

## **Marvel 441**

### **Chapter 441 Evolution**

Snapped!

The tentacles protruding from Venom's body just stretched out and shot at the chest of the Battle Armor at a very fast speed, where the Core Energy of the Armor was located.

Brush!

After the first tentacles touched the armor, the body of Venom below split into dozens of tentacles instantly, and they quickly clung to the Armor. Then, the entire Venom directly covered the chest of the Battle Armor under the pull of the tentacles.

"That's it?" Seeing Venom covering the Armor and absorbing the energy of the armor, Tony tilted his head and asked JARVIS.

However, JARVIS did not answer this time, it should be for Tony to keep watching. And Tony turned his attention back when he didn't get the answer from JARVIS. He also knew that JARVIS would not waste his time with such boring things. Moreover, even if there is no change later, the current findings are enough.

Chi Chi Chi Chi ~

As Tony waited quietly, Venom clinging to the Energy Core of the Armor's chest to absorb energy seemed to have absorbed enough energy, and then split out a lot of tentacles again. This time, Venom's body remained on the chest of the armor, and then the split tentacles quickly spread towards the limbs of the Armor.

Before Tony's eyes, Venom's current behavior is like taking this lifeless armor as a host and starting to arm it. Soon, the tentacles that Venom stretched out have wrapped the entire armor. In the laboratory, the alloy armor that was originally silver-white has now become pure black, and the material of the armor is not visible from the outside.

"JARVIS, has Venom armed itself this Armor?" Looking at the scene before him, Tony asked JARVIS with a flash of light in his eyes.

"Yes, sir. Venom waking up from a deep sleep not only seems to have evolved the ability to absorb energy such as electricity and heat, but it also seems to still Armed the host who provides energy to it." This time, JARVIS finally answered Tony. This was also a new discovery by JARVIS, and he felt that he should tell Tony.

Looking at the pure black Battle Armor armed with Venom in the laboratory, Tony's mind flashed with many thoughts. When Tony had gotten Venom, it could only absorb the host's biological energy and had no interest in things like Iron Man Armor.

But after Tony put it to sleep for a while, it can not only absorb other energies but it can also Arm the Armor?

“JARVIS, have you tested the changes to the Armor after it was Armed with Venom?” Tony asked as he looked at the Black Armor in the laboratory. If the Venom-Armed Armor has improved, then Venom’s ability would be quite useful.

“Sir, judging from the data sent from the internal system of the Battle Armor, although Venom contains a lot of abilities, the Battle Armor does not seem to have changed much. However, this layer of Venom can isolate most of the electronic surveillance and also enhance the Armor’s defense.” JARVIS answered Tony, but there were not many surprises.

“No change? It seems that it still can’t increase the strength of an inanimate object like a War Armor. That’s right, if it can even increase something that is produced by walking around a machine tool, then this Venom would be too overpowered.” Tony was a little disappointed when he heard JARVIS’s answer but he soon figured it out.

Venom is a creature and it is normal that it cannot enhance things like metal armor.

“JARVIS, is it stable in this form?” After excluding the fact that Venom can directly enhance the armor, Tony became concerned about other issues.

After Venom absorbs the host’s energy, it uses its special method to enhance the host’s strength. Now Venom absorbs energy without any useful output and Tony feels that this is a bit wasteful. So, an idea in his mind slowly became clear.

“As long as the energy provided is sufficient, it will always remain in this state,” JARVIS answered as he had been recording Venom’s state and these are simple questions.

“Well, if you say that, we can use it to enhance the concealment of the Special Armor, and it would not be useless.” After receiving JARVIS’s answer, Tony whispered.

Because of Venom’s ability to influence the host’s thoughts to absorb more biological energy, Tony never wanted to use Venom on humans again. So, this result may be better now. However, Tony always felt that Venom shouldn’t only have such a little effect.

Is there anything he has overlooked, and what he didn’t think of?

Snapped!

“That’s right!” Tony lowered his head and thought for a while and he suddenly snapped his fingers and shouted, and his eyes lit up again.

“JARVIS, you just said that the awakened Venom has evolved to absorb other energies such as electricity and heat. Then, does it mean that it no longer needs to influence the host’s mind to absorb their biological energy?” Tony raised his head and at this moment, his eyes were filled with a strange glint, this was the same glint that appeared in his eyes when he created the Iron Man Armor before.

“If we consider this from the perspective of survival then Venom with enough electrical energy does not need to use its previous method to affect the host’s mind to absorb the biological energy. According to my calculations, Venom’s evolution seems to have completely abandoned the need for biological energy. The absorption has turned to other energy such as electricity and heat.” JARVIS replied rationally upon hearing Tony’s words.

"If this is the case, is the energy it absorbs used to split, multiply, and store? This is too wasteful." Looking at the black armor in the laboratory, Tony's eyes brightened.

"Because we have not provided enough energy for Venom before, the energy it absorbs now should be the first priority to keep itself alive, and then to multiply." JARVIS still responded rationally to Tony's words.

When they were studying Venom before, they also discovered that if there is enough energy then Venom will split its body and both parts will become an independent entity after forty-eight hours.

However, Tony didn't mean this! Because of Venom's ability to evolve after waking up this time, Tony had a new and very bold idea in his mind. That is to keep Venom Armed with Armors. Since Venom can make the Black Spiderman so strong when he was parasitizing Peter, it is obvious to all that Venom has increased the strength of its host.

And now Venom no longer needs to absorb the Biological Energy by influencing the host's thoughts, so it can be used to Arm someone or something again.

"So, it is now in a state of energy saturation. Perhaps... JARVIS, block the Core Energy of that armor." With a clear idea in his mind, Tony suddenly issued an order to JARVIS.

"Yes, sir. But, can you tell me what plans you have?" JARVIS asked while executing Tony's order. This is also a change after JARVIS has continued to evolve. JARVIS would not ask Tony such questions before.

"My plan, you'll know it later." After answering JARVIS, Tony had left the place and walked towards the test bench behind him. He was going to make some preparations.

## **Chapter 442 Experiment**

Phoo~

Tony came back less than a minute after leaving and he looked a little impatient. The difference between the reappearing Tony and one minute before he left was that he had already put on his latest Iron Man Armor. Except for his unarmed right forearm, all other parts of his body were protected.

In the only right hand that was unarmed. Several alloy bars extending from the parts of the upper arm's Iron Man Armor circled Tony's right forearm, with an energy block inlaid in the middle.

As for JARVIS, he had blocked the Core Energy System of the Battle Armor in the laboratory before Tony left, Venom could no longer absorb energy. However, the energy it had just absorbed was enough for it to move for a long time. The current Venom still maintains the state of Arming the Armor and there seems to be no other changes.

"OK! JARVIS, open the door of the laboratory, I want to go in!" After briefly checking his own weapons, Tony then walked to the door of the laboratory, and at the same time ordered JARVIS.

"Sir, I don't recommend you to go in." After hearing Tony's words, JARVIS did not open the door of the laboratory immediately, but give out a suggestion.

"Don't worry, JARVIS, I just want to go in and experiment with one of my Ideas to see if Venom can continue to be used by others without affecting the host. Moreover, I would just let it attach to my

forearm, and if something went wrong then destroy it.” Tony explained with a smile when JARVIS stopped him.

That’s right, Tony just wanted to see for himself whether Venom could complete the Armor strengthening of the host without affecting the host. Many of the previous experiments on Venom have shown that Venom has a great effect on host strength enhancement.

And Venom is a creature that can feel its host’s thoughts. He can change itself according to the host’s request, just like when Peter was parasitized before, he could make Venom into various suits.

If Tony can really magnify Venom’s advantages after eliminating Venom’s shortcomings, then it will become a brand-new weapon, a weapon that is completely different from the Iron Man Armor. Simply think about it, Venom can quickly Arm the host and help the host gain a powerful strength and Venom can also make corresponding changes with the changes in the external environment.

Such a function is the envy of many Advance Agents. Based on Venom’s current capabilities, Tony wanted to develop a new type of armor.

