother and faster journeys across the Void to the places under the influence of the Imperials .

"You've heard the rumors of powerful Entities roaming the Chaotic Void? Of beings so powerful that they could destroy entire Galaxies with a wave of their hands?"

The Princess continued making conversation as the minutes passed during their journey, many things being discussed with this girl that seemed to never have had the chance to talk freely to someone else like Noah before!

Noah replied with interest as he amassed more information about the Nexus Galaxy and their surroundings, even more so what forces they had under their control .

"Apparently some of these Entities do not even bother with Universal Laws, and they are proficient in something even more terrifying-"

RUMBLE!

Anna was talking with enthusiasm while Maya and Raya looked towards her with adoring expressions, when her words suddenly came to a stop as powerful waves of Life Essence erupted from Noah out of nowhere, his body suddenly being covered by numerous ancient runic circles!

"You..."

They looked on with gawking expression as Noah replied with an apologetic expression, since the reason was because his counterpart that held half of his Origin in the Novus Galaxy had been cultivating the [Primeval Propitious Physique], and had actually reached the 1% mark at this time as the Primeval Tree within the body of Alexander released a burst out with Life Essence and caused the appearance of the ancient runic sigils that naturally strengthened this body to the 1% mark as well!

"Sorry for interrupting, I didn't think my body cultivation in the Law of Life would upgrade just from time passing . You were mentioning the Entities..."

His apologetic words seemed extremely condescending to the three girls as they looked at him while shaking their heads at his continued ridiculousness, knowing that no normal being would make advancements while just sitting down talking!

An even more curious light passed through the hidden eyes of the Imperial Princess as she found her intuition of this Alexander to be more and more correct .

Traversing the Chaotic Void with two gorgeous Maids and a veiled Imperial Princess, Alexander made advancements as he merely sat down in a Vessel heading to another Galaxy!

---

Meanwhile in the Novus Galaxy, Noah's body felt the burst of strength from the Primeval Propitious Physique as the ancient runic circles died down around his body, putting on a silk golden robe to cover his steel forged muscles that seemed taut and trembling with power!

He then conversed with the Novus Galaxy as he checked up on the continued changes throughout the Galaxy from having its Atmospheric Essence, Law Essence and Comprehension, and even the Life Force of its beings strengthened to such a large extent .

The progression of beings ascending through the Realms was the greatest change that the overabundance of essence caused, especially in a place like his Infinite Realm causing for his subordinates and Infinite Realm Beasts to elevate themselves greatly in a short amount of time .

This effect was increased even more for those training in the numerous Time Spaces spread throughout the Infinite Realm, where only a day would have passed in the outside world as they spent more than two months in the Time Space!

Such a unique convergence of factors allowed for most of the Harbingers to step into the ranks of Star Forgers, and their eyes were already set on achieving the Nebula Realm as they continued to train incessantly .

The even larger change was the formation and advancement of more and more Infinite Realm Beasts who had the Medicinal Herbs and Fruits directly from the Realm being extremely conducive to elevating

their ranks, creating for a fearsome situation where hundreds of thousands of ridiculously powerful Beasts were rising through the ranks every day .

One would be shocked to know that when it came to sheer numbers of beings in higher realms, the Infinite Realm Beasts alone had a huge lead when they were compared to any of the other Races living in the Infinite Realm!

But this wasn't the only change worthy of note- the biggest one was the continued granting of Traits that occurred with even more frequency, where another Harbinger of Sin had gotten a powerful Trait .

It wasn't just any common Trait, but the first EPSILON ranked Trait to appear in the Novus Galaxy!

Claiming the unique title of being the only person currently holding an EPSILON rank trait was . . . Kazuhiko!

OOOOOM!

The gaze of this being who could be the main character of his own book was sharp as his dark hair waved from the winds of a high mountain he stood on in the Infinite Realm .

Atop this mountain, Kazuhiko was staring at the vast army of Barbatos filled with Undead that were brimming with the Essence of Life, the Star Forging Barbatos herself accompanied by the Emperor Penguin, Steel Mikhail, Imperial Phoenix, and many more of Noah's powerful subordinates as they all came together to test out the power of the first EPSILON ranked Trait of the Novus Galaxy .

