

Mana 681

Chapter 681: 681

How could it be so!

This was the thought crossing the minds of many, but it was the singular thought in the mind of the Fiend Ruler as he watched with disbelief as someone with the same rank as him had been killed .

OOOOH!

He bellowed out with rage and unwillingness as a command left his mouth soon after .

"Fight! Fight with all your strength! For the Great Master!"

He bellowed out the words as his command shook the hearts of the remaining Fiends, but they steeled them and followed as they rushed towards Yggdrasil that was still surrounded by many protectors like moths to a flame .

The Fiend Ruler knew that their Master would not accept such a failure, especially since their mission was much more important since it involved finding the treasure that their Master wanted .

If they could not get it, it was better to die here than to face the wrath and disappointment of their Master!

RUMBLE!

Fiends dashed down even though the state of the battle had become unfavorable to them, the Fiend Ruler raining down attacks towards the Stellar Ruler with even more vigor .

Meanwhile, near the Ancient Primeval Tree, Noah had just taken in the body of the dead Fiend Ruler as he saved the cores, a glistening QUASAR Ranked Skill Book, and then he watched the Skill Points shoot up by another few thousands while a red glow passing over the dead body of the fiend as he read through its memories!

Eyes of Truth told him a lot about the beings he came across, but nothing could compare to living the memories of the being themselves .

As he began to quickly process thousands of years worth of memories, his roots wriggled in the starry sky as his enormous body rumbled, the Manifested multicolored Black Hole rotating with immense power as he moved rapidly towards the other Fiend Ruler!

The movement of this mountainous form took many by surprise as the fiends on the way had a multitude of branches wrap around them, deadly swords piercing through them as the remaining QUASAR rank Fiend felt the presence nearing .

The look of the face of this Fiend Ruler was that of someone who had accepted death, and he did so in a stellar fashion as when he saw Yggdrasil nearing, he stopped attacking the Stellar Ruler and brought his arms to the side!

The Stellar Ruler looked at this as he used the opportunity to quickly land a deadly strike, but before he could even reach the Fiend, his fist stopped an inch away from him as an enormous force was beginning to erupt out .

When he felt this force, the Stellar Ruler turned ashen as he instantly turned around and ran in the other direction while screaming!

"Spread out! As far away from here as possible! He is imploding his Quasar!"

Shocking words left his mouth as many beings scrambled away, the Fiend Ruler that had accepted death for its failure actually choosing to go out with a bang, and it was in a stellar fashion at that .

At high stages like Black Hole and Quasar, experts could give out their most powerful attacks when they destroyed their own core, the destructive energies released from an imploding Black Hole or Quasar being something that could heavily injured or kill the enemy of the same rank .

This was especially so for Quasar, as it was nearly 100x more deadly than an implosion of a Black Hole!

This was because a Quasar had an active galactic nucleus, a level right before the formation of a Galaxy! Such a thing imploding would release a tremendous gravitational force that would rip apart space and everything in its surroundings to oblivion .

So the Stellar Ruler ran at this scene, while Anna and her protectors moved even further back to be safe . But many had widened eyes when they realized a single being was not running away as they even continued to rush towards the imploding Quasar faster!

Yggdrasil neared the terrifying force of an imploding Quasar as the body of the Fiend Ruler had begun to crack and melt, the space around him already ripping apart as a horrid gravitational force threatened to erupt out any second .

But Noah still went towards this exploding Quasar not because he was selfless or a Saint, but because of the loot!

He really could not let the loot of a Quasar ranked being go to waste!

So he went forward as he was also filled with a level of confidence . One of it was the fact that his Life Shield would erupt out at any moment, and the other was that he actually did not feel too much of a threat from the horrendous gravitational force spreading out from the Fiend- and the reason was his own archaic Manifested multicolored Black Hole .

At this moment, it seemed to be domineeringly screaming to him that the gravitational force being released by this imploding Quasar could not compare to the abilities of the Manifested Black Hole, and it threatened to prove this as the colorful Black Hole within Noah shone with a scintillating light!

The light seemed dominant and wild, converging to form an appalling gravitational force that went to restrict the imploding Fiend in front of Noah .

His branches flew out in a circular motion as they went to wrap all sides of the Fiend, the suppressive force being released by his own multicolored Galaxy actually stopping the advancing implosion of the Fiend as the terrifying gravitational force around it remaining restricted to him .

This was suppression! Utter and genuine suppression of a lower Realm with a higher one, and it was simply because the lower realm was made too resplendently with abilities that were lost over the eons of time!

The horrid gravitational force from the imploding Quasar never appeared, with Noah's branches carrying golden sword reaching and piercing this being from all around as a golden light burned in the closed eyes of the Fiend Ruler, his soul being cleansed with the judgment of fate as he perished .

" . . . "

A pervasive sight!

A heart rending battle!

Two QUASAR experts dead, and to someone that had recently broken through to Black Hole at that!

Chapter 682: 682

In the chaotic void, a particularly restless Imperial Adjudicator was rushing out with an aura of a blazing sun as he made way towards the Stellar Sky Galaxy .

He used any teleportation rifts that he could to make the trip smaller, but as it normally took hours to make it from the Nexus Galaxy to Stellar Sky, it would take him at least half an hour if not slightly more as his shocking speed powered forward!

As he streaked across the chaotic void, he just hoped for the safety of his daughter .

He held the Medallion she had used to contact him prior, only listening to see if any message would come out of it as he never sent one himself!

This was because he knew that his daughter could be in a deadly battle right now, and he would not do a single action that could break her concentration .

And he knew that whenever she was safe, she would immediately let him know! So he kept the Medallion as he thundered forth, wishing he could grow wings to move even faster .

What the Imperial Adjudicator did not know though, was that his daughter had passed over the terrible ordeal and was safe at this moment .

She just had not even thought about picking up the Medallion and letting her father know as her eyes, like the eyes of many, were still glued to the figure of an enormous green-gold tree butchering experts at the realms of Nebula, Black Hole, and Quasar as if he was simply snapping the necks of chickens!

With the fall of the last Fiend Ruler, the ranks of Fiend broke down as others tried to run, with even more choosing a similar action of self-implosion as the protectors had already run far away from them .

Meanwhile, Noah actively sought them out after he put the body of the Fiend Ruler away, his Manifested Black Hole releasing a suppressive force on any being that wanted to implode themselves and cause a horrendous gravitational storm, his branches reaping their lives thereafter!

The others saw this phenomenon as they shook their heads in amazement, thinking this righteous Life Law Master could not stand to leave even a single of these invading Fiends alive as he took care of them before they could deal any more damage .

But the truth was that Noah simply wanted all the loot that came with Nebula and Black Hole rank experts!

