

## **Marvel 431**

### **Chapter 431 The Investigation**

New York, on the top floor of the Stark Industries Building, Tony did not move after hanging up on Lin Rui, he sat quietly in a chair for a while. Tony wasn't very calm after knowing the news of Lin Rui being still alive. In fact, he was also very surprised. The calmness of the tone on the phone was pretended.

Call~

"This kid!" Finally, after calming down his excitement, Tony stood up from his chair after saying something to himself.

"JARVIS, how many guests do we have coming here tonight?" Tony slowly asked JARVIS as he walked towards the open-air platform outside the top floor of Stark Industrial Building.

"Sir, after receiving the news, Mr. Peter Parker was already on the road, and he is about a minute away. And Mr. Daredevil will probably arrive at the same time as Spiderman.

On the X-Men side, Professor Charles had just sent a message, they are already on the way. As for Captain Rogers, he seems to be still at the headquarters of SHIELD and will not come for the time being." Hearing Tony's inquiry, JARVIS replied immediately.

Before Lin Rui told JARVIS to tell others that he was still alive, JARVIS actually notified Rogers from SHIELD and Professor Charles from X-Men other than the League of Defenders.

"Why didn't Rogers come? Looks like something did go wrong with him. JARVIS, pay more attention to the SHIELD. If Rogers needs our help, I don't mind putting in some effort. After all, we're on the same team!" Tony's eyes flashed after hearing JARVIS's answer.

...

After the operation against Hydra ended yesterday, in addition to the big event of Red Skull and Mirage Knight's death, a big event also happened inside SHIELD after the operation ended. That is, as the director of SHIELD: Fury was investigated by the World Security Council.

It was a sudden investigation against Fury. Many mistakes Fury made while serving as SHIELD's Director and some unnecessary personnel sacrificed were turned out. Among them, letting Hydra lurk inside SHIELD was the biggest accusation.

Fury, who had always been calm also panicked at this sudden investigation and various accusations against him. Fury wasn't unaware that the World Security Council had always had a problem with him, but he really didn't expect them to take any actions against him.

Not to mention that Fury has been with SHIELD for so many years and has a loyal staff, who can replace him if they want to kick him out? Fury can't think of anyone.

SHIELD is not some random organization, it needs someone who could hold down the fort. The World Security Council wouldn't have allowed Fury to be SHIELD's Director for so many years and tolerate Fury's autocratic style if they were qualified or had anyone else for the job.

However, Fury seems to have forgotten that compared to the popularity and prestige he has accumulated within SHIELD for so many years, there is another person who would be able to compare himself if he is willing to stand up.

That is Captain America Steve Rogers, this Nationwide Superhero is also a very popular figure within SHIELD. If Rogers was really willing to stand up, Fury's ousting would be a sure thing. The question is, will Rogers stand up?

Snap!

In a secret investigation room at SHIELD headquarters, Fury sat quietly on a chair, with a simple table in front of him. Just now, several documents were thrown in front of him by the investigator. They were all the consequences of the sacrifice of some personnel caused by the decisions Fury made over the years.

The investigation and accusations against Fury have been so swift and furious that Fury has remained silent as the evidence has been presented. Fury can't deny that the evidence is out there. But these facts, which no one would have blamed on him in ordinary times, should count as normal sacrifices for better ends.

As the leader of one of the world's most powerful forces, Fury could not possibly run such a large organization without a heart to kill. But under these circumstances, these are the strongest evidence that would bring him down.

"Director Fury, although you have not spoken, we all know that these materials are true. In the years since you have served as SHIELD's Director, you have directly ordered the operation that sacrificed a total of 563 Soldiers. 1234 related personnel were seriously injured. The number of people with minor injuries and other blows to various departments was unknown." Pointing at the papers on his desk, the suit-clad investigator, who had been sent directly by the World Security Council, spoke calmly.

Fury remained silent even after hearing the words of the Investigator in front of him. Fury knew that no matter what he said now was useless, the World Security Council was determined to drive him away this time. However, Fury still has his confidence, even if he is temporarily removed from his post, he will return sooner or later.

SHIELD can work with him at the head position. How would the fools of the World Security Council manage such a large and complex organization like SHIELD? Except for Fury, he really didn't know who else could do such a job.

"Director Fury, in addition to these people who have been sacrificed due to your mistakes, we have a lot of other evidence against you in violating regulations and rules. But I don't think you'd care to read them all." The investigator continued.

Fury snorted at the investigator's words. He will concede this time, but sooner or later he will return. Do the people in the World Security Council really think they he has nothing on them? Fury has been the Director of SHIELD for so many years.

As the world's top agent, how could he not prepare himself for such life-saving things. If the World Security Council does too much this time, Fury will not let them go, and the information in his hands is enough to make the World Security Council fall apart.

“So, you are going to remain silent here. Maybe, I will call you the former Director in a while.” Knowing that someone like Fury will not compromise because of his words, the investigator spoke and stopped saying anything.

Dada~

Then, the investigator turned around and left the Secret Investigation Room, leaving Fury with a dark expression on his face.

### **Chapter 432 Rogers' Action**

Card~

The door of the investigation room was closed behind the investigator, isolating the connection between inside and outside. Then, the investigator showed a standard smile on his face and looked not far away, where a burly figure stood in the corner.

After taking a few steps towards the figure, the investigator still smiled and said, “Nice to meet you, Captain Rogers.” The person standing outside Fury’s investigation room was actually Captain America Steve Rogers, and the Investigator did not know what his purpose is in being here.

As he said, the investigator reached out to shake hands with the world-famous Superhero. However, Rogers, who was standing in the corner, simply glanced at the investigator without reaching out.

“Haha...” His right hand paused awkwardly in front of him for a while, and the investigator smiled twice after making sure that Captain America in front of him did not intend to shake hands with him.

“What’s the situation with Director Fury?” Rogers asked lightly after the investigator withdrew his hand. From Rogers’ tone, it was hard to tell whether he cared about Fury or had some other thoughts.

“What’s the situation with Director Fury? He still didn’t say anything and seemed intent to remain silent like this. However, with so much evidence, even if he remains silent, it would be useless. He is doomed.” Hearing Rogers’ words, the investigator was slightly surprised, but he still answered truthfully.

For the World Security Council, a big reason why they dared to take action against Fury is the attitude of Captain America. When Hydra lurking inside SHIELD has not yet been exposed, SHIELD was still a secret organization for the whole world and its general operations were top secret.

But due to the exposure of Hydra and the fight in Washington, the whole world knows that there are so many hidden forces in the dark in their seemingly peaceful world.

Also in that battle, Captain America, who had bravely sacrificed himself 60 years ago, appeared again in front of the public. Because the US government shaped Captain America to become a National War Hero over the past 60 years, Rogers, who was unsealed from ice received a lot of attention as soon as he appeared, and he became a national Superhero in the United States in one fell swoop. In a short time, Rogers’ popularity surpassed that of the Iron Man Tony Stark.

Therefore, as long as Rogers is willing to support the resolutions of the World Security Council, there will be a better way to overcome the subsequent changes within SHIELD. Whether it is to find the right talent to replace Fury or to let Rogers take on this huge responsibility directly, it all depends on Rogers’s cooperation.

Of course, the World Security Council would not know that Rogers himself had his own plans. He would not help the World Security Council in removing Fury from the office so easily.

