

Marvel 391

Chapter 391 Worries

SHIELD Washington Headquarters, Director Fury's office.

Director Fury is sitting on his chair with a frown on his face, and the computer screen on the desk in front of him shows some information about Hydra, X-Men, and League of Defender.

Recently, Fury had been in a bad mood. Although SHIELD had the upper hand in their previous attacks on Hydra, but yesterday's battle made Fury realize that Hydra was not so weak. They just didn't reveal their cards before.

As for the card exposed by Hydra, Fury has no clue about that, and only Mirage Knight who might know something does not seem to want to talk to himself. This is one of the few things that Fury hasn't been able to control since he became SHIELD's Director. This situation makes Fury very uncomfortable.

Fury's attitude is very complicated towards Mirage Knight of League of Defender, he is both grateful and dreadful towards him, but he still feels dread for most of it. Although Mirage Knight had saved Fury's life before but since Mirage Knight appeared, Fury had found that things were getting out of his control and they were getting out of his control at a very fast pace.

In addition to the unknown information, Fury's plan to form the Avengers was also getting blocked by Lin Rui. In Fury's view, if Mirage Knight had not intervened, Iron Man Tony Stark should have been fooled into the Avengers by him. With Fury and the Iron Man present in the team, the current Avengers will not be in a situation where they are getting supported solely by Captain America.

That's right, although neither Tony nor Lin Rui exposed anything, Fury has already determined that it was because of Mirage Knight that Tony discovered his father Howard Stark's things at SHIELD. This directly led Tony to discover a new element without getting Fury's help, thus solving his own Palladium Poisoning situation.

With the intervention of Mirage Knight, Avengers was short of a guy who could hold up the situation and a guy who could argue with Rogers on the team. In Fury's original plan, the Avengers were not a one-man team of Captain America, but rather a knife in SHIELD's hand. In order to achieve such a balance, only Iron Man has enough strength and confidence to get along with Rogers as an equal.

And now Tony has not joined Avengers and in the case of a semi-cooperation with SHIELD, the current Avengers team is completely led by Captain Rogers, and Fury's plan has all but ruined. So now, Fury is under pressure from the World's Security Council and he has a team that does not follow orders. It's not strange that he is in a bad mood.

Thinking about something, Fury looked up at the computer screen again. The screen shows some current and personal information of various powers. Iron Man is followed by information on Tony Stark and Stark Industries, Captain America is followed by information on Steve Rogers and the Avengers, and X-Men is followed by information on Professor Charles. As for Hydra, there is only one name there, Alexander, and there are also a few question marks. But behind the League of Defender, all positions but Daredevil Matt are black question marks.

“Mirage Knight, who the hell are you?” Fury murmured to himself as he gazed at the black question mark representing Mirage Knight.

Fury has been investigating Mirage Knight’s identity in reality, and it is not without suspicion that he left out Lin Rui who has a good relationship with Tony in real life. However, due to the lack of evidence, Fury remains suspicious all the time. And, with Fury’s suspicious nature, he suspects a lot of people besides Lin Rui but Lin Rui is in a low position on that list.

What’s more, Lin Rui has always been “Uncommon” in school. Even if he is following Tony for an experiment now, Fury is only looking at him as a Scientific Reserve Talent, but Mirage Knight is obviously a powerful person and he should not be a Seventeen-Year-Old Juvenile.

However, Hydra’s attack has caused Fury to pay more attention to him. After all, the raid included Lin Rui’s parents, and Fury would have thought better of it. However, in the end, Lin Rui and Tony also gave reasonable explanations.

Moreover, Fury has seen the magic attack from the upgraded Iron Man. It is indeed more powerful than ordinary conventional weapons, and it can also be controlled by JARVIS. Therefore, it would be normal for Hydra to launch an attack on Lin Rui’s parents due to his relationship with Tony.

The point is that Hydra’s attack was clearly an operation against the Avengers, League of Defender, and X-Men using ordinary people as bait. If it wasn’t for Mirage Knight who had used all his relationships and requested a lot of support because of his parents’ safety, then SHIELD would have suffered a heavy loss under the attack from the Space Infinity Stone.

Therefore, the suspicion of Lin Rui’s family has been greatly reduced, as Hydra must have wanted them to use as bait. However, Fury did not know that Mirage Knight was the first to respond to this operation, and called for all support, which means that Mirage Knight is very concerned about these ordinary people.

“The Avengers are still not strong enough. Perhaps, it’s time to get in touch with that one. I don’t know if he is able to control his power over the past few years.” Fury suddenly sighed when he glanced at the members of the Avengers on the computer screen and muttered to himself.

Card ~

Subsequently, Fury turned off the information on the screen and began other work. After the attack by Hydra, Fury is now working on upgrading the SHIELD’s intelligence department, which is also a major project. Fury who is busy improving SHIELD’s strength will not know that he may not remain a Director for long because some people do not like him.

...

Just when Fury was working hard to find the clues of Hydra, the real Hydra has now changed greatly with the appearance of the Red Skull. After dispatching the Magic Cube to attack SHIELD and League of Defender yesterday, Red Skull has taken the Magic Cube to another hidden base again.

Zi Zi Zi~

Buzz!

There is a huge square in the center of this Hydra base. Now the center of the square is full of large machines, similar to the machines in the base that was destroyed yesterday. Now, these machines are working, making electrical and mechanical sounds from time to time.

In the room at the edge of the square, Red Skull sat on his sofa and watched the progress of the experiment in the square in front of him. Although the skin on Red Skull's face is close to the bones, and it is still blood red, it can be seen that the expressions on Red Skull's face is worse than Fury's.

"Sixty years! It has been sixty years since I found the Magic Cube and I have not found all of its secrets! If we go on like this, we can only wait to die when our enemies come to the door!" Red Skull whispered fiercely, looking at the machines in the square outside.

"However, after using Magic Cube yesterday, it seems that there have been some changes. I hope to completely unlock its secrets as soon as possible!"

Chapter 392 Change In Idea

Within a week after the Golden Gate Bridge battle ended, the entire United States seemed to become quiet. Without Hydra's movement, SHIELD was also very quiet. It seemed that everyone forgot that huge and dynamic battle. Although the entire American media has lavishly reported on the destruction of the Golden Gate Bridge, it does not know much about the true situation of the matter. Everyone is still doing what is usual for them.

However, a dark tide can be felt by all forces in the United States where ordinary people cannot detect it. The present quietness is by no means a sign of safety. The present quietness is just like the silence before a storm. Therefore, in such an atmosphere, large organizations and forces in various cities in the United States have temporarily shrunk their paws, for fear of being chopped accidentally.

It was another weekend and the weather was very good, Lin Rui drove out early in the morning. A week has passed and Lin Rui needs to see how Thor is doing. Since Lin Rui feels that the earth will be attacked by cosmic civilization in the future, Thor's power cannot be ignored.

Huh ~

After stopping his Jeep at the door of the home of stray dogs, Lin Rui got out of the car with his bag on his back. This time Lin Rui came over and brought Thor some food. In order to better take care of the stray dogs, Thor had not returned to the apartment for three days. He now cares about stray dogs and Lin Rui feels that Thor's sense of responsibility has been fully met.

Pū ~ Bang!

As soon as he entered the door of the home of stray dogs, Lin Rui saw a big man squat on the ground and play with two stray dogs who were physically impaired. Looking at Thor now, who can tell that he is the Crown Prince of Asgard? They would obviously say that he is a big warm man who likes animals.

"Hey! Thor!" Lin Rui shouted from afar and raised the backpack in his hand as Thor turned his head.

"Hey! Jackson!" Happy to see Lin Rui, Thor had come over. Behind Thor, several dogs followed him step by step.

