

## Mana 661

Chapter 661: 661

"How could you..."

Many beings were still in a stupor as they stared at Noah, their eyes seemingly portraying that they were staring at some type of monster as a light laugh could be heard from the Imperial Princess up ahead .

"Seems I wasn't wrong to bring you here . Alright! Let's find more of these Star Pearls since they seem to be in such short supply, we will find and use them all ourselves while not dipping into any of their reserves!"

The words of the Princess strongly reverberated out as they struck Andreas the most, mentioning how it was impossible for there not to be a few hundred Star Pearls if not more in collection, but they were stingy to not give them freely! Now the Imperial Princess had shown up with a shocking being that could somehow locate a Star Pearl and excavate it in a matter of minutes, and do it while maintaining its Supreme Grade at that .

They didn't even put the thought in their minds that it was luck, as they saw the skill required to do what this being did!

"How were you able to find it so fast and take it out safely, Boaster?" Maya had sparkling eyes as she renewed Alexander's image again, the cute maid pursing her lips as she couldn't believe the actions of this being once more .

"Oh, I just have a sense about these things . Come on, I'll find some more!"

He left behind the beings with gaping mouths as the Supreme Grade Pearl disappeared, his body being enveloped with the dangerous essence of Aether as he began digging through the underground cavern while just barreling through with his body .

The shocked beings behind him followed as this time, he didn't even move far before he came to a stop again, leaving another thin film of earth where they could see the beginning illumination of an uncovered round Pearl . The scene repeated again where Aether was switched with the Essence of Life, another Effulgent Star Pearl being plucked out with ease!

"Another Supreme Grade Pearl...!"

Those following cried out in shock as they observed this, everything they knew being turned upside down as the confident Andreas himself was ashen .

One might have been luck, but twice in a row confirmed the skill even to the biggest unbelievers! A light laugh could be heard ringing out from the Imperial Princess as Noah did not even stop after getting the second Pearl, simply using the information Eyes of Truth gave him about this planet as he went forth to easily collect all the Effulgent Star Pearls just on this mountain .

After the 5th Supreme Grade Pearl was retrieved by him, those following behind with stupor felt their ears ringing .

After the 20th, they felt their ears buzzing!

After the 30th, they just watched on in horror as this being did the impossible!

But during the time when Noah was about to mine the 36 Pearl, the mountain they were on began to shake as they all realized they had made holes all over the mountain, its integrity being reduced as the surrounding walls were creaking and breaking down .

All of them sighed as they shook their heads at this, beginning to move out of the mountain themselves as they had more than enough power to not worry about being buried .

RUMBLE!

The shaking continued as this mining location on this Stellar Star shook, silver debris and dust erupting out as the party of the Imperial Princess and her Protectors could be seen in the sky, the natives of the Stellar Sky Galaxy and Andreas looking towards Noah with complex expression as he waved his hands while saying grand words with the crumbling mountain below them!

"36 Supreme Grade Effulgent Star Pearls just from this one mountain, and I can sense even more spread throughout the this Stellar Star . "

...!

His voice was low, but they all heard it clearly as their looks of shock remained, knowing how rare Supreme Grade Pearls were, much less finding every single one of them at the same grade as it was mined with utmost care!

"Good! Good!" The Princess repeated the words good twice as she saw Alexander wave his hands, the 36 Supreme Grade Effulgent Star Pearls floating towards her as she released a soft essence to wrap around them, putting them in her spatial item as the surprising being in front of her began to shimmer with the essence of Aether again . He could feel even more numbers of these Pearls within this star, and wasn't bothered with repaying the favor of being brought to this Galaxy as he knew he would be collecting even more of them soon .

"I'll be right back, Princess . Give me a bit over a few hours to scour this entire Stellar Star for the Effulgent Pearls . " The words had only registered in their ears briefly before they saw his figure go towards an adjacent mountain at fast speeds, many of them still standing in the air while not knowing what to do!

As for Noah, he had read the descriptions of the Supreme Grade pearls from the Eyes of Truth as they told him he could forge 10 Stars with a single one of these pearls, and he knew a few hundred lay within this single Stellar Star alone .

This meant that for him to reach the 1000 Stars mark that many beings met before they attempted to form their Black Hole, all he would need was less than a hundred of these treasures to forge that many stars! But he didn't want to stop there as he wondered, just what was the upper limit of stars he could forge before he could form his Black Hole?

It was said that the more Stars one had in their Nebula, the better their chances were- so he wanted to form as many as he could before he even attempted to step into the Realm of Black Hole!

But as he whizzed through this Stellar Star and did things even the natives could not do, he knew that he would definitely be reaching the Realm of Black Hole in just a matter of days if not hours because of the treasures of this Stellar Sky Galaxy .

Truly worthy of making the trip!

Unbeknownst to Noah and many more beings though, a great number of beings were covertly beginning their movements from the Burning Domains Galaxy as they moved with grand goals of conquest under the orders of a powerful Entity . . .

Chapter 662: 662

A bit over 3 hours passed since Noah's proclamation to scour the Stellar Star in front of them for all the Pearls hidden within .

Above this particular Stellar Star, the natives and Andreas had their own group standing not too far from the Imperial Princess who was sweetly talking with her maids .

None of them seemed to hold any worry as they took the words of the being known as Alexander with complete confidence, the hours passing by in no time as they felt the aura of the same genius being come towards them at this moment .

WAA!

Noah appeared like a flash of light in the starry space above the Stellar Star, looking below it with a smile as it had truly granted him too much this time around!

The Princess and everyone else looked expectantly towards him as they wondered just what his boon would be, and he did not delay as he waved his hands and caused the appearance of numerous silver-sparkling Pearls .

The experts that began to count them trembled every time they finished, as they confirmed with their own eyes the sparkling and misty appearance of over 400 Supreme Grade Effulgent Star Pearls!

"This . . . this is enough to potentially produce 4 Black Hole experts!"

"Incredible!"

"How is this possible?!"

Disbelief spread out as many beings reeled from the situation around them, shocked to have the knowledge that over 400 Effulgent Star Pearls came out of this single Star . Normally, only a few tens of pearls would ever be mined from one star, with many of them destroyed during the mining process or if a count like 100 pearls was ever reached from any star- they would mostly be Middle Grade Pearls or Low Grade, never Supreme Grade!

Even if there were 400 Low Grade Effulgent Star Pearls, they would not have a big reaction to it as they knew a Low Grade one could only allow a being to forge 1 or 2 stars . But Supreme Grade Pearls had the ability to allow one to form as much as 10 stars .

Just 100 of them represented the 1000 Star requirement in a Nebula before one could try their luck to form a Black Hole!

Yet this being in front of them had managed to bring out over 400 Effulgent Star Pearls of the highest grade from unknown methods, and he floated them in the star space as many looked over with envy and greed in their eyes .

"Well, I had thought it would take us quite some time to gather and then absorb the treasures of this Galaxy to increase our Realm, but it seems you've done everything for us . "

The words of Anna Lexalius Dannicus stopped the thoughts of all the beings in their tracks as she floated next to the shimmering 400 Star Pearls . She turned her head towards the natives and Andreas as she released cold words .

"We can take it from here and won't be needing an escort . We'll go through a few more Stellar Stars or Realms if need be or just to see the sights of this Galaxy itself . "

The words were extremely emotionless as Andreas nodded, waving his hands as some of the miners behind him returned to the Stellar Star below them, with others simply flying away to other locations as they still turned towards Alexander every now and then with shock .