“Really? You better be prepared. Director Fury is not a simple character. I don’t think you want to get the wrong results because of carelessness. After all, Fury has been SHIELD’s Director for decades.” Listening to the investigator, Rogers replied with a blank expression on his face. No one would know whether he is being sarcastic or not.

“Of course we know that the information we have is enough for Director Fury to step down. In fact, we could have done more... Captain knows about that.” Facing Rogers’ reminder, the investigator replied with a smile and he finally revealed something. It seems that they originally intended to take a more radical approach.

“I know what you have on hand. I just came to see the situation for myself. Also, I have considered your boss’s suggestion.” Rogers continued.

“Huh?! You have already considered it? What is your answer then?” Hearing Rogers’ next words, the investigator suddenly asked with a serious look on his face.

Earlier, the investigator’s boss, a big shot in the World Security Council had suggested to Rogers that he should lead SHIELD after Fury stepped down.

Leading an organization like SHIELD by Captain America will not only improve the image of SHIELD but it will also suppress the dissatisfaction caused by Fury’s stepping down in SHIELD to a minimum.

Of course, letting Rogers lead SHIELD is not without conditions. The World Security Council requires that SHIELD, under Rogers’s leadership, have a reporting obligation to the Board, which means that some of SHIELD’s future actions will be influenced by the World Security Council. The World Security Council will not allow SHIELD, a growing force, to leave its grip.

“I am willing to lead SHIELD after Director Fury is dismissed, of course, it would only happen after Fury is actually dismissed. However, I think we need to discuss the details.” Looking at the agitated investigator in front of him, Rogers replied lightly.

“Haha! I’m very pleased with your decision, and I think the World Security Council will be very supportive. As for the details you want to discuss, this is no problem at all. The matter of leading SHIELD needs to be discussed carefully.” After receiving Rogers’ answer, the investigator smiled brighter.

“Well, then I’ll leave first. One last reminder, don’t underestimate Fury.” After finishing his reply, Rogers turned and prepared to leave. Before leaving, he made a final reminder. If they look down on Fury, their actions will be hindered by unpredictable surprises.

“Don’t worry, Director Fury will soon become the Former Director.” Looking at Rogers’s back, the investigator lowered his voice and said.

Dada~

Rogers walked away without responding to the investigator’s final words. Fury, who had been locked in a secret investigation room all along, had no idea what was happening outside. He could not have imagined Rogers working with the World Security Council. Of course, this was not the only

miscalculation. Since Lin Rui started intervening in SHIELD, all of Fury's plans have been thrown into disarray.

"Perhaps, it's time to see Mirage Knight. He should be back now." As he walked outside, Rogers thought silently in his heart.

Rogers didn't go to Tony's place after receiving the information from JARVIS. He just wanted to finish his work first, so that he could tell what he had done when he met Tony and Mirage Knight, he had played both Fury and the World Security Council for their small team to establish the Earth Federation.

Dada~

As Rogers' powerful and steady footsteps echoed in the quiet hallway of SHIELD, no one knows what will happen to SHIELD and the World in the future.

### **Chapter 433 Guests**

In the center of New York City, an iconic building stands tall in this prosperous area. This is the Stark Industrial Building, a two-hundred-story building. At this time, as the largest shareholder of Stark Industry, and also the recently thriving Superhero Iron Man, Tony Stark is standing on the platform outside the top floor.

The helicopter parking space outside the top floor of the Stark Industries building is Tony's usual Iron Man landing spot, but it will apparently be used to host some other guests today.

"JARVIS, are they here yet?" Tony asked calmly while looking at the night view of New York with the wind blowing at his face.

"Sir, Daredevil and Spiderman have arrived. Dark Knight is still on the road and he will arrive here in about a minute. As for Professor Charles, I don't know when they will arrive." Hearing Tony's inquiry, JARVIS answered directly.

"Ok, I see Daredevil." After JARVIS answered, Tony could already see a figure on a Hoverboard flying fast in the air in front of him.

"However, where is Peter? Is he climbing the tower from below?" After seeing Daredevil approaching quickly, Tony still hadn't seen Spiderman, so he asked weirdly.

"Yes, sir, Spiderman has climbed to the 198th floors, and he is only 40 meters away from you." JARVIS answered truthfully when Tony asked in a weird tone.

"Cough~" Hearing JARVIS's serious answer, Tony couldn't help but cough twice.

Brush!

As Tony learns that Peter is actually climbing the Stark Industry Tower, a red-figure darts up from the edge of Stark Tower, it is Spiderman Peter, who had climbed from below. Because the Stark Industries building is not adjacent to any other building that is nearly as tall, Peter actually had to climb that many floors.

Phoo~

Peter, who climbed to the top of the Stark building, jumped directly in front of Tony. He pulled off his mask and excitedly looked at Tony.

“Mr. Stark, where is Jackson!?” Peter glanced behind Tony and he did not see Lin Rui’s figure and asked nervously.

Tony was about to answer when the figure of Daredevil on his Hoverboard came bounding out of the air and landed on the platform. As Spiderman and Tony stood together, Daredevil jumped off his Hoverboard and walked right up to them.

“Well, it seems that you all received my message. Actually, it was from JARVIS. So I would be confirming it again, Mirage Knight is not dead, he is still alive, and he is on his way back now.” When Daredevil also walked in front of him, Tony looked at the two people in front of him and said directly.

Call!

“Really! I knew he would be okay!” Hearing Tony’s words, Peter’s tense spirit relaxed.

“Then how is his situation now? Is he injured? Is it serious?” Compared to Peter’s excitement, Daredevil was obviously calmer and asked what he was concerned about now.

“Well, he suffered some minor injuries but nothing serious. I just finished talking to him and Mirage Knight is in good condition.” Hearing Daredevil’s words, Tony nodded and replied.

“That’s good!”

Buzz~

Just after Tony had spoken with Peter and Daredevil, a wave of spatial fluctuations suddenly spread on the platform in front of them. And JARVIS also reacted instantly. Some high-tech weapons quickly emerged from under the platform, already aimed at the Space Fluctuation Point. Although Red Skull has been confirmed dead by Lin Rui and Magic Cube is missing again, JARVIS will be alarmed against any spatial fluctuation.

Brush!

Just as Tony and the other two looked in that direction, a space door opened. Then Iceman Robert wheeled Professor Charles out of the space gate, followed by Blink.

“Hello, Professor Charles, Welcome to the Stark Tower.” Seeing the three people coming out of the Space Door, Tony stepped forward to say hello. While saying hello to the coming X-Men, Tony waved his hand to signal JARVIS to put away those defense systems.

“Hello, Mr. Stark, and thank you for inviting us.” Looking at Tony who was walking in front of him, Professor Charles responded calmly.

Iceman Robert, who was originally pushing Professor Charles, was also ready to greet Tony but he was attracted by a familiar figure standing behind Tony, a young man wearing a Spiderman suit.

“That’s...” After seeing Peter’s young, excessive face, Iceman was a little stunned for a while. He didn’t know if the high school student in the Spiderman suit was really the Spiderman.

Call!

Peter, who was standing behind Tony, hadn't remembered his mask yet, and when Iceman looked at him, he suddenly reacted and quickly put on his mask. However, Professor Charles and Blink, including Iceman, had already seen Peter's face.

"Haha, who are these two?..." Tony apparently discovered that Peter was seen by Charles and the others, so he laughed and looked at Iceman and Blink before asking his question to Professor Charles.

