

Marvel 401

Chapter 401 Open Area

Whew!

While Red Skull was quickly fleeing while holding the lockbox containing the Magic Cube, Lin Rui and Peter, who first rushed down from the Quinjet, landed on a Hoverboard which is less than a hundred meters above the Hydra base. This distance is already in attack territory for Hydra, so Lin Rui was not surprised to receive ferocious attacks from the ground.

Kakaka!

PūPūPū!

After Lin Rui and Peter landed on the Hoverboard, the seemingly normal farm floor suddenly glows with holes, from which a number of dark cannon-holes emerge, and a volley of shots is aimed at the target in mid-air. If it weren't for Lin Rui's driving skills and the small target of the hoverboard, it would have been impossible to dodge such a concentrated fire.

However, compared with the small and very flexible Hoverboard, the Quinjets who also came down were more flustered. The Quinjets, which would have been stronger, began a series of difficult maneuvers in the air as the Anti-Aircraft weapons suddenly appeared on the ground. The SHIELD assault was somewhat hampered, but it also made clear to them that the base was of high rank.

Call!

With another sharp turn to dodge a laser beam, Lin Rui has dropped to a position of 50 meters. He gestured to Peter behind him and Lin Rui was ready to go down.

"Blow an entrance for us!" Landing a little further down, Lin Rui shouts as he flies over the farm. Of course, Lin Rui was shouting at the Quinjets behind him.

Howls whew!! Rumble ~

Just after Lin Rui shouted, the counterattack from SHIELD arrived. Dozens of missiles directly covered dozens of muzzles on the ground, which also reduced the pressure on Lin Rui.

"Yes, there is an entrance!" After SHIELD's Quinjets plowed the farm, Lin Rui finally found a blasted underground entrance. Then, Lin Rui drove directly towards that entrance.

Brush!

"Let's go!" Lin Rui yelled and directly jumped as he flew over the entrance.

After Lin Rui jumped out, Peter also jumped out of the Hoverboard. Then Lin Rui waves his hand and puts the Hoverboard into his carry-on space. His Internal Energy filled his entire body and Lin Rui adds a layer of internal energy defense to the Phantom Suit. In this way, Lin Rui can defend himself against a grenade attack.

Pū!

Finally, after evading those Anti-Aircraft weapons, Lin Rui and Peter both make an unguarded dash into the entrance. In fact, in such a wide range of anti-air weapons, Lin Rui and Peter's intrusion is very insignificant, at least those long-ranged weapons cannot easily deal with such assault targets.

After Lin Rui and Peter successfully rushed into the underground base of Hydra, Falcon also took Captain Rogers to the ground at another location above the farm. Compared to the difficulties on Lin Rui's side, Rogers and Falcon's journey is going to be a lot smoother, because SHIELD has dedicated Jets to protect them from behind.

"Go in!" Seeing Mirage Knight and Spiderman getting into the underground base. Rogers shouted at Falcon beside him and rushed towards an underground entrance beside him.

Falcon: "..."

Although Falcon was speechless, he still followed Rogers and rushed into the entrance. Falcon's equipment is wings, which is characterized by flexible flight in the air. If the base below is not spacious enough, Falcon's strength will be suppressed. But he couldn't help it. It would be more dangerous if he remained outside. Those long-range weapons didn't seem to want to avoid him. If he got hit down, it would not be fun.

After Falcon and Rogers rushed into the underground base, Daredevil and Hawkeye also fell to the ground, rushing in behind Rogers and Falcon. Under the cover of dozens of SHIELD Quinjets, many special forces still forcibly rushed into the Hydra base. As for the X-Men led by Charles, they have their own methods and do not require SHIELD's help.

Rumble ~

In this way, SHIELD carried out violent air-to-ground attacks above the entire farm. This base is worthy of being Red Skull's hiding place. Compared with the last New Jersey base, the Air Defense Force of this base is much stronger. Moreover, the number of Force Field Weapons and Shock Wave Weapons is much larger, which brings a lot of trouble to the Quinjets the mid-air.

Howls whew!

And just as the battle of weapons against bombardment outside slowly reached its climax, many black spots fell again from the middle of the air. It was Tony's Iron Man Army. After SHIELD's Quinjets consumed a part of their Air-to-Ground weapons, the Iron Man Army finally arrived.

Pū Pū Pū!

Iron Man, which is more flexible than the Quinjets, combined with the Quinjet's firepower, quickly suppressed the Air Defense weapons at Hydra base. According to this trend, all of the Air Defense Weapons on the ground would be scrapped in less than three minutes.

However, things will never go so smoothly. When 80% of the Air Defense Weapons on the ground has been cleared, unusual fluctuations were heard at various locations on the ground of the farm. JARVIS issued a warning as soon as it detected the odd fluctuation. This is the same kind of Spatial Fluctuation that appeared on the Golden Gate Bridge that caused the communication and Spatial Ability Blockout, Hydra had against used this to prevent someone like Blink to access their base!

“Be careful, pay attention to everything!” After receiving the alarm, Fury, who sat on the Helicarrier, gave the order for the first time.

A week ago, the Space Technology revealed by Hydra is far superior to modern technology and it had shocked them. Fury has not found a good way to restrain such attacks, which can only be restricted with a large number of energy weapons. And this kind of spatial fluctuation that can block out a piece of technological electronic communication is also troublesome, at least in a war of this magnitude.

“Has it finally reappeared? That kind of Space-Based Attack. JARVIS, carefully record this, this is a good opportunity.” Tony, who did not join the scuffle, was wearing the latest Iron Man Armor and he was suspended in the air at this time. After JARVIS detected the Spatial Fluctuations, Tony’s eyes flashed with a light and he quickly ordered JARVIS to record this.

“Yes, sir.”

Buzz!

Brush!

Just three seconds after the warning issued by J.A.R.V.I.S, the special Spatial Fluctuation has spread to a large area centered on the Hydra Base in an instant, directly reaching a height of 1,000 meters. After the wave covered the area, all the liaisons in the area lost contact with the high-altitude Helicarrier, as was the case on the Golden Gate Bridge last time.

“Sure enough, this wave can shield a particular area from electronic communications. JARVIS, can you still contact the other Iron Man below?” Tony’s hovering position is high enough that he is not in the range of the wave so that it was clear that normal electronic communication was dead.

“Electronic communications are completely blocked, but this time there is no fog blocking the view, so we can conduct it physically. Of course, each Iron Man Armor has its own Intelligence System, so there’s no problem with that.” JARVIS calmly replied to Tony’s question.

“J.A.R.V.I.S, are you feeling a little proud?” Tony said with a smile when he heard J.A.R.V.I.S answer.

JARVIS: “...”

Chapter 402 Take Action

With no fog like the one that envelops the Golden Gate Bridge, the area’s electronic communications have been blocked, Fury and others have been careful in this regard so they were not affected. Moreover, as long as you fly out of this area, you will not be affected, so only those air-dropped troops will have some confusion due to communication blackouts.

“Sir, Director Fury is requesting a connection.” Just as Tony floated high above the ground and watched the battle beneath, JARVIS’s voice was heard again.

“Connect it, I probably know what Fury wants to say.”

“Yes, sir.”

“Tony, I need your help...” Soon, JARVIS opened a communication line for Fury.