"It seems that they all like you, you should have been pretty good lately." Lin Rui smiled and touched the head of a puppy near his feet and asked Thor with a smile.

"Well, I get along with them very well. I didn't even know that there was such a delightful species before. If I returned to Asgard, I would bring at least two of them with me." Holding a small pug, Thor answered with a smile.

Look at Thor's current appearance, a guy with long blond hair and a strong and handsome appearance. He still has the perfect muscles and he is currently holding a puppy in his hand, and he still has a smile on his face. If Loki saw Thor at this time, he might feel that his silly brother had been replaced with a different soul, because the current Thor is not the impulsive god he was before.

"That's good, I brought you something to eat, and I also wanted to talk to you about something." Lin Rui patted the shoulder bag and said a little more seriously.

"Well, let's go in the back." Guessing what Lin Rui wanted to say, Thor returned the pug on the ground and turned and walked back.

Two minutes later, Lin Rui and Thor were already in a utility room behind the stray dog ??house. No one will come here at this time and this room is perfect for Thor and Lin Rui to say something that they don't want others to hear.

"Jackson, what's going on? Has Loki come back to threaten you again?" Thor asked with some concern as he saw Lin Rui looking so serious.

Thor has been working hard to regain his powers since the last time when Lin Rui's acting made Loki into an evil brother who framed his brother and wanted to banish Thor forever. Two weeks later, Thor's sense of responsibility and compassion has improved a lot, but he is still far from meeting Odin's requirements.

Upon hearing Thor's words, Lin Rui felt a little moved. "No, Loki didn't for me. However, I came here because of another thing."

"What's up?"

"Thor, I need your help, I need the help of Thor." Lin Rui said seriously as he looked at Thor.

This is the first time Lin Rui has expressed his need for Thor's power in front of Thor and it is something Lin Rui has been thinking about since the first time he met Thor. Thor without divine power is just a friend to Lin Rui, but what Lin Rui needs right now is Thor with his complete power so he can defend the earth.

After listening to Lin Rui, Thor doesn't seem surprised at all. Thor is not stupid. When Thor was just exiled in new Mexico, he was knocked out by Lin Rui. The first person he saw when he woke up was Lin Rui again, and Lin Rui was obviously not an ordinary person. Thor had always believed that Lin Rui should have some other identity, such as dealing with aliens on earth.

However, after getting along for so long, Thor overturned his initial judgment. He felt that Lin Rui might really just want to be his friend. However, now that Lin Rui has made it clear that he needs Thor's power, Thor once again feels that Lin Rui should have a purpose.

“Jackson, I know there is a purpose in you approaching me and becoming my friend. Whatever your status is, whether you are forced by Loki to do something you don’t want to do, I would always regard you as a good friend. However, I have no strength right now, although I can sense the hammer but I can not summon it to me. So I can’t help you for a while.” Thor looked at the young man in front of him and said sincerely. Thor really does treat Lin Rui as a good friend, and he is willing to help Lin Rui, but Thor does not have his powers at this moment and he could not help.

Hearing Thor’s words, Lin Rui suddenly froze as he didn’t expect Thor to say that. Did Thor always know? Did Thor always know that? He knew he had approached him on purpose, but Thor was still willing to help me and treat me as a good friend. At this moment, Lin Rui has some complicated feelings in his mind. Maybe Lin Rui has always done things with a lot of purpose behind them.

In fact, it should not be blamed that Lin Rui initially approached Thor with purpose. After all, this is a Marvel World. Under the circumstances of the story, there are mainline quest and Reward points. Lin Rui will definitely make such a choice, it was just like contacting Tony in the beginning to complete the quest.

After all, unlike Peter and Harry, Thor did not become friends with Lin Rui at the beginning. Lin Rui could not give up his Reward points for a stranger. But now, Lin Rui has already regarded Thor as one of his best friend, otherwise he would not have introduced him to Peter and Harry. Therefore, after seeing Thor’s sincere eyes, Lin Rui suddenly realized that he had always been a little too practical. Sometimes a friend needs to remain a friend and should not be used for anything.

“Thank you, Thor. Don’t worry, you’ll get your powers back and teach Loki a lesson!” After understanding what Thor was thinking, Lin Rui swallowed what he was about to say and looked into Thor’s eyes.

From this moment on, Lin Rui has decided not to think about using Thor to complete any of her plans. Thor is Thor, and he would still be Thor even if he gets back his powers. He is his friend, not an item that he can use at will. Therefore, he would be very grateful if Thor could help him after gaining back his powers and he would not feel sad if Thor was unwilling to help him.

“Well, I have nothing more to do. I’ll sort it out myself.” Finally, Lin Rui reached out and tapped Thor’s solid shoulder, then turned to leave.

“Jackson ...” Seeing Lin Rui’s sudden change of attitude, Thor shouted out his name.

“Don’t worry, I can do it! You’d better find a way to pick up that hammer soon. I think you’ll be back to the Asgard soon!” Lin Rui was out of the utility room while waving his hand.

Card ~

Afterward, Lin Rui left the home of stray dogs with nothing, and Thor remained in the utility room. A few minutes later, Thor walked out of the utility room calmly, still holding a somewhat worn newspaper in his hand, which should have been brought in by someone before.

The first edition of the newspaper in Thor’s hand contained a large picture of the Golden Gate Bridge that had been blown into two sections. And there is a huge title on the first edition: SHIELD shot again, Golden Gate Bridge suffers, facing the unstable factors of the world, we need Superhero.

Chapter 393 Discovery

By the time Thor walked to the front hall of the stray dog's house with the newspaper, Lin Rui had already driven away with his jeep. Ben in the hall was a little puzzled that Thor had not sent his friend away. Last time he had seen Thor's enthusiasm for his friend.

"Hey, Thor, why didn't you send your friend away? It seemed to me that he left in a hurry." "Ben asked curiously, seeing Thor coming. After two weeks of being together, Ben has completely accepted Thor as a big man to take care of the dogs in the home of the stray dogs. Moreover, although Thor is handsome and attractive to girls, he doesn't seem to notice it himself, which makes Ben appreciate it.

Faced with Ben's question, Thor did not answer but just looked at the newspaper in his hand. The picture and the huge headline on the first page seemed very attractive. Naturally, Ben noticed that Thor had not answered and then he saw the newspaper he was holding.

"Are you also interested in this news? Now the world has become quite weird, Captain America is resurrected, Vigilantes have become the main theme, and there is also the mysterious SHIELD and an even more mysterious evil force. Before, I thought that these kinds of things only happened in comics." Ben expressed his opinion about the newspaper Thor had read.

Obviously, Ben is sick of what's going on in the world right now. After all, although these things still happened before, they would not be exposed to the public like this. A few months ago, some small famous Vigilante appeared in New York. It began when Iron Man appeared and then that big fight happened at Washington SHIELD headquarters. Then came the resurrection of the national hero Captain America Steve Rogers, and last week, the Golden Gate Bridge was destroyed, and now the world has changed beyond the ordinary Man's grasp.

"The world needs a Superhero? Yes, but who has an obligation to do so much for the safety of others? However, I am a fan of Captain America and Iron Man, they should be called Superhero. Maybe the whole fucking world needs people like them to save it." Without waiting for Thor's reply, Ben continued.

"Superhero? Does this world need to be saved? Ben, do you think there are people who have been secretly and silently watching over you, protecting you from the forces of evil?" Finally, Thor responded after Ben finished his speech.

"This ... Of course. In addition to Captain America and Iron Man, who I've talked about before, we have Vigilantes in New York, who are very close to the people and have taken our city's safety into their hands." Hearing Thor's words, Ben thought for a moment and answered seriously.

Hearing this, something flashed in Thor's eyes as he spoke, "New York's Vigilante? Which ones?"

