

Mana 671

Chapter 671: 671

Across the Chaotic Void, the presence that was shining brighter than a sun neared the Nexus Galaxy as he could already sense powerful shock waves spreading out, a stench of blood and war he was used to beginning to permeate out!

This was the same stench he dwelled in whenever he conquered Galaxies, but never did he expect to find it in his own home .

As his rage only rose to the skies, he saw the shimmering Nexus Galaxy appear in front of his eyes as Ancient Vessels were near its entrance, terrifying auras of power present in these vessels as the scene in front of him was a gory one!

The scene was gory because the defenders of the Nexus Galaxy had appeared, where one could see many Watchers, Law Masters, and Blessed valiantly defending their home . But the valiant defense could not do much as the enemies before them simply had too much power .

The 4 QUASAR ranked Fiends sent here were actually matched with 4 Imperials of the same caliber, showing the power of the Nexus Galaxy to be able to produce for QUASAR Realm defenders! Below them, even more at the Realm of Black Hole like the General Zadan that Noah had previously come in contact with were standing their ground, but it was still a bloody scene as they were being pushed back, with a Black Hole expert drying every few seconds!

The reason for this . . . was naturally the Elder that accompanied the force of Fiends, a being that spectacularly stood at the realm above QUASAR .

OOOOH!

Bellows of fury and shock could be heard throughout as the 4 QUASAR ranked experts trying to match with the Fiend Emperors were being pushed down by the sheer energy the Elder at the GALAXY Realm released .

At this moment, this Elder actually had a humanoid shape unlike other fiends, his arms scholarly behind his back as he floated in the starry void and observed the show . One could see his body was thrumming with power as he looked like he was about to make a move and wipe out all the enemy forces nearby, but this was the exact moment when the shocking aura of the Imperial Adjudicator appeared!

OOOM

With a grand entrance and a face full of wrath, many beings turned their eyes towards the new entrant as a variety of emotions covered their faces .

The Imperials breathed out sighs of relief as they felt a huge weight lifted off their shoulders, while the Fiends did not seem bothered as they knew the shocking power of their Elder, simply keeping to their relentless advance as the Ancient Vessels pierced into the starry space of the Nexus Galaxy .

The Elder letting out wild waves of power honed his eyes on the wrathful being appearing in front of him, his eyes that had experienced the vicissitudes of time not being bothered one bit as a cold voice released from him .

"Adjudicator, huh? You've been bullying my youngins all this time thinking you were something big . I am here to clear that misunderstanding . "

WAA!

An aura of majesty released from the Elder as space weaved and cried, even the nearby barrier of the Nexus Galaxy thrumming as if it felt a threat!

The Chaotic Void in the surroundings shook as it seemed to become more orderly, with this shocking phenomenon continuing until the void seemed to take characteristics of the starry space within a Galaxy, as if another Galaxy had actually come to reside in this location .

The shocking truth was . . . that a Galaxy had come to reside in this area, and it was the manifestation of the Realm that the Elder of the Fiends achieved!

GALAXY Realm! A Realm where in the simplest terms, the beings could influence the surrounding area as if it was their own personal Galaxy! Do you even fully understand what this phenomenon meant? The implications were shocking as the Imperial Adjudicator looked at this scene with the same wrathful eyes .

The Father of the fearsome Imperial Princess seemed like a man in his forties, his face sculpted with devilish handsome features and a sharp jawline as his eye brows alone released unkempt regality . Dark hair flowy wildly above his head as eyes that shone with a blue luster glanced at the fearsome GALAXY ranked combatant without any fear .

As he saw the war currently making its way into the Nexus Galaxy, he thought of his daughter that was facing a deadly threat far away, as well as his wife in the Nexus Galaxy! As the images of these beings crossed his mind, his rage overflowed as essence erupted from him .

VOOOM!

Like a vacuum coming to fruition, the aura he released pushed back the horrifying influence of the GALAXY Realm Fiend Elder, glimmers of stars beginning to appear around him as one could see his aura was not at the QUASAR Realm, but it also had not stepped into the GALAXY Realm!

"Hmph, just a half a step into the Galaxy Realm, and you thought you could raise yourself into a power in this unknown corner of the Universe? Too bold!"

The voice of the Elder Fiend was as cold and domineering as ever, his aura only spiking up more as it threatened to devour the barely formed manifestation of a starry Galaxy that the Adjudicator released .

"If this is all you have, it seems like the rest of our targets today, this Galaxy will be falling to the hands of our Great Master . "

RUMBLE!

Horrid words that would have made any man falter released from the Elder Fiend, the mentioning a Master behind him only making the situation more pressing as the face of the Imperial Adjudicator remained as quiet and wrathful as ever .

As he sensed the fearsome power of his opponent and saw the chaos falling upon the Nexus Galaxy, he held slight hesitation on his face as he recalled the words that a being extremely special to him had said before!

'Only use it as a last resort . . . it is powerful, but it might invite them here! If they find me, I will forever disappear from you and Anna...'

The voice of the being he loved the most repeated in his mind over and over again as he glanced at the fearsome force threatening the same Galaxy she was hiding in, steeling his resolve as he chose to face what may come whenever it came!

As he resolved himself, the eyes of the domineering Elder Fiend abruptly opened wider as he began to sense a fearsome aura emanate from the 'weak' Imperial Adjudicator .

This aura . . . even made his manifested Galaxy tremble!

Chapter 672: 672

Across the vicissitudes of time, the types of powers and strength were numerous .

The masses would only ever come to touch the cusp of such powers, while a select few enjoyed shockings means of strength that could only be imagined in the wildest dreams!

Such a thing was happening right now as the Imperial Adjudicator that was half a step into the GALAXY Realm saw that to save the Nexus Galaxy, he had to use something that he had been warned not to utilize unless it was in the direst situations .

...

...

...

CRACK!

An eerie silence had pervaded briefly as it seemed the void itself was fearfully waiting, and in the next instant the horrid sound of space breaking occurred as one would be shocked to find the source of the horrid sound was from the Adjudicator's chest!

RUMBLE!

Essence roiled and tumbled wildly as from the chest of this Galaxy Ruler, the appalling appearance of what could only be described as a rift appeared .

This rift seemed to split his chest apart as he winced in pain, but his blue eyes remained steadfast as he continued to supply his mana towards the stupendous ability he had cast, and the Elder Fiend felt the aura of something unbelievable as from the rift on the chest of the Adjudicator, something was emerging outwards with the luminescence of stars!

Whatever was coming out seemed to have been miniaturized when it was inside the rift apparent on the Adjudicator's chest, and it continued to enlarge as it got bigger in front of him, overshadowing everything around it as the Imperial Adjudicator announced its name with great reservations .

" . . . Aurora Galaxy Dragon . "

WAA!

A magisterial awe inspiring aura erupted in the void at this moment as the image of the beast that leaped out of the rift situated on the Adjudicator's chest became clear .