As soon as he connected, Fury directly spoke his request. He needed Tony's Iron Man to help the airdropped soldiers transmit information. Because the flexibility of Iron Man is unmatched compared to Quinjets, it is most convenient to have Tony's Iron Man as an intermediary to send messages in such a situation.

"Got it, I'll help you out with this. But, did you find a way to destroy this electronic communication shielding technology after the last thing?" Tony asked again after agreeing to Fury.

Tony, of course, was just trying to read Fury's tone. He knew that SHIELD had looked into this type of Space Shielding but they couldn't find a solution. After all, they had never seen such technology before, and with no samples to study, it was unlikely for them to find a solution. As for Tony, he has done some studies but he also couldn't find any solution to this. Of course, if Tony were to get his hands on the Magic Cube, he'd be able to work on it pretty quickly.

"Why haven't you found something." After hearing Tony's words, Fury's tone did not change at all as he asked back.

"I was busy." Tony grinned as he replied back. Of course Tony wouldn't admit that he had studied this and he also couldn't find anything.

"This kind of electronic information shielding in the space area seems to be effective against the strong current, but we don't have the kind of special current to deal with this kind of shielding. If you are interested, you can let the Iron Man try it, or you can see if that person can continue to break the shield this time." Fury, who was questioned by Tony, did not respond, and then said a few words. In the end, he also mentioned someone who seemed to be able to destroy this Shielding technology.

"Huh? Who?" Tony asked curiously when he heard Fury's words.

"Sir, I think Director Fury is talking about her." Just when Tony was curious, J.A.R.V.I.S reminded him timely and projected an image in front of Tony's eyes.

Brush!

When Tony saw the image in front of him, he finally realized who Fury was talking about. Just when Tony's Iron Man and SHIELD's Quinjets bombarded Hydra's ground-to-air weapons, a person flew into the air without the help of any auxiliary aircraft.

The person who is flying in the sky like Superman is the Storm from X-Men. Being able to control the power of the weather and nature, Storm is the main battle force of X-Men. In many cases, her role is much greater than Iceman.

Iceman, after all, has the highest level of Mutation, but he only has a single capability and that is Ice Manipulation. Ice at its best freezes everything, but circumstances do not allow Iceman to wield such power. Storm, on the other hand, controls a lot of power. Just like now, Storm uses the power of nature to make herself fly.

At this time, the weather at the high altitude centered on Storm has begun to change rapidly. The sky that was originally clear and blue quickly got covered with large clouds. It seems that Storm will continue to use her trick that split the mist around the Golden Gate Bridge last time: Summon the power of thunder and strike the ground with it.

Kaka! Zi!!! ~

“JARVIS, I think we need to step back a little bit.” “Tony said in an odd tone to the JARVIS, after seeing the clouds gathering and thickening overhead.

However, JARVIS did not take Tony’s order to leave. Instead, he spoke when Tony flew away. “Sir, I don’t think you need to worry about anything. You have upgraded the Anti-Electric system of the Iron Man Armor since the last time when the Iron Man Armor was destroyed by Spiderman’s strong electric spider silk. Even if it is struck by lightning, it will not matter.”

“Moreover, in addition to electricity protection, the upgraded Iron Man Armor also has a system for absorbing electrical energy and converting it to light energy. So, if the Armor’s energy is not enough, try to get struck by lightning.”

“Uh...JARVIS, why do I feel that you really want to see me being struck by lightning? Also, I don’t want to try that no matter whether the Iron Man Armor can block or absorb the thunder. And it was me who did the upgrades on the Iron Man Armor so you don’t have to always remind me of that!” Tony flew further away and slowed down and then asked in an odd voice.

“I can’t imagine it for the time being, I’m just elaborating a fact.” To Tony’s question, J.A.R.V.I.S replied calmly. Although JARVIS’s “Humanity” is growing rapidly, it will obviously take a long time for him to reach the level of normal human thinking.

Call~

“Ok, let’s just wait and see if the Storm can break through this electronic lockdown in this area.” At the edge of the clouds, Tony pauses again, looking up at Storm and the dark clouds above her.

Rumble~

By the time Tony got to the edge of the cloud, the clouds were already thick and the electric charge had accumulated enough that some lightning had begun to appear.

“Is this what high-level Mutants can do? In the face of such power, how much technology can make up for the gap? This is also the reason why people do not want to support the legal rights of Mutants. They are not willing to admit that Mutants are more similar to us or that they are above us.” On the Helicarrier, Fury murmured to himself after looking at the clouds that covered most of the sky.

“However, such people are still a few in number and we are not less powerful.” After sighing to Mutants’ advantages, Fury murmured again.

Rumble!

Click!

At last, when the clouds had gathered high enough, a harsh blue and white light flashed through the clouds, splitting the dark clouds directly across the battlefield below.

Rumble!

The first thunderbolt appeared, then the next thunderbolt.

“Sir, the electronic shield seems to be beginning to weaken.” JARVIS has since reported the results after the first thunderbolt.

“It seems to work. Well, let’s help her. JARVIS, doesn’t our Iron Man also have an Electric attack?”

“Yes, Sir, with pleasure.”

After confirming that the Thunder attack is really effective, Tony directly instructed JARVIS to let all Iron Man turn on their electrical weapon system.

Zizi ~ rumbling ~

In an instant, thunder and lightning flashed over the Hydra base.

Chapter 403 Rush

Rumble~

As the battle raged outside, Lin Rui and others inside the Hydra base were in no better condition. With no idea as to where the Magic Cube would be located, Lin Rui and Peter can only go straight along indiscriminately. The obstacles they encountered along the way are no easier than the battle outside. In order to create more escape opportunities for himself, Red Skull let the entire base cover for itself.

Brush!

Lin Rui’s face is anything but relaxed as a robot swoops in. Although these robots will not bring much threat to Lin Rui and Peter now, but if the Magic Cube cannot be found by them in time then maybe SHIELD will get inside the base, and then there will be no time for them to find the Magic Cube and take it under Fury’s eyes. And Lin Rui had a bad feeling that maybe he wouldn’t be able to find the Magic Cube easily.

“Peter, did you find anything with your spider-sense? Where is the greatest danger?” Lin Rui shouted at Peter who was not far from him as he looked at the dense robots in the passage in front of him.

Now Rui Lin has been cut off from the outside world by the Magic Cube’s power, and he has no idea as to where Captain Rogers and others are, leaving him and Peter to their own devices.

“Turn right ahead! However, my spider-senses are telling me that there is some life-threatening danger ahead! Are we really going there?” While putting down the robot in front of him, Peter loudly answered Lin Rui’s question and kindly reminded him at the end.

Peter’s Spider Senses had detected a danger ahead of him which was as strong as the spatial attack he had faced a week earlier on Golden Gate Bridge. Of course, although there is danger, it does not mean that they will die, there is a good chance that they would resin alive. However, the existence of the spider-sense is to help Peter avoid some dangers, he did not intend to find dangers by himself.

“We have no other choice! If we don’t get the Magic Cube, Hydra will probably make a comeback in the future! If the threat to you is the strongest in that direction, maybe the Magic Cube is there.” Lin Rui knows how dangerous it is to face down an attack from the Magic Cube, but he has no choice but to crush Hydra and get the Magic Cube.

However, if Lin Rui knew that Red Skull was fleeing with the Magic Cube at this time, he might not be so eager to rush towards the center. Because whatever was waiting for Lin Rui and others was definitely not what he wanted.

