Chapter 801 - Merely an Entity! I

Even though the Blue Slime that Noah had contracted looked innocent, one must still remember its identity!

[Blue Slime](PRISMATIC+) :: An Animus Summon at the Peak Tier GALAXY Realm. A unique species rarely seen in the Animus Universe, this Blue Slime comes from the thought to be perished lineage of Universal Emperor Slimes that were hunted down to extinction in the Animus Universe by a coalition of beings from the Primordial Cosmos. The defining racial skill that made it a target for extinction is <<Universal Devouring>>, an ability that brought about a Universal Emperor Slime that held an entire Universe in the Primordial Cosmos hostage for 1000 years. Its unique composition gives it complete immunity to physical attacks and 50% Damage reduction to all other forms of damage. This Blue Slime has nearly mastered the Grand Dao of Devouring, but is also proficient in the Grand Daos of Four Elements, Slaughter, and Macrocosm, along with the Lesser Daos of Alacrity, Voidspace, and Vitality. When it fully becomes a Universal Emperor Slime, it will naturally awaken the Cosmic Dao of Annihilation...

A creature proficient in 4 Grand Daos and 3 Lesser Daos while also being at the Peak Tier GALAXY!

Not to forget its stupendous <<Universal Devouring>> that made its brethren a target by the experts of the Primordial Cosmos!

Such a creature was acting like an assassin as an invisible aura built up in its body while it was situated below the feet of the Entity Vast!

"Haha, have you not heard of me? Do you not know what the Grand Dao of Vastness represents?!"

RUMBLE!

While being surrounded on four sides by Old Man Khan's summons and the terrifying Tiamat above, Vast continued to talk boisterously.

"My essence is more vast than anyone you will come across in this Dark Universe, so even though pesky flies are keeping up with me now- you all won't be able to do so in a few hours!"

BOOM!

"When that time comes, you can only prepare for death! Haha!"

Vast was boisterous as he launched attack after attack, the black holes and Quasars he was throwing out truly seeming endless as his mana constantly brought more of them forth with every strike.

Old Man Khan's aged eyes had a troubled expression as he knew without the support of Tiamat, he might have already been forced to retreat from the relentless attacks of this Entity!

But how would they get out of this situation around at a time like this?

"Be on stand by to have your pets release their most powerful attacks soon. I'll let you know when."

While wondering about how they would get out of the worsening situation, Old Man Khan received a telepathic message from Noah that would have caused him anger before, but his brows tightened in seriousness as he knew this being had too many surprises.

"Haha, in front of this Vast, what can you do but di-"

THRUUUUM!

Vast's arrogant words were brought to a halt as he paled at this moment.

It wasn't just vast, but everything on the battlefield paled at this moment as a terrifying aura burst forth!

What made it terrifying wasn't because of its Realm, but the fact that it was the instantaneous release of the essence of four horrifying Grand Daos, this horrendous release coming from below the body of the Entity Vast!

His expression turned ashen as he tried to move, but the reaction simply was not fast enough as an instant later, a blue light expanded out and began rapidly covering his over 1000 meters body.

The red essence of Devouring and Slaughter covered this expanding blue light as the thing allowing its expansion- the essence of the Dao of Macrocosm, gave the body of the Blue Slime a glimmering starry l.u.s.ter that was reinforced by the Dao of Four Elements!

This seamless combination of 4 Grand Daos allowed the deadly expansion of the body of the blue slime to cover half of the Entity Vast before he could even react!

"OOOOOH!"

Vast bellowed out crazily as his face obtained a tinge of fear, utilizing his immense mana reserves to push all of the essence of Vastness he could command to stop the advancement of the body of the slime, a brilliant light shining out as the being that had not yet become an Entity had its swallowing stopped only halfway.

<<Universal Devouring>>.

RUMBLE!

The skill that caused the entire lineage of the Universal Emperor Slimes to be hunted down was cast.

What was terrifying about this skill was that when activated, the target that the body of the Blue Slime was wrapped around in would experience total devouring.

Not gradually or in a few seconds!

But...instant devouring!

Instant!!!!

WAP!

An instant was all that was required, and the lower half of an Entity disappeared.

"...!"

Old Man Khan's expression turned ashen as the Entity Vast that was merely a torso with arms and a head screamed out a blood curdling cry!

"AAAAA!!!"

The cry was one of immense fear and pain as it wasn't just his body that was devoured, but half of his soul as well!

At this moment, there was but a single thought in this Entity's mind.

That thought was to run!

To run and run extremely far away and at a rapid speed!

This was because Vast in his horrendously injured state could sense the viscous body of the slime beginning to expand as it wanted to swallow the rest of him.

So his half body shimmered with light as he was about to turn into a streak of light!

But it was at this time that Noah's command descended onto the mind of Old Man Khan.

"Now."

VROOOM!

Instantly, the attacks of four Peak Tier GALAXY Animus Summons that Old Man Khan had ready were thrown out, space thrown in chaos as his half body was pushed down towards the expanding Slime!

Horror filled his face as he saw his stomach fall into the viscous blue jelly, but he had no time to think as another horrendous attack descended down.

| |Wrath of the Dragon Queen| |.

RUUUUMBLE!

The chaotic void quaked as a magisterial presence descended yet again, hellish pillars of scorching multicolored flames from 4 illusory ten headed dragons and 1 very real one smashed into the half body of the Entity Vast, pushing him further into the expanding Blue Slime as even his head fell into the starry blue viscous mass!

"AAAAA!!!"

Dread filled this Entity's whole body as beings at this level were extremely perceptive- and his senses shockingly told him that an instant later, he would be forever erased!

And this Entity's intuition was correct as an instant later, terrifying words were uttered!

<<Universal Devouring>>

WAP!

"..."

As if he had never existed, the body of the Entity Vast ceased to be.

RUMBLE!

The now 1000 meter body of the Blue Slime shone with immense blue light as it trembled with happiness, its aura beginning to shoot up rapidly as something shocking was occurring within its body after it devoured an Entity!

Yet those on the battlefield only looked at the scene in stunned silence!

"..."

"..."

"What the f*ck just happened..."

Something unbelievable and terrifying took place as the entire battlefield came to a halt, only a single creature being able to move nonchalantly as a vibrant blue slime burped out happily while its aura rose!

...!!!

Chapter 802 - Merely an Entity! II

There very rarely comes an instance when a single person can be made speechless, and it's even rare to make an entire group of people speechless.

