

Marvel 501

CHAPTER 501 DANGER

Buzzing~

“Did he find Killian?” Tony murmured while staring at the vibrating tablet, and then he connected to the video call.

Call!

Swiping his finger at the tablet, Rogers’ face in the center of the screen quickly expanded to the entire screen. Then, as soon as the call connected, the image of Rogers appeared on the tablet. Peter, who was standing next to Tony, stepped aside after seeing Rogers’ call, making sure that he would not be seen by Rogers.

“Steve, is there news on Killian?” Tony asked faintly when Rogers’s face appeared.

“Well, the Insight System has found Killian.” Upon hearing Tony’s words, Rogers on the opposite side of the video replied seriously.

“It seems that the Insight System is still very valuable. Where is he?” Tony asked.

“He is in New York. Moreover, he seems to be staying in one of the Stark Industries properties and he seems to be going towards another. Are you still in your villa?” Speaking no-nonsense, Rogers replied directly.

However, when he heard that Killian was in New York, Tony’s calm expression suddenly became serious, especially when he heard Rogers say that Killian was going towards Stark Industries’ property, which made Tony even more nervous.

“Where is he now?! And, how do you know he is going to take action against Stark Industries?” With a very bad feeling in his heart, Tony asked quickly.

“Killian is now rushing to the industrial park outside Brooklyn. Is there something like your secret research institute there?” Rogers quickly replied when Tony’s face suddenly became serious.

“Industrial park outside Brooklyn?! Damn! JARVIS, connect me to Pepper!” Hearing Rogers’ answer, Tony’s originally serious face was instantly filled with worry, and he hurriedly shouted to JARVIS.

“Tony, what happened? Is there really something?” Rogers asked curiously when he saw the instant change in Tony’s expression through the camera. However, even if there is something important there, why would Tony contact Pepper, did he require her to deal with it?

“There is indeed a very important place there and they are the most important people. I arranged for Pepper to stay in that place, and there is a safe house!” While connecting JARVIS to Pepper, Tony quickly turned towards Rogers and explained.

Ever since he knew that Killian wanted to deal with him, Tony had hidden Pepper in the safe house for her protection.

The safe house is in New York, in an industrial park on the Stark site unknown to the outside world. After many years of secret transformation by the Stark Industries, it is already a high-secret test and research site, and its defense is strong.

And Tony also sent an Iron Man team over there, with twenty Iron Man guards by Pepper's side. But Tony, who has seen the explosive power of those Extremis fighters, can't guarantee that those Iron Mans would be able to block Killian, especially the kind of network intrusion that can break through JARVIS'S defense.

"What?! Where is Pepper?!" Hearing Tony's words, Rogers on the opposite side of the video didn't respond, and Peter, who was hiding behind Tony, jumped up.

After yelling out loud, Peter covered his mouth and closed it, but the look in his eyes clearly conveyed that he was worried about Pepper.

"Sir, the connection with Ms. Pepper was cut off. Judging by the method of cutting off the network, it should be the same as the previous intrusion into my system." Just when Tony was feeling worried, JARVIS reported another very bad news.

Bang!

"Damn it! Send out all the Iron Man you can use right away and kill that Killian and his men! If Killian dares to hurt Pepper, I swear, I will tear him apart!" Hearing JARVIS's report, Tony put his hand on the tablet and he slapped the console with his other hand while commanding loudly.

"Yes, sir." JARVIS quickly replied after receiving the order. The other party did not invade the core system of JARVIS this time, but they blocked the area where Pepper was located, and also simulated similar signals so that JARVIS wouldn't notice that the signal was cut off before this.

"Tony, SHIELD already has a special squad on standby. Since they are going after Pepper, I will tell them to stop Killian. Don't worry, Pepper will be fine." Although Tony left the tablet aside, Rogers's voice still came from inside.

Because Tony had told Rogers that he didn't need SHIELD to intervene, Rogers just let the special team follow Killian's team and didn't move. But now, Killian is going to deal with Pepper, so Rogers obviously won't wait for Tony's Iron Man to arrive.

"Captain Rogers, thank you! I'm leaving too, I hope Pepper can hold on!" Hearing Rogers's words, Tony picked up the tablet and said seriously.

"Don't worry, she will be fine."

Card!

Then Tony hung up the video call with Rogers. Then, he quickly clicked on the console and directly suspended Lin Rui's experiment in the laboratory, who had already performed The Cloak attack.

Because of the soundproofing effect of the laboratory is very good, Lin Rui didn't hear them outside just now, otherwise, the experiment would have stopped a long time ago and Lin Rui would be already outside.

“Jackson! We are stopping the experiment, Killian is rushing towards Pepper’s location, I need all of us to go there!” Seeing Lin Rui’s figure stopping in the laboratory, Tony opened the laboratory door and shouted.

“En!? Pepper?!” Lin Rui, who was still a little dazed, had a flash of light in his eyes when he heard Tony’s words.

Brush!

Then, Lin Rui, who had not removed The Cloak, had rushed out of the laboratory and appeared in front of Tony and Peter in the blink of an eye.

“What Is Killian doing? How would he know Pepper’s location?!” Lin Rui asked worriedly when he appeared in front of Tony and Peter in an instant.

“He should have judged that by intercepting the signal that I arranged for my Iron Man team there. Now JARVIS can’t contact that side, so the Iron Man’s system over there has probably been invaded. We must set off immediately. Jackson, is anyone in your League of Defender nearby?” While turning around and walking quickly towards the warehouse where the Iron Man Armors were stored, Tony explained to Lin Rui and finally asked one more question.

“Brooklyn? There is indeed a guy there, I will inform him to go there!” Lin Rui replied after thinking about it. The guy Lin Rui thought about is Deadpool. During this time, Deadpool was living in a two-person world with his lover, but their position should be the closest to there.

“Killian! If you really hurt Pepper!...” Now Tony can no longer care about anything else. His own Iron Man Armor may not be reliable under such circumstances. He can only hope that Pepper will continue to be okay.

“Right, Tony, this!” Just when the three of them had arrived at the warehouse that housed the Iron Man Armors, Lin Rui suddenly called out to Tony. When Tony turned around, Lin Rui handed him a metal square box.

“The Cloak?” Tony’s eyes lit up when he saw the metal box Lin Rui handed over.

After this period of testing, the performance of The Cloak is almost the same, and when the Iron Man Armor may fail, Tony would need it. So, Tony had already taken the metal box without showing any hesitation.

Call!

At the next moment, Tony and Lin Rui Peter were already standing in the center of the warehouse.

“J.A.R.V.I.S, Armed!”

CHAPTER 502 ARRIVES

Just when Tony received the information from Rogers and hurriedly brought the Iron Man troops towards Brooklyn, Killian had already surrounded the secret research institute of Stark Industries with a dozen Extremis fighters.

As for the special team arranged by Rogers, although they are approaching this location as fast as possible, it will take them a while to catch up.

Dī Dī!

Just as Killian surrounded the building, Pepper, who was located in the research institute, was sitting in the safe room and boringly scanning the website.

However, just as Pepper was thinking about when she could go out and return to her normal life, the Iron Man who had been guarding this research institute suddenly blared out with an alarm.

Swipe!

Then, the three Iron Man closest to Pepper had rushed to her side and protected her in the center.

“Miss Pepper, I lost the connection with Tony.” When Pepper looked up suspiciously, JARVIS’s voice came from an Iron Man.

However, compared to a complete intelligent system with a complete unit for powerful calculations, the JARVIS in these Iron Mans obviously does not have such powerful capabilities. You can hear it from the voice of this stand-alone version of JARVIS is more formulaic.

“Hmm!? Lost the contact with Tony? What’s the matter, did something happen to Tony?” The expression on Pepper’s face changed quickly when she heard JARVIS.