“Well, since you insisted so much on going then I’ll accompany you!” Peter Lin shouted loudly after receiving Lin Rui’s answer.

Pū Pū Pū!

Peter then threw out several special silk balls, which burst as they flew into the robot. The next moment, half of the robots in the tunnel were connected by a burst of powerful spider silk, limiting their movement.

“Jackson, have you ever seen a Roasting Robot?” Looking at the Robots restricted by the web in front of him, Peter calls out to Lin Rui.

Brush!

“I’ve never seen Roasting Robots, but I do see plenty of them here.” Without looking away, Lin Rui splits the Robots again to answer.

“Then watch me electrocute them!” Peter suddenly shouted as he glanced at Lin Rui’s blade cutting a robot in half.

Zizi!

As Peter shouted, a strong electric light suddenly flashed on the spider web that trapped the Robots. Then, all the trapped Robots stopped struggling, and sparks erupted everywhere. Obviously, these Robots seem to be very advanced, but they are still lacking in their electrical resistance department. The strong electric spider silk equipped in Peter’s spider suit almost scrapped Tony’s Iron Man before in an experiment. The situation JARVIS had just told Tony about.

“Very good! I’ll land a helping hand!, Thunder Clap” After seeing Peter’s move, Lin Rui’s eyes flickered as he also attacked with his sword. Time waits for no one. They don’t have time to be dragged here by these emotionless robots.

Buzz~ Rumble~

The dazzling purple light erupted instantaneously and then a half-moon-shaped blade light directly rushed from the location where Lin Rui was standing and rushed hundreds of meters away and swept the entire tunnel, eliminating the Robots as most of them gradually dropped to the ground.

Kaka~Pū!

Looking at the result of Lin Rui’s move, Peter, who had just killed dozens of Robots, was stunned. Compared to power, Spiderman’s growth beats Mirage Knight by a mile, but compared to the sheer scale of destruction, Mirage Knight has thrown Spiderman away by several miles!

“Hoo~ It’s much quieter now!” Lin Rui took a breath and looked at the few Robots in front of him and spoke to Peter.

“Well, come on, didn’t you say that we were in a hurry?” With his foot in front of Lin Rui, Peter was already heading for where he felt most at risk.

“Sure, in a hurry!

Brush!

...

While Lin Rui and Peter drove towards the center of the base after killing the Robots, Captain Rogers and others who came in from the other direction encountered a team of soldiers and it was not any ordinary team, it was a well-equipped Alpha team.

In comparison, the threat of Robots was higher, after all, they have great numbers and strength. So, after a while, Rogers and his teammates took out the enemy one by one. Rogers, also unaware of the Magic Cube’s location, forced his way in a random direction, followed by Falcon, Hawkeye, and Daredevil.

However, neither Lin Rui nor Rogers knew that Lin Rui chose the direction directly to the central square of the Hydra base, where the Magic Cube energy weapons are stored, so Peter felt the greatest danger from there. The direction chosen by Rogers is the direction that Red Skull is fleeing. If he is fast enough, he can block Red Skull.

But Rogers, Falcon, and others do not yet know of the existence of Red Skull, or that the Magic Cube is in his hands. However, as long as Rogers sees Red Skull, he will definitely react. After all, sixty years ago, Bucky, the victim of Red Skull, was captured and transformed. Sixty years ago, Red Skull had supposedly died at the hands of Rogers.

...

When Lin Rui and others were rushing and killing in the Hydra base, Red Skull already knew that someone had broken into the base. While paying attention to the situation inside the base, Red Skull accelerated his escape speed.

Da da da~

“Damn! It must be those Avengers and League of Defenders! I won’t let you catch me! As long as I have the Magic Cube in my hand!” Clutching the Magic Cube box, Red Skull heads for a secret exit under the protection of a heavily armed Alpha squad, Winter Soldier, and some specially capable Mutants.

Although SHIELD had surrounded the base, Red Skull always has a way back. Red Skull has a last resort: using the Magic Cube to open the space door. Although this takes a long time to prepare and is very risky, Red Skull will do this when there is no hope of running.

Rumble~

The underground base was in chaos. When Red Skull was running away with the Magic Cube, a more violent shock came from above the ground. Then, the electronic communication that had been blocked was recovered. This suggests that people from the outside have broken through the Magic Cube’s first space blockade.

Chapter 404

Zizizi~

"Mira...Mirage Knight, can you hear me?" Just as Lin Rui and Spiderman were rushing towards the central position of the Hydra base, JARVIS's voice suddenly came from his ear, although there was still some interference. It became clear soon.

"Yes, JARVIS, what's going on outside?" Lin Rui tapped the headset and answered quickly. The progress made by Lin Rui and Peter has been unsatisfactory, and they want the people above on their side to hurry up and support them.

"The electronic communication blockade has been removed, Hydra's Anti Air weapons have almost been destroyed, but the next step is likely to be hit by Space Weapons, and the ground support has accelerated. So, you need to be careful." JARVIS truthfully told the situation and finally reminded Lin Rui.

"Got it, we'll pay extra attention. Also, if you can't stand it, run away, the Magic Cube's power will definitely not be used as thoroughly. As long as you resist one wave of attacks, Hydra would no longer have any hidden cards in its hands." After agreeing, Lin Rui also reminded JARVIS.

Last time on the Golden Gate Bridge, the space-type attack released by Hydra through the space gate was enough for Tony and SHIELD but it would not be enough now as Tony and SHIELD are prepared. However, since this is a large base of Hydra, Lin Rui feels that they must have more than one powerful attack but a single wave would be able to deflect Hydra's stock.

"Got it, good luck, Mirage Knight."

"You too, J.A.R.V.I.S."

Brush!

After disconnecting with JARVIS, Lin Rui and Peter, who already knew the situation outside, accelerated their speed again. Not to mention how strong the next counterattack on Hydra's side will be. If they let SHIELD's people rush in, then Lin Rui may not be able to keep Magic Cube's secret.

Buzz!

Just after Lin Rui and Peter dashed across the intersection again, Peter suddenly stopped, and the roots of his hair were raised up. Lin Rui could feel Peter's physical change even if he was covered by his spider suit. It was like a spider seeing his natural enemies, Peter's entire body froze because of the great danger his spider-sense had sensed.

"Peter?" Lin Rui spoke as he saw Peter's changes.

"Straight ahead! That's where I feel the greatest danger! That's a place that could put our lives in danger!" The spider-sense had been telling Peter to get away from the position, but he pressed down on this feeling and pointed the way.

"Is it just ahead? Why don't you stop here, Peter, and I'll go and see by myself." Lin Rui does not have Spider-Sense but he can also sense the imminent danger, so he looked at Peter and said seriously.

Although Lin Rui has always believed that the Protagonist Aura on Marvel's Superhero like Spiderman will always protect them from any dangerous situation and even if they got seriously injured, they will never die. However, in the face of such items as Infinity Stone, Lin Rui was not sure whether the protagonist aura on Peter would still be useful.

"Give up on that idea! I am not leaving you alone!" Peter waved back to answer Lin Rui's words.

Even if there was an even greater danger ahead, Peter would not let his friend pass alone. And even if the spider-sense had detected a greater danger, it was not without a chance of life.

"Well, if you insist, then let's go together. But first, if there is a danger that we can't cope with, don't worry about me and leave immediately! I have more life-saving things than you." Knowing that Peter would not leave, Lin Rui had no choice but to let Peter go in with him but he also told him to leave if the situation becomes dire.