"You all watch over us as we cultivate, I'm curious of these treasures!" Anna's voice rang out again as it commanded the 10 Black Hole experts and the 20 Nebula Realm beings acting as their guards, those in the Nebula Realm trying their best not to even look at the enticing Pearls that would allow them to forge over 1000 Stars if they could handle it .

"You guys can partake!" The cheerful voice of Anna rang out towards her two maids, not even needing to tell Alexander as he had already grabbed onto one of the shimmering Effulgent Star Pearls that he collected .

[Effulgent Star Pearl] (Supreme Grade) :: An expertly dug out Star Pearl that retained all of its essence entirely . Capable of allowing the user to forge 10 stars with it .

In his hands, the Pearl began to melt as its essence passed through his hands and went towards the illusory Origin near his heart . The Nebula that represented his Origin, as well as the Nebulae of the Laws of Fire and Water continued to spin beautifully, there being a bit over 300 Stars currently in Noah's Nebula .

The cores of Fiends had been extremely helpful as they brought him to 300 forged stars, but this many treasured Effulgent Star Pearls in front of him could easily push him above 1000 stars as he wondered exactly what his limit would be!

RUMBLE!

As soon as the essence reached his origin, it shone with a silver luster that went to form the outlines of 10 stars, his Nebula spinning faster as it absorbed the law essence from the surroundings Law Origins as well as the atmosphere to finish condensing these 10 Stars .

DING!

All 10 Stars were swiftly forged as his Nebula continued to spin, Noah giving a light smile as he moved on to the next one and continued forging stars as easy as one could!

The three girls that thought Alexander had given them enough surprises for today had to look up with surprised eyes again when they noticed that even though they were still absorbing their first Pearl and carefully forging their Stars, he had moved on to his third .

He had such a rapid rate of absorption that they wondered if he was already a black hole that sucked in everything!

This rapid rate of absorption continued as Noah soon passed 400 forged stars, then 600, then 800!

He had absorbed over 50 Effulgent Star Pearls in the span of an hour forming nearly triple the number of stars he had in his Nebula during this time .

Even the Imperial Princess and her maids had only been able to fully absorb 10 Pearls at around this same time! But Noah paid no heed as he continued, absorbing another 20 Pearls as he reached 1000 Stars .

OOOOM!

He felt strong vibrations ringing out from his Origin the moment he completed the 1000th Star, unique black light that actually sparkled draping over his Nebula as it signified he could choose to make the move of trying to form a Black Hole by making his Nebula collapse in on itself, using the force of the numerous stars to easily establish a Black Hole .

But it was common knowledge that the more stars you forged, the higher chances to had of forming a Black Hole as well as increasing its strength! With the maximum number of stars forged in a being known to be 2000, Noah wanted to even bypass this number as he made a grand goal of creating the most powerful Black Hole from his Nebula .

This meant that after he reached 1000 Stars . . . he ignored the newly appearing essence of sparkling darkness as he continued to absorb more Star Pearls!

1100, 1200 . . . He continued as the stock of Effulgent Star Pearls quickly became reduced in front of him, a shocking cultivation session where he was making progress that would take others years to make in just a matter of minutes!

---

As many beings went about their business across the cluster of Galaxies near the Nexus Galaxy and the Stellar Sky Galaxy, forces had begun moving in the Chaotic Void .

Placed on enormous ancient vessels, a ridiculous number of Fiends with high realms of power spread out from the Burning Domains Galaxy silently as they spread towards many different locations .

The shocking thing about them wasn't that their numbers were in the millions or even billions, but the fact that they had a few tens of thousands of beings stepping out that had achieved extremely high realms! They didn't bother sending dredges below the Nebula Rank, so their force was not large in quantity, but freakishly horrendous in quality!

They were launching simultaneous attacks across multiple Galaxies to make sure there would be no reinforcements or even a chance for others to act, occupying everyone as they made them busy while achieving their goals!

One of their biggest goals lay in the Stellar Sky Galaxy, where Vessels carrying 2 thousand Fiends at the Nebula Rank and slightly over two hundred Fiends at the Realm of Black Hole were prepared!

This was a shocking force to be sent to one location, but this Galaxy was one that the Entity behind them wanted something from .

Even more shocking was the number of Fiends at the Nebula and Black Hole rank, where no dredges of lesser power were sent! These were creatures that could not traverse in laws, but could easily achieve high Realms instead . Their shocking numbers would cause the scalps of many to tingle as there was a Fiend Emperor leading them, and he wasn't alone as a being with the same aura as him stood not too far away while they traversed the Chaotic Void .

This meant that 2 QUASAR Realm Fiends on top of over a 200 at the Realm of Black Hole Fiends and 2 Thousand Nebula Rank Fiends were all rushing towards a single Galaxy!

It was strong enough force to cause the collapse of any common Galaxy, and it was headed towards the Stellar Sky Galaxy that only had a single QUASAR expert on it- its Ruler!

It was bound to be a hectic and shocking oncoming days as Noah was still at the Nebula Realm absorbing Effulgent Star Pearls in the Stellar Sky Galaxy . . .

Chapter 663: 663

In the starry space near a Stellar Star of the Stellar Sky Galaxy, a beautiful scene of multicolored silver Star Pearls floating seamlessly in the air could be seen .

For figures were floating around these Supreme Grade Star Pearls as they absorbed them serenely, with Noah coming to a stop at this moment as he saw a bit over 200 remained floating in the starry space .

He had already absorbed a majority of the Pearls by himself, currently having over 1200 stars swiftly rotating within his Nebula . He wouldn't finish the rest of them as they should be enough for the Imperial Princess and her maids to continue absorbing over the next few hours, so he simply made the decision to move out and find some more Star Pearls for himself to absorb!

He did not feel any sort of limit as he forged more of them, so he would simply continue to do it until his very Nebula screamed that it couldn't take anymore .

He transmitted his thoughts to the Imperial Princess as her veiled figure broke her concentration to look towards him, a fairly reign tone ringing out from her .

"Thank you for collecting so many of them for us . You've repaid my favor over and above as it seems I owe you even more right now ." The thankful words of the Princess reached his ears as he didn't bother the concentrating maids, his figure disappearing silently as even the Protectors floating not too far from them only watched on .

"I'll regroup with you guys soon after I collect and absorb more of these Star Pearls . " He left behind these words as he disappeared, delving further into the Stellar Sky Galaxy as he sought more Stellar Stars and even possibly Realms!

His physical prowess was currently extremely monstrous, his speed being pushed to ridiculous degrees as multiple skills from the Terror of Aether Skill Tree continued to make him ridiculously proficient in the field of space . When adding on to him actually comprehending the law of space, it just compounded as he was like a fish swiftly swimming through native waters .

He was a streak of light as he traversed the region they were in, coming across numerous stars as those termed Stellar were in the minority, but with half an hour he was able to see the silver shine of another Stellar Star as he descended down while covering his aura .

There were natives mining on this star as well, and he didn't want to waste any time introducing or explaining himself as essence wrapped around him as he caused his body to become smaller, miniaturizing himself to the size of a grain of sand as he then shot forth with great speed towards the earth of this Stellar Star!