“No, it’s us. We are isolated from the outside world. Last time an enemy tried to invade my core system and failed. This time it should have been dealt with. They directly cut off our connection with Tony this time. So, Miss Pepper, according to my judgment, we are in a very difficult dangerous position.” Hearing Pepper’s question, JARVIS went on to explain.

“Danger? Then let’s leave quickly!” Pepper said nervously when she heard JARVIS calmly say that she was in danger.

After speaking, Pepper stood up and was about to leave. Although she doesn’t know why they had lost contact with Tony, there are more than a dozen Iron Mans around to protect herself and Pepper is not too worried, she just wants to return to Tony’s side quickly.

Buzzing!

“Miss Pepper, it’s too late. I have found that there are 18 people outside. Every human body has a high-energy response. This location is already surrounded.” When Pepper was about to go outside, the Iron Man beside her reminded her again.

“Surrounded?! JARVIS, what should I do now?” Pepper stopped and asked worriedly when J.A.R.V.I.S said that she was surrounded. At this time, Pepper could not do anything. Although Pepper is a strong woman, what can a strong woman do when encountering such a thing.

“Miss Pepper, your safety is the top priority here. So please be armed first.” Hearing Pepper’s worry, the Iron Man Armor standing in front of Pepper said while opening up.

Card!

Soon, Pepper was armed with an Iron Man Armor. In this way, even if these Iron Man can't deal with the enemies outside, this Iron Man can quickly retreat with Pepper. Those Extremis fighters are really powerful, but they can't fly, but Iron Man Armor can.

Rumble!!

After Pepper was armed with the Iron Man Armor, a loud noise suddenly came from the gate of the secret research institute. Killian finally started to attack. With the strength of the Extremis Fighters, those alloy gates would not be able to hold them for long.

"A high-energy attack has been detected! The best response has been calculated. Five Iron Mans protect Miss Pepper's retreat, and the rest will fight against the enemy." When the attack came, J.ARVIS also quickly made countermeasures.

Then, the Iron Man armed with Pepper and the jets at the feet of the other four Iron Man burst into flames instantly and quickly rushed towards the other exit of the institute. The remaining ten Iron Mans rushed towards the door.

Although there was no support from the computer crew, the self-contained system within this Iron Man team was enough to handle many battles.

Huhu!

Soon, fifteen Iron Mans split into two directions in the building and rushed out quickly.

However, the stand-alone version of JARVIS did not know that the best response it made based on the situation on the scene was all predictable in the eyes of the enemy. At this time, the Extremis fighters guarded the positions of several escape exits in this research institute.

And outside one of such exits, Killian just happened to stand outside looking at the door in front of him. At this time, Killian had a tablet in his hand with fifteen small green dots moving at high speed, which represented the fifteen Iron Mans in the building.

And five of the small green dots rushed towards Killian, the whereabouts of the stand-alone version of JARVIS was completely under Killian's control.

"This time, Tony Stark, I will make you pay the price for that behavior twelve years ago!" Looking at the five green dots on the tablet quickly approaching him, Killian's eyes flashed with a red light.

...

Huhu!

While Killian surrounded Pepper's secret research institute and launched an attack, the special forces affiliated with SHIELD were quickly approaching this area.

After the insight system found that Killian was coming here, Rogers immediately activated the SHIELD team in New York as a precaution and asked them to pay close attention to Killian. So, after learning from Tony that Killian was going to attack Pepper, Rogers immediately sent the team out.

Although SHIELD's special team does not have special people with some very powerful abilities like the Avengers or the League of Defender, they are equipped with SHIELD's most powerful technological weapons.

Moreover, the people in this team are very powerful with their cooperation. If they fight properly, such a fully armed team can completely control a fight.

Moreover, after Hydra was eliminated, the legacy and resources of Hydra were digested by SHIELD, so SHIELD used these resources to carry out major upgrades. Tony is only interested in Hydra's research data on the Magic Cube.

Therefore, in the action to eliminate Hydra, except for Lin Rui's large number of Reward Points, SHIELD was the biggest winner.

After obtaining Hydra's resources and technology, SHIELD quickly upgraded its force field weapons and shock wave weapons and they equipped the Special Teams with the powerful energy weapons researched from Lin Rui's Fire God Artillery, such a team's fighting power will never lose to Tony's Iron Man team.

"We are close to the goal and the battlefield is being analyzed." After Killian came to this industrial park, the Captain of SHIELD Special Forces continuously issued orders through the team channel.

CHAPTER 503 INVALID

Zi Zi Zi!

However, just as the SHIELD special forces continued to approach the destination, some noise suddenly appeared in the channel they were connected to. This was the reason why the channel was affected by the special band.

It seems that Killian's network blockade in this area is not just for Iron Man. SHIELD has also been strongly affected.

"Captain, the network communication in this area is getting blocked by something. If we continue to move forward, we will be disconnected from the headquarters. Moreover, our teams should not be separated too far, otherwise, we will lose contact with each other." After discovering that communications and other technological equipment were getting affected, the professionals in this team walked towards their Captain.

Hearing the words of his teammates, the Captain of this special team was silent for a few seconds, and finally made a decision, "Report the situation here to the Headquarters, leave the five-man team here, and the rest will go in with me!"

"Yes, Sir!" Hearing Captain's words, the other team members agreed without hesitation.

Then, the team left five people in the area where the signal had not been affected, and the others speeded up their pace and rushed towards the destination. They had received an order from Captain Rogers before, and they must ensure the safety of Pepper.

Huhu!

Soon, the SHIELD special forces containing a dozen people had already rushed into the area occupied by Killian and Extremis fighters.

...

Rumble!

At the gate of this Research Institute, seven Iron Mans are fighting an equal number of Extremis fighters. And near the destroyed gate, the wreckage of the three destroyed Iron Man were scattered on the ground. During the battle with Extremis Fighters, three Iron Mans were destroyed.

Moreover, according to the situation at the scene, the remaining seven Iron Mans were unable to fly, just like they were outside Tony's beach villa before, apparently, they were being suppressed by some kind of technology. In addition to being unable to fly, the other functions of the Iron Man Armor were obviously affected to varying degrees.

In this situation, the seven Extremis fighters almost fought with the Seven Iron Man Armors to a standstill and they were gaining an upper hand. The blazing energy emitted from their hands can completely melt the Iron Man Armor, and the remaining seven Iron Man Armors will soon become a scrap of iron.

Stabbed!

"Analysis of the battle situation: the enemy has invaded the network, and the Iron Man Armor cannot exert 100% combat power. The latest plan is a strategic retreat." After another Iron Man Armor was torn apart by the Extremis fighters, the stand-alone version of JARVIS finally updated the battle plan after analyzing the current situation, he made the choice to retreat.

Kakaka!

After the stand-alone version of J.A.R.V.I.S made the decision to retreat, the remaining six Iron Mans has already taken heavy steps towards the institute. However, those Extremis fighters would not simply let these Iron Man Armors leave.

They finally had the opportunity to tear apart Iron Man, a hero in the eyes of the outsiders, how could they let them go. Therefore, in the entrance area of this research institute, a few Iron Mans wanted to retreat, but the Extremis fighters dragged them back and the battle continued.

While the Extremis fighters here dragged the Iron Mans who were about to retreat, five Iron Mans in the other direction of the institute were protecting the armed Pepper and leaving quickly.

However, these five Iron Mans have obviously also been suppressed by the same technology that is affecting the other, otherwise, the stand-alone version of J.A.R.V.I.S would have rushed out of the institute with Pepper and left. Just when the five Iron Man rushed to one of the exits, they suddenly stopped.

"J.A.R.V.I.S, what's the matter?" Pepper, armed in the Iron Man Armor, stopped, and she asked suspiciously.

