

## Marvel 361

### Chapter 361 Fight On The Bridge 9

Rumble!

The Golden Gate Bridge, an iconic landmark in New York, suffered one of the most intense disasters since it was built today, but it has been reinforced and repaired many times since because of several unusual battles in its history. Under the explosion of these thermal weapons, only some of the bridge deck was blown apart, there is no immediate danger of major collapse.

Moreover, since the appearance of Hydra's Space Gate, the Golden Gate has been slowly fogging up. It was a very light fog, but as the wave of space that specifically blocked the area grew stronger, the area seemed to be gathering fog. It was now almost impossible to see what was happening on the bridge from two hundred meters away, and the fog was getting thicker and thicker.

Dī Dī Dī!

"Captain Rogers! There is some type of interference in the area ahead of us and communication is greatly affected. Moreover, the fog below is also very bad for our fighters." An information officer walked in a Quinjet flying behind Tony's Iron Man Brigade and speaks to Captain Rogers.

"We don't need too many people in this fight, so we don't need the secret service team. We just need the Avengers team." Staring down at the misty Golden Gate Bridge, Captain Rogers spoke seriously.

Although there has been no news since Tony rushed in, Rogers has determined that the following situation is definitely not simple. Therefore, in order to avoid unnecessary casualties on SHIELD's side, Captain Rogers does not intend to let anyone other than Avengers intervene this time.

"But! ..." At Rogers' words, the information officer looked worried and was about to say something, but Rogers cut him off with a wave of his hand.

"Don't worry about us, isn't the original intention of the Avengers were to solve these types of situation? Also, contact Director Fury and say that the situation here may be more complicated than he initially thought, and be prepared for follow-up support." Waving his hand, Rogers was already walking towards the back of Quinjet.

There are four people behind Captain Rogers, Falcon, Black Widow, Hawkeye, and Daredevil, who are already half of the Avengers team. These five people are the main force of the Avengers. Because of Lin Rui's relationship, Iron Man did not join the Avengers, and Thor was still bathing the stray dogs. As for the Hulk, he is not here at this time.

"Hawkeye, you wait with Daredevil." The five of them walked to the end of Quinjet and Captain Rogers glanced at Hawkeye and Daredevil.

"Ok." Nodded and Hawkeye agreed.

"So let's go down!" Captain Rogers nodded toward the podium in front him

Card!

Shout shout!

After Rogers nodded, the Metal surface in front of where they stood suddenly cracked open and the airborne opening at the rear of the aircraft opened. Now the flying height of this Quinjet is very low, and their position is just above the Golden Gate Bridge, but it is also more than 100 meters away from the position of the Golden Gate Bridge below.

“Falcon.” After the Airstair opened, Rogers and Black Widow had walked towards Falcon’s side.

“Haha, Captain Rogers, I hope you haven’t gained any more weight.” Falcon jocked and said as he reached out and put his hands on the shoulders of Rogers and Black Widow.

“Come on!” Then, without waiting for Rogers to answer, Falcon had grabbed two people and jumped out of the Quinjet.

Boom!

Huh!

As soon as he rushed out of the Quinjet, the wings behind Falcon were already opened, and he quickly led Captain Rogers and Black Widow down. However, it was not easy for Falcon to fly with two people and he can only serve as a buffer.

“Wow! Captain, you’ve gained a lot of weight recently!” Falcon shouted against the surging winds as he felt that their falling speed was somewhat dangerous.

“We are here!” However, Captain Rogers answered Falcon with such a word.

Brush!

After hearing Captain Rogers’s somewhat different answer, Falcon let go of Rogers’ right hand and then he flicked his wings twice and flew in the other direction. After reducing the weight of a robust man such as Captain Rogers, Falcon had no pressure in carrying the petite Black Widow.

Huh!

Rogers, who was dropped by Falcon halfway, grasped his shield tightly while adjusting his posture in the air and then slammed onto the bridge.

Boom!

After a loud bang, Captain Rogers rolled his shield around the bridge deck to relieve the impact from high altitude. Then, Rogers found that the position where he dropped seemed not very good. Because, on the bridge surface shrouded in mist, the red eyes of the Robots surrounded him.

“Robots? Hydra’s methods are really surprising!” Captain Rogers sighed after seeing the Robots.

Brush!

Pū Pū Pū!

In the next second, the Shield in Rogers’ hands was thrown out.

...

While Roger was fighting against the Robots and Falcon and Black Widow were fighting in other positions, Hawkeye and Daredevil had already fallen on the Golden Gate Bridge.

"Daredevil, be careful!" Hawkeye reminded him as he watched Daredevil walk away from him.

"I know." Without looking back, Daredevil had slowly moved towards the center of the battlefield ahead of him.

Buzz! brush!

When Daredevil rushed towards the center of the battlefield, Hawkeye flew into the air again with a flying Hoverboard. That's right, it's a flying Hoverboard. This Hoverboard belongs to Daredevil but he had lent it to Hawkeye. In such an environment, it is clear that Hawkeye can use this to maximize his shooting powers. Moreover, because of the particularity of Hawkeye's eyesight, the mist did not affect him.

Originally in Rogers' arrangement, Hawkeye and Falcon both existed as free men on the battlefield. Falcon's flight support is very strong, and now Hawkeye can continue to occupy the commanding heights to play his biggest role. He believed that they could provide a lot of help to the team.

So far, Lin Rui's support has all arrived. Although there is only one Iron Man team on the Tony side, there are only two people on the X-Men side and only Avengers on the SHIELD side. However, such a lineup is also strong enough, at least in Lin Rui's view, this lineup is enough to easily deal with the next situation.

If Hydra had only soldiers, Alpha Squad, Quicksilver, Scarlet Witch, and hundreds of Robots this time then perhaps they would really have lost under Lin Rui and his partners and allies. But did Hydra only have this?

Buzz ~

After all of Lin Rui's support had arrived on the battlefield, the Space Door that had been quiet produced another sharp wave. This time, the entire Golden Gate Bridge and the surrounding area were covered by a special space field, and the fog became even heavier.

After that, some people walked out of that Space Door again. Unlike previous Robots that had no life force, this time it was some living people who came out of the Space Door. However, the look in their eyes is cold and without the slightest of any other emotions, they are clearly people who are controlled by Hydra.

"The real show is starting!" Red Skull whispered while sitting on the soft sofa looking at the screen in front of him in the underground base of Hydra in the Western area of United States.

...

## **Chapter 362 Shot**

Boom!

Blasted off by an attack spewing from the mouth of a robot, Deadpool crashes into the car behind him and rushes out again like a Zombie. However, looking at the battle between him and the Robot, there does not seem to be much good news.

“Fuck! How are these Iron Fucks are made?” Deadpool shouted helplessly as he rushed into the battlefield again. It seems that fighting these Robots is making Deadpool very unhappy.

Although with his powerful Recovery power, Deadpool can basically ignore those attacks that are very threatening to other people but his own attacks have not caused much damage to these Robots. Others are better at it than Deadpool. After all, Deadpool’s attacks are relatively simple as he only attacked with guns and his Double Blades.

Deadpool is able to use his mutant power to his advantage when dealing with a person made of flesh and blood but with a Robot that’s not afraid of bullets or blades, Deadpool is helpless. If it hadn’t been for the fact that Tony had incorporated some Adamantium alloy into the two blades Deadpool now uses, he would not even be able to the damage he is doing right now.

“Use powerful energy weapons! Their physical defense is very strong!” Harry replied, skimming through the air after Deadpool had finished his attack. This was what Harry had just learned from the actual use of the laser weapon on his Hoverboard as it was powerful enough to cut through the robot’s steel body.