His small size would allow him to drill through relatively unannounced as Eyes of Truth already told him the locations of all the Effulgent Star Pearls of this planet, and he would switch from the destructive Aether he used to dig through into the potent Life Essence to simply mine and place the Pearls in his Expansive Space .

But on his 5th Star Pearl on this Stellar Star where he was about to stow it away, he saw the inefficiency as even without plucking the pearl out, his tiny fingers landed on it as he began absorbing it right then and there, all the essence of this Pearl being sucked out in a matter of seconds!

He felt the formation of 10 extra stars as he nodded thoughtfully, continuing to go through the Star efficiently as he found the locations of these treasured Pearls and absorbed all of them without reservations .

After an hour, he had found and absorbed 150 more Pearls, easily amassing another 1500 Stars within his Nebula! The aura of sparkling darkness that descended after he reached the 1000 point continued to become ever denser and brighter, telling him that he could choose to try forming his Black Hole with relative ease at this moment if he wished as he had over 2700 stars within his Nebula!

This was an extra 1700 compared to the 1000 goal that many beings sought, even the most dreadful geniuses to be documented around the cluster of Galaxies near the Nexus Galaxy having the information of a powerful individual being able to forge as many as 2000 Stars before they embarked to form their Black Hole . It was a documented and researched fact that within Galaxies, actual Nebulae held around 700-1000 Stars, and that was where this magical number was contrived .

Going above it meant exceeding the known limits of a Nebula!

For Noah, as he saw the ridiculous usefulness of the Effulgent Star Pearls and the rate he forged his stars, his goals were extremely high as he asked himself- what stopped him from reaching 10,000 forged stars? Ten times what beings normally had before they broke through! But even further, what stopped him from going above and beyond?

Thus, his gaze remained steadfast as he emptied the hidden reserves of the Star Pearls of this planet as well, gaining over 500 Pearls instantly as the number of stars within his Nebula rose to 6200 .

6200!

He felt boundless power as this was the equivalent strength of 6 Peak Nebula Rank experts all contained within him, causing his body's explosive speed to only increase as he moved from this Stellar Star and went on to find the next .

As he streaked across the starry space of the Stellar Sky Galaxy, he wished that this body also had the [Pocket Realm] that would have allowed him to use the abilities of his Infinite Realms that allowed him to find Treasures, but he could only rely on blind luck at this instance as he streaked across space .

When his thoughts came to this, he laughed as he recalled that he had an ability that was actually called Blind Luck, and as if wanted to announce itself at this very moment, his eyes picked up a silver luster at a far corner of space to his right, halting his direction as he went towards this light right away!

The light only became brighter and brighter as he neared, a bright smile blooming on his face as he found an enormous Silver Door seamlessly floating in space .

[Gateway- Stellar Realm] :: A gateway that leads to a Stellar Realm filled with abundant life forms...

His Protagonist Trait put in some work as the third thing he came upon wasn't another Stellar Star, but a grand Stellar Realm that should have been multiple times larger than any star!

This meant an even more exorbitant amount of Effulgent Star Pearls that he could mine with the highest grade, and it meant an even more shocking number of stars could be forged within his Origin . His grain-sized miniaturized body went forward and touched the gateway as he quickly disappeared, entering his first Stellar Realm that was filled with an even more beautiful silver-colored luster!

Chapter 664: 664

The Stellar Realm was simply like an even larger Stellar Star, the unique color of silver presence throughout as it seemed like an ancient land untouched by the ravages of time .

The number of natives in this Realm was even higher though, with each of them carrying out mining operations as they searched for the Effulgent Star Pearls themselves .

This was the main job for many beings in this Stellar Sky Galaxy! Noah ignored all of them as his militarized body sunk into the earth, continuing his own search as he repeated the same process of absorbing as soon as he located them .

The number of forged Stars within his Origin continued to explode upwards of 6000 as his body in the Novus Galaxy was experiencing great changes as well .

Both Noah and the body of Alexander shared the same Origin, and thus a majority of things were shared between the two bodies!

Law comprehensions and even something like progress in the Primal Propitious Physique were shared simultaneously, but the essence of his realm was the only thing that wasn't simultaneously shared .

This was the reason why Alexander had remained in the Star Forging Realm after the process of Transmigration, but had abruptly risen into the Nebula rank the moment the cores of a single being of that Realm landed in his hands .

The process of Alexander forging stars was also even faster after he gained more cores from Fiends in the Devouring Hells Realm, catching up and beginning to exceed the number that the Original body of Noah had in the Novus Galaxy!

Now that the situation was switched with the body of Alexander leading the way with over 6 thousand forged Stars within his Nebula, the body of Noah in the Novus Galaxy was having a stellar time as all it was required was for him to use the abundant Enhanced Essence of the galaxy and Infinite Realm he was in- this essence being enough to reproduce the forged stars that a part of his Origin had already created!

In the past few hours as the absorption of the Effulgent Star Pearls continued, the body of Noah had already amassed over 2 thousand forged stars as a similar unique dark veil landed on his Nebulae, letting him know he could try breaking through and forming his Black Hole any time .

So he continued on fearlessly as the body of Alexander began to locate and absorb even more pearls in the Stellar Realm, excited to see if a universal restriction or anything like that existed that would prevent him from completely shattering everything that was known about the forged stars of the Nebula Realm!

---

As Noah continued actions that literally nobody else could take in the Stellar Sky Galaxy, a terrifying force approached not just this Galaxy, but 3 more that were in the cluster of Galaxies near the Nexus Galaxy .

The forces were distributed fairly evenly, with over 200 Fiends in the Realm of Black Hole, over 2000 in the Nebula Realm, along with two Fiend Emperors at the shocking Realm of Quasar!

A force such as this was heading towards the 3 Galaxies that were either Allies or under the Influence of the Nexus Galaxy, while the force heading towards the Nexus Galaxy itself was even more terrifying as it held double the experts at the Quasar Realm, and another being that the Fiend Emperors called an 'Elder' .

This 'Elder' . . . was a terrifying existence that could not even be talked about at this moment . . .

Among the 3 Galaxies targeted, the one that the Imperial Adjudicator was currently trying to stabilize, the Sanguine Galaxy- actually had no force going towards it, and this was purposeful! This, along with the huge force heading towards the Nexus Galaxy undetected were all just merely preparations .

This was all preparation for the terrifying Imperial Adjudicator and the forces under him that would run to protect the Nexus Galaxy, and it was also just one of the schemes hatched by the Entity behind the Fiends to mask their true goals for this venture .

Their main goal was a treasure in the Stellar Sky Galaxy, with the side goals of claiming influence over the Galaxies that had fallen under the reign of Imperials while diverting the attention of the Imperial Adjudicator to multiple attacks as they reduced his ability to make strategic decisions even further by taking control of the Stellar Sky Galaxy and holding his daughter hostage!

For this mission, the party of Fiends under the two Quasar Fiend Emperors moved with vigor, the terrifying expressions of the two powerful creatures being extremely cruel at this moment as they silently traversed the Chaotic Void and neared the position of the Stellar Sky Galaxy .

"Brother Blazing Earth, how will we locate the Treasure that Master wants us to find? A Galaxy is much too vast for us to search all of it before the Imperial Adjudicator retaliates and hinders us . "

One of the Fiend Emperors called out to the being that had reported to the Entity not too long ago and been directly given the mission of finding a Page of Ruination in the Stellar Sky Galaxy .