Yet what had just occurred...made millions look forward stupidly as they didn't even know what to do with themselves!

Those on the battlefield and those watching from their lofty thrones...each of them was looking at a shocking scene in a profound stupor!

Those on the battlefield experienced it most closely as they felt the horrendous aura of multiple grand daos erupt at once, and watched as a glimmering blue slime went on to devour an Entity in two gulps.

Yes, the Entity was being besieged by another Entity and even a terrifying Queen Dowager.

Yes, he was held down with two supremely powerful attacks as his upper half of a remaining body was swallowed. But...still!

He was an Entity! The Entity Vast! Known throughout the starry stars as a vile criminal proficient in a grand dao, and yet he...ah it was simply frustrating to even think about!

In the heart of the Expansive Dragon Cl.u.s.ter, the Holy Emperor's throne was cracked in the middle as he had inadvertently put too much strength when he watched the scene playing out, his entire body trembling as his eyes shook while observing the scene.

"How is this possible..."

Only a muttering came out as the Holy Generals around him were silenced!

Far off in the Primal Winged Expanse, the expression of the Primal Emperor was ashen as he and the other Entities looked at the scene where one of the more powerful Entities from their side had fallen in a matter of seconds.

At this moment as they looked at the glimmering blue body of the slime, they saw this creature as some ancient Entity that the Expansive Dragon Cl.u.s.ter had hidden away, and that was the only way it could have done what it just did to Vast!

The entire sequence of the fall of the Entity Vast was pure majesty, every chained attack and execution of skills being something out of pure timed fantasy. If one thing had not occurred the way it did, the powerful Entity might have even survived.

Yet he was taken down by a terrifying slime!

Never in their wildest dreams would they have believed that the Blue Slime was merely at the Peak Tier GALAXY without fully comprehending any Daos yet when it did this, but even this was about to change as a shocking scene played out soon after.

Those on the battlefield and those watching from afar honed in on the figure of the enormous burping slime as they saw its body beginning to oscillate rapidly, a unique power beginning to coalesce from it!

Those familiar with this power became even more shaken as they realized it was the formation of an Aura of a fully comprehended Dao- the aura of what was commonly known as an Entity.

What!

THRUUUM!

Throughout the tumultuous essence, Noah's body calmly warped above the enormous body of the blue slime as his figure came into focus on all those watching. Some seemed to have remembered that before the battle began, there was a small blue slime in this being's hands as they now realized it was one and the same.

Their shaken minds became even more tumultuous as their brains worked hard to connect everything together, but Noah would not even give them time as while staring at the Blue Slime with shining eyes, he looked around the two armies that had come to a halt as his resonant voice rang out for all to hear.

"That was the Entity everyone was making a big deal about? The Entity that the puny Primal Winged Expanse decided to send out first?"

RUMBLE!

Shocking words reverberated out as the eyes of watching beings nearly bulged out when they saw the expression of disappointment on Noah's face!

They really saw disappointment as they tried to grasp the incredulousness occurring at this moment, but his voice continued to ring out domineeringly.

"Not even a trace of him remains from just two gulps of my pet, Ah!"

"He was only so-so, Merely an Entity!"

RUMBLE!

The Holy Descendants and Ailerons nearly fell from the chaotic void at these domineering words, the far away powerful Entities from the Primal Winged Expanse adopting extremely solemn looks.

As Noah domineeringly floated in the chaotic void, the slime below him was releasing an ever increasing aura as its body began to go down in size. The increase in aura was of course the effect of <<Universal Devouring>>!

<<Universal Devouring>> :: Any life form that is devoured will be fully assimilated seamlessly as their abilities, Realm, Law Comprehensions, Dao Comprehensions, and anything else within their existence will be obtained. This is an ability unique to the Universal Emperor Slimes.

An ability unique to the Universal Emperor Slimes.

An ability that Noah saw would make him his first Entity, and it was exactly what was happening right now!

After having devoured Vast, the Blue Slime had gained the complete comprehension of the Grand Dao of Vastness as it now became a genuine Entity!

RUMBLE!

This was the same unique essence that beings associated with Entities! The same overpowering essence that would make any of those not in this realm feel overwhelming pressure!

This was the essence of a Grand Controller of a Dao, something even more unique and greater than laws as at this moment, the powerful essence of Vastness formed around the body of the Blue Slime like a natural Domain.

A domain of Dao Essence naturally and ever so present on its body!

THRUUM!

Through the contract he shared with the slime, Noah was able to see its stat panel as he observed something new appearing within it.

{Aura of the Grand Controller of Vastness} :: A passive aura that only appears around those who have fully comprehended the Grand Dao of Vastness. It grants +5,000% Extra Damage, Increases the Mana Pool by 1,000%, and allows the Grand Controller of Vastness to utilize this Dao in unique ways...

A shimmering blue aura that Noah had seen as a film layer of light on the body of Vast now formed on his Animus Summon, the passive +5,000% damage of such an aura being the reason why Entities were so dreadful- not to mention the unique qualities of what a respective dao would provide!

Ah!

Noah reached out as he grasped onto the now small blue slime with excitement, its eyes having turned innocent once more as they blinked happily towards him.

Yet he had a wide smile appearing on his lips, a smile that caused others to be terrified as they observed Noah turning his head towards the Aileron Army while uttering horrendous words.

"Now then, why don't we start farming loot?"

RUMBLE!

Chapter 803 - Dreadful! I

Fear was a curious thing.

There were many types of fear, but the more prevalent one at this time was the all consuming fear of death.

Rarely would a being ever feel such a fear, and it might only be once or twice in their lifetimes where one could see their life flash before their eyes.

At this moment, millions of Ailerons felt a deep and intense fear, a dreadful type of fear that guaranteed death for them the moment that the singular being holding on to a wiggling Blue Slime turned his eyes towards them!

Their hearts were enveloped in an intense fear as just from this being's gaze, they saw that they were not even considered living things anymore! From his eyes, they saw that Noah's gaze already considered all of them dead!

This thought actually had some truth in it as at this moment, Noah considered them as nothing more than loot- and it was loot of such great quality that he would never let it escape his sight.

"Aaaah...!"

"Run...!"

"Run...!!!"

THRUUUM!

Figures began to twist and tumble as the natural response to their all consuming fear was to naturally run.

RUMBLE!

Ignoring the Holy Descendants and any other enemies in front of them, the Aileron Army began to scatter as the Peak Tier GALAXY experts were the first to turn into streaks of light!

