

Marvel 511

Chapter 511 Nerve

Buzzing~

Just when Lin Rui turned and looked at the Space Portal, the Space Portal suddenly twisted violently again, similar to what happened when Lin Rui teleported over not long ago.

“This...is it going to disappear!...” Seeing such changes in Space Gate, Lin Rui suddenly had a bad feeling in his heart.

Call!

However, just as Lin Rui was worried that this Space Portal would disappear, and when he was considering whether to rush in before it could disappear, a red figure suddenly rolled out of it and went straight towards Lin Rui’s feet.

Lin Rui was very vigilant when he saw someone coming out of the Space Portal. However, when he saw clearly who the figure rolling towards his feet was, he became speechless. Because the person who rolled out of the Space Portal is Deadpool Wade Wilson who had followed Lin Rui.

After Deadpool came out of the Space Portal, he just laid on the ground without moving, it was as if he was dead. However, with Deadpool’s abnormal Mutant Powers, the injury he received from Space Teleportation should not take him long to recover.

Therefore, Lin Rui directly stretched out his foot and kicked Deadpool. However, Deadpool still showed no response.

“Damn it! How did I forget about this!” After Lin Rui kicked Deadpool and found that he was still not moving, he finally remembered something.

Call!

Then, Lin Rui quickly took off his mask and put it on Deadpool. This is no longer the earth, and the living environment is far from that of the earth. Although there is also an atmosphere and similar gravity, and many other similar expects, the composition of the air here is different.

In such an environment, even if Deadpool’s Recovery power is strong, there is no way for him to recover, unless he can be as strong as he was in the comics. Therefore, Lin Rui gave his mask to Deadpool. Anyway, his Phantom Suit has its own adjustment function.

Huhu!

“Ahhh! It hurts! I’m dying! I’m dying!” After putting the mask on Deadpool, Deadpool, who could not breathe, took a couple of mouthfuls of breath, and then suddenly shouted.

Brush!

After the scream, Deadpool woke up and then jumped from the ground. Then, he saw Mirage Knight standing in front of him and spoke casually.

“Hello! Mirage Knight!”

Lin Rui: “Hello, Wade...”

Buzzing!

Bang!

After Lin Rui and Deadpool finished their greeting, a strong Spatial Fluctuation suddenly erupted from the Space Portal behind them. The violent Spatial Fluctuations drove Lin Rui and Deadpool directly into the air, and there were countless blood holes on Deadpool’s body that didn’t have any protection.

Then, the Space Portal leading to Earth New York completely exploded in front of Lin Rui and Deadpool who had just flown out.

Deadpool, Lin Rui: “...”

...

A few minutes later, Deadpool, wearing the Low-Level hero suit redeemed by Lin Rui from the System Shop, sat cross-legged in another place on the top of the hill, where the original Space Portal was blown up.

“You’re telling me that that Space Portal that exploded just now had teleported us to another planet? We are no longer on Earth?” Deadpool asked curiously as Lin Rui circled the ruins of the Space Portal not far away.

Call!

“Yes! Don’t you believe it? We are no longer on Earth!” Lin Rui replied helplessly as he returned to Deadpool’s side sullenly.

After Lin Rui’s inspection, the Space Portal has completely disappeared, and there is no possibility of recovery. With that said, he and Deadpool are trapped on a planet that they had no idea as to how far it is.

“We are on another planet! Mirage Knight, don’t you feel excited?!” Seeing Lin Rui’s helpless look, Deadpool asked excitedly. For Deadpool, this experience is unique. This time, he can finally raise his head in front of Spiderman, he is a person who has been on an Alien Planet!

No matter how many fans there are for that little kid, Spiderman still won’t be able to go to an Alien Planet.!

“Wade, do you know our current situation?” Lin Rui asked helplessly when he saw Deadpool’s expression (although there was no way to know if there was any expression on his disfigured face).

“Our situation? We are on an Alien Planet! This is so cool!” Upon hearing Lin Rui’s words, Deadpool replied without showing any worry. It seems to him that coming to an Alien Planet is just as simple as traveling to a place where no one else has been.

“Well, I have obviously lost you! Without that Space Portal, we won’t be able to go back to the Earth. We may have to stay on this planet forever. We don’t know if there are any dangerous Lifeforms on this planet, you have seen that Monster outside the New York Space Portal before.

According to the situation I had just detected, that Monsters on this planet should be just a Worm-type lifeform, the lowest on the food chain. You can imagine what will happen to us if we meet the Predators on this planet?” Seeing that Deadpool was still confused, Lin Rui had to explain the situation to him.

Speaking of surviving on an Alien Planet, especially a planet similar to the earth environment, it is not a problem to increase the defense power of the Phantom Suit with the large number of Reward points that Lin Rui has now saved. However, this strange Planet obviously has its local lifeforms.

If they encounter those powerful lifeforms, Lin Rui can’t guarantee that he will survive.

“Oh! Yes! Mirage Knight, do you have a way for us to get back to Earth?” Hearing Lin Rui’s explanation, Deadpool seemed to understand the current situation, he then raised his head and asked calmly. No one knew if Deadpool is really stupid or if he was acting as he still thinks that Lin Rui can bring him back to Earth under such circumstances.

“What can I do? I can’t just create a Space Gate. I am not Dore.!...” Lin Rui said angrily when he heard Deadpool’s words.

However, Lin Rui stopped talking in the middle of the story, and his thoughts went around in the System Shop for an instant. However, what disappointed Lin Rui is that there is indeed some Space Gate Creating Tools in the System Shop, but the Reward Points he needs to redeem them are not something Lin Rui can afford now.

Moreover, in addition to any Space Portals tools, Lin Rui also looked for items that could be used to send them home. However, the exchange prices for those things are so high that Lin Rui can’t afford it.

It seems that as long as it involves space and time items, the value is relatively high, especially for things like Space Portal Creating Tools that ignore the rules of space.

“Any door? What is that?” Deadpool asked curiously when hearing this word from Lin Rui.

“Nothing, a divine tool that can take us home, but now we don’t have this thing.”

Phoo~

While talking to Deadpool, Lin Rui also sat on the grass. He doesn’t know if this planet is much larger than the earth or smaller. The grass on the ground and the trees in the distant forest are much larger than those on the earth.

However, the atmospheric oxygen content detected by Lin Rui is exceptionally low, which shows that these plants should not be synthesizing oxygen.

“I don’t know if Tony and the others have defeated Killian by now...” Lin Rui muttered while lying on the grass looking at the pink sky.

“Ah! I really want to take Vanessa here! This is a unique dating destination!”

...

Chapter 512 Escape

Brush!

Bang! Huhu!

In the Stark industrial park outside Brooklyn, New York, the battle between the Iron Man Army and the Extremis Fighters is still continuing.

Originally, after JARVIS had the support of three satellites, it had completely resisted Killian's network intrusion and looked for opportunities to counterattack.

It stands to reason that the Iron Man Army which had recovered has 100% of their strength and hundreds of Iron Mans should be able to deal with more than a dozen Extremis Fighters without any problems. However, things didn't go as smoothly as Tony had initially thought.

After the Iron Man Army got recovered to a 100% combat effectiveness, Tony gave Killian and his Extremis fighters a full-powered attack.

But it didn't achieve very good results. Instead, the sudden explosion on Killian's side forced them back. When Tony avoided the power of the explosion and surrounded him again, he found that Killian had disappeared, leaving only the Extremis Fighters.