"The scan revealed that there are eight human bodies with high-energy responses, and the other party knows our whereabouts." The stand-alone version of J.A.R.V.I.S answered truthfully.

“Then leave from another direction. Doesn’t this building have several secret exits?” Hearing J.A.R.V.I.S.’s answer, Pepper hurriedly shouted. The enemy was able to invade J.A.R.V.I.S.’s system and suppressed most of Iron Man’s combat power. Now Pepper is very worried.

“I will take Miss Pepper to leave, and the remaining Iron Man Armors will be left for delay.” Without hesitation, the stand-alone J.A.R.V.I.S has already made a decision.

Huhu!

Then, the Iron Man Armor armed with Pepper turned around and ran quickly. The remaining four Iron Mans raised their hands and aimed them at the front exit.

Although most of the weapons on the Iron Man Armor have been suppressed, there are still some offensive weapons that they can control. And now, J.A.R.V.I.S has detected that the enemies outside are already attacking the exit gate.

Buzzing!

Rumble!

Finally, the very defensive exit door was deformed and twisted after being burned by the intense heat, and finally kicked open by Killian outside.

Da da da!

In the next moment after Killian kicked the door open, the Iron Man who was behind the door opened fire at Killian, and in an instant, hundreds of bullets pounced on Killian.

Under such intensive firepower, even if Killian has super recovery power, it would be impossible for him to hold on. However, things are never that simple and Killian is no longer afraid of Iron Man who has been suppressed.

Brush!

At the moment when hundreds of bullets rushed towards him, Killian, who had just stepped half of his foot, quickly raised his right hand in front of him, looking at his actions, it seems that he was planning to block these powerful bullets with his right hand.

However, unless he was Magneto, the bullets wouldn’t stop attacking him just because he raised his hand.

However, just as the bullets were about to knock Killian into the sieve, a fiery red light suddenly appeared from his outstretched hand. Then, an ordinary palm swelled to the size of half a meter in a few tenths of a second.

The enlarged palm was covered with a layer of hard-looking bone fragments, which looked like the claws of a mutated dinosaur, and the huge monster claws kept Killian’s figure behind.

Dang Dang Dang!

After Killian's palm instantly became bigger, the attack from the Iron Man Armor also arrived. After the bullets hit Killian's huge palm, there was a crisp crashing sound, and then they were bounced off one by one.

Facing the enlarged monster palm of Killian, none of such powerful bullets could break its defense. So many bullets had no effect except leaving some white marks on the bones of Killian's palm.

"Analysing the scan results...the data is insufficient to analyze the results..." After the first round of strikes failed, the stand-alone version of J.A.R.V.I.S quickly analyzed Killian's huge palm, but there was no result.

Huhu!

"Hmph! Iron Man! You are nothing!" While controlling the huge palm that was rapidly shrinking, Killian whispered coldly while staring at the four steel suits on the opposite side.

Then, Killian waved his hand, and the Extremis warrior behind him had already jumped over.

CHAPTER 504 ON STAGE

Bang!

With a loud noise, the Iron Man Armor that had fled with Pepper blasted open a wall in the corner. Knowing that all the Iron Man Armors have been engaged by the enemy, the stand-alone version of JARVIS no longer follows the normal route to leave from the exit but finds some hidden places to break through the walls and escape.

This can at least confuse the enemy, although it may not have much effect.

Kaka!

After blasting the wall, the Iron Man Armor had already stepped out and it didn't stay long before running towards the outside. As long as the Iron Man Armor breaks out of the area in which the communication and its system are suppressed, it can recover all the functions, then Pepper's safety would be guaranteed.

An Iron Man might not be able to deal with so many Extremis fighters, but it would not be hard for it to take Pepper out of here.

"JARVIS, can we get out of here?" Pepper, armed with the Iron Man Armor, asked with some worry in her voice. Now that there is only one Iron Man left, Pepper feels very scared.

"Miss Pepper, although the other party has blocked the signal in this area, Mr. Stark must have known that an accident has occurred here. Therefore, our support should be here soon. Moreover, this kind of shielding technology that can only suppress my system functions won't cover too much area, so as long as we run out of this area, we will be safe." Hearing Pepper's words, the stand-alone JARVIS replied calmly.

While answering, JARVIS also took Pepper and quickly ran around the warehouse in front of him. If it weren't for Pepper's physical condition, the Iron Man Armor would have gone even faster.

“Yeah! I believe you! I believe Tony too!” Hearing JARVIS’s answer, Pepper suppressed the worry in her heart and said seriously.

Boom!

However, just after Pepper said this, there was a sudden violent explosion behind them. Judging by the location of the explosion, it should be where they blasted the wall just now. It seems that the remaining four Iron Mans did not stop Killian and his Extremis fighters for long.

Huhu!

Sure enough, under J.A.R.V.I.S’s scan, several figures quickly chased after them. Every one of these figures contained powerful energy, and JARVIS’s scan showed extreme heat inside their bodies.

Pū!

Facing the pursuit of the Extremis fighters behind him, the Iron Man Armor armed with Pepper kicked his feet and quickly rushed towards the warehouse beside him.

In the next moment, JARVIS took Pepper and hid in this empty warehouse, and the Extremis fighters led by Killian outside had also chased them. This warehouse could not stop them.

“JARVIS...now, what should I do?” Pepper asked again with a trembling tone after looking at the situation scanned by JARVIS.

“...” Faced with Pepper’s question, the stand-alone version of JARVIS hesitated for the first time. It seems that facing such a situation, the stand-alone version of JARVIS has no good solutions for a while.

“Haha! It seems that you are the villain I am going to deal with this time! You! That’s you, Right? You look like someone with a serious face!” However, when Pepper became more worried because of JARVIS’s silence, a sound suddenly came from outside. To be precise, the voice came from the top of the warehouse.

If Lin Rui was here, he would have definitely recognized this voice. Because this is the voice of the unreliable guy named Deadpool. After receiving the news from Lin Rui, the nearest located Deadpool set off immediately, and finally arrived here before Killian caught Pepper.

As for SHIELD’s Special Forces, they are still entangled with a few Extremis fighters guarding the gate.

“You are... Deadpool, from the League of Defender?!” Outside the warehouse where Pepper was hiding, Killian looked up with a sullen look on his face as he saw a guy in a crimson suit squatting above the warehouse and looking down on them.

His previous attack plan against Tony was completely ruined by Mirage Knight so Killian had later learned about the League of Defender where Mirage Knight was located. Now the funny guy in front of him is a member of the League of Defender. Although Deadpool doesn’t have many chances to show his strength, he is also a Vigilante in New York.

“Haha! It seems that my fame precedes me! A no-name villain actually knows my name! Not bad, not bad!” Deadpool, who was squatting on the top of the warehouse, heard Killian calling out his name and spoke with a smile.

As a member of the League of Defender, Deadpool's fame is completely inferior to Mirage Knight, Spiderman, and Daredevil. Although Deadpool tried his best to push up his fame in front of the public, but he couldn't compare to the old Vigilante like Lin Rui and others.

So, now that Deadpool heard his name from the mouth of a villain, he was very happy. At least, this means that the villain still knows himself. Therefore, Deadpool decided to leave the whole body of these people later.

"So Villain! Kill him now!" Seeing Deadpool's ignorant attitude and tone, Killian's anger came out and he gave orders to the Extremis fighters beside him.

Boom!

Hearing Killian's order, the two Extremis fighters kicked their feet, and their whole figure quickly rushed towards Deadpool on the top of the warehouse. While rushing toward the top of the warehouse, the eyes of the two Extremis Fighters also showed red light at the same time, and the Extremis in their body had been instantly mobilized.