The image of a majestic dragon towering over 500 meters appeared with crystal clarity, its scales shining a formidable assortment of colors as the most shocking thing was that when one looked at the body of this Aurora Galaxy Dragon . . . they could see the appearance of a rotating galaxy!

An illusory image of a rotating galaxy was very clearly reflected on the body of this majestic creature, causing the luminescence of millions of Nebulae and Stars to light up the faces of the somber Imperial Adjudicator and the surprised Elder Fiend .

At the same time with the appearance of this Aurora Galaxy Dragon, an imperceptible wave of essence erupted from it as it spread outwards, none of the two beings in the surroundings being able to pick it up .

ROAAAR!

With glistening deadly jaws that were filled with dignity, a space rending Dragon's Roar erupted out as the manifested galaxy that the Elder Fiend had laid out was entirely wiped away, a domain of unknown wonders being laid down as the fearsome Aurora Galaxy Dragon then turned its gaze towards the Elder Fiend .

Its eyes were colored gold, its face arrogant as it seemed to disdain merely being in the presence of the creatures around it, even the being that summoned it getting the same treatment . The domineering pressure of the Elder Fiend was wiped away instantly in front of the appearance of the Aurora Galaxy Dragon, as one could not compare the skill of a child to an adult!

One could not compare to the arrogance and domineering pressure of a Dragon! And this was a genuine Dragon, a creature brought forth by the !

The Elder Fiend looked on as his demeanor instantly changed, his own body screaming danger as his mouth unconsciously moved in a stupor .

"That . . . is not possible! Such an ability is only available to those affiliated with THAT Ancient Power, those with knowledge of the power above Ultimate Laws . . . you . . . you cannot have it!"

RUMBLE!

His arrogance had faded as his eyes turned extremely grim and hysterical, staring at the phenomenon before him in disbelief as he told himself it simply could not be so .

The Elder Fiend had lived long and was somewhat knowledgeable, having listened to the stories of the Entity it called Master as he knew quite a bit about the Dark Universe!

As the Elder Fiend heard the words uttered to bring forth the Aurora Galaxy Dragon that had a shocking aura at the GALAXY Realm, he recalled some of the stories heard before as the identity of this ability became clear to him .

!

An ability that only beings of a fearsome power nowhere near this nondescript location of the Universe should be, an ability that allowed these beings with the profession know as Animus Summoners to call forth fearsome creatures to fight on their behalf!

Some called these creatures Animus Summons, some called them Animus Pets- but the only thing that remained as the truth was the fearsome power of these creatures that could be raised to horrendous levels as it allowed for an Ancient Power to stand strong in the Dark Universe . It was an ability that utilized something even more horrific than the concept of Ultimate Laws .

The problem was . . . it should not be appearing here!

The Elder Fiend gritted his teeth as his overwhelming power at the GALAXY Realm erupted out with even more vigor, its gaze looking up to match with the cold and arrogant eyes of the Aurora Galaxy Dragon that was merely looking at him as if he were an ant, as if he was a being already destined for death .

Meanwhile, unbeknownst to the disbelieving Elder Fiend, a conversation was occurring between the fearsome Aurora Galaxy Dragon and the Imperial Adjudicator .

"You know what your actions of summoning me can do . Are you so eager to get rid of my Master even after all the favor she has bestowed upon you?!"

The voice of the Animus Summon was filled with even more rage than the wrath present in the heart of the Imperial Adjudicator, but the Father that was about to lose his daughter replied with a straightforward manner .

"I had to! Not just the home she is in, but even her daughter is in trouble!"

...!

The eyes of the Aurora Galaxy Dragon squinted as its oppressive power grew by a whole other level, silence reigning in their telepathic communication as the dragon only left behind a sigh .

OOOOH!

A bellow erupted out from the Elder Fiend at this time as his essence climbed up madly, a luminous red sword appearing on his hands as he screamed out while streaking forward .

"It cannot be! It cannot be!"

RUMBLE!

His words said it could not be, his actions wanted to ascertain it! The domineering dragon glanced at this Elder Fiend as the illusory galaxy reflecting on its body shone with a dangerous luster!

Space shattering power of the GALAXY Realm roiled out as even the chaotic void was displaced, a shocking battle beginning just outside the boundary of the Nexus Galaxy

Chapter 673: 673

RUMBLE!

In the Stellar Sky Galaxy, the two sides had began clashing as the Fiends poured out of their Ancient Vessels .

The two QUASAR Fiend Rulers made a straight line towards the Ruler of the Stellar Sky Galaxy, a being that was known as the Stellar Ruler!

Hos body shone with the light of stars as his expression seemed to age a great deal in a matter of seconds as he saw the incoming Fiend Rulers, his closest subordinates at the peak of the Black Hole Realm staying behind him to reinforce against the kicking enemies .

Even though they were in the realm of Black Hole, they knew that those in the QUASAR Realm could trash them with ease!

The levels could be explained as such- those in the Realm of Black Hole compared to the Nebula Realm was akin to comparing a professional fighter to a fatty that enjoyed a hedonistic lifestyle all his life .

Meanwhile, comparing the QUASAR Realm to Black Hole was akin to comparing a grown man to a kid! All the grown man had to do was exert some pressure and he could easily trash that kid .

Of course like everything in life, there were exceptions .

Sometimes you had a powerfully trained kid that would be able to take down a grown man . But this was also why it was called an exception- it was rare!

At this moment 2 grown men- 2 QUASAR ranked Fiend Rulers, were ganging up against the Stellar Ruler as he was aided by his forces .

PA! PA! PA!

At this time, the branches of Yggdrasil reached them as they received a light smack on their back, the eyes of the aging Stellar Ruler regaining a semblance of light as Life Essence permeated through him and he felt increased vigor!

His heart thumped with power as it made him fully pull out his emotions of unwillingness, the emotions of not wanting to lose his galaxy! He roared out with power as with the buff of [Boosted Life Force], he clashed with the 2 Fiend Rulers .

OOOOOH!

Off in the distance where the branches of Yggdrasil were many, the Fiends at the Ranks of Nebula and Black Hole were swarming towards the heavily outnumber defenders fearlessly .

The grim looks on the faces of their enemies only served to increase their bloodthirsty as the first of the 2000 Nebula rank Fiends came in the range of Noah's numerous branches .

As if a snake was lying in wait, the branches filled with shimmering green leaves suddenly stretched and extended out, shooting towards the heads of the unsuspecting fiends as their speed neared that of light!

SHA! SHA! SHA!

A flash of light, a smack of a branch . . . and to those caught off guard . . . death!

"Hold!"

The Fiends pulled back for a moment they saw with surprise how 25 Fiends were unlucky enough to have the branches pierce their heads, and that these branches were somehow enough to reap their lives as they watched their lifeless bodies pulled towards the enormous Primeval Tree and be absorbed into its thick trunk .

...!

Seriousness rose in the eyes of the Fiends as the 200 in the realm of Black Hole moved forward at this moment, their gaze towards the branches of Yggdrasil serious as they marked this tree dangerous!

