

## Marvel 541

### Chapter 541 Bait

Hearing the sound behind him, Tony paused his discussion with J.A.R.V.I.S and turned around and saw Falcon waving his wings just in front of him. This battle was a joint effort between Tony and SHIELD, and there were also people from the Avengers here. The Falcon who can fly is the free man on the battlefield.

"Falcon, did you find anything there?" Tony asked faintly while looking at Falcon in front of him.

In addition to the battlefield here, SHIELD also arranged many people to guard nearby, just to find Killian. With the help of the Insight System, SHIELD's ability to find people was beyond comparison.

"No." Hearing Tony's question, Falcon shook his head and replied.

In the action against Killian, apart from the Avengers members on SHIELD's side, even the most well-equipped special team struggled against Extremis fighters. Simply, there are obviously not many Extremis fighters, and they can still deal with them. Moreover, every mission to clean the battlefield is given to SHIELD.

Although it is still impossible to get anything useful from these Extremis warriors, maybe they would be able to get this magical and powerful virus in the future. Therefore, SHIELD is also very active in eliminating Killian.

"Is Killian planning to hide? That would be difficult. If he is in the dark then we won't be able to always guard against this enemy!" Hearing Falcon's answer, Tony continued to frown.

"Is there no news from Professor Charles?" SHIELD's Insight System did not find Killian who could change his appearance at any time, and Falcon wanted to know if there was any gain from X-Men.

"Professor Charles, he has been kept busy by the Mutants Brotherhood recently. And he has tried to find Killian once with Cerebro, but he has not found him. I don't know how Killian avoided Professor Charles' search. Could he even change his brain waves?" Tony shook his head and replied when he heard Falcon's words.

Although Professor Charles had been using the Cerebro frequently during this period, his telepathic ability was a bit tired. However, he helped Tony use the Cerebro once, but after searching, he still couldn't find where Killian was.

As for Mandarin who has been hiding behind the scenes, Professor Charles couldn't find him because Tony and the others didn't know who he was.

"Even Professor Charles couldn't find him? Then if he stays in hiding, it will be hard for us to find him." If Professor Charles's Cerebro boosted telepathy can't find Killian, then their chance of finding Killian is very small.

"I won't let him have this opportunity. He can use Extremis to already transform such powerful Fighters. Who knows what monster Killian will create in a while?" Tony's eyes flashed with a cold light when he heard Falcon's words.

“Then what are you going to do?” Falcon asked curiously when he saw Tony looking so serious. If you can’t find Killian, how can you destroy him?

“Since he decides to hide, I don’t bother to find him anymore. The best way to catch the prey is to let the prey come to us, so we need a bait.”

“What bait, what are you going to do?” Falcon became more curious when he heard Tony’s words.

“Bait? Of course, it’s me. As for how to do it...”

...

Half an hour later, Tony had returned to his seaside villa in New York. At this time, he was having a video conference with Rogers and Professor Charles. The content of the conference was that Tony planned to use himself to lure Killian to appear.

“No! That’s definitely not possible! You are playing around with your own life!” After hearing that Tony was about to use himself to lure Killian to appear, Captain Rogers immediately stated his position, and he disagreed with this approach.

Based on Killian’s hatred for Tony, if he really used himself to lure Killian, he might be fooled. However, Tony would be in a very dangerous situation. After all, if Tony were to lure Killian out, he himself had to be completely exposed to an environment where Killian could attack. In this case, Tony’s safety cannot be guaranteed.

“I also agree with Captain Rogers’s point of view. It would be too dangerous to do so.” After Rogers made his statement, Professor Charles in the transparent light curtain also made his statement.

“Aren’t you guys being a little too unconfident in me? Since I am willing to lure Killian out by myself, then obviously I have a plan to retreat.” Hearing Professor Charles and Rogers words, Tony said calmly with the mechanical parts in his hand.

“And, are you planning to let Killian remain in hiding like this? Even Professor Charles and the Insight System can’t find him. Who knows which city he plans to blow up in a few days. Next time, we won’t be as lucky as the last time.” Tony continued before Rogers could speak.

The impact of the big explosion in the suburbs of New York two days ago is still fermenting in the United States and the world.

It’s also because SHIELD has already passed some information with Mr. President and fooled the world with the news of an accidental explosion in a chemical plant, otherwise, the country will definitely become chaotic because of the explosion and fell into a huge panic.