"Hello, Mr. Stark, I'm Robert, nicknamed Iceman, and this is Blink." After the initial surprise, Iceman recovered and looked at Tony before answering.

"Iceman, Blink, is that you?" Tony's eyes flashed after hearing Iceman's answer, he obviously knew about these two X-Men.

In fact, there is an identity file for Mutants all over the world. Except for those Mutants with low-level abilities that are not destructive and unimportant, the Mutants data of Level 3 and above will focus on identification. Therefore, Tony also knows a lot of information about Mutants, of which Iceman and Blink in X-Men are the ones that he has focused on.

Iceman's ability is Manipulation of Ice. Although it is very powerful, Tony is not very interested in it. What he is interested in is Blink's ability to open a Space Door at will. If Tony can study the essence of Blink's capabilities, then it would be a huge improvement for the technology on earth.

However, if Tony gets the Magic Cube, he can better research high-level technologies such as Space Teleportation. The Magic Cube energy that Tony obtained under Hydra base has been hidden, and he had not studied them yet.

"Mr. Stark, where is Mirage Knight? You just sent a message saying he is fine, is it true?" After greeting, Iceman looked at Tony and asked nervously.

"Relax, Mirage Knight is really okay, you will be able to see him later. Now, if you don't mind, you can wait here for a little bit, others are coming here." Tony answered the same question again. Then he pointed to the back and said.

JARVIS just said that Dark Knight is still on the way, and he should be almost here now, Tony wants to leave a place for him to land.

"Oh! Okay." Iceman was relieved when he heard Tony's answer, and then pushed Professor Charles and Blink towards the place behind Peter and Daredevil.

Huh!

As Charles and others walked forward, there was another burst of sound outside the top floor of the Stoke Industrial Building, and someone came again. This time it was Dark Knight Harry, who also came on his Hoverboard.

At this point, all the people who rushed over here after hearing the news that Mirage Knight was still alive had been gathered, the only person who was missing was Mirage Knight himself.

**Chapter 434 Return**

Huhu~

In the sky of New York illuminated by various bright lights, a silver-white Iron Man flew by quickly, and Lin Rui, who was sent to Siberia, finally returned.

“JARVIS, have Peter and others arrived yet?” Lin Rui asked JARVIS while looking at the night view of New York below through the three-D display in the helmet.

“Yes, Spiderman, Daredevil, Mirage Knight, and X-Men have all arrived.” JARVIS quickly replied when he heard Lin Rui’s inquiry.

“Are they all there? It seems that they are waiting for me. It’s a nice feeling although a bit embarrassing.” Lin Rui in the steel suit said.

JARVIS: “...” JARVIS did not respond to Lin Rui, but silently increased the engine power of the Iron Man Armor.

Brush!

...

On the platform on the top floor of the Stark Industries building, Tony and other seven people stood or sat looking at the dark night ahead. JARVIS had just reported that Mirage Knight had arrived.

Although Lin Rui has encountered dangerous situations before, this is the first time that Lin Rui has faced such deadly dangerous situation, which is why Peter and his team are so nervous. However, compared to Peter who only cares about Lin Rui, Professor Charles has more to think about.

Huh!

Soon, after Tony and others had watched the night sky for a while, a flash of fire rushed towards this side from the midair, it was an Iron Man Armor.

“He came back!” The moment he saw that Iron Man, Peter, who hadn’t made a sound since he arrived, shouted excitedly.

Brush!

Boom!

As Peter shouted, the Iron Man flew a parabola straight out of the air and landed on the platform. JARVIS had cooperated to release several robotic arms from the platform, helping disarm the Iron Man’s steel suit after the Iron Man had fallen.

As the mechanical arm took away the Iron Man Armor suit piece by piece, the figure of Mirage Knight slowly appeared in front of Peter and the other seven.

Phoo~

After most of the armor on his body had been removed, the person raised his head and looked at the person waiting for him, and then took a step forward. Mirage Knight, or Jackson Lin, reappeared in front of everyone after missing for more than thirty hours.

“Hello everyone, I am very happy to see you again.” After all the Iron Man Armor was removed, Lin Rui wearing the Phantom Suit had also walked in front of Tony and the others, he looked at the seven people waiting for him in front of him and smiled.

Call!

The second after Lin Rui finished greeting, Peter had rushed out from behind Tony and hugged Lin Rui. Behind Peter, another figure also rushed out. It was Harry, who also hugged Lin Rui. At this moment, Mirage Knight, Spiderman, and Dark Knight hugged each other.

“Cough! I know you are worried about me, but I’m okay now.” Lin Rui was hugged hard by Peter and Harry. Feeling the concern from his friends, he was happy but there are other people in front of them now, otherwise, Lin Rui wouldn’t mind letting Peter and Harry hug more.

Call!

“Next time! Don’t do such dangerous things anymore!” Releasing Lin Rui, Peter said in a serious voice. If it weren’t for Lin Rui’s desire for Magic Cube, he wouldn’t had been transported by the Magic Cube together with Red Skull.

“Well, I’ll be careful next time.” Lin Rui patted Peter’s shoulder and spoke seriously. As for whether Lin Rui will behave the same way next time, it depends on the situation at that time.

“Welcome back.” After Peter finished speaking, Harry spoke a sentence from the side. Harry, who was already a director of a large group, obviously had a mature mind.

“Thank you!”

After embracing Peter and Harry respectively, Lin Rui faced Tony and others again. Looking at Tony, Lin Rui expressed his gratitude. Lin Rui knew that Tony was actually the one who underwent a lot of pressure after his disappearance. Finally, Lin Rui looked at Professor Charles in a wheelchair.

“Mirage Knight, I’m glad you are okay.” Professor Charles said in a relaxed tone after seeing that Mirage Knight is still alive.

“Professor Charles, I am glad you came here in person.” Looking at the wise bald old man in front of him, Lin Rui spoke earnestly.

“Mirage Knight, I knew you would be okay!” After Lin Rui and Professor Charles finished their talk, Iceman walked out and he opened his arms to give Lin Rui a big hug while talking.

Lin Rui will certainly not refuse Iceman’s embrace. Among X-Men, Iceman is Lin Rui’s first acquaintance and the most compatible Mutant. Lin Rui and Iceman hugged, and then Lin Rui found that Iceman’s body does not seem to have recovered.

“Robert, haven’t you recovered yet?” Lin Rui asked Iceman worriedly.

“Well, I used too much power last time, it will take some time for me to fully recover.” Hearing Lin Rui’s words, Iceman smiled and replied.

In the last battle on the Golden Gate Bridge, because Hydra used the Magic Cube's space strike for the first time, Iceman broke out with his Absolute Ice attack. Although he blocked the attack, he used the power beyond the Fourth Level Mutant and he couldn't control it, causing Iceman's body to be directly injured seriously, and it would take a long time and rest for him to make a complete recovery.

In fact, being a high-level Mutant may not be a good thing. Although a higher level of Mutation will allow for better control of your own abilities, it will not cause harm to people around you. Like Mutants below Level 2, although some are very capable, but because they can not control their powers, they will always cause harm to the people around them. This situation is the main reason why Mutants cannot be accepted in the mass society.