This Fiend Emperor had his body tower over 4 meters in size as the terrifying wings and animalistic horns growing out of his head were extremely terrifying, his eyes filled with intense light as he replied with a guttural voice .

"Master showed me the unique energy signature of that treasure . As long as it is within the Galaxy, I will be able to quickly scour it as I find whatever Star or Realm it's hidden within in no time!"

RUMBLE!

His words were filled with belief and strengths as he continued .

"There is only a single Quasar Expert within the Stellar Sky Galaxy, after we reap his life and take hold of the daughter of the Adjudicator, we can swiftly begin this mission as the experts of the other 4 Galaxies scramble to defend themselves without knowing our true goals . "

A fearsome plan was revealed as cruel smiles came upon the faces of the QUASAR Fiend Emperors, the 200 Fiends in the Realm of Black Hole and the even more numerous Fiends at the rank of Nebula contained within their Ancient Vessels shone with a menacing power!

"Such puny and weak existences that only have a single Quasar ranked expert defends a Galaxy . They are about to know that we have multiple of such experts among our Brothers and Sisters, and even more terrifying Elders at the rank of the same thing they protect- GALAXY!"

RUMBLE!

The rank after Quasar was revealed from the monologue of a terrifying Fiend Emperor at this time, the luminous and heart-shaking realm that very few people understood and even fewer people knew about- The GALAXY Realm .

"After we rip apart the Quasar Ruler of the Stellar Sky Galaxy, we can bathe in the blood of their so-called experts as we search for the Treasure that even they do not know exist, nobody being able to stand in our way..."

"And after that pesky Adjudicator is taken care of by Elder Oswald, what can they do but despair? This cluster of Galaxies will fall to our control as we begin to finally let our name known to all the Ancient Powers of this Dark Universe . . . as we finally build a bastion to protect all Fiends and never be enslaved again!"

Cruel lights passed through the eyes of the QUASAR ranked experts as they neared the Stellar Sky Galaxy that had a Protagonist still rapidly moving in the Realm of Nebula .

The power difference was vast and the gulf of strength was wide, and the shocking conflict was about to be even more glorious!!!

Chapter 665: 665

There are such things known as limits .

Normally, people adhere to these limits as they reach an upper boundary of something, and they are satisfied with it as they then proceed forward in another direction!

Yet for Noah . . . he was currently looking at a limit, and then simply chose to bypass it!

As he traversed through the large Stellae Realm, he found and absorbed a few hundred Pearls as he neared the 10,000 boundary of forged Stars within his Nebula, where he was currently at 9,999

Yet when he neared this number that should have been a limit his eyes remained impassive as he didn't seem that impressed!

10,000 would be ten times the normal amount of forged Stars that any recently known beings had undertaken, but to someone like Noah who had risen so quickly from just absorbing treasures of a specific galaxy, it made him hungry for more .

Other beings would have counted their lucky stars and embarked on the formation of a Black Hole right away, but Noah simply watched as the 10,000th Star completed forging, causing a huge change to occur once again within his Nebula .

RUMBLE!

It vibrated with the immensity of power one would even wonder if this could be considered a Nebula anymore, the vast amounts of stars being truly too much to wrap one's head around!

With the 10,000 count reached, the sparkling layer of darkness that had descended down when he reached 1000 was replaced, his eyes watching as he saw the essence of the surrounding Law Origins somehow resonating with his Nebula at this instant, the rainbow-colored essence of the Universal Laws themselves beginning to descend onto his Nebula as they draped over them magnificently .

This caused for the ten thousand stars within his Nebula to shimmer with colorful splendor, the shone of his Nebula at this moment screaming magnificence!

He was constantly receiving an indication in his mind from his very own Nebula that if he chose to so at this moment, he could very easily form a Black Hole .

His Origin seemed to be nearly screaming to him as it said- 'You've worked hard, let me go on to the next stage now!'

Yet as he saw the active Nebula and the swirling of universal law essence around it, he remained impassive and unimpressed as he went towards the next location in the Stellar Realm that held another Effulgent Star Pearl .

This was because even as his Origin screamed for him to do something else, his own Intuition and ability as a Grand Controller of the Law of Fate told him he would find something much bigger if he continued going!

So he simply ignored the shocking number of the 10,000 milestone as he asked himself- 'Why stop there?!'

RUMBLE!

A wild and unruly thought, a thought that would bring about immense consequences! Instead of a measly 10,000 stars that were 10 times the normal amount, Noah's only thought was what exactly stopped him from gaining 100x the normal amount?

The answer would only be given in time as he continued the rapid absorption of unique treasures, unknown movements continuing to occur unbeknownst to him...

---

In the Sanguin Galaxy, the ruling powers were being reorganized as this recently conquered Galaxy by the Imperials came into agreement with the Imperial Adjudicator to be placed under the influence and rule of the Nexus Galaxy .

The Imperial Adjudicator himself was present as he looked at the many regions of the Sanguin Galaxy and the unique treasures they held that promoted law comprehension and the increased growth of Traits, his insight being one of the things that continued to allow the reign of Imperials to remain steadfast over the last thousands of years!

He was also extremely careful of everything he did over the years as this attribute of his got him where he was today . Unbeknownst to even himself though, he had recently tripped up when it came to something close to him, and it would bring with it a painful lesson...

"Hmm?"

It felt like a buzzing intuition at first, but the same being that was talking to and had granted the Imperial Princess permission to traverse into another Galaxy- this same being rose from a wide room of an enormous fortress as he felt something!

The fortress he was in was located in what could be considered the 'Central Realm' of the Sanguine Galaxy, and this was where he was releasing all his commands as he monitored the movements of beings and the unearthing of the treasured resources from now on .

Yet from the room he was in, he stood up as his deep and starry eyes looked above, piercing through the fortress and even the boundaries of the Central Realm, and then it went even further as it seemed to see past the entire Sanguine Galaxy!

This gaze was inquisitive at first as it seemed to have seen far too much, becoming grim in a matter of seconds as he erupted with shocking power that instantly shattered everything in the room to dust .

A shout could then be heard throughout the Sanguine Galaxy as it entered the ears of all experts at the Nebula Rank and above no matter if they were natives of Imperials!

"Fiends are laying siege to the Nexus Galaxy! All able-bodied Imperials and those under our control- set off to defend at once!"

RUMBLE!

Shockingly, the Imperial Adjudicator had noticed the moments of the Fiends right before they entered the Nexus Galaxy, calling for defenders to move out right away as he also began sending numerous messages for the Generals in the Nexus Galaxy to be ready .

RIIP!

His own figure tore through the surrounding space as he traversed to leave the Sanguine Galaxy right away, not even taking the Void Beasts that were pulling a grand Imperial Vessel larger than any other in the periphery of the Sanguine Galaxy .

This was because this being known as the Imperial Adjudicator could move even faster than the Void Beasts in the Chaotic Void, and he was truly in a hurry as he somehow noticed terrifying auras nearing around the Galaxy he controlled!

Thus, he rushed out at extreme speeds while commanding his forces to do the same, but what he had yet to find out was that it was not just a single Galaxy that being laid siege to today...

Chapter 666: 666

At the same moment, the Imperial Princess was finishing absorbing her 119th Supreme Grade Effulgent Star Pearl, her Nebula brimming with stars over 1300 as one added those she already had before coming on this trip here .

She was having the most peaceful time cultivating as she made enough progress in a matter of hours that would normally need tens of years, if not hundreds!

