

## Marvel 111

### Chapter 111

When A Powerful Burst Of Laser Light Came Towards Him, Lin Rui Screamed A Rude Remark And Threw Himself Straight Forward On The Ground.

Sii~

After Lin Rui lay down, the laser just moved past where he was, and a deep crack was made in the wall by a high-intensity convergent beam.

Buzz~

After crossing most of the labs, the beam was finally pointed at its proper position under Tony's control, in the middle of an object mounted on a test bench. The high-intensity convergent beam slowly dissipated after a period of time and then a triangular object with a pale white light appeared in the center of the test bench. Tony finally developed a new element that could replace Palladium.

!

"Tony! Are you trying to kill me?!" Quickly climbing up from the ground, Lin Rui shouted at Tony. Getting nearly cut in half by a laser, Lin Rui is now pissed at Tony. Even though Lin Rui always carries a guardian charm, Low Level's guardian charms can't withstand such a powerful laser attack. If it hadn't been for Lin Rui's quick reaction just now, he might have been in real danger.

"Aren't you all right? And, I finally found a new element!" Without paying attention to Lin Rui's anger, Tony had rushed to the lab bench to look at the new element.

"You!..." Afflicted by Tony's sentence, Lin Rui almost regretted telling Tony the news about the new element.

"Oh! It's so beautiful!" Tony could not help but admire the triangle that contained the new element as it was removed from the test bench.

This is Howard's most valuable legacy to Tony, which can completely replace Palladium and make Arc Reactor complete without any side effects.

"So, Do you want me to congratulate you right now?!" Walking up to Tony, Lin Rui said angrily.

"Of course, it's a completely new element! It may only be used on the Arc Reactor for the time being, but it's also a great discovery!" Putting that new element away, Tony said earnestly. He's going to test whether this new element can replace Palladium later, but Tony has already let J.A.R.V.I.S. run the calculations so there should be no problems at all.

"Wasn't your dad the one who found it..." Lin Rui whispered as he heard Tony's words.

"Huh, what did you say?"

"Ah, nothing! I mean Mr. Stark is amazing!" Jackson shouldn't know about S.H.I.E.L.D. and the conversation between Iron Man and Mirage Knight so Lin Rui quickly added.

“Well, you’re here to get Mirage Knight’s autograph. I put that on the table in the next lab. You can get it yourself. I’ll continue to do some experiments. You can stay and help me if you have time later.” After sorting out the makeshift lab, Tony pointed Lin Rui in a direction.

“Well, I’m free today anyway. I’ll just help Mr. Stark here.” With a nod, Lin Rui chose to stay and help Tony do the experiment.

“Ok! Then you go to move the table over here. The pipe needs to be moved.” It seems that Tony knew Lin Rui will help him and he pointed towards a table and told him.

Lin Rui: “...” I should have taken my autograph and left!

In the end, Lin Rui stayed in Tony’s lab until the afternoon. Once a genius like Tony gets caught up in something that interests them, they completely forget everything else. In the meantime, if Lin Rui hadn’t helped book some takeaway from his grandfather’s restaurant, he was afraid that Tony would faint.

“Goodbye J.A.R.V.I.S.” Standing at the gate of Tony Villa, Lin Rui waved his hand to the camera on his head and shouted. Before Tony came out of the basement, Lin Rui said goodbye to J.A.R.V.I.S.

“Good-bye, Mr. Jackson,” J.A.R.V.I.S. responded politely.

Then Lin Rui continued driving his little jeep and left Tony’s house under the close surveillance of S.H.I.E.L.D.

“Goal No. 3 has left, repeated, goal No. 3 has left.”

“Roger that.”

After Lin Rui drove away, agents of S.H.I.E.L.D., who had been outside Tony’s house, exchanged quickly. However, they would not know that the targets they were monitoring had actually discovered them long ago and they were just too lazy to do anything so they just ignored them.

“It seems that I have to be more careful now. It’s better to contact Tony less as Mirage Knight.” Already far away from Tony’s luxury villa, Lin Rui, feeling closely monitored, thought to himself.

.....

“Ivan... what’s this? Jack, is this a helmet?”

“It doesn’t look like it.”

In the secret warehouse of Hammer Industries, the uneasy Justin Hammer came to inspect it, but it turned out to be very upsetting for him.

“Ivan, how are you supposed to get a head in there? Jack, can you put your head in there?” Looking at the iron bump, Justin asked sarcastically.

“I can’t do it.” Jack put it on his head and finally replied.

“See, Ivan. That’s not a helmet. It’s a head. I need to put a guy in there! I need to fit a person in that suit. Do you understand? Ivan!” Crouching in front of Ivan, Justin was dissatisfied with the transformation of the steel battle suit.

“The drone is better,” Ivan responded faintly.

“What? Drone better? Why is drone better?” Justin asked, staring.

“People make problems, trust me, the drone is better.” Ivan still replied in that same tone.

“Ivan, what I want to make is Iron Man suit and what the government wants is Iron Man suits, just like Iron Man, so that the people will feel at ease!” It seems that Justin still has a lot of complaints about Tony’s Iron Man Armor. He must make one or better Iron Man.

“Justin, don’t get too attached to things. Learn to let go.” In the face of Justin’s request, Ivan just put his own attitude.

Ivan knows that Justin will not give up on him, no one other than he can make an Iron Man regiment for Justin, so he will definitely accept the drone Iron Man. However, Justin may have forgotten that even remotely controlled drones require human control.

“Okay! These drones of yours better steal the show, Ivan. Do you understand? They better rock my world on that stage, Ivan!” Sure enough, Justin finally compromised. As long as Ivan actually made Iron Man Regiment, he didn’t care if he could jam people in or not.

A few days later, in the face of pressure from the people, the military asked Hammer Industries to hold an exhibition of steel soldiers to show the American people the high-tech Iron Man Regiment owned by their government. Justin naturally transferred this request directly to Ivan here, and he asked him to make the Iron Man unveiled as soon as possible.

Because of Lin Rui’s involvement, Rhodes did not take Tony’s Iron Man Armor, so Hammer Industries did not get the technology on Tony’s Iron Man Armor. Justin Hammer can only rely on Ivan’s design. In Justin’s opinion, a few days later, Hammer Industrial Technology Expo will be Hammer’s industry and its own show. But he did not know that the consequences of leaving the design to Ivan were serious and that it would be a disaster.

.....

“Incoming call with a blocked number, sir.” Tony, who was doing further experiments on the new element in the basement, suddenly heard a reminder from J.A.R.V.I.S.

“Huh? Who is calling?” Tony was a little surprised to hear J.A.R.V.I.S. Of course, he knew that he was under the surveillance of S.H.I.E.L.D., and he was placed under house arrest after he got his father’s inheritance.

“Hey, Coulson, how’s the land of enchantment?” Signing J.A.R.V.I.S. to connect, Tony asked directly, thinking he was the agent who had been monitoring him.

“Hey, Tony, how you doing? I double the cycle.” However, it was not Coulson’s voice on the other end of the phone.

“You what?” Tony was a little surprised, the voice seemed familiar to him.

“You told me Double cycle’s more power. Good advice.” Ivan said on the phone.

"You sound pretty sprightly for a dead guy." Tony, who thought Ivan had died in a prison attack, asked faintly, "J.A.R.V.I.S. Track his location."

"You're not like a dying man... What your father has done to my family for forty years will be returned in forty minutes. I hope you are ready, Tony Stark." Ivan hung up after saying what was clearly a threat.

"Tracking incomplete." After the phone hangs up, the results of J.A.R.V.I.S are also coming out. It has not been able to track the position of Ivan.

However, Tony happened to scan the computer screen in front of him, which showed today's Hammer Industrial Science and Technology Fair.

"Assemble the Iron Man Armor right away. We're going out." Placing the Arc Reactor with the new element on his chest, Tony quickly instructed J.A.R.V.I.S.

"Sir, the analysis of the new element is not completely over yet..."

"J.A.R.V.I.S, I don't want to hear that now!"

Soon, a cool red Iron Man Armor emerged from Tony's luxury villa.

"Reporting, Iron Man has left!"

.....

## **Chapter 112**

"ladies And Gentlemen, For Far Too Long, This Country Has Had To Place Its Brave Men And Women In Harm's Way, But Then The Iron Man Appeared, And We Thought That The Days Of Losing Lives Were Behind Us. Sadly, That Technology Was Kept Out Of Reach. That's Not Fair. That's Not Right And It's Just Too Bad..." Justin Hammer Is Standing On A Magnificent Stage At The Hammer Industry Science And Technology Fair.

"Does every entrepreneur say that? You can go to Hollywood to be an actor with a sincere expression like that." In the off-stage press area, Lin Rui gathered at the edge of the stage and muttered.

Today is the Hammer Industries Fair. It's the day Hammer shows Iron Man Regiment. Of course, It's also Ivan's day of revenge. However, Lin Rui is not going to let him do it so simply. Although Iron Man Regiment manufactured by Hammer Industries is not as dangerous as Tony's armor, Lin Rui does not intend to give Ivan the chance to cause accidents at the Expo.

"Daredevil, have you found the Russian? Justin here has already begun to show his Iron Man Regiment." Seeing the event in front of his eyes, Lin Rui whispered to Daredevil.

Lin Rui, who knows the story, sent Daredevil to Hammer Industries to find Ivan long before the Expo began. As long as they can control Ivan, the Iron Man Regiment show today can only be a simple show. Although Justin and Hammer Industries may be in the limelight, compare to the Iron Man regiment going crazy, he can endure Hammer for two days. After all, once Ivan is caught, Hammer Industries would be back to its original shape, and they would not be able to make Iron Man Regiment alone.

“Not yet, Mirage Knight. Are you sure that the Russian man is hiding in this lab arranged for him by Hammer Industries? It doesn’t look like someone is here.” But to Lin Rui’s surprise, something seems to be wrong with Daredevil’s side.