“Although this kind of test is necessary, I still don’t recommend you to test it on yourself.” After understanding what Tony was going to do, JARVIS continued to persuade him. In JARVIS’s thinking, as long as there is a one percent danger, he doesn’t want Tony to risk it.

“Who else is there beside me? Jackson? It is better if I did this then let anyone else face this danger. Open the door. Are you still worried that Venom can affect me when I am armed with the Iron Man Armor?” Facing JARVIS’s persuasion, Tony said helplessly.

In fact, the aggressiveness of Venom itself should not be taken into account at all, but the most threatening thing is its influence on the host’s thoughts so that the host can act according to Venom’s wishes.

However, Tony doesn’t believe that only one forearm would be enough for Venom to complete it parasite on him and Venom won’t be able to affect him much with his counter attacks. Moreover, judging by logic, when there is enough energy, Venom will no longer absorb the bioenergy of its host.

“Then, all right, Sir.” In the end, JARVIS still failed to persuade Tony to give up such a decision.

Card~

In the next moment, JARVIS has opened the door of the laboratory. Tony’s eyes flashed with light and then he walked in without hesitation. It was just an experiment. He had done it many times before, and Tony, who had faced many life and death situations, wouldn’t be afraid of something that poses little to no danger at the moment.

Da Da~

Tony, wearing an Iron Man Armor stepped closer to the Battle Armor Armed by Venom. Through the scanning of the Battle Armor, Tony knew that there was a lot of energy inside Venom, which it had just absorbed.

The energy in the Energy Block on Tony's bare right forearm far exceeded the Core Energy of the Battle Armor attached to Venom, so Tony slowly stretched out his right arm and approached Venom. When he was half a meter away from Venom, Tony stopped. He was waiting for Venom's response.

Gulugulu~

When Tony stopped there for a while, Venom, who had been quietly attached to the Battle Armor, slowly moved, and squirming appeared everywhere on the Black Armor. Then, tiny tentacles stretched out from Venom and quickly shot towards Tony's right arm.

Pū Pū Pū!

Soon, Tony's bare right forearm was slowly wrapped up by the Venom tentacles that shot over, and the Venom moved toward Tony from the Battle Armor. After watching Venom slowly wrapping his right arm, Tony was earnestly experiencing the feeling of being attached to by an Extraterrestrial Creature.

"So it feels like this!" As Venom completely wrapped his right forearm, Tony murmured.

As Venom wrapped Tony's right forearm, he first felt a kind of coolness on his right forearm, then he felt a feeling like water flowing on his skin which disappeared after some time. Although Tony could still see Venom on his right arm, he could hardly feel it anymore, it was as if Venom had become a part of his arm.

"It doesn't seem to be having any influence on me." Seeing Venom wrapped around his right forearm safely, Tony didn't feel any influence on his thoughts. But the energy of the Energy Block on the right forearm was slowly decreasing, which was obviously absorbed by Venom.

"So, has my power increased?" After confirming that his thoughts were not affected by Venom, Tony wondered if Venom had the effect of enhancing the host's strength and did Venom Enhanced his strength.

"JARVIS, check the changes in my right forearm, and prepare a Dynamometer for me." Now that he has already tested it himself, Tony certainly wants to test it more comprehensively.

"Yes, sir." JARVIS has already started to check the various indicators of Tony's right forearm.

Buzzing~

Two beams scanned over Tony's black right forearm and then a series of data appeared before Tony. Before JARVIS could speak, Tony had already seen and understood the data.

"It's really enhanced! Why don't I feel it at all!?" Tony cried out in surprise as he watched the 3-D projection of his right forearm.

From the data detected by JARVIS, the overall force of Tony's right forearm wrapped by Venom has increased by about 50%. Both the muscle strength and bone hardness are much higher than before, which is almost a miracle.

Kaka!

When Tony was surprised, JARVIS had already transferred a Dynamometer to this laboratory.

“Sir, if you want to check the strength of your right arm, don’t use the maximum strength. Only the right forearm is strengthened. If you use too much force, it will cause damage to the unreinforced arm part.” As Tony walked cheerfully towards the Dynamometer, JARVIS appropriately reminded him.

“Got it.” Tony agreed and raised his right arm.

In the next second, Tony had already used the force gauge.

Boom!

### **Chapter 443 Text**

With the wave of Tony’s fist, a loud noise came from the laboratory. Then, Tony saw the rapid beating of the numbers on the Dynamometer display that had endured Tony’s power and soon stopped at a value without moving.

800kg!

This is the power of Tony’s punch with his right arm after being strengthened by Venom, and he is still not using his full strength! 800kg, which is almost the strongest strength an ordinary person can have after years of training and a talent for strength.

Looking at the data displayed on the Dynamometer, Tony forgot to retract his fist. Just now he made a lap completely relying on his own power, without the bonus of the Iron Man Armor at all. Moreover, the bare right arm cannot get the power bonus of the Iron Man Armor.

“Is this my current strength?” After a while, Tony retracted his right arm and took a closer look and whispered.

When he shook his fist just now, Tony was able to control his fist without any discomfort. However, compared to the position where Venom is not parasitized, Tony can clearly feel the increase in the strength of his right arm, which is a little inconsistent with other parts of his body.

If Tony really used his full strength just now, the strengthened right forearm would not hurt, but the upper arm might.

“Well, this feeling? Is Venom stimulating my right arm?” When Tony stared at his right arm, a faint electric sensation instantly passed through his right arm, and Tony could feel it easily.

As the electric shock disappeared, all the tiny injuries to the muscles that had just appeared Tony’s hand had disappeared. And as Tony used his strength, Venom also consumed some energy, which showed from the fact that some of the Energy from the Energy Block on Tony’s right arm quickly disappeared.

“It seems that the experiment has succeeded!” Until now, he hasn’t felt any influence on his thoughts and everything is still developing according to his expectations.

“Then, it’s time for the next experiment!” After predicting the effect of Venom, Tony couldn’t wait to test its other effects.

“JARVIS...”

Then, Tony, whose right forearm was parasitized by Venom, conducted a series of other tests on Venom's state. The whole test lasted for an hour before it was over. Finally, Tony, who finished the tests, used the same method to attract Venom towards the Battle Armor after activating its Core Energy. Then Tony walked out of the laboratory safe and sound.

Call!

Tony walked out of the laboratory and shook his right arm. The feeling of infinite power just now was slowly fading. The strength that Venom has given to the host will be taken away with Venom's departure which is something Tony hasn't figured out yet.

The strength of Tony's right arm muscles had already increased, but now it has returned to its original state. The instantaneous disappearance of this power made Tony feel a sense of loss. This Power is quite addictive.

"Okay, JARVIS, have all the data been recorded?" Tony shook his head to shake the feeling in his mind and asked JARVIS.

"It has been recorded. However, these are the data of Venom's parasitic human body. According to my calculations, if Venom is fully Armed with a Human Host then this data should be able to rise a little." JARVIS didn't know Tony's inner feelings at this time and he reported.

"Fully Armed? Let's wait for the next test phase then. Maybe I would hand it over to the two boys, Jackson or Peter." Hearing JARVIS's report, Tony's eyes flashed and he muttered.

Although Venom did not affect the host's thoughts in this experiment as before, Tony felt reluctant after Venom left his body. This is the reluctance of an ordinary person after suddenly grasping a huge power and losing it.

Although Tony has confidence in himself, his body is the standard of ordinary people after all and he may not be able to withstand the temptation of such a power.

So, not wanting to be armed with Venom, Tony thinks it's better to let Jackson and Peter come here. After all, Peter had been parasitized by Venom once, and that time was when Venom influenced his mind. Although Peter left Venom with some help, he should already have some type of resistance.

The main point is that both Peter and Jackson are powerful people in their own right, and the enhanced temptation they would experience would not be as powerful as Tony's. In another aspect, Tony failed to allow Venom to change according to his own ideas in the experiment just now so Tony wants Lin Rui and Peter to try it.

"Okay, sir, the data just now has been recorded and saved in the 13th database."