Yet she wasn't alone in this as the boon was extended to her two maids that were also brimming with power .

And all of this . . . was made possible by a single being that continued to defy all expectations .

Anna thought of the singular mystery known as Alexander King who still had not returned as she was about to grab another Pearl to absorb .

Even though she knew she could try and form her Black Hole right away, she wanted to continue absorbing more Pearls as she forged more stars, knowing the more she could forge the better her chances and talent .

She was reaching for this Pearl when she suddenly felt an intense aura of wild madness and power, her veiled face turning upwards from the starry space of the Stellar Sky Galaxy as they seemed to pierce through the layers of stars and see the Chaotic Void outside it!

RUMBLE!

It was also at this moment that the 10 Black Hole Rank experts assigned to protect her also felt something, those in the Nebula realm feeling it as all their gazes turned upwards in a shocked fashion .

This was because they could sense a tremendously powerful aura of wild and maddened power that some of them were familiar with, but this wasn't the more shocking thing! The more shocking thing was that these auras . . . were just too many!

Those that were even more perceptive were able to notice that among these domineering auras, there were two that were particularly horror inducing as the faces of all the Nebula Rank experts turned ashen .

WAA!

The 10 Black Hole experts instantly surrounded the party of the Imperial Princess as they picked up their communication medallions that had begun to light up with information, but it wasn't one that they wanted to hear as it told them of a shocking attack coming to the Nexus Galaxy .

They felt their words stuck to their throats as they had wanted to report that an attack had reached the Stellar Sky Galaxy, the same Galaxy where the daughter of the Imperial Adjudicator was at!

Anna rose from her positions as the two maids surrounded her even closer, her piercing gaze seeing shocking things as at this moment, powerful auras entered the Stellar Sky Galaxy wildly .

Filling ancient looking Vessels that could traverse the Chaotic Void, the race of Fiends they knew all too well made their entrance into the Stellar Sky Galaxy, and all that noticed them were shocked when they observed their sheer numbers .

It wasn't something in the billions or trillions that would make someone shake their heads in wonder, but it was merely a small number of around 2,000 .

Then there was an even smaller number of around 200 .

And an even smaller number of 2!

They were actually small numbers, but they represented extremely shocking identities that made those looking at them treat them with more horror than even if it was a trillion enemies .

This was because the 2000 represented Fiends in the Nebula Realm, the 200 represented Fiends into the Realm of Black Hole, and the 2 represented Fiend Emperors standing stably in the QUASAR stage!

The faces of the 10 Black Hole experts protecting the Imperial Princess turned ashen as they saw the scene of these intruders, but yet another aura appeared thereafter that somewhat caused them to breathe easier .

RUMBLE!

From the center of the Stellar Sky Galaxy, a being shimmering with silver and white light as bright as a star made his way over, their eyes that saw from far away observing this being to actually appear not too far away from their position as he looked at the invading forces of Fiends that silently went towards a certain location in a straight line- towards the very spot that the Imperial Princess and her guards were at .

But the being that had appeared between them was someone extremely special, the being known as the Ruler of the Stellar Sky Galaxy!

The party of the Imperial Princess and others could see all this very closely because they had just entered the Stellar Sky Galaxy a few hours ago, and had stayed in the periphery of the first Stellar Star they found as they were very close to the boundary of the Galaxy .

So when the Fiends neared and entered, their auras picked them up . But this also meant . . . the powerful Fiends also picked up their signatures and knew who they were, actually making a bee line right towards them!

But it was at this moment that this Ruler of the Stellar Sky Galaxy appeared, his gaze bubbling with fury as he glanced at the terrifying force of Fiends atop the ancient Vessels .

"What do you want with my Galaxy that you Fiends would send your entire force here?! What have we done to wrong you?!"

RUMBLE!

The voice of the Ruler rang out clearly for all to pick up as the ancient vessels carrying the Fiends forward did not stop, another voice merely coming out coldly as they moved unhindered towards their goals .

"Our entire force? You think too highly of yourselves, humans . This is merely but one force from the many that finally embarked from our glorious Burning Domains..."

...!

" . . . As for our purpose, it is naturally your Galaxy . . . as well as the little spawn of a princess that was nice enough to be very close . "

RUMBLE!

Many beings felt their hearts shaking as they heard and understood the meaning of these words, some beginning to feel fear seep deep into their bones as they really confirmed the enemies invading in front of them .

Even the Ruler of the Stellar Sky Galaxy that shone with the luster of a small sun shook as he himself was only at the QUASAR Realm, and he could see two beings of the same rank as himself standing to oppose him, the one who just spoke being particularly more powerful!

As he floated in the starry space of his Galaxy, his heart twisted as he knew they had stepped into a terrifying ordeal .

A truly terrifying and terrible ordeal of powerful enemies!

From the same direction that the Ruler of the Stellar Sky Galaxy had come from, thousands of lights that each signified powerful beings began to gather, those that were defenders of this Galaxy coming forward with shaking hearts .

Andreas could be seen amongst the many beings as they made their way forward . Within the group of thousands, only a bit over 30 Black Hole experts could be seen, slightly over 200 beings at the Nebula Realm, and the rest were Star Forgers!

Even though their hearts felt an incredibly cold chill, they still came forward to defend their Galaxy .

Near the mined Stellar Star, the party surrounding the Imperial Princess shook as they looked towards Anna in despair, never in their lives thinking this being would be targeted, and they would be the ones protecting her!

The Princess in question herself seemed extremely poised as her veiled gaze still looked up and observed the approaching ancient vessels with shocking auras, the two Maids nearest to her that were shaken themselves only hearing a sigh from her as she waved her hands and caused the appearance of a shimmering golden-green medallion .

A few million miles away from them, from the doorway of the Stellar Realm that a particular someone ahead entered not too long ago- he came out once again as his eyes also stared towards the periphery of the Stellar Sky Galaxy as he saw the shocking invading force assembled and making their way .

In the middle of forging thousands of stars within his Nebula, Noah came out to find a nauseating number of enemies multiple ranks above him make their entrance into the third Galaxy he had stepped into!

Chapter 667: 667

In the Chaotic Void, a being that looked like an exploding sun shone brilliantly in the utter darkness as he tore through the void while making haste towards the Nexus Galaxy .

Numerous teleportation stations were used by him as he traveled even faster than Void Beasts, the trip that would have taken vessels hours being grounded down to mere minutes by him!

As he was soon about to reach the Nexus Galaxy, he took out his Command Medallion that could receive many messages and communications in times of emergencies to check the situation, and his blazing speed came to a halt instantly as he picked up more information from the Medallion .

WAA!

He came to a stop in the Chaotic Void as he was just a few minutes away from reaching the Nexus Galaxy, the thing that brought him to a stop being the news that it was not just the Nexus Galaxy that was being attacked, but the 3 other Galaxies under their control as well as . . . the Stellar Sky Galaxy!

His face turned extremely grim as more communications finally entered from the Black Hole experts sent to protect a special someone adventuring within this Galaxy, revealing shocking information about the purpose of the invaders who had stated clearly what they wanted .

His body shook as he heard many messages coming in that revealed horrendous information of powerful forces of Fiends led by QUASAR ranked experts on each of these Galaxies, with the Nexus Galaxy facing an even more terrifying force!

But none of this was the reason that made the face of this Imperial Adjudicator turn grim . It was the information that the Fiends attacking the Stellar Sky Galaxy had his daughter as one of their goals .