The same scene reappeared when the Black Hole Rank Fiends entered the range of the branches, but they merely slapped them away as they could not be pierced through by them, the gravitational force they gave out being too terrifying .

Yet . . . they were still struck by the branches regardless as without their knowledge, the [Withered] status effect began to be applied to them!

One must note that this was also another difference in Realms . Because of the power of their Black Hole, beings in this stage could still defend themselves against the branches of Yggdrasil that had enhancements in the thousands of percentages .

The high percentage boosts were only enough to keep up with them in speed and slightly lesser in power, and this was shocking enough as it is since Noah was able to target any nearby Black Hole experts and the Fiends at the Nebula Rank alone!

But it wasn't enough! And he saw this clearly as he saw some of his branches being grasped by the Fiends above him in Realm as they used their strong hands to rip them apart .

RIIIP!

A tingling sensation came everytime his branches were destroyed, only pulling back slightly before they regenerated to rush out with even more vigor!

This was the +5000% Regeneration at work, where as long as he provided mana and wasn't killed by a terrifying skill, his branches could heal nearly instantly .

One must also recall during all this that he wasn't alone!

As the enormous Primeval Tree Began to be besieged by Fiends and ripped apart, those who had received its blessing rushed out with vigor as their bodies shone with a hint of green from the Boosted Life Force ability .

Another particularly luminous figure was the Imperial Princess herself, the scorching wings of plasma behind her letting out a resonant cry as she thundered forward not to meet the Fiends at the Nebula rank, but the ones in the Realm of Black Hole!

WAAA!

The scorching temperatures of the plasma caused a line of blue purple lasers to be the only trail that the enhanced Anna left behind, smashing into an advancing Black Hole Fiend as a rupture in space occurred .

When one looked at the scene again, they would find half of the body of the Black Hole Fiend to be missing, disintegrated entirely from the scorching beams of plasma!

...!

Alarm rose in the eyes of the Fiends as they moved with more care, seeing that this tree and this Imperial Princess would be a great hindrance to them as they had to be taken care of fast .

But it wasn't just them as the two Maids living to only protect and service the Imperial Princess looked towards them with eyes pulsing with killing intent, their DELTA ranked Trait erupting out as they went to match the groups of Nebula Ranked Fiends .

The protectors from the Nexus Galaxy joined in, as well as the defenders of the Stellar Sky Galaxy jumping in the fray as the conflict fully began!

As all of this was happening, the numerous branches of Yggdrasil continued to whip as many beings as possible as allies were strengthened and enemies were debuffed, while also strangling any Nebula Ranked Fiends that came anywhere near them .

But everytime a Black Hole Expert came near, they used their powerful realm to not allow any of the branches to pierce through them as they release horrendous attacks that ripped apart the branches .

As Noah observed this situation, the enormous tree he was taking the form of seemed to nod as he then moved on to the next stage of his planning .

One must recall that with Infinite Mana, Noah truly had a great deal of options at his disposal!

One of those options . . . was layering a large amount of immense mana requiring skills that each have ridiculous boosts in order to be able to skip the advantage of the realms of his enemies .

As he looked at the Nebula and Black Hole ranked Fiends that did not dwell in any laws and only had immensely powerful physical bodies, he recalled how he had easily taken care of them before in the Devouring Hells Realm with an attack that dealt Soul Damage!

These thoughts only arrived for a second before he acted .

[Aura of Redemption] .

[Incandescent Emperor] .

[Sword of Judgment] . [Sword of Judgment] . [Sword of Judgment] . [Sword of Judgment] . . .

...!!!

A constant and repetitive spam!

The horrendous abilities under the Law of Fate were cast seamlessly to back up the already ridiculous Law of Life!

Chapter 674: 674

A starry display of luminous essence of gold erupted out the moment Noah cast the skills under the Law of Fate, the golden glow beginning to permeate over the green as golden lines began to spread out from the trunk of the tree and go towards all of its branches!

To understand exactly what was happening, one must recall what the abilities Incandescent Emperor, Aura of Redemption, and Sword of Judgment that Noah had just cast provided to be able to comprehend what was about to happen in the next few minutes .

One had to recall the descriptions of these skills gained less than two weeks ago!

[Incandescent Emperor](5/5) :: The stature of the Incandescent Ruler is adorned as the user adopts a regal armament . While active, Incandescent Emperor grants +1000% to Damage, Attack Speed, Cast Speed, Law Resistances, Defence, as well as +50% Decreased Damage Taken from all sources .

[Aura of Redemption](5/5) :: A circular aura that surrounds the user and grants them constant health regeneration where any damage dealt can be healed instantly for as long as the ability is kept active .

[Sword of Judgment](5/5) :: A unique sword capable of tearing apart space itself is called upon to be wielded only by the user . The Sword of Judgment deals 0 Physical Damage in exchange for dealing a tremendous amount of Soul Damage .

A golden Aura that granted him constant health regeneration for as long as mana was provided!

A skill termed Incandescent Emperor that granted him another +1000% to a great deal of things!

And a skill that gave him a righteous Sword of Judgment that purely granted tremendous Soul Damage!

Just these 3 abilities reinforcing Yggdrasil meant . . . well we would just have to observe to see the results .

The Swords of Judgment continued to appear en masse around the branches of the Primeval Tree as Noah cast the skill over and over again, hundreds of these shocking golden swords being grasped by the tout branches of Yggdrasil as the golden runic lines from Incandescent Emperor continued to spread throughout!

The Fiends and defenders of the Stellar Sky Galaxy alike turned towards this phenomenon with shock as they observed a golden illusory crown appear above the 5000 mile Primeval Tree . Its branches shimmering with gold as it released an extremely dangerous .

And before anyone could absorb and react to this stupendous powerup, a great deal of branches instantly moved out under Noah's command as they targeted multiple Nebula and Black Hole Realm Fiends! Each of the branches of the ancient tree carried with them a Sword of Judgement, the swords shining with a dangerous glare as they struck out with immense speed multiple times faster than before!

The speed came as a shock to the fiends who watched in disbelief as multiple branches of the ancient tree struck over one hundred nearby Nebula rank experts while an even larger number of branches seemed to target over ten nearest Black Hole Fiends! The instant the branches struck out, the unsuspecting fiends only felt an illusory sword of light pass through them and all of those in the Nebula rank instantly lost their lives .

Instantly!

This was because the soul damage from these swords was extremely high, and such high damage could not be withstood from the surprise attack . This was a shocking sight to see as over one hundred Nebula rank experts fell in less than a second . On the other hand, the fiends at the rank of Black hole fared much better, a few of them being able to react on time as they weaved out of the path of the Swords of Judgment .

But still, six had been unlucky enough to have multiple branches carrying the illusory swords pass through their bodies like a hot knife cutting through butter! Strong in physical offense and defense, but no protection against the damage dealt directly to the soul!

This meant that instantly, six Fiends at the rank of Black Hole also met their death . . .

A lull seemed to permeate throughout the battlefield as everyone looked towards the abrupt attack that had come from the glimmering ancient tree floating in the starry space .