The energy weapons reminded by Harry generally refer to laser and electrical weapons, but neither Deadpool nor Lin Rui has such weapons. However, after hearing Harry’s words, Lin Rui, who was still using his own internal energy and the Thunder Blade to continuously release the electro-optical blade attacks against the robot, suddenly put the Thunder Blade away.

Brush!

In the next second, Lin Rui already had a sci-fi style Laser Gun in his hand, which was exchanged by Lin Rui from the System Shop a long time ago.

“Wade! Catch!” Mirage Knight threw the Laser gun he had just taken out towards Deadpool.

Shout!

After throwing the Laser Gun towards Wade, Mirage Knight’s hand flashed again. Then, a somewhat familiar Cannon-shaped weapon appeared in his hand. It was the Fire God Artillery. Fire God Artillery, which had been researched by SHIELD for a week had more firepower than Laser guns.

Howls whew!

Bang! Bang! Bang!

By the time the Fire God Artillery appeared in Mirage Knight’s hand, Deadpool, who had caught the Laser Gun had fired three times on the other side. Three shots passed and the heads of the three Robots headed for Deadpool exploded. An opponent that Deadpool would have needed several cuts to defeat was defeated with one shot.

“Wow! What’s with this situation? Mirage Knight, why didn’t you take out such a powerful weapon at first?” Watching the three robots for a second, Wade exclaimed exaggeratedly, then turned to Mirage Knight and shouted at him.

However, it was only when Wade turned to look at Mirage Knight that Mirage Knight lifted the huge Fire God Artillery and aimed at the most concentrated position of the Robots in front of him.

"I ..." Seeing the Big Ass Cannon in Mirage Knight's hand, Deadpool looked down at the ordinary Rifle-Sized Laser Gun in his hand and cursed inwardly.

Buzz!

Boom!

However, before Deadpool's inwards curses could get out of his mouth, the Fire God Artillery in Mirage Knight's hand had been fully charged. Then, an extremely thick white light appeared from the barrel of the cannon. In an instant, the entire central position of the Golden Gate Bridge shrouded in mist was permeated by this white light.

Zi Zi Zi ~

The white light flickered and the temperature in this area actually rose by a few degrees. Moreover, in the fog-covered space, a clear, fog-free passage stretches from the mouth of the Fire God Artillery to the front, and the diameter of the passage continues to expand.

Rumble!

In the end, the dazzling light beam rushed directly into the Robot team and immediately swallowed the area.

"Holyshit!" Seeing the result of the Fire God Artillery gun, Deadpool swallowed what he wanted to say but he still couldn't help but swear.

In front of the Fire God Artillery attack, more than a dozen Robots that were rushing towards this side and firing various long-range weapons were destroyed as the white light passed through them, nothing was left. Except for those black iron bumps on the ground, Deadpool could no longer see any robots.

"I can not mess with Mirage Knight in the future! The thing in his hand is really dangerous, it might just vaporize me!" Carefully withdrawing his gaze, Deadpool whispered softly. As for what he was about to say, he will not say it anymore.

"Hey! Were you going to say something?!" However, just after Deadpool whispered this sentence, Mirage Knight's voice was heard from behind.

Brush!

Hearing Mirage Knight's voice, Deadpool jumped forward and the Laser Gun in his hand began to shoot. Although the Laser Gun is much worse than the Fire God Artillery in Lin Rui's hand, it is powerful enough to deal with these Robots.

However, both the Laser Gun and the Fire God Artillery needed to be cooled down and charged and these two big guns were unlikely to last long in the face of hundreds of attacking robots.

Zi Zi Zi!

While Deadpool and Mirage Knight took out their energy weapons against the Robots, Spiderman was more relaxed. He didn't need any special weapons from Mirage Knight. As Peter continues to grow, Tony has opened up almost all the systems and functions of this Spiderman suit to Peter.

Therefore, in addition to being able to fire normal strengthened spider silk to bind the Robots, Peter can also fire strong electric cobwebs and exploding webs. As long as Peter set the power to kill in one blow, those Robots would not be able to withstand it.

Also, Spiderman's suit now has a special Artificial Intelligence system inside it that gives Peter some help when he's fighting, like reminding him to switch attacks. So, for the moment, Spiderman is the most relaxed person as he faced the Robots in the field.

However, this situation will obviously not last too long. When Deadpool and Mirage Knight used a Laser Gun and Fire God Artillery to kill a large number of Robots when they were full of energy, some people that have been mixed in the army of Robots had reached the battlefield.

Howls whew!

Card!

Deadpool, who was constantly attacking with his laser gun suddenly found that the laser gun in his hand suddenly stuck and the gun body was hot. It seemed that the laser gun needed a rest from the constant firing.

Boom!

"Shit!" Deadpool whispered and he kicked a Robot Beast that had rushed in front of him.

Pū!

Just when Deadpool put away his laser gun and was about to pull out his double blades again, his movements suddenly stopped. At this time, in the middle of Wade's eyebrows, a one-centimeter-diameter hole had appeared without him knowing about it.

"Ah!" Wade stood stunned for a while then his figure fell straight on his back.

Thump!

### **Chapter 363 Bad Fight**

Dada ~

After Deadpool's head was pierced and he fell on his back, a man came out from behind several Robots. This man is dressed in the same way as the Winter Soldiers which were defeated by Lin Rui and he is also a new type of Winter Soldier.

After glancing at Deadpool, who had fallen on the ground, the new Winter Soldier came out and put down the laser gun in his hand. Obviously, it was he who had secretly penetrated Deadpool's head.

"Deadpool, Killed." It was determined that Deadpool's head was penetrated and the new Winter Soldier reported calmly and no one knew who he was talking to.

If Lin Rui or Peter or Harry were here, they would be able to hear it. This Winter Soldier wearing the same mask as the previous Winter Soldier is their classmate: Tom Smith, who was captured by Hydra and transformed into a Winter Soldier.

After finishing the report. Tom didn't care about Deadpool's body that had fallen to the ground and continued to walk forward in the direction of Mirage Knight. Just now Deadpool ran some distance away from Mirage Knight. Behind Tom, all the Robot teams quickly ran past Deadpool corpse and ran towards the other battle circles ahead.

In the end, there was only Deadpool's gradually cooling body left on the ground. However, if anyone notices Deadpool's body, the hole in his head is healing quickly.

...

Brush!

When Tom walked towards Mirage Knight after killing Deadpool with a one-shot, Mirage Knight had already put away the Fire God Artillery and pulled out the Thunder Blade again to start using the blade energy to deal with the Robots. This is a lot less efficient, but at least the Thunder Blade ensures enough damage to the Robots.

However, although Lin Rui can still defeat these Robots with his Thunder Blade and his internal energy but his internal energy has been consumed by a lot in the ongoing battle and there are still many robots so the situation is not optimistic.

Moreover, Jack and Harry flying in mid-air have more trouble than Lin Rui. Don't assume that they can take advantage of high altitude because these Robots also have anti-aircraft weapons. Jack and Harry have almost been shot down by some anti-aircraft weapons several times.

In addition to avoiding the anti-aircraft weapons of the Robot, the weapons on Harry and Jack's Hoverboard have been emptied and there is no extra energy for laser strike. Faced with this situation, Harry's eyes changed and he activated his half-covered armor and jumped down directly from the Hoverboard.

Brush!

Boom!

An arc was drawn in the air as Harry directly crashed into the Robot's enclosure. As the perfect adaptor for the Titan Series Serum, Harry's current strength can not be underestimated. At least, with the assistance of his Armor, those Robots would not pose many problems for him. However, Harry without high-energy weapons could not quickly kill these robots and he can only keep knocking them down.

"Damn it!" After Harry jumped off the Hoverboard and rushed to the ground for close combat, it was more difficult to fly in the mid-air for Jack.