But the being targeting them was truly unforgiving and much faster than them, the void being something he could consider his home because of the [Void Devouring Blood Terror] skill tree that stemmed from Blood Lord. The moment his words finished and just as they began running, his figure melded into the chaotic void as he appeared right in the midst of the Aileron Army, uttering a single ability that would be feared by many in the future to come.

[Life Realm].

"..."

WAA!

Faster than a flash of light, a unique green light expanded out for hundreds of miles as it passed through every single Aileron and even included Noah's subordinates and some of the Holy Descendants from the Expansive Dragon Cl.u.s.ter.

This flash of green light washed over every single being on the side of the Aileron Army as the moment it receded...they all disappeared!

"..."

Many did not know what had just occurred, but some truly knowledgeable people did as back in the heart of the Primal Winged Expanse where the Primal Emperor was surrounded by Entities, one of them uttered with a solemn expression.

"Instant Realm Creation..."

The words made the expressions of the powerful beings in the surroundings much graver as they knew the intricacies of what this meant!

It wasn't just the fact that it was a unique and rare seen ability, it was that utilizing it would truly require too much essence, especially when it came to forcefully creating an isolated space and dragging other beings into it.

An Entity had a somber expression as he voiced out what everyone else was thinking.

"Unless they work together to very quickly break the spatial locks of that Realm, that entire Aileron Legion...is lost."

RUMBLE!

The body of the Primal Emperor trembled as his eyes were filled with wrath, but he came to the same conclusion!

All those caught in the newly created Realm would be facing the horrendous creature that devoured the Entity Vast...and what could they do against such a creature?

"Good! Good! Good!"

The Primal Emperor uttered indignantly as he continued to look at the scene with wrathful eyes!

...

Back in the Rising Stellar Peaks, the Old Man Khan stared at the enormous green door that represented the entrance into the Realm that Noah had locked millions of experts in, his hand landing against this door as he found that he wasn't granted entrance!

It was a realm that locked everybody in and kept everyone out!

The other defenders of the Expansive Dragon Cl.u.s.ter didn't know if they should cheer or celebrate as the war truly did not follow the norms, many of them simply feeling a tinge of fear when they thought about the being carrying a blue slime and the fearsome 10 headed dragon that he commanded.

Even they did not want to know what was happening inside the locked Realm!

But inside of the [Life Realm], Noah stood above scrambling Aileron Forces as his gaze was cold.

In the past few seconds, the GALAXY experts from the Aileron forces had pushed down their fear as they tried to work together to break the confines of the Life Realm!

When they found to their despair was the thick roots being nearly impermeable to damage, looking towards each other in dismay as they then grouped together and stood in front of their entire disorganized Aileron Army.

"If you want to get out, it's only my death that will allow it."

RUMBLE!

Noah's voice reverberated out as the Ailerons looked towards him with solemn faces, their hearts not necessarily fearing his figure the most, but the figure of the Blue Slime he carried in his hands!

This singular Blue Slime was currently releasing an oppressive aura of a being that had fully comprehended a Dao- an aura unique to an Entity! To their dismay, they found that they were actually imprisoned in a Realm with a dreadful enemy Entity that had defeated Vast in two attacks.

Their dismay was palpable as around 8 Peak Tier GALAXY Ailerons cl.u.s.tered together, the millions of other Ailerons grouping up behind them pensively!

It was an astounding sight as near Noah, his 6 other Middle Tier Summons were by his side, his subordinates that numbered a bit over 30 beings also standing behind him as the enormous figure of Tiamat overshadowed all of them.

Even further behind Noah were a few tens of thousands of the defenders of the Expansive Dragon Cl.u.s.ter that got caught up in his Life Realm.

But the scene was that grand! Millions of beings on one side, and it was actually this side that was looking fearfully to the opposing side that had less than 50,000 beings!

As Noah stared at the 8 Peak Tier GALAXY Ailerons, the tens of them that were in the Middle Tier, and the over 100 in the Low tier GALAXY Realm...his eyes shone with palpable beams of light as all he could see was loot!

While holding the blue slime within his hands, he uttered shocking words that caused the blood of all the Ailerons to run cold.

"Let's see what this stage of Entity is all about. Don't devour them, just kill them."

THRUUUM!

Chapter 804 - Dreadful! II

"Let's see what this stage of Entity is all about. Don't devour them, just kill them."

Noah gave a command to the innocent Blue Slime that was releasing a horrendous aura, telling him not to devour the Aileron Army as the nature of the Universal Emperor Slime meant they would be devoured in their entirety as even loot would not be released- this was what occurred with the Entity Vast!

Noah then turned to his subordinates as he gave them a nod.

"Go all out, my summons and Tiamat will protect you all."

RAA! RAA! RAA!

The Emperor Penguin bellowed out wildly at this as he and the others moved, Noah's gaze then turning to the Holy Descendants that got wrapped up in the Life Realm!

"You all just relax here for now, we should be done in a bit."

...!

Alarm and a deadly chill was the only thing the defenders of the Expansive Dragon Cl.u.s.ter felt at these words even though they were all supposedly on the same side. What made them feel a cold chill was the dreadful attitude of this being that looked at the Aileron Army as nothing more than dead things!

This was a cold and heartless attitude they would only see in extremely powerful beings. The cold detachment while they condemned millions to death.

It was truly dreadful!

Of course, Noah himself knew of his actions and their consequences, his heart already prepared to bear the heavy responsibility even as he gave out the commands.

If they were on the weaker side when facing this Aileron Army, their lives would be left to their vices as they would be taken away without so much as a thought. It was merely kill or be killed. It was war, and war never changes!

So his eyes remained cold as he uttered to Tiamat as well.

"Scorch them."

ROOOOAR!

The space shaking roar of a fearsome Queen Dowager erupted out as a ||Wrath of the Dragon Queen|| was cast!

Before, it was directed against an Entity as they used their wondrous essence to withstand such an attack with only minor burns. But the target this time was Low to Peak Tier GALAXY being who didn't have such power- so the pillars of scorching multicolored flames from 50 draconic heads was an Apocalypse inducing scene as all those touched were disintegrated!

"AAAAH!"

"We yield!"

"Take us prisoners!"

Crisp and clean outline of cylindrical pillars would be left as gaps in the Aileron Army after scorching multicolored flames passed through them, only the Peak Tier GALAXY experts being able to withstand such an attack with heavy injuries or even possibly evade it.

Some had already begun pleading for their lives as Noah maintained his cold look while overseeing everything occurring in the life realm!