"Got it!" Peter had already walked toward the front as he answered and Lin Rui could only helplessly shake his head and follow.

I don't know if it was because they had already expended too much manpower and resources to stop Lin Rui and Peter. When they approached the central square, there was no one to stop them. So Lin Rui and Peter made the final leg of their journey unimpeded to the central location of the Hydra base.

Buzz~

As soon as they stepped out of the empty passageway, Lin Rui and Peter saw the extraordinary-looking instruments placed in the center of the square. By this time the whole square is empty, only the equipment is still working properly.

Zi Zi Zi ~

Because Storm used a lot of thunder to attack this base, some of the circuits of these instruments appear to have been damaged, but their normal operation has not been affected at all. And at the center of these instruments are transparent boxes of the same size, filled with a light blue glowing substance that looks very sci-fi.

"Jackson, are those small cubes the Magic Cube you spoke of? The color is blue, but why are there so many of them?" Peter, standing beside Lin Rui, asked curiously while looking at the boxes that blinked with their brilliant blue light.

There was no immediate response to Peter's question. Lin Rui looked solemnly at the boxes, which glistened with blue light. Finally, as if to confirm something, Lin Rui's face changed.

"Those are not Magic Cube! They are equipped with Magic Cube power. They are using the power of Magic Cube to create Space Attack!" After carefully feeling the space power in those square boxes, Lin Rui quickly judged the origin of those boxes then shouted loudly. Because Lin Rui has already seen what the devices and boxes are for, he knew that there will be an attack!

Buzz~

After Lin Rui had said that, a flash of red appeared on the workbench in the center of the square. The device then becomes overworked, and the Magic Cube energy stored in the box is quickly pumped out and converted in a special way into the attack weapons.

“Not good! They’re going to attack!” As soon as Lin Rui saw that red glow on the workbench, he knows what will happen next. So, with a shout, Lin Rui has released all of his internal energy and rushed towards the machines in an instant.

“Jackson!” Seeing Lin Rui’s movements, Peter followed him.

Brush!

One black and one red figure almost left a residual image on the ground. In less than a second, they crossed the distance of thirty or forty meters and rushed to the instruments. Then, without the slightest hesitation, Lin Rui lifted his Thunder Blade high above him. As for Peter, his hands and wrists were already spattered with a special spray of spider silk.

“Thunder Strike!”

For a split second as the blue light of the instruments flashed, so did the Purple Blade Light of Lin Rui and Peter’s spider silk arrived.

Buzz~

Boom~

Chapter 405 Sudden

Rumble~

Over the Hydra base, dozens of Quinjets have been dropped to a low position, as the area’s anti-air weapons have been destroyed. The lowered Quinjets are constantly patrolling the battlefield to prevent any unusual situations.

As for Tony’s Iron Man army, it’s already scattered all over the farm, looking for underground entrances to Hydra’s underground base. Suspended in the air and out of action, Tony commands Iron Man through JARVIS. The Iron Man army of Tony and Storm has just broken the electronic communication blockade.

JARVIS has also been in touch with Lin Rui and others inside the base after breaking the communications blockade. Tony was relieved to hear that Lin Rui and Peter were safe, but when Tony was listening to the JARVIS report and was about to send some Iron Man to support them, his face suddenly turned serious. For he heard some disquieting and uneasy voices.

“No! They are about to attack!”

“Jackson!”

Buzz~Boom~

Zizizi~

After Lin Rui and Peter shouted, a loud noise suddenly came from Tony's helmet as if a violent explosion had happened on Lin Rui's end. Then, the communication between JARVIS and Lin Rui has broken again.

"JARVIS! What the hell happened?!" Hearing no more sound in his ear, Tony nervously asked JARVIS, with a bad feeling in his heart.

"Sir, I have lost contact with Jackson and Peter and I have no way of knowing where they are. But..."

Buzz~

JARVIS is answering Tony's question when a light blue light bursts out of the middle of Hydra's farm base and quickly spreads out in a dozen directions. These light blue lights are exactly the attacks from the underground base's instrument using Magic Cube's energy. Each one is powerful enough to resist hundreds of Iron Man laser attacks.

Card!

Rumble!

Because these lights rushed out without warning, even though SHIELD had already prepared for any accidents, two Quinjets could not escape the spreading lights. In only a moment, the two Quinjets were directly disintegrated into the sky in the air, and the soldiers inside also died together with the broken Quinjets.

Dī Dī drops!

Boom! Boom! Boom!

Almost at the moment when the two Quinjets disintegrated, Iron Man's, which had previously spread throughout the base, launched their most powerful laser attack, targeting the rapidly spreading blue light. Controlled by JARVIS, Iron Man's response was the fastest on the battlefield. With more than a hundred Iron Man's instant counterattacks, the pale blue glow continued to spread but slowed enough for the SHIELD to respond.

Rumble!

The next moment, SHIELD Quinjets and surrounded ground troops launched their most powerful attack on the pale blue light to avenge their dead comrades!

"Sir, there is a similar space strike, and there was a higher energy strike." Just before Tony issued an order, JARVIS made the most correct decision before starting to report the situation to Tony.

"More energy strikes, but it's not me. Fury must have attacked with the Helicarrier this time but he still has many casualties." Tony frowned when he heard JARVIS's report. His nose wrinkled as he answered back. Tony was also feeling very uncomfortable with the fact that two Quinjets have been destroyed in front of him, but there was no way for them to avoid it and for him to do anything. Moreover, he is also worried about Lin Rui and Peter's situation.

Rumble~

At the time when Tony and JARVIS were speaking to each other, the dark clouds that had not dispersed over the battlefield again chopped down with thunder strikes and they directly confronted the light blue rays that were constantly expanding their coverage. However, even under the joint attacks of the Iron Man army and the SHIELD's Quinjets and Storm, the Magic Cube's pale blue light, which is several times more powerful than the final spatial strike on the Golden Gate Bridge, continues to expand its reach.

"Is this the power of Magic Cube? The power of space, this is already a massive attack." Looking at the light blue light constantly consuming countless attacks, Tony said to himself in the distance.

"No! Jackson and Peter! JARVIS, can you contact them?" Attracted by the power of Magic Cube, Tony realized that Lin Rui and Peter should be in a bad situation.

If Hydra has already made such an attack, then the situation of Lin Rui and Peter inside the base should be even more dangerous. From what Tony has just heard, Lin Rui and Peter are in a very dangerous situation.

"Still disconnected, Sir. However, the final signal from the Spider Suit shows that the suit has been devastated." Hearing Tony's worried inquiry, JARVIS said something he hadn't said before.

However, JARVIS's current words are not good news for Tony. The Spider Suit that Peter wears is a hero suit tailor-made by Tony to maximize Peter's ability. It can be said that the Spider Suit is no less technologically advanced than his Iron Man Armor and it is more targeted in its function, unlike the Iron Man Armor.

A Superhero suit that integrates high-level defense and attack was devastated in a moment. JARVIS's words mean that the Spider Suit is gone, so what about Peter who is protected by the Spider Suit? Spiderman has already suffered such an attack, so what will happen to Lin Rui who was also with Peter, Tony dared not think about it.

"Separate thirty Iron Man and rush towards the last known location of Mirage Knight and Spiderman! No matter what happened to them, I will find it!" Tony shouted, hardly thinking about it anymore. Tony now regrets that as he should not have let Lin Rui and Peter rush into the interior of the base.