"Huh?! What a weird source of power!" Deadpool murmured a little while seeing the two Extremis fighters leaping directly at him. Deadpool is a Mutant and he can clearly perceive that these people in front of him are not Mutants, but there is a very powerful force in their body.

"Why are you guys so eager to die! Oh well, Come!" Although he is very curious about the power of the Extremis fighters, Deadpool is not worried. After a loud shout, he immediately pulled out the double blades from behind him and threw himself towards the Extremis Fighters.

Brush ~ Brush!

Deadpool and the two Extremis fighters crossed each other in the air for an instant, and the two blades in Deadpool's hand swung out, each of which greeted the opponent from the deadly position while Deadpool avoided all the attacks of the Extremis Fighters. In terms of flexibility, Deadpool still surpassed these Extremis fighters.

Call!

Holding a pair of blades in his hands, Deadpool tumbled and fell towards the gate of the warehouse and stopped before Killian. Before Deadpool had rushed into the signal-shielded area, Jerry had already told him that the object to be protected this time was Iron Man Tony Stark's girlfriend, Pepper, and these people in front of him were obviously not Pepper.

So, the person hiding in the warehouse behind Deadpool is obviously Pepper, and Deadpool will not let anyone hurt her. After all, he owes Tony a favor.

CHAPTER 505 SUPPOR

Chi Chi Chi Chi!

Just as Deadpool was blocking the gate of the warehouse, he squeezed the hilt of the double blades in his hands, but he suddenly heard a strange sound, it was as if something was burning. Hearing this voice, Deadpool curiously tilted his head and looked at it. In the next moment, Deadpool's eyes widened instantly.

“Damn it! Damn it! Damn it! So hot! So hot!” Deadpool called out loudly while shaking his hands.

It turned out that the sound of the burning thing just now was not something else, but the sound of Deadpool’s hand burning. Because, he didn’t know when his blades had turned into two red-hot iron blocks, which were roasting his hands.

Pū chick!

Throwing the double blades in his hands and inserting them on the ground, Deadpool blew air on his injured hands distressingly. Until now, Deadpool was still wondering how his weapon turned like that.

He obviously had only hacked two little villains to death with his blades! Huh? Those two guys! Thinking of this, Deadpool’s eyes quickly glanced around. However, the sight that Deadpool saw in the next second made him even more surprised.

“Damn! What the hell are you!?”

Chi Chi!

In front of Deadpool’s eyes, the two enemies who should have been in two pieces and more importantly dead were just lying on the ground. Their cutoff limbs are recovering quickly under a red light.

One of the guys who had his leg cut off by Deadpool had already grown his own thighs. Their recovery speed is completely unimaginable to Deadpool as this is even faster than his own regeneration. That’s why Deadpool’s eyes widened and he exclaimed.

After seeing the red light on the two Extremis fighters, Deadpool almost guessed why his blades had turned into red-hot iron. Because, these Extremis fighters are a huge heating pot! If it hadn’t been for Deadpool’s blades being made from strong materials, they wouldn’t have only burned just now, but they would have been melted directly.

“How the hell should I fight this?! That Mirage Knight, what kind of guy is after Tony’s girlfriend!” Watching the two guys who should have died, recover completely, and coming towards him, Deadpool muttered helplessly.

However, just when Deadpool faced the almost unkillable Extremis fighter, a message suddenly came from his headset that was blocked from the signal. After hearing the message, the corners of Deadpool’s mouth, who had been helpless just now, turned up slightly.

“That’s good! I don’t like dealing with a guy who is more disgusting than me!”

Call!

After saying this, Deadpool stepped back a bit, and his figure quickly backed away and rushed into the warehouse behind him in an instant.

“Miss Pepper, it’s time to fight back now!” Just outside the warehouse where Deadpool was feeling the difficulty in dealing with these Extremis fighters, Pepper hiding in the warehouse suddenly heard J.A.R.V.I.S’s voice.

“En? Could it be...” Perceiving the change in J.A.R.V.I.S’s tone, Pepper’s eyes lit up.

“Ms. Pepper, I’m sorry to shock you. Our support has arrived. Don’t worry, you will be fine with Mr. Stark.” J.A.R.V.I.S quickly replied as if he understood what Pepper was thinking. The current J.A.R.V.I.S seems to be different from just now, and his tone is more comforting.

Hearing what J.A.R.V.I.S said, Pepper, who was frightened by the red light outside, suddenly became calm. Although Tony has experienced a lot of things since becoming Iron Man, he didn’t let those things affect Pepper. Pepper is nothing more than an ordinary strong woman, this time’s incident will make Pepper strong.

...

Just when the only Iron Man here was protecting Pepper hiding in the warehouse, a few kilometers away from the Research Institute, almost a hundred Iron Man were rushing toward this side with great speed.

Tonight, the people of New York were very fortunate to see an amazing scene. Hundreds of Iron Man flew over New York quickly, which was more shocking than any science fiction movie.

“Sir, the signal shielding range has been scanned, and we are about to enter it. Also, I have contacted Miss Pepper. She is fine for the time being. Deadpool is helping to block Killian.” Tony rushed to the front of the Iron Man army while JARVIS’s calm report came in his ear.

Although the signal was blocked by a special technology in that area, JARVIS could still breakthrough at such a close distance. However, J.A.R.V.I.S has not been able to solve this technical confrontational suppression by the other party.

If this Iron Man army rushes into the shielded area, JARVIS can’t guarantee that they can still maintain more than 60% of their combat effectiveness.

“Is it okay for the time being?! Show me Pepper’s location! Now, turn on the Anti-Electromagnetic Interference System to the maximum, and let’s kill Killian!” Hearing JARVIS’s report, Tony who was worried about Pepper’s angry order.

“Yes, sir.” JARVIS quickly agreed to Tony’s order.

Swipe!

Then, hundreds of Iron Mans quickly rushed directly from high in the sky to the warehouse where Pepper is located. As for Killian and others outside the warehouse, they have also been marked. Before entering the signal blocking zone completely, JARVIS turned on the fire control system to strike the enemies down.

Da da da!

In an instant, thousands of bullets fell from a high altitude, and their target was Killian and other Extremis fighters on the ground. Although J.A.R.V.I.S can now use more powerful weapons, Pepper is in the warehouse next to the Extremis Fighters, and powerful weapons may also affect her.

Facing the attack from a high altitude, Killian’s eyes flashed with a red light, and he quickly raised his hand to block the attacks. Then, a pair of huge monster palms appeared under the surveillance of

J.A.R.V.I.S. The Extremis fighters standing next to Killian also raised their hands in the same way, and a pair of huge palms blocked their bodies.

Dang Dang Dang!

The firepower that was enough to penetrate the huge palms of Killian and the other Extremis fighters and hit the concrete ground after going through their monster palm only made a slight sound. Most of the bullets were blocked.

Although a small part of the bullets injured these palms, but in a burst of red light, the injured palm quickly recovered.

“Damn! What are those?! Dinosaur palms?!” Through JARVIS’s scan, Lin Rui, who was still in the Iron Man Armor, also saw the huge monster palms that Killian and the others had transformed from their hands.

Even the well-informed Lin Rui can’t help but scream out with a surprised look on his face. Based on the plot that Lin Rui knows, the Extremis Serum has no such effect at all. Obviously, this is also a huge change in the plot.

Dī Dī Di!

“The report shows that the system is strongly disturbed, the flight power system is suppressed by 80%, and the laser weapon system is in chaos.” Just when Lin Rui was surprised by the huge monster palms below, JARVIS’s voice came from the Armor while the alarm sounded.

Huhu!

Then, the flight trajectory of hundreds of Iron Mans that had rushed towards Killian below had changed. Each Iron Man rushed to the ground crookedly like they were drunk.