Others would argue that the rest of the army were merely soldiers following orders. That they were somehow blameless and only following the words of their generals.

Noah didn't believe this thought as he knew those very same soldiers were the ones committing atrocities to anyone they were aimed to! They make the choice to pull the trigger, so they were directly responsible as well!

THRUUUM

So the dreadful scene of carnage in the Life Realm continued to play out as the tens of thousands of Holy Descendants that were watching felt their blood run cold.

They watched as after the scorching multicolored pillars of flames from Tiamat ended, the figure of Blue Slime descended onto the Aileron Army along with the fearsome subordinates of Noah.

The methods of the Blue Slime that was an Entity were particularly disastrous as its shimmering blue body expanded on wildly while compressing itself, coming into the shape of a luminous blue disc that was about 100 meters!

This blue disc thrummed with the aura of multiple Grand Daos, particularly the aura of the Grand Dao of Vastness as it allowed for the unique essence of an Entity to wrap around its body seamlessly.

ZIIIIING!

The disc shaped Entity...then spun rapidly while barreling towards the aileron army, causing a shocking scene of dismembered wings and limbs to fly out as all those seeing the shimmering blue light would try to run away!

In the face of the Blue Slime, Tiamat, and Noah's 6 other summons- even his subordinates from the Infinite Galaxy paled in comparison as more than 75% of the millions in the Aileron Army would go on to be taken down by him.

This was the burden of lives he would bear, as well as the Dao Crystals that had begun to appear on the battlefield with the deaths of powerful GALAXY ranked Ailerons who actually had deep comprehensions in the Dao of Withering, these Dao Crystals shooting out gorgeous beams of red loot light to the skies!

The scene was truly that of carnage and wonder as it continued silently in the locked Life Realm...

...

The situation of the battlefield at the Rising Stellar Peaks was thrown into a lull as millions of powerful Holy Descendants remained without enemies!

They could only stare at the shimmering green door that represented a Realm for about 30 minutes, and it was only then that they began to see some changes.

THRUUUM!

...!

The figures of the released beings made many people draw their breaths sharply, their hearts turning cold as they saw the thousands of Holy Descendants that were wrapped in the forced realm formation, as well as Noah and the forces he brought forth.

That was all!

The millions of Ailerons...none of them could be seen!

Such a shocking reality brought shock to many as the thousands of Ailerons that had witnessed what had occurred in the Life Realm...they were looking towards the Blue Slime that had innocently gone back atop Noah's head fearfully.

Nearby, the figure of a curvaceous Tiamat in human form could be seen as at this moment, all eyes landed on them!

Chapter 805 - Shock and Reverence

Many eyes close by and afar were glancing towards a single figure- a single human that had a wobbly slime atop his head as his eyes seemed to blaze with a profound light!

He seemed to very well know that all eyes were on him as he glanced at the solemn Old Man Khan who had the party of Holy Prince Rudolf, Princess Anastasia, and Princess Anna with him.

His eyes glazed over them as they turned around to face the blank chaotic void where millions of Ailerons used to be. The area was devoid of any life but Noah knew that further in, there were still multiple Ailerons putting their lives on the line to uncover more information and report what was happening here back to their command bases!

So he stared out towards the blank chaotic void as he voiced out grandly.

"The Entity Vast was only so-so, and the Aileron Legion was even worse to match against! I hope the next battle will not be as disappointing..."

RUMBLE!

Words of immense ridicule came out of him as those watching him felt a variety of emotions.

His demeanor was domineering!

This being...

The eyes glancing towards the being known as Noah were very different now compared to just an hour ago as those watching knew that the deadly Blue Slime that was a genuine Entity and even the terrifying Ten-headed dragon that was nearing the rank of an Entity all acted under his orders.

As he floated in the chaotic void grandly and spoke domineeringly, they were reminded of this reality!

This was because such a reality made it so that even though he wasn't an Entity himself, he was even more monstrous than one as at the Middle Tier GALAXY stage, he was somehow commanding two Entity-equivalent creatures!

Even someone at the Peak Tier GALAXY Realm like Old Man Khan was known as one of the strongest experts in the Expansive Dragon Cl.u.s.ter because of his Starry Behemoth Tarragon that had fully comprehended a Dao, his other three pets merely being at the Peak Tier GALAXY Realm without having fully comprehended a Dao.

So for someone like Noah to have two Entities below him...many beings could only sigh in envy!

In the chaotic void, Noah seemed to have lost interest as he waved his hands, his figure beginning to go back towards the Rising Stellar Peaks as his subordinates followed close by with shining eyes.

This was because the battle they had gone through...had truly been eye opening!

As the Primal Emperor looked at the scene of Noah's majestic figure, his face was cold as he spoke out to the Entities around him.

"Brother Vast fell into a trap where he was besieged by one of the most powerful Entities of the Expansive Dragon Cl.u.s.ter paired with a Dragon that has power at the cusp of an Entity...and that deceitful Slime that made it seem like it only broke through to become an Entity after Brother Vast was unjustly ganged up on!"

RUMBLE!

The gaze of the Aileron Emperor shone with power as his wings released a grand light, those around him looking at each other with shining eyes as he continued.

"Being able to stand against 3 Entities by himself and letting us reveal the hidden experts of the Expansive Dragon Cl.u.s.ter is something we will forever be thankful to Brother Vast for! But this development only makes it all the more important for us to win this war!"

"That deceitful slime and ten headed dragon...the first time I saw them was when the Great Sage's Primal Holy Land teleported my people out for the last time. For them to grow to such a level, the treasures in the Sage's Holy Land must be something that we all seek, with the Ruination Core most likely being there as well..."

RUMBLE!

The hearts of many beings were moved as the figure of the Holy Emperor rose, containing his talk as many schemes and plans sprouted!

...

In another area, the Holy Emperor was standing grandly with a shining gaze as his eyes honed in on the figure of Noah.

He thought of the fact that when he first met this being, he was at the QUASAR Realm and had only entered his eyes as a powerful genius to groom for the future.

He expected this future to be tens or hundreds of years down the line, not in a matter of f.u.c.k.i.n.g days!

When he really thought about it, his body actually began trembling as the reality that it had only been over 1 week and a half since their first meeting registered on his mind.

Less than 2 weeks since this Noah entered his Expansive Dragon Cl.u.s.ter, and he was somehow in the Middle Tier GALAXY Realm as he commanded an Animus Summon at the stage of an Entity and another that neared the same stage!