Moreover, these Extremis Fighters quickly mutated into various huge terrifying monsters under the effect of Extremis Serum, and many of them became monsters that couldn't do anything else than attack everything in sight.

After JARVIS's analysis of these monsters, he found that Killian should have a special technology that can transform the human body without the Extremis. Otherwise, these changes would not be possible with Extremis alone.

After the Extremis Fighters were completely transformed, even the Iron Man Army, which was 100% combat capable, couldn't deal with them.

Because these Monsters that change from humans have very strong defenses, although it is impossible for them to completely block laser weapons, they can still block the impact of ordinary bullets and the explosive impact of micro missiles.

Moreover, although the Extremis Fighters after the "Transformation" are no longer humans, their movements are still flexible, even more flexible than when they were in human form.

Such changes in the Extremis Fighters made Tony inadvertently think of a secret government experiment that he had witnessed a few years ago. An accident occurred during that experiment and a monster was created.

The monster was so powerful that it couldn't be controlled, and its defense was high. Tony has so many high-tech equipments in his hands but he still has no confidence to deal with that Monster.

Compared to the Monster Tony knew, these things in front of them seemed to be defective products. However, even if they are defective products, their strength cannot be underestimated.

At least, Tony has now lost more than a dozen steel suits. Although half of the monsters were also eliminated, this was originally a loss that shouldn't have happened.

Brush!

"JARVIS, how much energy do they have?" Tony asked JARVIS as he flew past a lizard-like monster and fired a laser weapon at it.

"Sir, according to the energy detection, the energy provided by Extremis in their body has been consumed by forty-three percent. However, this test result may not be very accurate, because we do not understand this virus." Listening to Tony's voice, JARVIS quickly replied.

"Extremis? If this is because of the Extremis, then I had really underestimated Killian!" Hearing JARVIS's answer, Tony frowned.

By this time, the strength of the Extremis Fighters had already put Tony's heart under great pressure. If Killian had such a team in his hands then it would be a disaster for his enemies. After all, Extremis Fighters usually don't see any difference from ordinary people.

"Sir, Aldrich Killian is indeed a very talented scientist." Upon hearing Tony's words, JARVIS replied truthfully. Tony had also obtained the arm of an Extremis Fighters before, but he hadn't researched anything from it.

It seems that the Extremis doesn't exist in the two arms without self-destructing, at least Tony didn't find any difference in them.

"By the way, what about Mirage Knight?! Didn't he come here to help? I haven't seen him, where is he? Does he really think that I would deal with Killian?" Not planning to discuss whether Killian is a genius or not with JARVIS, Tony changed the subject and asked.

"Sky's Eye from the League of Defender had sent a message two minutes ago. Mirage Knight seemed to have discovered something else, so he left to check that out." JARVIS answered honestly without minding Tony changing the subject.

"He found other things? Did Killian planned out other traps here?! But why did Killian just run away, didn't he say he wanted to kill me?" Tony asked in confusion when he heard JARVIS's answer.

"Sky's Eye has no news for the time being. However, with Mirage Knight's strength, even if there are any traps, they shouldn't do anything to him." JARVIS, who knows Lin Rui's strength, replied calmly. However, if JARVIS knew that Lin Rui was teleported to another Planet by a Space Portal, maybe it would not say so.

"That's also true. I don't know the limit of Jackson's strength. Now that he has discovered something, I will let him solve it by himself. Let's take care of these annoying monsters in front of us first." Hearing JARVIS's answer, Tony nodded slightly. It seems that Tony is also very confident about Lin Rui's strength.

Brush!

Then, Tony focused on dealing with the monsters who were transformed by the Extremis Fighters. According to the current situation, even if these Monsters all self-destructed in the end, it would not cause much loss to Tony.

As for the rants that Killian left behind, Tony had only heard it as a joke as he had run away from the battle, which made Tony despise him even more. To deal with Killian, Tony had prepared a lot of things, even The Cloak, which had just completed its final experiment, and Tony had put it on.

Rumble!

On the battlefield, hundreds of Iron Mans quickly attacked the Extremis Fighters whose physical strength had gradually declined.

At this time, Tony no longer attacks by himself. He was still a little worried about the Extremis' Fighters getting self-destructed. Anyway, the loss of the Iron Man Army was only money, and the last thing Tony lacked was money.

However, neither Tony, who was flying in the air in the battlefield nor JARVIS, who controlled the area, found anything hidden underground in this area. In fact, long before Killian was discovered by the Insight System, this area was already in a passive state.

A large number of lifeform bombs made by Extremis were placed underground in the entire Stark Secret Industrial Park. As long as Killian controls these lifeform bombs in the dark, not only the industrial park will be destroyed instantly, but the power of this explosion is enough to destroy a third of New York City.

This is Killian's last resort. He wants to use such a powerful explosion to destroy the Iron Man, at the expense of millions of innocent people.

Moreover, such a powerful explosive attack can not only wipe out the Iron Man but it would also wipe out anyone who supports Iron Man, and it will also give the entire world a fright, allowing them to see the power in Killian's hands, which will make his subsequent plans to dominate the world even more easier.

Chapter 513 Discovery

Dī Dī Drops!

Just as Tony concentrated on destroying the Extremis fighters left behind by Killian, Captain Rogers, who was far away at the Headquarters of Washington SHIELD, suddenly received an urgent message.

"En!? Found an Extremis Fighter?" Rogers' eyes suddenly became sharp when he saw the message he had just received.

Rogers, who had been reminded by Tony before, knew that Killian had an internal mole in the core of the government, namely the Vice President.

Therefore, in addition to sending elite agents to lurk around the Vice President to investigate him, Rogers has also sent Daredevil, who had returned from vacation, to ensure the safety of the President.

Although Daredevil is already a member of the Avengers, he has always maintained his own mystery. The outside world still does not know what this hero from the League of Defender really looks like.

Therefore, it is safest to send him to the President. Moreover, although Daredevil couldn't see, it didn't affect his actions at all. Daredevil puts on his sunglasses and follows the President as his new security guard.

Just now, it was Daredevil's message to Rogers that he had noticed the presence of Extremis Fighters beside the President. Originally, due to the emergence of the Mandarin terrorist attack, the security around the President has been enhanced, otherwise, Captain Rogers would not have arranged for Daredevil to guard him.

However, even under such circumstances, there are still Extremis Fighters mingling in. According to what Daredevil found, the Extremis Fighter should have entered as a security guard just like himself.

"For the third plan, we must ensure the safety of the President!" Rogers quickly responded to Daredevil after receiving the news, asking him to ensure the safety of the President.

Although Daredevil is blind, the information is sent through a special form of vibration which will help Daredevil understand it and it is also a hidden help for Daredevil who is next to the President.

"Understood." Daredevil had responded the second after Rogers sent the message.

Card!

Dī Dī~Dī Dī Drops~

However, after Daredevil responded, the connection between Rogers and him was suddenly broken. Looking at the tablet in his hand that signaled to block the message, Captain Rogers at SHIELD headquarters slowly frowned.

"Investigate all the security personnel that has been around the President in the past few days, and report his current location. Also, once you find some evidence on the Vice President, arrest him immediately." After losing contact with Daredevil, Rogers quickly released the mission to SHIELD's intelligence department.

"Yes, Captain!"

The loss of contact with Daredevil must have something to do with the Extremis Fighter, so Rogers needs to find that person. Of course, he is not too worried about Daredevil or his ability to defend the President.

...

Just as Rogers discovered that his connection with Daredevil was severed, Daredevil, who was next to the President, also knew about the situation.