This was the reason he came to a stop in the middle of the Chaotic Void, not continuing to go towards the Nexus Galaxy that was just a few minutes away now! It was because he knew his precious daughter was in danger!

This fearsome commander that ruled an entire Galaxy, this being that held the title of a Ruler of a Galaxy . . . his heart was currently burning with wrath and pain as the Galaxy he swore to protect and had everything he had built was under attack, but his one and only daughter was also being targeted by the same enemies in a terrible plot .

He came to a stop as he could not make a decision on whether he should go save his daughter . . . or save his Galaxy!

Ah!

BUZZ

At this moment, the Command Medallion rang again as the Imperial Adjudicator received another communication, and this time it was from someone special as it drowned out all the other voices coming out of the Medallion, the body of the Adjudicator shaking as he heard a sweet voice that made his heart feel like it was being squeezed .

"Daddy . "

----

In the Stellar Sky Galaxy .

As the force of powerful Fiends was descending down, Anna took out a Medallion as she sent her voice into it quickly while hoping for a reply .

It was a Medallion only to be used for emergencies, and a pretty shocking emergency showed itself in front of her at this time as she called out, "Daddy . "

The voice of a daughter calling for her father was calm and composed, her heart only stirring when she heard the reply of the powerful voice she was always used to .

"Anna, are you safe? The Fiends..."

"There's a decent amount of them arriving at the Stellar Sky Galaxy . Hearing their words, it seems they probably sent another force just like it if not more powerful to our home . " The voice of Anna was calm as she analyzed the words of the Fiend Emperor and quickly came to a conclusion, the voice on the other end going quiet as it heard these words!

"Don't worry about me, Daddy . You need to go protect our home . "

RUMBLE!

A shocking truth was revealed as the Imperial Princess put many pieces of the puzzle together purely from the words of the Fiend Emperor that they were just one of the many forces of Fiends sent out, realizing that the Nexus Galaxy as well as other Galaxies could also be under simultaneous attacks .

But she went even further as she knew her father was in the Sanguine Galaxy, and he should have now known of these attacks as he would either be setting off to protect the Nexus Galaxy . . . or someone special that had just stepped outside of it!

She was very thoughtful as she knew at this point, her father would be placed in a huge dilemma as the lives of trillions hung in the balance along with the Galaxy he ruled over . . . while he contemplated all of this for his daughter who was in another targeted Galaxy light years away .

"Anna..." A voice filled with intense pain and wrath was the only thing that came out from the Medallion, the maids Maya and Raya besides the Princess who was surrounded by the 10 Black Hole experts also looking towards the Princess as they began to tear up .

When Anna heard her Father's voice again, she smiled lightly as she knew he had already made the difficult decision!

"Don't worry about me, our home is much more important, you know? Mom is there, my annoying aunts, even the pompous nephews along with trillions of others..."

Her voice was always calm and collected, but it had begun trembling near the end as she knew there were many uncertainties to come in the next few minutes!

She was about to continue as she wanted to tell her father she loved him, these words serving a shocking meaning that might have even made the Adjudicator change his mind .

But it was at this moment that she spatial fluctuations near them, her gaze noticing the reappearance of the being she knew as Alexander .

Towards this particular genius that she had invited and embroiled into this situation, she wanted to sigh as her eyes caught her face, and she had to do a double take!

Her perceptive eyes saw the expression of Alexander was the same as always, the same expression that had appeared multiple times before he threw ridiculous surprises their way .

As he now stared up towards the few hundreds of thousands of miles where ancient Vessels filled with Fiends were coming towards them, she saw that his expression was as calm as ever, and it didn't have any ounce of fear!

Her heart settled as she saw this expression, pulling back the words of telling her father she loved him that would serve as a goodbye .

She instead spoke sweetly again just like when she was asking him for permission to leave the Nexus Galaxy .

"Take care of them without a worry Daddy, I'll see you in a bit . "

WAA!

She finished these words as she put the Medallion away, glancing towards Maya and Raya, and then towards the powerful genius calmly watching the scene playing out in front of him .

She looked at the calmness of this being's eyes as she wondered, in the face of all of this when even her Black Hole Protectors seemed to be quaking, what was giving this being the strength to be so calm?

Chapter 668: 668

In the Chaotic Void where the Imperial Adjudicator had come to a stop, his body exploded with even more power the moment the words of his daughter finished, his heart filled with such intense wrath that even the Chaotic Void around him warped and shook!

A part of his brain noticed that his daughter had not said goodbye to him, only that she would see him in a bit .

It meant that even his daughter held some form of hope that even with the terrifying plots and enemies against them, she saw a possibility of coming out of it alive!

Just this small possibility made the Adjudicator blaze with even more power, continuing his path towards the Nexus Galaxy as the fate of his daughter was left up in the air .

But now, his power blazed even brighter as he saw a possibility for him to save both his Galaxy and his daughter, but he would have to act as quickly as possible and crush all enemies before he could go on to save the thing dearest to him!

RUMBLE!

His shocking aura that seared the very Chaotic Void itself thundered towards the Nexus Galaxy, where it wasn't just those at the Black Hole and Quasar Realm that was targeting this particular galaxy...

---

In the Stellar Sky Galaxy .

Anna's eyes closed as she sensed the trembling protectors around her, the teary Maids nearest to her, as well as the calm Alexander further from her .

She felt all of this as she looked within her Nebula, seeing the over 1300 Stars that were forged and the dark light that signified she could try forging her Black Hole at this moment if she wished!

She had wanted to wait some more as she stabilized her Realm before proceeding forward, but her languid eyes that were glancing at everything around her became even calmer at this moment as while she looked towards her Nebulae, she gave a single command .

Break through!

RUMBLE!

The space around her shook as even the Maids were slightly pushed back at the pressure, looking towards Anna as they sensed a terrifying gravitational force enveloping her .

This caused their eyes to open wide as they knew what this gravitational force signified- it was what would be observed anytime a being tried to break through into the Realm of Black Hole! The Nebula at their very center would be used as a sacrifice to produce a terrifying Black Hole with a tremendous gravitational force that threatened to devour the being trying to break through if they were not strong enough .

The more stars one had in their Nebula when they broke through, the more stable their Black Hole would be as they had best hope their bodies were also strong enough to withstand the initial force of the Black Hole and successfully finish its formation .

One must know, a Black Hole normally forms because of the death of a massive star, when such a planetary body has depleted its thermonuclear fuel at its very core, it becomes unstable and then proceeds to gravitationally collapse inward upon itself!

What a being had to do when going into the Black Hole Realm . . . they had to utilize their Nebulae filled with over 1000 stars as they gave the command for it to collapse within itself for the formation of a grand and powerful Black Hole .

The result . . . was something ecstatic!

The protectors of the Princess looked towards her location with strained eyes as they saw what she chose to do, their bodies beginning to glow with power as they prepared to lay down their lives if they had to on this day .

The force of the Stellar Sky Galaxy that had also neared saw this breakthrough, their eyes then moving towards the incoming Ancient Vessels carrying Fiends as many of them simply shook their heads in despair .

What could a single new entrant into the Realm of Black Hole do? They had over 200 of such Fiends in the Black Hole Realm as they even held two QUASAR experts! So what if you broke through right now?

Their eyes were filled with despair but also a tinge of hate, as they heard the aims of the Fiends was their galaxy and this Imperial Princess, attributing the fault of them being targeted to her .