The skill books were many, the cores they granted were numerous, and he could find a way to transport them to the Novus Galaxy as he very easily increased the strength of the combatants there to Nebula Rank, and even make some of them experts at the Realm of Black Hole .

His subordinates would rise in strength even faster than him if they were power leveled with these cores, and Noah wanted them to achieve even higher realms of strength!

This was because he knew that deep inside their hearts, they felt a feeling of uselessness as they could not contribute to any of their goals because Noah's power outpaced them by so much .

If he could raise their strength to a sufficient enough level, the Harbingers of Sin and others could finally be put to use as they explored this vast Dark Universe!

This was also why even after locating the shocking Page of Ruination, the clone had put it away for further reading later as he continued to search for and collect Effulgent Star Pearls- all that would be loot he could use to power level his subordinates .

He was collecting the loot from Fiends and the loot from this Galaxy as he left nothing behind . One could never have too much loot!

His thoughts were abundant as he carried out his actions, the memories of the Fiend Rulers showing the shocking truth of even their mission that he had stumbled upon . He also got to know the identity of a fearsome backer of these Fiends, a being that had earned the title of an Entity!

He still did not know what this title truly meant as he pushed it in the back of his mind for now, dealing with the things immediate to him at this moment .

The battlefield had gradually become calm as he finished off the last of the Fiends, his form as an enormous tree taking the eyes and attention of all the beings in the surroundings as they gave him a variety of looks!

The Imperial Princess that had recovered some of her mana floated with the two Maids who could not hide their amazement, their eyes opening even wider as they saw the ancient tree shimmer with a green light as it began to reduce in size .

Soon enough, the image of a young man with dark hair appeared, his eyes still carrying a hint of blue and green as the abundant essence of life vibrantly pulsed from him .

As Anna stared at Alexander, she could not help but shake her head in wonder as on the body of this being, she and many others could still see the image of a manifested Black Hole!

He looked like a being glowing with multicolored lights as the illusory image of his profound Black Hole took over 80% of his body and glowed with power, his eyes noticing the gazes of the beings around him as Alexander turned to look at himself and see the situation first hand .

He seemed to smile as he gave a command, the illusory Manifested Black Hole on his body becoming dimmer and dimmer until it could barely be discerned! This was a mark to identify the beings on a spectacular path of power, and would light up brilliantly whenever he used his essence in the future!

As he finished all of this, his gaze was calm as he went towards the direction of the Imperial Princess . Many of the people around did not even know how to approach and act towards him as only the Stellar Ruler was laughing boldly while going towards him .

"Princess," Noah called out with a slight smile as the veiled Anna turned her face to the side curiously, speaking out words filled with interest and a hint of inquisitiveness!

"Who are you?" This was a question that many beings had, among the thoughts of thankfulness for saving them!

Noah already prepared multiple ways of answering but at this moment, all the beings here felt the nearing of a ridiculously powerful aura, an aura of power that was even greater than the QUASAR ranked Fiends that were just defeated .

The eyes of many nearly lost their light as they saw a blazing sun pierce the boundary of the Stellar Sky Galaxy and rush towards them, a bellow coming out from it that shook the starry space itself!

"Vile Fiends!"

RUMBLE!

Some were scared, while some that recognized the aura and the voice like Anna smiled brightly as the man himself, The Imperial Adjudicator, finally arrived to give aid to the Stellar Sky Galaxy .

His immense aura spread out as he noticed the scene of battle and prepared to release deadly attacks, but was shocked to find bodies of a few Fiends littering the space, those present only being the protectors of the Stellar Sky Galaxy as well as some Imperials and . . . his daughter!

The Imperial Adjudicator glanced towards the direction of his daughter as he arrived to save her, finding a mysterious man standing beside her and looking towards him with eyes of curiosity .

He had arrived to save them, and yet it seemed nobody needed saving!

Was this not the Galaxy that needed saving? Did it not have numerous Fiends of high Realms that completely outnumbered them? 2 in the QUASAR Realm? 200 at the Realm of Black Hole? What exactly had happened?!

Chapter 683: 683

The scene of the battlefield in the Stellar Sky Galaxy was one of cheering and happiness, this state being increased even more as the identity of the recently appearing Adjudicator was confirmed .

Many were happy to escape death as they threw away their feelings of despair, looking toward Noah's direction as he was the only one they had to thank for this .

The Imperial Adjudicator went towards his daughter as his perceptive eyes caught this scene, nearing her in an instant as he questioned for her well being and exactly what had occurred .

Anna changed to her sweet tone as she talked to her father, Noah standing by the side as he was too busy reading the information about this being from Eyes of Truth!

If he could put it in one word, the information from this being was- vast!

There were many things worthy of note and some shocking secrets, but those on the surface was the fact that this being was half a step into the GALAXY Realm, and he also had an EPSILON ranked Trait similar to his daughter while also being an Assimilator of the Law of Chaos and Space, and a Law Master of the Law of Death .

Many titles with a lot of hard work required to bring them to life, but Noah's shone as he saw that the identity of this being as a Father was the most important!

Eyes of Truth were showing him shocking information about the being that this Adjudicator was connected to, the one who would be the Imperial Princess's mother! Noah's thoughts moved rapidly as he learned more about the Imperial Adjudicator more than anyone, this being turning towards him after he heard the story from his daughter .

"You have my genuine thanks for going out of your way to save my daughter and the people of the Stellar Sky Galaxy!"

OOM!

The voice of the Adjudicator was filled with power as he said this, his eyes looking towards Noah with thankfulness as they also held a hint of questioning and coldness, as Noah was too mysterious .

When listening to her daughter's story, his instincts as a father were glaring whenever Anna mentioned Noah as a friend she made when she went out to the Blessed Imperial Selection not too long ago .

When she told how he had killed the QUASAR raked Fiend Rulers, the Imperial Adjudicator had nearly disputed her words with disbelief!

"As a citizen of the Brightgold Monarchy Realm, I was only doing my job to protect the Princess . " He replied while bowing, his actions receiving eye rolls from the two maids as the Imperial Princess felt the same, her voice ringing out thereafter .

"I can't stomach this . Dad, don't we have to go? There should be many things we need to get done!"

The words of the Imperial Princess returned many to the present as the Adjudicator nodded, turning his attention to the Stellar Ruler as he spoke to him briefly .

The knowledge that multiple Galaxies were under attack was now widely known as they knew much work was still needed!

They moved to fortify the defenses of the Stellar Sky Galaxy as the Adjudicator even gave the commands to leave the Imperial Protectors that came with Anna to remain, with him choosing to take his daughter and her party back towards the Nexus Galaxy where an Elder Fiend was being over powered .

After he knew his daughter was safe, he planned to reinforce the rest of his forces that had moved out to help the other besieged Galaxies as they put this matter to rest for good!

RUMBLE!