"Yes, sir." With a word of promise, JARVIS had arranged for thirty Iron Men to leave the front line and head for the entrance to the Hydra base.

"Hydra, if anything happens to Jackson and Peter! I won't let you go! ..." Staring at the expanding pale blue light, Tony whispered in a deep voice.

Chapter 406 Might

Click!

When Tony made 30 Iron Man rush into the base to find Lin Rui and Peter, the thunder strikes in the sky finally stopped, and the gathered clouds slowly dispersed. Storm's figure, which was floating in the sky, was gone at this time. A Supersonic Jet had appeared at her original location. It was the X-Men's Stealth Fighter Jet.

Boom~Hoo~

After receiving Storm, the X-Men's Fighter Jet accelerated to the edge of the battlefield and finally landed steadily on the ground. It seems that X-Men intends to give the next battlefield to SHIELD, which is also something that SHIELD wants.

Buzz~

After the Fighter Jet of X-Men withdrew, the Quinjets fighting against the Magic Cube's energy attack also began to spread out in an orderly manner. Tony also received a message from the Helicarrier and asked the Iron Man army to withdraw to the periphery. Finally, the center position was completely ceded, that is, the positions where the light blue light initially rushed out of.

When both the Quinjets and the Iron Man Army gave way, inside the Helicarrier above the sky, Fury has issued the latest order: To perform Particle Cannon strike! Particle gun, which is one of the most powerful energy weapons loaded in the Helicarrier is also an attack that can make a counterattack against the Space attack in the form of an energy attack.

Buzz~

Under the rapid operation of more than a dozen technicians, the Particle Cannon muzzle at the bottom of the Helicarrier was quickly opened, exposing a black hole with a cylindrical muzzle. As the energy continued to converge, the muzzle of the black hole slowly lighted up, and was soon flooded with dazzling white light.

...

"JARVIS, do you think that the Helicarrier's Particle Strike can repel this kind of Space Attack?" After moving some distance towards the edge of the battlefield, Tony asked JARVIS while looking up at the sky.

"The energy stored in the Helicarrier is enough to release the Particle Cannon shot that can destroy an international city. So, according to calculations, there should be no problem in it repelling the Hydra attack." After Tony asked the question, JARVIS quickly answered.

Although Fury won't expose all the data of the Helicarrier to Tony, they do know many things about things such as Particle Cannon. Moreover, according to JARVIS's calculations, the full power of the Particle Cannon is enough to completely destroy the Hydra base below, which means that Lin Rui and others are also in a dangerous situation.

Of course, Fury will not destroy Hydra at the expense of Rogers and others. The Particle strike this time is precisely calculated, it would be enough to repel those Space Strikes, but it will not cause too much damage to the underground base.

Buzz!

"It's here!" JARVIS continuously broadcasts the current situation to Tony. After two seconds, Tony's eyes suddenly widened.

Boom!

After Tony whispered, a white beam of light, which was much lighter than the color of the laser beam, shot from the sky in an instant, and the target was the light blue light that continued to spread outward.

Although this white beam is not so dazzling, its diameter is almost thirty meters, which is much thicker than the Chest Cannon of the Iron Man Armor.

Looking at this sturdy beam, one would be reminded of the Fire God Artillery that was scrapped on the Golden Gate Bridge last week.

Speaking of the large Particle Cannon on the Helicarrier, there was a small adjustment before the complete improvement. That adjustment made the Particle Cannon more powerful. Only insiders know that the adjustment was based on Lin Rui's Fire God Artillery. Within a week, SHIELD's research on Fire God Artillery progressed by much and they got some technology from the Fire God Artillery, which improved the large Particle Cannon.

Huh~

When the thick beam of the Particle Cannon hit the expanding blue light from the sky, the blue light that originally suppressed the joint defense of Iron Man and the Quinjets was directly pressed back. Sure enough, even space attacks from the Magic Cube's energy don't last long without the Magic Cube's constant support for energy.

"Sure enough, the power of the Particle cannon is indeed quite impressive. JARVIS, do you think our Iron Man Armor can block such a Cannon Attack?" Tony's eyes looked at the blue light that was constantly getting oppressed and contracted and asked JARVIS.

"Sir, although our Iron Man Armor is already very strong in defense, we still can't defend against the Particle Cannon of this strength. However, I believe that we will be able to upgrade to a Stronger Iron Man Armor that would allow us to protect against the Particle Cannon." Hearing Tony's question, JARVIS answered honestly.

In fact, Tony certainly knows that it is impossible to defend against this level of Particle cannon attack with his current Iron Man Armor. He just wanted to hear the answer from JARVIS. Now it seems that the JARVIS is evolving fast enough to answer from his own experience.

"Well, in the future we will make more powerful Iron Man Armors. Now, Hydra will not be able to do anything big without a better weapon." Looking down at the fading light blue light, Tony said faintly.

Dī Dī!

"Sir, I have found the location of Jackson and Peter!" Just as Tony watched the Particle Cannon launched from the Helicarrier eating the light blue light step by step, JARVIS's voice suddenly came. Compared with the calm answer before, JARVIS was obviously surprised when he said this sentence.

"Um?! Connect quickly and show me how they are doing!" Tony promptly ordered after hearing JARVIS's reminder.

Brush!

At the next moment, the light screen displayed in Tony's helmet changed instantly, directly projecting the perspective of an Iron Man that had rushed into the underground base before. In the perspective of one Iron Man, the dark underground base is a passageway extending in all directions. The passageway

through which the Iron Man had passed is filled with Robots that have been “Mutilated”. In this Iron Man’s scan, there are two familiar figures not far ahead.

Call!

After accelerating through the last passage, the Iron Man finally arrived at the central square of the Hydra base that Lin Rui and Peter had found before, and it was also this location where the weapon that used Magic Cube energy to attack was. At this time, the machine in the center of the square is still working hard, constantly transforming the power of stored Magic Cube energy into a space attack and launching it.

However, under the pressure of external Particle Cannon, the machine is almost unable to persevere and emit some electric sparks from time to time. As for the boxes containing the Magic Cube’s energy, the blue light inside them has almost been consumed, and probably won’t last long. Lin Rui and Peter, at this time, fell into the corner of the square and no one knew whether they were alive or not.

Chapter 407 Destroy

Ignoring the Instruments in the center of the square, the Iron Man rushed in and flew directly to where Lin Rui and Peter fell. For Tony, the safety of Lin Rui and Peter is obviously more important than that of the Magic Cube.

Buzz~

When Iron Man landed next to Lin Rui and Peter, two rays of light shot from it and quickly swept over to Lin Rui and Peter’s bodies. JARVIS is carefully checking the physical condition of Lin Rui and Peter for the Initial Treatment. Lin Rui and Peter now look a bit miserable. The Spiderman Suit on Peter has been completely destroyed. Lin Rui’s Phantom Suit shows no damage but it was covered with dirt from head to toe and he is obviously also injured.

Call~

“Cough!.....” While JARVIS was carefully scanning the physical conditions of Lin Rui and Peter, the unconscious Peter suddenly coughed twice, then slowly opened his eyes.

“Huh?! Mr. Stark!?” The waking Peter noticed the Iron Man standing in front of him at a glance and shouted in surprise.

“Hello, Peter, this is JARVIS. Mr. Stark is still outside.” JARVIS replied after hearing Peter’s voice.