"Now the most famous one should be Spiderman. He rescued my cousin's best when the car accident happened half a month ago, otherwise, she would be lying in the hospital at this time." Ben continues to answer seeing that Thor is a bit interested in these.

"Yes, Spiderman belongs to League of Defender. If you are interested in Vigilante of New York, you can go to League of Defender fans website to see them, New York's most famous Vigilantes are in it." After Ben finished speaking about Spiderman, he added another sentence.

“League of Defender? I know. Ben, can I use your computer?” Upon hearing Ben’s words, Thor threw the newspaper on his side and asked anxiously.

“Well, you can use it. But, are you really that interested in them? I am a member. You can see more things by logging in to my account.” Seeing Thor’s reaction, Ben said curiously.

Finally, Ben logged onto his fan’s account to the League of Defenderfans website for Thor. Ben isn’t exactly a loyal fan, but since he regularly visits the site, his rating isn’t as bad, he can see more videos and photos of the League of Defender than non-fans can.

Speaking of the League of Defenderfans website, after Jerry joined the League of Defender, it has already become an official website. Jerry will often publish something that can be revealed to the public, such as which gangs they took care of and which drug gangs they finished.

In addition, Jerry also created their own feature homepage for each member of League of Defender. Everyone’s close-up homepage contains single-person videos and photos, including the most active Spiderman videos and photos, and Mirage Knight’s. However, Lin Rui mostly operate at night, so seeing his photos and videos only had a mysterious feeling.

“This is Spiderman. People say that this Spiderman seems to be just a teenager less than 20 years old. I really don’t know how he got this strength. And the spider suit he was wearing. If I had that suit I could fly!” There’s a Spiderman poster on the front page, and Ben points to it for Thor.

Following Ben’s introduction, Thor carefully watched Spiderman’s videos and photos, many of which showed Spiderman weaving through the streets with a web. After looking at the image of Spiderman, Thor had some doubts in his eyes. He felt that the flying “Spider” was familiar to him, but he couldn’t remember it.

“This is Mirage Knight, the mysterious Vigilante that appeared earlier than Spiderman. Because he mostly appears at night, there are not many videos about him. Speaking of it, Mirage Knight should be considered the predecessor of Spiderman.” After finishing Spiderman, Ben pointed out the Mirage Knight page and introduced it.

This is the introduction of Mirage Knight. When Thor saw the figure of Mirage Knight on the computer, his eyes changed dramatically, like he found something unexpected.

“By the way, speaking of League of Defender, the Golden Gate Bridge was destroyed in the newspaper you just read. The report only mentioned SHIELD being there, but there is a rumor on the Internet that League of Defender also appeared, it seems that they were teaming up with SHIELD. However, in the end, their opponents were also very powerful, and they blew up the Golden Gate Bridge. I don’t know if anyone was injured. There is no new official video update this week. “

“Did you know SHIELD? This is a global organization that appeared with Captain America in front of the public to protect the safety of the entire planet. However, in my opinion, SHIELD seems to be bragging, they could not even deal with these terrorists, how could they protect the entire earth.” Not waiting for Thor to say anything, Ben went on.

Call ~

Just when Ben just finished talking, Thor next to him suddenly stood up and then strode away.

“Hey, Thor, where are you going?”

However, Thor did not stop at Ben’s shouting and he rushed out of the home of stray dogs.

Ten minutes later, Thor had arrived at an open area behind the stray dog’s house. With the newspaper that was thrown aside by him in his hand, Thor couldn’t tell how he was feeling right now.

“So, Jackson, have you been doing this all this time? I know you need my help. Don’t worry, I’ll help you keep the world safe.” Thor said to himself as he looked at the ruined Golden Gate Bridge in the newspaper.

After seeing the figure of Mirage Knight on the computer, Thor almost instantly determined that it was Jackson Lin, the first friend he made on earth. Others may not be able to see the appearance, but Thor can be sure that this is a little ability he still retains.

Call!

After talking to himself, Thor threw the newspaper aside. Then, Thor slowly closed his eyes and his hands squeezed gradually on both sides.

“Mj?Inir ...”

Chapter 394 Feedback

Buzz ~

Just when Thor guessed Lin Rui’s hidden identity in New York and began to call Mj?Inir, the ground shakes inside the tier 1 SHIELD base in New Mexico, USA.

Boom!

At the beginning of the shaking, the door of one of the laboratories in the experimental base suddenly opened and an old professor wearing a white research suit rushed out of it.

“Is that hammer moving again?!” The Professor responsible for researching Mj?Inir shouted loudly, ignoring the shaking base and looking at the guards running past the door.

“Yes, Professor, the research team is going there now.” The guard shouted by the professor stopped and answered his questions, then hurried away.

Call!

Looking at the hurried guards in the corridor, the expressions on Professor Dandy’s face became very bad. He quickly returned to his room and picked up some research materials. Professor Dandy was already following the guard toward the center of the base.

Mj?Inir has been in the hands of SHIELD for several months. With the power of SHIELD, many academic and physical scientists and professors have been invited to study this magic hammer. However, apart from being able to judge that the patterns on Mj?Inir are somewhat similar to those recorded in certain myths and legends, they can now be said to have achieved nothing.

In the past few months, Mj?lnir also experienced some movements from time to time. Most of the time, it will vibrate in place, and then trigger a low-level earthquake in the nearby area. A small amount of electrical light is emitted on a small scale, which is enough to disable the electrical system at this level 1 base of the SHIELD.

Moreover, as Thor himself progressed, Mj?lnir was summoned more and more frequently and responded more and more. But this is the first time such a strong tremor had been felt.

Boom!

Hula ~

When Professor Dandy followed the guard and rushed towards the center of the base where Mj?lnir was placed, there was suddenly a more violent shock than before and the entire base shook and the walls of the corridor began to twist.

This is the first level of the SHIELD, the world's best in terms of earthquake protection and defense. However, such a base could hardly hold on when Mj?lnir reacted a little, which shows how powerful Mj?lnir is.

Rumble ~

"Hurry up! Something must have happened!" Without waiting for the shock of this wave to end, Professor Dandy had urged the guard to rush ahead.

The guard urged by Professor Dandy could not help but he had to protect Professor Dandy in the swaying corridor and quickly rushed towards Mj?lnir's position. They are armed personnel, and it is their duty to protect the technical personnel.

Just as Professor Dandy, who was responsible for researching Mj?lnir, was on his way, the center of the Mj?lnir base was surrounded by dozens of heavily armed guards, and in front of them was a team of five excited researchers.

Buzz ~

At this time, Mj?lnir did not stay quietly on the ground, but was suspended at a position about one meter above the ground, and was still slightly vibrating. There were some engraved patterns on the dark silver surface of the hammer that flashed with blue electric light from time to time. Every time a pattern lights up, there will be a vibration from Mj?lnir, and then there will be a violent shock in the entire base with this area.

"This is a miracle! It must be a miracle!"

"Science can't explain it! A completely autonomous weapon with such a mysterious and powerful power must be a divine tool!"

As Mj?lnir floated in mid-air and responded to Thor's call, the researchers around it shouted enthusiastically. The research on Mj?lnir during this period has led them to almost abandon the existing scientific system on earth and understand the hammer from a purely mythological point of view, while the phenomenon in front of them seems to indicate that it really does not belong to the category of science.

“If it really is a scientific creation, it must be from a cosmic civilization with a technological level far beyond that of the earth! The interior has at least a very complete gravity regulation system and a powerful electrical system, but the product of such a civilization is already a divine tool for us! ” Although some researchers explain it from a scientific perspective, they have to acknowledge the divine tool status of Mjolnir.

Buzz ~

“There it is! Another engraving is lit up!” Just as these researchers watched Mj?lnir, one person shouted suddenly.