“How could he be absent? He should be... Hearing Daredevil’s answer, Lin Rui frowned tightly and muttered. But he immediately remembered something, “No! He may not be in the lab now!”

In the original plot, Justin, who got Tony’s Iron Man suit, put Ivan under house arrest before the Expo, that is, in his own laboratory, because Ivan and Justin disagreed. But Justin didn’t get Tony’s Iron Man suit this time because of Lin Rui’s interference. So Ivan is still supposed to be entertained by his delicious food, and now he could be anywhere in New York.

“Daredevil, look carefully at the laboratories of Hammer Industries and try to find Ivan!” Considering the change in the plot, Lin Rui shouted at Daredevil.

“Understood!”

“Spiderman, it seems that we will be busy tonight. If Iron Man Regiment goes mad, you try to trap them with your spider silk!” Running towards the auditorium, Lin Rui said to Spiderman.

“Okay!” Peter’s answer came quickly from the communicator, he’s hiding behind the stage now.

As for Lin Rui, he would like to remain behind to ensure the safety of Pepper at least after Iron Man Regiment’s departure.

“Next, let’s witness the Iron Man Regiment!”

“Army!.....”

“Navy!.....”

On the stage, Justin is excitedly showing off the powerful Iron Man Regiment of Hammer Industries, and a group of fully armed, unmanned steel fighters are being put on the stage. No one knows what the U.S. military is thinking. It’s an exposition that is attended by thousands of people, so how could these Iron Man Soldiers appear in front of so many people with weapons. I don’t know if they trust the Hammer industry or if they have a bad brain. They shouldn’t be equipped with weapons for just an exhibition.

“Ladies! Gentlemen! This is our government’s latest weapon of war: Iron Man Regiment!” Standing in front of dozens of steel warriors, Justin shook his arms and shouted.

In conjunction with Justin’s action, Iron Man Regiment at the back saluted the audience neatly. Such a shocking scene directly ignited the atmosphere of the scene, and everyone applauded and clapped their hands. Of course, in addition to Lin Rui, who was running towards the audience, there was Miss Pepper and Natasha, who sat beside her.

Whoosh~

While Justin was enjoying the cheers of the audience below, a red-figure flew in from outside the Expo Hall and finally landed beside Justin. It’s Iron Man, the real Iron Man Tony is coming.

“Wow!”

“Iron Man!”

Tony’s arrival ushered in another “chaos”, a big day for old Iron Man and new Iron Man Regiment to meet.

“Hey! Now let’s have the torch relay ceremony!” Although Tony’s arrival was beyond Justin’s expectation, he tried to maintain his calmness and interact with the audience on stage.

Kaka~

“Where is Ivan?” Justin!” But Tony apparently didn’t want to talk to him anymore and stopped in front of him and asked.

“What, what did you say? Tony, what are you doing here? Hearing Tony’s words, Justin asked, pretending to be silly. Ivan is the hidden card of Hammer’s industry. He can’t be exposed.

“I know that you and Ivan are colluding together. He helped you out with these steel fighters! I still know how strong your company is. You can’t make anything this decent. So tell me where he is?” Approaching Justin Hammer, Tony asked again.

“I don’t understand what you’re talking about?” Tony pushed him, step by step, but Justin still pretended to not know anything. What if Tony knew Ivan was alive? As long as he doesn’t say, with these new Iron Man Regiments of Hammer Industries, the U.S. military simply doesn’t care what Ivan did before.

Buzz!

While Tony and Justin were talking in front of them, the eyes of a steel Marine soldier standing behind them suddenly flashed red.

“Dī dī! Sir, you are being marked!”

“What?!”

Boom!

Just as J.A.R.V.I.S. detected the movement of the steel fighter to remind Tony of the next moment, an attack had hit Tony and sent him straight out of the stage.

“J.A.R.V.I.S! What’s going on?!” Starting the ejector in the semi-air-conditioned position, Tony shouted loudly at J.A.R.V.I.S.

“Sir, these Iron Man Soldiers have been activated and their goals have been set. It’s you, sir.” Soon, J.A.R.V.I.S. gave an answer.

Kakaka!

Sure enough, with the blast of the first gun, all the steel fighters who had been standing on the stage for display were activated, one by one walking down the stage. As for the steel fighters who were designed to be air forces, they quickly started the ejector and rushed up to Tony in the upper half of the sky in an instant.

“What!!”

“Be careful!”

“What happened?!”

The Iron Man Regiment, which was originally used for the exhibition, suddenly rushed down the stage and their weapon systems were apparently activated. The audience who were still watching the stage were exclaimed and fled.

Tony couldn't understand what just happened right now, he was too stupid, so he instantly turned and rushed outside the fair. “I can't fight them here, I have to take them away!”

Soo!

Behind Tony, more than a dozen flying Iron Man Soldiers quickly rushed out of the exhibition hall. The Army and Navy steel fighters, on the other hand, marched outside the venue to cooperate with the Air Force in eliminating Iron Man.

Bang ~ Bang ~

Justin was almost frightened to see his Iron Man Regiment run like mad in the conference hall. He had no idea why such a thing had happened. Shouldn't it be the day when Hammer was famous for his industry? Things shouldn't go this way! A little stunned, Justin has gone back to control the back of the stage, he wants to re-control the situation.

As the audience rushed out in confusion, Pepper and Natasha were heading for the back of the stage but were pushed hard by the opposite crowd.

Bang ~ Bang ~

Just then, an Iron Man Soldiers stepped forward and rushed towards Pepper's position. Iron Man Regiment, controlled by Ivan, would not care about the casualties of these civilians. He had only one target, killing Tony Stark.

“Be careful!” Natasha responded quickly by pushing Pepper aside and avoiding the impact of the steel fighters herself.

Bang!

However, another steel armor rushed over towards Pepper's position and Black Widow couldn't save her anymore.

“Ah!” The shadows quickly fell over her head and Pepper raised her hand over her head and shouted.

Pop!

At this critical moment, two spider threads were stuck to the steel soldier and it got pulled out of its original position. Then Spiderman flew over.

“Hey! Big fellow! Let's play! ” With the iron fighter as the center, Peter shot out spider silk and flew around in circles.

“Miss Pepper! Let’s Go!” While Pepper was still on the ground, a familiar voice came from her side.

## **Chapter 113**

“ah! Jackson!” Pepper Shouted In Surprise As She Saw The Person Rushing To Her Side.

“Miss Pepper, let’s get out of here. We need to find Justin Hammer. Only he can regain control of these Iron Man Regiments!” While Spiderman intercepts the drone fighters, Lin Rui lifts up Pepper from the ground.

“Well! That’s what I was planning to do!” Getting up from the ground, Pepper said firmly. Tony is in danger now, and Pepper must help him.

“Miss Pepper! Are you okay?” Natasha finally came over when Lin Rui was holding Pepper and preparing to leave.

“I’m fine, we have to find Justin!” There was no time for Lin Rui and Natasha to introduce each other, and Pepper had quickly ran towards the back of the stage.

Although Lin Rui would like to say hello to the famous Black Widow, the timing is obviously not right, so he just nodded to Natasha and rushed behind Pepper. Natasha certainly followed as she couldn’t handle these drones without her equipment.

“Whoa!” In the chaotic surroundings, Spiderman flies around to block the actions of Iron Man Regiment and to save those who can’t escape.

.....

Unlike the chaotic front of the venue, the console hidden behind the stage was not attacked by Iron Man Regiment, but the technicians here could not control the crazy Iron Man Regiment at all.

“What the hell is going on?! Why did my Iron Man Regiment fire on civilians?! Who authorized them?!” Justin Hammer, who rushed to the console, was roaring at his technicians.

“We can’t control the Iron Man Regiment, we are locked out by a remote system and we are now losing control of them!” Under Justin’s roar, the technical director can only report this bad news to him.

Boom!

“Why is this happening?!” With a fierce punch on the table, Justin was about to lose control of his emotions.

“The Iron Man Regiment’s system is not designed by us. Someone must have left a back door!” The technical supervisor is also very helpless. This is not something they have designed by themselves. If something goes wrong, they need to find the one who designed them.

Whistling!

“Justin! Hurry up and stop those drones!” Just as Justin was screaming at the technicians, Pepper finally arrived. As the CEO of Stark Industries, Pepper’s momentum is not weak at all.

“I can’t do it. I don’t even know how to stop them!” Faced with Pepper’s request, Justin shouted.

Bang!

Without much nonsense, Natasha had already pushed Justin's head on the table. "Not you? Who is the mastermind then?" The agent wanted efficiency, and Black Widow was not used to nonsense.

"Ivan! Ivan Vanke!" Being slammed on the table by Black Widow, Justin shouted.

"Ivan? He is still not dead? Where is he now?!" Natasha was a little surprised to hear Justin's answer, and then asked again.

Hammer Industrial Ninth Test Zone! He should be testing the new Iron Man Regiment there now!"

!

After 'politely' asking Ivan's location, Natasha directly threw Justin aside. "I am going to stop Ivan!" Saying this, Natasha has quickly left.

"As for you, wait till you go to prison." Paper, who had already called the police, said to Justin in a very aggressive manner.

"I am going to jail? Are you planning to blame this incident on me? Impossible, I didn't have anything to do with this!" Justin's face distorted into an ugly expression when he heard Pepper's word.

After a while, the police had come over, and Justin was taken away unwillingly. Although he threatened Pepper before he left, he had no confidence to carry out those threats.

"Daredevil, did you found Ivan?" Lin Rui had already notified Daredevil when Justin told Ivan's position, hoping that he would stop Ivan.