“Peter, are you okay? What happened just now?” After JARVIS answered, Tony’s voice replaced JARVIS and came from the Iron Man Armor.

“Ah! Jackson!” Hearing Tony’s voice, Peter looked nervously at Lin Rui lying beside him.

Call!

What happened just now was so sudden, Peter still doesn’t know what had happened. However, seeing the installations in the center of the square, Peter also remembered the whole process.

“Mr. Stark, Jackson and I walked all the way into this building, and we saw this machine, and Jackson was telling me about the power of the Magic Cube when the machine went on. In an attempt to prevent the device from being activated, Jackson was hit by a close-range attack that also affected me.” Recalling what had happened, Peter explained it briefly.

“Mr. Stark, is Jackson all right!?” Peter looked up at Iron Man and asked anxiously.

“The results of the examination showed that Jackson had received serious internal tissue injuries and multiple fractures, but these injuries would not cause many problems with his physics. I brought some Recovery Serum, which would be able to help him.” Tony didn’t answer but JARVIS did.

After inspecting Lin Rui’s physical condition, JARVIS already knew that Lin Rui was fine and he was only injured by the shockwave. Such injuries may already be fatal for the average person, but for people like Lin Rui, it is clearly not a life-threatening injury. Of course, this is the damage Lin Rui suffered after Phantom Suit’s defense. Without Phantom Suit, Lin Rui may not have been able to persevere.

“Peter, you heard JARVIS so don’t worry about Jackson. Now, let’s deal with your injuries first.” After JARVIS’s report, the Iron Man crouched down next to Peter and Lin Rui and Tony’s voice came out of it.

Then, JARVIS took out two Recovery Serums from the Iron Man Armor, one for Peter and the other one for Lin Rui. Although Peter was hiding behind Lin Rui just now and was not attacked with as much power, but he was also very injured. After receiving the Serum handed over from JARVIS, he quickly injected it into himself.

“Mr. Stark, that Machine used the power of Magic Cube to launch that kind of space-based attacks. If you can destroy that, you should be able to stop those attacks.” After injecting himself with the Serum, Peter looked at the Machine and spoke to Tony.

“I know. By the way, did you just say the power of Magic Cube, aren’t those square boxes Magic Cube?” Tony’s voice in the Iron Man Armor agreed and then he asked curiously.

Brush brush!

After Tony asked that sentence, six Iron Man rushed in again from the previous channel. It was the Iron Man who was scattered to search elsewhere. Under JARVIS’s control, these Iron Man flew to the center of the square and surrounded the instrument.

“Jackson said that those are not Magic Cubes, just boxes with Magic Cube energy. The real Magic Cubes must have been taken away.” Peter is already able to stand up as he looked at the energy of the pale blue Magic Cube as it was being drained away.

“In this case, JARVIS, destroy that thing!” Since it was determined that the boxes were not Magic Cube, Tony had no worries, and he directly issued an order to JARVIS.

“Yes, sir.”

Buzz!

Howls whew!

JARVIS answered calmly, and the Iron Mans surrounding the Machine stretched out their hand at the same time. The next moment, Six Laser Beams had shot out.

Boom! Boom! Boom! Boom!

Those Space Attacks from Magic Cube Energy conversion are indeed powerful, but Tony is attacking the machine this time, and his attacks will not be in contact with that space energy. Therefore, under the attack of the Laser Beams, the Machine that had already reached the limit was instantly destroyed, and the broken machine parts were scattered with the sparks.

Boom! ...

At the moment when the instrument was destroyed, several muzzles that had been launching space-type attacks towards the outside also exploded and the blue light dimmed instantly and then disappeared.

And when the blast happened, the boxes with Magic Cube energy were blown out by the blast wave of the explosion. The pipe that has been connected to the boxes to extract the Magic Cube's energy is obviously also disconnected and the boxes closed automatically and some light blue light scattered. These rays are not the attack after being transformed, but the energy of the real Magic Cube.

Buzz!

The scattered Magic Cube energy spread out towards the square without purpose, and JARVIS obviously noticed the movement of those boxes. JARVIS sent one Iron Man back to protect Lin Rui and Peter while directing the other Iron Men to fetch the boxes. After all, it's not known what the power of the Magic Cube will do to them.

Call!

The next moment, the energy of a Magic Cube spreading in the direction of Lin Rui and Peter quickly hit the Iron Man Armor and then disappeared. And the blue light spreading out in other directions also disappeared, it was as if they were just blue lights, without any magical and damaging properties to them.

Shout shout!

While JARVIS checked to see what was wrong with the two Iron Men Armor which blocked the Magic Cube's power, the other Iron Men had flown back with five boxes, each containing some light blue Magic Cube power. There's very little energy left, but it's enough for Tony to study.

"JARVIS, did you detect anything?" When JARVIS checked the two Iron Man Armors, Tony's voice came out.

"No, sir, nothing has changed. It seems that those lights just disappeared here." After Tony asked, JARVIS replied quickly.

"Is there no change? Maybe..."

"What!!....."

Brush!

Just when Tony was thinking about this situation, Lin Rui, who had been lying unconscious on the ground, suddenly shouted and sat up.

Chapter 408 Reminder

Call!

After a cry, Lin Rui woke up. Lin Rui, who suddenly woke up, looked around nervously, slowly calming down after seeing Peter and Iron Man beside him. However, when Lin Rui saw the Machine in the center of the square that had been blown up, the expressions on his face changed.

“Jackson, are you okay!?” Peter asked after seeing Lin Rui’s complexion after waking up.

“I’m fine, some minor injuries. However, I think we are in big trouble now.” Lin Rui shook his head and said he was okay, but he was not optimistic about the current situation.

“Jackson, are you worried that the Magic Cube isn’t even here?” Before Peter knew what Lin Rui was saying, Tony’s voice came from an Iron Man standing in front of them.

Looking up at the Iron Man, Lin Rui knew Tony was not in it now. This is a normal situation. This is an assault on a large Hydra base, and even with the Iron Man Armor protecting Tony, there is no guarantee that accidents wouldn’t happen.

“Yes, if Hydra has been using this kind of energy extracted from the Magic Cube all this time then we have no idea where the real Magic Cube is. Well, today’s battle may be a victory for us but it would not be the end of Hydra.” With a nod, Lin Rui replied seriously.

Call!

After answering Tony’s question, Lin Rui endured the pain coming from all over his body and slowly stood up with Peter’s help. He just said that it was a minor injury, but the injury was actually quite serious.

Now that the Magic Cube is not here and the Machine that transforms the Magic Cube’s energy is also destroyed. Lin Rui is no longer so eager for the follow-up of today’s battle. Of course, Tony got some Magic Cube energy anyway, although very little.

“In that case, I’d better send you out. Now that I’ve destroyed those weapons, SHIELD’s forces will come down to clean them up. You’re not in the right state to stay. It’s best to go back and rest.” Since Lin Rui said the Magic Cube was not here, Tony was ready to take the two injured men out.

“It’s not necessary. Although we were injured, our combat strength is still much stronger than that of SHIELD’s forces, we would at least be able to reduce their casualties.” Lin Rui waved his hand when he heard Tony. Even if he doesn’t find the Magic Cube today, Lin Rui’s goal of killing Hydra remains unchanged, but he will have to find the Magic Cube in the future.