On the floating Mjolnir, an imprint that had never lit up before suddenly lit up. It was a flash of blue light, and in an instant it was swimming around Mjolnir.

Shout!

“Not good! Get away from it!” Just as those researchers were holding the instrument excitedly and began to record the suddenly lit lines, Professor Dandi who had rushed over shouted.

Zila!

But before anyone else could react, an electric light rushed out of the floating Mjolnir.

“Ah!”

Pū Pū Pū!

The researchers closest to Mjolnir were immediately swept away by the lightning, screaming and falling to the ground. Then the guardsmen, who were surrounding the rear, did not last long either and fell one by one under the sweep of the blue lightning.

“Damn it!”

Thump!

Professor Dandy watched as the electric light rushed towards him and Professor Dandy had been hit and fell to the ground while swearing in his heart.

Zila ~~

Pū Pū! Kakaka ~

The electric light that swept the center of the base did not stop, and it rushed out of the base of SHIELD in a few tenths of a second and radiated out towards the outside in a large area. Finally, the blue electric light suddenly disappeared after rushing out of the base for more than ten kilometers, and the vibration slowly disappeared.

Finally, Mjolnir slowly fell back to the ground without being seen by the stunned researchers. However, Mjolnir is now facing in the direction of New York compared to its previous position.

...

"I guess I am still not good enough!" After Mj?lnir was quiet, Thor in New York relaxed his clenched fists and said to himself.

Thor's efforts to "Reform" after this period of time has finally made it so that he could sense Mj?lnir, but there is still a long way to go before it can be summoned. Thor didn't know that each of his calls would cause a lot of damage to SHIELD's base in New Mexico, but even if he knew it, he wouldn't care.

Finally, Thor, who failed to summon his hammer again, turned and walked back towards the home of stray dogs. He did not know that in New Mexico, hundreds of kilometers away from New York, he caused a major blackout due to his call, including once again destroying the electronic system at the SHIELD base and causing some injuries.

Chapter 395 Lift-Off

Leaving the home of the stray dogs, Lin Rui is unaware that Thor has guessed his identity and nearly destroyed the SHIELD's base in New Mexico by summoning Mjolnir. SHIELD has done a good job of keeping Mjolnir secret, even if the base does get destroyed.

Lin Rui now has no intention of forcing Thor to get back his Divine Power and use his powers to destroy Hydra to protect the earth. After hearing Thor's words, Lin Rui realized that he might have ignored his real life because he was too concerned about completing the system's quest.

Lin Rui is not just Mirage Knight, he is also Jackson Lin, a person who lives normally in this Marvel World. He has his own friends and his own family. Lin Rui feels very guilty for involving his family in the quest affair. Lin Rui will not let something that happened to Tom happen again.

Therefore, although it is true that Lin Rui initially approached Thor as a quest to accomplish his goals but now Thor is Lin Rui's best friend. Friends have their own choices and should not be used all the time. In this way, Lin Rui suddenly comes to the conclusion that Thor's matter is just luck.

Brush!

Lin Rui's jeep was fast on New York's main road outside the city. In addition to taking a look at Thor today, Lin Rui also has a more important mission, which is a counterattack against Hydra. After a full week of investigation, and with the help of Professor Charles, SHIELD finally locked a larger base in Hydra, at least as large as the one found in New Jersey last time.

Now, Lin Rui has to find a place to park his jeep and then turn to Mirage Knight to leave. The base of Hydra discovered this time is not located near New York and would take a long time to get there on a hoverboard. So, for speed and convenience, Lin Rui is hitchhiking on the SHIELD's carriers this time.

Brush!

After leaving the high-rise building in New York, Lin Rui parked the jeep in an unobtrusive place on the side of the road, and then he took out his Hoverboard and flew in one direction. Over there is a SHIELD base with Quinjet stationed, where Lin Rui was to hitch a ride.

...

SHIELD Washington headquarters, because the location of Hydra's base has been determined, now the headquarters is doing its best to prepare for the war. Although they did not specifically see the strength

of Hydra in the last battle of Golden Gate Bridge, they also learned from some later reports that Hydra has a powerful weapon that can be called the ace card, a large number of robots, Alpha team, and the most important, they have Space transmission technology and Space Type attacks.

Director Fury of SHIELD is now standing on the edge of the large weapons reserve square on the ground floor of SHIELD. In front of Fury is an advanced Quinjet, and the most eye-catching one is the giant steel behemoth in the center of the square: The Helicarrier.

After Tony handed over the technology for a large anti-gravity system. The final installation and testing of the SHIELD was urgently completed in a week. Now, the ship that represents the SHIELD's most powerful piece of technology is actually up and running, with fighter jets for rapid, global support strikes.

Looking at the huge Helicarrier in front of him, Fury has some excitement in his eyes. As Fury is committed to using absolute force against any enemies of the entire planet, the completion of the Helicarrier is a huge step forward. While Fury's eyelids have been twitching recently as if something bad is about to happen, the completion of the Helicarrier has made Fury a lot happier.

"Director, is it really necessary to use an Helicarrier?" "An information officer approached Fury with some concern as he stared at the Helicarrier and wondered about the SHIELD's bright future.

This is, after all, the first actual large air combat Helicarrier and it is getting dispatched for the first time to deal with Hydra. Moreover, under the circumstances that Hydra has exposed such a powerful strength, some people feel that it is not good to directly take the Helicarrier against them. At least, they should let the Helicarrier experience several actual combats before confronting an enemy like Hydra, so that they could find some small problems in actual combat and improve upon it.

However, Fury obviously didn't think so. In the battle against Hydra, Fury will not show a soft hand. Although this would indeed be the first time that the Helicarrier would experience actual combat but Fury has absolute confidence in it. Moreover, it is also useful to take the Helicarriers directly to Hydra. Hydra had exposed a strong power in their last attack, this time Fury also needs to use enough power to completely erase them and the most suitable thing for that task is the Helicarrier.

"I know what you are worrying about? This Helicarrier is the most advanced weapon in SHIELD. The Hydra base we are attacking today should be the biggest base they have left. Since Hydra had revealed such strong power in the last fight, then we also need to give a reply and we cannot let other forces in the world underestimate SHIELD!" Fury's one-eye shifted from the Helicarrier to the information officer around him and he spoke calmly.

"Reply?"

"That's right! SHIELD is not the number one power in the world. We need to prove it. So, let's start this big guy!"

Buzz!

Boom!

Following Fury's comments, he has also issued the order at the same time. Following Fury's order to activate the Helicarrier, the Helicarrier, which was quietly staying in the middle of the square, suddenly

lit up everywhere, which was a signal to be ready. Then, Four anti-gravity engines mounted on the bottom of the Helicarrier started working at the same time, and the four large anti-gravity engines generated a huge thrust from the earth itself.

Huh ~

Under the steady thrust of the earth, the huge steel behemoth slowly levitated from the ground. At the same time as the aircraft carrier was launched, the previously closed ground above the square opened rapidly to both sides.

“Anti-gravity engine operating normally and the output power is stable!”

“Now turn on the auxiliary propulsion engine!”

Boom!

Two meters above the ground, in addition to Four large Anti Gravity engines, 16 light blue flames erupted at the bottom of the carrier again. This is a large-scale particle propeller, which would be used in addition to the Anti Gravity Engine to fly this Helicarrier in the air.

Buzz ~

With the help of sixteen large auxiliary engines, the huge Helicarrier slowly flew out of the square on the ground floor. On the ground, everyone saw a huge steel behemoth seemingly rising from the ground contrary to the laws of physics.

Finally, the Helicarrier stopped while rising vertically to the 100-meter position. At this time, people at SHIELD headquarters can see a steel city suspended in mid-air as soon as they raise their heads. This kind of visual shock is not weak.