Once the level reaches the highest level known to date, level 5, it represents their versatility and is almost unlimited. And the use of such a strong ability requires the same strong body, if the body is not strong enough, it will be exploded before the ability is used. This is also the reason why the most powerful Mutants on earth are Fourth-Level Peak Mutants, because some rare Fifth-Level Mutants are either unable to exert their full strength, or they are strangled because they cannot withstand such powerful forces in the body.

"So, maybe this can help you." After listening to Iceman's explanation, Lin Rui thought about it for a while and directly took out a Serum from the inner space of the Phantom Suit and handed it to Iceman.

This Serum is not the Gene Therapy Serum produced by Oscorp, but it is something that Lin Rui had just redeemed from the System Shop that can help a Mutant in his/her recovery. Although Oscorp's Gene Serum can treat many diseases at the genetic level, Mutants' genes are not entirely similar to that of a normal human being, so those Serums are useless to them.

"Thank you." Although he didn't know if this Serum would be useful but Iceman still smiled and took it.

"Okay, since everyone has seen Mirage Knight, let's not stand outside anymore. The wind at night is still a bit cold." Seeing that everyone had already greeted Lin Rui, Tony as the host clapped his hands before speaking.

"Well, let's go in." Lin Rui had walked toward Tony's luxurious top-floor office with Peter and others after nodding towards Tony.

### **Chapter 435 Arrives**

After a few minutes, four members of the League of Defender: Mirage Knight, Spiderman, Daredevil, Dark Knight; X-Men's three members: Professor Charles, Iceman, Blink; in addition to Stark Tower owner, Tony Stark are already seated in the luxury office.

After asking JARVIS to arrange for the robot to deliver some drinks, Tony sat on his own couch and waved his glass at the people in front of him. It was the first time Tony's top office had so many people in it, they are some of the special people that the average person would never see. If people in this room went on a riot then Tony's Iron Man army won't be enough to stop them.

"Well, now I can get Mirage Knight to tell me about his missing day. You are all very curious about this, I suppose." Seeing that everyone was quiet, Tony, the host, spoke first. As for what Lin Rui should say, of course, he has discussed with Tony before.

After Tony finished speaking, no one said anything. It was a tacit acceptance of what Tony said. After finishing his drink, Lin Rui puts down his glass and looks around at the group sitting in front of him.

“Actually, I just wanted to stop Red Skull from leaving. However, I underestimated his determination to teleport away. Although I hit him at the last moment, the teleportation started, and it was still unstable teleportation... Finally, I woke up in a very unfamiliar place and one day has passed by then, and Red Skull was right next to me, dead.” Lin Rui simply explained as he looked at these people in front of him.

“Then, I contacted Mr. Stark and asked him to send Iron Man to rescue me. After all, I suffered a serious injury during the teleportation process, and there is no way I could have come back from such a faraway place alone.” Lin Rui concealed the location of his teleportation and a trip to Hydra’s Siberia base.

It’s not that Lin Rui wants to hide it from others. The key is that there are some things that don’t need to be known to too many people. Even if these people in front of him are trustworthy, Lin Rui will not tell them everything for now. Regarding the Siberia base and Magic Cube, Lin Rui will explain it to Professor Charles individually. At that time, Professor Charles will choose whether to tell other X-Men or not.

“That’s really lucky!” Peter, sitting next to Lin Rui, said with some emotion in his voice.

The faces of Iceman and others on the other side of the room were similar in the way that it said that he was lucky enough to survive the teleportation. Lin Rui said that Red Skull has died from the same teleportation, which also reflects the strength and luck of Mirage Knight which is obviously higher than Red Skull.

“Then, Mirage Knight, how are you now? If you are seriously injured, go back to rest first.” Peter also reacted to Lin Rui’s words and ask him to rest.

“I’m okay now, don’t worry.” Lin Rui waved his hand when he saw Peter’s worried look. Lin Rui’s mental damage will not be cured for a while but his physical injuries are almost recovered.

“Sir, Captain Rogers has arrived.” Just when Lin Rui sat down and said a few words, JARVIS’s voice suddenly came out. Rogers, who hadn’t come here before, still came now, apparently taking care of his own affairs.

“How did he come here? Let him jump down if he is on a Quinjet.” Tony said with a frown when he heard JARVIS.

“Yes, sir.” JARVIS has already sent the news.

Faced with Tony’s treatment of Captain America, Peter and others were a little embarrassed, but they didn’t say anything. After all, this is the Stark Industries Building, Tony’s home.

Buzzing!

Boom!

Shortly after JARVIS’s voice, Lin Rui heard the sound of an engine outside. It was clear that the Quinjet had arrived. Then a heavy weight fell to the ground. Hearing this, Lin Rui and others’ face changed again. Looks like Captain America Steve Rogers really jumped right off the Quinjet.

Da Da~

Soon Peter and the others, who were looking out, saw a large figure coming in slowly. It was Captain Rogers. After dealing with his affairs inside SHIELD, Steve Rogers came here.

“Captain Rogers.” Looking at the person who came in, Lin Rui stood up from the sofa and greeted him.

“Mirage Knight, it’s nice to see you again, you can always surprise people.” Seeing Mirage Knight unharmed, Rogers said happily.

“Thank you, by the way, Red Skull is dead. If you want to see his body, you should be able to see it tomorrow.” After hearing Rogers, Lin Rui responded with a smile and then told Rogers something. The thing, that is the death of the Red Skull.

Brush!

Sure enough, after listening to Lin Rui saying that Red Skull was dead, Rogers’ eyes suddenly became sharper. As the actual leader of Hydra, Red Skull was Rogers’ worst enemy more than sixty years ago. He had thought that Red Skull had died sixty years ago, but in the last mission, he suddenly saw him living and breathing. No one knows how surprised Rogers was.

“Is he finally dead? He should have died long ago.” Rogers said in a low tone after taking a deep breath.

“Well, since you are here too, maybe we can take this opportunity to clarify some things formally.” Before Peter could stand up and say hello to Rogers, Tony put down the glass in his hand and looked at Rogers.

Tony suddenly said this and there were only three people in this room who understood him: Lin Rui, Professor Charles, and Rogers. The rest of the people didn’t know what Tony’s words meant. Tony’s words are about the fact that the people who came together to establish the Earth Federation will finally formally establish a relationship.

“That’s why I’m here today, Mr. Stark.” Hearing Tony’s words, Professor Charles, who has been sitting there, suddenly replied.

“Well, I think it’s about time.” When Professor Charles spoke, Rogers, who had just arrived, nodded in response.

“Well, I knew I wouldn’t have much time to relax.” Seeing that Professor Charles and Captain Rogers had already responded, Lin Rui responded with a wry smile. But that was also the first thing he intended to do when he came back.

“Mirage Knight, what are you talking about?” Peter asked curiously after hearing what Tony and the others said and seeing Lin Rui’s serious look.

“It’s okay, I’ll tell you later.” Lin Rui said in a low voice and winked at Peter.

Phoo~

When Lin Rui answered Peter, Tony had also stood up.

“Then, come with me, my top floor is more than enough for that,” Tony said as he walked towards the back of the office.

Behind Tony, Professor Charles controlled the wheelchair by himself, and Captain Rogers also walked over. In the end, Lin Rui followed behind them under Peter and others' doubtful eyes.

In the end, Peter and the others fell silent in this luxurious office.

### **Chapter 436 The First Meeting**

Following Tony, Lin Rui came to a secret room half the size of the luxurious office in front of them. Although the area of ??this secret room is a bit small compared to the luxurious office, it is already very large, at least as a secret room.