"Did the signal broke? Was it discovered or is he ready to do it?" Standing in a corner of the Luxury Air Force One, Daredevil thought silently.

That's right, the President at this time is not on the ground, but on Air Force One at the airport preparing to rush to the sky. Just now when the plane was about to take off, Daredevil discovered that a person with a lot of energy in his body had also entered the plane.

Daredevil, who had obtained first-hand information on the Extremis Fighters from Lin Rui, quickly determined that the person was someone who had been transformed by Extremis, so he immediately contacted Rogers. However, he only received a reply from Rogers, and the signal here was cut off.

“It doesn’t matter if the signal is cut off, as long as the safety of the President is guaranteed. However, it will be troublesome if the Extremis Fighter self-destructs on the plane.” The plane has started, and Daredevil can only watch the situation as it proceeds.

Of course, besides Daredevil, Rogers had inserted some other security around the President, the US military also arranged an Iron Patriot to protect the President. The so-called Iron Patriot is actually one of the five Iron Mans that Tony and the US military reached an agreement to provide to the military.

At this time, the military assigned one to protect the President. Because of his trust in Iron Patriot, the President dared to fly around giving speeches to appease the people when Mandarin was attacking.

Huhu!

As the plane ran for a certain distance on the runway, the Air Force One finally rushed into the sky. It did not take long for this luxurious plane to fly smoothly at an altitude of nearly 10,000 meters. Because of the recent terrorist attacks caused by Mandarin, mass panic has taken place in people across the country.

As the President, he must go everywhere to give speeches to calm the people who are afraid. And Killian chose to enact his plan on the plane and the success rate is very high. As for how this Extremis Fighter got in, it all points to the Vice President.

Daredevil kept watching the Extremis Fighter when he found him on the plane. However, that Extremis Fighter has not taken any unusual actions and he is behaving like an ordinary security guard.

Moreover, Daredevil discovered that the communication between him and SHIELD was disconnected, but that person should not know his identity. Perhaps the people behind the Extremis Fighters only discovered the SHIELD’s personals on the plane and cut off the connection without knowing who he was.

“I hope he won’t wait for the plane to fly to the high altitude and directly self-destruct. In such an environment, it would not be easy for me to survive much less save the President.” Paying attention to the whereabouts of the Extremis Fighter separated by two cabins, Daredevil thought silently in my heart.

After coming back from his vacation, Daredevil had completely let go of his previous hatred, after all, Kingpin had died by his own hands. And because of his change of mood, Daredevil’s strength greatly increased during the holidays.

It seems that he got some bonuses in practice after he killed his enemy, and his strength has risen by a lot compared to before the vacation. However, even if Daredevil is already very strong, there is no good way for him to get safe from an explosion at such a high place.

Although there was a Hoverboard hidden in the hangar, Daredevil was worried that it would be shattered by the explosion before he could get it.

Huhu~

After a few minutes, the plane finally broke through the clouds and entered a smooth flight at high altitude. At this moment, the Extremis Fighter who had made no other move after entering the plane suddenly moved from his position to the conference room where the President was.

Chapter 514 Iron Patriot

Call!

After noticing the movements of the Extremis Fighter, Daredevil, who was sitting in the corner of the engine room next to the conference room, suddenly stood up. Then, he also walked towards the conference room.

This time, Captain Rogers arranged for Daredevil to be a member of the Special Service Team. Although he could protect the President from a close range, he did not have the right to break into the meeting room without permission.

However, if the Extremis Fighter really wants to attack the President, Daredevil will not care about these rules.

“Mandarin’s terrorist attack has had a huge impact on our country, but the United States will not succumb to these acts of terrorism! We will definitely eliminate these terrorists...” The President spoke from the center of the meeting room.

However, at this time, the President had no other audience in front of him except for his two bodyguards and a Secretary.

“Mr. President, your tone of voice should be a bit more agitated when you say this paragraph. Now our people across the country need your aggressiveness.” After the President had said such a long speech, the Secretary standing by his side came closer and she put forward her own opinions.

It turns out that the President was practicing his upcoming speech.

“Ahem! I know this. But I don’t want to play once or twice on the spot. I need to take a break. This Mandarin has become a pain in the ass.” Hearing the Secretary’s reminder, the President spoke while waving his hands. Then he sat on the chair and reached out to take the cup on the table and drank two sips of tea.

Because a lot of things have happened in the United States recently, the President has been very busy.

Originally, the United States, as the most powerful country in the world, has always claimed to be a great and safe country. However, a series of incidents in the country recently made this American President who had not been in office very long feel very tired.

First, there was a huge change in Stark Industries in the manufacture of the country’s largest arms and weapons: Tony Stark’s Partner Obadiah intended to murder Tony Stark in order to seize power, and finally, the plan failed and Tony had become famous Iron Man around the world.

After the appearance of Iron Man, the President was also happy that the United States has such a Superhero who is willing to protect the American people with a private identity. However, it bothered the President that Iron Man was in a single person's hand.

In addition to Iron Man, Stark Industries also suddenly transitioned to clean energy, which once caused a huge earthquake in the US and even the global energy market. Had it not been for Tony to know the stakes in this, he had already taken care of it, otherwise, the world's energy industry would be hit unimaginably.

Of course, although the President may have a headache because of the internal changes of a commercial arms giant like Stark Industries, it was not really annoying. The most unacceptable thing for the President is the incident that happened in Washington more than two months ago.

If the situation was not finally brought under control, the President very much doubted whether his White House would remain standing. That was the Hydra removal plan that caused the world to know about SHIELD and Hydra. The battle that took place at SHIELD Headquarters was in Washington, not far from the White House.

As the President of the United States, although he does not have the power to directly intervene in SHIELD's internal affairs, he can also use some of his relationships to affect some of SHIELD's internal affairs.

However, the last battle between Hydra and SHIELD caused the president to know that he is a frog at the bottom of the well, and how deep SHIELD's water is and he has only ventured a little bit.

Fortunately, SHIELD took over the handling of Hydra later, otherwise, the President would have had a hard time and his Army would have been sacrificed in vain.

And now that Hydra has been wiped out, the President was planning to relax but he hasn't yet relaxed for two days before another powerful terrorist has emerged. Although Iron Man Tony Stark intervened midway, it also allowed the President to see the powerful transformation Fighters that Mandarin possessed.

Now the President expects Tony and his friends to solve this matter perfectly, otherwise, he may very well directly step down in the next Presidential election. It has not been easy to be the President of this term!

"Although the Soldiers in Mandarin's hands are very dangerous, the technology to quickly recover their body is also very interesting. A few days ago, Oscorp launched a therapeutic gene Serum, which claims to be able to cure most diseases in the world. It can also recover injured limbs. He doesn't know how his Gene Serum compares with the one in Mandarin's hands." The President sitting in a chair and drinking coffee thought silently in his heart about the ability to quickly treat and recover limbs.

This is something that everyone is very interested in, and the President is no exception.

Knock Knock~

As the President was resting in the luxurious meeting room, there were two knocks outside the door.

“Mr. President, this is Colonel Ben.” Taking a glance at the tablet in her hand, the Secretary reminded him.

Colonel Ben, the person who is wearing the Iron Patriot Armor this time, is responsible for protecting the President’s safety during his speeches. As for Tony’s friend Colonel Rhodes, he is currently on the front line with the military to find traces of Mandarin.

“Let him in.” Hearing that it was Colonel Ben, the President quickly got up from his chair and said.