They saw that golden runic sigils were permeating throughout the trunk and branches of the ancient tree, its luminous green leaves shimmering with a hint of gold . But the most striking thing were the dangerously shining golden swords that had been used to deal a shocking sneak attack that took away the lives of too many experts .

The imperial princess floated to the side as her wings made her stand out in the starry space . She still held a veil covering her face, but if one could see her resplendent expression they would see someone looking over in complete disbelief at what had just occurred .

Over a hundred in the Nebula rank dead and six in the rank of Black hole dead instantly!

Off in the distance, the two Quasar ranked experts that were besieging the ruler of the Stellar Sky Galaxy looked over with grim expressions as they saw the branches pull in the bodies of the defeated Fiends into its thick trunk .

They looked towards each other as an unknown communication seemed to pass through their minds, and then one of them instantly shot towards the ancient tree while the other took the attention of the shocked Stellar Ruler!

OOOH!

The Stellar Ruler burned with essence as this being was actually an Assimilator of the Law of Space, and he was an extremely proficient Assimilator as over half of this Law was already one with him .

His body seemed to become one with space as he instantly appeared in front of the Fiend that was making way towards Yggdrasil, throwing a punch that had the force of numerous stars as the Fiend Ruler came to a stop!

"Your enemy is me!"

The Stellar Ruler shouted this while his heart shook at the power the Life Law Master displayed! Aside from the Boosted Life Force given by this being that allowed him to sustain heavy injuries that healed instantly against the two QUASAR ranked beings, it turned out he was also proficient in the Law of Fate as he somehow dealt deadly damage to the Fiends and took down many of them rapidly .

He could not let this being be besieged by these two powerful enemies!

But as if the Fiend Rulers were in sync, the moment the Stellar Ruler appeared to block the one going towards Noah, the other one he left behind instantly disappeared from his location as he neared the wriggling branches of Yggdrasil .

This meant that at this moment, a QUASAR ranked fiend expert was making his way towards Noah as he was marked dangerous, since his actions were simply too eye-catching!

Chapter 675: 675

Meanwhile, Noah himself was reaping the benefits of the surprise attack as he pulled in the bodies of over one hundred Nebula rank and six Black Hole fiends .

The Fiends at the stage of Nebula alone granted him cores that went on to help him forge a range of ten to one hundred stars . Meanwhile, the experts in the Black Hole realm that he had never taken down before and yet somehow there were six dead at this moment-these beings were giving him a range of around one thousand stars each! This meant that from the six black hole experts, he had gained over six thousand forged stars as their entire Origins were brought into the body of Yggdrasil for him to quickly absorb the cores .

One must also not forget the Skill Points that had increased by a few thousand just from the death of these beings!

Yet the cores took the spot light at this moment as there were simply too many being forged all at once, especially from the unexpected source of Fiends .

This was not even accounting for the stars he was currently forging through the help of his Ancient Blood Clones that had been scouring the Stellar Sky Galaxy for more effulgent star pearls . One clone had found a Stellar Star while another was sifting through a Stellar Realm!

With the help of the clone and the over abundance from the fiends that he had just taken down, the number of forged stars was shockingly nearing 40,000 .

This number only served to grant him more excitement as he neared the ridiculous 100,000 stars goal! So his eyes were once again set on the remaining Nebula and Black Hole rank Fiends as he wanted to scream towards them- 'Feed me more!'

His excitement was only dampened when he saw the QUASAR Fiend Ruler making way towards him .

This enemy that was two ranks above him would prove to be a terrible match as he began easily destroying the vibrant and luscious branches of Yggdrasil . His strength was extremely hard to describe, but the one thing one could see was extreme proficiency in the gravitational force around this Fiend Ruler .

Any branches nearby were inadvertently pulled towards the Fiend Ruler as they were then ripped apart right away, the force traveling towards the trunk these branches came from as the damage passed through! This was also when the strong Life Force of Yggdrasil shone though, as this damage was nearly repaired in an instant, the branches just destroyed coming back to life once more!

OOOOH!

While the Stellar Ruler was being stopped by the other QUASAR ranked Fiend Ruler, the one targeting Noah bellowed out as he essence rose by another notch, beginning to tear apart every branch of Yggdrasil faster than they could heal as he went to destroy the enormous trunks releasing its roots across the starry space!

But at this exact moment, a resounding sound rang throughout the region of the battlefield as a green glow bloomed from Noah's huge form .

DING

With a vibrant eruption of essence, the feature of another ability of Yggdrasil came to be . Life Shield had finally been activated after ten minutes had passed since Noah transformed into the Primeval ancient tree!

RUMBLE

The Life Shield seemed like something that could not be violated, expanding out rapidly as it pushed out any nearby Fiends with an unknown force, including the powerful Fiend Ruler as all of them soon found themselves at the edge of a shimmering green circle .

In the starry space, one could see this resplendent green circular field fully cover Yggdrasil as this ancient tree shone with an even more vibrant luster!

"Outrageous!"

The Fiend Ruler was maddened at this being of obvious lower power that could only defend and regenerate at this moment, but he was still not able to wipe him away quickly .

DING!

His fists crashed against the verdant Life Shield as all other Fiends went to do the same, the defenders of the Stellar Sky Galaxy contained in the range of Yggdrasil for the healing abilities of being smacked by a branch looking around with palpating hearts .

The Imperial Princess was the same as her cold gaze shimmering with the power of plasma glanced towards Noah . Her thoughts could not be described at this moment as when she expected another surprise from him, it was nothing like what she was receiving now!

The Maids Maya and Raya were finally out of words as they stared with utter stupor, not expecting a despairing battle to be going this way at all .

But even in this moment of brief respite, Noah was still scheming as he saw the attacks of the many Fiends repetitively rain down on the Life Shield, sensing that this ridiculous shield could actually withstand the attack of these beings for about another 30 seconds at the rate they were going .

Numerous possibilities crossed his mind as one was picked, his attention going over towards the Imperial Princess as he enacted a plan!

"Princess, can you use your Trait to pull at least 60 of the Fiends at the Realm of Black Hole towards me the moment the shield is broken? Just bring them as far in towards me as possible!"

His words startled Anna who looked towards him as if he was insane, only affirming with serious eyes when she saw he was serious!

DING!

The Life Shield began experiencing cracks as it would soon be broken, but the Imperial Princess prepared herself as the scorching plasma wings and rays of plasma around her receded .

She thought of the words of Alexander as she sensed her Trait of Vector Controller, committing herself to affect over 60 Fiends at the Realm of Black Hole one way or another . She was also at this same rank, and she would have to control the vectors of 60 creatures to go towards a certain location!

Even with the odds of doing this, Anna still went forward as she began to trust the being known as Alexander more and more . She knew the task in front of her would be extremely arduous, where she might utilize all her mana at once and be immobilized! Yet she still went forward .

CRACK!