“I think so too, Mr. Stark, I’m fine.” After Lin Rui expressed his position, Peter also spoke to Tony. Although the Spider Suit has been destroyed, Peter himself is very strong.

"I can't help it if you decide to do so, but act with one Iron Man by your side so that I can protect you." Tony knew he could not force Lin Rui and Peter to come back, so he had to give in.

"I know." Lin Rui would not be hypocritical at this moment and he agreed directly.

"Let's go, maybe the Magic Cube is still somewhere in this base." Feeling the recovery situation of his body, Lin Rui is ready to attack again.

However, when Lin Rui had already taken two steps toward the other exit of the square, Peter stood still and looked ahead, as if he saw something.

"Peter?"

Shout!

"Mirage Knight, Professor Charles just contacted me!" After Lin Rui curiously called out to Peter, Peter's pupil contracted and then some excitement appeared on his face as he shouted towards Mirage Knight.

"Professor Charles? What did he say?" "Lin Rui asked quickly after hearing Peter's words. The X-Men have not been on the battlefield since the beginning, except for Storm. Now Charles contacted Peter which means that he must have found something.

As for how Professor Charles contacted Peter, it should be telepathy. After all, some things are not easy to explain over a connection that can be hacked. And because Lin Rui wears a Phantom Suit and has a defensive effect on Telepath, Professor Charles could only contact Peter.

"Professor Charles said that he found a special team on the base that is quickly leaving from that direction, and that direction is also the weakest position in the entire enclosure. Professor Charles also reminded me that the people in that team were very strong, and one of them seems to be able to resist his ability." Knowing that the matter was urgent, Peter quickly spoke out what Professor Charles had just informed himself, and he also pointed his finger in one direction.

Professor Charles had warned especially which means that the escaping team is obviously not too simple, it should be the high-level team of Hydra hidden in this base. And one of them can resist Charles's Telepathy, indicating that there are at least some Mutants in it. To put it this way, if Magic Cube is in the base here, it is now most likely to be in the hands of those who fled.

"Let's go! Let's chase them! If Magic Cube is at this base, it must be in those hands now!" Lin Rui, who got the news, was equally excited as he saw the hope of finding the Magic Cube again.

Call!

Kakaka!

"Come in, how fast can you run in this state now?" Just AS Lin Rui and Peter were running in that direction, two Iron Men flew in front of them and stopped them and Tony's voice came out as the Iron Man opened.

Lin Rui and Peter glanced at each other, and finally quickly armed themselves with the Iron Man Armor.

Brush! Brush!

A few seconds later, several Iron Man rushed out of this central square, the direction they were rushing at was exactly what Professor Charles pointed out before. As for the remaining Iron Man, they took the boxes containing the Magic Cube energy and quickly rushed towards the outside of the base. They must first send the energy boxes back to Tony's hand.

...

Just when Lin Rui and Peter were rushing towards the position where Red Skull fled with the help of Iron Man Armor due to the reminder of Professor Charles, outside the Hydra base the pale-blue light that had been creeping through the air has vanished, and the Particle Cannon which had been launched from the Helicarrier has also disappeared.

When Tony destroyed the Machine inside the base just now, JARVIS reminded Fury, so the Helicarrier stopped the Particle Cannon at the most accurate time, otherwise, it would have caused a devastating blow to the inside of the Hydra base. But even so, the ground of the Hydra base has been sliced ??almost two meters thick by the leakage of energy from two opposing forces, a sign of the power of this energy confrontation.

The SHIELD's advantage was fully realized when the space-type attack that blocked the SHIELD's continued attack disappeared. More than a dozen Quinjets carrying special forces quickly landed vertically on the base, followed by heavily armed special forces.

Under the control of the Helicarrier, thousands of armed personnel quickly searched for the entrance of the underground base and rushed in. And Tony's Iron Man army also completely let go at this time, each armed team will be followed by two Iron Man to help solve some difficult problems.

Boom!

Starting from the sound of explosions in the first entrance, the operation to clean the Hydra base has officially begun!

Chapter 409 Attacks

Boom!

A shield smashed into two mutated behemoths, Captain Rogers looked at the various mutated beasts cramped in the corridor and frowned. Although these mutant beasts are only stronger than ordinary beasts and will not cause them any harm, they are enough to slow down their pace.

As Rogers walked along, he felt something hiding in front of him. First, it was the normal army that stopped them, then it was the Alpha team, now it's the Mutant and Mutant Beasts that are attacking them, and Rogers's Avengers four-man team is already using up a lot of their physical strength.

Dī Dī!

As Rogers and others struggled to battle the Mutant Beasts and the Mutants, their communicators suddenly went off in an emergency. At first, the communication was cut off shortly after they broke into the base, and after a while, they recovered again. After the recovery of communications, Rogers knew that the situation outside was not good, so the support might not come soon.

“Steve, you’re going too slow! There’s a team on the run ahead of you, they probably are this base’s hidden Hydra executive! My Iron Man Army is almost here, along with Mirage Knight and Spiderman, but I need you to stop them first!” Tony’s voice came over from Rogers’s headset as the emergency communication was put through. He first rudely told Rogers and his men that they were slow and then he ordered with a tone of command.

“Captain Rogers, those who are running away may be very important people of Hydra. I hope you can stop them!” Before Rogers could respond, Mirage Knight’s voice cut in. Compared with Tony’s patronizing tone, Lin Rui’s tone is softer. What’s more, what Lin Rui says can be guessed by Rogers to have something to do with Magic Cube.

“Give me their specific location!” Rogers replied faintly while frowning.

JARVIS then sent Rogers the direction and location of Red Skull’s flight. In fact, Lin Rui and his team are not far away from this site, but Rogers and his team are closer. In order to intercept them early, it is better to let the four on this side stop them first.

“Got it! I will stop them!” Seeing the location of Red Skull given by JARVIS, Rogers agreed seriously.

“Relax, my Iron Man Army will arrive in a minute.” Finally, Tony’s voice was heard again from the headset.

Boom!

Without listening to Tony’s words, Rogers kicked a Mutant Beast and rushed towards Falcon in front.

“Falcon! You heard Mirage Knight. Go ahead and stop our targets, don’t let them run away!” Rogers shouted loudly while helping Falcon clear some enemies.

Although this passageway is not spacious, Falcon’s flexibility is already the highest of the four of them. So, for speed, Falcon alone would be the fastest.

Howls!

With a laser gun in his hand firing a beam of light to defeat the two mutant beasts, Falcon’s back wings popped open in a flash and he took off in the tunnel.

“I Know! Cover me!” Falcon, who was flying, rushed towards the passage, shouting while rushing.

“Hawkeye! Daredevil! Cover Falcon!” After Falcon took off, Rogers ran to intercept the enemy, yelling at Hawkeye and Daredevil.

Brush!

Pū Pū Pū!

The shield, already stained with dust and blood, was violently thrown by Rogers, flying around the tunnel and back into Rogers’ hands. The shield had hit many enemies but it returned to Rogers each time in a way that violated the rules of physics.

Hawkeye and Daredevil were on their way as Rogers tried to cover Falcon's departure. Hawkeye pulls three special arrows straight from the quiver behind his back. After he attaches them to the bowstring, Hawkeye's eyes narrowed slightly as he looked ahead.

Buzz!

After a second of concentration, Hawkeye's pupil constricts into a small dot. Then the hand pulling the bowstring loosens and three special arrows shoot out in their respective orbits.

Howls whew!