As the oldest member of the League of Defender, Jack's growth has been the worst of all the members. With his Third-level Mutant strength, his power ranks him at the bottom in the current League of Defender, except for the logistic member Sky's Eye.

Although Jack's melee ability is also very strong, but it is not comparable to the others in the League of Defender. Faced with the dense Robots below, Jack will not choose to fight hard with those iron bumps. However, the Hoverboard's weapons have been exhausted and the remaining energy in it is only enough for Jack to continuously avoid the Robot's attack.

Faced with such an awkward situation, Jack had already had the idea of ??retreating temporarily. After all, he can't play a big role in this battle, and if he is injured, it will cause unnecessary trouble to others in the League of Defender. However, the Robots on the ground will not let Jack leave the battlefield so easily.

Whew!

Bang!

Just as Jack controlled the Hoverboard to continually shuttle in mid-air to avoid ground attacks, a laser suddenly hit the right rear of the Hoverboard. In an instant, the balance of the entire Hoverboard was disrupted and then several attacks hit the Hoverboard.

"What bad luck! Sky's Eye, are you still there? Where is Mirage Knight?" The flying trajectory of the Hoverboard has been messed up and Jack shouted at the connector before he fell completely to the ground.

However, since entering this area, Jerry's voice has not been heard from the device and now there is no response.

"Damn it!"

Boom!

Without getting a response from Sky's Eye, Jack can only jump off before the Hoverboard hits the ground. Fortunately, when the Hoverboard finally lost control, it didn't fly towards the robot team, otherwise, Jack would be in a miserable situation now. After falling to the ground, Jack had already used his speed advantage to rush towards Harry's position. He doesn't know where Mirage Knight is now and supporting each other with Harry is also an option for him.

Brush brush!

While running, Jack also threw out three knives. However, the knives which held enough power to penetrate the thick concrete wall just created three small holes of a few centimeters in a Robot's body and had almost no impact.

"Fuck! These damn robots!" When Jack saw the result of his attack, he loudly cursed out. As a member of the League of Defender, Jack's strength to fight against these Robots has been completely thrown away. Of course, as the current owner of the Frankenstein Family, Jack can provide League of Defender with far more resources than his strength.

Just a bit pissed off by the defense of the Robots, Jack had turned his head and continued to charge toward the spot where Harry had jumped. Even if his knives can not break the robot's defense, he does not believe that more than a dozen knives can not waste a robot.

...

When Harry and Jack were both forced to abandon their Hoverboards and landed on the ground to fight the Robots in close combat, Lin Rui also encountered a special situation. After cutting down several Robots in a row, Lin Rui suddenly felt a person approaching him quickly. Moreover, Lin Rui is very familiar with this person who is coming towards him.

Brush!

Bang!

Once again, his blade cut off the two Humanoid Robots in front of him and Lin Rui looked back at the man in a Combat Armor who is coming out of the fog.

“Tom ...” Lin Rui spoke bitterly as he looked at the familiar and stranger in front of him.

Without seeing the face under the mask, Lin Rui can determine that this is Tom, Lin Rui remembers the Aura and Style of his friend from childhood. At the same time, Lin Rui is also feeling very guilty about Tom’s appearance now. He always thinks that it was his mistake that Tom became like this. Perhaps, if he had paid more attention to him while completing his System Quest, Tom would not have been tricked by Hydra into becoming a Winter Soldier.

“Hello, Mirage Knight.” Facing Lin Rui, Tom, who had become Winter Soldier, greeted him calmly.

#### **Chapter 364 Subdue**

Boom!

When Tom and Lin Rui greeted each other, the Robots behind Lin Rui didn’t stop moving and they fired their laser weapons towards Lin Rui. Despite the defense of the Phantom Suit, Lin Rui was pushed back by two steps by the impact of the laser attack.

Howls Whew!!

As Lin Rui staggers to his feet, Tom, standing in front of him, pulls a laser gun from his waist and shoots towards his head three times in a row. The strong defense of the Phantom Suit was obvious to Tom, so he took a direct aim at the head that was not protected by the Phantom Suit.

Brush!

Although Tom’s shot was already fast, Lin Rui’s response was not slow either and he began to dodge when he noticed that Tom was pulling his gun. So the three lasers just wiped Lin Rui’s cheek and shot past Lin Rui’s hair, but it didn’t hurt.

Lin Rui, who had escaped Tom’s laser attack, appeared next to Tom’s side at the next moment. Without using his Thunder Blade, his clenched fists greeted Tom.

Boom! Pū Pū!

Faced with Lin Rui’s attack, Tom’s reaction was also not slow. He threw the laser gun out and blocked Lin Rui’s punches. In close combat, holding a long-range weapon in your hand can only be a burden.

Lin Rui felt that Tom's strength had changed too much since the two moves he used to subdue him at the previous Hydra base in New Jersey. At the very least, Lin Rui thinks Tom is better than the five upgraded Winter Soldier he has defeated just now.

Call!

"Tom! Wake up!" Lin Rui shouted while punching him.

Although knowing that the chance to wake Tom up is slim, Lin Rui will not give up. After all, the previous generation Winter Soldier Bucky is now out of Hydra's control. Although he had not completely recovered his memories, he will at least recover them slowly in the future. For the new Winter Soldier Tom, Lin Rui also has such expectations.

"Tom? Who is that?" Tom stopped and whispered in confusion as he heard Lin Rui shouting at himself.

"Tom, this is you ..." As Lin Rui prepares to explain to Tom, a little surprise arises in his mind. His face suddenly changes and she hastily turns her head away.

Pū Pū Pū!

Just after Lin Rui moved his head and shot out a laser beam, several powerful attacks from behind hit him. Despite the defense of the Phantom Suit, Lin Rui also withstood the shock waves of so many attacks and the impact of the explosion, and he was directly hit and flew up. Lin Rui, who was struck in the air, moved his body to avoid subsequent attacks, and then quickly landed.

The most dangerous part was that one of the attacks narrowly missed Lin Rui's head. If Lin Rui hadn't deflected his head at the last moment, he would have been seriously injured even with the protection of internal energy. Still, the head-rubbing attack did some damage to Lin Rui, whose entire left forehead side had split open, and the bright red blood was streaming down Lin Rui's left eye before disappearing into the black mask below.

"I don't care who or what Tom is but I know that you are the target of my mission." Unaware of Lin Rui's injury, Tom cooperates with the surrounding robots to attack Lin Rui again.

Buzz ~

After landing, Lin Rui knelt on the ground and bowed his head slightly, so Tom could not see Lin Rui's expression or eyes at this time, otherwise, he would definitely see Lin Rui's eyes rendered with blood and purple light. When he heard Tom said that he was only one of his mission targets, Lin Rui's scarlet eyes gradually cleared.

Brush!

At the next moment, Lin Rui suddenly raised his head and looked at Tom. At this time, Lin Rui's eyes were filled with purple light, but his mind was extremely clear.

"Tom, don't force me to do this!" Lin Rui could not see a touch of humanity in Tom's eyes.

However, Lin Rui's only response is a bullet fired from Tom, who has more than one gun. In the face of his mission goal and as the most perfect upgraded version of the Winter Soldier, Tom is unlikely to be affected by Lin Rui in any way.

Buzz!

Facing Tom's indifference tone and attitude, Lin Rui didn't hesitate anymore, his right hand on his waist pulled out violently and the Thunder Blade he had just put away was pulled out again. Almost in a few tenths of a second, Lin Rui had jumped from half-kneeling position to half-airborne position, and then held up the Thunder Blade and slashed back behind him.

Card!

Rumble!