"Mirage Knight, it seems that we have a big problem!" On the other hand, Daredevil, who has found the ninth pilot area, looks at the empty laboratory and responds to Lin Rui with some worries. Dozens of new Iron Man Regiments were supposed to be stored here, but now they are all gone, along with Ivan Vanke.

"Damn it!" Hearing the news from Daredevil, Lin Rui really felt that he should have let Rhodes left with the Iron Man Armor, so Ivan would have been settled by Daredevil long ago.

So, sometimes when he wants to get involved in the plot, he gets tricked by the plot in the end and his actions come back to bite him in his ass. This is not a simple movie. It's a real world. Every world has its own power of rules. It's obvious that Lin Rui will pay a heavy price to shake such rules.

"Without Rhodes help, how is Tony supposed to deal with Ivan and his Iron Man Regiment?" The situation here at the Expo is about to stabilize, but Tony is still being chased by flying Iron Man Soldiers. Lin Rui had to find a way to help Tony, but the first thing he had to do was to put Pepper someplace safe.

"Miss Pepper, for your safety, hurry up and get out with everyone." Thinking about helping Tony, Lin Rui went to Pepper and said. Justin has been taken away and the Iron Man Regiment is chasing after Tony, Pepper is not useful for anyone by staying here.

"I will. Jackson, come with me. There's still danger here." With a promise, Pepper asked Jackson to leave with her.

"No, Miss Pepper. I'll go back and see if anyone else needs help. You can leave first." Seeing the bodyguard next to Pepper, Lin Rui laughed and waved his hand, and ran towards the venue.

"Jackson!" Watching Lin Rui run back into the venue, Pepper screamed worriedly behind. However, Lin Rui has quickly disappeared.

.....

!

Tonight New York's sky is very busy. More than a dozen Iron Man Drones are chasing after the real Iron Man at high speed in the sky. They also launch several attacks to add some visual effects from time to time. Tony, who dragged the drones out of the meeting, had been chased for a long time now, during this time, he killed several drones. But it's not enough. He can't cope with so many copies of Iron Man alone, at least not in the sky.

"JARVIS, look for an empty land battlefield, I want to keep these flies away from the crowd! Also, contact Mirage Knight and say that I need his help!" While doing various evasive maneuvers in the air, Tony shouted at JARVIS.

"Yes, sir! The land battlefield has been selected! Contacting Mr. Mirage Knight." Soon, J.A.R.V.I.S has already found Tony a free space away from the crowd, an ecological park.

"Ok! Let's do this!" Tony has rushed towards the position indicated by J.A.R.V.I.S. as the power under his foot ejector rises instantly.

.....

Buzz~

Lin Rui's cell phone just rang as he quickly rushed towards the venue. "Mr. Stark, do you need something?"

"Mirage Knight, I need your help now!" As soon as Lin Rui answered the phone, Tony shouted from the other end. Obviously the situation was not very good.

"I love to, Mr. Stark, where are you now?" Lin Rui, who was ready to help Tony, replied.

"I'm going to Green Eco-Park right away!"... Wow! That was close!" Tony, who was in the middle of a chase battle in the sky, quickly said an address.

"I see. I'll be right there!" Getting Tony's location, Lin Rui has hung up.

Bang!

Lin Rui jumped high with a hard step down to the ground. During the jump, the Phantom Suit has quickly enveloped him and Mirage Knight officially appeared.

Call ~

“Spiderman, where are you?” With the Phantom Suit on, Lin Rui called Spiderman on the team channel.

“Whoa! Aren’t you very good? Why can’t you move!? Ah! Mirage Knight, I’m here at the West Gate exit of the venue!” Hearing Lin Rui’s words, Peter, who was fighting with Iron Man Regiment, quickly answered him. Listening to his voice, he seemed very happy.

“I’ll be right there!” Getting Spiderman’s position, Lin Rui’s foot joined, they barely touched the ground and he flew out again.

Soon, Lin Rui found Spiderman, who was tying up the Iron Man Soldiers with spider silk. Although the silk was torn apart by them soon, Peter kept releasing cobwebs to stop them.

“Hey! Spiderman, don’t mind these big guys! Iron Man needs our help so leaves them to the police!” Seeing that the police outside had rushed in armed, Lin Rui shouted at Peter.

“Come on!” Kicking a drone with one foot, Peter flew to Lin Rui with a spider’s thread.

“Let’s Go! Iron Man is in the Green Eco Park, he needs our help!” Reaching out to Spiderman, Lin Rui said quickly.

“Ok!” Grabbing Lin Rui’s hand, Peter had already fired a spider’s silk toward the building.

~

In the next second, Spiderman had already rushed towards the Green Ecological Park with Mirage Knight.

## **Chapter 114**

Bang! Bang! Bang! Bang!

Tony, who was pursued by Iron Man Regiment, rushed into the Green Eco-Park and dozens of Iron Man drones behind him also rushed in.

Falling on an empty flat land, Tony watched silently as the emotionless machines surrounded him. Ivan does have some real talent, besides the Arc Reactor, these driverless Iron Man Regiments are really good. There is no emotion in them, they only know how to accept orders and then complete it, they are really a big killer on the battlefield. But this is the reason that Tony has not handed over his Iron Man Armor technology, in order to avoid such a situation. He doesn’t want it to happen because of himself.

Ivan! Do you think you can beat me with these toys? With the help of J.A.R.V.I.S., Tony scanned all the Iron Man Soldiers around him, and shouted, knowing that Ivan must be running the machines behind the scenes.

However, it is not known whether these Iron Man drones are equipped with voice systems or not or whether Ivan does not want to talk nonsense with Tony. After Tony shouted that, the Iron Man Soldiers, who surrounded him, raised their arms and the weapons that had been silent till now a hail of bullets in an instant.

Da Da Da Da~

Instantly, countless bullets had covered Tony's position. However, Tony, who had been prepared for it, jumped directly to avoid most of the bullets and then rushed into the Iron Man Soldiers group on one side.

Bang!

Two palm cannons bombarded two Iron Man Soldiers beside him. Tony also avoided the attacks on himself while flexibly starting his own counterattack. These mass-produced Iron Man Soldiers are significantly less defensive than Tony's Iron Man Armor and they do not have powerful weapons such as palm cannons. So when Tony rushed into the middle of them, the Iron Man Soldiers, who had the absolute advantage in terms of quantity could do nothing to Tony.

!

Just as Tony was fighting these Iron Man Soldiers with his high defense and powerful attacks, a missile suddenly emerged behind Iron Man, it was launched by an Iron Man Soldiers hiding on the edge of the battlefield.

Hum~

The powerful missile exploded at Tony's feet, and the power of the explosion directly surrounded Tony and the three nearby Iron Man Soldiers. That's the advantage of UAV. It doesn't care about the casualties of its companions.

Huh~

The power of the explosion has not yet been completely dissipated when several other Iron Man soldiers surrounding Iron Man have already deployed their missiles behind them to target the front. These Iron Man Soldiers are equipped with life detectors, so long as the explosive power and signs of life are detected, then there will be relentless missile bombardment.

Huh~

Finally, the power of the explosion gradually faded and there seemed to be some movement inside. It seems that Tony is not so easily defeated, but taking these many attacks is not so easy.

Kakaka~

The surrounding Iron Man Soldiers have all opened up their missile launching systems, capable of delivering lethal attacks at any time. At that moment, however, a few small bursts of fire came quickly from outside the encirclement and soon fell at the feet of the Iron Man Soldiers.

Dī dī~

Bang! Bang! Bang!

A second later, all the little things that fell at the feet of Iron Man Soldiers had exploded, and in an instant several gaps had been made in the enclosure.

Pop! At the same time, a number of white spider silk shot from outside the encircling ring and stuck to two Iron Man Soldiers, it then directly pulled the two Iron Man Soldiers causing them to collide together. Spiderman's power is not so simple. Peter is currently more powerful than Lin Rui.

After Spiderman's shot, Lin Rui also rushed out of the plants on the side. In his hands is the system Reward, Grade C weapon pseudo-Nine Layers Thunder Blade, Lin Rui has quickly rushed past the two Iron Man Soldiers. Only two flashes of purple light flashed, and the two Iron Man Soldiers did not move.

Plop~Plop~

A second later, the two Iron Man Soldiers slowly collapsed, and the red-shining steelhead rolled aside. Lin Rui cut off the heads of the two Iron Man Soldiers, which had never been possible before for him.

It took only a few seconds for the four Iron Man drones to be handled by Spiderman and Lin Rui from the start of the mini-bomb explosion. The Iron Man Soldiers, who aimed at Tony, had completely lost two of their companions and several others were injured before they could even respond. However, they will not remain so slow, and soon Lin Rui and Spiderman will be included in the target. Nearly ten Iron Man Soldiers have quickly pointed their weapons at Lin Rui and Spiderman.

Da da da!

"Tony!" Avoiding the bullets that were shot at him, Lin Rui shouted loudly. They came to support Iron Man, not to die! He just did that to look awesome, but he consumed a lot of his internal energy. Spiderman's strength is great, but in the face of these Iron Man drones, his fighting power and superhuman strength are useless.

"Wow!" On the other side, Spiderman is also quickly avoiding the attacks against himself. There aren't any tall trees in this park, so Peter's ability has been restricted as he cannot use his spider silk to maneuver himself and he can only fight with these big guys by his flexible body.

"Get down!" Just after Lin Rui shouted, Tony, who was still covered by smoke and dust, burst out and shouted.

Sii! Sii!

After hearing Tony's reminder, Lin Rui avoided the hail of bullets and went straight down. Spiderman behind him also went down obediently.

Buzz~

Seeing that both Mirage Knight and Spiderman were laying down, Tony released two high-intensity lasers from his arms and quickly rotated two laps around himself, cutting all the remaining Iron Man Soldiers into three segments.

Boom ~ bang~

The sparks flickered, and the Iron Man Soldiers were all scattered in pieces of scrap iron, and the threat was finally resolved.