"JARVIS, provide energy to Venom throughout the day, so that it can multiply and divide as soon as possible. We may need more Venom for some upcoming tests next! If the tests are successful then maybe we can develop a new type of Iron Man Armor!" Taking off his Iron Man Armor, Tony then ordered to JARVIS.

"Yes, sir."

...

Lin Rui, who was in school, didn't know that Tony had made new discoveries here and Venom's further application would be successful. If Lin Rui knew then he would be very happy because Venom's state could easily make Lin Rui think of a special kind of weapon. But before Tony contacts Lin Rui, he wouldn't know anything.

And just when Lin Rui was wandering in class because of Hydra's affairs finally came to an end, Peter suddenly reached out and poked Lin Rui from behind. When Lin Rui retracted his thoughts and looked back at Peter, Peter motioned Lin Rui to look at his phone.

"Phone?" Lin Rui took out the mobile phone from his pocket and glanced at it when the teacher was not paying attention.

However, when Lin Rui saw the few messages on the phone, he was stunned. There are not many texts in this new mobile phone after Lin Rui came back, but only a few pieces of information made Lin Rui feel the world's malice towards himself.

Thor sent most of the texts on the phone! He actually already knew his hidden identity! Peter also sent a message to remind Lin Rui that he had told Thor about Lin Rui's experience before, but yesterday he forgot to tell Thor that Lin Rui was all right.

Just now when Thor contacted Peter again, he told Thor that Lin Rui was okay, so Thor directly sent a message to Lin Rui.

"How did Thor know?!" Lin Rui asked Peter with a text without immediately returning Thor's message.

"I don't know either. When he found me, he said he already knew you were Mirage Knight!" Peter's typing speed was fast, and the information was returned in seconds.

"Well, it doesn't matter if Thor knows about it, he won't tell other people anyway." Lin Rui could do nothing now.

Then, in order to prevent Thor from directly calling him, Lin Rui quickly returned a message to Thor, telling him that he would meet with him after school today, and let him not worry.

"Get the friendship of Thor, is that Hidden Quest completed now? System, what price do I need to pay to bring you back." After replying to Thor's message, Lin Rui remembered the secondary system in my mind that is still waiting for its resurrection at the System Shop's resurrection altar.

Had it not been for the secondary system, Lin Rui would have been killed by the thunder triggered by Mj?lnir at the time when he lifted the Hammer.

"Don't worry, I have enough strength now, and the Reward Points are slowly increasing with time. The time for your resurrection is approaching!"

#### **Chapter 444 Hit**

Bell~

After a relaxing day at school, Lin Rui rushed out of the classroom with Peter the moment the bell rang. Before others could react, he got into his Jeep, and then he started the Jeep and drove towards Thor's working place.

The other classmates didn't think of anything when they saw Lin Rui and Peter's behavior, because it was not the first time that they did such a thing.

"Peter, what do you think Thor will tell me? After all, I've been lying to him all this time. And now that he knows my hidden identity, would he be angry with me?" Driving the Jeep as fast as possible, Lin Rui asked Peter who was sitting in the passenger seat.

"Uh... this, I don't think that would happen. Thor is an alien, maybe he won't be angry about such a thing. Moreover, you just didn't say that you were Mirage Knight, and it wasn't cheating and you just hid it from him for his own protection" Hearing Lin Rui asking himself this question, Peter replied uncertainly after shaking his head.

However, Peter thinks that Thor should not be angry with Lin Rui because of this.

Hearing Peter's answer, Lin Rui only felt a few black lines hanging on his head. Although Thor is an alien, in addition to being stronger, he is different from other people on Earth. Moreover, Thor has been deprived of his Divine Power, and he is not as strong as Lin Rui.

"Forget it, if Thor is angry then I would just deal with him. That's won't be a big deal as I can just apologize. What's more, even if I did conceal the fact that I am Mirage Knight, do I have to tell everyone about this matter?" Lin Rui wondered what kind of attitude Thor would show him.

In the end, Lin Rui decided not to think about it anymore, and Thor, who had lost his supernatural power, couldn't do anything serious to him.

"Well, that should be it! Thor won't be able to beat you anyway so there is no problem." Hearing Lin Rui's words, Peter said seriously from the passenger seat.

Lin Rui: "... Thor really can't beat me now, but once he regains his Divine Powers then Lin Rui's strength would not be enough for Mj?Inir and he would definitely get beaten by then!

Although it has been a long time, Lin Rui still has lingering fears about what happened after he held Mj?Inir a few months ago. If it weren't for the System, Lin Rui would have died that day. Therefore, even if Lin Rui's current strength is much stronger than before, he still has no confidence in resisting Mj?Inir's power.

While chatting with Peter in the car, Lin Rui and Peter were about to arrive at the home of stray dogs where Thor works.

In fact, when Peter saw Thor working at the Home of Stray Dogs, he also wanted to adopt a dog. However, because Spiderman has been too busy this time, he has not taken any action. If Peter meets a dog that he likes this time then he will adopt one and go home.

Buzzing~

Just when Lin Rui and Peter were about to arrive at the Home of the Stray Dogs where Thor worked, the phone in his pocket vibrated again. Lin Rui parked the car on the side of the road and took out his phone and glanced at it before picking it up.

"Hey! Mr. Stark, can you let me rest for two more days, isn't there SHIELD to deal with the remaining Hydra people?" Lin Rui said directly in front of Peter after answering the call, apparently Tony had called him.

Hearing the way Lin Rui greeted Tony after answering the phone, Peter, who was sitting in the passenger seat, was a little surprised. As the Spiderman, Peter has always admired Tony Stark. Therefore, Peter was a little surprised to see Lin Rui talk to Tony Stark in such a casual manner.

However, the surprise only lasted for a moment and Peter became more curious about what Tony was calling Lin Rui for.

"You, are you planning to become a 'Hands Off shopkeeper' (Chinese Proverb) now?" Tony on the other end of the phone said angrily when he heard Lin Rui's words.

After the meeting last night, all three people except for Lin Rui had already gone back to seriously prepare for the future, but Lin Rui had returned to being a normal high school life, which made Tony feel quite jealous as he was working for once and someone else is enjoying his life.

However, Tony was just joking as he knew how much Lin Rui had paid for the current situation to happen.

"'Hands Off shopkeeper'? Mr. Stark, are you learning Chinese recently?" Lin Rui smiled and asked Tony when he heard the literal Mandarin Chinese coming out of Tony's mouth.

"What's the matter? Did I say it the wrong way? Okay, no-nonsense now. You have already finished school today. Come to my house, I got something to show you." After a brief explanation, Tony continued. Venom changes and follow-up research and testing would require Lin Rui's help. With such cheap labor, it should be wasted.

"Now? I happen to have something that I need to do, can I go there later?" Lin Rui frowned slightly when he heard Tony's words, and then asked helplessly.

Lin Rui has long become accustomed to being used by Tony as a cheap labor force, and he can also learn a lot in experiments anyway. However, today he has promised Thor to go to him first so he will like to keep his promise.

"You have something to do? What is that? Fine, Come here as soon as you're done with your thing. Also, when you come over, bring Peter with you." Seeing Lin Rui said that he had something to do, Tony said irritably and finally asked Lin Rui to bring Peter with him.

"Okay, I see, I will go there as soon as possible." After agreeing, Lin Rui hung up the phone. Of course, Tony over there hung up first.

"Jackson, did something happened on Mr. Stark's side, maybe we should go there first. Your meeting with Thor could be postponed for some time." Seeing Lin Rui hung up the phone and drove to Thor's place of work again, Peter hesitatingly spoke from the Passenger seat.

Now that Tony has called, Peter naturally thinks Tony's affairs are much more important.

"No, since Mr. Stark didn't tell us to come straight to him right away then it means that the matter is not serious. It should just be the same as before, he must have wanted us to help him with some

experiments, but this time he asked me to bring you, I just don't know what the experiment is." Hearing Peter's words, Lin Rui said with a smile.

"Well, I am also looking forward to going to Mr. Tony's seaside villa. I heard that it is a very high-tech house."

"Hehe, that's not just a high level of technology! I promise you that you will be shocked when you get there!"

Call!