CHAPTER 506 OPPOSE

Huhu!

At this moment, the Iron Man army who looked like a drunk person staggered towards the ground. With JARVIS’s initial preparations, although only 20% of the power system was left, it was still enough for the Iron Man Army to the ground.

Hundreds of Iron Mans fell safely to the ground. Even if they can’t fly, so many Iron Man can pile Killian to death.

“JARVIS, disarm! Spiderman and I can play a stronger role in this situation than Iron Man.” Lin Rui quickly said to JARVIS in the constant fall.

“Okay, Mirage Knight. We are about a hundred meters above the ground, and now we are disarming.” Upon hearing Lin Rui’s words, JARVIS gave out quick feedback.

Kaka!

In the next moment, the Iron Man armed with Lin Rui had disintegrated in mid-air, and the actively separated steel components quickly flew towards the ground. However, a black figure was left in the air,

Lin Rui wearing a Phantom Suit. As for Peter, he needs to let JARVIS take him to the ground to get out, after all, spiders can't fly.

Shoo!

Floating steadily in the air, the Iron Man beside Lin Rui all swayed towards the bottom. Glancing at where Killian and the others were, Lin Rui's feet turned into a black shadow and he disappeared into the air.

And when Lin Rui had disarmed himself from the Iron Man Armor, Tony had already rushed in front of Killian and the others. Because JARVIS concentrated most of its power to maintain the performance of Tony's Armor, Tony's currently armed Iron Man can still maintain about 80% of its combat effectiveness.

However, with the other Iron Man, who had been suppressed by Killian and his powerful Extremis fighters, he really didn't know how much advantage he could have.

Boom!

Boom Boom Boom!

Falling heavily to the ground from mid-air, Tony raised his head and stared at Killian and the Extremis fighters not far in front of him. After Tony fell, the Iron Man Army also fell behind him, forming an Iron Man team behind Tony.

"Aldrich Killian, I must admit that I had underestimated you. The technology you asked me to cooperate with more than ten years ago was still worthwhile." Staring at Killian's figure in front of him and watching his monster palm quickly shrinking and recovering into the palm of a normal person, Tony spoke while blinking his eyes.

"Haha! Oh the Irony, the arrogant Tony Stark finally admitted that he underestimated someone! It's a great honor! It's a pity that I am not who I was more than ten years ago. With my current strength, I am able to destroy your Stark Industries now!" Killian laughed when he heard Tony's words.

Although the plan to seize Pepper to blackmail Tony was not achieved this time, Tony was still attracted here. Therefore, Killian's mission is still complete. Because Killian had already laid a trap in this area and he was waiting for Tony and his Iron Man army to fall in the trap.

The strength of the network technology team that Killian can use to compete with JARVIS is doing far more than just shielding this area's signal. The core system of JARVIS was almost breached in Tony's beach house before. And this time, Killian was prepared and he waited for Tony to bring his Iron Man army here.

"Only you and these nondescript reformers?" Hearing Killian's arrogant words, Tony pointed at Killian and the Extremis Fighters behind him and spoke indifferently.

When Killian sent the Extremis fighters to attack Tony before, Tony got three arms left by the Extremis fighters. Although there was no Extremis left when the three arms were retrieved, Tony still found something.

To put it simply, Extremis is high-energy lifeform energy that can transform ordinary people into superhuman beings by injecting them into the human body. Once the energy of Extremis is exhausted, then the Extremis Fighters will instantly become weak like a chicken.

According to Tony's speculation, the Extremis energy in these Extremis fighters is roughly the same as the energy stored in a miniature Arc Reactor. Therefore, even if it would be hard work, Tony's Iron Man army will consume these reformed soldiers.

Of course, the premise is that the core system of the Iron Man army will no longer be subjected to large-scale suppression, and then Iron Man Army will become an iron knot that can not be beaten.

"Nondescript?! You are saying that I am a nondescript reformer?!" Hearing Tony's description of himself as a nondescript reformer seemed to have hit Killian's weak points as he suddenly cried out like a crazy person.

Because of the effect of Extremis transforming the human body, in order to make themselves stronger, Killian and these Extremis fighters must constantly make their bodies part of various powerful monsters. Therefore, Tony is right to say that Killian and the others are nondescript transformers as there's nothing interesting there because Extremis has turned them into monsters.

"Then, I will let you see what I, a nondescript reformer, can do?!" The angry Killian roared, and he rushed towards Tony the next moment.

Hum!

As Killian rushed towards Tony, a strong electromagnetic signal came from all corners of the area. In an instant, the signal shield that had been broken by a large number of Iron Man rushing in was once again established.

Moreover, this time the other party again began to invade the core system of JARVIS. Killian wasn't stupid, he wouldn't fight Tony if the Iron Man Army was intact.

Humm!

"The system has been invaded, and the performance of the Iron Man Armor is declining, 76%, 73%..." After the sudden electromagnetic signal strikes, JARVIS immediately issued an alarm.

"Electromagnetic signal strikes? I want to see what is going on here! JARVIS, enable Stark 1, 2, and 3 satellites!" Hearing JARVIS's report, Tony didn't have many worries in his eyes and he quickly ordered.

"Yes, sir, Stark 1, 2, and 3 satellites are being activated." Hearing Tony's order, JARVIS completed the order as soon as possible.

As the world's leading industrial group, Stark and SHIELD has established a Space Satellite system together.

After the other party invaded the core system of JARVIS last time, Tony was prepared to keep the three satellites belonging to Stark in preparation, and now, it is time to use them.

Isn't the other party's network technology strong enough to invade JARVIS? Then Tony directly took out three professional satellites to fight them! Let's see who is stronger?!

Probably, only someone like Tony can use such countermeasures in the world. Other people don't have satellites in the sky.

Chapter 507 Counter Attack

Call!

When JARVIS launched the Stark 1, 2, and 3 satellites, Killian, who was close at hand, rushed towards Tony in an instant. Then, a fist with a red light blasted towards Tony's face. With the extreme temperature of Extremis, Killian's punch was enough to melt Tony's helmet directly.

Bang!

Facing Killian's attack, Tony quickly raised his hands. In the next moment, that fiery fist blasted on the alloy armor and the extremely high temperature instantly burned the alloy armor but the alloy armor did not melt quickly.

Call!

Tony, who had received Killian's punch, nailed his footsteps to the ground without retreating back and he stared at Killian in front of him through the helmet. Having seen the extreme heat that can melt the Iron Man Armor in his previous battler, how could Tony be unprepared?

The current generation of Iron Man Armor that he wore this time had been added with some ceramic anti-heat materials.

Buzzing!

Pū!

Tony, who resisted Killian's punch and the high-temperature scorching, launched a counterattack in the next moment, and the chest cannon on the chest of the Iron Man Armor was slightly charged before blasting out.

JARVIS's system is indeed affected, and the support of the three satellites in the sky has not yet arrived, but Tony still has a system that he controls. As long as these weapon systems have not been completely compromised by the opponent, then Tony can mobilize these weapons by himself.

Chi Chi Chi Chi!

The powerful chest cannon was enough to blast Killian's chest through even when the system was disturbed, and a bowl-sized cavity appeared in Killian's chest. However, Killian grinned with a big hole in his chest, not caring about the injury that would be fatal to the ordinary people in his chest. Then, Killian raised his fist against Tony but he suddenly opened his fist. In front of Tony's surprised eyes, the palm of his hand instantly grew bigger, and five bone claws pierced from the position of the fingers.

Brush!

The enlarged palm pushed away Tony's already heated robotic arm and slashed toward his helmet, and the sharp bone claws pierced straight into Tony's eyes.