Huh~

All of the enemies were taken care of and Lin Rui and Spiderman came to Tony. Even when Peter was wearing Spiderman's headgear, Lin Rui could feel the amazement in his eyes.

"Iron Man! That was a cool move just now!" Sure enough, Peter has begun to show his fan tendency.

"It is really cool, but this trick is too expensive on energy and it can only be used once." Hearing Spiderman's words, Tony unveiled his mask and said faintly. Then he raised his arms and two smoking small devices automatically jumped out of his Iron Man Armor hands.

"Mirage Knight, you got here quickly." Seeing Mirage Knight seems to be absent-minded, Tony smiled and greeted him.

"Actually, we already knew the Russian plan, so we were at the Expo just now, and the situation there is now under control." Lin Rui hasn't spoken yet, and Peter on the other side can't wait to answer Tony. Now that Tony knows Peter's identity, he's more casual.

"Why am I not surprised to hear that? Mirage Knight, what are you looking at?" Hearing Peter's words, Tony picked his eyebrows and said. Mirage Knight knows everything about S.H.I.E.L.D., so it's not surprising that he would know Ivan's plan. But the battle is over. Why does Mirage Knight still look like a big enemy is standing in front of him?

"Sir, thirty Iron Man Soldiers are coming towards your location at high speed." Just as Tony was ready to ask why Mirage Knight was doing this, J.A.R.V.I.S suddenly said something to him that made him stop.

"What? Come on!" Lin Rui and Peter also heard J.A.R.V.I.S's voice and the latter was exaggerated. As for Lin Rui, he was already expecting this result. The situation that Daredevil said had just happened to correspond with the present situation. However, the current situation is not easy to handle.

"Sure enough, Ivan still has his backup!" Hearing the reminder of J.A.R.V.I.S., Tony was quite clear. It was a little surprising, but it wasn't that surprising.

Seeing Tony's expression, Lin Rui was somewhat confused. Tony has spent a lot of energy in the battle just now. The sharpest laser weapon has been scrapped. How can he be so calm? This is not normal.

"Aren't you worried? We can't cope with the full 30 Iron Man Soldiers now, and there must be Ivan within them." In doubt, Lin Rui asked directly. He wanted to know where Tony's confidence came from.

"Because my support has arrived!" Reminded by J.A.R.V.I.S., Tony said with a slight tilt in his mouth.

!

Just as Lin Rui wondered what Tony's support was, the voice that represented Iron Man Soldiers' flight had reached their ears. However, except for the 30 Iron Man Soldiers led by Ivan ahead. Lin Rui was also keenly aware of a stir coming from behind them, and then Lin Rui, who turned around, knew what Tony was talking about as support.

~

On the top of the park, opposite to the 30 Iron Man Soldiers led by Ivan, dozens of Iron Man Armor belonging to Tony are rushing over here.

Bang! Bang! Bang!

The next moment, the two opposing sides have already fired at each other.

“Really a rich tycoon!!” Looking at this scene at the top of the head, Lin Rui can only say this silently in his heart.

.....

## **Chapter 115**

Bang! Bang! Bang!

Over the Garden, dozens of Iron Man Armors and dozens of Drone soldiers battled each other. From time to time, Drone Iron Man Soldiers were bombed and dropped in the bombardment of bullets, missiles, and lasers. Although Tony’s Iron Man Armors are small in number, their attacks and defense are stronger than those Drone Iron Man Soldiers, so Lin Rui doesn’t have to worry about being besieged again.

“That’s what I call support.” Tony laughed and said when he saw his Iron Man Legion in action.

If even Ivan can make an unmanned Iron Man Regiment, how could Tony not? With the help of J.A.R.V.I.S, Tony’s Iron Man Armors are fully autonomous. This is one of the reasons why he is unwilling to publish the technology of the Iron Man Armor, he won’t hand over things that are so dangerous.

“Wow! This is really...cool!” Looking up at the robotic battle like the science fiction movie above, Peter was shocked and didn’t know what to say.

“Now we don’t have to worry about these Drone Iron Man Soldiers, but what about Ivan? Is he hiding behind the scenes?” Tony’s Iron Man army unexpectedly surprised Lin Rui, but Ivan did not appear.

Buzz!

While Lin Rui was wondering, Peter’s spider senses detected something.

“Be careful!!” With a loud cry, Peter had rushed towards Lin Rui who was standing opposite to him.

A blue sparkling whip swept past Lin Rui’s position and instantly rushed towards Tony, who had not yet had time to escape.

Crack!

The whip drew on Tony’s chest constantly releasing high-intensity current, and Tony, who wanted to pull the whip, had already flown straight out. The Iron Man Armor that had just blocked countless bullets and a missile explosion was directly pushed back by the whip. Ivan’s improved electric whip was even more powerful.

Bang ~ Bang ~

A whip hit Tony, and Ivan, wearing an enhanced Iron Man Soldiers armor, walked out. His armor is obviously different from those of remote-controlled drones. This armor can be equipped with people

and it also looks even more powerful than the drones. The two electric whips held by Ivan's armored hand seems to be even more lethal.

"It seems that the Insight Technique doesn't seem to work that well. Thank you, Spiderman!" Rising from the ground, Lin Rui felt a little sad. Peter's spider-sense is more like a sixth sense, which triggers automatically. Lin Rui's Insight Technique needs to be sensed by himself, so sometimes it's unavoidable to miss out on some details which can be life-threatening.

"Will Mr. Stark be all right?" At the moment of danger, Peter had to choose to save only one person and Mirage Knight who was without the protection of any type of armor was obviously his first choice. But Peter was worried to see Tony being hit.

"He should be fine, but this guy is still a problem." Tony certainly won't be defeated so easily, his Iron Man Armor is not so weak.

Sure enough, after Lin Rui finished speaking, Tony, who had just been flown back forcefully, flew back. The striking black whip mark on his chest did not cause him much harm.

"Ivan! You finally reveled yourself!" Falling in front of Ivan, Tony said in a low voice.

"Tony Stark, of course, the pain my family has suffered requires me to personally return it to you!" In the face of Tony, who is still living well, Ivan's heart has been completely filled with hatred.

With a violent swing his armored arm, two long electric whips were already pulling toward Tony.

"Ohh, Come and do your worse!" After nimbly dodging the electric whips, Tony started to taunt Ivan, he then reached out and straightened his hand to the other side to tie the whip.

"Ha! Caught you!" Holding the electric whip tightly, Tony instantly tried to snatch Ivan's whip.

Hummm~

However, Tony apparently forgot what Ivan had said on the phone before, that he had accepted Tony's suggestion to double the power of the Arc Reactor. So Tony, who wanted to rip out the whip, feels wrong as soon as he started, Ivan's Armor is much more powerful than his.

So, it came as no surprise that Tony was directly flung forward by the whip and quickly fell in front of Ivan. A missile has emerged behind Ivan's Armor, targeting Tony.

"Oh! This is not good. J.A.R.V.I.S, increase the output power of the propeller!" Tony shouted at J.A.R.V.I.S. as he was pulled forward towards Ivan by his whip.

"Yes, sir."

The next moment, Tony's armored feet suddenly turned pale blue and the propulsion system turned on, stabilizing Tony in mid-air. Tony, who couldn't get rid of the whip for a moment, saw that the missile behind Ivan had been fired, and two sets of miniature tracker bombs were rapidly emerging from the shoulders of the Iron Man Armor.

Bang!

Rumble!

A violent explosion erupted between Tony and Ivan and two Iron Mans, originally tied together by the whip, were shot off in the distance by the blast wave of the explosion. Because Tony was trapped in mid-air just before the explosion, he was hit by the blast wave and fell to the ground. As for Ivan, because his own Armor was thicker, he just released his whip and retreated a few steps in the explosion.

“Tony! You die today!” The ejector under his armored feet spewed flames and Ivan shouted to Tony through the steel mask.

Puff!

But just as Ivan was waving his whip in mid-air, a white spider silk thread shot him from behind.

“Hey! Did you forget about me?” An arrogant remark suddenly came from behind Ivan and Peter pulled the spider’s silk thread instantly.

Under the power of Peter’s full force, Ivan, who was flying in the air, was pulled down. Peter started rotating Ivan around himself and then threw him into the bushes beside him.

“Good job! Spiderman! But next time, can you throw him somewhere else, its a pity that these flowers and plants had to die for someone like him.” Lin Rui, standing with his blade in his hand, saw Peter shouting with joy and did not forget to make fun of him.

“You... Bastard!”

Ivan did crush a lot of flowers and plants when he hit the plant bush, but he quickly increased the power of the ejector and flew back. He was so close to killing Tony and then these guys showed up and denied him the opportunity just now.

However, just as Ivan rushed into the air and roared, another shadow came in front of his eyes, and within a moment, he saw a blade light coming towards him. The blade’s attributes and sharpness were added by the power of thunder and lightning, which Lin Rui used to cut that Iron Man Drone before.

Boom!

Ivan’s eyes in mid-air were filled with the brilliant purple blade light and he subconsciously raised his hands to block it.

Bang!

The next moment, Ivan’s armored arm was hit by a burst of blade light and the huge impact sent him flying out again. Nevertheless, Ivan’s Armor is obviously much more defensive than the Iron Man Drone which Lin Rui had cut before. Lin Rui’s blade light only left a deep hole in his arm with sparks splashing in it.

“What a tough tinplate!” His powerful attack only left a deep mark in the Armor, which obviously did not satisfy Lin Rui.

Just as Lin Rui sighed, a whip suddenly came from the direction Ivan had just flown out, and its target was Lin Rui.

Without evading, Lin Rui slashed the whip directly with his thunder blade. He wanted to see whose weapon and the technology was better.

Crack!