"Holy shi..."

The Holy Emperor nearly let off expletives as this thought fully registered, his figure disappearing from among the many other shocked Royals and Generals of the Expansive Dragon Cl.u.s.ter as he made way towards the Rising Stellar Peak!

Meanwhile, Noah himself was not in the mood to show off or antagonize anyone anymore, his attention now set on all the loot that he and his Summons had collected over this battle at the Rising Stellar Peaks.

He talked with the figures of Old Man Khan and other Holy Descendants that were looking at him with extremely different gazes, leaving them with the tasks of any clean up as he teleported into the Infinite Galaxy with all of his people!

The figures of the Emperor Penguin, Elena, Kazuhiko and others entered the eyes of the experts of Ancient Powers and left them just as quickly, only being left to wonder what the geniuses that Noah brought forth really were.

In a certain starry space of the Infinite Galaxy, a wondrous scene was taking place as Noah floated in the skies, breathed out excitedly...and waved his hands, releasing all the loot that he had personally collected to float in front of him!

His summons that shimmered with the Grand lights of manifested Galaxies also took the initiative as they released all the loot they had picked up into the starry space in front of them, causing for the formation of gorgeous beams of loot light to shine all around!

From Dao Crystals to luminous Cores to Skill Books...

It was loot!

Sweet, gorgeous, resplendent loot!

Ah!

Chapter 806 - Crystals! Cores! Skills!

"Am I dreaming...?"

In a starry space outside of the Infinite Realm that was at the center of the Infinite Galaxy, enormous mountains of loot were piled up as they floated brilliantly in space!

Kazuhiko was looking at these mountainous bundles of loot as he pinched himself to see if he was dreaming, others around him shaking their heads as they all looked towards a single person.

All of the Harbingers and experts of the Infinite Galaxy stared towards the being that had a wobbly blue slime on his head as his eyes shone with a more blazing light than any of them! They were waiting for

him to give direction and divide the loot as nearly 80% of it came from a wave of his hands and what his summoned animus released.

Even with all of them working together, their loot was barely 20% of what Noah had collected by himself!

"Little Fish, these Crystals..."

The voice of Barbatos rang out as her eyes were drawn into the Dao Crystals that only Noah and his pets could farm by chance from killing any being that were proficient in a Dao. She glanced at the Dao Crystals as she found out their information, her body beginning to shake as her eyes shone brightly!

Noah also came out of his stupor from glancing at all the loot as he smiled and spoke grandly.

"Yes, the Dao Crystals are the most important out of everything collected...as they give a direct path to the title of Entity without having to spend hundreds of years comprehending the Dao!"

THRUUUM!

Noah waved his hands as he collected all of the resplendent Dao Crystals that were shooting out gorgeous beams of loot light in the starry space, counting all of them as he made quick calculations based on the percentages each one would give.

Let's do some math for a second.

After the Blue Slime assassinated the Entity Vast, Noah collected 8 Peak Tier GALAXY Ailerons, tens in the middle tier, and a bit over a 100 in the Low Tier GALAXY Realm! This was nearly ten times as many GALAXY experts as the ones Noah had taken down in the Primal Holy Land and obtained enough Dao Crystals to comprehend 30% of the Lesser Dao of Withering.

But from the recent battles, there were 8 Peak Tier Experts that had comprehended much more of the Dao of Withering, so Noah received an overabundance of Dao Crystals from three of them who actually triggered the 10% chance to explode into Dao Crystals!

There was also the Ailerons in the QUASAR and Nebula Realm that made up the millions he had dreadfully reaped the lives of in the Life Realm- even though most had not embarked on the path of the Dao and those who did had abysmal comprehensions, the Affix was still triggered for them as Noah and his pets obtained a Dao Crystal here and there.

All of these factors culminated in the amount of Dao Crystals Noah gathered as his calculations continued!

When he collected all of them and finished his calculations...his eyes blazed with light as he shockingly found that with the 10% chance of Dao Crystals to drop from the defeated enemies proficient in a Dao, he had obtained enough of such Crystals to bring someone to 100% completion...over 12 times!

RUMBLE!

This meant that just from this battle, Noah's own luck and the luck of his summons was great enough to give him enough Dao Crystals to make 12 full fledged Entities.

"...!"

Even Noah himself was alarmed at this reality as he found this Affix of the Ruination Core to be simply ridiculous when paired up with what he could do!

Of course, there was still the fact that those who absorbed the Dao Crystals had to be at Peak Tier Entity to be considered titled Entities for the norms of the Dark Universe.

This was because never in history had someone that had been in the Low or Middle Tier Realms been capable of fully comprehending a Dao to completion, only those at the Peak Tier living enough years and having the talent to achieve such a task!

But when it came to Noah...why would it matter to him whether they were considered full fledged Entities or not based on their Realm?

If he were to just give one of his subordinates a portion of the Dao Crystals and grant them 100% in the Dao of Withering, they would still get the unique aura of a Controller of a Dao as they received the horrendous boost in power that came with it!

RUMBLE!

Such was the truth Noah formed in his mind as he then looked at the subordinates around him...and then turned his eyes towards the pile of loot.

The task of who to power level to 100% comprehension of a lesser Dao would come later, the sacred task of finishing the count of loot continuing for now.

Aside from the Dao Crystals, there was a gorgeous amount of Cores ranging from Nebula all the way to Peak GALAXY!

The sheer amount of Middle Tier and Peak Tier GALAXY Cores made Noah believe it wouldn't be an issue for him to ascend to Peak Tier after absorbing them, and it remained unknown if any would be left to power his subordinates to Middle or Peak Tier depending on how many it took for him to rise up.

His strength would still come first as with his Traits, he could dish out ridiculous power as even with the Dao Crystals, he would be using one of the 12 spots first and becoming the first Entity of the Infinite Galaxy!

THRUM!

Noah waved his hands as the Cores were also divided cleanly, his subordinates only watching with salivating eyes in the distance.

Next up were the Skill Books that were simply too numerous, but Noah took some time to scan through them as he found multiple techniques that utilized the Dao of Withering that would constitute an entire skill tree, as well as millions of other skills that would clutter the stat panel of anyone who dared!

All in all, it was a gorgeous scene of cleanly divided mountains of Dao Crystals, Cores, and Skill Books that filled the starry space of this small region of the Infinite Galaxy with a luminous treasure light!

Chapter 807 - Since powering up has been so slow...