“Yes.” The Secretary signaled the bodyguards standing by the door to open the door.

Card~

Da Da Da~

As the door was opened, the Iron Man Armor painted with the American flag pattern walked in. The person inside the Armor was naturally Colonel Ben. Colonel Ben, who was selected by the military to be armed with the Iron Patriot, must be someone good, otherwise, Tony would have not agreed.

After all, Iron Man’s auxiliary system still needs JARVIS to operate it.

“Colonel Ben, do you need something?” When he walked to Colonel Ben, the President asked with a smile on his face. With an Iron Patriot Armor in front of him, the President felt very safe in his heart.

“It’s nothing Mr. President, I was just a little worried about your safety. It’s better to let me be by your side.” Hearing the President’s words, Colonel Ben replied calmly.

“Worry about my safety? Haha! Thank you, Colonel Ben, but who can threaten me at an altitude of 10,000 meters? You should take off the Armor first, let’s relax with a drink together.” Hearing Ben’s answer, the President said with a smile on his face.

Air Force One was flying high above the United States. The President really didn’t believe that there were still people who could pose a threat to himself under such powerful control and hegemony of the United States. Of course, he ignored human errors.

“This...Okay.” Listening to the President, Colonel Ben wanted to take off his Armor and had a drink to relax, but in the end, he refused. As an excellent soldier, Colonel Ben knows his mission very well.

“That’s a pity, if you are not at ease, then you can stay here with me for the next half-hour schedule.” Hearing Colonel Ben’s refusal, the President did not force him and said with a smile on his face.

“Yes.”

Dī Dī!

Just as Colonel Ben agreed, a rapid siren suddenly sounded from inside the Iron Patriot Armor.

Chapter 515 Start

Buzzing!

Boom!

Then, the wall on the side of the conference room was violently torn apart from the outside before the President and others could respond. For a time, the broken alloy plates flew in all directions. There was also panic in the meeting room. With the help of two bodyguards, the President quickly avoided the flying items and hid in the corner.

But Colonel Ben, who received the reminder from the Armor immediately identified the culprit who caused this situation. It was a person whose whole body was marked with a high-energy response. At this moment, the human body with a high-energy response had already passed through the opened hole and rushed towards them.

“Fuck, there really is a hidden attacker here!” Seeing the attacker rushing towards the President, Colonel Ben screamed and instantly activated the Iron Patriot’s weapon system to stop him.

Call!

However, just when the assailant was about to be overtaken by Colonel Ben, he suddenly stopped, and then quickly turned to face the Iron Patriot who had already rushed in front of him.

If Colonel Ben had very detailed information about the Extremis Fighter, he would definitely recognize who the bald guy in front of him was. Because, this guy is Killian’s right-hand man, Savin, who almost injured and killed Happy before.

“Heh...” Faced with Colonel Ben, Savin showed a disdainful expression on his face. Then, a red light emerged from his body, and he raised his hand and struck the Iron Patriot Armor.

Huhu!

“This is?!...” Seeing Savin’s expression and the red glow in his body, Colonel Ben was a little confused, but the next moment, his fist and Savin’s fist banged together.

Buzzing!

The Iron Patriot’s fist and the human fist banged against each other, and it was expected that the attacker would be beaten by the patriot.

But in front of the surprised expressions of the President, the Secretary, and the two Bodyguards hiding by the side, the fist of the attacker and the fist of the Iron Patriot were firmly locked against each other, and the attacker did not even step back.

“You are!... Mandarin’s transformed fighters!” Seeing the red light emerging from Savin’s body, and feeling the heat and power transmitted from the steel fist, Colonel Ben’s expression became sharp as he spoke.

Hearing Colonel Ben’s words, the President and the other three people on the side rushed towards the door of the conference room with a look of horror. The transformed soldiers in Mandarin’s hands are all suicidal men who can self-destruct. The President will not take the risk by continuing to hide here.

“Haha, so what if you know? Do you think this broken armor can really protect you?” Savin was not worried at all when his identity was revealed and said disdainfully.

Call!

When Savin said this, Colonel Ben had also activated the fire system on the Iron Patriot Armor, and in the next second, a small Rocket projectile would directly hit Savin's face. With the defense power of the President's Air Force One, the explosive power of these small Rocket bombs is not enough to cause any major problems with this aircraft.

If the guy in front of him is allowed to self-destruct, then the Air Force One will likely disintegrate directly at an altitude of 10,000 meters.

Buzzing!

However, just as Colonel Ben activated his firepower to kill the terrorist in front of him, there was an instantaneous flow of heat from Savin's fist. Tony updated his new Iron Man Armor with ceramic materials to insulate it, but the Iron Patriots provided to the military have not been updated so quickly.

Therefore, the intense heat flow from Extremis directly penetrated into Colonel Ben's Patriot Armor. In an instant, the entire Patriot Armor system was paralyzed, and the small missiles that had already been launched were stuck in the missile nest and failed to get out.

"You just stay aside!" Savin, who instantly destroyed the Patriot Armor spoke while reaching out and grabbing the Miniature Arc Reactor on the chest of the Iron Patriot Armor.

Pū chick!!

After melting away the alloy armor on the outside of the miniature Arc Reactor, Savin grabbed it with one hand and pulled it out. In this way, this Patriot Armor is almost completely scrapped.

Huh~pap~

The system was destroyed, the core Arc Reactor was taken away by Savin, and the Patriot Armor finally fell hopelessly in the corner. As for Colonel Ben inside it, his fate now lies in Savin's hands.

However, Savin seemed to not care about the person inside the Patriot Armor as he had already gone to the President's side after taking care of the Patriot Armor.

Bang bang bang!

The door that could be opened instantly as long as the identity was verified could not be opened at this time, but the position where Savin broke in before was blocked by him. The President, the Secretary, the Bodyguards were squeezing in horror at the door while looking at Savin.

Da Da~

"What do you want to do?!" Facing Savin's approach, the President asked while putting a brave look on his face. At this time, even if the two bodyguards next to him rushed up, it would be useless. They had already seen the fate of the Iron Patriot Armor.

"What do I want to do? Mr. President, don't you know that by now?..." Facing the President's question, Savin continued to approach with a smile on his face.

The reason why the mission to assassinate the President was given to Savin was because it needed to be foolproof. Savin was one of the most successful people who were transformed by Extremis besides Killian.

After the death of the President in front of him, the Vice President, who has been hiding behind the scenes, can take advantage of the situation. Then, Mandarin's plan would be successful. At that time, external terrorism will unite the controllers within the United States, and the entire country will be theirs.

Boom!

Facing Savin's constant approach, the two bodyguards stopped in front of the President and they started to fire from their guns. Although they knew that firing their guns at him might not have any effect, but that is all they could do at this moment.

However, the result is destined to be disappointing.

Facing the gun fired by the bodyguards, Savin didn't even bother to dodge them. His body that was shot by the bullets, even the gunshot wound on the forehead quickly recovered under the red light of Extremis. Of course, that's because the bullet didn't penetrate Savin's head, otherwise, the Extremis Fighter would not survive.

"Ohh, you just signed your death certificate!" Having reached the President and others, Savin directly raised his hand towards the two bodyguards. As he raised his hand, Savin's arm was rapidly deforming, and when he swung it out, his entire arm had doubled in its size.

Pū Pū!

Unsurprisingly, the two bodyguards who had experienced many battles were pushed away by Savin with one move, and no one knew whether they were alive or not.