“The Helicarrier successfully lifted off! Now set the flight route!”

After the Helicarrier was suspended in midair, Fury had already left the underground square. Sitting in a Quinjet, Fury looked at the Helicarrier suspended in midair and the enthusiasm in his eyes could not be concealed.

Chapter 396 Boarding

Brush!

Far above New York, a Quinjet was hurtling past with Lin Rui on board. Of course, in addition to Lin Rui, Spiderman Peter is also up here. Lin Rui and Peter were standing in front of Quinjet looking up at the scene through the glass.

In this battle against Hydra, only Mirage Knight and Spiderman came from the League of Defender. Although Deadpool has shown vital signs, it will take a while before he could recover completely. Harry wanted to help, but he had to deal with Oscorp. After all, Harry is an Executive Director and he is very busy.

As for Jack, he knew that his own strength would not play a big role in such a battle, so he felt that he would first try to improve his strength before going out. The remaining Daredevil was dispatched with SHIELD's Avengers, and he should now be on an Helicarrier.

Shout!

"Mirage Knight, we will be approaching the Helicarrier in a few seconds." As Lin Rui and Peter admired the beautiful clouds at high altitude, the person in charge of this Quinjet walked up to them and said.

When talking about the Helicarrier, the person in charge was obviously very proud. It seems that the successful launch of SHIELD's Helicarrier is indeed an exciting success for SHIELD.

"I see." Lin Rui nodded to show that he understands.

In fact, Lin Rui was not surprised that Fury would send out the Helicarrier with an Anti-Gravity engine in this operation. With Fury's character, it would be surprising if he did not send it out. Moreover, Lin Rui and Tony are secretly building an E Grade Aero Space Warship, so SHIELD's Helicarrier is not as amazing to them as it is to others.

Call!

"Then ... is that the Helicarrier?" However, when Lin Rui thought about the superiority of the E Grade Aerospace Warship compared to SHIELD's Helicarrier, Peter's voice suddenly came from the side. Listening to Peter's tone, it seemed that he is surprised.

"What's wrong?" At the sound of Peter's voice, Lin Rui turns his head to look that way. However, halfway around, Lin Rui already knows why Peter's voice is a little strange.

Right in front of this Quinjet is a huge steel behemoth that is "Floating" in the clouds above the sky, it looked just like the city built in the sky in a science fiction movie. Although Lin Rui has already known about SHIELD's Helicarriers for a long time, he was still shocked to see it for the first time in real life. This behemoth is indeed a piece of science fiction.

Lin Rui is also able to see the external facilities of the Helicarrier as they approach rapidly. Far from Lin Rui's memory, this Helicarrier is taller than it appears in the movies, both in size and in the sense of science fiction. This Helicarrier looks more like a flying fortress of war. Lin Rui was getting nervous as he watched the rows of High Tech Cannons on either side of the Helicarriers. They were enough to destroy half the city.

There are some fighter planes flying around this steel behemoth flying at high altitude, not only Quinjet but also other top-level aircraft of the United States at this stage. Such an aerial fortress not only flies fast but it can also carry armed forces sufficient to destroy a small country. It can be said that the SHIELD with the Helicarriers and the SHIELD without the Helicarriers are two different levels of deterrence for the rest of the world.

"No wonder Tony said that the Helicarrier can be used in the fight against the Aliens. The armed forces of such a war fortress are indeed already very strong." Lin Rui murmured secretly, looking closely at the steel giant in front of him.

Simply comparing in volume, the E Grade Aerospace Warship is not as good as the Helicarrier in front of him. According to the blueprint design given by Lin Rui, the E Grade Aerospace Warship that they are building is probably about the same size as the current large passenger aircraft. Because E Grade Aerospace Warship is a combat-oriented aircraft, having this type of body is normal.

“Huh? Mirage Knight, what are you talking about?” Vaguely hearing Lin Rui, Peter asked curiously beside him.

“Uh ... it’s nothing, but I think this Helicarrier is big enough.” Lin Rui said quietly.

“Haha, our Helicarrier is not just big! You’ll see what it does when it goes into action. It’s going to surprise you!” Hearing Lin Rui’s words, the person in charge standing behind him said with a smile.

Dī Dī ~

“Okay, we’ve got approval for landing, it’s time to go.” After boasting about the Helicarrier, the light on the headset of the person in charge flashed twice and then he spoke to Lin Rui and Peter.

Brush!

Then, the Quinjet passed through the other flying aircraft and landed on the landing platform at the tail of the Helicarrier. The high-altitude environment is a long way from the ground, but it’s clearly not a problem for Quinjet and its seasoned pilots. After tweaking the airframe a little, the Quinjet charged firmly onto the Helicarrier, skidding for less than 100 meters before coming to a halt.

Card!

Under the leadership of the person in charge, Lin Rui and Peter walked out of THE Quinjet. When they walked out of the Quinjet, the first time they noticed was the thin air, the low temperature, and the violent wind blowing from all directions. However, both Phantom Suit and Spider-Man Suit can adjust the internal environment, so Lin Rui and Peter will not feel the changes in the external environment too much.

The SHIELD personals who followed Lin Rui and Peter were equipped with protective clothing before they came out. Although such an environment will not cause many problems for those who have been trained, no one wants this environment to affect themselves. So, after seeing Lin Rui and Peter wearing their hero suits and coming out without feeling anything, those people were a little envious.

“It’s really a different feeling.” After deliberately turning off the Phantom Suit’s environmental conditioning, Lin Rui felt the special high altitude environment. Of course, such an environment made no difference to Lin Rui’s current constitution.

Dada ~

Before Lin Rui and Peter could see what was going on around them, a group of people walked towards them led by Captain America Steve Rogers in his blue hero suit. Captain Rogers is still wearing his hero suit at the high altitude of 10,000 meters, it seems that such an environment has little to no effect on him. As for Hawkeye and others who follow Rogers, they are wearing some protective clothing.

“Welcome, Mirage Knight, Spiderman.” Rogers greeted with a smile while walking in front of Lin Rui.

“Thank you, Captain. By the way, this Helicarrier is very good.” Lin Rui reached out and shook hands with Rogers and said back.

“Thank you. Then, let’s go ahead. Today’s battle would determine the Hydra’s fate.”

“Of course, I hope Hydra will completely disappear from this world after today.”

Chapter 397

Following Rogers, Lin Rui and Peter both entered the command center of the Helicarrier. As New York’s Vigilante or a third-party person, Lin Rui’s ability to enter such a confidential place is because he is trusted by Rogers and Fury.

In the same massive space command center, Fury stands at the center of the podium with the entire aircraft carrier under his command. Fury is in charge of this attack against Hydra. Of course, the League of Defender and the X-Men don’t count as they are not under his command, but they would work together.

“Looking at Director Fury’s face, it seems that Hydra would not survive today.” Without greeting Fury, Lin Rui and Rogers, among others, stood at the edge of the command center and surveyed them. After seeing Fury’s serious expression in front of him, Lin Rui smiles and says.

“Taking out an Helicarrier is no joke, and Fury wants to make sure that he kills Hydra once and for all,” Rogers explained in a hushed tone. Because there is now a secret between Rogers and Lin Rui, there are some words that do not need to be listened to by Fury.

“However, if what you said to me last time is true, I am worried about whether the Helicarrier can play the role it should have.” Finally, Captain Rogers whispered to Lin Rui.

Obviously, the last thing Lin Rui revealed to Rogers was about Infinity Stone that worried him. Although SHIELD has come up with its strongest fighting power, Captain Rogers still has some reservations in the face of the power of Infinity Stone.

“Relax, we are still here. I also told this to Professor Charles. We are all prepared for the power in Hydra’s hands. So today, even if Hydra came up with a weapon even more powerful than last time, we would still have a chance to win. And, you have to have more confidence in the Helicarrier.” Knowing what Rogers was worried about, Lin Rui also answered in a low voice.