Then Lin Rui speeded up a little bit. He didn't want Tony to wait too much, otherwise, he might piss him off.

...

Ten minutes later, Lin Rui's Jeep stopped on the side of the road outside Thor's workplace. Lin Rui and Peter had gone in to meet Thor.

Boom!

After a few more minutes, a muffled noise suddenly came from the backyard of the Home of Stray Dogs, it was as if something had hit the wall.

"Damn it! When did Thor become so strong!" When the voice came out, Lin Rui was sticking to the fence behind the stray dog ??house with an ugly expression on his face.

Just now, Lin Rui was hit by Thor and he flew out and finally hit the fence behind him before stopping. His dignity as Mirage Knight had just been washed away!

Judging by Thor's strength after being deprived of his Divine Power, it should have been impossible for him to knock Lin Rui away with a punch, even if Lin Rui was letting Thor attack him just now. Therefore, the only explanation is that Thor has recovered some of his Divine Power!

"Okay, I forgive you." Thor, standing in the center of the yard said lightly, he looked at Lin Rui, who was squatting in the corner and rubbing his chest. This is how the people in Asgard forgive their friends after being deceived by them, Thor didn't need to say anything.

"Cough!" Lin Rui coughed twice and he was still squatting in the corner looking surprised by Thor's power.

Brush!

"Thor, have you recovered your powers?" Lin Rui asked with excitement as he walked towards Thor with his hand on his chest. Since Thor had said that he had forgiven him then Lin Rui wouldn't say anything more.

"No, I just regained some of it," Thor replied when he heard Lin Rui's words.

With the progress of Thor's transformation on the earth, his divine power is slowly recovering, and he has become more and more trusting towards Lin Rui's practice of exercising his sense of responsibility and compassion.

However, if Thor knew that Lin Rui was also guessing and let Thor do these things because he couldn't think of anything else, no one knows what Thor would do then. Of course, at least the current progress is pretty good.

"Well, at least this is good news. I believe that you will soon be able to fully recover your power. At that time, you will finally become the real Thor!" Lin Rui smiled and encouraged when he looked at the tall Thor in front of him. Compared to his strength when he was just exiled to Earth, Thor in his current state is like a Super Soldier with five-time their strength.

"Hey! Thor, attack me, I'm stronger than Jackson!" Peter couldn't help but interject while Lin Rui was talking with Thor. Peter's eyes had lit up when he saw Thor hitting Lin Rui with a punch and Peter, who was very confident in his own strength, couldn't help but get itchy and make a joke.

"Haha, of course!" Thor agreed with a laugh when he heard Peter's words.

Call!

In the next second, Thor's huge fist blasted towards Peter.

"Damn! You really attacked!"

...

#### **Chapter 445 Major Discovery**

Half an hour later, Lin Rui's Jeep was already on the way to Tony's seaside villa. As for the result of Peter and Thor's fight, this would always remain a secret, a secret kept between Spiderman, Mirage Knight, and Thor.

Brush!

"Jackson, why do you think Mr. Stark wants us to come here? This is my first time coming here. Is there anything that I need to pay attention to?" Sitting in the Passenger Seat, Peter asked curiously.

Before Captain America Steve Rogers was dug out of the ice, Iron Man Tony Stark was Peter's most admired person. Although Peter had met with the real Rogers, he still admires Tony as a Genius, Rich Man, and a Superhero and he is extremely respectful towards him. Therefore, Peter is a little nervous on the way to Stark's beach house.

"What? He is probably calling us to help him with some kind of experiments. I've done this kind of thing for a long time. Speaking of which, I should ask Mr. Stark for a salary. After all, I am his only assistant besides JARVIS and I don't get any salary!" Lin Rui replied without turning his head after hearing Peter's words. Speaking of free labor he does for Tony, Lin Rui still has a lot to say.

"As for what you should pay attention to? Just don't touch some of Tony's collection. He has some very special hobbies. In his seaside villa, there are many things that you can't appreciate but they are very expensive." After thinking about it again, Lin Rui answered one thing to note.

Lin Rui still remembers that he had hit and broken an unknown thing on the table in Tony's underground laboratory once. Tony glanced at it and calmly said that he had bought this thing for more than One Million Dollar.

Lin Rui was shocked at that time. He didn't understand why such a thing would cost One Million and why was it simply put on a messy table! Fortunately, Tony didn't care about that gadget anymore, otherwise, Lin Rui wouldn't know what would have happened if Tony did care about it.

"Really, tell me when you see me doing any of that." Hearing the precautions, Peter said seriously.

"Well, it doesn't really matter. Mr. Stark is not a stingy person, he won't mind that much." Lin Rui felt that Peter was too nervous about Tony, in fact, everyone was the same person. If Iron Man or Tony Stark is the subject of much attention, then Spiderman is not too bad either. Peter's popularity in New York is already close to Iron Man.

"Ok, I know."

In this way, Lin Rui and Peter had reached Tony's seaside villa while chatting with each other on the road. Lin Rui is already familiar with this area, there are no other buildings except for Tony's Villa here.

Phoo~

Stopping the Jeep on the open space at the entrance of the beach villa, which has almost become a dedicated parking lot for Lin Rui's Jeep.

Because Tony either uses an Iron Man Armor or he uses Limited Edition Luxury Sports Cars parked in his underground garage and only guests will park their cars in these open spaces outside and there are very few guests here at any given time.

It can be said that a second-hand Jeep parked outside such a luxurious villa is a bit of a violation. However, Lin Rui did not intend to change his Ride, although he could drive any car in Tony's garage. But because that was too ostentatious, Lin Rui was not willing to do so.

Boom!

"Let's go, JARVIS should have told Mr. Stark that we are already here. If it is for us to help with some experiment then we can directly go to the underground laboratory." After closing the Jeep door, Lin Rui and Peter walked towards the villa.

"Mr. Jackson, Mr. Peter, welcome, Mr. Stark is already waiting for you in Lab 4." Sure enough, JARVIS's voice was heard as soon as Lin Rui and Peter stepped into the door of the villa.

"Look, we are the cheap labor he called. No, it's not even cheap. It should be unpaid labor." Lin Rui smiled and said to Peter beside him when he heard JARVIS's voice.

However, Peter's mind at this time is no longer here. Since stepping through the door, Peter has been shocked by Tony's luxurious villa. When he was outside just now, Peter was amazed and after coming in, he had a feeling that he had come to the future.

"Hmm!" So, facing Lin Rui, Peter just nodded unconsciously and agreed.

"Hey!" Seeing Peter's appearance, Lin Rui shook his head helplessly and then walked directly towards the underground area.

As for Peter, while following in Lin Rui's footsteps, he was constantly looking at the interior of Tony's villa. And he sighed with every few steps and it was as if he had discovered a new world. Although Lin Rui was helpless to Peter's reaction, he forgot that he was no better than Peter when he first came here.

...

In the No. 4 test area of the underground Laboratory, Tony is wearing goggles fiddling with something on a workbench. In front of the workbench, a simplified version of the exoskeleton Armed Armor was standing there quietly.

This streamlined exoskeleton armor was assembled by Tony just now, and he wanted to use this to do some experiments later. Of course, if Tony's ideas are correct, then he may not use this armor. Moreover, Lin Rui and Peter are already on their way.

"Sir, Mr. Jackson, and Mr. Peter have arrived." Just as Tony was busy with things, JARVIS's voice came out calmly.

Phoo~

Hearing JARVIS's voice, Tony put down the things on his hands and took off the goggles on his head, "Are they finally here? Then our experiment can proceed to the next stage!"

Card!

Just as Tony finished saying this, the door of the laboratory behind him opened. Then Lin Rui and Peter walked in with different expressions on their faces. Lin Rui and Peter obviously heard what Tony had just said and Peter was very excited. After all, it was a great honor for anyone to help Tony Stark in Peter's opinion. As for Lin Rui, he always felt that Tony seemed to have something bad waiting for them.

"Mr. Stark!" When Lin Rui was still thinking about Tony's reason for calling them over, Peter had already walked over to greet Tony excitedly.