Next, Savin continued to wave his monster arms towards the president.

Chapter 516 Vs

Boom!

Just when the mutated palm of Savin was about to touch the face of the President, the closed door behind the President was suddenly violently opened from the outside. Then, a man wearing an army uniform and big black sunglasses rushed in.

Brush!

After the man broke open the door and rushed in, he went straight to Savin's direction and rushed in. At the same time, among the debris of the alloy door, a cold light mixed in the debris drew towards Savin's huge deformed palm.

Boom!

"Ah!~~~~"

With a scream, the President and Secretary rolled directly to a corner. As for Savin, he had retracted his mutant palm at this time, and stood two steps back and stared at the person who suddenly appeared in front of him.

Standing in front of Savin and the President and Secretary stood Daredevil, wearing sunglasses and holding his current special weapon in his right hand: An Alloy rod with unknown functions.

“Mr. President, are you okay?” Stopped in front of the President, Daredevil asked lightly without turning around.

“Yes!”

Even the two Bodyguards he trusted the most could not stop the attacker in front of him but the soldier in front of him was able to break the alloy door and force the attacker back.

The President knew that Daredevil was not an ordinary guard soldier. After contacting the recent transfer of some personnel around him, the President almost guessed where the soldier with sunglasses in front of him probably came from.

“If it’s okay with you, I would ask you to go out and leave the situation here to me.” Daredevil continued after getting the president’s answer.

“Okay, be careful!” The president agreed and hurriedly got up from the ground to rush out of the door opened by Daredevil, and of course, the Secretary is also followed behind the President.

Call!

“You want to save the President, who the hell gave you the permission to do that?!” Seeing Daredevil talking calmly to the President while ignoring him, Savin leaped towards Daredevil with a low roar.

Facing Savin’s attack, the expression on Daredevil’s face remained unchanged, but he quickly twitched the stick in his hand. In front of the huge mutant palm that Savin waved over, a defense made up of dark silver stick shadows stopped right in front.

Pū Pū Pū!

As Savin’s mutated palm swung into the shadow of the stick, a rapid and violent hit sounded in the almost destroyed conference room. Then, the stick shadow in Daredevil’s hand seemed to be unable to stop Savin’s mutated palm, and Daredevil retreated as the stick shadow quickly dissipated.

However, because of Daredevil’s obstruction, the President and the Secretary have finally escaped, and there are some people outside who the Vice-President can’t control who can take care of the frightened President.

Boom!

Finally, Daredevil, who had been forced to retreat by Savin, retreated to the corner and was unable to retreat anymore. And at this moment, the red light in Savin’s eyes lit up instantly, and another hand, which was the same as his other mutated hand, pulled from the other direction and struck towards Daredevil’s waist.

With the power of the Extremis Fighter, even Daredevil wouldn't be able to stand this attack.

Brush!

However, just when Savin thought he was going to succeed, the alloy rod that was blocking his front palm attack instantly stopped turning. Daredevil's freehand, who could not stop Savin's attack just now, was also placed in the center of the alloy rod.

In front of Savin's somewhat surprised gaze, Daredevil's hands holding the long rod separated instantly. As Daredevil separated his hands, the alloy rod was also divided into two halves. This alloy rod turned out to be a spliced ??weapon. Then, a cold light stroked towards the hand that Savin had drawn.

Huh!

Click~

The cold light flashed, and Savin's mutant arm that was about to sneak attack Daredevil was cut directly from the position of his wrist. The scales covering the mutant arm that can block ordinary bullets couldn't block Daredevil's short blade drawn from the stick, and he doesn't know what material his weapon is made of.

At this time, the long stick in Daredevil's hand had become two somewhat short double blades.

Savin's arm was chopped off but he seemed a little unresponsive. And Daredevil won't give Savin much chance at this time, after cutting off his mutant palm, he then waved his two blades and slashed them towards Savin's body.

Based on the information Daredevil has, Extremis Fighters can be killed quickly as long as he can destroy their heads.

Buzzing~

When Daredevil swung his blades and attacked, Savin, whose arm was in recovery, had already reacted. However, at this time, he didn't dare to continue to stop the blades in Daredevil's hand with his previously very confident mutant palm.

Faced with Daredevil's attack, Savin, the almost perfect Extremis Fighter was forced to step back. At this time, their situation just turned the other way around.

Pū Chick!

Finally, Savin had several holes in his body as a result of Daredevil's attack. Although such a wound does not matter to Extremis Fighters who have their powerful recovery capabilities, but if this continues, Savin may really be killed by Daredevil.

After all, after being transformed into Extremis Fighters, they have abandoned the traditional thermal weapons and used their bodies as the most powerful weapons. And now Savin is restrained in the face of Daredevil, who uses double blades, which is something he didn't expect.

“Since I can’t stop you, then I will stop trying. Let’s see who can persist and survive in the end!” After Daredevil cut a huge hole in his right arm again, the red light in Savin’s eyes rose sharply. Then he stopped and backed away, and slammed into Daredevil ignoring the blades.

Call!!

Facing Savin’s counterattack, Daredevil did not back down either, but while maintaining his blades in their position, a layer of energy that was invisible to the naked eye was stimulated from Daredevil’s body.

It was the Internal Energy that Daredevil had cultivated for so long. As a person with the Marvel World protagonist aura, Daredevil is only cultivating the Low-Level Cultivation Technique, he already has a considerable amount of Internal Energy in his body.

Pū Pū Pū!

Boom!

Under Savin’s reckless effort, Daredevil directly cut off his two mutant arms. However, this time, the amputated arm exploded in a burst of red glow after being separated from Savin’s body, like two miniature bombs.

Being affected by the explosion at close range, Daredevil’s strong attacking momentum just now was finally stopped, and the two swords in his hand swung into a dark silver shield to block the explosion, and he kept retreating under the power of the explosion.

Call!

By the time Daredevil stood firm again, he suffered no other injuries except for the burnt military uniform. This result surprised Savin who was not far away as this meant that his attack just now had no effect at all.

Chapter 517 Death

Kaka!

However, although Daredevil was not injured in the explosion because of his Internal Energy protection. But the wall of this conference room was seriously damaged by such an explosion, and the body nearest to the explosion had cracked.

“The worst result has happened!” Feeling the damage to the cabin, Daredevil, who stood firmly opposite Savin, thought helplessly.

Faced with an Extremis Fighter who didn’t use heat weapons, and he had ruled out being injured by self-destruction at close range, Daredevil now doesn’t fear people of such strength.

However, the current battle location is very special. It is in Air Force One. If Savin’s desperate self-destruct blows up the plane, Daredevil cannot guarantee that he can save the President. It was also in Air Force One that Savin could not completely mutate into a monster.

“It seems that you are very worried about the situation of the plane! Also, although I don’t know who you are, it is obvious that you can’t fly. If the plane is destroyed, you will fall to your death. As for the President and the others, I wouldn’t even need to kill them personally. Because, even if I fall from a height of 10,000 Meters, I won’t die!” It seemed that when Daredevil felt the helplessness in his heart, Savin, who was surprised that Daredevil was not injured in the explosion, suddenly laughed and said.

Although Savin said so, he wouldn’t really self-destruct the plane until the last step. On the one hand, he can’t really guarantee that he can recover from a fall from a height of 10,000 meters. After all, the kind of lifeform tissue he got that could mutate specifically was still too few.

In addition, even if Savin could survive after falling 10,000 meters, there would be military people waiting for him on the ground. Although Mandarin has disrupted the network of the Air Force One trip this time in order to get Savin to kill the people on the Air Force One, it would be too stupid for the Military to not react by this time.