Being faced with so many powerful beings at the same rank as him, Kazuhiko was actually not afraid as he couldn't help but have a wide smile appearing on his face, his eyes nearly tearing out of happiness as he bellowed out a roar of power while activating his Trait- [Dark Emperor]!

RUMBLE!

Chapter 658: 658

Faced against all of his allies, Kazuhiko fearlessly roared out without any shame - [Dark Emperor]!

[Dark Emperor](EPSILON) :: A Trait that allows the user to turn their body and origin into a unique essence of Darkness, becoming a conflagration of dark smoke as they gain a 100% reduction in Physical Damage, 50% reduction in soul damage, and the ability to utilize their new forms in many unimaginable ways as they only become more proficient in time .

Worthy of EPSILON rank! A Trait that gave the user complete reduction to Physical Damage, and went even further to reduce Soul Damage by half, while also changing their form into a conflagration of darkness . Worthy of a Trait!

RUMBLE!

Kazuhiko's body erupted into tendrils of palpating darkness as it barreled towards the Harbingers menacingly, and one could distinctly begin to see the formation of katanas and serrated blades from this extremely dark smog as they thundered towards the Harbingers and threatened to overwhelm them .

The Undead under Barbatos slashed their weapons as others cast skills filled with the aura of death, but all of them seamlessly passed through the dark smoke that was Kazuhiko as this darkness went on to enter the orifices of the undead, the creatures becoming immobilized!

"RAA! RAA! RAA!"

A piercing cry erupted out at this moment as a gargantuan Emperor Penguin landed among the dark smoke, his flippers filled with the dense essence of space and time as it clashed with the smoke .

The essence of laws was the only thing capable of dealing damage to the body of a being utilizing [Dark Emperor], but the range of Kazuhiko's body was currently too enormous as he not only focused on the Emperor Penguin, but he was surrounding many of the other Harbingers while facing his utmost attention on a single being- a dark skinned woman with glistening hair, the Inquisitor that held a terrifying DELTA Trait called [Extinction Flames] which was wiping away his form of darkness rapidly every time Athena waved her hands!

OOOOH!

A bellow erupted from the dark smog that was Kazuhiko, barreling towards everything and everyone as he actually stood on par with multiple beings at the same rank as him without any issues .

As long as he withstood and avoided the attacks which could deal Soul Damage, his complete immunity to Physical Damage in this state would make him a terrifying combatant on any battlefield!

Of course, if someone like Noah who held terrifying abilities that purely dealt Soul Damage came, it would be a different case entirely .

Minutes passed as many looked towards the powerful darkness with envy, wondering if they would get such a Trait as this . It continued to surround them like a dark smoke as Kazuhiko separated them to stop them from working together, his attention placed on those proficient with laws that could deal even a hint of soul damage to him .

He continued to show a dominating presence in the sparring field, but it was also at this moment that this dark smoke came to a stop, a shocked voice of Kazuhiko ringing out as this smoke began to recede towards one location .

"Stop stop stop!" The shout was slightly hurried as Kazuhiko saw the others had many powerful skills ready to be thrown his way as they continued to test his invincibility and the extent of his Trait .

"I . . . I'm running out of mana...haaa . " He released a defeated sigh after standing against many powerful beings, realizing the high cost of keeping his Trait active as he sought to increase his Realm and have more essence to use!

As the dark smoke which had spread to hundreds of meters receded to become his single human body, one could see a determined expression on Kazuhiko as a dashing smile could be seen on his face, his heart set on getting stronger as he saw rapid progress with the addition of this Trait .

If one looked around at the scene of Harbingers in this sparring field, they would observe determined expressions on all of them as they pushed themselves to work even harder!

...

---

In the Chaotic Void, the three Imperial Vessels had passed through numerous teleportation stations as they neared the position of the Stellar Sky Galaxy, spending a bit over 7 hours on this journey!

Noah's eyes shimmered as they reached the last relay station set up by the Imperials in the Chaotic Void, his senses observing the beginning of a boundary of a glimmering Galaxy .

"An average Galaxy through and through, but its position was heavily elevated because of the Effulgent Star Pearls that could be found in it . "

Maya had become more talkative over the trip as she spoke out with shining eyes, the four of them in the Imperial Vessel of the Dannicus Household observing the bounds of the Stellar Sky Galaxy with expectant eyes .