Aside from the gorgeous loot, one must not forget an even bigger present out of an all out war with beings that were considered different existences from Noah.

It was, of course, the Skill Points that made many things possible that Noah was now looking at with passionate eyes as he made his subordinates wait even longer before they could enjoy the loot before them.

In his stat panel, he saw the gorgeous count of 12,358,013 Skill Points!

From the measly 2 million he had before, he had jumped up by 10 just from defeating the army that the Entity Vast led!

Such a number of skill points made his emotions churn as with them, he achieved his goal of 10 million skill points that were required to create a particular skill.

It was a skill meant to accelerate Noah's growth, since he felt like he had just been rising too slowly in the past few weeks...

The rising he was thinking about wasn't in terms of Realms or comprehending Daos and Laws, he knew very well that he was nearing or even already breaking any existing balance jumping from QUASAR to Low Tier and then Middle Tier in just weeks, where he was even about to attempt reaching Peak Tier Galaxy after just a bit over a week since his last Realm advancement!

The rising that he felt was going very slowly was of course the progress of assimilation of laws, and eventually it would be the assimilation of Daos that would stump him for years to come!

He found many loopholes to bypass the hundreds of years others would need to bypass Realms and comprehend laws and daos, but his progress in assimilation was abysmal as even now- he only had 5% in the progress of assimilation all Universal Laws.

To him, such a number was unacceptable as he wanted to bypass this point as well as the future hindrances of assimilating Daos. The solution...was to create a fearsome skill after he got some inspiration from seeing a particular Affix of the Ruination Core!

Thus, a skill named [Loot Drop- Assimilation Crystals], was created! Though its cost had stumped Noah until now.

A skill for his biggest problem at this moment.

A skill that allowed him to have a cheat when it came to something that would take beings hundreds or thousands of years to do- the Assimilation of Laws and Daos!

"Haha!"

He laughed out grandly as he gave the confirmation, 10 million skill points disappearing just like that as he gained a new passive skill on his stat panel.

He stared at this ability with shining eyes for a few seconds as he thought of a future where both Dao Crystals and Assimilation Crystals would drop freely, imagining a future where it wouldn't take him months or over a year to assimilate all universal laws and step on the path of a Cosmic Dao that was

promised to him, of a future where fully assimilating Daos to become a Sage or a Great Sage would only take him a matter of months if not less!

Who needed 100 years?

Who even needed 10?!

RUMBLE!

His essence thrummed forth domineeringly as he gazed upon the experts of his Infinite Galaxy that were still eyeing the loot- especially the Dao crystals, with shining eyes.

"There shall be no favoritism when it comes to these Dao Crystals that are an easy path to becoming an Entity."

...!

Kazuhiko, Steel Mikhail, and all the other guys and Beasts of the Infinite Galaxy breathed out sighs of relief as they half expected the curvaceous women around Noah to be the first to be given these Dao Crystals as they awaited their turn for whenever the next battle came.

"Hmph."

Barbatos saw their expression as she pouted while looking towards Noah, Elena's eyes only shining ever brighter as it seemed her fanaticism only increased!

Noah continued as he gazed towards all of them calmly.

"Simply put, the strongest at this moment will receive enough crystals to grant them 100% comprehension in the Lesser Dao of Withering. As for deciding the ranks of strength...it is naturally through combat!"

RUMBLE!

Noah brought his arms to his head as he brought down the wiggling blue slime, continuing with his words as he pushed the slime forward.

"This little guy has the keenest senses out of all us here, so he will oversee you guys competing as the strongest 11...will be among those who will very soon step into the ranks of Entities!"

Essence blazed out wildly as the subordinates looked at each other with wild eyes.

They each knew what a power like that represented, and wanted to grasp it within their hands as they knew it was the peak of power at this moment!

RAA! RAA! RAA!

The Emperor Penguin bellowed out wildly as it floated in front of everyone else, calling out domineeringly with its golden beak raised high.

"As the first beast of the original Spiritual Land, I will naturally have to keep my lead as the strongest! Who shall match me...!"

THRUUM!

The scene became competitive as a mini tournament would go underway in the Infinite Galaxy!

Meanwhile, Noah stepped away as he grabbed the Middle and Peak Tier GALAXY Cores, disappearing from the starry space as he entered the depth of the Infinite Realm that was at the center of everything, and also the location where essence converged the most.

The area he arrived in was a culmination of multiple Law Spaces, where multicolored milky essence of all types could be seen physically coagulated because of the intense concentration!

'Just when will I have Dao Law Spaces...Ah!'

He shook his head sorrowfully as he sat down at a location that wasn't too far away from the core of his Infinite Galaxy, choosing this place to absorb the numerous Middle and Peak Tier GALAXY Cores as he tried to see if they were enough for him to enter Peak Tier!

Thereafter...he would absorb one of the 12 portions of the Dao of Withering Crystals as he became a genuine Entity...

When one looked at the time, he spent 2 weeks traveling to the Expansive Dragon Cl.u.s.ter as he then spent just a bit less than 2 weeks within this Ancient Power.

Yet in this period of time, he went from QUASAR to Low Tier GALAXY, to Middle Tier GALAXY, and now...he wanted to enter Peak Tier GALAXY!

Less than a month!

Ah!

Chapter 808 - ENTITY! I

A variety of scenes were taking place at this time as many beings moved with their own ideals.

A few hours had passed since the battle at the Rising Stellar Peaks as the consequences were dealt with by the forces of the Primal Winged Expanse and the Expansive Dragon Cl.u.s.ter!

In the Rising Stellar Peaks region, the defense line found itself returning to position as very few of them had lost their lives, Old Man Khan reshuffling the forces as he stood guard over the region once more.

This powerful Entity didn't know what to think as he stared at Anastasia, the one who had brought them to have a connection with the mysterious being that now commanded a powerful Animus Entity!

"You can look at me all you want, but I won't have any answers."

Anastasia spoke out calmly while looking at Old Man Khan and Prince Rudolf who had a lost look by the side.

RUMBLE!

Yet in the next second, a surprising event occurred as they felt a powerful aura near them, but this aura came from the place they called home and was extremely familiar as they calmed down and looked

toward a certain direction, the image of the magisterial Holy Emperor materializing in front of their eyes as he spoke quickly.

"Where is that domineering little Entity?"

He spoke with a jovial smile as all he got was a head shake from Old Man Khan and Prince Rudolf, Anastasia being the one to speak as she stared out into the vast chaotic void.