"Hey, there little Spiderman!" Seeing Peter walking towards him, Tony stretched out his hand and shook Peter's hand. As for the hug, Tony felt it was too early, he still wanted to look cool.

"Jackson, you're finally here, come, come!" After shaking hands with Peter, Tony shouted while looking at Lin Rui who was still standing behind.

Seeing that Tony had already called him over, Lin Rui had no choice but to walk over towards him, "Mr. Stark, is there anything we can help this time?"

"Of course, otherwise, why would I ask you to come over? Moreover, I have made a major discovery this time!" Tony suddenly said mysteriously when Lin Rui asked.

"What discovery?" Seeing Tony like this, Lin Rui also became interested and Peter listened carefully.

"Venom! The research on Venom has finally progressed!"

## **Chapter 446 Survival Of The Fittest**

Brush!

Hearing Tony's answer, Lin Rui and Peter's faces became very serious in an instant. Peter had suffered a lot under Venom's influence. The feeling of being completely controlled by Venom at that time still left Peter with some lingering fear.

The shadow of the Black Spider and the feeling of losing control is something that Peter doesn't want to experience again in his life. Although Lin Rui would not be afraid of Venom, he was still very wary of this Special Extraterrestrial Creature.

"Venom's research? Has it been completely controlled?" After digesting Tony's answer a little, Lin Rui asked seriously.

"According to the current situation, it can be considered as it being controlled. However, more experiments are definitely needed to be sure. So, I called you." While answering Lin Rui's question, Tony turned and walked towards his workbench.

Behind Tony, Peter and Lin Rui followed him closely. Lin Rui and Peter were not very satisfied with Tony's vague answer, so they had to see with their own eyes what is going on with Venom.

"JARVIS, let them see." Just when Lin Rui followed Tony to the workbench and was about to ask some questions again, Tony suddenly spoke to JARVIS.

"Yes, sir." JARVIS has already controlled the Exoskeleton Armed Armor in front of the workbench to move it into the laboratory.

Following Tony's actions, Lin Rui and Peter fell silent, and they could see what Tony was going to show them. And when Lin Rui and Peter's eyes moved to the front laboratory, their pupils shrank instantly, and Peter unconsciously squeezed his own hand with the other one. Because there is one object in the laboratory that they are very familiar with.

"Is that Venom?!" Looking at the black unknown substance attached to a metal pillar in the laboratory, Peter asked in a serious tone.

Compared to the Venom that Peter was familiar with before, the Venom in the laboratory now seems to have changed a bit. However, Peter didn't know exactly where the changes had occurred. Perhaps, this Venom didn't seem so aggressive, and it seemed that Venom's subjective thoughts were gone. Because Peter's Spider Senses didn't respond in any way.

"Yes, that is Venom. After more than a month of dormancy, it woke up again and changed. No, it can't simply be called a change, it should be evolution. I have to say that I admire this Alien Creature. No wonder it can cross the space and reach the Earth!" Looking at Venom in the laboratory, Tony replied in an amazing tone.

"Mr. Stark, what did you say about Venom's evolution?" Seeing JARVIS put the Exoskeleton Armor that was obviously rushed into the laboratory, Lin Rui looked at Tony and asked.

Looking at Venom's quiet look, and then observing some of the characteristics of the Exoskeleton Armor, a vague concept slowly appeared in Lin Rui's mind, a concept about a Special Weapon. Of course, in this Marvel World, Lin Rui has not seen that kind of Armed Armor. Therefore, even now, Lin Rui still didn't think of that point.

“Before Venom fell asleep, it mainly absorbed the host’s Biological Energy to satisfy its own energy acquisition and survival. Just like how it was parasitic on Peter before, on the one hand, it gave Peter a strong power to make Peter depend on it. On the one hand, it was slowly controlling Peter so that he can absorb more of Peter’s Biological Energy.” Hearing Lin Rui’s words, Tony carefully began to explain it to them. When talking about Venom’s previous characteristics, Tony didn’t worry about the fact that Peter was here as that matter had passed.

“Yes! When I was parasitized by Venom, I was still myself. Although Venom’s thoughts could reach me, I could still refuse its guidance. But later, as it’s parasitized became longer and longer, I couldn’t get rid of it anymore, and finally, my consciousness sank into my own mind.” Hearing Tony talk about his previous experience, Peter said seriously.

It is also fortunate that Lin Rui’s reaction was quick at that time, as well as the help of Ancient One, otherwise, in the battle between Venom Spiderman and Green Goblin, one of them would have suffered huge damage.

“Well, it’s also because of this characteristic of Venom that I don’t have the energy to provide it to keep it active. After it has no host, Venom fell asleep. After waking up this time, I found that it has evolved a lot and it has many other functions. For example, it can now absorb Electric Energy.” After Peter finished speaking, Tony went on to explain more. With that said, Tony also asked JARVIS to show it to Lin Rui and Peter.

Hum!

As Tony’s voice just fell, JARVIS had already turned on the energy at the back of the Exoskeleton Armor and a wave of pure Electric Energy transformed by the Miniature Arc Reactor was transmitted.

Then, Venom, who was attached to the alloy pillar, sensed the energy on the Exoskeleton Armor next to him and instantly changed from a quiet state to a state of activeness.

Brush!

In front of the surprised eyes of Lin Rui and Peter, the surface of Venom’s main body split into countless tentacles and it pounced onto the Exoskeleton Armor, and soon covered the Exoskeleton Armor.

The original Venom didn’t respond much to these Man-Made objects. It was only interested in living and powerful organisms. This is why he chose Peter as its host among many humans.

“Is this an evolution? Can it perceive the Electric Energy fluctuation? So, can it absorb Electric Energy now? It seems even more terrifying!” Seeing this scene in the laboratory, Peter asked.

In Peter’s view, the original Venom was already powerful enough but it also has many weaknesses. For example, Sound Waves of a certain frequency can destroy the stable structure of Venom and strong Electrical and Flame Attacks can also destroy Venom.

But Venom, who had woken up again could now absorb Electric Energy, so its weakness was reduced by one. If it can also absorb Flame then it would become even more terrifying. And just as Peter was thinking that way, Tony’s words came out again.

“In addition to Electric Energy, it can now absorb Heat Energy, which means it could no longer be destroyed by flames.” Looking at the Exoskeleton Armor in the laboratory that has completely turned black, Tony added lightly.

“Not afraid of electricity! Not afraid of fire! What about Sonic attacks?!” Lin Rui quickly asked after seeing the expressions on Peter’s face change when he heard Tony’s words. If Venom’s evolution had removed all of its previous weaknesses then perhaps the Sonic Attacks would also not work.

“Hehe, you are quite smart! Yes, the previous effective Sonic Attacks have no effect on it now.” Tony smiled when Lin Rui asked this question and then replied.

“Sure enough, Venom’s awakening has completely eliminated all the weaknesses of the last time!” This is the first time that Lin Rui had seen the powerful survivability of this Alien Creature, and he can’t help but feel a little awe.

Perhaps there were many other forms of Venom before it came to Earth. After all, the environment in space is much harsher than that of the earth and Venom has survived there.

“So, Mr. Stark, shouldn’t your findings be more than these?” Hearing this, Peter vaguely felt that Tony was planning to do something with the dangerous and powerful Venom.

“Haha, that’s where I need your help!”

#### **Chapter 447 Quite Crisp**

Ten minutes later, Tony in the Fourth Experimental area had already explained to Lin Rui and Peter the experiment he was going to conduct. However, after listening to Tony’s experiment, the expressions on Peter’s face became very ugly. Although Peter has a lot of respect for Tony, he is still a little unwilling to let him do such a thing.

“Mr. Stark, are you really sure that you want to do this?” Peter asked seriously while looking at the Black Venom in the laboratory.

The experiment that Tony said just now was mainly to let him see the situation after Lin Rui and Peter become parasitized by Venom. Of course, they will not get parasitized by Venom without any defense and they will be wearing Exoskeleton Armor with their own energy while they let Venom parasite them.

Tony will slowly increase the range of Venom’s parasites and he will detect Venom’s current impact on the human body step by step. According to Tony’s idea, Venom, who had woken up again, had evolved some other characteristics.