However, Professor Rogers and Professor Charles knew how powerful Killian’s lifeform bomb was as it could potentially threaten the world.

Of course, so far, Tony hasn’t told them how the explosion disappeared two days ago. Although Tony is now teaming up with X-Men and SHIELD, Tony still didn’t tell them about the Earth’s Sorcerers.

Because the Sorcerers were originally hidden and Tony didn’t want to destroy their current state. Of course, Tony wouldn’t be polite when he needed a helper.

“Although Killian’s existence is indeed a great threat to the world’s security, how can you guarantee the success of your plan? Are you sure Killian will be fooled? Moreover, even if Killian is eliminated, there is a Mandarin who has been hiding behind the scenes and we still haven’t got any useful news about him. On the frontline battlefield, many soldiers of the British Army have been sacrificed for spying on Mandarin.” After hearing Tony’s words, Rogers continued to question Tony.

In Rogers’ view, the elimination of a Killian is not a complete removal of the threat posed by this Extremis. This terrorist organization must be completely eliminated in one fell swoop. If Tony were to put himself in a dangerous situation just to eliminate Killian then he didn’t think it was a good deal.

“As for how to get Killian fooled, I still have a supporting role to play.”

“What supporting role?”

“Maya Hansen.”

### **Chapter 542 Risk**

When Tony suddenly said an unfamiliar name, Captain Rogers and Professor Charles on the screen were a little confused. The supporting actor who can lure out Killian. Does this person named Maya Hansen have such an ability?

“Maya Hansen, who is this?” Captain Rogers asked after thinking about it for a while without finding the person’s information. Of course, Professor Charles was also waiting for Tony’s answer.

“Maya Hansen, she is a Botanist, an expert specializing in the DNA of special plants. Of course, she also has a special identity, that is... She works under Killian.” Facing the doubts of Rogers and Charles, Tony gave a quick explanation.

When Tony introduced Maya Hansen, Captain Rogers and Professor Charles were still very calm when the first half of the sentence came out, but when Tony said Maya Hansen was Killian’s subordinate, their eyes flashed with surprised expressions.

“This Maya Hansen is Killian’s subordinate? Are you sure?” Although they didn’t know who Tony is talking about, Captain Rogers is now trying to know if it is true.

“I’m not sure if she is still under Killian. However, when Killian attacked me, she was in the seaside villa to warn me. Although I also know that she didn’t have any kindness towards me, she is the only thing we can use now.” Hearing Rogers’ question, Tony briefly explained.

“Mr. Stark, what do you mean... This Maya Hansen, she warned you when Killian attacked you before. Therefore, although she and Killian were affiliated before, it looked like they were not at peace.” Although Tony simply explained the situation in a sentence, Professor Charles still analyzed a lot of things through this sentence.

“Well, that’s it. Moreover, although I didn’t care about Maya last time, she left her contact information. I think she should have been waiting for my call.” Professor Charles passed two sentences after analyzing what he didn’t say and Tony glanced appreciatively and then continued.

“Are you planning to contact this Maya Hansen, and then pretend to join her to deal with Killian?” After Professor Charles finished speaking, Rogers almost understood Tony’s plan.

“Yes, when the time comes, Hansen will definitely ask Killian to come and deal with me directly.” Of course Tony knew Maya was not a good person.

“This is quite a plan! But you have to make sure that the other party can be fooled.”

“As long as I act well, they won’t be able to sense a trap.” Tony is more confident in his acting skills.

“Since you are so confident, let’s put aside Killian for now. What about the Mandarin behind Killian? After defeating Killian, this character who has been hiding behind would also appear.” Now that Tony feels confident of his success then Roger will not continue to struggle with this matter and he instead asked about Mandarin.

“Well... as long as we kept someone alive. Whether it is Killian or Maya, I believe they will know the true face of this Mandarin. As long as our plan is successful this time, we can let Professor Charles go all out.” It seemed that the question raised by Rogers was very mentally retarded, and Tony replied after a glance at him.

Rogers: “...”

“Well, that can also solve our problems. However, if you want to trap Killian by yourself, you must ensure your own safety.” Tony has already said this to this point, and Rogers will not make any other opinions.

Although Captain Rogers felt that Tony’s plan was not particularly safe, the Extremis in Killian’s hands did pose a large enough threat to the world. If they couldn’t take care of this trouble in time, they would have trouble sleeping and eating.