"He disappeared some time back to take care of something, he should return in a bit."

"Hmm? Good! We must prepare a grand celebration!"

In the Primal Winged Expanse, the Primal Emperor was speaking to a Peak Tier GALAXY expert that had a solemn expression on their face.

"Take a few of your brothers and head towards the other Ancient Powers. Let it be known that the Expansive Dragon Cl.u.s.ter has unearthed their Sages's Legacy...and that they have a Ruination Core!"

RUMBLE!

Shocking commands came out from the Primal Emperor as the expert he was speaking to nodded sternly, his figure flashing away a second later.

The only one who remained was the Primal Emperor himself as his wings shimmered mystically, the Aura of the Dao of Withering on his body being extremely condensed as he was the single being within his Ancient Power that was the closest to fully assimilating this law.

Yet he could never take that last step and enter into the status of a Sage as like many Entities, he found that he could not so easily fully assimilate a Dao!

One had to find outside help and unique resources to do so, and unique treasures like the Tools of Ruination were at the forefront of things sought after by all Entities.

The Primal Emperor...would do all that he could to make sure that he got his hands on the treasures of the Expansive Dragon Cl.u.s.ter, even if he had to muddle the playing field and throw out bait to see if any other parties would bite!

THRUUUM!

This essence revolved around him as in his hands, a wondrous looking GALAXY core that shone with the light of stars was reducing by size every second as he absorbed more and more of it.

It went from something the size of a head and became a mere grain of sand in minutes as all the essence within it was s.u.c.k.e.d out entirely!

"Haaa..."

Noah sighed out in contentment as every single part of his body seemed to be vibrating with energy, his manifested GALAXY ever so close to remaining at Grand Completion before he could advance into the Peak Tier stage.

He had actually finished absorbing all of the Middle Tier GALAXY Cores as he was now on his 5th Peak Tier Core, and he finally felt the feeling of being full as the hundreds of billions of stars that formed in his illusory galaxy moved in a wondrous symphony of power and regality!

THRUUUM!

He began absorbing the next Peak Tier Core as this feeling came even closer, going on to finish this and another three more before he felt entirely full, a cracking sound tingling out thereafter as it felt like a dam had broken loose and surging waters were sundering down!

OOOM!

The atmospheric essence and law essence all around him resonated as he became the center of a huge mana storm, his GALAXY expanding on contracting constantly as it released wondrous waves of power.

He would be in this stage for some time to come as what he would focus on from now on would entirely shift to laws and Daos, where unlocking the next path of power lied in fully comprehending and assimilating Daos as he would then rise into the title of a Sage!

WAAA!

The raging essence around him slowed down as his figure became clear.

One could see the devilishly charming face carved from the traits of the Vampyre Progenitor. His hair was all sorts of colors at this point after he let it freely be influenced by the universal law essences flowing through his body, but his Manifested GALAXY was the most eye catching as it represented him standing among the ranks of true experts in the Dark Universe!

The Realm of Peak Tier GALAXY!

Chapter 809 - ENTITY! II

After a being achieved so many grand things consecutively, one would think they would take a breather and appreciate their work for a second.

Noah appreciated his work for a literal second as he nodded proudly while glancing at his Peak Tier GALAXY...and then waved his hands to bring out the wondrous Dao Crystals as he already moved on to grab another achievement!

The targeted goal this time was to comprehend a Dao to completion and obtain the title of an Entity, and Noah planned to do this in a stellar fashion.

Unlike others who would take hundreds of years to fully comprehend a Dao, he had the affix from a Ruination Core that allowed him to obtain Dao Crystals- treasures he would use to fully comprehend a Dao he never had skill in or began before and comprehend it fully in a shocking period of time!

His hands grasped the brilliant Dao Crystals as they shone with l.u.s.ter, their shine flashing brightly before dimming as he began to absorb...

While Noah began absorbing the resplendent Dao Crystals, the experts of the Infinite Galaxy were fighting to see who was strong enough to obtain the other 11 seats that would give birth to Entities!

Through sheer dominating power and the fact that they were the only ones to currently hold PRISMATIC Summons, the strength of the Emperor Penguin and Barbatos came out on top as they secured their spots.

The other figure that let himself known brightly was the Imperial Adjudicator, this old fox using his age and experiences paired with his Ultra Rare and Rare Summons he had obtained after switching to the techniques of the Infinite Galaxy- he used these Summons to wipe the floor with others as he obtained a spot himself, his conviction to obtain strength and be able to shoulder the burdens of Anastasia and Anna shining brightly!

Kazuhiko couldn't be left behind as he utilized his Trait that nearly made him invulnerable on top of his Summons to claim another spot, Steel Mikhail and Athena being another two that shone brightly in their battles.

With an excited slime that was now an Entity overseeing the mini tournament, it quickly ended as the ranks of strength were decided and the other 5 that would be getting their hands of the treasured Dao Crystals were the Kraken, Elena, the Ruler of the Demon Realm Agares who held the Sin of Envy, the Imperial Phoenix who managed to break through and barely clinch in, as well as Anna who was around Noah the most since the Primal Holy Land!

All of them were in the Low Tier GALAXY Realm as their Traits and summoned Animus were what played key roles in obtaining their levels of strength.

RAA!

After the ranks were decided, the Emperor Penguin cried out grandiosely as it floated in front of everyone else, Barbatos showing an annoyed expression as they all looked towards the jovial Blue Slime and nonchalant Tiamat while waiting for Noah!

In the depths of the Infinite Realm that was at the Center of Infinite Galaxy, Noah's eyes were shining brightly with palpable beams of light as he stupidly saw the percentage next to the Dao of Withering to really rise from 0% to 10% and then 90% just an hour later.

It was such a fantastical and unbelievable scene that should have never been possible, yet minutes later he continued absorbing the required Dao Crystals as the number went to 99% and ultimately reached...100%.

THRUUUM!

The area around him shook the moment this occurred, a momentous aura descending down as a phenomenon similar to when the Blue Slime became an Entity was recreated, albeit at a slightly smaller scale as the Dao in question was a Lesser Dao!

Noah felt the essence of the Dao of Withering he had never even touched until now descend unto him like it belonged to him for years, his heart strings being pulled as numerous ways to utilize the Dao bloomed in his mind.

He could better utilize this Dao if he created his own skill tree dedicated to it, or simply absorb enough skills from the defeated GALAXY Ailerons to form a skill tree from the skill books he obtained!

RUMBLE!