"Let's go!" An excited command was released from the Imperial Princess as the Void Pegasi streaked forward, the station set up by Imperials outside the boundary of the galaxy not doing a thing to stop them as they very well knew their identity, only sending acknowledgment their way .

RUMBLE!

The Void Beasts seamlessly passed through the shimmering barrier without any issues, three Vessels successfully passing through from the Void and into a Galaxy! These three vessels came to a stop near the boundary as the beings within stepped out, looking into the new galaxy as a welcome party was there to greet them .

The figures acting as the welcoming party were numerous as a shockingly handsome man was at the forefront with a bright smile, the light of fate coursing through his eyes as they honed in on the veiled Imperial Princess while giving glances to the two Maids and Noah .

"Imperial Princess, I welcome you to our everything . . . I welcome you to our Stellar Sky Galaxy . "

OOOOOH!

Triumphant horns of celebration bellowed out as it seemed an entire show was brought to this welcome reception, Noah already using Eyes of Truth on anything he saw as he began gathering tons of information .

Among the welcome party, multiple beings carrying the emblems of Imperials could be seen as they also bowed their heads towards the Imperial Princess with a warm welcome . But the man in focus at the moment has shining blue hair somehow waving in the starry space, Anna glancing towards this being with a nod .

"You must be...?" Anna spoke with a calm tone as their party moved forward, the 10 Black Hole experts and 20 Nebula Rank guards standing not too far behind them releasing an oppressive pressure all around .

"I am the only son of the Ruler of the Stellar Sky Galaxy that bends to the Imperial Adjudicator, Andreas Von Husen!"

A grand announcement was made as the son of the ruler of this Galaxy that was under the rule of Imperials came to welcome the Imperial Princess . Light greetings were exchanged between them as they began moving across the starry space of this new Galaxy, leaving the Imperial Vessels behind as they took in the time to enjoy the new sights .

"The word we received mentioned your purpose was the Effulgent Star Pearls?" Andreas spoke with an inquisitive face as a smile remained on him at all times .

"Yes, Our Lady wishes to use these treasures to quickly move through the Nebula Realm and approach the creation of a Black Hole . " Maya replied to him passively as glimmering stars began to appear within their sights .

A sigh could be heard from Andreas at these words as he spoke out with melancholy . "That may be a bit problematic at this time, Your Highness . We have been trying to locate and mine the Effulgent Star Pearls on any of the millions of Stars and thousands of Realms over the years, with the known locations running dry and the Pearls themselves being distributed for use the moment they are mined . I'm afraid there won't be too many at this time . . . unless you are okay with spending a few weeks in our small Galaxy until a few hundred are collected . "

The smile remained on Andreas as his dashing face seemed to exude the sadness he felt at not being able to provide for what the Imperial Princess wanted, and Noah only smiled as he looked at this character's description with the Eyes of Truth as he understood his true nature!

A son of the Ruler of the Stellar Sky Galaxy! Someone who should have inherited and ruled something so vast and wide that very few could claim the title of it in the Dark Universe .

Yet all of this was taken away by the Imperials as he had to now even attend to a mere Princess with a smiling expression! The true emotions that Andreas felt as well as his true nature . . . all of it was visible under Noah's eyes as they arrived in the Stellar Sky Galaxy and met some of its inhabitants, a new adventure underway as an interesting treasure was their goal- the Effulgent Star Pearl!

Chapter 659: 659

The Stellar Sky Galaxy was a particularly gorgeous galaxy as it held many unique stars . Part of its name stemmed from the planets that were termed Stellar Stars, stellar bodies that could be found across the billions of stars in the wide galaxy, with some of them even being more unique as they became Stellar Realms .

The one thing that caused other Galaxies to fight for the Stellar Sky Galaxy was the unique treasure known as the Effulgent Star Pearls which could be found on the rare Stellar Stars, but these Pearls had unique attributes that caused them very hard to locate!

One could not sense them even if they spread out their aura or consciousness over an entire star, these Pearls being only visible to the naked eye as the only method of detection . It required beings to dig across an expansive star of thousands of miles!