“Don’t worry, I won’t make fun of my life. Even if I don’t have an Iron Man Armor, Killian won’t be able to attack me.” Tony, who has already thoroughly studied The Cloak, he has found that The Cloak can not just arm the Iron Man Armor. Now, The Cloak can be put on his body in complete concealment without being found.

At that time, if Killian is really fooled, Tony will let him see what surprises are really about. Although Tony knew that Killian could not be dealt with The Cloak, he only had to hold on for a while and the support of Rogers and X-Men would arrive instantly.

With the existence of X-Men member Blink, their deployment will inevitably not be discovered by Killian and Maya.

“Tony, how much are you hiding?” Knowing that Tony must have some technology he didn’t know, Rogers asked in a low voice across the light curtain.

Tony had already scared Captain Rogers once when he took out the Helicarrier Warship Design and SHIELD to make it together, but depending on the situation, Tony still has more technology in his hands.

“Hehe, wouldn’t it be better to have a little mystery? Anyway, I will take out some of it sooner or later.” Tony replied with a smile when he heard Rogers’ words.

“By the way, is there any news about Mirage Knight? He has been missing for two days. The last time he was teleported away, he seemed to have sent a message back within two days.” Rogers, who knew that

it was just a waste of time to question Tony, so he changed the subject and asked about Lin Rui's situation.

Listening to Rogers mentioning Lin Rui, Tony gradually lost his smile. As Rogers said, Lin Rui has not heard from him for two days.

Although Tony and the others were very confident in Lin Rui before, they hadn't heard from him for so long, and they started to be anxious. However, it's useless to be anxious as they don't know where Lin Rui is now.

"There is no news yet, but I know this guy will be fine. Let's focus on Killian for now. As for Mirage Knight, he will be back when he should be back." Tony's eyes flashed as he spoke.

"Well, I will also let the people who are deployed around the world pay attention to whether there is any special situation." Roger is relieved after knowing that Tony is worried about Mirage Knight.

"Although I can't spare any manpower to find Mirage Knight for the time being, I believe he will be fine." Professor Charles on the other side of the light curtain also said after Rogers finished speaking. This is Professor Charles's intuition as a telepathic master.

"Haha, of course. Then, this meeting is over here. Later, just wait for my good news." Not wanting to say anything about Mirage Knight's disappearance, Tony has ended the meeting.

"Well, we will be waiting for your good news."

Phoo~

After speaking, the light curtain in front of Tony had dimmed, and the video conference officially ended.

"Jackson, why haven't you come back, kid? I'm playing with my life here!"

### **Chapter 543 Start**

After the video conference with Rogers and Professor Charles, Tony called Maya Hansen after a short break. Now that he had decided to use himself as bait to lure Killian out, he wouldn't delay anything.

While Tony was still calling Maya, Maya, who was far away in Hawaii, was basking in the sun on the beach. Although Killian's plan continues to suffer setbacks, even Maya's plan has been greatly affected.

However, Maya originally hated Killian, and she was quite happy that Killian was getting targeted. Anyway, the dead Extremis warriors were Killian's men, and Maya still kept some with her.

From the beginning, Maya disapproved of Killian's plan to violently conquer the world. Maya Hansen's original plan was to promote her Extremis through the world celebrity Iron Man.

When Extremis is accepted in the world, who can stop their rise at that time? However, due to Killian's exposure, Maya Hansen's original plan can no longer be implemented.

Buzzing~

Just as Maya was lying on the soft beach basking in the sun, thinking about how to take charge when Killian's power weakened to a certain level, the phone placed aside suddenly vibrated. Picking up the phone and glanced at the caller ID, Maya's eyes flashed in front of her sunglasses.

"Well, well, Mr. Iron Man, why did you call me so suddenly?" After thinking about several thoughts in his heart, Maya finally answered the call.

"Maya Hansen, I have thought about your offer and I do want to study Extremis together with you. Didn't you tell me about the development prospects of this kind of stuff more than ten years ago? Now I have a thorough view of the reasons for the subsequent funding I can provide. How about it, do you want to think about it?" Tony's calm voice came from the other end.

"Want to work with me on Extremis? Did I misheard it?" Maya asked with an unidentified expression on her face when she heard Tony's tone.

Now that Tony is fighting Killian, it would be strange for Maya to believe him. In Maya's view, Tony may want to deal with Killian or get the secret of Extremis by himself, and then be able to work out a way to deal with Extremis.