After leaving the bowstring, the three arrows flew in three directions, two of them in the direction of the Falcon's front charge and the remaining one in the corner of the passageway.

Pū Pū!

Boom! Rumble!

In less than a second, three different voices come up and down the channel, and Hawkeye's three arrows have hit their target. Two arrows flying towards Falcon hit two Mutant Beasts trying to stop him from leaving, piercing their chests and pinning them to a wall. The arrow that hit the corner of the tunnel hit the corner and exploded, helping Falcon clear a part of the ground.

As for Daredevil, he doesn't have much long-range capability. So he went straight to Captain Rogers's side and joined him in hastening the fight to clear the enemy.

Brush!

With the full help of the three teammates, Falcon flapped his wings and quickly rushed out of the passageway, rushing towards the position given by Tony. Behind Falcon, Rogers and the other two also tried their best to quickly defeat their enemies.

...

"Captain Rogers's side has picked up the pace and they should be able to stop the Hydra team from leaving. If they can stop them for some time, we'll be there." Through JARVIS feedback, Lin Rui keeps track of Rogers' progress and the progress of Red Skull's flight.

"Jackson, I have sent out all the remaining Iron Man. No matter what's in that team, as long as there's no Space Attack, they would be stopped. As for that Space Attack, I've just had a little look at their machines. They need a very stable place to fire them out. They can't fire them out in a flight." After Lin Rui made his judgment, Tony's voice also rang out from the helmet of an Iron Man.

"Yeah, I know. Now we only have to worry about what other surprises might crop up, and if Magic Cube is actually on that team, there might be some heavyweight among them. After all, something like a Magic Cube is supposed to be top-secret even on Hydra. To get a Magic Cube, a Hydra..." Although Hydra is on the verge of dying in this situation, Lin Rui has a bad feeling in his heart. In the middle of his sentence, Lin Rui suddenly thought of something and his eyes widened.

“Well? Jackson, what happened?” Although Tony doesn’t know where Lin Rui had learned so many of Hydra’s secrets, But Tony has always believed them so he asks after Lin Rui’s apparent silence in mid-sentence.

“I just thought of something, but it’s been more than sixty years. It should be impossible.” Lin Rui replied after hearing Tony’s voice.

Chapter 410 Hopeless

Just now Lin Rui recalled the situation when Hydra owned Magic Cube more than sixty years ago, and that was when Hydra’s power was at its peak. At that time, Hydra not only controlled World War II but also had a huge advantage in it. If the whole world wasn’t united against them and if it wasn’t for a lot of accidents during the war, Hydra would have been able to control the world sixty years ago, especially with Magic Cube in their hands.

However, the person who broke the dream of Hydra was Captain America. In the beginning, Steve Rogers rushed to the base headquarters of Hydra by himself, finally defeated the leader Red Skull, and finally fell into Ice with the Magic Cube and the Jet.

Now, the Magic Cube is still in Hydra’s hands. Lin Rui has been thinking about whether Red Skull, who should have died at the beginning, is still alive. Of course, the odds are slim, at least according to Lin Rui.

However, Lin Rui didn’t know that he had just guessed the top-secret information inside Hydra. Sixty years ago, Red Skull did not die and after Rogers fell into the ice and was declared dead, he found the Magic Cube again, which he had lost and then hid until today.

Red Skull might have found Rogers 60 years ago, if not for the fact that Rogers fell from such a remote location. If that had happened then there may be no Captain America now, and Hydra will probably have a truly perfect Super Soldier.

“Sixty years ago? What did you think of?” Tony was puzzled when he heard Lin Rui’s answer. He couldn’t keep up with Lin Rui’s thinking.

“Whether I’m overthinking it or I’m right, we’ll see if we catch that team. Whether that person is still alive or not, it doesn’t matter now, anyway, Hydra is bound to be destroyed and no one can stop their destruction.” Lin Rui didn’t think it was a big deal even if Red Skull was alive. The people he had on his side are more than enough for anything.

“Well, it’s fine if you know it yourself. Rogers seems to have caught up with that team. By the way, X-Men’s people have also come down.” Without asking too much, Tony continued to remind.

“X-Men, who has come down?” Lin Rui asked quickly after hearing Tony said X-Men were coming down.

“I don’t know, the X-Men hasn’t established a shared network with us, so I just know that some of them have come down. How many have come down and who has come down is not known” Tony replied.

“Okay, they are on our side anyway. We will be there in half a minute! Peter, get ready!”

“Already ready!”

Brush!

In the dim underground passageway, more than a dozen Iron Man shuttled quickly, and their straight-line distance from Rogers was only a few hundred meters. With the speed of the Iron Man Armor, it would only take less than ten seconds to reach.

...

Huh!

While Lin Rui was rushing towards the fleeing team, Red Skull felt very uncomfortable and anxious now. Because, through the monitoring system in the base, he has seen Rogers approaching his location, and there are many Iron Man behind him on their way and they will reach this location soon. Red Skull knew that his position was exposed.

"Damn it! ... Get ready to fight!" Clenching in his fist, Red Skull quickly orders the Alpha Squad and the new Winter Soldier next to him.

"Follow me, you boys!" Leaving an Alpha squad and the Winter Soldiers to block the pursuers, Red Skull orders those closest to him.

"Yes Sir!" After Red Skull gave the order, the people around Red Skull agreed coldly.

Since Red Skull decided to escape, these people have been following closely the side of Red Skull without leaving. These people are actually Mutants or people with special abilities, but they have been completely controlled by the Red Skull. For example, Professor Charles's mind control is blocked by one of the mental powers Mutants, whose level has just reached level 4. Others are also very strong, which may help Red Skull find a chance of survival in such a desperate situation.

Shout!

Leaving the Alpha Squad and the Winter Soldiers behind, Red Skull has taken the Magic Cube under the protection of these people to speed up and escape. As for the people who are left to live or die, Red Skull doesn't care about them at all. Anyway, in Red Skull's view, him remaining alive and hidden is the most important thing.

Boom!

However, Red Skull had only taken 10 steps out of the room when the sound of an explosion was heard behind him. Falcon, the fastest of Rogers's team has caught up with him and is already in a fight with those who are blocking him.

Hearing the noise behind him, the expressions on Red Skull's face were even uglier, but he could only keep his head down and continue to speed up his escape. Even if the Alpha team and Winter Soldier are strong but they would only be able to stop for a while. Red Skull will not naively think that they can wipe out the Avengers.

"Sir Red Skull, someone is blocking our path in front!" Just as Red Skull continued to flee, the Mutant who had rushed to the front suddenly spoke. The ability of this Mutant is the ability to detect. As a way to open and guard, it is a very good ability. At this time, he found that someone was approaching here not far in front.

"Who is it?" Red Skull shouted angrily after hearing the Mutant words.

“The other party seems to be Mutants.” Without being affected by Red Skull’s anger, the Mutant in charge of the detection answered quickly.

“Mutants?! It’s X-Men! Damn it!” Red Skull’s eyes filled with anger when he heard the answer.

X-Men, who did not act with SHIELD, not only first discovered the Red Skull who had fled, but also blocked his way in front. Obviously, Professor Charles already knew that there will be important people in Hydra in this team, and the Magic Cube is also likely to be here, so he sent the X-Men here to block the way.

“You guys are going to stop them! You, and you, follow me!” A cold look flashed in Red Skull’s eyes as he quickly made a decision.