In order to remove those weaknesses, it must have abandoned some things and it should no longer cause any harm to the human body.

However, despite Tony’s certainty, and seeing that Venom in the laboratory doesn’t seem to need to absorb Human Bioenergy anymore. The fear of being dominated by Venom’s parasitism was still deeply rooted in Peter’s mind. He instinctively did not want to become parasitized by Venom.

When Peter had a worried expression on his face, Lin Rui’s face held a totally different expression as he was not that worried. If Tony and Peter looked closely, they would have found that Lin Rui’s eyes seem to hold excitement in them, that is the excitement of discovering new things.

"I am at least 70% sure of this. I have tried it myself before. Although I only let it parasite my one arm but I still don't feel the influence of Venom on me." Tony explained with a smile looking at Peter's worried look.

In fact, Tony said that he is 70% certain but he is more than 90% certain of this conjecture as he would have not experimented with Lin Rui and Peter's safety otherwise. Moreover, Tony's Fourth Experimental area was specially set up to study Venom. Even if there were any problems in the final experiment process, he could deal with it in time, so that Peter and Lin Rui would not be involved.

"That....."

"I'll do it!" Just when Peter was about to ask something, Lin Rui on the side suddenly shouted with excitement on his face. Seeing Lin Rui's look and the excitement in his eyes that couldn't be concealed, the two occupants of the room didn't know what to think.

"Jackson! Let me go first!" Peter shouted worriedly when he saw Lin Rui's excitement. Peter was worried that Lin Rui would be affected and injured because he underestimated Venom. Venom is really not a creature they can underestimate.

"Don't worry, I'll be fine. And, didn't Tony say that he was sure, don't you believe him?" Knowing that Peter was worried about him, Lin Rui gave him a relieved look and said.

"Of course I believe in Mr. Stark, but..."

"Well, no need to say more, I'll go first!" When Peter wanted to say something, Lin Rui waved his hand and interrupted him.

"Tony, I'm ready, you can start the experiment at any time!" After making Peter shut up, Lin Rui looked at Tony and said seriously.

However, Tony also looked suspicious about Lin Rui's sudden excitement. Based on Tony's knowledge of Lin Rui, he would not become excited about such a risky experiment. So, Lin Rui should have discovered something that he didn't.

"Did you find anything?" Staring at Lin Rui, Tony suddenly asked.

"Hehe, didn't you also find what I have found? If my guess is right then do you plan to use Venom to make an Armor that is completely different from all the Iron Man Armors you currently have?" Seeing Tony asking him something, Lin Rui answered with a smile.

Hearing Lin Rui's answer, Tony's eyes flashed, "Sure enough, you had already thought of it. If that's the case, you can go in when you are ready."

Call!

After Tony finished speaking, he asked JARVIS to send in an Iron Man Armor. Although Tony is sure, the experiment would be safer this way and he will take small steps in the beginning. Looking at the Iron Man Armor in front of him, Lin Rui didn't hesitate and he walked over and was Armed with it.

Kaka!

Then, the door of the laboratory opened, and Lin Rui walked in. Seeing Lin Rui had entered the laboratory, Peter standing outside was filled with worry, while Tony beside him was not so worried, but he was also very nervous.

However, compared to Peter and Tony outside, Lin Rui in the laboratory was at ease. Even if the current Venom is still as aggressive as before, Lin Rui's current strength is already enough for him to crush Venom, so he doesn't have any worry at all.

"Okay, JARVIS, cut off the Energy Supply on the Exoskeleton Armor." Seeing that Venom didn't respond to Lin Rui's entry, Tony ordered JARVIS.

"Yes, sir." Hearing Tony's command, JARVIS has instantly cut off the Energy of the Exoskeleton Armor that Venom is attached to.

After the energy of the Exoskeleton Armor was cut off, Lin Rui, standing next to Venom, paid more attention to the changes in Venom. Although Lin Rui is very confident in his and Tony's conjectures, Venom is an Alien Creature and it is still an Autonomous Creature. It is impossible not to be nervous at this time.

Gululu~

Ten seconds after the Exoskeleton Armor's Power was cut off, Venom, which had been quietly attached to it, began to move, and some fluctuations began to appear on the flat black surface. Then, under Lin Rui's gaze, Venom slowly stretched out his tentacles in his direction.

"JARVIS, remove the armor from my limbs." Lin Rui spoke calmly when the tentacles came towards him.

Kaka!

Boom!

At the next moment Lin Rui finished speaking, all the limbs of Lin Rui's fully Armed Iron Man Armor were split from the main body, and they flew out one by one, and finally landed in the corner of the laboratory.

After the limbs of the Iron Man Armor were detached, Lin Rui's limbs were exposed, but at this time, his arms and legs were each fixed with a piece of energy core.

Brush!

At the moment when Lin Rui's limbs were exposed, Venom, who was already ready to move, split into four parts directly from the attached Exoskeleton Armor and rushed towards Lin Rui. Soon, Lin Rui's exposed limbs were already entangled by Venom. Without showing any resistance, Lin Rui allowed Venom to jump over and covered his limbs.

Chi Chi Chi Chi ~

Finally, Venom, which was divided into four parts, enveloped Lin Rui's limbs. However, because Lin Rui still has a part of the Iron Man Armor, these separated Venoms cannot be connected together, and it seems that they are absorbing energy separately.

“Wow! Is this how it feels to be Parasitized by Venom? It’s so cool!”

#### **Chapter 448 Don’t Worry**

When Venom covered himself, Lin Rui already felt the increased strength of his limbs. And because Lin Rui’s feeling is more acute than Tony’s, he can clearly feel the special energy transmitted from Venom through the skin into his musculoskeletal system and this energy strengthens his muscles and bones in a short time.

With such a momentary increase in strength, Lin Rui shouted out comfortably.

“What happened? Jackson, how do you feel?” Peter asked nervously from outside the laboratory when Lin Rui called out comfortably.

Although Lin Rui now only has his limbs covered by Venom but if this keeps on then Venom might be able to affect the host’s thoughts, so Peter is still very worried.

“Peter, please don’t worry. I have been monitoring Jackson’s physical condition. The current test results show that Jackson’s body is normal. Moreover, the muscles and bones of the limbs covered by Venom have shown increased strength to them.” When Peter was getting worried, JARVIS replied and answered his question first.

“Yes, Peter, don’t worry, I am fine now!” After JARVIS finished answering, Lin Rui spoke from the laboratory.

Lin Rui feels very refreshing now, it is a kind of refreshing feeling that cannot be described. If this feeling is Venom’s influence on its host then Lin Rui feels quite comfortable with it. After hearing JARVIS and Lin Rui’s answer, Peter also became a little more relaxed, but he still didn’t look away from Venom on Lin Rui.

“Okay, Jackson, you can try to see how much your strength has increased.” From the beginning, Tony didn’t worry much about it and started the next experiment.

“I know.” Lin Rui, who was feeling the powerful strength of his limbs, agreed and then walked towards the Strength Tester in front of him.

“I’m going to punch!” Lin Rui reminded after a little preparation.

“Please start at any time, Mr. Jackson.”

Brush!

Boom!

After JARVIS finished answering Lin Rui, Lin Rui had already punched with lightning-like speed. Compared to Tony’s punch, Lin Rui’s speed and strength are miles above him. Therefore, when Lin Rui hit his fist wrapped in Venom on the strength tester, a loud noise and slight vibration spread out around the laboratory.

Huhu~

Feeling the slight vibration of the ground, the shock in Tony's eyes couldn't be hidden. This is his underground laboratory and it is needless to say that it has a strong defense but Lin Rui's punch can still affect it in such a way, which shows the power behind the punch just now.

If it weren't for the Strength Tester that was fixed on the ground this time, it might have been punched out by Lin Rui.

Dī Dī!

Soon, a beep sounded from the tablet in Tony's hand, and the test results were shown. Looking down at the detection result, the shock in Tony's eyes lasted longer.

5000 Kg!

This is the power of Lin Rui's punch just now, and it has already surpassed Tony's result by many times. If this kind of power is combined with a strong enough body, the damage it can cause would be enormous.