Therefore, Savin failed to kill the President and he had just broke the Iron Patriot, and he was now left with the cracked Iron Patriot, which already put him in a very bad situation.

“Hehe, really?” Daredevil suddenly raised his head and responded when he heard Savin’s words. Then, the right hand that had been tucked away at his side was thrown out in an instant, and the short blade left behind a cold light as it shot towards Savin’s head.

Shout!

“Huh!” Although Savin wanted to get Daredevil to lower his guard just now, he didn’t relax his vigilance. He was already prepared before Daredevil attacked, and he quickly deflected his head when the short blade shot over.

Pū!

In the next moment, Daredevil’s short blade rubbed Savin’s head and pierced into the cabin wall behind him, cracking the cabin wall that was already covered with scars.

Huh!

However, just when Savin was getting relieved, a white light suddenly shot out of the corner of the meeting room, directly hitting Savin’s head that had turned away. Judging from the shape of this light, it turned out to be a laser attack!

Chi Chi!

Under this unexpected laser attack, a hole of about three centimeters in diameter was penetrated in the center of Savin’s head. And Savin’s expression instantly freezes at this moment, and there is some red light in the hole in his head that is trying to repair Savin’s destroyed brain.

However, without the control of brain consciousness, the Extremis did not have enough consciousness to repair the brain. So, after the Extremis gradually inactivated, the powerful Extremis Fighter Savin died under a laser energy attack.

Call!

Two seconds later, Savin's body fell. So far, Mandarin's plan to assassinate the President completely failed. After Savin fell to the ground, Daredevil silently released the blade in his left hand. Facing the Extremis Fighter, Daredevil couldn't guarantee that he would not come back to life.

However, fortunately, the information he got was correct, after getting their head pierced, even the Extremis Fighter could not survive.

Then Daredevil turned slightly and looked in the direction where the previous laser attack has come from. There, a robotic arm was slowly lowering. It turned out that the laser attack just now came from Iron Patriot, which should be abolished. Although Savin destroyed the Iron Patriot and trapped Colonel Ben in it.

However, Daredevil and Savin have fought for so long, and the system of the Iron Patriot has been recovered. Moreover, although the core Arc Reactor was taken away, there was a little energy left in the Iron Patriot Armor for it to survive.

So in the end, Colonel Ben and Daredevil cooperated and killed Savin in one fell swoop. Although Daredevil was not afraid of Savin, if the fight continued, this Air Force One would obviously have been destroyed, and the President would have been in danger.

Daredevil also deliberately attacked Savin from the front after he noticed the movement on Colonel's side, so he attacked Savin in a way that he wouldn't notice the movement on Colonel's side.

Da da da!

After Daredevil teamed up with Colonel Ben to kill Savin, the President's guards who had been hiding outside the conference room finally rushed in.

When Daredevil broke through the door and rushed in, they still wanted to stop Daredevil, but then the President fled out embarrassingly and asked them not to take any casual actions to stabilize these people. Now, there was no movement in the conference room, and the President let these people rush in to see the situation.

"Hiss!~~" The guards who rushed into the meeting room took a breath after seeing the situation in the meeting room. They are at an altitude of 10,000 meters. If this meeting room had blown up, then the plane would have crashed.

"Colonel Ben! Are you okay!?" After the initial surprise, several people who were obviously military personnel shouted nervously and ran towards the position where Colonel Ben had fallen.

As for Daredevil, no one around him came to ask anything. Because these people obviously know that this guy with an explosive force does not belong to the President's side or the military's side, most people here will not take the initiative to intervene in his matters.

But at least, they are certain that the guy with sunglasses and a short blades dies not have bad intentions. And Daredevil didn't want to explain anything, anyway, his mission has been completed.

Just as these guards proceeded to dispose of Savin's body and called for professionals to make emergency repairs to the damaged bulkhead, the President also came into the conference room again under the protection of several strong guards.

The President did not care about Colonel Ben who killed Savin in the end but went straight towards Daredevil.

"Hello, Daredevil. Thank you very much for the help of SHIELD this time. Although I knew before that SHIELD's newly formed Avengers is a team composed of very strong individuals, but this time, I saw an Avengers with my own eyes. You are quite amazing!" The President walked towards Daredevil and he had already recovered his demeanor as a President, and he looked at Daredevil and said seriously.

Just now, the President had also known through his own channels that the soldier in front of him who had saved him turned out to be someone who had been sent by Captain Rogers of SHIELD to protect him. The President still knows some recent changes within SHIELD.

Although the President is also afraid of SHIELD's power, as long as they do not violate his rights, then he will support this organization dedicated to protecting the world.

"No thanks is necessary, this is what I should do. Also, Mandarin may attack you again. Therefore, I will temporarily lurk around, and hope that you will not disclose this situation." Facing the President's politeness, Daredevil nodded and replied.

"Of course!" Hearing Daredevil's words, the President agreed with a smile on his face.

Chapter 518 Eruption

Rumble!

Just when Daredevil took Captain Rogers's mission to protect the President, the battle in Stark Industries Park in the suburbs of New York was still ongoing. After the remaining Extremis Fighters mutated into various monsters, their attack power and defense power have also increased a lot.

Speaking of which, if the cabin of Air Force One had not restricted Savin's transformation, he might not have been restrained by Daredevil.

However, even if those Extremis fighters become powerful monsters that can be transformed like Hulk, they do not have the strength of Hulk. Faced with the attacks of hundreds of Iron Mans, these Extremis Fighters will not last long.

Brush!

In a firepower net, a flexible red-figure quickly shuttled among the Monsters. After Mirage Knight and Deadpool were gone, the only member of the League of Defender who was still helping Tony on the battlefield was Spiderman.

With Spiderman's flexibility, Peter can also inflict considerable damage on the transformed Extremis Fighters in such a battlefield.

No one should underestimate the Spiderman suit Tony equips Pete with, it is a single-soldier combat suit comparable to the Iron Man Armor. And it was made entirely based on Peter's characteristics, and it can give full play to Peter's strength.

If it weren't for the chaos on the battlefield, Peter would have liked to be able to fight alone with an Extremis Fighter.

Shoo!

“What the hell did Jackson find? Why hasn’t he come back yet? He is not chasing after Killian, right?” Peter thought in his heart while launching a powerful arc spider web.

Although Jerry knew where Lin Rui went and where he disappeared, he had asked Deadpool to check it out. Although Deadpool has no news now, Deadpool sent a message back to Jerry before disappearing.

He had found a Space Portal. So, now Jerry knew that Deadpool and Mirage Knight should have passed through the Space Portal and left the area. In order not to disturb Spiderman’s battle, Jerry didn’t tell Peter the news.

Moreover, although the Space Portal is very magical and it is like something that only appears in science fiction movies. However, since joining the League of Defender, Jerry has also seen a lot of things that he could not believe or think that they were possible before. Space Portals, Mutants that could control elements and minds.

Moreover, Mirage Knight passed through an unstable Space Portal in a battle some time ago, so this time Jerry knew that Mirage Knight and Deadpool passed through the Space Portal and was not so worried.

Buzzing!

Just as Peter was muttering Lin Rui’s whereabouts in his heart, his figure that was flying in the air suddenly stopped, and his flying posture fell into a trance and he directly fell towards the ground. Fortunately, Peter stabilized his body before landing and did not hurt himself.