Anna paid no attention to this as her heart remained calm, the gravitational force threatening to absorb her body and extinguishing her life being wiped away instantly as she used her EPSILON ranked Trait-[Vector Controller] .

To a being with a Trait such as that, what gravitational force could they not repulse or nullify?!

OOOOH!

Her languid eyes opened wide beneath the veil as she instantly wiped away the terrifying obstacle that came with forming a Black Hole, the terrifying gravitational force disappeared as the Nebula within her that had imploded within itself came down to stabilize . . . coalescing together as vibrantly, a glimmering Black Hole was being born .

An extremely hard breakthrough that should have taken some time and effort to occur was easily cleared by the terrifying Imperial Princess, her veil widely flapping for a second as it threatened to fly off .

"Haaa..." A distinct sound of someone breathing out calmly could be heard as Anna reigned in the wild essence pulsing off of her, completely placing her black hole under control as a powerful aura began to rise from her .

Her maids and protectors looked towards her in a stupor as they seemed to want to ask . 'Was that it? You had already broken through?!

But the stupor was ignored by her as she channeled her abundant energy of this new realm that was sucking in all the essence around her, fully utilizing her EPSILON ranked Trait of controlling vectors as she utilized a high level ability she had just begun to understand .

"Plasma Generation . " Sweet words escaped her lips as immensity thundered out .

WAA!

A gorgeous color of blue and purple erupted as the Vector Controller increased the vibration rate of the atoms around her so much until she began to coalesce . . . plasma!

If one was knowledgeable, they would know that plasma is a superheated electrically charged ionized gas that is so extremely hot, causing even electrons to be ripped away from the atoms to form this ionized gas .

This extremely dreadful Plasma had begun to coalesce around Anna, warping the nearby space from its searing heat as it even caused the Maids Maya and Raya to pull back from their sheer scorching temperature . Yet this blue-purple plasma erupted out from the back of Anna Lexalis Dannicus as it formed into a majestic shape of stellar wings, wings made of pure plasma would scorch anyone but the Vector Controller!

As these wings were in the process of forming, Anna's hands magnificently opened to her sides as the baleful plasma formed there as well . . . in the form of a long cylindrical rope that seemed to turn into a whip as she grasped this destructive plasma with her bare hands .

RUMBLE!

Their formation wasn't alone as scorching balls of plasma began to erupt all around her, a shocking image of a terrifying creature being created in the Stellar Sky Galaxy as the Imperial Princess became surrounded by plasma, her eyes cold as they stared fearlessly towards the far distance where powerful Fiends stood!

Not too far from her, Noah saw all of this happening as numerous thoughts crossed his mind while calculating the situation around them, his eyes hiding a lustrous shine as it seemed he was plotting something . . .

Chapter 669: 669

The defenders of the Stellar Sky Galaxy gathered under the QUASAR ranked Ruler of this Galaxy as they watched the unhindered Ancient Vessels of the Fiends rush towards them .

Many of them were fearful as they did not even have the will to attack first, seeing how outnumbered they were by the many Fiends .

They had over 200 beings in the Realm of Black Hole while they had slightly over 50 when the defenders of the Imperial Princess were combined, and while the number of Nebula rank individuals they had were in the hundreds, the Fiends were above 2000!

To top it all off, they only had a single QUASAR ranked expert while the other side had two! Faced with such a line up, who would not despair?

The answer was very few special beings!

One was the transformed Imperial Princess that had a shocking look of a being clad in scorching plasma, even the nearby Nebula rank individuals feeling this searing heat as they pulled back in fear . The wings made of plasma erupting behind her seemed to make her unique charm and power even more lustrous as they did not harm her one bit, the control this woman had over the minute atomic particles being extremely frightening .

The other being that wasn't shitting his pants amidst all of this was naturally Noah!

He had heard the shaking words of the Fiends reverberating through the nearby stars, coming out of the Stellar Realm where he had continued to absorb numerous Effulgent Star Pearls as he forged more stars within his Nebula .

Currently, he was sitting over 16,000 stars as his Nebula felt extremely robust and vibrant, and the intrusion of these beings made him look around in surprise as he complained within .

These were extremely powerful enemies, with two that were shockingly two Realms above him!

He wasn't fearful as he knew he could run away whenever he wished, and none of these beings were even aiming or looking at someone like him as he seemed to be a small figure in this expansive galaxy .

But was running ever part of his skill set? The answer was no!

He also could not turn tail and teleport away since the person with a singular identity in the Nexus Galaxy had already connected herself to him, and he would be taking an easy path if he continued to stay near her as he went on to try and complete the Protagonist Trait that required him to play a central role in the Nexus Galaxy .

As he looked at all of these factors . . . he chose to stay and fight! He would fight, but of course, he would not throw his life away . So his mind had moved as a few plans formed, and he began adapting to the situation right away as he acted based on his thoughts .

The first thing he did was the moment after he left the Stellar Realm, two drops of blood dripped from him as they floated imperceptibly across the starry space, hiddenly beginning to form into the shape of a humanoid being not too long after as for the first time as Alexander- the Ancient Blood Clones were reproduced!

An ability stemming from the [Blood Lord] skill tree continued to be just as useful as ever, making Noah keen on continuing this Skill Tree and even the ignored Law of Chaos skill tree .

The clones that stemmed from the ability fully formed as they had a singular mission- to continue searching for and absorbing the Effulgent Star Pearls on any Stellar Realms and Stellar Stars lying in the Stellar Sky Galaxy .

His goal was to push his number of forged stars as high as possible, and the situation in front of him . . . was extremely helpful towards that goal if he played it well!

There were over 2000 Fiends in the rank of Nebula aboard the Ancient Vessels, and 200 more in the Realm of Black Hole on top of that .

He did not even begin to think that he could take down the QUASAR ranked beings as was right now, so he focused on the Fiends of lower rank as he knew if he could take many of them down and absorb their cores . . . coupled with his clones searching for and absorbing the Effulgent Star Pearls, he was bound to have an explosive growth unlike any other!

He was not sure how hard of a fight it would be against the Fiends in the Realm of Black Hole, nor what his absorbing of the cores of these beings would provide in terms of forged stars . At these high Realms of Power, one needed to accumulate a large amount of essence before they could proceed forward, and Noah had yet to even confirm the path forward after establishing his Black Hole .

But that would not prevent him from trying to take down experts of such a level as he tested exactly what they would give .

Cores! Skill Points! Whatever other loot they brought with them!

His eyes shone with a greedy light as he planned to use this terrifying ordeal that had many beings despairing and fearful into an opportunity!

The only reason he was somewhat confident besides the fact that he could easily teleport away . . . was when his thoughts went towards a certain skill that he had received from an Ultimate Law not too long ago . His eyes turned into slits as he stared into the stat panel to observe its shocking percentages once more .