To make it even worse, one had to be very careful while mining them, as the slightest disturbances could affect the treasures essence held within the Effulgent Star Pearls, making them quickly leak out this potent essence as it became lost in the atmosphere if one did not begin absorbing it right away . If

enough shock was felt from a being rampantly using their strength to break through the layers of earth and search for them, the pearls would shatter right away as they watched the potent essence they contained quickly become assimilated in the atmosphere of the star once again .

So the treasures were rare, delicate, and hard to locate among the many Stellar Stars and Realms!

The entire task of Imperials stationed in the Stellar Sky Galaxy was to work with the Natives to locate and mine the Effulgent Star Pearls, coming to an agreement to provide a set amount to the Imperials and a set amount to the natives themselves .

Being as rare and as useful as they were, the Pearls were normally used up in a matter of days by the Imperials and Natives alike as a few were transported back to the Nexus Galaxy!

At this moment, the stock of the Pearls was nearly depleted as Andreas mentioned the locations they knew and had been mining so far were running dry .

"So all we have to do is find Stellar Stars and Realms ourselves as we can mine the Effulgent Star Pearls and use them as we wish, yes?"

Anna spoke to the dashing Andreas as they streaked across the starry space, their figures coming to a stop in front of a glimmering star that shone with a silver and white colored aurora .

"Theoretically, yes . But even we as Natives who have even been born on Stellar Stars spend a long time just to locate the Pearls, and we have to be even more careful while mining them as even vibrations can cause them damage as they leak out their wondrous essence . Even this Stellar Star in front of us that had recently begun to be mined is nearly depleted, where we are spending most of our time just trying to locate the Pearls " The son of the Ruler of the Stellar Sky Galaxy, Andreas, replied with a smile as all he got was a nod from Anna .

The veiled Princess and her maids looked with sparkling eyes towards the star that shone with a silver and white brilliance, but it was Alexander's eyes that were shining with even more intense lights than them as they gazed upon the Stellar Star with Eyes of Truth!

"What do you think, Boastful Genius? Can you show us something surprising on this matter as well?" Anna turned towards Alexander as she spoke with a tone that surprised Andreas, as whenever her words were directed towards him they were completely cold and flat . But towards this being, they actually seemed lively?

"Well, a Stellar Star that holds these Pearls is right in front of our eyes, so I don't see a reason why we shouldn't mine some ourselves . " Alexander's tone that seemed extremely calm and confident rang out, drawing the eyes of the many experts guarding their party and raising the brows of Andreas and the natives of the Stellar Sky Galaxy that came with him even more .

"I don't mean to dampen your spirits, but we have lived and mined these Star Pearls for centuries, with our methods being honed and becoming impeccable over the years . Even with my experience, I can at most mine out a Star Pearl of High Grade if I'm lucky . Newcomers to mining will either destroy the Pearl completely, or come out with a Low Grade one if they're lucky!" Words filled with disdain flowed from Andreas as his eyes focused on the man coming with the party of the Imperial Princess!

He had watched the demeanor of the Imperials that had been on this region of the Galaxy and even the 10 Black Hole and 20 Nebula Ran experts the Princess came with, and neither of them looked at this being in any special way, but the Princess was constantly conversing with him .

A feeling of competition seemed to rise from Andreas as he looked at Alexander, wanting to know what qualifications he even had to stand amongst the Princess and them!

He was the son of a Galactic Ruler, a being that held control over a Galaxy!

Even if his father was under the banner of the Imperial Adjudicator, Andreas still had a powerful status . So why should this man be receiving more attention and such a tone from the Imperial Princess and not him?

His words were meant to provoke, but only a light smile covered Alexander's face as he spoke out while looking at the Stellar Star in front of them .

"Why don't we head down and see the process of locating and mining? I'm curious to try a little something myself . "

His eyes were shining with intense luster because a text box with golden-red words floated in front of him, Eyes of Truth showing him an ecstatic set of information as always .

[Stellar Star] :: A unique planet that can be found in the Stellar Sky Galaxy . A notable thing about this type of star are the unique Effulgent Star Pearls that can be found from them, these pearls being capable of allowing beings to forge stars within their Nebulae with even more ease than using cores . On this particular Stellar Star, the Effulgent Star Pearls can be found at . . . The best way to mine them is through the use of Universal Law Essence, with a higher tiered Law being capable of granting one a Star Pearl of the highest quality...

