

## The Mans Decree Chapter 1679 -

### Chapter 1679 Green With Envy

Although Kai was quite reluctant initially, the thought that Evangeline was no different from a puppet dispelled all his worries.

After he rested in the Deragon residence for a few days, almost all of his injuries healed.

He planned to bring Evangeline to the Medicine God Sect to see if there were any pills that could cure her.

After all, the Medicine God Sect was capable of creating higher-level pills with the Divine Cauldron.

However, just when Kai was about to take Evangeline to the Medicine God Sect, someone suddenly informed him that there was a girl outside requesting to meet Kai.

Kai was surprised as he could not figure out why a girl would suddenly come looking for him.

When he went out, he realized that it was Astrid.

Astrid instantly patted his cheek upon spotting him. "You haven't seen me for a few days. Do you miss me?"

She did not take heed of Fernando's advice at all.

Kai took a few steps back and asked awkwardly, "Why did you look for me, Ms. Gunderson?"

"It's not me who's looking for you. My father would like to invite you to the Gunderson residence," clarified Astrid.

Knowing that something must have happened for Fernando to invite him, Kai said, "Okay! Let's go..."

Without saying anything else, Kai opened the car door and entered the car. Smirking, Astrid entered the car and sat in the backseat as well.

"Start driving," she instructed the driver while pressing closely against Kai.

Kai was left at a loss for what to do. With Astrid sitting on his left and Evangeline on his right, he was pinned in the middle of both of them, unable to budge at all.

After the car drove off, a sorrowful look surfaced on Lizbeth's face as she stood in the Deragon residence's courtyard.

"I've told you that Kai's an exceptional man. There'll be many girls fancying him in the future. If you continue to follow him, you must accept that reality..." advised Rayleigh calmly, who was beside Lizbeth.

Lizbeth forced out a smile. "I can accept it, Mr. Deragon. Don't worry..."

Meanwhile, Astrid was persistently leaning against Kai's body.

He did not dare to move even for the slightest bit as he would touch her body if he did so.

Noticing how stiff he was, Astrid teased him with a smile, "Are you afraid of me? You've seen every single inch of my body, so it's no big deal even if you touch me. I've told you that I like you and will go to any lengths to pursue you..."

After saying that, Astrid even shot a glance at Evangeline provokingly.

Women were just like that. Even though Evangeline's eyes were completely lifeless like a puppet's, Astrid still viewed her as a rival.

"Ms. Gunderson, I know that you like me but I don't want to think about it for the time being. Furthermore, I already have a girlfriend..." explained Kai awkwardly.

"I said that I don't care. You have more than one girlfriend anyway, so it doesn't matter if I join the ranks too."

As Astrid spoke, she even rested her head on Kai's shoulder.

There was nothing Kai could do but let her lean against him. He closed his eyes and recited the calming incantation in his mind.

Otherwise, he could not guarantee that he could hold himself back from taking advantage of Astrid there and then.

After all, he was a normal man.

Just when he was reciting the calming incantation, he suddenly felt someone also leaning on his right shoulder.

When he opened his eyes to look, he realized that it was Evangeline. Although her eyes were still lifeless, she was mimicking Astrid's actions and resting her head on his shoulder.

That surprised Kai greatly. If Evangeline had developed feelings, it proved that she was recovering gradually.

The driver was engulfed with envy when he saw how Kai was surrounded by two gorgeous girls, yet looking like it was a torment.

## The Mans Decree Chapter 1680 -

### Chapter 1680 Start A Faction

After Kai arrived at the Gunderson residence, Fernando welcomed him respectfully. He even treated Evangeline, who remained silent throughout, with utmost care.

Astrid was confused when she saw her father acting like that, unable to understand what had taken over him.

“Please sit, Mr. Chance...”

Fernando let Kai take his seat, which was designated for the master of the house. Even though Kai wanted to reject it at first, he saw that Franklin had already sat down at the side.

Left with no choice, Kai could only take the seat while Evangeline stood beside him motionlessly.

“Why did you look for me, Mr. Gunderson?” asked Kai. Fernando glanced at Astrid. “Go out for a while, Astrid.”

“Dad, what is it that I am not supposed to know?” she protested unhappily with a pout.

“Just get out if I tell you to. Why are you asking so many questions?” A cold look appeared on Fernando’s face.

Astrid had no choice but to leave when she saw that. With a casual wave of his hand, Fernando surrounded them with teleportation magecraft.

Noticing Fernando’s mysterious behavior, Kai had a feeling that it was about something important.

“Mr. Chance, Great Elder has relayed a message to us. Now that strange phenomena are being observed everywhere in heaven and earth, the spiritual energy revival might be coming soon! The major sects and prestigious families in the eight secret realms are growing restless. Many of them start to reveal themselves through their representatives in the mundane world. Having stayed concealed for so many years, exposing themselves at this precise moment implies that a drastic change is going to befall the martial arts world soon. If it’s actually a spiritual energy revival, the eight secret realms will collapse. Hence, the sects and prestigious families within them will need to gain control over resources and territory in the mundane world beforehand. Great Elder hopes that you can start preparing now. When the secret realms collapse, the Gunderson family can quickly reclaim territory and resources under your lead. That’ll secure us some breathing room.”

It was hard to digest Fernando's speech in a short moment. If the secret realms collapsed, the sects and prominent families practicing spiritual energy cultivation would return to the mundane world, introducing utter chaos.

What would happen to the martial arts world and its people?

After all, the martial arts world could not be compared to the heavenly realm.

"Mr. Gunderson, if the secret realms collapse, doesn't it mean that the martial arts world will be gone too?" asked Kai.

Fernando smiled. "Mr. Chance, even if the secret realms collapse and the sects and prestigious families return to the mundane world, the martial arts world will not be doomed. However, it will not be as glorious as it is now. The major families of the martial arts world will also be reduced to lowly servants of energy cultivators. Many martial arts families are currently supported by families practicing spiritual energy cultivation, acting as spokespersons of these families in the mundane world. It's quite rare for families practicing spiritual energy cultivation to personally send representatives to the mundane world such as the Gunderson family. After all, it would weaken the family's strength. The members of the Gunderson family are unable to upgrade themselves as their abilities have been suppressed. This is why I made Astrid train to become a martial artist since young instead of divine martial art. If she practiced divine martial art, she won't be able to level up much in the mundane world."

Kai fell into deep thought when he heard what Fernando said. If that's the case, I should really pay attention to developing my power and territory.

Such a thought had never crossed his mind. All he wanted was to save Kai and his mother.

He had never even considered starting a faction.

Even for the regiments in Dragon Sect, Kai held a laissez-faire attitude and barely took charge of them.

Although he was the lord of the Medicine God Sect, it was merely an empty title. In fact, he hardly cared about it too as Axton had been managing it on his behalf single-handedly.