A wave of essence erupted out as it wrapped around Anna and her two maids, the princess nodding her head towards her father as she looked towards Noah, this essence wrapping around him also as all four of them shot out from the Stellar Sky Galaxy .

They left behind a powerful force reinforcing this location, and Noah left behind two clones to continue mining the treasured Effulgent Star Pearls

Light years away in another location .

In the Burning Domains Galaxy, an Entity was releasing baleful breaths of essence as she healed herself, grave injuries apparent on her body from an unknown source!

Her eyes were calm and collected as she cultivated silently, but they soon opened with a sharp light that contained maddened ruthlessness .

"Failed...?"

The word seemed to have a sense of disbelief as even this Entity was surprised at the result, her powers ending that the lives of many of the beings she had sent out were snuffed!

The most important force she sent to silently scour the Stellar Sky Galaxy for a page from the Book of Ruination- utterly destroyed .

And the being she had sent to spearhead the mission of conquest to the main Galaxy, the powerful Elder Fiend that had a realm same as the Entity, except of the Low Tier- even this being had just now lost his life as it was the signal that woke the Entity up!

Disbelief filled her, as well as a sense of profound carefulness!

From her knowledge, there should not have been a force capable of destroying a Low Tier GALAXY Realm expert in the cluster of Galaxies he targeted, thus she was filled with concern as her eyes shone with coldness .

A moment seemed to pass as the Entity wished her options, sensing her injured body as she thought of the unique treasure that was the Book of Ruination and multiple other factors .

The wrath and coldness won in the end as she spoke out appalling words .

"Fine . I'll do it myself!"

RUMBLE!

Waves of fate erupted out as the essence of this Entity erupted, the injuries she had being healed at a faster rate as she used even more expensive means to recuperate!

Meanwhile, the Imperial Adjudicator and party of four streaked towards the Nexus Galaxy, arriving there in less than an hour as the image of a domineering Aurora Galaxy Dragon soon became clear in their eyes .

The Aurora Galaxy Dragon floated in the chaotic void outside of Nexus Galaxy with blazing eyes, the Manifested Galaxy rotating calmly on its body as floating in front of it was a body .

It was a body of the Elder Fiend in the Realm of GALAXY, and it was dead!

Chapter 684: 684

Noah enjoyed the feeling of being taken through the chaotic void at speeds faster than anything he could muster right now, the Imperial Adjudicator that he had only recently come across truly being a powerful individual!

Only half a step into the GALAXY Realm, yet the things he delved in and mastered were many, with his power extremely robust .

They crossed the distance that took them a few hours with the aid of the Void Pegasi in just 30 minutes as they appeared back at the boundary of the Nexus Galaxy, noticing an extremely suffocating aura permeating in the surroundings!

Noah and the three girls spread out their senses as they glanced at this figure with awe, the image of an Aurora Galaxy Dragon being something that they had never seen in their life times .

Even the daughter of the being that summoned this creature had never seen it before, her veiled figure hiding the shocked expression on her face as she looked up in wonder!

They saw the shimmering galaxy manifested on the body of this Aurora Galaxy Dragon as it reminded them of something extremely similar, turning their faces towards Noah briefly as they recalled the manifested Black Hole that could barely be discerned at this moment .

Their eyes then went towards the thing floating in front of the Dragon, their hearts tightening as they saw the body of what should have been a Fiend! Based on its aura, this Fiend was at the genuine Galaxy Realm, and yet it lay dead before this Aurora Galaxy Dragon!

They could see the body of the Elder Fiend had been brutally split apart, its chest caved in as the blood floating in the chaotic void was a mixture of colors, the torn muscles and bones revealing a unique structure that shimmered with the light of stars, making it seem like a shattered Galaxy was still present in this small body .

Amazingly, the bodies of beings at the GALAXY Realm were forever changed as their muscles and bones shone with the light of starry stars, their power still being something that they did not understand!

"You were successful . "

OOOM!

The strong voice of the Aurora Galaxy Dragon reverberated around them as the Imperial Adjudicator nodded with a heavy face . The Dragon glanced towards Anna with a warm light as it nodded, surprising the Imperial Princess as next up, the face of this fearsome creature landed on Noah .

"Hmm?" An inquisitive light passed through its eyes that shone briefly, shooting out a light that instantly reflected on Noah before he could do anything else!

Surprise came upon the Imperial Adjudicator and Anna as they did not expect this, turning towards Noah to see the vibrant multicolored Black Hole manifest itself fully again after what the Aurora Galaxy Dragon just did .

"Rare to find a being like you in these parts . . . only the Scions of Ancient Powers have been able to reproduce this path on their own bodies, and never at the level that would match Animus Summons like you..."

RUMBLE!

Shocking words hiding many different clues and meanings erupted from the Aurora Galaxy Dragon as it gazed over Noah up and down, while Noah did the same to the creature as Eyes of Truth showed this majestic being's information!

[Aurora Galaxy Dragon] :: An Animus Summon that is temporarily contracted with Alexei Lexalius Dannicus . This Animus Summon has been trained to Grand Completion as it exhibits the Manifested Galaxy Realm, even though it is only at the Low Tier Galaxy Realm . [Life History][Strengths][Weakness][Ability(s)][Trait(s)][Habits] . . .

From the Life History of this being, a stupid amount of information he had no reason seeing at this moment was reflected in front of his eyes! Knowledge of the beings known as Animus Summons or Animus Pets, and some knowledge of powerful ancient organizations that ruled the many regions of the Dark Universe that utilized creatures such as these!

Truly too much and too early for Noah's imaginative mind as his eyes nearly showed the intense thirst he felt .

"He was the one to save Anna, a genius Law Master with essence reserves unlike anything we've seen . "

The Imperial Adjudicator replied to the Aurora Galaxy Dragon as he saw Noah was absentmindedly looking towards the majestic Dragon, a nod coming from the creature as it pulled its eyes away and spoke with a strong tone .

"You must go see her after this . "

Words that caused the Adjudicator to adopt a somber expression and for Anna to light up rang out, with the Adjudicator nodding his affirmation! His palm then pointed towards the Aurora Galaxy Dragon as he shouted out a single word .

"Return . "

CRACK!

His chest seemed to split open as a swirl of a rift formed within it, a sucking force wrapping around the Aurora Galaxy Dragon as it became smaller and smaller . . . until it fully disappeared into the chest of the Imperial Adjudicator!

Shocking sight after shocking sight was being revealed in front of Noah as he breathed out calmly . Just the single glance at the Aurora Galaxy Dragon had given him so many things to look forward to that he did not even know if he could contain himself . He breathed out as he kept his heart calm, the essence of the Imperial Adjudicator wrapping around them again as his voice came out .