As he walked in, Lin Rui also noticed the doors closing behind him. Based on Lin Rui's previous knowledge of Tony's office, he didn't know that there was such a secret room behind the top-level office. So, it can be seen how much attention Tony paid to this meeting.

"Sit wherever you like, I don't have many rules here." He sat down on a sofa in the secret room first and looked at Lin Rui and others before saying. Of course, Tony said this mainly to Rogers as Professor Charles was already in his own wheelchair.

Hearing Tony's words, Lin Rui would of course not stand on ceremony and he directly sat down in a chair. As for Captain Rogers, he also sat down beside Lin Rui. Up to now, the team members of the Earth Federation consisted of Lin Rui, Captain America Steve Rogers, Iron Man Tony Stark, and Professor X Charles.

"Okay, I think we all know why we are here." Seeing everyone sitting down, Tony continued.

As the first person to support Lin Rui's crazy plan, Tony himself has a great say in it. Therefore, even if facing the famous Captain America and Professor X, his voice and presence are not weak.

"Tony, we all know what you mean, so don't talk nonsense." Rogers frowned when he heard Tony's words. As the Captain of the Avengers Alliance, and the future Director of SHIELD, Rogers does not like Tony's sense of superiority.

Listening to Rogers, Tony was about to say something more. After all, Tony hated Rogers from the very beginning and now Rogers had choked him in front of Lin Rui and Professor Charles. If it weren't for the name Captain America, Tony wouldn't let him join the team.

"Since Mirage Knight is fine this time and Red Skull has been confirmed dead, Hydra can be said to have been completely destroyed. Speaking of it, this should be regarded as a huge victory after we joined hands." Just as Tony's face changed and he was ready to speak again, Professor Charles in a wheelchair suddenly spoke. Obviously, Professor Charles also felt the uncomfortable situation between Tony and Rogers and he planned to use some words to ease the atmosphere.

In this secret room, in addition to Lin Rui who is equally powerful and has Phantom Suit defense, Professor Charles should be able to invade the minds of Captain Rogers and Tony. However, he did not intend to do so. On one hand, Professor Charles is not the kind of Mutant who would use his ability at will. On the other hand, it is also a respect for his allies.

“Speaking of this eradication plan for Hydra, Mirage Knight still has something to tell you. Some information was difficult to explain when I was outside, but it doesn’t matter here.” After Charles interrupted, Tony didn’t look at Rogers either but continued.

After Tony has finished speaking, Professor Charles and Captain Rogers turn their attention to Lin Rui, who has not spoken since entering the room. Being watched by Captain America and Professor X, even though Lin Rui has strong composure, he is also a little nervous.

“Ahem! Well, with regard to our joint attack on Hydra this time, in fact, apart from eliminating Hydra, I think Captain Rogers and Professor Charles should be very concerned about the news I told you before.” Coughed twice to relieve some of his tension, Lin Rui continued.

“Yes, we take seriously both the claim that the earth will be invaded by some extraterrestrial civilizations and the Cosmic Treasure Magic Cube that has been proved to be in Red Skull hand. And it’s because of those circumstances that I’m betting on the future of the Mutants on your league.” Professor Charles nodded in response to Lin Rui’s words with a glint in his eye.

“Although I just hope that the earth’s civilization will develop better in the future, and we can try to make the earth’s future more stable.” Looking at Mirage Knight sitting opposite him, Rogers also spoke seriously. Rogers can also see the current situation of the earth very clearly. Without a force strong enough to suppress everything, this situation where each force fights on its own will continue.

“Well, my information is true. However, although I was teleported away with the Red Skull this time, I did not get the Magic Cube. It seems to have fallen out during the teleportation process, and it may be anywhere on Earth now.” After hearing Professor Charles and Rogers’s response, Lin Rui first told them the current situation of Magic Cube.

“You didn’t get it?” After Lin Rui said that he didn’t get the Magic Cube, a trace of doubt flashed in Captain Rogers’s eyes, but it quickly disappeared. Obviously, Rogers had some doubts about this news but he hid it.

“An item like that which is strong enough to bring destruction to the planet must be kept safe in our hands. I will send out some X-Men to find this Magic Cube. I hope Mr. Stark will cooperate in that.” Professor Charles does not doubt Lin Rui’s words, but he is equally eager to keep such an item in his hands.

Although Professor Charles didn’t see the power of Magic Cube with his own eyes, its ability to open stable portals was enough to drive anyone crazy. Although Blink also has the same ability, it is quite limited. How can a single X-Men’s power be comparable to the Magic Cube with unlimited energy?

“Thank you, Professor Charles. We must get the Magic Cube. This will be an important mission for us in the future.” Tony nodded and said that he would cooperate with Professor Charles to find the Magic Cube.

“Then, Mirage Knight, can you determine the exact date of the appearance of the Extraterrestrial Civilization? Because, even if we start to join forces now, if they come too early, we may not be able to resist their invasion.” Not being too concerned about the Magic Cube, Captain Rogers looked at Lin Rui after Tony finished speaking, and then asked. The safety of the Earth is what Rogers cares most about.

For Rogers, the amount of power he gets is less important than the amount of power he gets to protect the innocent people on the planet. Well, Rogers is the one with the big heart, otherwise, he wouldn't have been injected with the Super Soldier Serum in the first place and it wouldn't have worked otherwise.

"This, although I don't know the specific time. But, we are not that unprepared." Hearing Rogers' words, Lin Rui's mouth curled up slightly, and then he looked at Tony.

When Rogers finished speaking, the expression on Tony's face had slowly changed, and Lin Rui also showed a smile. Then, in front of the doubtful eyes of Captain Rogers and Professor Charles, Tony snapped his fingers.

Pop~

"JARVIS, show our recent results to Captain Rogers and Professor Charles."

"Yes, sir."

## **Chapter 437 The First Meeting 2**

Brush!

After Tony snapped his fingers and JARVIS said yes, the room was suddenly enveloped in translucent pale blue optical fibers. Then, light blue light quickly moves inside the chamber, slowly sketching out some images.

The light blue light coming out of the chamber may seem like science fiction, but Rogers and his team are not focused on the light, but on what they outline. Because, with the passage of time, these light blue lights outlined a complex and semi-transparent 3-D image in front of them, which was an Aerospace Warship straight out of some science fiction movie. Judging from the appearance of this Aerospace Warship, it at least has surpassed any technology that is currently known to the world.

Phoo~

A few seconds later, JARVIS used the 3-D projection to fully display the physical structure of the E Grade Aerospace Warship in this secret room. The shape was not too big but not too small either, it is enough to show that this Warship has strong mobility and armed capabilities.

Seeing the 3-D Aerospace Warship in front of them, Professor Charles and Rogers couldn't hide their shock. Although they have always known that Stark has some advanced technologies that surpass the general public, for example, the Anti-Gravity Engine provided to SHIELD not long ago and the Miniature Arc Reactor that caused global energy turmoil and it has not yet subsided and it can be called the Turn Of The Century Technology.

But at this time, the E Grade Aerospace Warship they saw in front of them clearly surpassed those technologies and it has capabilities to reach outer space. Although it's airstrike capabilities may not be as good as the Helicarrier that can be called a war fortress but if such an Aerospace Warship fought with the Helicarrier, the one in front of them must win the final victory.