After the first full-power launch of Fire God Artillery before, a dazzling light burst out again in the mist, but this time it was purple. Lin Rui, who was forced to this step, finally spent a lot of internal energy to make his most powerful move so far: Thunder Strike.

Buzz!

With the burst of purple light, Tom, who was rushing towards this direction, had to stop, because he could not see anything now, and all the purple light was filled in front of his eyes. In addition, Tom's eyes which had not budged at all since he appeared, kept flashing with some strange looks, he seemed to be shocked by the power of a strike of thunder in front of him.

Of course, Lin Rui, who issued the thunder strike did not have time to pay attention to Tom's eyes at this time. He had used his full power to kill the robots behind Tom with a thundering blow to maximize.

Pa Pa Pa!

In the purple glow, a half-moon blade shot out in front of Lin Rui's body, expanding to more than half a meter wide and five meters wide in a few tenths of a second, and rushed toward dozens of robots in front of him. Before the light of Blade came, the red mechanical eyes of those robots had burst one by one as they were unable to withstand the power of the Blade Light.

Brush!

The next moment, after the robots' eyes had burst, the half-moon light of the blade had passed unimpeded through them, hurtling hundreds of meters before slowly dissipating in midair.

Huh!

After the blade light dissipated at a distance of 100 meters, the purple light gradually dissipated all over the sky, and the dyed fog recovered to the original gray color again. As for Lin Rui, he landed firmly before the light cleared. Instead of watching the outcome of this move, Lin Rui had rushed towards Tom's side.

"Sorry Tom!"

Boom!

As he said quickly, Lin Rui had hit Tom in the back of the head with his blade handle. Lin Rui worked hard to ensure that his shot had the desired effect.

Call!

Although the upgraded Tom's strength is much stronger than before, but after all, he is still a person. His weakness was hit and his eyes rolled up and he fell down while Lin Rui caught him.

Although the process was somewhat tortuous, Lin Rui subdued Tom. Moreover, this time Lin Rui will not let Hydra take Tom back. Lin Rui had been forced to let him go last time, and Lin Rui would not let this happen again.

"This time, I will definitely take you home." Lin Rui said in a low voice while carrying Tom.

Boom!

As Lin Rui destroys dozens of robots and overpowers Tom, there is a muffled sound from a room in the Hydra subterranean base in the western United States.

"Mirage Knight!"

### **Chapter 365 Severe Wound**

In Lin Rui's side, Tom and Lin Rui had suffered a little bit of damage. At the same time, there are several other battlefields with opponents other than robots, some of them are mutants controlled by Hydra, some of them are modified mutants. These people with various special abilities cooperate with a large number of robots, which brings many troubles to League of Defender, Avengers alliance, and Iceman. Now almost everyone is injured.

Brush!

Dragging a robot into the ground again and trapping it, Shadowcat frowned and looked back at Iceman's position. While freezing doesn't do much damage to these robots, it does at least have some effect. Iceman alone can take on dozens of robots at once. But the emergence of Mutants has put Iceman under pressure.

Even if he is a Fifth-Level Mutant, Iceman's variant ability is not invincible. The key is that he cannot completely release his fifth-level ability, which will bring Iceman himself a very serious backlash, like when saving Lin Rui's mother Mary, his attack was the biggest move Iceman could control at this time. However, Iceman can't use that attack in a short time as it will do great harm to himself.

So Iceman has been slowly suppressed in the face of rough and fleshy robots and mutants with different abilities. Although he can defend for a long time with his own cold ice attribute, it won't last too long. Shadowcat's ability is to avoid almost all attacks, but her own attack is too weak.

Boom!

Pū Pū Pū!

Finally, after a wall of ice was shattered, Iceman's ice was blasted by several laser beams into a cloud of ice. As Shadowcat watched from behind, she knew that Iceman had consumed too much of his energy.

Huh!

After Iceman's melted ice crystals were shattered, a chill slowly gathered around Shadowcat in the background, and finally solidified into a cold Iceman again.

Buzzing ~

However, the frozen ice quickly materialized, and Iceman appeared pale at Shadowcat's side. It seems that the damage to Iceman from breaking the Ice Crystal Avatar is considerable.

"Are you alright?! Robert!" Shadowcat shouted when she saw Iceman showing his true body beside her.

Waving his hand, Iceman gave Shadowcat a reassuring look. "It's okay. I still have some strength. I won't be getting out bed for three months but I will destroy them all!"

Iceman also said that he would kill them all, so obviously he had a trick up his sleeve but then he would really be seriously injured.

"Robert, no! You can't use that attack anymore! Blink should have told Professor Charles about this matter and X-Men should be on the way to support us now!" Hearing Iceman's words, Shadowcat immediately thought of what he was going to do and said anxiously.

"I can only hope so. What the hell is going on with Hydra this time? Are they really going all out now?" Frowning, Iceman's eyes filled with incomprehension.

Hydra's move today was indeed very unexpected. The attack on Lin Rui's mother Mary clearly was to attract the attention of some people. But, they clearly didn't use all their forces on them. They prioritized the Golden Gate Bridge and the power shown by them this time surprised SHIELD, League of Defender, X-Men, and everyone.

If only other people came here instantly as Iceman came here in response to Mirage Knight's request for help, it would really be possible to kill Hydra. But, whether it is Tony's Iron Man army, SHIELD's follow-up support, and other members of X-Men who are coming here to support them after knowing the situation here, they would get here soon. What confident Hydra has to quickly defeat these people now before their backup arrives?

Not only is Iceman thinking about this problem, but other people who are fighting are also thinking about this problem. The battlefield on the Golden Gate Bridge is not very large because of the mist, and the battlefield is only a little wider. Captain Rogers and others who have joined the battlefield before have not joined with the League of Defender.

Now, Hawkeye's arrows are long gone, so he can only fly his hoverboard to the edge. The Falcon is in better shape because his wings are more flexible than his hoverboard, but his weapons are running low.

Captain Rogers who fell to the ground at the beginning was still fighting the robots. With a shield, Captain Rogers had already dismantled more than ten robots and he himself was only slightly injured. Judging from the results of this battle, Captain Rogers should be much more powerful than the upgraded Winter Soldiers of Hydra.

As for Black Widow, after using up her weapons and destroying a few robots, she hid to the edge of the battlefield like Hawkeye, which is also their best choice in this case.

Boom!

"Fury need to respond to this quickly! Otherwise, these robots won't stop here!" Rogers looked up and saw the half-air covered with mist and he whispered to himself, he threw a shield at a rushing robot.

...

Boom!

"Jack!" Near the center of the battlefield, Harry suddenly let out a cry of concern.

Without armed defense, Jack's physical defense is stronger than ordinary people but he was finally injured in the battle. His thighs and right shoulders were almost penetrated by the laser beam, and Jack flew backward and lay pale on the ground. In front of him, the two controlled Mutants rushed towards him with a fanatical look, apparently no longer thinking.

The armor on Harry's body had almost been broken up, but he still rushed towards Jack's side with an unrelenting attack, trying to save his partner. However, it was simply too late for Harry's current speed.

"No! ..." Harry shouted angrily as the two Mutants were about to pounce in front of Jack.

Brush!

Pū Pū!

Just as Jack was already lying on the ground with no movement, a crack in the air came from behind him. Then a cold streak flew over his head, straight through the Mutants' heads.

Dada ~

After being rescued from the edge of death, Jack stared behind him and saw a familiar figure slowly coming through the fog.

"Deadpool!" Seeing the man coming out of the fog, Jack gave a cry of excitement.

"Hey! Sorry, I just got shot in the head. It took some time for me to recover." Looking at Jack on the floor, Deadpool said in a relaxed voice as if getting shot in the head was nothing new.

Looking at the hole in the middle of Deadpool's head, Jack was speechless.