"We shall go see your Mother as soon as we ascertain the status of all the Galaxies that fell under attack today . "

The words of the Adjudicator were sound as they entered the Nexus Galaxy once more, many things happening all around as they returned to Brightgold Monarchy Realm!

The Imperial Adjudicator did not have to leave to lend help to the other Galaxies himself as only QUASAR ranked Fiends were there similar to the Stellar Sky Galaxy, and the Imperial Rulers that he sent to aid them quickly got things under control .

This meant that the sudden and terrible conquest the Fiends had shown quickly came to an end, and there were a few things to come out of it as the most immediate effect .

The first one was the knowledge that the Fiends were deeply hiding their power, where even now they weren't fully confident of the forces they had hidden in reserve .

Another effect was the knowledge that while under siege, the Imperial Princess had undergone forging in the battlefield as she broke through into the Realm of Black Hole, showing tremendous power that could instantly kill a Fiend of the same level in the Stellar Sky Galaxy .

But she wasn't even the brightest star that shone from this ordeal, as the being that had protected her life and the lives of many in the same Stellar Sky Galaxy was the one whose name had begun to spread as soon as the party with the Imperial Adjudicator returned to the Nexus Galaxy .

The name of the being who was a shockingly powerful Life Law Master among many other titles, the one who could reap the lives of Black Hole Fiends at the Nebula Realm and then reap the lives of QUASAR Fiends at the Realm of Black Hole!

The one known as Alexander King . . . his name was spreading among the upper echelons of the Nexus Galaxy!

Chapter 685: 685

In the Nexus Galaxy, many beings were moving about as they established normalcy to this Galaxy and all those affected by the recent attack by the Fiends from the Burning Domains Galaxy .

The Imperial Adjudicator had spent an entire day giving out commands to his forces as he communicated with those sent to reinforce other Galaxies, and he found that the battle was not without its losses!

The two Galaxies that had only received reinforcements some time after the attack started lost more than half of their experts, a heavy toll being taken as many were bubbling with fury towards the Fiends .

But even while feeling immense wrath, nearly all of them were hesitant to make a move as they didn't know the depth of the Fiend's strength!

So the Imperial Adjudicator focused on reestablishing order, and as soon as this was done he moved on to the next important task .

In the Dannicus Household that was bustling with activity, Imperials of all types filled the halls as discussions of the recent war spread out .

One would be able to notice that among many of the names, 'Alexander' would be popping out with frequency as he was discussed with much fervor!

"A High Imperial at the Realm of Black Hole who can match Quasar?"

"Don't forget that he's a Life Law Master as well, and apparently also dabbling in Fate and Aether..."

Royals and Imperials were discussing in murmured breaths around the Dannicus Fortress, and one question was in the minds of many that still had not been answered!

"I heard he is always with the Princess, is there...?"

"Don't even finish that sentence if you want to keep your life! Do you know who she is?!"

Words and rumors spread around as the situation gradually settled . In a corner of the Dannicus Fortress, the Imperial Princess was being attended to by her maids as she heard the voices of the many Imperials rooms away as she smiled with a cold light, this light dimming down as she felt the aura of her father materializing outside of her room .

"Little Anna, we need to go now . "

The Imperial Adjudicator came to pick up his daughter for a trip they had to make to a special someone, making Anna quickly step out as even her maids remained behind!

Father and daughter were heading out of the Dannicus Fortress silently, heading towards an unknown location .

But before they could even get too far, the Imperial Adjudicator came to a halt as if lightning struck him, a surprise expression appearing on his face as he received a telepathic message from the same being they were going to meet!

"Bring the one that saved my daughter as well . "

The voice was calm and sonorous, with a tone that seemed so enticing that any man would turn cartoonishly heated .

The Imperial Adjudicator blankly nodded with surprise as he turned towards Anna and asked where Alexander was .

"Oh, since he saved my life, I wanted to return the favor once more . The only thing he wanted was to learn the techniques of the Ultimate Law of Death . . . so I granted him access to the library again . "

Anna's voice was low as she talked, seemingly not wanting to be disciplined by her actions as her father shook her head with a smile .

"Tell him to come here, quickly . "

Anna hid her surprise in her veiled face as she quickly sent a message to Noah, who had just finished obtaining the techniques for the Law of Death in the Imperial Library!

When they returned to the Nexus Galaxy and received the hero's welcome with his name spreading among the upper forces of the Galaxy, Anna had asked him if he wanted anything to repay his actions of saving her and an entire Galaxy .

His answer was of course- the techniques of the Ultimate Law of Death in the Imperial Library!

This was because he was extremely excited to get the counterpart of the Law of Life, and he wanted even more to see the opposing ability of "Ashes to Ashes", the one termed as "Dust to Dust . "!

He wanted to check the abundant amount of loot he received from the Fiends also, but he pushed this back as aside from the stupendous Cores and Skill Points, the skill books he got from them would most likely just be used as sacrificial skill books when he upgraded his skills or given to his subordinates .

So he simply asked for the reward of the Law of Death!

Anna had shaken her head wryly as she granted this request, using her authority to grant him access once more into the floor of the Imperial Library where only the highest of Imperials could enter, all the while the Adjudicator dealt with clearing up chaos sown by the Fiends .

At this moment, Noah received word from the Imperial Princess as he stopped reading the description of the new techniques, his senses for unique opportunities tingling as his proficiency in the Law of Fate told him only benefits awaited him!

He disappeared from the Imperial Library as he appeared in the skies of the Brightgold Monarchy Realm, following the coordinates given by the Princess until he found two figures in the skies not too far from the Dannicus Household .

He bowed his head slightly towards the floating Imperial Adjudicator as he nodded to the Princess, the strong voice of the Father ringing out as he isolated the space around them!

"We will be visiting someone with an extremely special identity, and they have asked for the one who saved Anna to come along as well . I expect your discretion!"

His voice was strong but filled with a sense of hesitation, as even the Imperial Adjudicator wasn't sure why that person wanted this Alexander there! A serious look was the only thing present on the genius's faces as he nodded, the party of three moving away from the Imperial Citadel as they flew towards an unknown location in the Brightgold Monarchy Realm .

"The location we are going to is a hidden Realm that very few know about!"

They were going to a hidden Realm that contained a being with a powerful identity .

It was the person who had 'given' the Imperial Adjudicator the Animus Summon at the Realm of GALAXY, the true Master of the Aurora Galaxy Dragon!

Chapter 686: 686

In the Brightgold Monarchy of the Nexus Galaxy, there existed multiple Rifts that led to different Realms!

An example was the Rift leading to the Aether Carnage Realm where Noah had begun the first stage of the Blessed Imperia Selection, and the Rift that led to the Devouring Hells Realms where Fiends were held prisoners .

Currently, the party being led by the powerful Imperial Adjudicator was heading towards one such hidden Rift, a rift where a special personage was hidden at!