In today’s battle, Lin Rui is not the main character because he has no good solution to the Space Infinity Stone attack. He does not have a lot of Reward Points that can be exchanged from the System Shop for restraining space weapons. Therefore, today’s battle mainly depends on SHIELD, Tony, and X-Men.

SHIELD’s Helicarrier has many powerful weapons and it is loaded with more fighter planes. Lin Rui felt that it was enough to cope with the space attack with this Helicarrier alone. Not to mention the Iron Man army of Tony, the upgraded Iron Man is enough to cope with most of the situations. Therefore, Lin Rui is not so worried about the space attack that took them by surprise last time.

As for the X-Men, although Iceman, a Level 5 Mutant would be unable to enter the battle due to serious injuries. But Charles had sent more powerful members of the X-Men, with Storm as the main force. Last time it was Storm’s Thunder attack that broke the Space Gate and this time it should be the same.

In fact, if Lin Rui wanted a little more insurance, he could have asked Rick to help them. But last time Lin Rui got them involved when they shouldn't have. Therefore, Lin Rui did not inform Rick about this operation.

Otherwise, it would be much easier to deal with Hydra by having several sorcerers construct a Mirror Dimension in advance. Lin Rui does not believe that Hydra has access to magic and can get out of the Mirror Dimension. However, it will not be easy to build a Mirror Dimension that can contain the entire Hydra base and it would require at least six sorcerers to work together. Therefore, even if Lin Rui asks Rick for help, he would not involve others.

"You can be sure of that, but I don't know if Hydra has any other unexpected Cards this time around. By the way, what kind of thing is the Infinity Stone, or the Magic Cube? What do we do with it?" Rogers nodded before asking.

In the previous conversation, Lin Rui only talked about the existence of a Magic Cube and did not talk about the ownership of the Magic Cube after the elimination of Hydra. In fact, the existence of Magic Cube is known only to Lin Rui, and some of them, Lin Rui and Professor Charles later talked about Infinity Stone.

As for the Magic Cube's ownership, it is still early to discuss about that, after all, Hydra has not been eliminated. But it is certainly an issue that will not go unnoticed. After the destruction of Hydra, Lin Rui is sure to have another conversation about the ownership of Magic Cube.

"Magic Cube, you will know when you see it. That's one thing that doesn't get overlooked, and of course, we want to make sure we get it when we destroy Hydra. If we couldn't destroy Hydra, we at least have to take the Magic Cube."

"Understood."

After chatting with Lin Rui, Captain Rogers quietly walked aside and Spiderman also quietly leaned over to talk to him at this time. Such an opportunity for close contact with his idol would not be wasted by Peter. And Fury also saw Rogers and Mirage Knight talking with each other. He was very concerned about what Rogers and Mirage Knight said, but the monitoring system inside the Helicarrier failed near Mirage Knight, Lin Rui would not let Fury watch him all the time.

After talking with Captain Rogers, Lin Rui contacted Tony through Jerry. After learning that Tony's Iron Man army had assembled, Lin Rui felt more confident. Just like Tony said: "No matter what. They will win!"

Tony is very confident about this action, after all, his Iron Man army has fought against Hydra more than once. Even the last powerful Space Attack was finally blocked by Hundreds of Iron Man working together.

After breaking contact with Tony, Lin Rui contacted the X-Men. Since the X-Men has their own Advanced Full Stealth Supersonic Jet, they will move on their own, Lin Rui just wants to know if they can arrive at the exact time.

"Hello, Mirage Knight." When the communication was connected, Lin Rui's ear suddenly heard the steady voice of Professor Charles.

“Professor Charles? Why are you? Are you also on your X fighter?” Lin Rui obviously connected to the X-Men fighter Jet, but it was Professor Charles who spoke, which surprised Lin Rui.

“Yes, I am one of the combatants this time.” Hearing Lin Rui’s surprise, Professor Charles replied calmly.

As the mind of X-Men, Professor Charles, who has rarely made a move in these years, finally came out again, he did not come out to deal with his old opponent Magneto, not against the other Mutants, but he moved against Hydra.

“I have to say, Professor Charles, this is quite a surprised.” After confirming that Professor Charles shot this time, Lin Rui was shocked and said seriously.

Chapter 398 Doubts

To be honest, Lin Rui had always thought that Professor Charles is very strong, he may be even better than the Level-5 Mutant Iceman who cannot fully exert his own strength. After all, his mutant ability is telepathy and control, which poses a greater threat to people. However, Lin Rui never regarded Professor Charles as a combatant type person, he was more like a leader, a wise old man.

So, after hearing that Professor Charles is coming to this battle, Lin Rui was a little surprised. But he quickly accepted the situation, after all, Professor Charles had once used his powers to make the world fear him.

“Since you said that this station is significant, then I will do my best. Moreover, there are some Mutants in Hydra that would not be easy to deal with. I hope to limit those people from causing any harm and save more of our kind.” After hearing Lin Rui’s obvious surprise, Charles continued to answer indifferently.

Listening to Charles mentioning Mutants in Hydra, Lin Rui’s heart suddenly skipped a beat. Having been so preoccupied with Infinity Stone lately, Lin Rui has forgotten something important. That’s Quicksilver and Scarlet Witch, the children of Magneto.

From the beginning, after learning that Quicksilver and Scarlet Witch were working for Hydra, Lin Rui wondered if the Brotherhood of Mutants led by Magneto had any connection to Hydra. Of course, it is possible that Magneto did not know he had such a pair of children and Lin Rui could use this to make Magneto and Hydra die.

However, if there is a connection between Magneto and Hydra, then today’s battle may have some variables. Lin Rui, who had already been broken by the broken plot, had to think more, but he really hoped that Magneto and Hydra had nothing to do with each other.

Magneto as the other radical force leading Mutants: The Brotherhood of Mutants, his strength is beyond doubt, the strength of the Mutants Brotherhood can not be underestimated as it won’t be any worse than X-Men. If Magneto intervenes in today’s battle from Hydra’s side, maybe their plan to destroy Hydra won’t go as they had planned.

“Professor Charles, a question has just occurred to me.” Thinking of this, Lin Rui quickly spoke to Charles.

“What is it?”

“Regarding the Mutants Brotherhood, have you noticed anything about them lately? Or do you know what happened to your old friend Magneto?” Without beating around the bush, Lin Rui asked directly. Lin Rui believes that the X-Men, who have been dealing with the Mutants for so many years, must know something about their opponents.

“Is there news from the Mutants Brotherhood and Magneto? They haven’t seemed to be moving recently, and they took some small actions which were within our expectations. Some time ago Magneto planned to assassinate a member of Parliament who opposed Mutants, but we stopped it. Mirage Knight, why did you ask this?” Despite his curiosity, Professor Charles answered Lin Rui’s question.

“Assassinate a member of parliament who opposes Mutants? When did it happen?” Although Hydra doesn’t seem to have anything to do with the assassination, Lin Rui doesn’t want to let go of the possibility.

“That was a month ago, and Erik didn’t do it himself. To be honest, Erik probably knows me better than anyone else in the world, and he has Mutants who block my telepathy, so I can’t find him.” Charles seems to recognize the seriousness in Lin Rui’s voice and continues to speak.

“A month ago? There seems to be no connection.” After hearing Professor Charles’ reply, Lin Rui can’t think of a connection between Hydra and the assassination of the senator. Moreover, it is not the first time that the Mutants Brotherhood tried to assassinate someone from the government. Magneto did not personally take action, it should be an act of simple revenge.