Facing Killian's sudden change of attack, Tony didn't react for a moment. However, JARVIS reacted immediately. The moment in which the five bone claws came over, the Iron Man's feet burst into flames, and the huge thrust took Tony quickly out of Killian's attack range.

It is useful for JARVIS to concentrate most of its power on Tony's Iron Man Armor, otherwise, they wouldn't have been able to avoid this attack at all.

Rub!

At the last moment, Killian's bone claw attack made five deep scratches on Tony's helmet. The high-strength alloy used on the Iron Man Armor was almost cut away, showing the sharpness of the bone spurs.

I don't know what the monster-like structures that Killian mutated through Extremis are based on. These powerful lifeform structures cannot appear out of thin air.

Kakaka!

After Tony retreated to avoid his attack, Killian stood still and turned his mutated palm to watch Tony's retreat. And the hole in his chest that was blasted by Iron Man's chest cannon is now undergoing a rapid Recovery under the effect of Extremis.

In a few seconds, the wound that was enough to make ordinary people die instantly has been recovered. Except that the expensive suit was burned with a round hole, Killian had no loss.

"Damn! JARVIS, why does the system suppression still exist!" Killian repulsed from the front, which made Tony a little angry, so he yelled at JARVIS.

"Three, two, one. Sir, we have successfully connected with Stark 1, 2, and 3 satellites, and the network counterattack has begun!" Hearing Tony's words, JARVIS counted down for three seconds and then replied in a serious tone.

Hum!

At the next moment, an invisible data stream rushed down from the sky, directly covering this area belonging to Stark Industries. With three satellites as a backing, JARVIS finally counterattacked the enemy.

However, even if JARVIS has the support of three satellites at this time, it will take a while for him to find the opponent's base camp and fight back. However, if he simply resists the enemy's hacking inside his system then that would be enough.

"System in Recovery, 80%...85%...95%...100%." ??Finally, with the support of three satellites, JARVIS soon drove out Killian's hacking from his system. Now, Tony's Iron Man can show 100% of its combat effectiveness.

Buzzing!

With the full recovery of the JARVIS system's functions, Tony's eyes revealed a lot of translucent light curtains that had been extinguished. The light blue transparent screen illuminates in front of Tony's eyes, and then it was the time for the real Iron Man to appear.

Brush! Brush!

Without saying anything, Tony waved his hand and a few micro missiles were blasted towards Killian. What about the super recovery? What about the super high temperature enough to melt Iron Man Armor? What about the deformable lifeform structure? With the Iron Man army capable of exerting all their power, Killian wouldn't be able to do anything!

Rumble!

Facing the Iron Man, who had fully recovered its combat effectiveness, Killian was directly hit by those missiles. However, before the missile hit Killian, something seemed to have blocked them.

Just when Tony started to counterattack because of the Recovery of the JARVIS system, the other Iron Man on the battlefield also quickly recovered their own strength and began to attack Killian's Extremis fighters from all directions.

Once the Iron Mans were fully able to exert their power, their mobility alone would be enough to abuse these flightless Extremis fighters.

Indeed, if facing them on the ground in close quarters, the Iron Man Armor will be dismantled by the Extremis Fighters, but how could JARVIS choose to fight the Extremis Fighters in close quarters, it only needs to control the Iron Man to attack them from a distance.

Rumble!

For a time, this battlefield has been turned side by side by the fast-flying Iron Man army with various weapons. And, even with the firepower of the Iron Man army pouring, JARVIS could still scan the extreme energy response of the Extremis fighters.

"JARVIS, take Pepper to leave first, I'm worried..." Tony, who had already flown in the air and he looked at the results of JARVIS'S scan, and had a bad feeling in his heart, so he was going to let JARVIS take Pepper to leave here.

Buzzing!

However, Tony didn't even finish his sentence before a wave of unstable energy suddenly spread out of the dust that was smashed into ruins by the Iron Man army.

Dī Dī!

Rumble!

JARVIS only had time to increase the jet propulsion power before a violent explosion occurred from the ruins below, and a powerful shock wave instantly destroyed an area tens of meters in radius.

...

Chapter 508 Disappearance

Rumble!

The shock wave of the explosion swept through several nearby buildings, including the warehouse where Pepper and Deadpool had been hiding. However, JARVIS had already dispatched several Iron Mans to protect Pepper from the center of this battlefield.

As for Deadpool, he has been hiding from the side and preparing to attack Killian and those Extremis fighters. However, what was waiting for him was this sudden explosion.

“Damn! f~k! f~k!!!” Deadpool, whose part of uniform had already been burned by the flames, cursed, and quickly jumped out of the area swept by the explosion.

Rumble!

Under the shock wave of the explosion and the raging flames, the entire warehouse was rapidly collapsing, and the speed of Deadpool’s escape could not keep up with the speed of the collapse of the warehouse. If this continues, Deadpool will be buried alive.

“Hey! Mirage Knight! Where are you? I’m going to be burned here! Aren’t you coming here to save me?!” Not wanting to experience the shame of being buried alive, Deadpool shouted loudly with his hands on the headset.

Since the three satellites and JARVIS were connected, the signal blockage in this area has been broken, so Deadpool can contact Jerry of the League of Defender at this time, and naturally, he had known that Mirage Knight and Spiderman had arrived on the battlefield.

“Haha! Deadpool, I’m here to save you!” Just after Deadpool finished shouting, a voice answered him.

Brush!

Hearing this sound, Deadpool raised his head and looked in one direction. Then, he saw Spiderman swinging in his direction quickly in the collapsed warehouse. With Stark’s technology, it is very simple for him to study some fireproof spider silks, so that Spiderman can adapt to more complex battlefields.

After seeing Peter, Deadpool shut up. If one were to guess who Deadpool likes to see in the League of Defender, then it would be Spiderman. It’s not that Peter is bad towards Deadpool, it’s just that Wade likes to insult and talk during his fight and in normal circumstances but Spiderman Peter is even beyond him.

Therefore, when being with Spiderman, Deadpool tried to put away his special ability. Moreover, Spiderman has more fans than Deadpool, which is a point that Wade is very concerned about. After all, it’s normal for someone to want more fans.

Call!

In the collapsing warehouse, Spiderman rushed towards Deadpool. Seeing Deadpool’s embarrassing look at this time, Peter resisted the urge to laugh out loud.

Because Deadpool’s hero suit has always been made by himself, it cannot be compared with Peter’s Spiderman suit and Lin Rui’s Phantom Suit. Therefore, under the fire, Deadpool’s nude body was almost in front of Peter at this time.

There are many heroes in Marvel World who are of civilian origin, among them, Spiderman Peter Parker is the most famous. However, Peter now has a very good relationship with Iron Man Tony Stark.

So even if he is a civilian, he can get good resources. But Deadpool is different. Although he joined the League of Defender, no one has sponsored this unreliable guy yet. Speaking of which, Deadpool is probably the worst in the League of Defender.

“Let’s go, this warehouse will soon collapse,” Peter spoke quickly while reaching out to Deadpool.

“Huh.” Responded softly, Deadpool had already grabbed Peter’s outstretched hand.

Pū!

“Let’s go!”

Huhu!

After Deadpool caught his hand, Peter found a good angle and shot the spider silk, and soon he took Deadpool to constantly shuttle through the collapsed warehouse.

“By the way, where’s Mirage Knight? Didn’t he come with you? Why didn’t he show up in the fight outside just now? If he had shown up then those guys outside won’t be fighting for so long.” Deadpool asked curiously.

With Mirage Knight’s strength, even if those guys are strong and have that super recovery ability, they should not be Mirage Knight’s opponent. Moreover, Mirage Knight’s strength does not rely on various technological equipment, so this kind of network communication suppression is useless for Mirage Knight.