They arrived in the thick foliage of mountains as the Imperial Adjudicator descended down, Noah noticing the aura of multiple beings at the ranks of Nebula and Black Hole spread all over the mountain they were descending down in .

His eyes also noticed the appearance of multiple thin barriers of light that covered the entire area, their bodies passing through them at this moment with ease as their feet touched the grasslands of the mountain .

Covered by resplendent trees and stationed silently in front of them, a clear blue Rift could be seen near the area they had touched down in, the Imperial Adjudicator leading the way as the two of them followed!

Noah's eyes shone as the identity of the rift was revealed in front of him .

[Blue Plains Rift] :: A rift leading to a small mobile realm currently located in the Brightgold Monarchy .

A simple description that gave away the identity of the location they were going to! His eyes went to the surroundings as he saw Imperials at the Realm of Black Hole guarding the blue rift on each side, standing still as the party of three approached and entered through the rift silently .

WAA!

A spatial movement later, they found themselves in what seemed to be a paradisiacal circular world, where with the simple spread of their aura they could actually see all the boundaries of this small Realm! It actually did not seem to be any larger than 100 miles in diameter, but it had a unique atmosphere that made it more pronounced than many of the Realms Noah had visited .

The Blue Plains Realm that they had entered has wide grasslands and expansive blue skies, the dome shape of this realm being covered by mystical blue clouds as it shimmered with colors and essence! In the middle of this Realm, a single small castle existed as Noah could feel the aura of only one being- a being that was currently walking through a garden in front of the castle!

Noah was looking around this realm in wonder as the two beings beside him seemed emotional, neither of them being able to take a single step towards the castle . This remained so until a sonorous voice rang out beside their ears .

"Why are you two standing there like fools? It's only been a few years, come on . "

The voice seemed melodious and enticing, each word dripping with honey as the three found themselves going forward unconsciously! They reached the perimeter of the castle in a matter of seconds as the woman walking in the garden became clear, her face turning towards them with a bright smile that seemed to shine away all darkness .

Yet at the same time, Noah's eyes constricted as he looked at this being, his heart shaking as her eyes alone told him of the extreme coldness and strength of this woman, and his Eyes of Truth told him of even more shocking information!

"Mom..." Anna was reaching her arms out like a child as she threw herself into the arms of the woman, none of the demeanor of a cold blooded Black Hole expert existing as she hugged the woman tightly .

"Silly girl, still wearing that veil I gave you? Take it off so your mom can see you . " Words full of love were released from the woman as Anna quickly nodded, the veil she always wore on her head disappearing as ridiculous gorgeousness was revealed underneath!

'Holy...'

Even Noah had to hide his thoughts in amazement as he looked at the two women, having to admit that they were factually the most drop-dead gorgeous women he had seen in his life time .

His attention was shaken by the Mom's power and status at first, but as he looked at their identical faces- it seemed like he happened to walk by two fairies beautifully standing in a garden!

The Imperial Princess he had never seen had vibrant red hair with light blue eyes, her fair face only being beaten by the mature demeanor her mother exuded that could cause the downfall of countries . The mother was an exact replica, but somehow even more vibrant to look at!

"Anastasia..."

The Imperial Adjudicator, Alexei, called out with hazy eyes as he went forward, but he could not bring himself to get near her as he sighed and instead continued speaking!

"I could not help but release the Animus Summon you temporarily put under my control . We were being besieged on all sides and Anna was in danger as well..."

His voice was low as he seemed ashamed, but the woman raised her hand lovingly as she turned her attention towards Noah and spoke .

"I know . Saved by a being that many can only call a genius, an Imperial that nobody had heard of before a week ago but having unexplainable strength and being extremely proficient in the Law of Life that the abilities he released caused him to easily massacre beings a Realm above his own . " Her eyes shone with a golden glint as she focused on Noah, the faces of the three beings on the garden of the castle landing on him with extreme focus!

Noah only reciprocated with a calm smile, seeing the clues to the reason for him being there as he continued to read the description of this being under the Eyes of Truth .

[Anastasia Frederick Windsor] :: An Entity residing in the Blue Plains Realm hidden in the Brightgold Monarchy . She comes from the Expansive Dragon Cluster located near the periphery of the center of the Dark Universe . . . [Life History][Strengths][Weakness][Ability(s)][Trait(s)][Habits] . . .

"His Realm is even a perfected one, something that even I could only grant to my Pets after years of efforts and treasures . A genius through and through, the question is . . . how much of a genius?" Anastasia, the being with a shocking status that should definitely not be in the small Nexus Galaxy, began walking towards Noah with steady steps .

"After the recent actions, I do not know how much time I have, and your enemies still have someone behind them that will make a move soon . You have many warriors here, but many of them have no talent . "

She spoke amply as she came to stand in front of Noah, her eyes shining with an unknown light as she smiled even more!

"Yet you . . . have Comprehended multiple laws!"

...!

Even Anna and her Father were surprised as they focused on him, this being knowledge they did not know! They knew he dabbled in a few laws, but not that he had comprehended many of them fully .

Noah remained calm as he saw this being was not directing any killing intent towards him, continuing to wait to see what her aim was!

"I want to protect the small home I've been on in the past years . I will test your talent and see if you are worthy . . . worthy of coming in contact with that which lies above even Ultimate Laws . I will do this with the promise that you continue protecting Anna and the Nexus Galaxy"

...!

Disbelief rose in the eyes of all beings there but the shocking personage herself, none of them being able to wrap their minds around what was happening!

Chapter 687 - The Doctrine of Death!

Noah breathed calmly as he tried to keep his breath under control, his shining eyes being the only thing revealing his true thoughts as he slowly nodded.

"Protecting the Imperial Princess is something that I will always do, and the Nexus Galaxy is my home!"

These words were said with conviction as they reached Anastasia, her gorgeous face shining brighter as she replied.

"Good. The only problem is that learning such a thing required talent, and many beings on the fringes of the Dark Universe do not have it. Nor do they have the resources of Ancient Organizations to help them, so they forever remain weak!"

She moved away from Noah as she went back to the surprised Anna, strong her hair tenderly as she continued.

"Alexei summoning my Aurora Galaxy Dragon might have already alerted those searching for me of my location, so we might either have a few weeks or a few months, maybe even years if the signal wasn't picked up. But during that time, I want to see if I can create some protectors for you all."

The words were filled with love and sadness, causing the Imperial Princess to bite her lip as she spoke to her mother!

"Can we not just come with you?! I...I..." Tears actually welled up in the girl's eyes as she spoke, the tender look on her mother becoming grave at these words.

"No. They cannot even know you are my daughter, nor that I took a man in this small Galaxy. They will kill you all without batting an eye!"