"However, we don't seem to be in a very good position!" Deadpool's tone grew heavy as he looked at the wounded Jack and Harry, who was still in front of the Robots.

## **Chapter 366 Surprised News**

Dī Dī Dī!

Boom!

When Harry and others in the center of the battlefield had been pushed to a certain point, at the edge of the battlefield, Quicksilver and Scarlet Witch were still entangled with Tony's Iron Man Brigade.

Because of the powerful computing power of J.A.R.V.I.S and the omnidirectional sense of space composed of multiple Iron Man, Quicksilver's speed is also within the calculation range of J.A.R.V.I.S. Therefore, Scarlet Witch was the real threat to Tony. Faced with Scarlet Witch's powerful telekinesis power, there is no good way for him to defend with his Iron Man Armor.

Up to now, there are only seven Iron Man left that are intact, and Quicksilver and Scarlet Witch are obviously a little exhausted because of the continued use of their abilities. They may be injured accidentally after entanglement.

However, compared to the fatigue of Quicksilver and Scarlet Witch, Tony is even more anxious. Quicksilver and Scarlet Witch's mission is just to stop Tony's Iron Man, but Tony came here to save people and he was stopped here. Moreover, J.A.R.V.I.S detected that some unusual changes are taking place in the space of this area, and what is likely to be happening on the Golden Gate Bridge.

Pū Pū Pū!

"Damn it! J.A.R.V.I.S, how long till our Iron Man army reaches here?!" Three lasers were fired at Scarlet Witch in a row and Tony shouted at J.A.R.V.I.S after avoiding Quicksilver attack.

"One more minute, sir." Soon, J.A.R.V.I.S had calmly answered Tony's question.

"One minute? Ok then! I only need to stall for one minute, once my Iron Man army arrives, It will be easy to deal with them!" Tony shouted in shock when he heard the answer from J.A.R.V.I.S. For Tony, using numbers to suppress opponents is not a shameful thing at all.

Pū!

The next second, the excited Tony was in the grip of a Scarlet Witch, and the suit was thrown into the air. If the J.A.R.V.I.S hadn't adjusted his compensation power, Tony would have been thrown out of the Golden Gate below.

Brush!

Freed from the control of the Scarlet Witch, Tony and the rest of the Iron Man once again surround the Scarlet Witch in a constant assault, and as for Quicksilver, it's all about the J.A.R.V.I.S 'powerful computing power that limits him with weapons.

...

Brush!

Splitting two robots with his blade, Lin Rui is almost back to Rick's side, which is also the position of his father Lin Hai. Since the support from all sides has arrived, Rick has been staying here to protect the injured David and Lin Hai and other civilians bodyguards. Although he knew that the fighting outside was fierce, Rick didn't move. His current mission is to protect the people here.

Call!

Bang!

As Lin Rui walked forward carrying the comatose Tom, a robot with a half-bent body that had been smashed rolled over from the mist next to him and stopped at Lin Rui's feet. Stopping, Lin Rui had sensed the two people coming from that direction.

Dada ~

Soon, in the direction Lin Rui was looking at, two figures slowly came out of the fog, one of them is a burly figure wearing a blue combat suit holding a shield in his hand; another figure is of a medium figure wearing a black suit, holding a stick in his hand.

The two people who came from the mist are Captain America Steve Rogers and Daredevil Matt, who seemed to be the only ones who managed to break through the blockade and reach the center. However, this is normal, after all, the Avenger's current members are all slightly worse at close combat than the two of them.

"Mirage Knight, this space is weird. We should retreat immediately, and SHIELD's follow-up troops should be here soon." Captain Rogers directly pointed out the most serious issue right now without saying anything more to Lin Rui.

Although Rogers had also noticed that Lin Rui is carrying a man on his shoulder, this is not the time to ask this. Although Daredevil is blind, he also knows that Lin Rui is now carrying a person. Daredevil knows that Lin Rui's friend was transformed by Hydra to become the Winter Soldier.

"I also know that, but what can we do about this space, the space-related abilities cannot be used here, it seems that only Hydra can open the space door. We are going to meet with everyone now, and then break through together, I have a feeling that something bad will happen if we stay here" Lin Rui nodded and agreed with Captain Rogers's words and walked towards the original direction as he spoke.

"Space door? Hydra's space door? Mirage Knight, are you saying that Hydra has such technology as creating a stable space door?!" Captain Rogers reacted suddenly after walking a few steps behind Lin Rui and quickly shouted after a few steps.

"Well, yes. How do you think so many robots appear here?" Rogers squinted, and Lin Rui replied lightly.

"Stable space door technology! What kind of technologies is Hydra still hiding?" Captain Rogers was already in deep thought, not paying attention to Lin Rui's slight contempt.

Some time ago, SHIELD's continuous attack on Hydra bases was very smooth, and many Hydra bases have been destroyed. It was originally a matter of time before Hydra was completely eliminated from the earth if this continued. But today Hydra suddenly exposed so many technologies and strengths that have not been seen before, which made Captain Rogers's judgment on Hydra shake.

"Well, I thought you wouldn't be surprised. After all, such a technology is something that SHIELD should have been working on all along. Maybe you have that technology inside your SHIELD. I'm just surprised Hydra has the technology." Watching Captain Rogers muttering and frowning, Lin Rui says something curious.

Hearing Lin Rui's words, Captain Rogers's brow furrowed tighter. As the most mysterious Vigilante, Mirage Knight's identity has been under investigation in SHIELD, but there has been little progress, but it is certain that Mirage Knight must have a very good understanding of Hydra and SHIELD. So, Rogers believed in what Lin Rui said.

"Although I don't know why you say that, but at least I don't know that there is a space door research in SHIELD, at least there is no entry-level technology." Since his last fight with Fury over Bucky, Fury has

stopped hiding anything from Rogers. So, if there really is an experiment or result in the space door inside the SHIELD, Rogers should know about it.

“How can that be? Was it because it was so important that it was kept secret from everyone? But Hydra has come up with a stable space transport technology, SHIELD should have had that technology long ago.” Hearing what Rogers said, Lin Rui was confused.

In Lin Rui’s view, when Rogers was found, the Magic Cube, the Infinity Stone with Spatial attributes should also be taken away by SHIELD. Now that Hydra has a mature space transmission technology, it should have been stolen from SHIELD. After all, Hydra was really penetrating in SHIELD at the time.

However, if SHIELD does not have such technology, then the matter is serious. Thinking of this, a light suddenly flashed in Lin Rui’s head, and he felt that some things might have deviated from what he thought.

“I hope it’s just that Fury is hiding this, otherwise this matter is going to be big!” Lin Rui whispered seriously as he thought about a more likely scenario.

### **Chapter 367 Decision**

When Lin Rui, Rogers, and Daredevil were defeating many robots along the way to the position guarded by Rick, the other members of the League of Defender had already retreated to this side. However, with the exception of Spiderman and Rick, others were more or less injured, of which, Jack was the most injured.

Although Lin Rui was worried when he saw that his dad was being protected, Lin Rui restrained the urge to comfort his dad and walked to his partner. After placing Tom carefully on the ground, Lin Rui looked at his friends.

“Jack, are you okay?” Lin Rui asked with a worried expression at a glance.

“Fortunately, I won’t die just yet!” Jack replied stiffly after hearing Lin Rui’s words. Indeed, based on Jack’s physical strength, these injuries are very serious but they will obviously not kill him.

“Jack will be fine, I have given him the second-generation Treatment Serum, and he can recover quickly by resting.” In order not to worry Lin Rui, Harry said from the side.

As Oscorp’s director, Harry is now the first user of Oscorp’s high-end products. Although the effect of this second-generation Treatment Serum is not less than that of the first generation, the efficacy is much milder, and the cost is much lower.