The Life Shield shattered at this instant as the embroiled Fiends were about to rush over, others still staying away from the range of Yggdrasil as they threw attacks from a distance! But at this moment, a group of many Fiends in the Realm of Black Hole felt a strong gravitational pull that had a single purpose- to get them to move towards one location with certainty!

It wasn't a constricting gravitational force, just a simple pulling force that took over 70 powerful Fiends at the rank of Black Hole and brought them towards the very center of Yggdrasil where hundreds of branches carrying Swords of Judgement waited . . .

Chapter 676: 676

Sometimes, only a single skill was required to change the landscape of a battle field entirely .

Such skills required extremely great timing and effort, and most of all had to have a huge aspect of luck to be carried out successfully .

With Noah's actively flashing mind, he saw an extremely clear path that if taken . . . could cause for an explosive method of growth in a short amount of time . He saw his number of forged stars had increased by a thousand from each of the Black Hole experts as this count was brought over 40,000 stars, and he realized the remaining 60,000 could very easily be gained as long as he took down 60 more Fiends at the Realm of Black Hole!

It was mentioned he could 'very easily' gain such a large number of stars, but it was an extremely hard thing to accomplish as he effectively wanted to take down 10 times the number of Black Hole Fiends that he did with his first surprise attack .

So he sent his thoughts to the Imperial Princess holding an EPSILON ranked Trait as he read over her Trait with the Eyes of Truth and saw that it could be possible for her to make him achieve this nearly impossible reality!

The result . . . was a star staggering wonder of a brilliant hazy light shining from Anna as she spread her arms out wide, her veil roughly waving in the starry space as she pulled a force of over 70 Fiends at the Realm of Black Hole straight towards the enormous trunk of Yggdrasil .

The moment this phenomenon occurred, not even the QUASAR ranked Fiend Rulers could react in time as a shower of branches folded in on the Ancient Tree, each one carrying a pulsating Sword of Judgment as they tore towards the Fiends!

As if this stupendous ability of Sword of Judgment might not be enough, Noah cast area of attack abilities that affected a wide region, spamming many skills that brought by a spectacular effect since they were cast in the form of Yggdrasil .

[Madness Hegemony] . [Holy Fire] . [Fireball] . [Madness Hegemony] . [Holy Fire] . [Fireball] . . .

Palpating Aether, blazing suns, and golden scorching flames overshadowed the starry space, the shimmering horror of the [Sword of Judgment] in the hundreds slashing towards the shocked Fiends playing out .

One must recall the [+3000% Increased Area of Effect on all Abilities] that was attached to Yggdrasil, and then you had the further enhancement under the [Incandescent Emperor] that made something which should have been nearly impossible into a reality .

To put it in simple terms, the Fiends that had no protection from laws and had very little resistance to the terrifying Soul Damage that was coming out from Noah on top his horrific abilities enhanced by many skills . . . the power of Realms was breached with ease as he was able to reap the lives of 70 beings a Realm above him in a few seconds! All of these factors made it possible for him to leap over the power of Realms and ignore it, reaping the lives of those that should have been above him with relative ease . .

.

RUMBLE!

Off to the side, Anna and the other protectors were watching with bulging eyes as the starry space changes color to a tinge of gold and purple for a second, the essence of destructive Aether and domineering Fate present throughout as when the numerous branches could be seen again, the bodies of over 60 Fiends in the Realm of Black Hole were skewered on them as they were pulled towards the trunk of tree at once...

"You...!"

OOOOM!

World shaking essence filled with anger erupted out from the QUASAR ranked Fiend Rulers at this scene, the one besieging the Life Shield before pulsing with stupendous strength as he turned into a streak of light towards Noah .

"Pull back first!"

His command could be heard as it was directed to the Nebula and remaining Black Hole rank Fiends that could feel their hearts trembling with unease at the butchering of their brethren with such ease . The Fiend Ruler set off alone to rectify this great injustice but . . . he would find that he and his people had just played a part in a shocking play as they acted as the fuel to make a raging fire glow ever brighter!

At this moment, time seemed to come to a slow motion as many important events occurred in the span of a few seconds .

A Fiend Ruler erupted out towards Noah . Yggdrasil then began to shine with a vibrant light as at its hidden center where an illusory Nebula could only be seen by Noah- a great number of stars began to be forged at a rapid pace unlike anything experienced before .

50,000!

70,000!

95,000!

It seemed like his fuel was endless, and it actually was as the loot of 70 Black Hole rank experts went towards helping him put together a shocking Nebula of 100,000 stars . . . was actually completed .

DIING!

An archaic wave of mana erupted outwards from Noah's huge form the moment that this phenomenon was completed, his entire body coming to a halt as even his clones that were searching for more Effulgent Star Pearls were brought to halt momentarily .

Even his other body and clones in the Novus Galaxy were also brought to a halt for a second, time seemingly being slowed down the instant the 100,000 star mark was achieved, a shocking phenomenon occurring within the Origin of Alexander as the Nebula came to a complete halt!

An essence of appalling age and profound ancientness seemed to emulate from the center of the Nebula and climb outwards, Noah's mind coming back to life as his eyes shone while looking at his own Origin, a set of words appearing in front of him as he stared at the ecstatic Nebula with Eyes of Truth .

[Complete Nebula] :: An origin in the Realm of Nebula that has achieved Grand Completion, achieving a stage that very few have entered since time antiquity . As with all stages achieving Grand Completion, the illusory Nebula will become more real as it already manifests on the body of the being with this Origin...

A set of words showed something unique that very few had achieved as in the battlefield where time seemed to be moving in slow motion, many beings nearly had their eyes fall out of their sockets as from the body of Yggdrasil, they began to see an image of an expansive Nebula come to life .

This Nebula seemed wondrous and magical, with starry skies filling it to the brim!

A glimmer of profoundness could be felt from as it lit up the entire surrounding space .

Yet before this Nebula could even be enjoyed with all of its beauty, they saw a starry light cover it as the beautiful stars within it shattered, an implosion of tremendous proportions erupting out as it even shook the space outside, those watching with perched eyes beginning to see the formation of a dreadful Black Hole!

At this moment, a variety of factors came to be as Noah imploded his [Complete Nebula] to advance from this Realm he had been in for a few weeks into a brand new stage!

Chapter 677: 677

In the chaotic void of the Nexus Galaxy, tears could be seen in space as flashes of light were the only thing visible every now and then .

This was because an appalling battle was taking place between experts at the GALAXY Realm!

The Elder Fiend was particularly active as he moved with a sullen face, parrying the claws of the Aurora Galaxy Dragon with the blade he carried or even his own body at times .

This was the body of an Elder Fiend that had trained to the peak, gaining a thrumming physical body that could actually match a creature such as the Aurora Galaxy Dragon in battle!

Others could traverse in laws and gain a special understanding, while Fiends focused on their Realms and bodies as they grew to the numbers and levels they were at today . Yet . . . they were still being hindered, and by a power that should not be able to do so at this moment .

The Elder Fiend had a somber expression as his denial about the creature before him could not be continued anymore, the knowledge it had about such a creature spilling out as his heart only became heavier!