RUMBLE!

Appalling words were said as she turned serious, the Imperial Adjudicator and Anna turning ashen as it seemed they still did not understand her identity.

"Why...why...?!" Anna was irreconcilable as she persisted.

"I ran away because someone I did not want, wanted me. The rage of that Ancient Power is not something you can even imagine, nor what mindset they stand on."

Her expression seemed to be recalling something disgusting as she talked!

"They stand above all others as they look down in contempt, as they think themselves the true inheritors of everything in this Dark Universe. Only other Ancient Powers stand equal to them, everything else being mere ants in their eyes."

"To them, it would not be an issue to step on the ants that they would consider to have sullied something of theirs, they would not even blink before wiping everything here away!"

RUMBLE!

Ashen expressions were the only thing that came with these words as they got a better idea, their heads buzzing as they repeated the word in their minds.

Ants!

They would be seen as mere ants before Ancient Powers, even with the Realms they had achieved! Even with all the hard work and progress they had made in laws or Traits, it was still considered nothing in their eyes!

"But while I may not be able to stay with you all, I could at least ensure your safety. I did that first by giving Alexei my weakest Animus Pet and imparting some techniques, forming a contract with his soul momentarily for it to aid him in the most dire situations."

...!

Yes! She had given the Imperial Adjudicator the Aurora Galaxy Dragon that she even said was her weakest Animus Summon.

She did this because the weakest one should have released the weakest signal if ever it was used, and it was also the reason why she had not given any more of her Animus Pets nor summoned them over the years.

"If I could enlighten some geniuses though, there might be a chance. So, Alexander, I've heard of your amazing feats and power, but I haven't seen it first hand. Can you show me your genius? Just as a formality, but I would like to be sure of your talent before handing down something so immense!"

Anastasia turned her face away from Alexei and Anna as she focused on Noah again.

During all this time that shocking information was easily released, Noah was the only one not scared or feeling immense pressure.

All he felt was excitement and wonder as the many new things were brought into the picture, and he wanted to jump towards them headfirst as he absorbed everything he could like a sponge.

He thought of the words of this woman with a fearsome identity as an idea popped in his mind right away.

"I have just picked up the techniques of traversing the Ultimate Law of Death from the Imperial Library. I can cultivate the law for the first time in front of you as you see my comprehension!"

"Hoh?" An interested light erupted from Anastasia as she nodded.

"I cannot sense any concepts of death within you, good. Let's see what you have."

Anastasia pointed for Anna and Alexei to sit in the paradisiacal garden as they stared at Noah, the eyes of these beings watching him as he felt not an ounce of fear!

His eyes looked at his stat panel that showed the recent techniques he received from the Imperial Library.

{The Doctrine of Death} :: Across the eons of time and space, there are few true wonders permeating throughout. The Doctrine of Death completes the Doctrine of Life, where the being that comprehends and assimilates both will have a possibility of finding an even greater path of strength.

The technique to cultivate the Ultimate Law of Death was given to him, and he sat down peacefully in the calm garden that was filled with important beings as he began to cultivate!

RUMBLE!

Anna had already seen scintillation like this as she was there when he first cultivated the Law of Life, but her eyes still focused on him as she saw the color of immense darkness erupt out of him the moment he sat on the ground.

OOOM

The aura of an Ultimate Law permeated out, this one being particularly cold and merciless as it smelled of the potent aura of death!

Within Noah's origin when an illusory Primeval tree that represented the Law of Life was blooming, a seed began to sprout below this grand tree.

The seed was black in color and shone with even greater darkness, essence pouring into it as it erupted!

Chapter 688 - Above the Laws is...

Unimaginable potent essence converged in the small garden in the Blue Plains Realm, all of it going towards the man currently cultivating the Doctrine of Death for the first time!

Similar to the Law of Life, the process for the Law of Death had begun with a budding of a seed that soon erupted into a sapling. This sapling was extremely dark in color as it seemed to absorb every other

color around it, a stark contrast being created with the vibrant green tree of life that was growing above it.

The two trees were currently growing while facing different directions, where if one were to draw a line at the very center of the Origin, they would see a vibrant green hue permeate the origin above the line and a dark cold hue to permeate below!

As the sapling of the Tree of Death began to bud with more and more branches and leaves, thick roots erupted out as they spread serenely through the colorful Manifested Black Hole and began to intertwine with the roots of the Tree of Life.

This reaction should have been something opposable, but it happened as smoothly as it could as for the two Ultimate Laws of Life and Death, the two were one and the same! Two sides of the same coin!

But it created for a truly beautiful scene as even Anna who had seen Alexander shine with a vibrant green in the Imperial Library before could not help but watch with an agape expression.

The Imperial Adjudicator who had lived for many years and seen many things was also moved, his own Tree of Death within his Origin ringing in a reaction as it sensed another Death Law Master being born nearby!

The one with an esteemed identity, Anastasia, also looked on with shining eyes as she saw more things than the two beside her saw. She had seen many beings embark on Ultimate and Supreme Laws in the past, and none of them had caused a reaction such as this when they first began.

When she looked at the man in front of her, it seemed like the atmospheric universal essence was fighting to get into his origin to power up the cost of using Doctrine of Death, as if this essence was not a problem for him and would even acquiesce to his wishes!

She did not know how this result was brought about, but her eyes only gained more and more surprise as the time passed.

5 minutes passed as the phenomenon of converging essence and the illusory scene of a Tree of Death coldly growing ever larger below a Tree of Life continued, the roots of the two trees wrapping around each other so tightly that they created a mysterious groove at their point of contact.

25 minutes passed, and Anastasia was convinced of this being's genius as she could see he had attained Small Success in this Ultimate Law in just half an hour since he began cultivating it, a result that would take even the Scions from her birthplace months to achieve!

Yet the phenomenon in front of them did not stop as the Tree of Death grew ever larger, its lifeless grey leaves shining splendidly as its branches shook angrily, seemingly not reconciled at the fact that the tree of life it was bound to was so much larger than it.

This caused for even more essence to converge towards it as it grew ever larger!

40 minutes!

60 minutes!

...!

Alarm rose in the eyes of Anastasia and the other 2 beings as they saw this process still continue, and their hearts only settled after they felt the essence begin to recede the moment the one hour mark was met.

The essence of universal laws began to die down around them as they could see two illusory Trees floating stably amidst the genius's colorful Black Hole.

Anastasia sighed with surprise as her thoughts were proven true, committing it in her heart to see if genius would be able to traverse the even harder path that she walked on. She was about to speak her thoughts when her eyes caught the expression of Alexander scrunch up as he felt the waning universal essence, seemingly annoyed by this fact as his body soon shone with a verdant green light.

{The Doctrine of Life}!