The whip was twisted twice on Lin Rui's thunder blade. The electricity on the whip jumped in front of Lin Rui's eyes, but it could not really hurt him.

Buzz~

"Humm? This feeling? Is this charging?!" Standing still on his feet, Lin Rui felt suddenly that the thunder blade in his hand seemed to be absorbing the energy of the electric whip.

Puff Pop!!

While Lin Rui was holding down Ivan's whip, Tony had rushed back and fired a shuttle of bullets at Ivan, but to the armored Ivan, these powerful attacks were no different than an itch.

"J.A.R.V.I.S, charge the palm cannon!" Tony had to use his palm cannon because his ordinary weapons had run out or failed.

Raising his arm towards Ivan. Tony's palm shines more and more strongly. However, just as Tony fired his palm cannon, a whip rolled upon his arm.

Boom!

The palm cannon was directly deflected and flew towards another direction, creating a huge scar in the already destroyed park.

"Tony! You can't beat me!" Holding Lin Rui in one hand and Tony in the other, Ivan began to rapidly increase the energy load on the whip.

Buzz~

Crack!

From left to right, Lin Rui's thunder blade and Tony's Iron Man Armor sparked with electricity. Tony's armor has been badly damaged by the instantaneous boost of energy, and if it goes on like this, it's really going to be scrapped. However, Lin Rui's eyes are getting brighter and brighter even though there is a splash of electro-optic light on his side.

.....

## **Chapter 116 One Blade**

"Hey! Did you really forget about me?!" Two spiders threads slammed into Ivan's armor arm and Spiderman screamed as he tugged at them behind him.

Kakaka!

Just when Peter wanted to throw Ivan out again, Ivan's Armored foot deformed rapidly and the split structure inserted itself firmly into the ground and fixed itself in place. In this way, even if Spiderman's strength is greater, he can't pull a knot of iron that is connected with the earth.

“You can’t stop me with this little spider!” While being rooted on the ground, the electric whips of Ivan’s hand are exploding again.

Crack!

“If any of you guys have an idea, do it quickly! I would not mind some help at all!” The defense of the Iron Man Armor was consumed a little bit and he could not help but shout loudly. He managed to find an alternative element without dying, but after all that, will he be killed here by a mad man?

Boom!

“Mr. Stark, this guy is hiding in his Armor. I can’t deal with him!” Launching himself out like a slingshot and kicking Ivan, Peter felt the numbness in his legs and shouted at Tony.

People like Iron Man, who is protected by an armored suit are really hard for Spiderman, a hero who is proficient in close combat and flexibility. After all, his power is not enough to punch through the defense of an Iron Man Armor.

“Then think of something else!”

“Dī dī~Iron Man Armor defense dropped to 17%.”

Buzz~

“Hunn? What’s going on?!” Just as Tony was almost unable to keep going, Ivan, who was constantly accelerating the output power, suddenly found something wrong.

The energy output, which was supposed to be under his control, was suddenly disrupted. The Arc Reactor, which was functioning normally at first, suddenly seemed to be stimulated by something. Suddenly, powerful energy burst out and rushed to the electric whip on Ivan’s left hand through his Armored battle suit.

Buzz~

Suddenly uncontrolled energy leakage prevented Ivan from continuing to lock Tony, and all the power of the electric whip connecting the right hand was transferred to the left hand as if it had been attracted by something.

The energy on his whip suddenly disappeared and Tony recovered his mobility, but at this time his armor was already scared.

Crack!

On the opposite side of Tony, Ivan used his other whip to lock on Lin Rui’s blade. At this time, he has been completely covered by a burst of electro-energy and no one can see what is happening inside.

“What happened?! Mirage Knight seems to have absorbed all of that energy!” Tony was all right, so Peter jumped up in front of him and shouted. It’s better to ask a professional like Tony about this kind of stuff, but now it seems that this situation is not in a normal category.

“That’s the energy of Arc Reactor, he is absorbing the energy of Arc Reactor! How is he doing that?!” Like Peter, Tony is also surprised. Does Mirage Knight have any high-grade technology for absorbing the energy of an Arc Reactor?

“This is impossible!” Meanwhile, Ivan, hiding in his Armored suit, feels more intuitively about his current situation. The Arc Reactor’s energy is dropping at a rate of 1 percent per second, leaving less than 20 percent. And he couldn’t get the whip back at all.

Boom!

Just as Ivan’s Arc Reactor energy dropped to 10 percent, there was a sudden tremor at the end of the whip that was pulling him. Then the dead whip, which had just been pulled, suddenly loosened and fell directly to the ground.

Boom!

Then, the innumerable electric-energy surrounding Lin Rui burst out like a firework in all directions. Nevertheless, the arcs that exploded out did not escape too far and contracted back again in the next second. Just for a moment, the dazzling light disappeared and suddenly the bright garden, which had been illuminated by the light, was dimmed. And in the place where the light had initially burst and disappeared, a man stood there silently, holding a long blade with a light purple ray in his hand.

Hoo!

Closed eyes burst open and a purple light flashed through Lin Rui’s eyes. Holding the thunder blade, he raised his right hand slowly and then instantly waved it down!

Rub!

It’s like a violet thunder struck this garden. The flash of thunder has penetrated Ivan, who is still standing there.

After returning the blade to its sheath, Lin Rui, standing in the field, slowly closed his eyes and then opened them again. This time, his eyes did not have a strange purple light in them.

“Huh! This feeling...” With a long breath, Lin Rui did not know how to describe what he had just experienced. Shaking his head, Lin Rui had already pulled up his legs and walked towards Tony and Peter without looking at Ivan opposite to him.

“Mirage Knight! What happened just now? What happened to the big guy over there?!” Seeing Mirage Knight coming, Peter asked in a hurry. He and Tony saw the flash of thunder just now, but they thought it was just the light leaked from the previous electric whips. They didn’t even know it was the blade light that Lin Rui wielded.

“Nothing, that is...”

Kakaka!

Just as Lin Rui was about to explain, Ivan’s Armored battle suit, which was fixed on the ground behind it, suddenly made a mechanical cracking sound, drawing Peter and Tony’s eyes to it.

Kakaka!

Boom!

In front of Spiderman and Iron Man, Ivan's Armored Suit was cut from the middle, and large cracks began to appear on the head of the armor and quickly spread to below. Soon, the whole Armored battle suit broke directly into pieces from the middle, and fell to the ground and became a pile of scrap iron.

As for Ivan inside, he also fell out of his Armored battle suit, but he seemed to have died some time. His eyes were staring at the sky of the park, where the drones were still fighting with Tony's Iron Man Corps.

"Is he dead?" When he got to Ivan's side, Peter muttered something he couldn't believe.

"Yes, he is dead." Tony looked at Ivan on the ground with a complicated look and answered as J.A.R.V.I.S. could not detect any signs of Ivan's life.

"Mirage Knight, how on earth did you do that?" Instead of looking at the man on the ground who was intent on killing himself, Tony turned to Lin Rui behind him.

Originally Tony's assessment of Mirage Knight's strength has been quite high, exceeding the power of the usual number of times, super high agility and speed, melee skills and some other abilities. Tony has been doing a careful test of Lin Rui's strength, but today Lin Rui's attack scared Tony. If the strength of the previously judged Mirage Knight does not pose a big threat to Tony's new Iron Man Armor, he is now fully capable of threatening Tony.

"It's just an accident. You can see it as an accidental explosion. It would be very hard to do it again." Lin Rui seemed to have guessed Tony's worries and explained in a plain tone.

In fact, what Lin Rui said is quite true. In the battle just now, Lin Rui suddenly found that the thunder blade can absorb the energy on Ivan's whip and it can be used by himself to a certain extent, so the last scene happened. But in the future, Lin Rui can't always take an Arc Reactor with him every time to let the blade absorb enough energy to fight, and that blade attack just now consumed almost all the internal energy in Lin Rui body, which is not a good phenomenon.

"Really? It's like every hero's killer's move when a crisis breaks out. This is Mirage Knight's ace killer's move! It's so cool!" After listening to Lin Rui's explanation, Peter said aloud. He must be thinking now that he also wants a powerful killer's move.

"Accidental Explosion? It's really a very powerful explosion." Lin Rui doesn't know if Tony believed his word but he still nodded casually.

Boom!

Rumble~

Just after the battle in the garden was over, the battle between the unmanned Drone Iron Man Regiment and the unmanned Iron Man above them was over. More advanced with advanced weaponry and more defensive Iron Man Corps still occupied the top position, turning Ivan's unmanned Iron Man Regiment into fireworks in mid-air.

Dī dī drops!

Just as Tony was completely relieved, the Iron Man Drones who had fallen into the garden suddenly sounded with a countdown to something. And the Arc Reactor on their chest turned red, flashing constantly.

“Not good, Ivan set them up with a self-destruct program!” Seeing the changes in Iron Man Soldiers, Tony suddenly yelled with a big change in his expression.

“You guys need to leave! I am going to find Pepper!” Saying this to Peter and Lin Rui, Tony has flown up to save Pepper.

Bang-bang~

After Tony flew away, two Iron Man Armor fell from above, just in front of Spiderman and Lin Rui. Kakaka~Then the two Iron Man Armors quickly opened and waited for Peter and Lin Rui to enter. It seemed Tony had arranged for them.

“Spiderman, would you like to be Iron Man?” Lin Rui asked as he smiled as he looked at the open Iron Man Armor.

“Hell Yeah!”

A few seconds later, two Iron Man Armor rose from the garden and flew away with the rest of the Iron Man Armors in mid-air.

Boom! Boom! Boom! Shortly after Lin Rui and Peter flew away, there were successive explosions in the garden below.

“Yeah! ~” Peter, who was driving his first Iron Man Armor, screamed excitedly in the sky.

.....