“Mirage Knight? He seemed to have found something and he asked me to come here first. I don’t know where he was going.” Hearing Deadpool’s words, Peter quickly replied.

“What the hell did he find that was more important than this?” Hearing Peter’s explanation, Deadpool still had some doubts. However, Peter could not answer this question.

Brush!

Rumble!

Finally, with Peter’s help, the two of them finally rushed out of this huge warehouse and escaped the fate of being buried alive, although neither of them was worried about being buried alive. After Spiderman and Deadpool fled the warehouse, the aftermath of the explosion in the center of the battlefield on the other side gradually dissipated.

Iron Man, who had retreated a little distance temporarily because of the explosion, flew back again. Except for the two Iron Man Armor that did not retreat in time and got damaged, Tony suffered almost no loss.

“The power of the explosion is indeed great. Such a person is too dangerous!” Standing on the edge of the battlefield, Peter stared at the explosion site and whispered solemnly.

With this degree of explosion, the temperature in the center is as high as 3,000 Degrees Celsius, even if the defense of the Spiderman suit is strong enough, it wouldn't be able to stop that much heat.

Therefore, if Peter is approached by these Extremis fighters who can self-destruct, he will be instantly killed. Of course, with Peter's responsiveness, he would avoid it when he perceives the Self-destruct of the Extremis Fighter.

"There are still a lot of lunatics in this world." Deadpool, who already knows what's going on with those people, nodded in agreement.

"Then, are we going to help? I don't know if Mr. Stark can defeat those people alone." Looking at Deadpool, Peter continued.

"Help?! You go ahead, I won't go, even if something happens, I can't stand people looking at my half-nude body!" Hearing Spiderman's words, Deadpool shook his head and refused.

"Well, then I'll go ahead." After making sure that Deadpool didn't want to help, Peter rushed towards the battlefield.

Brush!

Watching the leaving figure of Spiderman, Deadpool's eyes flashed. Finally, Deadpool turned around to leave. Today, Deadpool had done what he was supposed to do, and Tony's girlfriend was unscathed. However, just as Deadpool was about to leave, Jerry's voice suddenly came from his headset.

"Deadpool, Mirage Knight seems to be in trouble, I need your help!" This is what Jerry said, and it was this sentence that stopped Deadpool's footsteps.

"Mirage Knight is in trouble? Where is he?" Deadpool stopped and looked a lot more serious, and then asked seriously.

"I only know where he last disappeared. There is no signal from him. I hope you can find him." Jerry's worried voice came from the headset.

"Okay, tell me where, I'll go over and see." Hearing Jerry's worry, Deadpool said calmly.

"Well, go to the right..."

Call!

In the next moment, Deadpool rushed towards the place where Mirage Knight had disappeared under Jerry's real-time prompt.

Chapter 509 Strange

A few minutes ago, after coming out of the Iron Man Armor, Lin Rui was originally going to go straight towards Killian. However, on the way, Lin Rui suddenly noticed a very special fluctuation in the area.

Therefore, after weighing the number of the Iron Man army in Tony's hand and Killian's Extremis fighters, Lin Rui was ready to go and see the place that made him aware of the special fluctuations.

At Lin Rui's current speed, he quickly left the industrial park belonging to Stark Industries following the fluctuation. As Lin Rui got closer and closer to the place where the wave came out, he was convinced that this wave was a Spatial Wave, and it came from the Infinity Stone.

This discovery made Lin Rui very excited. The Space Infinity Stone, the Magic Cube, was lost in the last battle with Hydra. Now Lin Rui has again perceived the Magic Cube's fluctuations, which shows that the Magic Cube is probably nearby.

Da Da~

"For me to find the energy fluctuations of Magic Cube in New York. Could it be that the Magic Cube was teleported here after Red Skull used it to open the space transmission channel?" Lin Rui muttered while slowly searching the area.

Because Lin Rui had told Tony and Professor Charles about the Magic Cube being a very powerful Infinity Stone in the universe, they were also actively looking for the Magic Cube during this period.

But so far, they have achieved nothing. Lin Rui couldn't have imagined that he would find the energy fluctuation of the Magic Cube here, and he couldn't decide if that is a coincidence or not.

By this time, Lin Rui had almost forgotten about Killian and his Extremis Fighters. Compared with Infinity Stone, Killian and his Extremis Fighters are really insignificant. According to the settings in the Marvel movie world, the energy contained in the Infinity Stone at every moment is unlimited.

Obtaining an Infinity Stone is enough for someone to dominate the universe. Of course, that person also needs the strength to withstand the energy of the Infinity Stone.

According to Lin Rui's guess, if an Infinity Stone is exchanged in the system, it can be exchanged for at least One Million Reward Points, which is already the top item value.

Moreover, Lin Rui found out before that he seems to have everything in the System Shop, but it does not have Infinity Stones. Therefore, if Lin Rui gets the Infinity Stone and exchanges it with the system, the reward points he gets may exceed his imagination.

However, the Infinity Stone itself can enhance the strength of the owner, and Lin Rui is also entangled in whether to exchange the Infinity Stone to the system or to wield it himself. After all, One Million Reward Points is enough to upgrade Lin Rui to the strongest he can imagine.

Of course, these are all based on the fact that Lin Rui can get the Infinity Stone, and Tony and others had also agreed with Lin Rui to let him deal with this gem. After all, they are now in an alliance, although this alliance does not yet have an official name.

"Hmm! It's really time to give our alliance an official name." As Lin Rui thought about it, he couldn't help but let his thoughts wander around.

Buzzing!

Just when Lin Rui's thoughts were going everywhere, he sensed a wave of the Spatial fluctuation in front of him. This wave of Spatial Fluctuations was a bit aggressive but was completely blocked by Lin Rui's Phantom Suit.

“En? Right ahead!” Feeling this familiar Spatial fluctuation, Lin Rui’s footsteps suddenly speeded up as he moved forward. Because Lin Rui didn’t know what was going on right now, he didn’t dare to rush over too hastily.

Call!

After going around a low house, Lin Rui couldn’t see clearly what was there, and a huge black figure had already rushed towards him in an instant. Fortunately, Lin Rui had already prepared. He lifted his right hand forward like lightning and an Azura’s sword energy had already been slashed out.

Pū Chick!

Azura’s Sword Energy cut directly from the Black Shadow that rushed forward, and the Black Shadow that had been divided into two halves still hit Lin Rui under the action of inertia. However, Lin Rui had already avoided him. While avoiding, Lin Rui also saw what this Dark Shadow was, and then his brows tightly folded together.

Pū Pū!

When Lin Rui appeared in the other direction, the Black Figure that was divided into two halves fell to the place where he originally appeared. However, even though it had been divided into two halves by the Sword Energy, the Black Shadow continued to twist on the ground, it was as if it would not be able to end its life even if it was divided up.

“What the hell is this thing?!” Lin Rui muttered with a surprised look on his face as he looked at the two black twisted limbs on the ground.

Plop Plop!

At this moment, in front of Lin Rui’s eyes, the thing that was split in half by his sword was still twisting violently. From the appearance, this lifeform looks like an enlarged version of a baby fish.

The shape of this lifeform is similar to that of a baby fish, and it also has palms that are very similar to humans, but it is covered with hard scales. It is quite different from the baby fish, it is at least three meters in length. If this guy is a baby fish, at least it is the kind that has lived for more than five hundred years.

However, Lin Rui, who has seen a lot of miraculous things, would not think that this is a five-hundred-year-old baby fish smuggled from somewhere.

PlopPlop~~

Finally, after struggling on the ground for about a minute, this baby fish-like monster finally stopped moving, and it seemed to be completely dead. However, Lin Rui did not relax because of this.

Because this monster appeared very strange. The Marvel World is very magical and there are all kinds of weird things in it, but this monster is still a little bit beyond Lin Rui’s expectations.