His thoughts were taken away as he had to stop everything to sense the new aura spreading around him, covering every part of him as he began to feel a sense of boundless strength.

This was an aura every Entity was afforded when they fully comprehended a Dao, an Aura of a Dao Controller!

{Aura of the Controller of Withering} :: A passive aura that only appears around those who have fully comprehended the Lesser Dao of Withering. It grants +2,500% Extra Damage and allows the attacks of the Controller of Withering to contain a unique corrosive essence that deconstructs and reduces the attacks, mana, and life force of the target until they become empty husks...

A passive aura that granted half the percentage of Extra Damage as a Grand Dao, this one with its own unique feature as the Dao of Withering deconstructed and reduced something into nothingness. It was in the name- Withering!

Such an aura, similar to the Aura of the Grand Controller of Vastness, could have its percentage boosts increased and even more features unlocked in the future as one assimilated it into their origins and souls.

This was why those who were further in assimilation were extremely powerful, those who could fully do it and become Sages being geniuses that deserved their reverence!

Yet this would be a worry for later as for now, Noah's body rose grandly while sensing the power flowing through him, knowing he had come a long way to achieve what he just achieved at this instant.

ENTITY!

He had achieved the title of Entity just a month or two after knowing and meeting such beings, a rank at the peak of power for the surrounding light years as it would allow him to move with ease and confidence! He could not help but bellow out a heart shaking roar as if he was announcing his arrival!

OOOOOOOH!

The essence around him trembled as he called out, his dark hair flying wildly as an oppressive air leaked from him, his figure akin to an ancient creature from the Primordial Cosmos!

Chapter 810 - Making Entities is Easy!

OOOOOOH!

Noah's bellow seemed to travel out from the expansive Infinite Realm and echo into the even more expansive Infinite Galaxy, his entrance into the title of an Entity being something celebrated by the Infinite Galaxy itself.

Such a stage allowed him great strength and survivability as he could now withstand strikes from those powerful Entities, being able to use the fully comprehended essence of the Lesser Dao to battle against powerful Bosses without being overwhelmed.

It was akin to a level 1 noob fighting the strongest boss of the dungeon right away- even if they were pay to win players who were armed to the teeth, because they hadn't grinded and their level was below the boss by such a large extent, they would get obliterated at the end! It was an impossible gulf to cross before, but Noah had now risen to the level of these bosses as he could defend against their attacks and even get through their defences as he now stood at the same stage as them!

"Ah..."

He let out a content sigh as he enjoyed the feeling of his newfound strength while teleporting away, returning to the area where a mini tournament just ended as he found the Harbingers of Sin and other powerful combatants of the Infinite Galaxy clustered around the friendly Blue Slime.

Tiamat was off to the side as her drop dead figure seemed unapproachable, her gaze forlorn as she stared out into the starry space where even her aura could not find the end of within this wide Galaxy!

Noah's appearance caused excitement to appear in the eyes of everyone as Tiamat turned towards him with shining eyes.

Her thoughts were tumultuous as she remembered the promise she had with this supposed Master of hers who wanted to be a Sage in under 10 years.

She had laughed at this as she thought it to be a mere joke, yet as she watched this being go from Middle Tier GALAXY and enter the Peak while also becoming an Entity in just days...she wasn't so sure!

Her gaze was inquisitive as she wondered how he had been able to cause something as universe defying as Dao Crystals to come to be, such a treasure effectively being able to make one an Entity with such ease that she found herself questioning whether to ask for a portion herself as well.

'Hmph!'

She instantly threw this thought away as her pride was too high, knowing that she would very soon make a breakthrough and fully comprehend the Dao of Destruction.

This was a Grand Dao! What would a mere Lesser Dao of Withering be compared to this? So the dreadful Queen Dowager turned her head away from Noah's brilliance as others swarmed towards him!

"Master, I'm as amazing as ever that I even surprised myself..."

The Emperor Penguin was shining with a golden light as he began bragging about his strength among everyone else, Noah patting this Penguin's silky fur as he got the gist of what happened from everyone else.

He nodded towards the beings that earned the privilege of becoming future Entities, waving his hands as the glimmering red Dao Crystals he collected went towards each of them!

Every single one of them received the portion required to reach 100% in the Dao of Withering, their hands quickly going towards these treasures as their eyes glowed brilliantly.

"Take your time to absorb them and feel out the Dao. You should get to 100% in just an Hour or two as you gain something only Entities grasp...with you getting the full title whenever we collect enough cores to bring everyone to Peak Tier GALAXY!"

RUMBLE!

A grand proclamation was made from Noah as he handed out enough Dao Crystals to forge 11 new Entities.

To him, making Entities was just that easy!

If any other Entities or Ancient Powers found out what he was doing or the shocking things behind it, their hearts would simply rupture from envy and shock. Yet Noah gave away the Dao Crystals like nothing as the 11 experts nodded towards him with shining eyes.

"Also, the [Library] should have a skill called [Loot Drop- Assimilation Crystals] by now. Be sure to learn it if you want to collect loot that will very quickly allow you to assimilate the comprehended Dao and boost your power even more!"

Even more shocking words came out as this time, they raised alarm from the knowledgeable Tiamat from far away that couldn't help but blurt out.

"Assimilation Crystals? Similar to those Dao Crystals? Are you f.u.c.k.i.n.g telling me you're going to extract the progress of assimilation from those you defeat and make it your own as well? That is...!"

Her eyes were shaking as she connected the dots, Noah smiling towards her as he knew his promise of becoming a Sage in less than 10 Years would be an achievable thing in less than even a year!

Such a shocking truth even left him marveling as he wondered if he truly was a real Protagonist as his Trait stated...

"Becoming a Sage should be light work. Be ready to fully submit when that time comes."

Noah spoke out with a smile as Tiamat had a difficult expression, the subordinates listening by the side looking at each other with disbelieving smiles as they commended Noah's boldness to utter such words with everyone around, Barbatos and the other curvaceous women looking towards him with dangerous eyes!

But Tiamat's expression was still difficult as she voiced out.

"I...have a path of vengeance I must take! Even if you abide by the terms and I submit, you have to allow me to seek my revenge! I have an entire Universe littered with Great Sages, Monarchs, Paragons, and even the schemer of it all who is in the Universal Realm!"

...!

Noah's eyes returned with clarity a second later as many thoughts crossed his mind, with the others looking towards Tiamat in shock as they then turned to Noah and wondered who the hell he had connected himself to now!