The creature he was fighting was truly an Animus Summon or an Animus Pet, where beings proficient in a particular #%\$^\$ were capable of utilizing profound abilities to bring these creatures to life .

Among the many secrets of the Animus Summons, the one that made them as powerful as they were was the fact that when it came to the Realm of power, they followed archaic methods that granted them a nearly perfect cultivation base! Such a thing could also be understood with ease when one knew what to look for, and the Fiend was convinced when he continued to see the image of an expansive Galaxy swirling within the body of the Aurora Galaxy Dragon .

At any stage, if one could see a Manifested image of the Origin of a being when they utilized their essence, it meant that this being had a nearly perfected realm of power that would overshadow all of those in the same realm!

It was extremely hard to reach such a Realm as the methods to do so had long been lost in the eons of time, but the !&#^# capable of utilizing made it so that these Animus Pets could actually be raised proficient enough to naturally attain the nearly perfected realm of a long past era .

So even though the Elder Fiend was extremely strong in physique and defense, he could currently only defend against the terrible attacks of this creature that was in the same Realm as him, and yet on a completely different plane!

What was most vexing was the fact that as he stood against this Aurora Galaxy Dragon, the Summoner himself had gone down into the Nexus Galaxy to reinforce the forces there .

Being half a step into the GALAXY Realm, the Elder Fiend felt pain at the thought of the Fiends fighting down there facing the Imperial Adjudicator alone! He knew at this moment that this campaign at the Nexus Galaxy . . . would not be successful!

ROOAR!

A dragon's roar was all that met his thoughts as a starry claw carrying the force of a luminous Galaxy thundered down...

In the Stellar Sky Galaxy, an isolated gravitational force had come to be as a wonder of a Nebula was broken down, those watching seeing the formation of a shocking Black Hole that wasn't just black in color, but it seemed to hold an assortment of gold, black, red, green, blue...!

It was a Black Hole forming that had the splendor of multiple colors as those watching had to rub their eyes to be sure they were looking at the correct phenomenon .

The implosion of the Nebula and the formation of the Black Hole was extremely fast, nearly instant for those paying attention as one of the benefits for forging the ultimate peak of stars before breaking through was revealed .

Those attaining the 100,000 number of forged stars in their Nebulae before breaking through would have the easiest time doing so, the next stage coming naturally as they would not experience any dangers!

Such was what occurred with Noah, where his spectacular Black Hole formed with ease as he began to feel the surrounding space with much more clarity, the gravitational forces in his immediate surroundings being something that he seemed to be able to easily control .

Many beings watched the formation of the Black Hole with amazed eyes, especially the Imperial Princess that had contributed majorly to making it possible .

Anna was currently breathing heavily after utilizing all her power, drawing nearly every mana she had to pull the over 70 Fiends to the position where they were wiped away . She was surrounded all around by her protectors as she recovered, all of their gazes remaining on Yggdrasil as on this huge tree, they could see the most beautiful multicolored Black Hole that thrummed with unknown power!

If one recalled the clear image of a Manifested rotating Galaxy on the body of the Aurora Galaxy Dragon, they would know this phenomenon was the same one, where Noah had actually achieved a path of a realm very few even knew how to embark on .

Yet he had used brute force of purely absorbing Effulgent Star Pearls and Cores of being a stage above him, finally breaking through and forging something that gave him unrivaled strength on beings of the same Realm!

RUUMBLE!

The leaves of Yggdrasil shone with even more splendor as the slowed down time seemed to move normal, a fearsome pressure erupting out from the ancient tree as it faced the coming onslaught of a maddened Fiend Ruler .

This QUASAR Realm expert locked his eyes with the gorgeous multicolored Black Hole that seemed to release an unknown sense of pressure that made even him uncomfortable, especially the fact that its image was rotating domineeringly in the body of this ancient tree, as if nobody could stand against it!

"Perish!"

The aura of the Fiend Ruler climbed as he ignored the danger signals and thundered forward .

A newly advanced being at the Realm of Black Hole versus a being at the Realm of QUASAR!

The former was reinforced with a great deal of skills that granted shocking percentage boosts, and now as he walked on the path of strength that had been lost over the eons of time, his level of strength amidst all of this not being fully calculated yet .

A battle with someone of a higher rank . . . was just what he needed!

Chapter 678: 678

The battlefield had turned chaotic as the QUASAR ranked Fiend Ruler went toward Yggdrasil with an ever rising aura .

The Stellar Ruler observed this scene with unwilling panic as the other Fiend Ruler accelerated his attacks and besieged him on all sides so he could not lend help!

"Protect the Life Law Master, even if you have to sacrifice yourself!"

The cry of the Stellar Ruler rang out across the starry sky as many beings shook their heads with strong emotions while listening to the command . Even they knew that if this wondrous being in the form of a tree fell, they would fall even faster as they lost one of their strongest contenders who could also heal all of them in seconds .

The two Maids Maya and Raya did not want to leave the side of the tired Imperial Princess, looking towards Anna with hesitation as they wondered what to do .

All of the beings currently on the scene of battle were on the same mindset as they watched the Fiend Ruler aim at Noah's life, they knew that it would be extremely hard to win such a battle even with the prowess he had shown in the form of Yggdrasil!

To understand this, one would have to know the distinction between those in the Realm of Black Hole and those who had stepped into QUASAR .

A Quasar is an exceedingly luminous active galactic nucleus that has a supermassive black hole with mass ranging millions of times greater than any common star! In the wide universe, it was known that Quasars were linked to how Galaxies formed, as they had within them the active galactic nucleus that would later make way into something even grander!

The supermassive black hole in the middle of a Quasar continuously collects gaseous mixtures from the surrounding space as it creates a bright whirling disc of light propelled by strong magnetic fields . If one ever had the chance to lay their eyes on a sight of a Quasar, they definitely should!

But at this moment, a being of such a level was thundering towards Noah as around his body, one could distinctly notice a natural swirling mass of star particles that created a natural barrier between the Fiend Ruler and the outside space .

A naturally protective barrier granted whenever one reached the QUASAR Realm, a barrier that heavily reduced all incoming damage while even nullifying lesser types of damage .

Before, when the branches of Yggdrasil even neared the Fiend Ruler, they were ripped apart into nothingness as the Swords Judgment carried on them were easily evaded . Now as Noah stepped into

the Realm of Black Hole and stepped on a path of power lost in the eons of time . . . he sent forth his branches once more as other protectors of the Stellar Sky Galaxy swarmed towards his position to also lend a hand!

They watched with bated breaths as the singular branches of Yggdrasil rushed forward while climbing together, gradually forming into a huge cylindrical trunk that was 1000 meters in diameter .

This tree stump went towards the Fiend Ruler making his way over like a raging bull, this QUASAR expert throwing out a fist that carried with it the glimmer of stars, smashing against the cluster of branches head on!

BOOOOOM!

Titillating light waves and vibrations erupted out at the point of contact, the scene becoming clear once more as many beings watched in pure astonishment as they saw a fist still in contact with a thick tree trunk .