RUMBLE

The technique for cultivating the Law of Life was cultivated simultaneously as {The Doctrine of Death}, the appearing green light stimulating the waning universal essence to re-energize as the black essence from the Law of Death also elevated to another level!

RIIING!

A resonance seemed to occur between the two Universal Laws being cultivated at the same time as universal law essence descended down once more with stellar colors, this time even more vibrant than when the genius had begun cultivating before.

The three watching in the garden only watched with agape expressions as they did not even know where to begin.

He'd passed whatever test was laid out in front of him, you know? He didn't have to show off so much!

Yet the minutes passed as they could only watch in wonder, imprinting this memory into their brains for as long as they lived.

2 more hours passed.

Noah had taken his time as he felt the growth of the Tree of Death, this tree synchronizing with the Tree of Life as he brought the Law of Death to 12% from cultivating it in just a few hours, the Law of Life rising becoming to a full 30% at the same time!

It was only then that he stopped simultaneously activating the Doctrines of Life and Death as he opened his eyes, essence waning around him as even the skies seemed to breathe in relief at the phenomenon's ending.

His eyes opened to lock on with the sharp eyes of Anastasia that was looking at him with focus, her voice ringing out right after.

"Your talent should be at the level of the Core Scions of Ancient Organizations if not completely surpassing them. Good! We are low on time, so we shall get started right away. You two, pay attention as well and see if your talent can pick anything up."

WAA!

An aura of unique strength erupted from Anastasia as she rose in the air, her face becoming cold and devoid of emotions as she seemed like an untouchable Entity!

Her face was staring down towards Noah, her daughter, and the Imperial Adjudicator with eyes of authority, her voice ringing out all around them as it dripped of majesty.

"In the vast Universe, there are many routes of power as beings continue to search for the unknown. The most natural route is to study Universal Laws, with others relying on unique cultivation methods or even Blessing passed down from their home Galaxies in the form of Traits."

"All of these things can only support one of their path of strength, but there exists 'concepts' above things such as Traits or Laws that grant immense power to their wielder, a power that sets them apart from all others!"

RUMBLE!

Her words contained a unique charm as Noah listened with shining eyes, her cold expression continuing with no pause!

"Above the laws, there exists Daos!"

"I come from the Expansive Dragon Cl.u.s.ter, an Ancient Power that relies on Archaic Animus Pets to control large regions of the Dark Universe, and we study...the Dao of Summoning!"

...!!!

Daos!

Wide-ranging and extremely elusive, ranging from the Dao of Summoning to the Dao of Blood to the Dao of Destruction and many more...

The next area of study...was the Dao!

Chapter 689 - Daos!

Dao!

Above laws, there was the concept of Daos!

"A multitude of Daos exist, yet few beings can ever grasp even one. Even those that have great guidance by others that embark on the path of Daos might not necessarily be able to comprehend even a single one."

They were abstruse and hard to grasp, things that one could search a thousand years for but never find one.

"Even in the Expansive Dragon Cl.u.s.ter that boasts being followers of the Dao of Summoning only has a small percentage of the geniuses embarking and following this path!"

Anastasia continued to float in the skies, her eyes releasing an unknown sense of pressure and regality as she continued.

"Across the Dark Universe, the Ancient Powers are formed based on what Dao Path a group follows. So you can come across Ancient groups that focus on the Dao of Slaughter, or the Dao of Destruction, or the Dao of Creation...There are as many as there are grains of sand!"

RUMBLE!

Noah felt his mind ringing as these words continued, a path he was only stumbling onto now opening itself up so widely that he wanted to scream out.

"There are even Daos that integrate the Universal Laws into them and grant a being mastery at extreme speeds, with the Dao of Four Elements being one of them. We could sit here and talk for days just listing the many Daos there are, but we will focus on the Dao of Summoning."

Anastasia's voice only became more and more enticing as time passed, her voice continuing to explain a grand concept as Noah, Anna, and the Imperial Adjudicator listened closely.

"There are Lesser Daos, Grand Daos, and the most hidden, elusive, and majestic Cosmic Daos! The Dao of Summoning that we study...is merely a Lesser Dao. Yet it is this Dao that has granted the Expansive Dragon Cl.u.s.ter the capabilities to rule a region of the Dark Universe. You will come to find that even among the Ancient Powers out there, very few of them have even come close to touching Grand Daos, not to mention the elusive Cosmic Daos."

WAA!

Anastasia waved her hands in front of her as a luminous obsidian crystal appeared, this crystal releasing a fearful pressure as the surroundings around them quacked at the mere introduction of it!

"To embark on the Dao of Summoning, all prospective talents in the Expansive Dragon Cl.u.s.ter are lent this Dao Crystal- an extremely rare material that is held by very few! This particular Dao Crystal has wisps of the Dao of Summoning, and you will have to grasp just a minuscule amount of understanding in this Dao before you can begin even activating the techniques of <<Archaic Animus Summoning>>."

She finished her words as the obsidian crystal known as a Dao Crystal floated down, its size being at 2 meters as it was around Noah's height.

Anastasia then waved her hands again as three brilliant white lights shot from her and went towards the heads of Noah, Anna, and the Imperial Adjudicator!

"That is the technique to sense and gain understanding in the Dao of Summoning, something that the Forefathers of the Expansive Dragon Cl.u.s.ter have managed to create after eons of trials and errors. Learn it well and then try sensing the Lesser Dao within this Dao Crystal. If all goes well, you should be able to grasp something in a few days if you have a great talent, or a few months if you are merely talented!"

RUMBLE!

The rumbling essence around them quarter down as the three of them closed their eyes and focused on the technique imparted, Noah watching the words of an Absolute Skill freely popping up in his mind.

<<Expansive Dao Comprehension>> :: A technique created by Forefather Expansive of the Expansive Dragon Cl.u.s.ter. It aims to comprehend Lesser Daos, but one would rarely find success unless a crystallized form of the Dao is nearby for them to sense.

A shocking technique that aimed to comprehend Lesser Daos, yet even the System showed how one could barely comprehend Daos with it! They would need something like the Dao Crystal that Anastasia laid in front of them if they wanted to make any headway with it.

Noah was about to give it a try with high expectations when he reread the part that said it was a 'technique created by Forefather Expansive'.

These words reminded him that the beings of the Expansive Dragon Cl.u.s.ter worked for eons to create a skill such as this, but he had to also remind himself that he...could also create skills!

RUMBLE!

His heart felt even more excitement as the thought took root in his mind, his eyes moving towards the Skill Points section of his stat panel as he could finally put the points he had been saving up to good use.

They had been raising by hundreds when he took down Fiends in the Devouring Hells Realm during the Blessed Imperial Selection, and they rose by thousands when he killed even more of them in the Stellar Sky Galaxy.