Of course, this is because Tony knew that Lin Rui was powerful. If Lin Rui were an ordinary person then Tony would probably be scared to death by this result.

However, compared to Tony's shock, Peter, who also saw the result of this attack, was very calm. Because, with his growth as Spiderman, Peter can now use such power without the assistance of the Spider Suit. If he had the enhancement of the Spider Suit then Peter would be able to display more power than this.

"Jackson, is this your full strength?" After the shock in his heart passed, Tony looked at Lin Rui in the laboratory and asked with excitement on his face.

Lin Rui, who had just retracted his fist had a weird expression on his face when he heard Tony's words, "Full Strength? No!"

Only a mere power of 5000 Kg won't be his full power, Lin Rui didn't even use his Internal Energy just now. And his full power would only be displayed with him using his Internal Energy, Lin Rui is in his Strongest State at that point.

"No? That wasn't your full power? Well, can you use your full-powered punch next?" After hearing Lin Rui's answer, Tony was stunned, but then he got even more excited. If 5000 Kg is not Lin Rui's full strength, then what point can he reach in the end? Tony is looking forward to it.

"Full Strength? Tony, I am worried that your Strength Tester may not be able to bear it!" Although Lin Rui also wants to see as to what level of strength can be achieved with the Venom enhancement, he is worried that he will break the machine in front of him.

"Don't worry, this is a Stark Product, its quality is guaranteed!" Tony said after hearing Lin Rui's words.

"Okay, the next one is my full strength attack!" Since Tony had already spoken then Lin Rui didn't plan to keep his hands anymore.

Call!

After adjusting his breathing, Lin Rui quickly mobilized the Internal Energy in his body. Soon, Lin Rui's overall momentum has undergone tremendous changes. If Lin Rui was just an ordinary person before then now he feels like a fierce Behemoth.

Dī Dī!

When Lin Rui mobilized the Internal Energy in his body, the tablet on Tony's hand suddenly sounded out with a rapid beep sound. This series of prompt sounds made Peter and Tony both look down at the tablet and then they missed Lin Rui's next punch.

Brush!

When Peter and Tony looked down at the prompt on the tablet, Lin Rui had already punched out. This punch was Lin Rui's strongest punch while ensuring his own safety. The fist filled with powerful Internal Energy instantly hit the center of the Strength Tester under the enhancement of Venom.

Bang! Rumble!

At the next moment, the strong Strength Tester directly broke from the ground, and the upper part of it flew out with the base part remaining embedded in the ground, the upper part hit the glass wall of the laboratory, leaving a crack in the glass wall that had enough defense to withstand a missile bombardment.

And Tony and Peter, who had just bowed their heads outside to see the prompt on the tablet didn't saw a shadow slammed towards them, and then the shadow was stopped on the glass wall.

Brush!

Because the movement this time was so loud, when Tony and Peter raised their heads because of the loud noise, they saw half of the Strength Tester hitting the glass wall.

Then the expression on Tony's face became very weird. He had just said that Stark's Products are of quality assurance, but the next second. That same Stark's product was destroyed!

"JARVIS, were you able to detect the strength value this time?" Tony suppressed the shock in his heart and directly asked JARVIS.

"Sorry, sir, the test just did not succeed." Opposite to Tony's expectation, this test was inconclusive. However, Tony probably also knows what level of Lin Rui's power is.

"Well, that's okay. What happened to the beep just now?" Since the testers are broken, the Strength Test is obviously not going on, for the time being, so Tony asked his other doubt. If it hadn't been for the prompt sound that just came out, Tony would not have missed such a wonderful scene.

#### **Chapter 449 Idea**

Not to mention that Tony has a surprised look on his face as he stood outside the laboratory, even Lin Rui in the laboratory also looked at his arms with a surprised look on his face.

At the moment when he used his Internal Energy to punch, Lin Rui clearly felt that the power given to him by Venom had fused with his Internal Energy, which increased Lin Rui's power again.

“This is awesome! It seems that my idea is really possible!” After carefully feeling Venom’s enhancement of his own strength, Lin Rui’s excitement was not reduced at all.

Although Lin Rui is very strong currently and as he continues to train, he will get more and more powerful in the future. However, this special weapon that he discovered still made Lin Rui sigh with huge satisfaction.

“Armed Cloak Outfits! In the world of Marvel, this can be a special Armed cloth discovered and invented here!” Finally, Lin Rui said the word that had been in his mind. But Tony and Peter who were outside the lab didn’t hear Lin Rui’s words. Only JARVIS did.

Cloak, a word that Lin Rui would often hear in his original world’s film and television like with ‘Cloak And Dagger’. Cloaking is a special arming method, very similar to Venom’s current situation.

According to Lin Rui’s understanding, the Cloak can be armed according to the ideas of the Armed Person, and it can make corresponding changes according to the external environment. It is a very good portable biological weapon. It is also very convenient to carry, and it is generally symbiotic with Armed Men.

Therefore, after learning about these abilities that Venom had gotten after his evolution after waking up again, Lin Rui unconsciously popped up this word in his mind. If Venom can really be perfected into a weapon like that then Stark will once again produce a weapon that would shock the world.

Moreover, the Cloak known to Lin Rui seems to bring a relatively large burden to the host’s body, but the current Venom can absorb other energy, which has a great advantage.

Compared with the high-end and expensive Iron Man Armor, Reproductive Outfits would be more common and cheaper. However, if these Cloaks cannot be underestimated. After all, the Armament of the Iron Man Armor still needs the assistance of Artificial Intelligence, and it will not increase the strength of the armed person itself.

The advantage of Cloaking is that it can directly understand the meaning of the Armed Men and make changes quickly. In addition, the most important thing is that the Cloak can directly enhance the strength of the Armed Person itself, which is very useful in some specific situations.

For example, in some places where the carrying of large-scale weapons is forbidden, Iron Man Armors won’t be able to function there so they could use Cloaks to sneak in.

“If I want to see if Venom can actually be made into a Cloak then I still need to do the next experiment! JARVIS, disarm the Helmet on my head!” Lin Rui was eager to know if his ideas could be with Venom’s current characteristics and ordered to JARVIS.

However, JARVIS did not implement Lin Rui’s request. Obviously, JARVIS won’t let Lin Rui perform such an experiment. At this time, Tony who was standing outside the laboratory already knew why the tablet on his hand made a beep just now.

“Did the energy in Venom’s body drop by 50% at the moment Jackson punched? It seems that Venom will adjust its amplification level according to the strength level of its host, so it seems that Venom’s own consciousness is still retained.” Looking at the data on the tablet, the expression in Tony’s eyes calmed down again.

Just now Lin Rui's punch directly consumed half of the energy in Venom's body. Although it is now absorbing from the energy source again, it also shows that such a powerful punch will consume a lot of energy.

But the good news is that even though Venom has consumed so much energy, it still does not directly absorb the energy of Lin Rui's body, but it honestly absorbs the energy from the Lin Rui's arm's Energy Source.

"Sir, Jackson asked me to disarm the helmet on his head." Just when Tony raised his head to see Lin Rui's state after this violent punch, JARVIS suddenly spoke to him.

Hearing JARVIS's voice, Peter on the side could no longer stand. He directly walked to the glass ball in the laboratory and stared at Lin Rui inside, "Jackson, what do you want to see?"

"I just want to see if the evolved Venom can still perceive the host's thoughts. If it can only move with its survival instinct now, then I would be a little disappointed." Seeing Peter, Lin Rui explained briefly.

"Are you trying to see if Venom can change its shape according to your ideas?" Tony's eyes lit up and he asked his own question after hearing Lin Rui's explanation.

"Yes, I remember that when Peter was parasitized by Venom, he could turn Venom into all kinds of clothes. Maybe, now it can also do that. But it won't be able to do that by just attaching itself to my limbs." Lin Rui won't be able to do his experiment if Tony disagreed so he had to continue to explain.

"In this case..." Originally Tony's idea of ??Venom was similar to Lin Rui's, so after hearing Lin Rui's words, he was ready to agree.