“Huh! It’s not because you are worried that I am not suitable for injection for the first generation serum, otherwise I will be able to run now.” Jack complained dissatisfiedly after hearing Harry’s words.

“Mirage Knight, what do you say now? Are you waiting for SHIELD’s support and X-Men?” Ignoring Jack’s complaint, Spiderman came from behind and asked.

Although after their attacks, the robots have been eliminated by a lot in the beginning, there are still some robots that exist outside. But in addition to those robots, they had new opponents, such as Mutants transformed by Hydra and mutants with special abilities, just like Tom.

Compared to attacking a single robot, those people are obviously more at risk to them. There are already a lot of wounded people here and it would be a bit risky to break out now. Moreover, they don't know what else will come out of that space door.

"The surest way is to stay here and wait for the support to come, but I had a feeling that something bad will happen next." Lin Rui's brow furrowed when he heard Peter's words.

Brush!

Upon hearing Lin Rui's words, several people in the team's eyes flashed a little light.

Spiderman: "I feel the same way."

Deadpool: "Me too."

"I also have a bad feeling." The last speaker was Captain Rogers, and other partners who didn't speak should also feel the same.

It seems that apart from Lin Rui, his partners with the protagonist aura can also anticipate what will happen next. This also shows that there are indeed some bad things waiting for them, but they do not know what is going to happen. Could Hydra have more robots and Mutants waiting for them through space doors?

But according to the time, whether it is SHIELD or X-Men or Tony's Iron Man army should arrive. Even if Hydra's hidden card is strong, it won't be stronger than the combination of these three forces, otherwise, they won't hide after being exposed.

"So, are we going to break through?" Harry is speaking. Since everyone thinks that Hydra may have a follow-up conspiracy, then breaking out is obviously the option to avoid greater harm.

"It may not be that easy." Faced with such a dilemma, Lin Rui was also very distressed.

The key is that this space is blocked, whether it is Blink's variant ability or the space magic of Rick, they cannot get out of here, otherwise, they could leave easily at any given time. Perhaps this is what Hydra wanted to achieve from the beginning.

"Someone's coming." Just as everyone frowned and thinking about what to do now, Daredevil standing on the periphery suddenly reminded. However, listening to his tone, it should not be the enemy.

Rustle ~

Soon, when everyone looked in one direction, two people came over from there, they were Iceman Robert and Shadowcat Kitty. It seems that they got rid of those Mutants.

Everyone was not surprised at the arrival of Iceman. The people present were not ordinary people except the civilians behind them. They knew all about Iceman.

"It seems that your situation is the same as us." Walking out of the fog, Iceman frowned as he saw so many people gathered in front of him.

"What's the situation?" Lin Rui asked suspiciously after hearing Iceman's words. He keenly felt that those bad hunches of his seemed to be happening.

“Those robots and controlled Mutants and ability users have retreated, Didn’t you come here by accident?” Seeing Lin Rui’s doubts, Iceman asked back.

It turned out that Iceman could come here safely with Shadowcat, not because they solved those robots and Mutants, but those enemies retreated on their own initiative. In fact, Iceman planned to use that trick again at the time, but at the last moment, those people retreated and disappeared into the mist.

“Has the Robots retreated?” Lin Rui’s eyes flashed upon hearing Iceman’s answer, and he quickly spread the scope of his Insight Technique.

However, because of these strange and obscure reasons, his Insight Technique’s effect is greatly reduced, but Lin Rui can also notice that there are no robots and other enemies still active outside. No, not without, but they are gathered in one place.

“Did Hydra retreat because they knew our support is here?” Spiderman also checked the surroundings and said with some uncertainty.

“No, Hydra paid such a big price today and made such a big move. If it was just that, it would be too simple. Moreover, the space door is still stable over there.” Lin Rui shook his head when he heard Peter’s words, things are definitely not that simple. Unexpectedly, he had already noticed where those robots probably went.

“No matter what Hydra’s plans are, that space door must be their starting point. So, let’s destroy that space door!” Captain Rogers, who hadn’t said much when Lin Rui was thinking about Hydra’s plan, was suddenly speaking seriously.

As the Captain of the Avengers, Rogers is also a very capable person. Although there are no Avengers here, Captain Rogers can also assume the responsibility of a Captain at this time.

Sure enough, after hearing Rogers’ words, everyone else’s eyes brightened, and obviously all thought this method was good.

“I agree!”

“I agree!”

“Destroy the Space Door!”

Soon, the partners here have expressed their views.

### **Chapter 368 Running Away**

Boom!

When Lin Rui and others decided to destroy Hydra’s space door, the battle between Tony and Quicksilver and Scarlet Witch at the edge of the fog had reached the final stage. There are only the last three remaining Iron Man, and Scarlet Witch and Quicksilver are obviously overdrawn due to too much use of their abilities.

However, although there are only three Iron Man left, Tony is not worried at all. Because, his Iron Man army has arrived, and now he can see the little black spots flying behind him. Each black dot is an Iron Man, and at a glance, there are more than eighty of them.

In addition to the support of Tony's Iron Man army, the follow-up support of SHIELD has also arrived. More than a dozen Quinjets armed to teeth had rushed in the other direction. In addition to Tony's Iron Man army and SHIELD's Quinjet fleet, there is also another powerful support, that is, X-Men's supersonic optical stealth fighter.

In fact, although X-Men is made up of Mutants, they have owned a lot of high-end technology in the world from the beginning. Moreover, Professor Charles and Magneto Erik collaborated with the US government a few decades ago, and they also obtained a lot of cutting-edge technology.

Later, after Charles and Magneto parted ways from the government to establish X-Men, they relied on the savings of their ancestors to maintain X-Men's high-end equipment updates, including the help of Hank. As a high IQ Mutant, Hank can personally assemble a supersonic fighter jet.

There are a few people sitting in the X-Men stealth fighter jet. The X-Men Storm is the Captain of this support team, as well as there are Colossus and several other X-Men members. Blink is also here at this time. Although the space class capability of that area is locked, Blink's ability is still very useful once she is out of it.

Tony's Iron Man army and the SHIELD fighter group's rapid approach to Quicksilver and Scarlet Witch was obviously also noticed by them and they realized that they would have a difficult time dealing with a dozen Iron Man. They are not so stupid to directly confront Tony and SHIELD with their power.

Buzz! Boom!

"Pietro! It's time to go!" Scarlet Witch shouted loudly, holding two laser beams coming at her.

Hydra's order was to stop Tony's Iron Man, but now the situation is far beyond their ability, Scarlet Witch and Quicksilver are not fools. Originally, the attribution to Hydra is not strong, of course, if they can't beat it, they have to run.

Brush!

After Scarlet Witch shouted, Quicksilver had appeared beside her instantly. At this time, Quicksilver's face was a little pale, and it was obvious that he has been overdrawing his abilities.

"Are you all right?" Scarlet Witch asked worriedly when she saw how Quicksilver looked like.

"I'm okay. However, the support of Tony's Iron Man army and SHIELD has already come. Is Hydra planning to continue? This is a meaningless attack now!" His eyes stared closely at the Iron Man and fighters in the distance and Quicksilver said while frowning.

"Perhaps, as you said before, this is just a tentative attack. I have just noticed that those robots seem to have shrunk near the space door, maybe they are ready to withdraw." While defending Tony's attack, Scarlet Witch replied.

"Huh! Even if it was a tentative attack, but they did not inform us when retreating, it seems that they want us to break off!" It is not clear what Hydra is planning and Quicksilver can only think so now.

"Then do we leave now? Although they look fierce, they can't help us if we want to escape." Scarlet Witch asked after hearing Quicksilver's anger.