The QUASAR ranked Fiend Rulers alone granted him 10,000 skill points each as his total number came to....127,524!

Over a hundred thousand Skill Points!

The number only caused his eyes to shine with a maddened light as he pulled up the Skill Creation tab right away, beginning to input ideas of the skill he wanted as a calculation was soon made in a matter of seconds.

...

[Supreme Dao Traverser] :: The user utilizes their Origin as the lamp as they traverse on the dark path of the Dao, lighting up the way with ease as only time is needed to master Lesser and Grand Daos. All learned Daos will passively be comprehended even while the user isn't actively comprehending with the skill. The speed of Dao Comprehension is increased the more mana that the user can provide. Cost to create the Skill- 100,000,000 Skill Points.

"..."

His mind went blank for a moment as the base skill he put in before he added any modification required simply ridiculous amounts of skill points, his face hardening as he went forward to edit the skill to acceptable levels!

He spent some time as he added more and more restrictions, watching as the 100 million required number of skill points went down to 50 million, then to 1 million, then to 150,000, until finally...it stopped at 120,000 skill points.

The new skill that he could create was displayed in front of him brilliantly!

[Dao of Summoning Traverser] :: The user utilizes their Origin as the lamp as they traverse on the dark path of the Dao of Summoning, lighting up the way with ease as only time is needed to master the Dao. The skill requires tremendous amounts of mana to activate and keep active.* The user can only comprehend the Dao of Summoning with the skill.* Cost to create the Skill- 120,000 Skill Points.

He took out the possibility of comprehending any other Daos from the skill as it purely focused on the Dao of Summoning, and also took away the possibility of passively comprehending the Dao freely as time passed. He then added restrictions as an acceptable skill appeared, and he gave the command to create it!

RUMBLE!

Chapter 690 - In Just F*ing Seconds!**

An eruption of essence silently occurred within Noah as 120,000 skill points were spent instantly, a new skill at the rank of Black Hole appearing!

His eyes shone while looking at the skill, enhancing it with skill points as a (5/5) appeared in front of it.

All this did was enhance its effectiveness even more, and it was finally read for Noah to try as he came closer to the Dao Crystal that Anna and the Imperial Adjudicator had already begun to touch.

Anastasia looked at this scene interestingly as she saw this being move only a few minutes after he received the <<Expansive Dao Comprehension>> ability.

She watched closely as he went toward and placed his hands on the Dao Crystal, a unique air beginning to spread around him.

Her eyes constricted as she saw this appear the moment he sat down, and then her eyes began to tremble a second later as she observed a shocking sight!

The reason for this was because the moment that Noah touched the Dao Crystal containing wisps of the Dao of Summoning, he activated [Dao Of Summoning Traverser] right away.

The skill was nothing like the defective one that one could only embark on the Dao of Summoning if they had a Dao Crystal with a sense of this Dao already, and he could have begun activating the skill even without touching the Dao Crystal!

It might have taken him a few hours or a day before he gained his first understanding in the Dao of Summoning, but that was already multiple times faster than even the top geniuses that Anastasia talked about, and it was guaranteed with his self created skill.

Yet he was currently touching a Dao Crystal containing the Dao of Summoning, so the moment he activated the skill he did not even have to spend a second searching for the Dao of Summoning. It was already in front of him, so it simply came to him!

RUMBLE!

Immense mana poured into the skill because of the restrictions he created, but it meant that the second he sat down and activated the skill...the essence of the Dao of Summoning that he sensed from the Dao Crystal swarmed towards him, essence he did not even know existed flooding into his body on all directions.

An activation of a skill!

A second of passing!

A Dao was learned!

WAAA!

A magisterial pressure erupted out as the essence of a Lesser Dao washed over him, feeling more regal than even the Ultimate Laws as he felt a sense of closeness he could not explain.

BOOM!

His multicolored Black Hole seemed like it was on fire as it began to rotate and expand rapidly, merely the essence of this Grand Law pushing his strength upwards as it felt like...like a cap had been taken off an erupting volcano!

It felt like something within him was setting loose as abstruse waves of something he never came across before...waves of Dao were swimming around his body as they gave him an appallingly ancient aura!

Ah!

The Dao!

On this Day, he had stepped onto the path of the Dao of Summoning!

"..."

Anastasia was looking towards him with her drop-dead gorgeous face losing all of its majesty, her mouth agape as she sensed the essence of the Dao of Summoning beginning to swim around Noah.

'This...was impossible!'

No matter how much of a genius, no matter the talent...doing this in just a matter of seconds?! This was nigh impossible!

Not minutes! Not hours! Not days or even months, but merely seconds!

'What the f.u.c.k?!'

Even the most splendrous geniuses took days, with many taking months before they could even sense the Dao of Summoning.

Yet this being did not only sense it, he had also began embarking on it as the majestic aura of a Lesser Dao began to permeate around him!

Just what was this creature?!

Absent minded to the shock of Anastasia, Noah opened his eyes as his body felt something unique traveling through it, the Law Origins within him bubbling with excitement as they churned even faster.

A mere wisp of this Dao was able to excite his body and laws, all of them revolving even faster, especially the Ultimate Laws as the Trees of Life and Death began to brim with essence all around them.

The Dao was above the laws, so studying it would only make those below it proceed even faster!

But Noah put this behind him for now as while he embarked on the Dao of Summoning and felt like he could do something with it, he felt like he was missing a piece of something to do it.

So he looked towards Anastasia who was staring at him with shocked eyes, only coming back to herself when she saw his gaze!

She seemed to know what he was thinking as she waved her hands, another bright light shooting off of her as it entered into Noah's mind.

Her voice seemed slightly shaken as she spoke, putting her surprise aside for now as she wanted to see just how far this genius could go.

"Once one has stepped into the Dao of Summoning, they need unique skills to utilize its comprehensions to the fullest. We were able to create the techniques that allow us to summon and contract Animus Summons, unique creatures that can only be accessed from an unknown Universe that only those traversing in the Dao of Summoning can call upon!"

RUMBLE

The techniques she talked about entered in Noah's mind as he was nearly leaping out with excitement.

"The ability of a being to call upon a powerful Animus Pets depends on luck and their comprehensions in the Dao of Summoning, with those just starting only being able to summon Common ranked pets as it becomes their jobs to use the skills I just imparted to you to raise them to greater levels."

Beginners would only be able to summon Common pets, with the ranks of pets going from Common to Uncommon, Rare, Ultra Rare, and ultimately Prismatic!

The skills that Anastasia imparted to him now were the <<Archaic Animus Summoning>> that could call forth a random Animus Pet for a being to first contract with, and this same skill was used to call forth contracted pets with just the intention of the master.

The other set of skills were in the form of a Skill Tree, one that contained four skills which went on to be termed...[Animus Summon Trainer]!