## **Chapter 117 Follow-Up**

“I’m honored to be here today to present the Outstanding Contribution Award to Mr. Tony Stark. There is no doubt that Mr. Tony Stark is the national treasure of our country...” On the third day after the Hammer Industrial Expo, the award ceremony for Tony Stark was broadcast live on television. And the guest of honor was the congressman who had upset Tony at the hearing before. Everyone can almost feel the congressman’s irritation through the TV screen.

Switch~

“Now that Tony has fulfilled his wish, without the threat of Palladium Poisoning and even Ivan has been killed, which will relieve the pressure on him put by the Congressional side a lot.” Throwing the remote aside, Lin Rui watched Tony on the TV and whispered.

The emergence of Ivan taught the United States that the technology at the level of Iron Man Armor was not unique to Tony Stark alone and that Iron Man Regiment of Hammer Industries was an attempt, but the result was a resounding slap on their faces. Ivan’s terror also made the U.S. military and Congress aware of the dangers of the technology, and the reason why Tony has been keeping it a secret.

"I just don't know what the relationship between S.H.I.E.L.D. and Tony will be like now. What I said to Tony before should not make him very fond of S.H.I.E.L.D., but it's not clear what other things Nick will do to attract Tony to join the Avengers. Besides, that old legend should be making his appearance soon." The live broadcast on television was drawing to a close as the congressman was hypocritically pinning the Medal of Honor on Tony and Lin Rui was thinking about the next thing.

"Nevertheless, the close surveillance of Tony by S.H.I.E.L.D. should have been abolished. Maybe I should see Tony again, as Mirage Knight." Considering the last mutual aid agreement with Tony, Lin Rui felt it was necessary for Tony to live up to his promises. The Guardian Base urgently needs some high-tech items and their equipment needs to be updated.

That's right, it's the Guardian Base. After helping Tony solve the problem named Ivan, Peter suggested that their team needed a name and Daredevil and Jack felt the same way. Therefore, they discussed the name of such a simple and clear team. Although there are only four guardians now, Lin Rui believes that the name 'Guardian' will be heard throughout the world in the future.

"Also, my trip to New Mexico is about to start soon. I don't want to miss that good show." The Live TV broadcast is over and Lin Rui's eyes have long since ceased to focus on Tony. He is now holding a small book in his hand, recording something about his next trip and some things that need attention.

"At Peter's side, the gene serum seems to be progressing smoothly, maybe it can be successfully produced before Harry gets sick." Writing another thing in the book. Lin Rui felt that he had a lot to worry about.

"OK! That's it! First I need to find Tony to get those negotiated supplies, and then set off for New Mexico. I hope there's nothing wrong here when I'm not in New York, but with Spiderman, Daredevil and Tony here, even if anything happens, it can be easily resolved." Lin Rui has already planned his next trip with two rows of small letters underlined on his notebook.

.....

Tony's Seaside Villa, Tony, who had finished the award ceremony, threw the medal aside and went into his basement again. Tony has other things to study besides the new element.

"J.A.R.V.I.S., did you have a complete analysis of Peter?" Standing on the workbench, pointing to the display screen, Tony asked without raising his head.

"Sir, the results of the analysis have come out." J.A.R.V.I.S quickly responded and projected the results in front of Tony.

Blip~

A huge translucent light curtain appeared in front of Tony in an instant. On the left side of the light curtain, a 3D structure of the human body was displayed. There were some basic data on it, such as height, weight, skin color, and hair color. On the right side of the light curtain, some detailed analysis results corresponding to the structure of the human body on the left side were displayed, such as muscle strength and bone density, were presented. It also has very detailed data such as blood pressure, cardiopulmonary load, etc. Obviously, this is Spiderman's body data.

“Wow! It seems that our little friend is really amazing!” Looking closely at the results displayed by J.A.R.V.I.S., Tony sighed. Although Peter isn’t the strongest, his physical fitness has long since surpassed the category of normal human beings.

“What is it that makes such a big difference to a person? Is he a Mutant?” Looking at the data in front of him, Tony is guessing why Peter has become so strong.

“Sir, there is no blood sample from Spiderman, so I can’t tell where this power comes from,” J.A.R.V.I.S answered Tony’s question with due diligence, although Tony didn’t expect him to answer.

The reason why J.A.R.V.I.S can get such detailed physical data from Spiderman is actually because of the battle three days ago. After defeating Ivan, Lin Rui and Peter wore Tony’s Iron Man Armor in order to get out of the battlefield as soon as possible. It was at that time that J.A.R.V.I.S collected Peter’s body data.

As for Lin Rui, who was also wearing the Iron Man Armor, J.A.R.V.I.S. was not able to scan any data and could not even recognize the basic facial images, which disappointed Tony for the time. As far as the reason is concerned, it’s because of Lin Rui’s Phantom Suit, which has the function of hiding his tracks. It’s normal that J.A.R.V.I.S. can’t scan anything. If Lin Rui knew that Tony had such a plan for them after telling them to wear the Iron Man Armor at that time, he didn’t know what he would think, but it would certainly not be very comfortable.

“I will ask for a blood sample from Peter when I have the chance in the future, I have to know how he became like this. So, is this data enough for now?” With a wave of his hand, Tony went on to ask, as if he had great use for the data.

“Enough, sir.”

“Then start making it, just follow the model I designed before.” Tony nodded and went on to say.

“Yes, sir. Does this need to be added to the private terminal?” With a word of consent, J.A.R.V.I.S finally asked another question.

“Of course, I don’t want S.H.I.E.L.D. to bother him.” Hearing J.A.R.V.I.S., Tony said seriously.

Some of his secretive research is locked in his personal secret terminal, such as the design and development of Iron Man Armor, the search for new elements, and the new Spiderman suit he is now designing and manufacturing for Peter. Especially when Tony knew that there were secret organizations like S.H.I.E.L.D. in the world, he protected his research more closely, guaranteeing that no one could find them except him, unless someone could break through J.A.R.V.I.S.’s defense. But Tony has 100% confidence in J.A.R.V.I.S.

“The design of the new spider suit has been included in the personal terminal, and it is being made today.” Soon, J.A.R.V.I.S. had carried out Tony’s instructions perfectly.

“OK! Now let’s move on to see what secrets are in this new element for us to discover. He has done his work for Spiderman and Tony is ready to move on to the new element.

Dī dī~

Just then, the computer prompted Tony to have an unknown call.

“Should I connect, Sir?”

“Well.” Tony didn’t know why there was always an unknown number hitting him lately, but it was important each time.

“Hello! Mr. Stark.” Soon, the voice of Lin Rui came from the phone. “I am coming to talk to you about our previous agreement.”

.....

## **Chapter 118 Travel Preparation**

“So, you won’t show up in a while?” In Tony’s lab basement, he’s talking to Mirage Knight on the phone.

“Well, you can call it self-cultivation, or a retreat. Anyway, I’ll disappear for a while. I won’t show up.”

Lin Rui at the other end of the phone explained simply. He can’t tell Tony that he’s leaving New York. After all, many people know that he’s leaving New York himself. And when he goes to New Mexico, he has to ask Tony to help him. Tony can’t doubt that.

“Retreat? Like the one on TV in that country in the East that’s been shut down for years?” Tony had apparently watched some old drama, so he asked.

“Well, you can think so, but I won’t be gone for years, at most a month.” Several black lines appeared on his head when he heard Tony’s words. He’s just going to New Mexico to meet the guy who fell out of the sky, and by the way, to see alien civilization or something. If you have the chance to see that, would you do something else? And a month should be enough to do all that.

“Ok, it seems like you won’t be coming back with more power, going only for a month,” Tony said in a teasing voice and Lin Rui didn’t know if he took the years training talk seriously.

“Well, I will try my best to improve my strength. Next time, I’ll try to disappear for a year. So it’s up to you to help keep New York safe while I’m away from New York. As you said, somebody has to stand up and take on these responsibilities.” Lin Rui carefully explained.

“You don’t have to say it, this is my responsibility.” Even if Lin Rui doesn’t say, Tony will protect New York.

“Well, I’ll see you when I’m done, and I’ll ask Spiderman to come to you and get those devices. Good-bye, Mr. Stark.” With that last word, Lin Rui threw his disposable mobile phone into the garbage can beside him. He’s now on his way to the New York City Library. To go to New Mexico, he will need to make the necessary preparations, although he’s ready to ask Tony for help.

“Goodbye, Mirage Knight.” The phone has been hung up over there as Tony added faintly, “Ha-ha-cultivating, he’s a really funny guy.”

.....

“Jackson, what did you say just now?” It seemed that he had heard something wrong, Tony put down a small electronic instrument in his hand and looked at Lin Rui standing behind the test bench.

After coming out of the New York City Library, Lin Rui came directly to Tony. One part of his plan to go to New Mexico is very important, and Tony's help is needed to get there. Of course, it's up to Lin Rui to fool Tony into helping.

"Mr. Stark, you're not mistaken. I've been interested in astronomy recently. I think you can introduce me to an astronomer who can teach me during the holidays. I think Mr. Stark should be able to do that." Lin Rui remembers Tony's promise to himself after he helped Tony cure his Palladium Poisoning, he saved Tony's life. So Lin Rui came directly to him and asked for it.

"Astronomy?! Jackson, I wouldn't be surprised if you said you were interested in physics, chemistry, biology, mathematics, even art, but why astronomy?" Putting down the electric equipment, Tony asked, looking carefully at the young man in front of him.

In Tony's opinion, Jackson is a very talented young man who can achieve great success in every aspect of science. But astronomy, did he discover a way where more stars would change their lives?

"Mr. Stark, people's interests depend on their feelings. Maybe now I like astronomy, and after a while, I may come to like artificial intelligence? Like J.A.R.V.I.S." Hearing Tony's words, Lin Rui said with a smile.