BZZZ!

Horrid gravitational forces were continuing to erupt at the point of contact as shockingly, Yggdrasil was not pushed back by the punch from a being a rank above him in the slightest!

"What!"

"That is...!"

The illusory multicolored Black Hole that was visibly swirling within the body of Yggdrasil could be seen shining ever brighter as it released a stupendous gravitational force, their eyes really registering the fact that someone at the Realm of Black Hole withstood an attack from an expert of the Quasar Realm .

They seemed to have forgotten the feat just a few minutes prior when multiple Black Hole experts were taken down instantly when Noah was still at the Nebula Realm, because they simply weren't looking at him like he could be in such a realm with the power that he portrayed!

Yet now they visibly saw a shimmering Black Hole that did not appear on anyone else like so, the path of strength only common in ancient times being recreated in Noah's hands as after seeing he could withstand the horrendous damage of the Fiend Ruler, even more branches weaved together into huge tree trunks .

The vibrant golden green leaves seemed to have an even sharpened edge that could cut apart steel as on the converging branches, hundreds of Swords of Judgment appeared as miniaturized stars also came to be, along with fearsome Portals of Terror filled with pulsating rays of Aether and golden scorching suns as Noah cast [Star Caller], [Madness Hegemony], [Fireball] and more skills!

Since he saw the gap could be breached, he wanted to break it even further by doing what he was best at- spamming!

Meanwhile, as the battle between the body of Alexander in the Yggdrasil form and the Fiend Ruler took place, something worth noting was happening with one of the Ancient Blood Clones that was just finishing scouring a Stellar Realm for more Effulgent Star Pearls .

The way of forging stars was much faster when cutting down Nebula and Black Hole rank experts, but where would one free find such beings to do in the future? These Star Pearls could grant someone multiple stars as they would still have their uses, so Noah had the two clones continue to scour the Stellar Stars and Realms of this Galaxy!

One of his clones was passing through the earth of a Stellar Realm while heading towards another location of a pearl, when his body suddenly came to a halt as not too far away from him- he felt the waves of unique essence that he shockingly recognized .

It was the same type of essence that he sensed when the overwhelming Ruination Core was brought out by the Novus Galaxy, an essence that seemed to indicate a Tool of Ruination!

He changed his direction instantly as he followed the waves of this unique essence, piercing through the earth as he broke into a small cavernous space beneath whatever mountainous earth he was on . This space was unique in nature as it seemed to only be holding a single thing within .

Floating in the very middle of this hidden space . . . was a page!

A Page!!!

Chapter 679: 679

When Noah saw the clone break through the layers of earth and see the page floating silently in the small hidden cavernous, he couldn't believe his own eyes as he had to make sure what the Eyes of Truth were showing him was truly a real thing!

[Book of Ruination- Page XI] :: A page from the Book of Ruination . Knowledge of the assimilation and integration of Laws is contained within .

...!

It truly was! His clone floated towards it as his hands reached out, managing to grasp onto the page carefully as he came across something with a unique texture .

It felt extremely cold to the touch, and even though it seemed to have the properties of a page, he could not bend it even slightly!

As he looked at this page, he was filled with disbelief as even he had to ask himself, what were the odds of him coming across such a thing as his clones scoured the Stellar Sky Galaxy for Effulgent Star Pearls?

He had only searched across a few stars and realms and yet a page from the Book of Ruination was now in front of him!

Granted, he only found it because it released a unique signature that he had felt before because he was around a Ruination Core, but it was still something that caused one to pause .

He would attribute it to Blind Luck at this moment, but his attention was already carried away from the 'Why' as he stared into the page and wanted to see exactly what was on it .

He stared at the words present on the page as they seemed to come alive, each of them seemingly trying to jump out of the pages! His eyes could not help but read the first paragraph .

{Excerpt XI- Integration}(Book of Ruination) :: The Laws are as vast as the oceans and as solid as the mountains . One can embark on a single law and never complete it in their lifetimes, while others can begin a law and master it in a single day . This time among many things, we discuss the steps after one comprehends a law- we discuss the steps of the integration and assimilation of laws...Among the multitude of creatures in the Universe, the one who embarks on the path where their Origin is loved by the Universal laws will be the one to succeed . . . To those seeking to Assimilate laws in the most optimum way, one must first comprehend all the basic, Supreme, and Ultimate Laws . Initiating a method of Assimilation written later on in this page will allow one to embark on a path that breaks through the chains of Universal Laws as their assimilation of all of such laws will set them on the path of a Grand ***, a path that is needed if one ever hopes to fully utilize the Tools of Ruination, a path of those who stand above many in contempt...

...!

Archaic words filled with power littered the page, those displayed above being but a mere paragraph as what was written on this page could fill half a book! Yet this was only a single page from the book of ruination, a page that was titled {Excerpt XI- Integration}!

His eyes seemed thirsty as he continued to read even more, knowledge he never thought to be possible freely displayed on this page as he soaked all of it in .

While his clone obtained something out of his wildest dreams, Noah himself was fighting a being of higher rank than him while actually managing to stand his ground!

The high percentages of boosts given by the many skills he had active were the only reason he was doing what he did, with the other being the abnormally powerful multicolored Black Hole that seemed to release near the same pressure as the Fiend Ruler at the QUASAR Realm .

This was because it was a Black Hole formed from 100,000 forged stars, something 100x times greater than what most beings broke through with!

One must also understand the percentage boosts and exactly how they came to provide Noah the power that he held .

If we were to assign an 'Attack Value' of 10 to Noah as the base damage he could deal and then apply the +3000% damage, it would be $10 \times 3000\%$, or 10×30 ! This would bring the base attack of 10 to 300, an increase of 30 times...

This was why he could match the being at the QUASAR Realm- because nearly all of his attributes and damage of skills were being boosted by 30 or 50 times .

Such was the reason why he could stand against the Fiend Ruler!

BOOM!

Another impact resounded out as Noah observed the starry field around the Fiend Ruler expand outwards, its body trying to weave in and out of the spammed skills or simply tank those that were too large .

Noah was making sure the impact of the skills could be felt as he threw down stars and fireballs 10 or 50 times larger than the 3 meter tall Fiend Ruler himself, making it so that these attacks had to be dealt with by him as he withstood their damage alone!

One could distinctly see that even though the starry field portrayed by this Quasar expert was roiling out strongly, it continued to get dimmer and dimmer over time .

This was because even as he tried to make his way to the huge trunk of Yggdrasil, the numerous branches wielding Swords of Judgment always got in his way if not for the terribly changed Aether filled area of space through the hands of Madness Hegemony or the terrifying spammed skills .

At this moment, the Realms of Power were being violated by Noah as he actually made it so that a being of a higher Realm could not advance or pull back in front of his attacks, only being able to sit there and take it as with time, the one with essence remaining will be the eventual winner!

Many beings saw this situation as well, which was the reason why even more of them continued to be amazed with the being they only knew as a Life Law Master .