“This is!... Aerospace Warship? Does Stark Industries already have such technology?” After being shocked by the picture in front of him for a while, Professor Charles first reacted, and then looked at Tony and asked eagerly.

If Stark really has such a technology in his hands, and if it can be maturely manufactured, then their alliance force can completely surpass other forces on the earth. Although the combination of several of their forces can still surpass any power on Earth, the deterrent power of such an Aerospace Warship is still great.

When Professor Charles looked at Tony and asked his questions, Rogers also looked over. If SHIELD’s Helicarrier that was launched some days ago was already a huge deterrent to other forces on the planet, then the deterrent effect of such an Aerospace Warship would be stronger than any Helicarrier.

“Is this real?”

Seeing the expressions of Professor Charles and Rogers Captain, the proud look on Tony’s face did not diminish in the slightest. His expression when he first got the E Grade Aerospace Warship from Lin Rui was no better than the two people in front of him.

“This...of course... is real! Moreover, this is an Aerospace Warship, it is a Warship that can fight in Space and in any atmosphere. Moreover, Stark Industries did have the technology to make these ships and we have already started to manufacture it.” Without stalling, Tony had already answered their questions after enjoying the surprised expressions of Professor Charles and Rogers.

“Aerospace Warship! You have already started manufacturing! It turns out that we all underestimated Stark Industries! Mr. Stark, you really deserve to be the greatest scientist of this century!” Hearing Tony’s answer, Professor Charles was very excited and he spoke with some emotion in his voice.

Although Stark Industries was originally the world’s top group, and Stark’s technology has always been the world’s leading products. However, since the death of Howard Stark, Stark Industries has not produced any particularly amazing technology for a long time. Until Tony introduced the Iron Man Armor, this single-soldier super armor equipped with a Miniature Arc Reactor made the world once again recognize the name of Stark, the world’s leading technology superpower.

Now, Tony has come up with even more impressive technology, and Professor Charles doesn’t know what to say. If the Iron Man Armor only enhances an individual combat capability in the atmosphere, then this Aerospace Warship has risen the combat effectiveness of Interstellar. And with Iron Man, Tony’s Armed Forces are enough to shock the world.

“Haha, Professor Charles, you praise me so much.” Hearing Professor Charles’s praise, Tony was unusually humble.

However, Tony did not say that this technology was directly given to himself by Lin Rui. This is what he had discussed with Lin Rui before. The emergence of E Grade Aerospace Warship will be attributed to Stark Industries. Anyway, they have already taken out a lot of High-tech technologies so this won’t be too much of a shock.

“Tony, do you have a finished product now?” Although Rogers was also very excited, he did not praise Tony like Professor Charles but went on to ask. In Rogers’ view, such a huge Warship could not be manufactured silently by the Stark Industries as it was not small as an Iron Man Armor.

“Of course, such a high-tech Warship was not easy to build even for me. Now that we’re 60 percent of the way through, the rest of it will take some big moves if we want to continue. And these big moves will attract some people’s attention, which is why I haven’t exposed this Aerospace Warship.” Glancing at Rogers, Tony stretched out his hand and slid on the image in front of him and replied.

Following Tony’s gestures, JARVIS presented the current progress of creating the Aerospace Warship and some technologies one by one in front of Professor Charles and Rogers. Looking at the completed parts in front of them, the shock in the eyes of Rogers and Professor Charles has not subsided but has become more and more profound. As for Lin Rui, he hasn’t spoken since just now. It’s Tony’s moment, and he would not interrupt it.

“So, this is my confidence, the confidence to fight the invasion of Extraterrestrial Civilization in the coming future!” Seeing Rogers not speaking anymore, Tony pointed to the Aerospace Warship in front of him and said loudly.

At this moment, Tony’s arrogant gesture was vividly displayed, but Professor Charles and Rogers wouldn’t mind either. Because at this time, Tony did have the capital to be proud, he had a weapon in his hand that could dominate the earth.

“So, this is the reason why we have so much confidence in establishing the Earth Federation.” Finally, after Tony finished the show, Lin Rui spoke calmly.

### **Chapter 438 How Old?**

When Captain Rogers representing SHIELD, Tony Stark representing Stark Industries, Professor Charles representing X-Men, and Lin Rui representing League of Defender disappeared in the secret room behind Tony’s luxurious office, the remaining people in this luxurious room were left with each other, and perhaps the invisible JARVIS is also here.

Less than ten minutes after Lin Rui disappeared, Spiderman Peter, who had been sitting quietly in his chair, couldn’t help it. On the one hand, Peter was very curious about Lin Rui and Tony going behind them mysteriously. On the other hand, he had determined that Lin Rui was okay, and after he felt a lot more relaxed, he had already recovered his previous funny personality. So, when Harry and Daredevil didn’t respond, he got up from the sofa by himself and then began to slowly walk around Tony’s office.

Seeing Spiderman walking in Tony’s office alone, Harry and Daredevil didn’t speak, nor joined him. They came here today just to make sure that Lin Rui was okay, now they just have to wait until Lin Rui and others come out. After touring Tony’s luxurious office alone, Peter wandered over to the sofa where Iceman and Blink were sitting. He looked at Iceman, who was sitting quietly on the sofa, and Peter wanted to talk. So, after enduring for two seconds, Peter finally spoke.

“Hey! Iceman, it’s been a long time! Thank you for saving everyone last time. Your last attack was really amazing!” When Iceman turned to look at Peter, Peter thanked him in a relaxed tone.

“No thanks necessary, I wasn’t the only one who took actions at the time. Also, the name of my attack is Absolute Frozen. Or, you can understand it as a domain.” Looking at Spiderman beside him, Iceman responded with a smile. However, compared to the expression when he saw Spiderman before, Iceman’s expression right now is a bit weird now, but it is not clear what is weird.

“Wow! Absolute frozen! It’s a domain, does it mean the kind of domain characters have in the game? Within the domain, you are the strongest! The last time you used that attack, I felt that you can freeze me to death!” Hearing Iceman’s response, Spiderman got closer and asked curiously.

“Uh... Almost. However, for some reason, I can’t use that attack often. Last time, I used it twice in a row, which resulted in my body not fully recovering.” Seeing Spiderman sitting directly on the sofa next to him, Iceman’s face twitched before replying.

“Really? If you are injured, you can use our treatment Serum. The effects are very good. Even a serious injury can be cured quickly. These Serums are still in the confidentiality improvement stage, but our internal staff has already used them.” Hearing Iceman saying that he was injured, Peter spoke enthusiastically, and while talking, he was going to get Iceman a Gene Therapy Serum.

“Well, Mirage Knight has just given me a Serum.” Seeing Peter picking up something, Iceman said quickly.

“Oh, I forgot about that.” Hearing what Iceman said, Peter also remembered that Lin Rui threw a Serum to Iceman when he came back.

“By the way, Iceman, I have always been very curious about the various abilities of Mutants. One of our partners in the League of Defender is also a Mutant. However, his ability is strengthening his body. I am curious about Mutants who have special abilities like you. Can you explain to me how you use these abilities?” He thought he was familiar with Iceman so Peter asked curiously.