“Mirage Knight, have you found anything? Or do you think Hydra has something to do with the Brotherhood of Mutants? I can assure you that the Mutants in Hydra are not from the Mutants Brotherhood, Magneto will not let Mutants be controlled by Hydra as goons.” Professor Charles seems to have heard something from Lin Rui’s tone and continued.

From what Charles knew about Magneto, he was a self-interested man, but a good one for the Mutants community. He was radical, but his starting point was for the good of the whole Mutants community, or else there wouldn’t be so many Mutants following him, and Mutants are no fool.

The Mutants inside Hydra are completely controlled, they do not even have their subjective consciousness. Magneto couldn’t have done this to his own kind, that’s his bottom line.

“Well, in that case, Magneto doesn’t know ...” Lin Rui murmurs in response to Professor Charles’s assurances about Magneto and Mutants.

If Magneto really has nothing to do with Hydra, then Quicksilver and Scarlet Witch should be controlled by Hydra for other reasons. Moreover, Lin Rui has also fought against the two siblings twice, and he can also feel that Quicksilver and Scarlet Witch are different from other Mutants controlled by Hydra. Quicksilver and Scarlet Witch seem to be less rigid, they are more like a cross between finishing a mission and taking a measured move while doing so.

“Mirage Knight, what are you talking about? Magneto doesn’t know what?” Although Lin Rui had said it quietly, Professor Charles heard it.

“Nothing, just ... Professor Charles, if a fight breaks out, you might want to keep an eye out for two Mutants in Hydra. One is the Mutant with Silver Hair with Superspeed and the other is a Red-Haired Mutant with Mind Powers. They are twin siblings.” Lin Rui does not intend to tell Professor Charles this secret for the time being, but he can let him pay attention to the twin siblings.

“Mutant siblings? I will pay attention to them.” Upon hearing Lin Rui’s reminder, Professor Charles agreed.

“Don’t be careless, both of them are high-level mutants. The sister, in particular, is quite strong, she is probably on a similar level with Iceman in terms of power.” To save the X-Men from harm, Lin Rui adds.

“You mean that the Mutant ability of the sister has reached the Fifth Level?! How is this possible? Without the correct guidance, the Mind type Mutant ability can hardly be controlled much less reach such a high level. Who is she?!” Professor Charles, who had been calm, asked in a hurried voice after hearing Lin Rui say that Scarlet Witch was essentially a Level-5 Mutant.

The X-Men originally had more than just Iceman as a Level-5 Mutant. There was another Level-5 Mutant named Phoenix who hurt other people because she couldn’t control her abilities. So, in order not to hurt X-Men and destroy the earth, the Phoenix Girl exiled herself before she went completely mad. Now no one knows where she is. Perhaps she is hiding in an isolated place on earth or it is more likely that she is away from the earth.

“Well, perhaps I can tell you the answer after this operation, Professor Charles.”

“Okay, Mirage Knight, I’ll wait.”

Later, Lin Rui disconnected the call to Charles. After confirming that the Mutant Brotherhood of Magneto would not intervene, Lin Rui felt more at ease. As for the Twins, Lin Rui felt that if he used them well, he might gain a lot of benefits. However, these should be considered after the elimination of Hydra.

Chapter 399 Attack

After Lin Rui disconnects from Charles with a stern face, Peter comes to his side.

“What’s wrong? Did you find anything?”

“No, it should be fine. By the way, our main mission for today’s battle is to get the Magic Cube, and the rest can be left behind. As long as there is no Magic Cube, Hydra won’t be able to resurrect.” With a glance in Peter’s direction, Lin Rui calmly replies.

The League of Defender is composed of several Vigilantes so it obviously doesn’t have enough power compared to the SHIELD. Therefore, in today’s battle, Lin Rui’s purpose is to snatch the Magic Cube. In terms of individual strength, the League of Defender is no worse than anyone. At that time, Hydra’s resistance team will be handed over to SHIELD. As for Magic Cube, Lin Rui must get it.

“Yes, I know.” Nodding his head, Peter showed that he knew.

Call ~

Just as Lin Rui and Peter discussed the main points of the fight in the corner, they suddenly felt that the speed of the Helicarrier had dropped.

“Well, it seems that we have arrived.” Lin Rui briefly glanced at Fury’s serious face and said lightly.

Sure enough, the speed of Helicarrier slowed down and it finally remained hovered at high altitude. When the Helicarrier slowly stopped at a high altitude, Lin Rui and others had already gathered with the Avengers. As a very powerful Vigilante, Mirage Knight and Spiderman are arranged to act together with the Avengers led by Captain Rogers this time. This will not make Lin Rui feel uncomfortable since Avengers has a lot of freedom of action.

“Mirage Knight, our operation this time is very simple, we will rush ahead and defeat the things that would threaten ordinary soldiers. Perhaps it would be the Alpha team or the Winter Soldiers.” Standing next to Lin Rui, Captain Rogers said quietly. This is also the purpose of the Avengers’ consistent operations, they would first clear some threats that ordinary soldiers cannot clear. As for the large number of Robots, those would be handed over to the SHIELD teams.

“Yes, have you made contact with the X-Men?” Lin Rui nodded and asked one more question. Professor Charles is only involved in this operation because of Lin Rui, and it is not good if there is any conflict between the two sides in the operation.

“You can rest assured, although X-Men won’t take orders from SHIELD, there is an agreement between us, they will cooperate with us if they make a move.” Rogers said with a smile when he heard Lin Rui.

“By the way, why didn’t I see Natasha this time? Won’t she take part in this operation?” Lin Rui, who had no problem, glanced at the Avengers and suddenly found that there was one member missing. Lin Rui didn’t see Black Widow Natasha and asked directly.

“Natasha? I don’t know. She seems to have some other mission. She is not on the roster for this operation.” Rogers simply answered after hearing Lin Rui’s question.

At first, Rogers was surprised to find Natasha not participating in the campaign. Later, when he tried to contact her, he found that she had disappeared. Rogers did not know where she had gone, and Fury just explained to Rogers that he had sent Natasha on another Mission. Because of the Hydra situation, Rogers did not pay attention to Natasha. He also expected Natasha to sneak into Hydra’s base to help them when they were acting.

Upon hearing Rogers’ answer, Lin Rui’s eyes flickered, “Other Mission? ...”

Black Widow Natasha herself is not a very strong fighter but she has a lot of skills as an Agent, so this kind of assault fighting might not be for her. However, Fury will not let an Advanced agent like her do another mission at such a critical time. So, Fury must be asking Natasha to do something special and important.

“Is it to find the Hul...” Lin Rui seemed to think of something when recalling the original plot.

“What’s the problem?”

“No, it’s time we started.”

When asked by Rogers, Lin Rui didn't say anything. If it was really going to happen, Lin Rui wouldn't be able to stop it. The biggest trouble now is Hydra and Magic Cube. As for the Hulk, if Fury feels he can really handle such a killer, Lin Rui will feel very good about himself. Because they are already trying to oust Fury.

...

Five minutes later, Lin Rui and Rogers were inside a Quinjet. The Avengers and League of Defender will be the first to hit the battlefield.

Buzz ~ Bang!

After a brief engine warm-up start, dozens of Quinjets were directly ejected from the airborne Helicarrier suspended at high altitude. In addition to fighter planes, mechanical doors were also opened on both sides of the Helicarrier. Then, the Iron Man army rushed out of it and landed directly towards the ground.

It turned out that Tony had arranged so many Iron Man in the Helicarrier. Wouldn't it be a waste of energy to not ride such a good free ride? Tony also wants to save some energy to deal with the Space Attacks of Hydra's Magic Cube. In addition to Lin Rui, Tony's demand for Magic Cube is probably the most urgent. As a scientist, it is his lifelong desire to get such a treasure for research.

Shout!