“Danger! Great danger!” Feeling a little embarrassed, Peter yelled loudly in his heart, ignoring the Extremis Fighters not far away.

Just now, when Peter was flying in the air, the Spider-Sense that had been warning Peter of danger suddenly and violently reminded Peter that a huge danger was coming. Moreover, the danger this time is stronger than Peter encountered before.

“Danger! Where did it come from?!” While escaping quickly, Peter judged the source of the danger based on his senses.

“En!? Underground!?” Finally, Peter, who had been running realized that only when he jumped upstairs would the sense of danger diminish a little.

“Mr. Stark! There is a huge danger underground! We need to get out of here immediately!” After judging that the danger came from the underground, Peter quickly fled and connected with Tony to tell him the situation.

“Danger from underground? JARVIS, can you detect it?” After hearing Peter’s words, Tony, who was commanding the Iron Man army in mid-air, also took it seriously and asked JARVIS to scan the underground directly.

Dī Dī Drops!

“Danger! Danger! Retreat now!” Just as Tony was waiting for the results, JARVIS’S voice came from the Iron Man Armor.

Brush!

Then, without waiting for Tony’s control, the power system armed in Tony’s Armor instantly activated by 100%. At the next moment, JARVIS had already rushed towards the sky with Tony quickly, JARVIS acted as if there was something below that could threaten Tony who was under heavy protection.

Of course, while taking Tony towards the sky, JARVIS also arranged an Iron Man Armor to pick up the fleeing Spiderman and rush towards the sky. If Peter was allowed to run by himself, he would not be able to get out of this dangerous area.

Buzzing!

Just when JARVIS took Tony and Peter into the sky for less than two hundred meters, there was a roar from the underground of this Stark Industries park. Then, as if there was a strong earthquake, the ground in the whole area shook, and countless cracks were created in the ground.

With the creation of those cracks, the underground movement seemed to have become overwhelmed, and countless explosions and fires poured out from all underground in this area. Killian’s secretly arranged attack was finally released, and it was powerful enough to completely kill anything in its range!

Buzzing! Rumble!

Tony, who was rushing towards the sky, was still staring at the ground. From his perspective, the area below the Stark Industries park seemed to be experiencing the end of the world.

The lifeform bomb researched by Extremis as the main raw material is more powerful than other bombs, destroying all buildings on the ground in an instant. As for the Extremis Fighters who are still alive, they all self-destructed, filling in some movement for this explosion.

“JARVIS, can we escape the scope of the explosion?” Tony, who was rushing towards the sky, asked seriously as he watched the blast wave from below quickly sweeping around.

Although JARVIS had already fled with Tony and Peter in the first place, Killian was really cruel this time, and the scope and power of the explosion was too great. Once the special shock wave generated by the Extremis explosion catches up with Tony, he and Peter will suffer unknown damages and they might even get killed.

“There is a thirty-six percent chance of getting out of the explosive power center.” After Tony asked, JARVIS quickly gave a bad answer.

“We were really careless! No wonder Killian ran away at the beginning, he had this planned out from the very beginning!” Hearing JARVIS’s answer, Tony thought bitterly.

Seeing the explosion below that continued to spread outward, Tony felt very uncomfortable. If Killian was just dealing with Tony, he could just clean up afterward. But this explosion is obviously not just for Iron Man. If all the power of the explosion is released, according to JARVIS’s prediction, New York City will suffer unimaginable destruction!

Chapter 519 Defense

Huhu!

With the complete explosion, this industrial park belonging to Stark Industries has been completely destroyed in an instant. The power and vibration of the explosion from here were also transmitted to a far place at the same time.

A few seconds later, the entire New York felt the ground vibration. Someone could see the fire in this direction at a distance. At this moment, panic slowly spread.

“Damn It! We can’t escape! Half of the innocent people in New York City will be killed by this explosion!! Damn you, Killian!” Peter who retreated behind Tony also saw the shock wave of the explosion that had caught up behind him.

His Spider-Sense has not stopped warning him. But what is most annoying to Peter is that Killian’s explosion not only destroyed the Stark Industries site but also involved half of the innocent people in New York City.

“If Jackson was here...maybe he can do it! Where did he go?” Peter, who has been unable to do anything about the explosion at his feet, couldn’t help but think about Jackson. As for his own safety, it is not his decision now.

Shoo!

While Peter hated Killian in his heart and felt helpless with the current situation, the Iron Man army who had retreated with him suddenly stopped fleeing and hovered in mid-air.

“En?” Peter was very puzzled when he noticed the Iron Man army floating in the air.

Just as Peter was about to ask Tony why he didn’t let these Iron Man continue to retreat, the Iron Man army that had gathered together quickly rushed out in all directions. Looking at the direction these Iron Man troops rushed out, it happened to be the surrounding area where the explosion was spreading outward.

From a high altitude, hundreds of Iron Mans rushed towards the center of the explosion like moths to a flame.

“Does Mr. Stark have a way to stop this explosion?!” Seeing the direction that Iron Man Army had rushed out, Peter’s eyes lit up with hope. After all, in Peter’s heart, Tony Stark is also a very admirable figure.

Shoo!

“JARVIS, no need to care about the loss, give it everything, we must stop this explosion! If the power of the explosion really rushes into the city, then I will become the world’s biggest sinner!” Peter looked at the Iron Man who rushed out, while he was feeling puzzled, Tony, who was above his head, gave orders to JARVIS with a sharp look in his eyes.

“Yes, sir!” As promised, JARVIS activated a hidden functional module on the latest batch of the Iron Man Armors.

Buzzing!

As JARVIS replied to Tony's order, a wave of Fluctuations suddenly spread from the Iron Man Army who had plunged into the center of the explosion. Those Fluctuations seemed invisible, but the surrounding Force Field changed because of them.

That's right, Tony added the kind of Force Field weapons he got from Hydra on the new batch of Iron Man Armors. When Lin Rui was accidentally caught by Hydra before, these Force Field weapons were responsible for attacking him.

Buzzing!

With this special Force Field Fluctuation spreading from hundreds of Iron Mans, the Force Field Fluctuations from the nearby Iron Man quickly united them together. The combined Force Field not only increases the area covered by it, but also the strength of the Force Field.

If these Force Fields issued by Iron Man are all fused together, an inverted bowl-shaped Force Field area can almost be constructed in midair. It seems that Tony intends to use this method to change the Internal Force Field in some areas to prevent the transmission of the power of the explosion.

Pū Pū Pū!

However, before the Force Fields issued by these Iron Mans were fully integrated, the shock wave of the explosion had arrived. As soon as they touched, the dozen Iron Man closest to them were directly destroyed by the shock wave of the explosion, which shows the tremendous power of this lifeform bomb.

However, although the Iron Man Armors were instantly destroyed, the shock waves of those explosions were still affected when they entered the Force Field area. Although these Force Fields could not stop the shock wave of the explosion, they could at least consume some of its energy.

Pū Pū Pū!

In just an instant, more than 30 Iron Man Armors blocking the front of the blast wave had already been lost. Looking at the current situation, even if all these hundred Iron Man Armors were destroyed, it might not be able to weaken one ten-thousandth of the power of the explosion.

Hum!

However, just after the Force Field area was broken through one after another, a special kind of fluctuation came out again from the ten Iron Man Armors behind them. This time, the fluctuations released by the ten Iron Man Armors were different from the Force Field, it was rather a Spatial Fluctuation of light blue light.