Peter is very curious about the Mutants that stands out from ordinary people. Those abilities that can control Elements, Space, Telepathy, and many other superpowers that exceeds everyone’s expectations. Although Peter also has a very strong power, he still yearns for these special abilities. Speaking of which, Mutants also gained their abilities by mutation through Genetic Mutations of ordinary people, and Peter was also bitten by a Spider before the Genetic Mutations that allowed him to become Spiderman.

Iceman looked at Peter. Although Iceman couldn’t see Peter’s expression through the Spiderman mask, he could be sure that the face inside must be curious. Reminiscing about the young and excessive face under Peter’s mask that Iceman had seen after arriving, Iceman was already somewhat impressed.

“Well, I can answer your question. However, you also have to answer one of mine.” After thinking about it, Iceman suddenly said.

“Huh? Of course.” Peter answered without hesitation when he heard Iceman’s words. When Peter thought about it, Iceman probably wanted to ask how his abilities came from, but Peter would not hide his abilities.

“We are all born with our abilities. Some people awaken these abilities early in their life, some people awake them up later, and some people may not awaken them all their lives. And the use of our abilities

is like walking and running, it is something we can use whenever we want.” After Peter agreed, Iceman went on to talk about the Mutants’ abilities.

While talking, Iceman raised his hand. A chill came out of his hand as Peter stared. Then the chill slowly builds up over Iceman’s palm and a delicate ice-crystal flower appears on his palm.

“Just like this, as long as we have enough control over our abilities, we can use them well. However, just like running for a long time, we will exhaust our energy. Our ability is not endless. Once we consume too much, it will cause harm to the body.” Holding the ice crystal flowers in his hand, Iceman looked at Peter and explained with a smile.

However, what Iceman didn’t continue to say was that once a Mutant broke through the Fourth Level and reached the Fifth Level which was the highest level so far. Then, their abilities would already become endless. However, the use of that endless power also requires a stronger body as a basis.

“Wow! That’s amazing!” Peter cried out in shock as he looked at the ice crystal flower in Iceman’s hand.

Call!

“Okay, it’s time for me to ask you now.” Throwing the ice crystal flower in his hand to Peter, Iceman continued.

“Well, just ask,” Peter answered.

“Um, how old are you this year?” Iceman asked curiously while looking at Spiderman playing with the ice flower before him.

Call!

Hearing the question asked by Iceman, the ice crystal flower in Peter’s hand fell on the sofa and rolled twice. How could he forget that his face had been seen by them!

Harry and Daredevil, who were sitting on the other side, also shifted their gazes after hearing Iceman’s words. They were also speechless, and Blink, who was sitting on the other side of Iceman with an indifferent expression, also has a flash of curiosity in her eyes.

Peter: “...”

### **Chapter 439**

In Tony’s luxurious office, because of Iceman’s sudden question, everyone’s eyes focused on Spiderman. Harry was naturally not curious, he just wanted to see how Peter would answer this question. Daredevil couldn’t see it at all. He always relied on his own perception and roughly knew how old Peter was. And Iceman and Blink had seen Peter’s face before. They were just wondering if the Super-Popular New York Superhero was a young man in his twenties.

“This question... can I not answer it?” Peter asked with some embarrassment when everyone was looking at him and Harry also smiled at him.

“It doesn’t matter if you don’t want to answer, but you agreed to answer just now,” Iceman said with a smile when he saw Peter’s embarrassment.

When Peter heard the first half of Iceman's sentence, Peter thought he had let him go, but he didn't expect that there was still a second half-sentence waiting for him. Therefore, Peter can only accept his defeat. It's just age. They have already taken a look at his face. So what if they know his age?

"Well, I'm sixteen this year!" Looking at Iceman smiling and waiting, Peter made up his mind to answer quickly.

...

After Peter had finished answering, all three people in this office, except Harry, including Daredevil, were stunned. Although they were mentally prepared that Spiderman would not be too old, the fact that Peter was only sixteen still surprised them.

"Sure enough, the hero is a teenager!" In the end, it was Daredevil who spoke softly first.

In Daredevil's perception, Mirage Knight is also a very young teenager, probably about the same age as Spiderman, and Dark Knight, the friend of Mirage Knight and Spiderman is obviously similar in age to Spiderman and Mirage Knight. So, after learning the true age of Spiderman, Daredevil also expressed some emotion.

"You are only sixteen years old!?" After Daredevil spoke, the surprised expression on Iceman's face hadn't disappeared before he asked.

Although Iceman caught a glimpse of Peter's face just now, but he didn't get a close look and Peter quickly put on his headgear, he just thought that Spiderman was probably only a young man in his twenties. But now that he heard Peter's answer, Spiderman turned out to be a minor! Thinking about the time when Spiderman became famous. This is when he is in high school?

However, although Iceman was surprised at Spiderman's age, he soon got over his surprise. Many members of the X-Men were involved in the struggle between the various forces of Mutants when they were young. Many of them had participated in many battles between the Mutants as early as the age of sixteen. Just like Iceman, his experience in his youth was much richer than Spiderman.

"Okay, I'm finished answering your question, I'll go back now." It seemed that he didn't want others to worry about his age too much, and Peter walked toward Harry and the others after he answered.

Peter has always known that his strength and Spiderman's identity need to be kept a secret. After all, he is only sixteen years old. He was in high school and if his true identity was revealed then Aunt May would not agree with him being a Hero. And because of Lin Rui and Harry, Peter is very satisfied with his current state, guarding his secrets with his friends, and working hard together to maintain the safety of the city.

Seeing Spiderman standing up and leaving, Iceman still had a lot to ask, but he didn't know how to ask his questions. Iceman now wants to know what kind of person Mirage Knight is, is he also a teenager? After all, Mirage Knight is obviously very familiar with Spiderman in real life, which can be seen from their relationship. If Spiderman is just a high school student, what about Mirage Knight?

"What are you laughing at? Be careful I expose you too!" When Peter walked back to his place, Harry was smiling at him, and Peter whispered threateningly.

Harry: "Haha."

Just like that, Peter and the others waited for about half an hour outside chatting. After JARVIS arranged for the robot to deliver drinks for the second round, Tony and the other three walked out of the secret room. However, compared to the calmness of everyone's faces when they entered, now both Rogers and Professor Charles can't hide their excitement.

"Mirage Knight, can we go back? Jack and Deadpool are waiting for you at the base." Seeing Lin Rui and others have come out, Peter hurriedly jumped up and shouted. Although Peter wanted to know what Lin Rui and the others were discussing, he wanted to leave here now, he did not want to receive the curious attention from Iceman.

"Well, I can go back now." Lin Rui nodded and agreed without noticing Peter's tone.

In fact, after Tony showed Rogers and Professor Charles the E Grade Aerospace Warship, their secret team has become very strong. Sometime after that, they were discussing a question raised by Lin Rui. That is, what is the name of their Top-Secret Organization. In order to establish this name, the four of them discussed for a long time and still did not come to any conclusion.

Because the name must represent their forces, which is more difficult. And neither Tony, Nor Lin Rui, nor Captain Rogers, nor Charles would give in. So, in the end, they didn't come up with a solution.

"Mr. Stark, Professor Charles, Captain Rogers, I'll go back first." Lin Rui who decided to return to the base turned around and greeted the three behind him. Lin Rui had to go back and think about some things.

"Yeah." Tony casually waved his hand. Anyway, he would still call Lin Rui over tomorrow. Tony has a lot of work waiting for him.

"Goodbye, Mirage Knight." Rogers and Professor Charles nodded to Lin Rui together.