"Of course, we go now! We have already done what we should do." While answering Scarlet Witch, Quicksilver had wrapped his hand around her waist.

"Bye!" Waving at Iron Man stopped by Scarlet Witch, Quicksilver had already activated his ability.

Brush!

The next moment, Quicksilver and Scarlet Witch had disappeared in front of Tony. J.A.R.V.I.S was able to "see" Quicksilver and Scarlet Witch quickly rushing into the mist, and soon disappeared. Obviously, Quicksilver intends to pass through the mist and leave from another direction that is not blocked by the enemy.

"Sir, they left." When Quicksilver and Scarlet Witch went deep into the fog, J.A.R.V.I.S could no longer "see" them.

"Let them run!" Tony obviously didn't care for Quicksilver and Scarlet Witch as Tony himself would be frightened by the number of Iron Man troops.

"Let's go in and see what happened to Mirage Knight and others. Also, there are people hiding underneath, arranged some Iron Man to support them. The Avengers are still not strong enough and they hid from the robots after their weapons went out" No one stopped him and Tony drove the Iron Man Armor toward the depths of the fog. While flying, Tony commanded to J.A.R.V.I.S.

As for those who Tony said were hiding under, it was obviously Hawkeye, Falcon, and Black Widow. It is not that they are not strong enough, but that they are really unable to exert more power in the face of more robots.

Howls Whew!

Following Quicksilver, Tony rushed into the fog with three Iron Man. Later, nearly a hundred Iron Man arrived in the battlefield in about ten seconds, which is why Tony stopped waiting for a while. However, if Tony knows what will happen in these ten seconds, he will definitely wait for the Iron Man to come and take action.

...

Just when Quicksilver took Scarlet Witch into the depths of the fog and left in the other direction of the Golden Gate Bridge, Lin Rui and others had already arrived near the space gate. At this time, they have also found out why the robots had disappeared to. It turned out that they all gathered beside the space door and seemed to be protecting the space door.

As for the Mutants controlled by Hydra, they did not see them, and they should still be hidden in the mist.

"Why are they all here now? Are they going to retreat?" Harry asked curiously as he watched dozens of robots guarding the space door.

"I don't think it should be a retreat. If they wanted to retreat, they should have gone before we come. The space door is very stable, maybe Hydra is going to send something powerful." Shaking his head, Lin Rui denied Harry's guess.

"No matter what they plan to do, the key must be on this space door. If we destroy it, everything will stop." The closer he got to the space door, the more uneasy Captain Rogers felt and he looked at Lin Rui around him seriously.

"I Know, leave it to me." Nodding towards Rogers, Lin Rui had already gone out.

Brush!

The Fire God Artillery that was put away before was taken out by Lin Rui again. The huge muzzle and exaggerated shape made the people who saw it for the first time amazed. Carrying Fire God Artillery, he aimed at the position of the space door in front of him and Lin Rui's hand had slowly pressed to fire.

Buzz!

Boom!

### **Chapter 369 Attack**

Buzz ~

After a short charge, a dazzling white light erupted from the mouth of Fire God Artillery in Lin Rui's hand. Although the people around him were already prepared, their eyes were still struck by the light and they had to shield them.

Boom!

When the dazzling light erupted, Fire God Artillery's attack had already fired toward the space gate. After breaking away from the muzzle, the beam quickly expanded to a diameter of one meter and rushed toward the space door. The surrounding air was instantly burned and made a snorting sound. The mist also evaporated more than one meter in diameter.

After a burst of Fire God Artillery, Lin Rui stared forward without blinking his eyes. He always thought it would not be that simple. The robots standing next to the space door are not a hindrance. Fire God Artillery can completely smash them and hit the space door behind them, but would it be really that simple?

Sigh!

The ray of light has touched the robot that was blocking the space door in a blink of an eye. The robot made of hard alloy melted fell apart like cream as it could not stop the great power of Fire God Artillery.

Buzz!

However, just after Fire God Artillery destroyed the robot and blasted towards the space door and was only one meter away, a dazzling light suddenly flashed from that space door. The blue light was fleeting, if not for Lin Rui paying attention to the movement of the space door, he wouldn't have been able to see the blue light.

“That’s! ...” Lin Rui shouted suddenly after seeing the fleeting blue light.

“Mirage Knight ...”

Buzz!

Seeing Lin Rui’s changes, Peter standing next to him was about to ask what happened, but he couldn’t say anything as the Fire God Artillery in front of them had already slammed into the space door. It was at this time that a strong wave of space power rushed out of the space door. Unlike the previous spatial fluctuations that permeate the entire area, this spatial fluctuation obviously feels much more substantial.

The Fire God Artillery blasted into the space door and there should have been a violent explosion, but there was no movement at this time, the light was still dazzling, but it had no effect. It was as if it were just a beam of very bright light, not an attack that could collapse a building.

If someone can stand close to the space door at this time, they would see why Fire God Artillery’s attack has no effect, because the wave of space power rushing out of the space door seems to be blocked by a tangible substance. In front of that beam, although Fire God Artillery’s attack power is indeed very strong but it can not break through this invisible obstacle to the space door.

Buzz!

Pū!

After stalemate for about 0.1 seconds, the Fire God Artillery’s beam was wiped out directly under the invisible spatial fluctuation. The big killer in Lin Rui’s hands was enough to reverse some small-scale fighting situations and that big power attack had just disappeared!

Buzz!

After extinguishing Fire God Artillery’s attack, the invisible wave of space swept quickly towards the outside and instantly came towards Lin Rui and others.

“Not good!”

“Back!”

After seeing the blue light inside the space door, Lin Rui has discovered where the problem is. After the fire God Artillery’s attack is inexplicably wiped out, Lin Rui suddenly has a strong feeling in his heart and his heartbeats sped up! Without thinking about it, Lin Rui quickly pulled Peter and Harry back.

In addition to Lin Rui, Captain Rogers and Iceman also felt this. Iceman pulled Shadowcat while Rogers pulled Daredevil, and they all pulled back almost at the same time as Lin Rui. Therefore, when that invisible spatial wave swept over towards them, only Deadpool had not had the time to retreat.

“Shit!” Seeing that the teammates around him had quickly retreated, Deadpool screamed and cursed and then turned to prepare to escape.

Brush!

However, Deadpool had just turned halfway, and the invisible spatial fluctuations had swept over him. Deadpool, who is already immortal, felt the threat of death at this moment, but even if Deadpool was moving, he could not avoid it.

Pū!

Without any hindrance, the invisible wave penetrated through Deadpool's body and swept farther away. As for Deadpool, his half-turned body is settled there and there is no movement from him and no one knows whether he is dead or alive.

Lin Rui did not see Deadpool's end. Now he just feels that there is death behind him that is chasing him. Once he can't run, he will die here. Therefore, at this time, Lin Rui did not manage his internal energy at all and he used all of his effort to make him faster.

A little bit behind Lin Rui, Iceman directly turned into ice crystals and glide on the ground. This speed is not much slower than Lin Rui's. So, the two behind are Captain Rogers and Daredevil.

Seeing the speed of the invisible fluctuations, sooner or later, it will catch up with the few people who are fleeing. Moreover, they don't know how wide it will spread. If it's big enough, people such as Rick and Jack hiding in front won't be able to escape.

"What should I do?! How can I block the attack from the back? The power of Infinity Stone from the space! System! Can you help me?" While running, Lin Rui was eagerly thinking about the way to deal with it, and even started to ask for help.

However, there is no response from the system in his mind. Moreover, even if the system responds, it may not have a way for Lin Rui to avoid the attack from Space Infinity Stone. That's right, it's the Space Infinity Stone. The blue light Lin Rui saw in the space door came from the Magic Cube.

