

Married At First Sight Chapter 3545

Married At First Sight Chapter 3545-The day passed quickly.

It was evening in the blink of an eye.

Serenity took a short rest at noon and became Lilian's companion in the afternoon.

Seeing Lilian packing her belongings and stuffing numerous unfamiliar medicine bottles into the box, Serenity grew increasingly anxious.

"These are the medicines I always carry when I travel. I bring them out of habit, so don't worry too much," Lilian explained. "Also, I need to bring all the medication Grandpa Jimenez requires daily. He's almost out of his supply."

Serenity pursed her lips and remained silent.

Lilian stood up, patted Serenity on the shoulder, and said, "If you're really concerned, just come along with me."

"Lilian," Jane called out softly.

Serenity was physically present, but her thoughts were in Jensburg. This girl also mentioned that she would take Serenity with her.

Taking Serenity along would distract Zachary and others, making it easy to get confused.

"I'm not worried, nor do I want to go with you," Serenity denied. "I'm just bored and watching you pack. Oh, by the way, I have a favor to ask: when you see Zachary, tell him that I'm waiting for him to pick me up at FC Manor to celebrate the New Year."

Lilian didn't challenge Serenity's pretense.

Not to mention that Serenity was pregnant, even if she weren't, Zachary, who adored his wife, wouldn't let her take any risks.

Even though Serenity was skilled in combat, Zachary would never allow her to get involved in dangerous situations. From the moment he fell in love with her, he promised to give her a lifetime of happiness and peace, dedicating his life to fulfilling that promise.

Lilian said, "I'll let Mr. York know when I see him that you're waiting for him to pick you up."

Serenity responded, "Thank you."

"Why be so formal? We're good friends," Lilian replied.

Lilian then walked over to a shelf where she stored various medicines. She took two bottles of pills from the shelf, returned to Serenity, and handed them to her.

“I know you have everything, but I don’t have much to offer you, so I’ll give you these two bottles of calcium tablets. You can only take calcium supplements now. After you give birth and finish breastfeeding, I’ll help you recover, so you can continue to captivate your Zachary.”

Serenity accepted the two bottles of calcium tablets without hesitation and smiled, “Thank you in advance. I’ll definitely need your help to recover.”

Lilian laughed heartily, “Jane and Iris were both helped by me. Look at them; they’re even more beautiful after giving birth than they were before marriage.”

Jane smiled, “Yes, it’s all thanks to you.”

Having a miracle doctor in the family brought endless benefits.

The Johnson family doctors were almost out of a job, as they often sought medical advice from Lilian. She was generous with her knowledge, never withholding anything. Whether they could learn from her was up to them.

“Camryn’s medication is almost finished. I need to bring some for her as well. After this, she won’t need any more eye medication. After the New Year, I’ll help her regulate her body and eliminate the coldness in it. I guarantee she’ll be able to become a mother within three years.”

Serenity said, “I’m not sure how much medicine Camryn has left, but Callum would know. Camryn and I are both busy with our own jobs, so we only meet when we have free time.”