If Lin Rui were here, he would definitely be able to see that the Spatial Fluctuations of these light blue rays came from the power of Magic Cube, that is, the power of the Space Infinity Stone.

In the previous final battle against Hydra, Lin Rui interrupted an attack by Hydra using Magic Cube energy in order to prevent Magic Cube energy from attacking the outside SHIELD forces and Tony's Iron Man army.

The remaining Magic Cube energy from that attack dissipated a lot in that square, but some of it was inexplicably absorbed by the Iron Man Armors worn by Peter and Lin Rui.

This incident was discovered by Tony accidentally later. After studying the Special instruments of Hydra for a period of time, Tony was also able to use the small energy of the Space Infinity Stone.

But because the Space Energy is too little, Tony can only arm this special space equipment on ten Iron Man Armors. And now, all the Space Energy has been used. It can be said that in order to prevent the explosion in front of him, Tony has taken out everything.

Call!

The energy from the Space Infinity Stone quickly spread out under the action of special equipment, and it quickly formed a light blue space barrier with the ten Iron Man Armors as the center.

The area of ??this Space Barrier is not very large, but it is already the most that Tony can do at this time. Moreover, this Space Barrier can only block the explosion in one direction, which is also the direction of New York City. If he could choose, Tony would of course minimize the direct losses.

Rumble!

Finally, after breaking through all the Force Field areas, the power of the explosion continued to spread out with little reduction. In the direction toward the center of New York, a light blue Space Barrier blocked the explosion.

“Be sure to stop it! Please stop it!” Peter, who also saw the light blue barrier that was made out of space energy, kept praying in his heart, even though he had also expected it when those Force Field weapons appeared just now.

Call!

Chapter 520 Interception

Rumble!

Finally, in front of the nervous gaze of Peter and Tony, the blast wave that swept toward the center of New York once again hit the light blue Space Barrier. This time, the light blue Space Barrier was not destroyed instantly like the Force Field area just now but withstood the spread of the explosion shock wave.

However, the Space Barrier that was originally perpendicular to the ground also quickly dented under the impact of the shock wave, looking like a light blue transparent glass that was burned into an arc.

Dī Dī Drops!

“Sir, although the Space Barrier can block the shock wave of this explosion, our device can no longer hold on.” Just when Tony’s eyes showed a hint of joy, JARVIS’s voice suddenly reminded him.

Because the Space power is much higher in level than the shock wave of this lifeform bomb, the Space Barrier can block the shock wave of the explosion. However, the problem is the Ten Iron Man Armors

that is running the Space Barriers. The Space Barriers can continue to hold on, but these Iron Man Armors can no longer hold on.

Boom! Bang Bang Bang!

Just after JARVIS spoke, the Space Barrier that had been blasted into a balloon by the shock wave of the explosion suddenly sounded out with several consecutive explosions, and the Iron Man Armor acting as the core was destroyed. Then, the Space Barrier that could have persisted suddenly shattered into several pieces.

After the shock waves that had been blocked for a while were released, it rushed past, and the remaining Iron Man Armors were destroyed in an instant.

Without the space device on the Iron Man Armor, the light blue Space Energy quickly dissipated in front of the shock wave of the explosion. At this point, apart from the Iron Man Armor armed with Tony and Peter, Tony's Iron Man army was completely destroyed.

And the power of the explosion below didn't seem to weaken much, and Tony's faith that had always been firm in his heart was shaken again.

Dī Dī Drops!

Just as Tony was thinking about the tragic consequences of this explosion, a harsh siren came from inside the Iron Man Armor. It turned out that the shock wave of this explosion had also caught up with Tony.

However, Tony didn't care much about himself at this time. At any rate, he still has the protection of the Iron Man Armor, and the protection of the newly developed Cloak, he would only be injured at most. However, the innocent people in New York will not be so lucky.

Call!

In the next moment, the shock wave from below had already hit Tony and Peter's Armor. Under JARVIS's constant adjustments, he tried to make Tony and Peter suffer the least amount of damage. However, the Iron Man Armor was quickly damaged under such a blow. Once the power system loses too much, Tony and Peter will still be in danger.

Squeak Squeak Card!

Tony's expression was calmer as he listened to the sound of mechanical damage coming from all over the Iron Man Armor. At this time, Tony was already wearing a red and white personal protective suit, which was exactly the change of The Cloak.

In this Venom protective suit, Tony also had a protective charm that Lin Rui had given before. As for Peter, his defense is similar to Tony's. It is also a three-layer defense with Iron Man Armor plus Spiderman Armor plus Lin Rui's protective talisman.

Dī Dī Drops!

"The power system lost 5%...11%...23% loss..." Amidst the shaking of the shock wave, only JARVIS's voice was calmer.

Looking at the current situation, Tony and the others seemed to be able to accept such a result. It was supposed to be a successful operation to rescue Pepper and crush Killian, but in the end, it became like this. It can't be said that Tony made any mistakes, it can only be said that Killian is crazier than they thought.

...

Just as Tony and Peter were passively attacked by the shock wave in the high air, a golden light suddenly appeared at the same time on the edge of the explosion that continued to spread out in all directions.

If Tony could still see the ground at this time, he would definitely be able to see where the six golden rays of light on the edge of the explosion spread from. This is the magic Space Portal created by the Sorcerers!

Chi Chi Chi Chi!

With the appearance of six Golden Magical Space Portals in six directions, six Sorcerers have appeared in front of the explosion. These six Sorcerers are the same as the six Sorcerers that appeared after Harry was possessed by a Demon. Among them are David and Rick from New York Sanctum.

Seeing the explosive shock wave that quickly swept over in front of them, the Six Sorcerers had extremely solemn expressions on their faces. Then, although the Sorcerers in the other positions could not be seen by each other, the Six Sorcerers raised their hands at the same moment and quickly formed the magic seal.

With the completion of the actions in the hands of the Six Sorcerers, the Golden Light burst out suddenly from the six directions where the explosion was spreading.

"Mirror Dimension!" With a loud shout, the Six Sorcerers suddenly opened their hands to both sides.

Brush!

In the next moment, the Mirror Dimension quickly enveloped the exploding range around the Six Sorcerers. If the Mirror Dimension can envelop this explosion, the subsequent destruction will not affect the real world.

However, looking at the serious faces of these Six Sorcerers, the Mirror Dimension may not be as easy to use as before. After all, this time, the scope of the Mirror Dimension that needs to be enveloped is too large.

The explosion engulfed the entire industrial park when it started, and now the spread area is as large as two industrial parks. It takes time to cover the area in the Mirror Dimension, but these Six Sorcerers have also tried their best.

As for why only these Six Sorcerers appeared but not the Ancient One when such a big thing had happened in New York. Perhaps it was because this incident was not originally under the jurisdiction of the Sorcerers, or perhaps because Ancient One had other things that needed his attention.

However, with these Six Sorcerers present, even if the explosion cannot be completely enveloped in the Mirror Dimension, the impact of the explosion can be greatly reduced.

Kakaka!

The expanding Mirror Dimension and the rapidly spreading explosion are racing against each other, and the current situation seems to be that the explosion is spreading faster. At this moment, a golden light burst out from mid-air.

Then, another transparent Mirror Dimension quickly shrouded from high above and quickly combined with the Mirror Dimensions from the six directions on the ground.

Noting the sudden appearance of the Mirror Dimension in the sky, Rick saw a figure floating in the sky after raising his head. After seeing who the figure was, Rick was surprised.

“That is?! Sorcerer Yun Meng!” In the next moment, he called out a name.