Information upon information passed through his eyes as he hid his smile and laughed in his mind!

Spectacular treasures that were so hard to find that one could only blindly search through the star as they dug everywhere just to find their location . So delicate when they were mined that even the slightest vibrations damaged them! Yet his Trait...

It was being ridiculous as always!

Chapter 660: 660

The collection of beings with shaking auras of power all descended onto one of the many Stellar Stars of the Stellar Sky Galaxy, the eyes of a particular group being much more carefree and expectant than others as the unique features of these stars displayed themselves in front of their eyes .

The silver aurora that covered the Stellar Star remained as its key feature as one landed on it, its very atmosphere being surrounded by this unique atmospheric essence as it seemed like a type of silver mist was covering the entire planet, where one could not visibly see with their naked eye if they looked to a place a mile away .

The mist was a sign of dense essence coagulation, Noah gazing at the earth of this star as he saw grand mountain ranges tinted with green and silver, the movements of numerous living creatures being felt all around as the one major thing remained on this planet- a sense of calm!

"We have to work very efficiently and carefully while locating and mining the Effulgent Star Pearls, with a base being built on every Star we have begun to mine as mining parties are sent out every day to carefully dig through the planet and search . "

Andreas continued to introduce everything around them as Anna and her maids looked around them with interest, their auras sensing the movements of many beings moving all around the continents of this Stellar Star .

Noah on the other hand seemed to be looking at specific locations as he shone with a mysterious smile on his face, their party landing at an enormous silver mountain that had the entrance of a huge cavern!

"To allow everyone to see the hardship we go through every day to mine, I asked my forces to stop their mining of an Effulgent Pearl that appeared on any stars these past hours, and a lucky miner was able to find and preserve a pearl on this star we are on . Come, I will show you the process we have to go through every time!"

Andreas looked ready to show off and impress others as he led them into the cavern, the inside of it being briefly dark before it was lit up by silver crystals visible all over the walls of this wide cave .

The glimmering colors grabbed the girls' eyesight as they went further into the stellar mine, passing multiple bowing individuals in unique outfits that seemed to distinguish them for the jobs they were doing . They proceeded forward for a few minutes until they came to a point where the silver light was shining the brightest, the party of many powerful beings coming to rest their eyes on a cavern wall where a clear round crystal could be seen emitting all the silver light!

WAA!

A unique aura of majesty spread from it as it seemed precious, the miners looking over it nodding towards them as Andreas stepped forward while speaking, his arms being covered by the essence of water as he carefully went to 'pluck' out this silver circular crystal that was the Effulgent Star Pearl .

"Once we can locate one where our digging did not completely disrupt or destroy it, we carefully wrap it with law essence before digging it out, and we can then obtain . . . the Effulgent Star Pearl..."

His blue essence of the law of water moved seamlessly as he pulled off the delicate Pearl from the cavern wall while keeping it intact, controlling it as it floated towards the veiled Imperial Princess!

With a dashing smile, Andreas offered her the Pearl as he spoke . "For you, Princess . Be very careful with it as even a little pressure can cause it to burst, but it will be very easy to absorb its essence as you can forge three stars from a Medium Grade Star Pearl like this . "

Noah looked at this sight while laughing inside, knowing full well that this terrifying Princess did not even put this Andreas character in her mind, yet he was trying so hard!

As if to prove a point, Anna grabbed the Effulgent Star Pearl in front of her as she looked at it curiously, and then turned in his direction as she threw the delicate treasure towards him .

Gasps could be heard throughout the cavern as Noah lightly caught it in the air by wrapping his essence in it, the sonorous voice of the Imperial Princess ringing out .

"Alright Analyzer, what can you tell me about it?"

A hidden smile could barely be perceived behind the veiled princess as she called Alexander with the name of this body's old Trait, a bubble appearing in front of his eyes as he read the words detailed through it .

[Effulgent Star Pearl](Middle Grade) :: Poorly dug out with a horrible technique and sustaining vibrational damage before it was uncovered, this treasure allows the user absorbing it to forge 3 . 5 Stars within their Nebula .