These are of course only his excuses. Such a dull science of astronomy is not really Lin Rui's dish, but he has to make enough preparations for his trip to New Mexico. At the New York Library, Lin Rui purposely exchanged a memory capsule to help him learn about astronomy, especially Dr. Erik Selvig's books.

"If that's true, I really hope you become interested in AI? Maybe I can teach you myself, J.A.R.V.I.S. is now the pinnacle of Artificial Intelligence technology." Seeing Lin Rui say so, Tony smiled and said.

"So Mr. Stark is willing to help me? I've already inquired about a doctor of astronomy who just did some experiments in Mexico during this vacation, and I want to take advantage of this vacation to go out and have a look. So I would appreciate it if Mr. Stark can introduce me. This Doctor of Astronomy seems to be Erik Selvig." Seeing Tony's expression, Lin Rui knows it's almost done, so he directly shows where he wants to go.

"You've even found a candidate. How can I not help? Well, I'll see if any of my friends can find this doctor of astronomy. If he doesn't mind having more interns, I'll introduce you to him." Lin Rui has already said that. Tony will certainly not refuse it anymore. It's just a recommendation. It's too insignificant for Tony.

"Then I will wait for the good news!" Appropriately show some excitement, Lin Rui said happily.

"Well, did you come here just for this?" Now that Lin Rui's story is over, Tony picks up the electronic device on the test bench again.

"Well, after all, I only have to find Mr. Stark for help." Of course, Lin Rui can also find Harry. But Harry is still young and he may not necessarily have Tony's connections.

"That's good, you'll stay here today and help me with the experiment. I'll do you a favor. You can't just say thanks from your mouth and leave." Out of the test bench, Tony handed Lin Rui the electronic instrument in his hand and said lightly.

Lin Rui: "... Did I save your life?

"Sure, no problem." Although he is cursing Tony from the bottom of his heart, Lin Rui still takes over the electronic instruments handed down by Tony.

.....

Two days later, Lin Rui, who was preparing for a trip at home, received a call from Tony. "I've helped you get it done. A professor of astronomy named Haimer wrote you a letter of recommendation to be an intern assistant next to Dr. Erik. I've asked Happy to send you the letter of recommendation. It will be there."

Ding Dong~

Just as Tony finished that sentence, Lin Rui heard the doorbell ring. It seemed that Happy had arrived.

"Mr. Stark, how did you get Professor Heimer to write a letter of recommendation for a student he has never met before?" As he walked down the stairs, Lin Rui asked curiously. Usually, those with the title of professor has a high status in terms of learning and knowledge and they won't accept any student casually no matter how much of a genius he or she is.

"It's nothing. It's just that Professor Heimer's latest research project is short of funds. And you know, I'm most helpful." Hearing Lin Rui's words, Tony said indifferently on the other end of the phone.

"The methods of local tycoons are really simple and effective" Lin Rui couldn't help but think of it in his heart.

Creak~

"Hey! Thank you, Happy." Opening the door, Lin Rui saw Hapi standing at the door with a simple envelope in his hand.

"This is for you." Passing the letter of recommendation to Lin Rui without any expression on his face, Happy didn't want to talk more to the young man in front of him. He dared to make fun of his name, which Happy will remember all his life.

"As indifferent as ever!" Taking the envelope and watching Happy turn away, Lin Rui's mouth warped as he muttered.

"Jackson, now that you have gotten your letter of recommendation, are you going to leave? Maybe I can give you another car. Your Jeep may fall apart before it's halfway through." Lin Rui's phone is still hanging up and Tony's voice comes back.

When he heard Tony's words, Lin Rui just cocked his mouth and groaned: "Mr. Stark, although driving from New York to New Mexico is a good road trip. But you have to consider my reality. How can I drive there?

"Then what are you going to do?" Tony always thought that Lin Rui was the kind of person who liked to drive alone and enjoy the beautiful highway scenery and then arrive at his destination.

"Of course...I am gonna take a plane!" Lin Rui rolled his eyes and his tone was helpless.

"Oh, the plane! But is it fast enough to fly? Would you like me to lend you an Iron Man Armor?"

“Really?”

“Of course... not. New York City has just had an Iron Man Regiment fight. How can I let you drive an Iron Man Armor from New York to New Mexico? It will be hit before it even touched down.” Apparently Tony heard Lin Rui’s sarcasm, so he hit back in an instant.

“OK! Mr. Stark, you won!”

“So, I wish you a happy internship holiday.” Taking advantage of the win situation seemed to make Tony happy. After blessing Lin Rui, he hung up the phone.

“Mexico, God Of Thunder, the Hammer of God Of Thunder, Asgard, Here I come!” After Tony hung up the phone, Lin Rui excitedly squeezed his fist.

## **Chapter 119 Arriving In New Maxico**

Huh~

A day later, the plane from New York slowly landed at the airport in New Mexico, where Lin Rui was. Half an hour later, Lin Rui, carrying a suitcase and a large backpack, came out of the airport alone. Although he was just going to come and see the events, he didn’t know exactly when it happened, so he took all of his things and necessity for a month.

“Ah! It’s a totally different feeling!” Putting the suitcase aside, Lin Rui stretched out his arms and carefully felt the hot air in New Mexico.

Lin Rui has never left New York in the past 16 years and the only time he left was when he went to Monaco. Monaco is the second smallest country in the world, rich and beautiful, but things are different here in New Mexico. The degree of development and environment, as well as the humanities, are very different from New York which gives Lin Rui a lot of novelty. After getting off the plane, Lin Rui felt that it would be nice if he traveled alone more often.

Hū ~

Just as Lin Rui stood outside the airport enjoying the unique atmosphere of New Mexico, an SUV suddenly stopped in front of Lin Rui. Glancing at the sign in front of the car, Lin Rui already knew who was in the car.

“Mr. Jackson Lin?” Just as Lin Rui retracted his arms, a man in New Mexican style cowboy clothing came down from the SUV and asked Lin Rui loudly.

After a brief look at the man in cowboy style cloths, Lin Rui smiled and said, “Hello, I’m Jackson. Are you Kaecilius?” With that, Lin Rui generously extended his hand.

“Hello, I am Kaecilius. Welcome to New Mexico. I’m here to pick you up.” The cowboy named Kaecilius shook Lin Rui’s hand forcefully and said aloud.

“Thank you.” Quietly pulling back his hand, Lin Rui continued to smile. Lin Rui actually likes the cowboy culture in the west. This time, he wanted to contact more local people and know more about the cowboy culture by “studying” astronomy.

“Get on, I’ll take you to the hotel first.” Seeing Lin Rui taking back his hand, Kaecilius blinked and helped Lin Rui pick up the suitcase on the ground.

“Okay, sorry for the trouble.” With a promise, Lin Rui has already boarded the SUV consciously.

Lin Rui’s trip to New Mexico is only clearer because of Tony and the person who came to pick him up was also arranged by Tony. However, from the cowboy’s attitude, maybe Tony just wanted Lin Rui to suffer a little bit. However, Lin Rui would not mind such a trifle. He’ll be with Dr. Erik all the time, and the cowboy won’t be with him all the time.

Boom!

Forcibly closing the side door, Kaecilius returned to the driver’s seat and quickly carried Lin Rui into the desert.

.....

On the edge of a desert in New Mexico, there is a small town.

“Jane, I really don’t understand why you have to come here. You can’t keep doing this, you’re an astrophysicist, not some storm chaser.” Erik Selvig, in a home full of homemade instruments, was reluctantly speaking to his proud student.

Jane Foster is a beautiful woman who studies astrophysics. Jane has been searching for the atmospheric occurrence that has led her to the desert of New Mexico since she observed a strange phenomenon of celestial bodies a few months ago. Although Erik, her mentor, and friend, did not find her discovery valuable, Jane Foster was not a person who would easily give up her point of view, and she had always believed that there must be something hidden in that magical light.

“Erik, you have to believe me, I’m telling you, there’s a connection between these atmospheric disturbances and my research. Every change will have atmospheric fluctuation. I have been observing them for a few months. The next celestial change should be in a few days. After that, I must detect the fluctuations at close range this time.” While tidying up the messy table, Jane also wanted to convince Erik to believe in her research and judgment.

“Well, I won’t persuade you anymore. If you want to continue your research, just continue it. But in the next few days, we need to converge a little. We’re going to have a new intern here. He’s my intern.” Knowing how stubborn his friend is, Erik no longer wants to persuade her but he reminds her that he doesn’t want Jane to mislead the new intern anymore.

“New intern? Who will want to be interned in the desert of New Mexico during holidays?” Hearing Erik’s words, Jane put down the document in her hand and asked curiously.

“Yes, I also want to know which fool would choose this place to begin his internship. And are there still people interested in astronomy now?” Just after Jane asked, the voice of a young girl came from outside the house.

Then a young woman slowly came in with a box full of documents. She obviously doesn’t understand why someone would apply for an internship on their own initiative. She would not have been Jane’s

assistant if it hadn't been for credits. This is Darcy Luis, Jane's assistant. She's not an astronomy major at all. She's just helping out to solve her problems with credits.

"Maybe he did it for credit, too? However, we only offer so many credits for this subject, and many interns can not get extra credits." Jane made a joke at Darcy and then denied his guess.

"Whether he is a fool or not doesn't matter, I received a recommendation for him from Professor Haimer before agreeing for the internship. Maybe he's a student who is interested in astronomy. I don't want you to take him everywhere to chase your nihilistic signals." Erik doesn't care why this student would want to come here and choose this location to be interned, but it's always good to have another person with them.

"Professor Haimer's recommendation? It looks like he is a guy with a big background! Now I'm more sure he's out of his mind." Darcy said excitedly when she heard Erik's words, putting the box filled with papers on the ground beside him.