Having been fighting for so long and keeping such a powerful skill active, was this being still not running out of energy?!

The Fiend Ruler felt irreconcilable as he tanked more and more attacks while trying to squeeze in towards Yggdrasil to no avail, while the other Fiend Ruler versed the Ruler of the Stellar Sky Galaxy who had begun laughing wildly at the situation .

He and the many other protectors that were still facing the remaining Fiends with the help of the Branches of Yggdrasil that provided immense support actually felt the air of despair lift from their hearts, seeing a possibility of coming out of this terrible ordeal alive!

Such a thing was only brought forward by a single person, a being of unfathomable strength who had an image of a multicolored Black Hole slowly spinning with vigor on his enormous body!

Chapter 680: 680

In the Nexus Galaxy, the Conquest of the Fiends was rapidly unfolding as the enemy they thought to have understood enough turned out to be even more mysterious!

The Imperial Adjudicator reinstated his power and might as he came down to reinforce his forces in the ongoing battle in the Nexus Galaxy, slaying the 4 QUASAR Fiend Rulers and all the forces they brought with them!

The Adjudicator had used an ancient power to summon the Animus Summon that was at the GALAXY Realm, this Summon alone keeping the Elder Fiend at the same rank busy as he went down to back up his forces and wipe out all the Fiends in the Nexus Galaxy .

But the Adjudicator knew the day was not done, and his heart was still not settled as he thought of his daughter that was in a galaxy far away . Also, aside from the Stellar Sky Galaxy, there were still other Galaxies under the simultaneous siege of the Fiends .

He glanced at the bloody scene of war as dismembered bodies of fiends littered the starry space, the Imperials breathing hard around him looking towards his direction with shock and reverence .

This was because aside from the power he had used to keep a GALAXY Realm combatant at bay, the Imperial Adjudicator still had his own EPSILON ranked Trait that he used to appalling proportions to wipe out the 4 QUASAR Fiend Rulers in an unmatched fashion .

"Head to the Snow Realms and Silver Mountains Galaxies to reinforce them against the Fiends . I will make haste towards the Stellar Sky Galaxy . "

RUMBLE!

He gave out a command to the QUASAR ranked Imperial Lords, the Imperials who were standing above Imperial Rulers that were most commonly at the realm of Black Hole . These Imperial Lords nodded with heavy expressions as forces were divided and soon prepared to set off, the Adjudicator turning into a streak of light as he left the boundary of the Nexus Galaxy!

Outside in the chaotic void, the Elder Fiend was maddened as his body was gradually ground down by the Aurora Galaxy Dragon, a being such as him not being able to handle a majestic creature holding the bloodline of dragons while also being on an ancient path of power that allowed for a glimmering galaxy to be manifested on their bodies .

The Imperial Adjudicator watched this unique creature with shining eyes as he came out of the boundary of the Nexus Galaxy, communicating with it telepathically as he received the reply that the battle with the Elder Fiend should end within the next hour!

Even with the extreme might of the Aurora Galaxy Dragon, beings at the rank of GALAXY were extremely hard to kill as their Life Force could even rival those cultivating the Propitious Primeval Physique .

This Elder Fiend who was on the ropes while fighting with the Aurora Galaxy Dragon would not be going down anytime soon, and the Adjudicator knew he would not be of help in this fight between experts of a Realm he had only taken half a step into, even if he brought his EPSILON ranked trait into account!

"Then I shall go confirm Anna's safety!"

ROAAR!

His message reached the Aurora Galaxy Dragon as he simply received a piercing roar, his eyes barely managing to catch a glimpse of the starry claw rushing down towards an irreconcilable Elder Fiend .

His body thrummed with power as he made way towards the Stellar Sky Galaxy, hoping that the protectors there could just hold on for a little bit longer, and that even if all of them died- they had better protect his daughter with their last breath!

As the Adjudicator left a battlefield with experts of higher Realms and respected the absolute difference in power, Noah was utterly ignoring such a thing as he continued to thrash a QUASAR Ranked Fiend left and right .

The numerous and luminous branches of Yggdrasil focused entirely on the Fiend Ruler as this being was besieged on all sides with branches wielding Sword of Judgment, any time that these swords weren't near an imploding star or a blazing sun would take its spot!

Over time, the Swords of Judgment found their marks as this fiend that even had a natural barrier of essence around his body began to get hurt, the problem of not having strong Soul Protection becoming the bane of this creature!

The protectors of the Stellar Sky Galaxy watched this fight with ever rising hope as they fought back even harder, the [Boosted Life Force] effect that they actively sought by going near lone branches of Yggdrasil just to be hit continuing to provide stupendous results .

The Fiends themselves could not believe the sight in front of them, and this was especially so for the Fiend Ruler that was matching the Stellar Ruler . This QUASAR ranked Fiend had turned drastic as he tried to get past the Stellar Ruler and lend aid to his compatriot who was being besieged by attacks on all sides, but the Stellar Ruler would not relent!

As he glanced at the miles long Ancient Tree that had a visible multicolored Black Hole rotate through its body as if it was a painting, the Fiend Ruler questioned what exactly they had come across .

They still had the mission of looking for the mysterious Page, and the Fiend Ruler was terrified to return to his Master without any results . Yet he could only watch as their forces were reduced to a level where the protectors of the Stellar Sky Galaxy could fight back, and the situation was turning drastic for the QUASAR Fiend Ruler facing Yggdrasil!

OOOOH!

The Fiend Ruler released a bellow as his body lit up with a torrent of essence, reinforcing it as he withstood a barrage of [Fireball]s in the form of genuine suns . Terrible eruptions of Aether and destructive elements from oversized Portals of Terror also erupted around him as the +3000% increased area of effect on all abilities boost continued to show extreme effectiveness .

In between this spam of suns, stars, and Aether rays were the hidden and the even more deadly Swords of Judgment, and the moment that a Portal of Terror exploded and caused a destabilization in the surrounding space, Noah used this chance to lay out a finishing strike!

Hidden amongst the destabilized space and baleful Aether, over 10 Swords of Judgment suddenly bloomed from a hidden branch as their tips reached the Fiend Ruler in an instant .

SHIING!

A grating sound of multiple illusory swords meant to only hurt the soul did just that . . . and they did so in an utterly stellar fashion as the Fiend let out a bellowing last cry, his head pointing up as his eyes blazed a golden light before they died down, the immense QUASAR within his origin coming to rest!

" . . . "

Dead! Dead! He was actually dead!

Silence permeated the battle field as even those in close combat came to a stop .

They looked at the scene of the Fiend Ruler floating listlessly in the starry space with disbelief as they did not even know how to react .

From the hands of someone that had just entered the Realm of Black Hole, a QUASAR ranked expert had fallen!

Many looked at this scene as they wanted to scream impossible, as they wanted to say it was improbable .

Not even the Stellar Ruler who was fighting another QUASAR Realm expert had been able to take him down . Nobody else on the battlefield had as many kills as him .

Yet he...

Did he have to be so outrageous?!