"About three and a half stars can be formed from this, and I might be able to locate some more of them on this star after taking a look at this . " He said these words calmly as they drew the ire of the surrounding natives, but he shockingly did have knowledge of where these rare and delicate treasures that most of the time broke because of how deeply they were hidden underground and the process required to unveil them!

Eyes of Truth had shown him multiple coordinates on this Stellar Star that mentioned where he could locate the Star Pearls, and he would be able to mine with ease while maintaining the highest quality if he so wished!

"Hmph, please do not insult our prowess and techniques we have developed over thousands of years . To even locate a Pearl required luck, and even more luck that you do not destroy it while digging through the earth . Nobody is able to just find one if they wish!"

Cold words came from Andreas as he felt that he lost his face to this being every time, where he became the center of attention from the hands of the princess while someone like him continued to be ignored .

Now he was bragging about being able to find Star Pearls after just touching one?

Arrogant!

The maids gave ridiculing looks while looking at the demeanor of Andreas, even the Princess ignoring this being as her eyes focused on Noah while she spoke .

"Surprise us . "

Noah nodded with a smile at these words as his body erupted with the essence of Aether, the destructive essence wrapping him from head to toe as he walked towards the cavernous wall in front of him .

"You . . . what are you doing?"

Surprised gasps came from the respectfully bowing natives as they had a foreboding feeling, and their thoughts came true the next instant as they saw the debris flying out from the cavernous wall, the arrogant being in front of their eyes beginning to forcefully dig forward using the destructive essence of Aether as he created a man-sized 2 meter hole while recklessly moving forward beneath the silver mountain .

"Stop! This is a mining spot that should still have multiple Star Pearls, if you use such destructive force you will destroy all of them!" Andreas bellowed out commandingly as Noah's words did not even reach him, his senses following the direction that Eyes of Truth told him as he used the essence of Aether to

move across the hard earth like a drill, disintegrating much of the debris with only some dust flying out every now and then!

Andreas was bubbling with rage as he was about to move, but he felt the eyes of multiple experts meant to protect the Princess and her party land on him at this moment as he shivered, reigning in his rage as he glanced towards the Imperial Princess that had begun following the man sized hole being made with interested steps .

"Princess . . . please..." Andreas seemed to plead with them as he also followed, many of the natives having looks of horror as they expected this boorish man with his destructive essence to very quickly destroy any Star Pearls that might have been remaining on this mountain .

Such a loss!

They followed behind Andreas with aching hearts as they could hear the voice of this Young Ruler of the Stellar Sky Galaxy continue to ring out with complaints, but it very quickly halted as those who squeezed in to the man sized hole spread out their awareness to clearly see what was happening saw his mouth agape with his eyes nearly popping out .

In front of them, the 'boorish' man playing with the destructive essence of Aether had stopped right before glimmering silver light, a light that only represented one thing as they then observed the essence surrounding him to change from the destructive Aether into a green one filled with an overabundance of life!

They saw this essence go forward as it carefully dug out the last layer of earth, unveiling a shining bright Effulgent Star Pearl that was shining more resplendently than any that they had seen before .

No vibrational damage or any type of damage was dealt to it, the 'boorish' being in front of them somehow being knowledgeable to come to a stop right before he even hit the adjacent wall that the Pearl was stuck in and pulverized it along with anything else, and they shockingly saw him use the essence of the Ultimate Law of Life as he carefully wrapped it around the pearl and plucked it out!

RUMBLE!

"This..."

"Not possible..."

"Unbelievable!"

The miners that had lived all of their lives looking for and trying to carefully mine Effulgent Star Pearls were trembling with shock as they saw the bright light that this Pearl released . A hazy cloud of silver seemed to continuously wrap around the pearl as the life essence wrapping around it reduced, and when they saw this hazy white essence . . . they trembled even more .

"That is . . . a perfectly mined Star Pearl..."

"That luminescence! That silver cloud mist surrounding it! That is... !"

"A Supreme Grade Effulgent Star Pearl!"

...!

Alarm rose in the eyes of many as they turned toward the man curiously holding the Star Pearl while staring at it, their minds reeling with many questions .

How was he able to know where it was at? How did he so perfectly come to a stop right before he pulverized it? How could he excavate it with such effort that it turned out to be a Supreme Grade Star Pearl?

Most of all, just who was this being?!