Of course, if Maya is the one in control then she doesn't mind using Tony to Killian. It would be the two of them who would be fighting with each other and Maya would be happy to sit back and enjoy it.

"Of course it's true, don't you believe me? Besides, your boss Killian was against me because I didn't support his plans to dominate the world. In fact, I am still very interested in Extremis."

"And, didn't you remind me of Killian's attack before? So, I think you wouldn't have wanted to do what Killian did. Actually, this great invention shouldn't be published in this way. If you are willing to cooperate with me, Extremis will definitely show its brilliance on the earth in the future." Hearing Maya's question, Tony explained faintly on the phone. In order to fool Maya, Tony has exhausted his acting skills.

"I'm really interested in your proposal, and I also didn't want to deal with Killian that much. But, what about Killian? You don't think that Killian would just watch us cooperate in silence?" Maya fiddled with Tony's words and asked. Tony is talking about cooperation and Maya feels it has no practical use.

"Killian? Do you think he would be a problem? These days, I have beaten Killian and he has hidden himself. Believe me, it won't be long before I can take care of Killian." Listening to Maya, Tony said disdainfully over the phone.

"Really? Then it would be better for me to wait for you to take care of Killian, which is not a troublesome trouble, and then talk to me about cooperation?" Of course, Maya knows that Killian has been hit a bit miserably these days, but she won't go to Tony that easily, so she said with a smile on her face.

"Well, since you are interested in my proposal then why don't we meet and talk again? Don't worry, the time and place would be up to you. Also, I won't bring my Iron Man Armor." Knowing that Maya still doesn't trust himself, Tony threw out the biggest temptation and that is himself.

"You want to meet me under those conditions? Looks like you really do trust me. In that case... You need to wait for my call." Sure enough, Maya was moved after hearing what Tony had said.

“Okay, I’ll wait for your call.” Knowing that he can’t look too anxious at this time, Tony hung up after saying this.

“Beep~beep~beep~” Listening to the busy tone on the phone, Maya silently took off her sunglasses.

“What the hell does this Stark want to do? Does he really want to cooperate or use my hand to defeat Killian? Isn’t he afraid that I will notify Killian and ambush him? Even if he wears Iron Man Armor, he will be weak by the time and it would be impossible for him to escape. Unless the inexplicable disappearance of the last explosion was really Stark’s handiwork.” Squinting her eyes in the sun, Maya Hansen thought quickly.

“Anyway, this is also an opportunity. If I can control Stark in my hands, it will be useful for both the disgusting Killian and the follow-up Extremis development. So, I have to think about this matter this time.” Finally, Maya still decided to meet up with Tony. Of course, she will also prepare well.

...

Just as Tony on the earth was trying to solve the troubles of Killian and Extremis, far away on a primitive planet in another galaxy, the night was over and Lin Rui, who was meditating on the grass for a night, was protected by the Phantom Suit.

If the environment of this planet was the same as that of the earth then this place would be a very good place to train.

Huhu~

After Lin Rui opened his eyes, he saw a touch of green fluttering in front of him. It turned out that Groot, who was rooted in the pool, was happily waving his new green branches.

On this primitive planet, probably only Groot does not need any special protection. For him, this primitive planet is a very suitable place for growth. In one night, he had grown a few new branches again.

Looking away from Groot, Lin Rui looked around but did not see Rocket. During the previous meditation, Lin Rui discovered that the little raccoon had started to move before dawn. However, Lin Rui did not pay attention to what he was up to.

Huhu~

When Lin Rui was looking for Rocket, the hatch of the Star Lord’s Spaceship in front of him also just opened.

### **Chapter 544 Attacked**

After the hatch opened, Lin Rui saw Deadpool walk out lazily. While stretching, Deadpool raised his head to bathe in the sunshine of this early morning foreign planet.

If it weren’t for Deadpool’s disfigurement, he would really be a handsome man with his current expression and dashing pace. Coupled with the cool Spaceship behind him, if he was on earth, Deadpool will surely attract everyone’s attention.

Seeing Deadpool standing and posing outside the hatch, Lin Rui just turned his head. However, just when Lin Rui was about to look away, Deadpool suddenly looked at him and spoke.

“Hey! Mirage Knight! Take a few pictures of me! Hurry up!” It was not enough to pretend here so Deadpool has decided to pose and take pictures and then return to the earth to pretend.

Lin Rui: “...”