Although Darcy is not an astronomy major, she knows Professor Haimer. A student who could be recommended by such a professor was coming here instead of going to the comfortable and meaningful research team, he is coming to New Mexico to study astronomy in the bird-fed desert. Darcy was quite sure that this fellow had an abnormal brain.

"Although I'm sure I have a good mind, I don't know if it's polite to say that behind someone's back." Just after Darcy had said that, A young man's voice suddenly came from behind her.

Hū ~

Hearing this young voice, Jane Foster, Darcy Luis, and Erik Selvig all turned to look at the door. There stood a handsome young man of mixed race.

"Well, if he's a fool, he's also a handsome fool." Darcy knew that he was the new intern at the moment she saw Lin Rui and whispered in the back.

"Hello, I'm Jane Foster, the leader of this research group. This is Darcy Luis, my assistant; that is Dr. Erik Selvig. You're the new intern. You're called... After all, Jane was older and she wasn't fascinated by young boys like Darcy, so she came up to Lin Rui and said welcomed him generously.

"Hello, My name is Jackson Lin, I am the new intern." Simply shaking hands with Jane, Lin Rui said with a smile.

"What Darcy said just now, I hope you don't mind, she was just joking." Seeing Lin Rui's expression, she knew he didn't mind what Darcy had just said, but Jane explained more. However, she did not mention that she had also just said that Lin Rui came here for school credits.

"I know. Hello, Darcy. Nice to meet you. And Dr. Erik, I read several books you wrote." Lin Rui, of course, won't mind. He laughed and went back to say hello to Darcy and Dr. Erik.

"Hello! At last, there's good eye candy here!" Holding Lin Rui's hand, Darcy has small stars in her eyes.

In this rough New Mexico, most of the men here are as rough as the environment. Although they are very masculine, they are not very interested in Darcy. The new Lin Rui is different. He's obviously mixed-

blooded and handsome and he looks very polite. Darcy likes that. He's a little smaller than her, but it's not much smaller.

"Hello, Jackson. Professor Haimer has sent me an email, and you will be a member of our research group. Welcome to our future journey." After Darcy shakes hands with Lin Rui, Dr. Erik smiles and welcomes him.

"Thank you. I'm glad to work with you." Lin Rui was certainly delighted to join Jane Foster's research team.

"So, when do I start working?" After everyone introduced each other, Lin Rui put his backpack on the ground beside him and asked.

"Now we have two subjects to study. You can do some familiar work with me first." Dr. Erik said quickly before Jane can say anything.

"Ok, I have no problem with that." Lin Rui smiled and agreed. For Lin Rui, no matter what research is done, Jane will still pull them to chase the signal.

"So, let's get started." Worried about the brief rush, Dr. Erik has already set up a mission for Lin Rui.

In this way, Lin Rui's internship in New Mexico officially began.

.....

## **Chapter 120 From Space**

"Hey! Jackson, so, did you really came from New York?"

"Well, school is off, you know. I happened to have some interest in astronomy, so I asked a friend to help me and give me an opportunity to practice in this research group for a while.

"That friend of yours is unusual. Professor Haimer is not someone that ordinary people can ask anything off."

"Oh, my friend is a little famous."

"What about you? Are you an ordinary person? Maybe we can get to know each other better."

"Oh... this! Dr. Erik told me to give this to him, I will go first."

It was just a daily chat, but soon this chatting developed in an indescribable direction. Lin Rui did not come here to flirt with her. Although Darcy is very good, he still found an excuse to run away.

"Ah! Senior high school students, really miss these days!" Darcy laughed and whispered behind Lin Rui as she watched him run away.

.....

"Why hasn't Jane discovered anything. I feel like I'm going to be eaten by Darcy. Why doesn't she like so many handsome Mexican Cowboys out there!" While hiding in Dr. Erik's lab to sort out papers, Lin Rui muttered.

After staying here for nearly a week, he has talked about similar topics with Darcy many times, and Lin Rui worries that next time Darcy won't make it so easy for him to escape. Moreover, Lin Rui is really not interested in astronomy. If the unique scenery and humanities here in New Mexico weren't relatively fresh, Lin Rui might have become tired of it long ago.

"If I tell Darcy that I already have a girlfriend, she won't think about doing anything to me then." Jane had not detected any anomalies and Lin Rui had no choice but to wait.

In this way, the day of repeating boring work is over. That's what astronomers do every day. Even if you're studying something, it's probably just looking at the sky every night.

As night falls, Lin Rui is ready to leave the small lab that was remodeled in the factory. However, at this time, the simple machine used to detect the special signal suddenly flashed together.

Dī dī~dī dī~

"Darcy! We got a reaction! We detected that signal! Call Dr. Erik!" Keeping an eye on Jane's instrument, he noticed its change for the first time and shouted at Darcy, who was dozing off.

"Ah?~What! Oh!" The confused Darcy wasn't able to react for some time before she came to her senses and ran to call Dr. Erik.

Hū ~

"What's wrong?!" Not long after Darcy ran out, Lin Rui appeared in Jane's lab. He knew that the events in the sky had begun and that some big fool would fall from the sky.

"Jackson! Now is not the time for explanations. Can you help me move this to the car? We have a mission tonight!" Without giving Lin Rui any more explanations, Jane pointed to the measuring instrument on the table and shouted at Lin Rui.

"No problem!" With a promise, Lin Rui has come to help.

Soon, as Lin Rui walked outside with the instrument on board, Darcy and Dr. Erik's returned.

"Jane! What did you find?!" Dr. Erik saw that Jane was actually instructing Lin Rui to help her, and shouted.

"Erik! I found it, that signal, it's getting stronger and stronger!" Jane explained aloud as she packed up what she wanted to bring.

"Jane! That's what you think, it may not necessarily be true!" Dr. Erik still doesn't believe what signals Jane's own instrument detects has any special meaning. He doesn't want Jane to get too deep into it.

"Doctor, if it's true, you'll see it with your own eyes. I have a hunch that we will have a big discovery this time." Putting on her coat, Jane said seriously.

"Miss Foster, everything is loaded in the car." Outside the door, Lin Rui couldn't wait to leave.

"Come on! Erik, don't you want to see for yourself whether my judgment is correct or not?" Jane asked her friend.

“Forget it! I’ll just go crazy with you once!” Finally, Dr. Erik went on Jane’s “thieves ship”.

“Jackson! Let’s go!” All four of them got on Jane’s modified car and Jane shouted loudly.

“Yes! Miss Foster!”

Boom!

Stepping on the throttle, Lin Rui had already driven out of their experimental base.

.....

Rumble~

Just as Lin Rui and his four men rushed out of the lab, over a desert in New Mexico, huge clouds surged and gathered as if a storm was coming, but the weather forecast gave no hint.

“Hurry up! The signal is getting stronger and stronger. We need to look at it closely!!” With the monitor on the roof of the car, Jane shouted loudly at the driver, Lin Rui.

“How fast do you think this car can drive?!” In his heart Lin Rui cursed her but he still stepped on the gas pedal.

Dī dī~dī dī~

“Erik, did you see that?! In the sky, those lights!” The signal overlap is getting higher and higher and Jane can already see the different colored light in the clouds ahead. Dr. Erik did not say anything at this time as the astronomical phenomena were indeed abnormal.

“Get closer! Jackson!” Having confirmed that she had encountered a rare celestial anomaly, Jane shouted excitedly.

“I Know!” Lin Rui certainly saw the phenomenon in the sky ahead, the magical vortex-like clouds and rays.

“I’m going to record them all!” Getting closer and closer to the glowing cloud, Jane had taken out an infrared camera and started shooting. These are the phenomena that she has studied for so long and she had finally saw it with her own eyes. She must get the most detailed information.

“That’s it!” Lin Rui has no intention of slowing down in the face of the gale ahead, which would be a normal choice.

Unlike Jane, who has studied these objects and signals for so long, Lin Rui certainly knows what these anomalies are about. These magical clouds and lights are Asgard’s opening of the Bifrost Bridge. When the Bifrost Bridge is completely opened, it will form a complete space channel.

With a strong wind rushing to the front, Lin Rui’s heart suddenly trembled as if he was being pinched tightly by something. His face began to turn pale instantly. Under such a sudden change, Lin Rui slammed on the brakes.

Boom!

Just as Lin Rui suddenly felt a heartache, a colored light hidden in the clouds shot directly from the innocent space to the ground in front of Lin Rui's RV. A strong shock wave spread around the light and quickly hit the RV in the storm.

"Be careful!" Darcy shouted alongside Lin Rui, hoping he would take them away as soon as possible.

Hum~

The feeling of heartache is slowly going away and Lin Rui had quickly recovered and saw the storm rushing in front of him. Lin Rui's subconscious stepping on the throttle and was about to leave.

Humm~

However, shockwaves carrying numerous sandstorms have hit the RV, and Lin Rui has no idea where to go, so he can only crash weakly in the storm.

"Be careful!"

Boom!

Just as Lin Rui was trying to stabilize the RV in the storm, a figure suddenly appeared in front of him. Before the figure could escape, Lin Rui, who was rushing in the direction, ran into the guy who suddenly appeared.

"Oh! God, we hit somebody!"

"Oh My God!"

"Let's go and see!"

After the crash, Jane and Darcy both got out of the car nervously to see the man who had fallen to the ground. Only Lin Rui in the driver's seat was a little slow. At this time, his mood is complex. Why did someone hit by the RV he was driving? Is this a scenario that can't be avoided? Lin Rui was helpless.

"Get the first aid kit! Please! Don't die!" As she ran forward, Jane shouted.

However, when Jane kneels down next to the guy who was hit and is ready to check him, the man suddenly woke up.

"It seems that there is no need for a first aid kit." Lin Rui came slowly from behind and looked at the silly big man on the ground.

"Where the hell did he come from?!" Darcy looked at the man on the floor and asked in amazement.

"From Space." Lin Rui whispered in the back.

.....