“Does it have something to do with the Magic Cube?” After scanning the dead monster several times, Lin Rui finally spoke to himself.

Then, Lin Rui discovered that the previously obvious Spatial Fluctuations had disappeared. However, since the previous wave of Fluctuations spread from here, then the clue to the Magic Cube must be here. While thinking, Lin Rui closed his eyes and used the Insight Technique to find any detail in this space.

Brush!

“Over there!” A few seconds later, Lin Rui’s eyes suddenly opened and he looked in the direction the monster had rushed over. In the next second, Lin Rui disappeared from the place he was standing at.

Buzzing~

When Lin Rui appeared again, he was already standing in front of a Space Portal that was constantly twisting. This Space Portal looks very unstable, it was as if it was accidentally made by the Magic Cube. The silver space rules cut the surrounding stable space, and the Space Portal is blurred, and it is not known where it leads.

“There is actually a Space Portal here. I don’t know where this Space Portal leads? Could it be that the Monster came from the Space Portal?” Lin Rui began to think about this Space Portal.

Chapter 510 Space

Buzzing~

Just when Lin Rui stood in front of this unstable Space Portal and observed it, thinking about whether to venture in or not, the Space Portal sent out some strong Spatial Fluctuations from time to time. It seems that this space gate will not continue to exist for too long.

“Ahhh, if I don’t take any risks then how would I find the Magic Cube!” After staring at the Space Portal for some time, Lin Rui finally made a decision.

“Jerry, are you there? I found a Space Portal here. I’m going to go in and take a look. Hey, are you there?” Lin Rui, who has decided to enter the Space Portal prepared to speak to Jerry, but the headset seems to be broken, and Jerry at the League of Defender base did not respond.

“Is it broken? There is no time to go back and tell them!” Taking off the headset and looking at it twice, Lin Rui finally threw it aside.

“My luck should not be so bad!”

Brush!

After a low shout, Lin Rui turned into a black shadow and rushed into the continuously twisting Space Portal. After Lin Rui rushed in, the already very unstable Space Portal became more distorted, and it seemed that it would disappear at any time.

Da Da~

Less than a minute after Lin Rui rushed into this Space Portal, a sound of footsteps slowly approached here. Then, Wade, wearing a tattered Deadpool suit, appeared here and saw the twisted Space Portal.

Under Jerry's guidance, Deadpool finally found it. However, as Lin Rui encountered it before, when Deadpool entered this area affected by Spatial Fluctuations, his headset also disconnected from Jerry.

Phoo~

"It seems that Mirage Knight disappeared here. Depending on the situation, he should have entered this Space Portal." Deadpool found the headset that was thrown on the ground by Lin Rui and he muttered to himself.

After discovering this situation, Deadpool quickly turned around and left the area affected by the Spatial Fluctuations. After telling Jerry about the situation, Deadpool returned here again. The corpse monster outside was also seen by Deadpool.

Jerry analyzed the situation through Deadpool's narration and found that the Space opposite the Space Portal is likely to be a very dangerous area. His suggestion is to wait until Tony defeats Killian and then they all can work together to find out what happened to Mirage Knight.

However, this Space Portal was about to disappear, and Deadpool felt that there was no time to wait for Tony to defeat Killian. Therefore, he must go inside the Space Portal and go forward to find Mirage Knight.

Moreover, Deadpool had already told Jerry about the situation here so even if neither he nor Mirage Knight returned before the Space Portal disappeared, then Jerry could go to other people for help.

"Fuck! It was so cool to be a bastard! Why did I decide to become a hero?!" Deadpool muttered helplessly as he stared at the Space Portal in front of him.

Call!

Then, Deadpool closed his eyes and rushed straight to the Space Portal that had shrunk somewhat.

"Ah! It hurts!"

Brush!

With a scream, Deadpool's figure also disappeared inside the Space Portal.

Boom~~Boom!

Not long after Deadpool entered this Space Portal, the Space Portal seemed to have reached its limit, and it burst open after releasing a strong Space Fluctuation. The Violent Spatial Fluctuation directly shattered all the houses and concrete floors in this area, and even the corpse of the monster not far away was shattered to pieces.

Huhu~

A few minutes later, the area that was swept by the Spatial Fluctuations once again recovered and calmed down. The Space's self-recovery ability smoothed everything out. Only the gravel and dust can prove that something had happened here.

...

Call!

Lin Rui, who had rushed into the Space Portal, rolled forward and rolled out of the Space Portal in an awkward pose. This trip through the Space Portal made him feel very uncomfortable.

However, compared to the last time he teleported with Red Skull, Lin Rui who was prepared this time at least maintained most of his strength when he came out.

"I really don't want to experience such a thing anymore! Space Storm is not a joke!" Lin Rui, who was lying on the ground, did not get up and he muttered while laying on the ground.

Had it not been for Lin Rui upgrading the Phantom Suit again after getting a large number of Reward Points last time, it would not be so easy for him to transfer this time.

Dī Dī!

"Detecting changes in the external environment, the Phantom Suit has automatically adjusted to a module suitable for the host's survival." As Lin Rui was resting on the ground, a voice suddenly sounded in his mind. It is the sound of Phantom Suit, which is adjusting its internal environment.

"En? Changes in the External Environment?" Lin Rui was a little puzzled when he heard the voice of the Phantom Suit. In the past, the Phantom Suit would also adjust its internal environment as the external environment changes, but this is the first time that it reminded Lin Rui.

Call!

Then Lin Rui stood up from the ground. However, when Lin Rui saw the sight in front of him, his mouth opened unconsciously.

"Here is!... Where?..." Lin Rui shouted out with a shocked look in his eyes as he looked at the endless forest and the pale red sky.

At this time, Lin Rui is on a small hill. This small hill is one of the many hills present in the area. In front of Lin Rui is an endless forest. Behind him is also a visible grassland.

The forest is separated by the stretch of mountains where he is. If this were the case, Lin Rui would not be surprised, but the sky here was pale red, not the red of the setting sun, but more like pink, and the pink covered the entire sky.

Lin Rui, who has lived on the Earth for so many years, hasn't heard of this kind of weather and he had never seen or heard of the forest in front of him.

"Is there such a beautiful place on the Earth? But, where is the Sun? Even if the Space Portal teleported me to the other side of the Earth, where is the Sun?" Lin Rui, who had come back to himself, found another problem. He looked around in the pink sky but he couldn't find the Sun, and there wasn't even a cloud in the sky.

On the other side of the Space Portal in New York, the current time is close to being night. And here is the daytime, so he should be on the other side of the earth. However, Lin Rui did not think so.

Call!

Lin Rui, who has already become very interested in this place, has already taken out a locator from the Phantom Suit's Pocket Space. However, this locator, which can accurately locate the user's position within five meters of the earth, cannot locate his current position.

If the locator is not broken then it means that Lin Rui is no longer on the earth at this time.

"I did not really teleport to an Alien Planet..." Thinking like this in his heart, Lin Rui has already put on the glasses with multiple detection functions that he just exchanged from the System Shop.

After putting on the glasses, Lin Rui saw a light blue light flashing in front of his eyes, that is, the glasses were scanning the environment here for analysis.

Dī Dī~

Two seconds later, the glasses have analyzed the situation here, and the results are also directly projected on Lin Rui's glasses lenses.

"Damn! This is really not the Earth!" Lin Rui called out directly after seeing the results of the analysis before him.

Lin Rui just wanted to find the Magic Cube through this Space Portal. This time, the Portal had gotten him out of the Earth. If the Space Portal can only teleport in one direction then what should he do if he can't go back to the Earth? Thinking about this, Lin Rui quickly turned and looked at the Space Portal.