This explains why Hydra has such a stable space door, but SHIELD does not. It turned out that when Shield rescued Captain Rogers, they didn't find the Space Infinity Stone together with him, but it was found by Hydra.

After so many years of secret research, Hydra knows many things about the development of Magic Cube's capabilities. At least, Lin Rui couldn't stop the attack that was approaching them quickly.

Brush!

Just as Lin Rui racked his brain and thought about how to solve the present threat, Iceman suddenly stopped in a circle around him.

"We can't hide like this! I'll stop it, you go ahead!" Iceman stopped at the spot and looked at Captain Rogers and Daredevil who rushed past him and shouted loudly.

Rather than being caught up in the end, it is better to fight now. Regardless of the threat behind him, Iceman still has confidence in his big move. The strongest person here is Iceman. The Level-5 Mutant is not just for show and fun.

"Robert, come back! That's not something that you can block!" Lin Rui shouted anxiously, seeing Iceman intending to block the space attack by himself.

The rest of the world may not know what this powerful, death-threatening attack is, but Lin Rui knows, it's an attack from the Magic Cube or the Space Infinity Stone. How Iceman can stand against it by himself.

The only way for them now is to hope that the range of this attack will not be too large so that they can still escape. As for Deadpool, Lin Rui can only hope that his undead body and immortality can hold him up.

However, Iceman obviously would not listen to Lin Rui, he had turned to face the rear. Shadowcat also appeared from behind Iceman, holding Iceman tightly.

Call!

"Absolutely freeze!" Iceman snorted and opened his arms violently.

### **Chapter 370 Can't Block?**

Shout!

With Iceman's arms outstretched, an icy blue halo of light spreads out rapidly around Iceman. Only this time Iceman kept the ball in front of him, so it didn't spill over to Lin Rui and others behind him. An icy blue halo of light rushed past Iceman, blanketing the area.

It only takes a second as Iceman stopped running and turned around to face the danger behind him, he stretched out his arms to release his attack. However, when Iceman's ice blue halo spread out less than two meters, it was blocked. The space attack from the Space Infinity Stone arrived in front of him!

Buzz!

In the direction where the icy blue halo was spreading, a sharp small sphere appeared in midair, the icy blue halo of Iceman's absolutely frozen realm was on one side and the white haze was on the other side and a thin, barely visible gap of pure white light was in the middle.

This pure white gap is the engagement space created by Iceman's absolute ice and Space Infinity Stone's attack against each other. After the collision, this gap has been pressed towards the ice blue side.

As a big move from the Level 5 Mutant Iceman, the total release of Absolute Freeze is powerful enough to even freeze time. Although Iceman is not yet fully capable of unleashing the full power of a level 5 Mutant but he is more powerful than any other mutant on the planet. However, such a big move is now blocked by the invisible waves of space, and his attack is getting pushed back.

Huh!

With his open arms trembling, Iceman felt that his Absolute Freeze was being worn away by a force so powerful that his attack was not enough to freeze anything and he only felt the inexplicable power of the attack. It is the first time that Iceman has seen the Absolute Freeze being suppressed since he took control of his abilities more steadily.

"Kitty! Hurry up and leave!" Once again increasing the energy output, Iceman shouted to Shadowcat, who was holding him from behind. Regardless of whether he can finally stop this attack or not, Iceman did not want Shadowcat to be in such a dangerous situation with him.

However, as Iceman's lover, Shadowcat couldn't have left without him. Moreover, Shadowcat can do something in this situation. In addition to her ability to cross over matter, Shadowcat can also transmit her energy to others. This is when she transmits her energy to Iceman.

Buzz!

Knowing that Shadowcat would not leave, Iceman didn't say much but put more power in his Absolute Freeze attack. By this time, Iceman had exploded within 100% of his ability. If this can't stop this invisible attack, Iceman can only risk releasing his Fifth-Level Mutant ability that has been suppressed, but he can't predict the consequences.

Kakaka!

Although Iceman has the support of Shadowcat, the range of Absolute Freeze is still squeezed by the invisible wave and it slowly pushed towards this side. It seems that the attack of a powerful Fifth Level Mutant can't stop this attack from the Space Infinity Stone.

"Cough!" The range of Absolute Freeze was constantly suppressed and the surface of Iceman's human-shaped Ice Crystal has slowly cracked, and he can't hold on.

Buzz!

Boom!

When Iceman blocked the invisible attack with his own strength and could not hold on, a sudden wave of energy came from behind him. Then, a dazzling white light erupted behind Iceman, and at the same time, a thick beam of light passed Iceman from behind and shot toward the front. It was Fire God Artillery's attack as someone had fired again with Fire God Artillery in the back!

Buzz!

However, although the Fire God Artillery's power is indeed strong but before, the Fire God Artillery's attack only persisted for less than a second before this invisible attack and it was wiped out. So this shot was nothing more than a small stone hitting the earth. It seemed to have no other effect.

"Don't stop! It doesn't matter if the Fire God Artillery is scrapped!" Just as Iceman's newly raised hope dimmed, Mirage Knight's voice passed from behind.

Boom!

Then, three consecutive dazzling lights erupted behind Iceman, and Fire God Artillery had fired continuously. It turned out that after seeing Iceman's big move actually stopping the invisible attack, Lin Rui and others also stopped. None of Lin Rui's people are ordinary people, and no one will choose to escape if they can repel that attack head-on.

So, after throwing the Fire God Artillery to Harry, Lin Rui himself has also exploded with internal energy to prepare his strongest blow.

"Thunder Strike!"

Brush!

Behind the three consecutive Fire God Artillery attacks, a similarly dazzling purple light burst out instantly. Then, a half-moon-shaped purple blade light accompanied by a purple electric arc followed the Fire God Artillery beam towards the invisible attack.

Howls whew!

After Lin Rui used his strongest attack, Spiderman continued to shoot his variant spider silk with the strongest attack power. As for Captain Rogers, he directly threw out his shield, as there was no extra long-range attack weapon on him. Harry and Daredevil also wanted to help, but they didn't even have a weapon to throw.

Rumble!

Under the full-strength attack of Lin Rui and others, the invisible spatial fluctuation attack finally burst into flames, and it seemed that some energy was consumed. It seems that as long as there is enough power, that space attack from Infinity Stone is not really capable of destroying anything.

However, even after the attack power of Lin Rui and others broke out, it still did not repel that invisible spatial fluctuation. Iceman's Absolute Freeze is still being melted, but the speed has slowed down by a lot.

"That won't work! Go Now!" Iceman shouted loudly behind him, feeling that the Absolute Freeze wouldn't last for long.

Only after Lin Rui and others have left, Iceman can desperately release the superpower of the Fifth-Level Mutant, otherwise, his teammates would be injured by mistake before repelling this attack.

"Come on again! Thunder Strike!" However, Lin Rui apparently did not intend to leave Iceman alone to face such a danger and attacked with his strongest attack. This time, the remaining internal energy in Lin Rui's body has been used up.

Buzz!

The purple light erupted again, and the half-moon-shaped blade light appeared again, blasting forward with incomparable energy.

Now only Lin Rui can attack again, Spiderman's spider silk has been exhausted, and Fire God Artillery is almost scrapped. Rogers's shield was just hit on the wave of space and was bounced back directly and it was not useful.

Howls whew!!

However, just as the purple blade light rushed forward, there was a burst of sound barrier-breaking from behind Lin Rui.

Buzz!

At the next moment, three laser beams burst from the midair behind Lin Rui and follow the purple blades in front of them into the wave of space. Is the Iron Man! Tony's Iron Man finally arrived!

“Can’t you guys do anything without me!” After the three lasers appeared, Tony’s voice passed from midair.