[Yggdrasil](5/5) :: An ability that most beings cannot keep active for longer than a few minutes because of its immense mana requirements, but a worthy ability of a user of the Law of Life . Project your comprehension of the Law of Life outwards as you take on the form of an ancient tree lost in the vicissitudes of time . In this form, the user gains +3000% Physical and Soul Defense, +3000% to All Damage, +5000% Health and Mana Regeneration, +3000% Increased Area of Effect on all Abilities, +3000% Increased Attack Speed, +100% Universal Laws Resistance Penetration, +100% to all Universal Laws Resistance, +10% Vitality Returned Each Time an Enemy is hit by an Attack . All enemies struck by your branches gain the [Withered] status effect . All Allies struck by your branches gain the [Boosted Life Force] status effect . The user will also gain a Life Shield after every 10 minutes this ability is kept active . (The skill is currently being enhanced by the [Life] ability . )

With such boosts of this ability that many others could not even keep active for a few minutes, he felt like he should be able to withstand Black Hole Realm experts while being able to butcher those in the Nebula Realm freely!

He could already take care of Nebula Rank Fiends with ease as he saw in the Devouring Hells Realm of the Nexus Galaxy where some of them were imprisoned, and he was basing his plans on this .

The only thing he would have to watch out for and carefully navigate was the presence of the two QUASAR ranked Fiends . He did not have much information on the fearsome power of this Realm, nor did he know if the being known as the Ruler of the Stellar Sky Galaxy would be able to stand against one of the Fiends, much less two!

As he glanced at the image of the Imperial Princess clad in purple-blue wings of plasma, he could feel an unshaken gaze that let him know help might be coming because of the identity of this being, but the words of the QUASAR Fiend also let him know that the Nexus Galaxy was most likely under attack .

Help would not be coming anytime soon, and they were most likely on their own!

As the Ancient Vessels of the Fiends neared and he sensed the space shattering power of the two at the forefront, he breathed out calmly as his nerves settled and his mind turned clear .

He sensed the Imperial Princess and her maids not too far away, the protectors steeling their resolves to defend with their lives, and the defenders of the Stellar Sky Galaxy standing behind their Ruler as they prepared for a clash where their lives would most likely be lost .

His eyes then closed as he spread his arms out freely and called out .

[Yggdrasil] .

...

RUUUUUUUUMBLE!

At this moment, a Primeval Ancient Tree had taken root in the starry space of the Stellar Sky Galaxy .

Chapter 670: 670

RUUUUUUUUMBLE!

A magisterial display of mana freely erupted out as it drew the attention of many, even the oncoming QUASAR ranked Fiend Emperors looking away from the Ruler of the Stellar Sky Galaxy to briefly glance at this display!

Not too far from the party of the Imperial Princess, a flash of green began spreading out wildly as they observed the appearance of a bud, and then watched as a trunk filled with branches came to be, incandescent green leaves erupting thereafter as the sight was breathtaking to say the least .

"That is..."

"A skill from the Ultimate Law of Life!"

Many beings went into a stupor as they observed the stupendous show, especially the Law Masters among the party of Black Hole and Nebula rank experts .

Some of them were Controllers, and a few had the titles of Grand Controllers as they fully comprehended the laws of Fate and Chaos . Some were even more proficient and had made great gains in their path as Assimilators, embarking on the path to make the universal laws a part of them!

Yet as they looked at the eruption of this singular skill, they had to take a step back and look multiple times because of the sheer grandness of it .

It was manageable when it first began, but they watched with widening eyes as the budding tree grew an incandescent green color and grew rapidly, numerous roots erupting out beneath it as they wriggled wildly across the starry space, its branches flailing with even more figure as they stretched out and grew luscious leaves!

200 meters!

500 meters!

2000 meters!

3 Miles!

The Primeval Tree continued to spread its roots and branches throughout the expansive space as the party of the Imperial Princess watched in wonder as numerous roots passed around them and covered everything in front of them .

The greenery blazing off of this primeval tree was extremely blinding as a hue of green spread out, even the Imperial Princess in a grand form surrounded by scorching plasma looking up with wonder .

WAA!

Sitting over 5 miles, Yggdrasil stopped growing as its branches shook with vigor, green starlight shooting off from them as the abundant aura of life spread out with ease!

The party of the Imperial Princess under the influence of the Primeval Tree felt their essence responding with vigor and crying out with wanting, drinking the essence of life that enhanced all other laws it came in contact with .

Many beings still looked forward in a stupor as their despair was taken down somewhat, with a few of them having come across Life Law Masters who could use such a skill before!

"That is...the [Yggdrasil] ability, right?"

One could not help but ask out loud as they tried to match what they knew about the skills under the law of Life and the phenomenon they were seeing today .

"It's too big..."

"The biggest I've seen was a hundred meters, and the exalted Life Law Master could only keep it up for a minute . This exalted Law Master having his over 5 miles . . . how can he...?!"

Shock and disbelief spread throughout the minds of many as the eyes of the Ruler of the Stellar Sky Galaxy shone, feeling the pressure and despair he felt towards his Galaxy slightly lessen as he observed the power of this new ally .

But only lessen, the despair he felt was still huge as he saw no way of combating two QUASAR ranked individuals alone!

But at this point, some gasps began to occur as the many experts observed the branches of the Primeval Tree to begin moving with vigor, their targets being the allies around it as many became apprehensive .

The tree seemed to feel this as it directed three branches towards the Imperial Princess and her two Maids first . The guards were ready to act when they saw the hand of Anna rise up to stop them, the hand she raised going towards the branch that was coming towards her with a purpose .

PA!

A brilliant green light shined the moment her hand came in contact with the branch that Noah extended, the same scene repeated with Maya and Raya as these three beings felt an overabundance of Life Essence begin to flow through them!

The effect of [Boosted Life Force] was applied to the beings hit with the branches of the Primeval Tree, the dense essence making their bodies feel full of life as any injuries they sustained would be healed rapidly!

As the guards saw the vibrant Life Essence erupting out from the Princess and her maids the moment the branches struck them, they let down their reservation as they allowed the branches of the enormous tree to wriggle around and freely hit them .

PA! PA! PA!

Spectacular sounds rang out through the starry space as enormous widespread buffs were applied, the defenders of the Stellar Sky Galaxy seeing this as the Ruler gave out a command .

"Join with the Imperial Princess of the Nexus Galaxy and her protector . We shall aid them while protecting our Galaxy!"

The command spread out through the minds of the few thousand beings as they turned into streaks of light towards a shimmering green resplendent Primeval Tree .

They surrounded it as they waited for tremendous buffs that would make their fight much easier, hoping the exalted Law Master would be able to last a long enough time before he finished all his mana!

Far in the distance, the two Fiend Emperors at the QUASAR Realm saw this as they merely harrumphed, seeing that while the power of this Life Law Master seemed to be unique, they did not sense the aura of a being at the QUASAR Realm from it .

To them, that was enough to treat it as nothing!

Thus, they continued forward as the 2 thousand Nebula ranked Fiends began to weave out of the Ancient Vessels, the 200 in the Realm of Black Hole also releasing their shocking auras as they overpowered the fewer forces coming to gather around the enormous tree .

Most of all, an eruption of frightful power erupted out from the bodies of the 2 QUASAR ranked Fiends as the both of them had their gaze on the Ruler of the Starry Sky Galaxy!

Take out the most powerful one first, and the rest will follow .

This was the strategy the Fiend Emperors were going with as their bodies overflowed with power!

These were beings at the QUASAR Realm .

Did any of the beings in this area truly understand their power? Did any of them understand the gap between them and those in the Realm of Black Hole? Do any of the readers of this grand epic grasp the difference between the Realms of Power?

The answer was no . Not yet anyway!

Soon, it would be made blatantly clear just what those beings at the QUASAR Realm could do . As for the more shocking level of GALAXY that was above it? Ah!