Soon, the Quinjet carrying the Avengers and the League of Defender team has dropped to two kilometers. At this time, Lin Rui and others could almost see the ground, which is also enough for these superhuman beings to land. This time their target is a large farm, the entire farm, and underground Hydra's base.

In order to prevent Hydra from being aware of their actions in advance, SHIELD has never conducted an in-depth investigation after confirming that this area is the base of Hydra but they have dispatched the most senior agents to investigate it from outside. Finally, it was determined that the size of this base must be a very large base of Hydra, it is at least the same size as that of New Jersey they found last time.

Call ~

When the fighter jet reached a position of 1,000 meters, their speed finally slowed down. This distance was enough for them to be found by Hydra, but at this time SHIELD did not care. Even if they are found, this area has long been surrounded by SHIELD, Hydra only has two options: Surrender and do a Deadly fight.

"It's time for us to do our part," Rogers said as he walked down towards the tail end of the Quinjet.

Card ~ Hoooo!

After Rogers finished speaking, the airdrop hatch directly opened and the gust of wind pushed everyone in the cabin back half a step.

"I'll go first, then! Spiderman!" After the hatch was opened, Lin Rui directly stepped out of the rear and spoke to Peter and then jumped out of the door, with Peter naturally following after him.

Call!

The next second, Mirage Knight and Spiderman had jumped directly from a height of nearly a thousand meters without a parachute. Of course, no one would think that they were committing suicide. Sure enough, after falling for a hundred meters, Lin Rui took out the Hoverboard from the portable space and took Peter on the Hoverboard to continue to rush down below.

“We can’t hold back! Let’s go, Falcon!” Rogers had also jumped out with his shield.

Huh!

Behind Rogers, Falcon chased after him. After grasping Rogers, Falcon opened his wings and glided down.

Seeing that other people had gone ahead, Hawkeye, who was still standing at the door looked at Daredevil standing in the back. He knew that Daredevil had a Hoverboard in the corner.

Daredevil: “...”

Chapter 400 Running

Hydra knew nothing about the SHIELD’s launch when it reached the Hydra base. Since SHIELD has been so tight recently, Red Skull has kept most of the active personnels in hiding. As a result, they didn’t immediately notice that the SHIELD was using an Helicarrier to reach them. According to Hydra, SHIELD’s Helicarriers should not be airborne yet.

At this time, Red Skull was sitting in his secret room, enjoying the best Red wine that had been deposited for decades. Last week’s surprise move did not yield the desired result that Red Skull wanted, Hydra had instead exposed a lot of their hidden cards, especially the Alpha team and the upgraded Winter Soldier captured by Lin Rui.

So, Red Skull is going to take a little bit of time to get out of the way, and then he’ll take a chance on the SHIELD or the Vigilante. Red Skull is a tortoise. He has patience and can live as long as a tortoise.

However, from the first two days, Red Skull’s eyelids kept jumping again. Although his eyelids were almost empty, he could feel the growing tension in his heart. In addition, the sense of urgency has suddenly become very strong today, which makes Red Skull very upset. Now, Red Skull only drinks to calm himself down.

“Has this base been discovered? If that’s the case, I should move on with the Magic Cube.” With the glass in his hand, Red Skull thought of the worst.

As Red Skull considers the possibility of the base being discovered, the computer screen on the desk in front of him suddenly flashes with a blinking Red light, followed by a siren.

Dī Dī Dī!

Call!

“Damn it! It was really found by them! No, it is impossible to block them with the weapons and the defense in the base. I will leave with Magic Cube first!” Red Skull quickly got up from the chair and glanced at the screen. His decision was made instantly after seeing the screen above.

Red Skull’s computer showed the dense and fast approaching targets around their base. Whether it was in the sky or on the ground, even the underground path was blocked. The entire base is now like a piece of cheese surrounded by ants.

In fact, Lin Rui’s judgment on Hydra is correct. Although Red Skull acquired Magic Cube long ago, his research progress in private is not satisfactory after so many years. It is also the group of scientists under him who have recently acquired some space-related technology from Magic Cube. The last attack at Golden Gate Bridge was originally a tentative one, but it failed in the end.

Red Skull intended to hide for a period of time after the attack last week, and wait for them to get more technology on Magic Cube, and then strengthen their strength again before looking for SHIELD or League of Defender. Red Skull’s own plan was very good, but SHIELD and Lin Rui won’t let him hide in the dark so comfortably to develop his forces. They found his hiding place in a week and then dispatched the strongest strength directly to eliminate Hydra in one fell swoop.

In fact, neither SHIELD nor Lin Rui knew about the existence of Red Skull. Lin Rui also only knew that Magic Cube was in Hydra’s hands, and didn’t know how it appeared and why it didn’t appear before. So, if Red Skull really intends to escape with Magic Cube, he may be really successful.

Call!

Red Skull, who had made up his mind, quickly armed himself, and then rushed out of the room. At this time, the Magic Cube was still being studied by those avid scientists in the central square of the base. Red Skull was going to leave SHIELD a little surprise before leaving with the Magic Cube, he wouldn’t want them to run all the way here in vain?

Ooo! ~~

When Red Skull ran towards the central square to prepare to run with the Magic Cube, the highest level of alarm sounded throughout the base. Red Skull was planning to run with the Magic Cube, but he wasn’t going to let other people in the base retreat with him as that would be too noticeable, he only needed some fully loyal people.

Buzz ~

“This is amazing!”

“There is such a thing in the world, it can only be described as God’s creation!”

“It is the most beautiful thing in the world with unparalleled beauty!”

“We are all geniuses with Stable Space Teleportation Technology and attack weapons based on Space Technology.”

In the center of the square of the base, several scientists are discussing the item inside a large instrument, which is The Magic Cube. No matter how long they had researched this, they will marvel every time they see the Magic Cube because the Infinity Stone is originally a gem in this universe.

Call!

Red Skull suddenly rushed in from the outside when the scientists were so absorbed in the research of the Magic Cube that they ignored the alarm ringing in the whole base. Ignoring the puzzled and surprised eyes of the scientists, Red Skull directly rushed towards the device containing the Magic Cube and quickly operated the robotic arm to take it out.

“Red ~ Red Skull, our experiment is not over yet.” Seeing Red Skull’s action, a bolder researcher stammered when he walked up to Red Skull.

Although Red Skull has paid close attention to the Magic Cube before, this is the first time that he has rushed in and taken away the Magic Cube without saying a word. These researchers are surprised. However, Red Skull apparently won’t explain anything to them. The Magic Cube, which was clamped by the robot hand, was soon put into a secret box nearby.

Card!

Locking the box, Red Skull left while carrying the box, but when he reached the door, he stops again and turns towards the researcher.

“How much have you saved Magic Cube’s energy before?” Red Skull asked suddenly looking at the person closest to him.

“There is ...”

“Well, whatever it is, you will release it all. Remember, release it all, and don’t care about anything else. I’ll give the SHIELD a taste of what real strength looks like.” Without waiting for an answer, Red Skull continued.

“Uh ... yes, Lord Red Skull.”

“Clear all the data on your end first, and then leave. You can only leave then.” Although Red Skull doesn’t care about anyone but himself, he warns the researcher before he leaves. After all, these researchers have been with him for so many years. If they can live, they can continue to help him study Magic Cube in the future.

“Got it, Lord Red Skull!” The brainwashed researchers replied loudly, and then went to release the energy of the Magic Cube they had stored before and then began to delete the research data.

Call!

Seeing that these researchers had already begun to act on his orders, Red Skull turned and rushed out of the laboratory. No matter what the next battle is, Red Skull is not going to stay and watch the show. The power of Magic Cube is very strong, but Red Skull knows that he actually has only unmasked a small part of it, probably not even one part per billion. Therefore, the base is doomed to be destroyed, and Red Skull will flee before then.