However, when Tony was about to let JARVIS disarm Lin Rui's Helmet, Peter, who was pasted on the glass wall, spoke first, "You just need to let Venom know what you think, you don't need to let it wrap your head, as long as you can perceive it by being parasitic on your body. You can concentrate your mind and perceive it carefully, and you can discover it!"

For fear of Lin Rui being affected after being wrapped in Venom, Peter hurriedly shouted from outside. Peter, who has had a complete experience of being parasitized, has a lot of experience. Venom's Mental Connection does not require it to cover the entire body of the host.

"Really? Then I will try." Hearing Peter's words, Lin Rui didn't insist that JARVIS disarm his helmet. Although Lin Rui didn't mind letting Venom completely parasitize himself for the sake of experimentation, but thinking of the slimy thing smearing his face, Lin Rui still thinks that it should be avoided.

Then Lin Rui calmed down. He was focusing on his own Spirit and wanted to communicate with the consciousness of Venom attached to his limbs. However, because of the Mental Damage he suffered during the last Teleportation process, Lin Rui's perception was a little unstable, so it took some time to sense the less obvious consciousness on his body.

"Is this Venom's consciousness? It's so weak, how did it control Peter?" Lin Rui thought in surprise after sensing the weak consciousness attached to him. In Lin Rui's perception, Venom's consciousness is so weak that it seems that he can only unilaterally accept some simple communication of consciousness, and cannot control the higher consciousness of human beings.

“Forget it, maybe it’s because of the changes of Venom from this evolution. Let’s see if it can change according to my thoughts.” Temporarily suppressing this doubt, Lin Rui has already begun to work with the weak consciousness.

## **Chapter 450 Control**

When Lin Rui focused on using his mental power and started communicating with Venom, Tony outside the laboratory was also watching the changes in Lin Rui and Venom seriously. Tony is very curious about this kind of thing that requires conscious communication.

“Peter, how did you communicate with Venom in the first place? Is it like someone is talking to you while standing next to you, but you can’t see that person?” Lin Rui in the laboratory didn’t respond so Tony looked at Peter beside him and asked.

Mental Powers exist, which has already been confirmed in this Marvel’s world, and Tony’s most intuitive understanding is probably related to the Brain Waves. In fact, with Tony’s current technology, he is about to create an instrument that links the human brain waves.

However, because this field is still very Obscure and Rare in the world, even a genius like Tony can’t make a breakthrough in the research of Brain Wave Machines while also researching the Iron Man Armor, Venom, and Magic.

“Uh... There is still a difference from talking face-to-face, because it is direct conscious communication, and it feels more direct and in-depth. The words we say are spoken through our mouth after our brain thinks of them and they have to pass a series of processes. But Consciousness Communication in your mind is very direct and very chaotic. You must be focused enough to let the other consciousness understand your thoughts.” Hearing Tony’s words, Peter thought about it and explained as much as he can.

Peter is also very confused about his Previous Consciousness Communication with Venom because he has been passively communicating with Venom, and more often than not, he was affected by Venom. At that time, Peter could suppress Venom’s consciousness to achieve his goals when he was extremely angry or focused.

“Well, maybe this is one of the reasons why there have been no mature Brain Wave control devices in the world. If the brainwaves that we send out already contain so many confusing ideas of human beings, how can a simple device distinguish it? That’s what we are trying to do right now.” After listening to Peter’s explanation, Tony also understood something.

“Yes, most people’s minds are not so focused.” Peter nodded and said.

That is true and the best example would be Tony as although he is now very focused on the Venom experiment, he is still thinking about what he wants to eat at night.

Yesterday Tony annoyed Pepper again, and he was thinking about buying a gift for her. This is the complexity of the human brain. No matter how sophisticated an instrument is, it is impossible to fully understand the brain’s many thoughts in an instant.

Of course, when a person's mental power is strong enough to reach the point where they can leave themselves and influence others, then they will be able to stably express their ideas with their own consciousness.

There are actually many such people in Marvel World, mainly Spiritual and Mind Powered Mutants, and among them, Professor Charles is the most famous and Powerful.

In terms of Mental Power alone, Professor Charles should be second to none on earth. With the enhancement of the Cerebro, Professor Charles can even control ordinary people around the world.

"If Venom's research goes well this time then maybe I will visit Professor Charles." After learning about the situation, Tony muttered to himself.

If Venom can be used stably to make a new type of armor, then consciousness communication is essential. So far, the most mature and effective brainwave awareness instrument in the world is in the hands of X-Men, which is Professor Charles's Cerebro.

Before this category was not involved and Tony would not have paid attention to that but now that it is necessary, Tony wants to borrow Cerebro for his research.

"Mr. Stark, Jackson is responding." Peter's voice interrupted Tony when he was thinking about when to go to X Academy to borrow Professor Charles Cerebro for a period of time.

Hearing Peter's words, Tony's gaze shifted to the laboratory again, just in time to see that Venom which had wrapped around Lin Rui's arms was undergoing some changes, and Venom, who had been clinging to Lin Rui's skin, began to agitate. Soon, in Lin Rui's palm, a glove made out of Venom appeared.

"He succeeded!" Peter shouted excitedly when he saw the glove that had been transformed by Venom.

In the beginning, Peter made Venom change into a lot of Jackets so simply because at that time Peter was already deeply influenced by Venom, and Peter met Vemom's requirements for a better Symbiosis.

Now, Venom has obviously not reached the Symbiosis with the host, but it has also fulfilled Lin Rui's requirements, so this difficulty is much more difficult than before.

Call!

After the Glove appeared, the Venom on Lin Rui's other hand also began to change. Soon, Venom, which wrapped Lin Rui's left palm, shrank onto his arm, and an arm guard was formed on the arm.

Although the Gloves and Armguards are very simple changes, it also means that Venom can indeed change its form according to the host's consciousness.

"There can really be so many changes!" Seeing the changes in Venom on Lin Rui, Tony couldn't help but exclaim.

"Haha! It's more capable than that!" Lin Rui, who had already mastered some tricks, said with a smile, he had apparently seen the surprised expressions of Tony and Peter's faces outside the laboratory.

Huhu!

Then, under Lin Rui's conscious command, Venom, who wrapped around his limbs, began to change again. The Glove on his right hand was still a glove, but the color on it began to change, and soon changed from pure black to bright red and blue colors.

The Arm Guard on his left hand also quickly changed its color, and after two seconds it had become silvery-white, looking like a real metal arm guard. The Venom attached to Lin Rui's legs has also changed its form and turned into ordinary pants, which makes it impossible to tell at a glance that it is caused by a special substance.

"The most perfect disguise!" Seeing Venom's ability to be so many times stronger than the Chameleon, Tony shouted again in surprise.

"Well, it seems that Venom still retains the ability to change like this." Compared to Tony's surprise, Peter, who had experienced Venom's ability at the beginning, was much calmer.

"Okay, let's see what else it can do!" Now it has almost become certain that Venom will no longer absorb its host's Biological Energy after it has evolved and Tony let Lin Rui continue the experiment with confidence.

"I will begin." After agreeing, Lin Rui began to conduct a series of tests on Venom according to some of his own ideas.

Huhu!

First, Lin Rui asked Venom to form into a knife in his right hand. After passing his own consciousness clearly, Lin Rui's right-hand glove quickly spread forward, and a standard long knife soon appeared in his hand. Moreover, the Knife turned directly into dark silver color and looked very sharp.

Brush!

Holding this long knife that seemed to grow out of his own hand, Lin Rui swung it at the broken strength tester in front of him.

Card! Pū Pū!

As the silver light flashed, the base of the broken Strength Tester was cut off again. The long Knife transformed by Venom not only looks exactly the same as any Alloy Knife but it also replicates the material of the Alloy Knife. It is completely a sharp weapon.

"Awesome!" Seeing that Venom's transformed Knife could split an alloy made material, Tony shouted again in surprise.

Then, Lin Rui conducted a series of armed tests on Venom in the laboratory, trying his best to explore Venom's abilities after re-evolution, and also to make more technical accumulation for the reproduction in his mind.