Afterward, Lin Rui and Peter walked towards the platform outside the office. Lin Rui doesn't need Tony's Iron Man Armor to send him this time, he can go back on a Hoverboard with Harry.

Brush!

Huhu!

Soon, under the watch of Tony and others, the four members of the League of Defender had left directly from Tony's Stark Industries building. Professor Charles also left with Iceman and Blink. Before leaving, Iceman was looking very strange and no one had any ideas as to what he was thinking. But at this point, Professor Charles had more important things on his mind, or he would have noticed something wrong with Iceman.

Buzzing~

The space door in front of him slowly disappeared, and Rogers' gaze returned to Tony next to him.

"Tony, you found an amazing young man!" Rogers suddenly said, looking at Tony's faint expression.

This sentence came from Rogers' heart. How could people like Rogers and Professor Charles don't know that Tony and Mirage Knight have a very good relationship, and they can roughly guess the age of Dark Knight and Spiderman? The technology Tony had come up with is likely to have Mirage Knight's share. Therefore, Rogers was a little envious of Tony.

"That I did!" Tony responded unceremoniously when he heard Rogers' words. Getting to know Lin Rui was a very lucky thing in Tony's life.

"Then, I'm going back too. I think you know the internal affairs of SHIELD, so don't just watch if you can help." Nodding towards Tony, Rogers walked out after saying his last sentence. The Quinjet which had been suspended in the sky before had received an order to pick him up.

"I know." Looking at Rogers' back, Tony faintly agreed.

"In this world, there are many things waiting for me to explore!"

...

#### **Chapter 440 Change**

The next day, when Lin Rui woke up from his bed, he felt comfortable all over his body. No matter what dangerous things you experience outside, as long as you get home and feel the care of your family, they would be able to let go of everything and enjoy life.

"Ah! It's been a long time since I have been free of worries!" Stretching his body out on the bed, Lin Rui muttered to himself while looking at the sunny weather outside the window. Although there are still some things that need to be solved by Lin Rui one by one, he just wants to take a break at this time.

Brush!

Then Lin Rui jumped up from the bed, got into the bathroom with a towel, he wanted to take a shower, and then go to school. Because of what happened before, Lin Rui has skipped school for several days. Although Tony Stark's name is a shield for him, Lin Rui still wants to experience his high school life. Because Lin Rui has a hunch that maybe his learning career will end soon.

Twenty minutes later, a figure quickly rushed out of Lin Rui's house, "Dad! Mom! I'm going to school!"

While shouting, Lin Rui pushed the bicycle in the yard on the road.

"Be careful on the road!" The voice of his father Lin Hai came out when Lin Rui had already ridden on the road.

Call!

"Hey! Good morning! Uncle McKay!" Lin Rui smiled and greeted a big-bellied uncle who was exercising in the yard as he passed him.

"Morning! Jackson!" Uncle McKay responded with a smile when he saw Lin Rui riding by.

These neighbors have not seen Lin Rui for several days, but they have already known that Jackson is interning with Tony Stark, so they are used to Lin Rui's absence.

And just when Lin Rui was about to leave on the bike, he suddenly saw someone at the house of Uncle Smith next door. Because of Tom's disappearance, the Smiths are now looking for Tom almost every day, but they have not found anything. And now there are more people in the family, yesterday should be another day without them getting anything.

"Uncle Smith, don't worry, I will let Tom recover and I will bring him home soon!" Lin Rui thought silently.

Call!

Then, Lin Rui has stepped on the pedal and hurried to the school.

...

While Lin Rui temporarily returned to normal high school life, Tony was in the underground laboratory of his seaside villa. Because many of Tony's private researches are highly scientific and technological, his underground laboratory is also highly confidential, which is divided into five experimental areas, and he is now in the Fourth Experimental Area, where an experiment that he suspended before is getting conducted.

In an ultra-strong glass-enclosed laboratory in the Fourth Experimental Zone, an Armed Battle Armor with a shape that is very different from that of an Iron Man Armor is being placed inside. Compared with the technological appearance of the Iron Man Armor with various devices for all-round protection, this Armed Armor is more inclined to the exoskeleton-like suit. And under this battle armor is a disc with some black unidentified substances inside it.

"JARVIS, you said that Venom has changed. What is the change? I have been waiting here for ten minutes, and it still hasn't moved at all." Outside the laboratory, Tony was holding a tablet in his hand, looking confused and he asked JARVIS.

Originally, after Tony received the complete design blueprint of the E Grade Aerospace Warship provided by Lin Rui and after the Sorcerer demonstrated their Magical spells and Abilities several times, he has put aside the research on Venom. Because this Extraterrestrial Creature has many different characteristics, but it seems to be completely inadequate compared to the continuously upgraded Iron Man Armor.

While constantly upgrading his Iron Man Armor and studying magic, Tony has put Venom aside and he planned to study it again when he has some free time. After all, this is also the first Space creature that Tony has gotten his hands on. Therefore, in the absence of energy supply, Venom has already fallen asleep.

However, just this morning, JARVIS suddenly told Tony that the "Sleeping" Venom that was placed in the Fourth Experimental Area had shown some changes and JARVIS asked him to come and see it in person. However, Tony has been waiting here for ten minutes, and nothing has happened.

Drop~

Just after Tony asked this question, a beep suddenly came from the tablet in his hand.

"Sir, Venom has awakened." At the same time that the prompt sounded, JARVIS also spoke.

“Woke up?” Hearing JARVIS’s words, Tony’s gaze shifted to the laboratory in front of him again. The black substance in the disk under the armor was the sleeping Venom.

“Yes, our previous experiments on Venom have confirmed that it can absorb a lot of energy from any host it chooses. However, in addition to the host’s biological energy, I later discovered that it can also absorb electricity and heat, and it is now absorbing the energy in the core of the Armed Battle Armor.” When Tony raised his doubts, JARVIS replied timely.

“Absorption of electricity and heat? This should not have been the case before, right? Is this the change it did upon itself to change its own survival requirements? It’s a very powerful ability and it takes survival of the fittest to the extreme level. “After hearing the answer from JARVIS, Tony frowned.

‘If Venom really has such a function, then it may still have great research value. After all, this evolutionary ability to quickly change one’s own living conditions according to one’s own environment can play a big role everywhere. It’s no wonder that Venom can drift through the infinite universe and come to the earth. Its abilities should be far more than what it showed,’ Tony thought silently in his heart.

“Yes, this is indeed a skill that it has rapidly evolved during this time. Moreover, under such changes, I also discovered another thing.” To Tony’s conjecture, JARVIS gave an affirmative answer. However, it seems that in addition to these, JARVIS has more discoveries.

“Really? Ok. I am now really curious, what have you found?” Tony’s eyes became more focused when he heard JARVIS.

Drop~drop~drop~

As the first beep came out, a beep followed one after another. This was to remind that the Battle Armor Core Energy in the laboratory was rapidly losing and it was getting absorbed by Venom below. Obviously Venom was awakening quickly and Tony also watched these changes in the laboratory more seriously. He wanted to see what JARVIS had said about the changes in Venom.

Gulugulu~

Finally, after 40% of the Core Energy of the Battle Armor was absorbed by Venom, the four things below Venom finally moved, and the black pool of Venom began to wriggle. Then, in front of Tony’s gaze, a tentacle stretched out from Venom’s main body.

Brush!