Although feeling very helpless, Lin Rui took out his mobile phone and took a few casual photos of Deadpool. They came to an alien planet unexpectedly this time, and they didn’t know how long they would have to wait for the next experience. Therefore, Lin Rui also plans to take more photos to take back when he returns to Earth.

“Here~ here are a few! How about this angle? Hmm! Let’s do this! This pose!” In front of Lin Rui’s phone camera, Deadpool kept changing his positions in order to get the best effect he felt.

When Deadpool was blocking the hatch, Star-Lord also squeezed out from behind Deadpool from the hatch and walked out. Glancing at what Deadpool and Lin Rui were doing, Star-Lord smiled and walked towards Groot by the waterhole.

Card wipe card wipe~

“You have already taken dozens of photos, this should be enough. Anyway, there are still two months left on our way back. You can take as many shots as you want between this time.” Seeing that the Star-Lord came out, Lin Rui stopped taking pictures of Deadpool.

“Oh! Yes! Then you need to save some memory. I don’t know if we would find any mobile phone accessories here.” Hearing Lin Rui’s words, Deadpool, who was about to climb to the Spaceship, froze and said. Then, he got off the Spaceship.

After putting away the phone, Lin Rui followed Star-Lord to Groot’s side. After observing Groot’s situation, the smile on the corner of Star-Lord’s mouth became more obvious. It seems that Groot’s changes this evening made Star-Lord very happy.

“It seems that choosing to rest here was correct! Not only did I meet the fellows of the earth, but also Groot was able to quickly recover. If it weren’t for the mission, I would’ve like to stay here for a few months.” Groot is still resting and Star-Lord smiled and said to Lin Rui beside him.

“Hehe, the environment of Primordial Planet is indeed very suitable for rest. By the way, where did Rocket go? I found him missing in the morning.” Hearing Star-Lord’s words, Lin Rui responded with a smile and then asked about Rocket’s whereabouts.

“Humm, he went out with some detection equipment early in the morning. Didn’t he say that this area felt weird yesterday? He wanted to figure it out while we were still here.” Hearing Lin Rui’s question, Star-Lord simply explained in a sentence.

“Rocket went out? But there are very powerful monsters outside!” Lin Rui said with some worry when he heard Star-Lord say that Rocket had gone out to probe.

Yesterday, Lin Rui encountered a lot of beasts and monsters in the forest, but only the two monsters rated as B-Grade by the system were a little threatening to him. However, Lin Rui didn't think that Rocket could detect anything safely in such a dangerous forest.

"Don't worry, Rocket has brought a lot of equipment and he would still be able to run away if he can't beat it. Moreover, he didn't go far, just a little bit over there." Seeing Lin Rui worrying about the Rocket, Star-Lord looked at him and the transparent light curtain on his arm pointed in a direction outside the valley and said.

"Okay, but he still needs to be careful. If you need my help..."

"Huh? Why did he come back so soon." Just when Lin Rui was about to go out to help, Star-Lord suddenly muttered a little suspiciously while looking at the light curtain on his arm.

Then, Star-Lord looked at the place where he pointed out Rocket. Following Star-Lord's gaze, Lin Rui also looked over there. A few seconds later, Lin Rui saw a humanoid raccoon carrying a flame-throwing individual aircraft rushing in toward the valley.

Brush!

Two seconds after Lin Rui saw Rocket, he had already rushed into the valley. And behind Rocket, a large black shadow was rushing over quickly.

However, just after Rocket rushed into the valley, the dark shadow seemed to sense something and it suddenly stopped in the air, then quickly fell to the ground, disappearing in the grass in the blink of an eye.

Huhu! Pū!

Rocket, who rushed into the valley quickly, seemed to be running too hastily and did not control the flying device well as it rolled around when it landed. In a corner that Rocket couldn't see, Deadpool was covering his mouth and laughing.

Seeing a human-bear (cat) rolling around in front of him, Deadpool regretted how he didn't take a photo with his phone just now.

"Bah bah baah! Fortunately, I run fast!" Rocket said with a gloomy expression after getting up from the ground and spitting out a few bites of dust.

At this time, Star-Lord and Lin Rui had also walked over to him. Noting the embarrassment of Rocket, and seeing the dark shadow that just chased after him and disappeared, both of them almost guessed what Rocket had just experienced.

"Rocket, what happened? Did you encounter a monster that you couldn't take care of?" Looking up and down at Rocket, Star-Lord asked with a smile after seeing that he was not injured.

"Huh! If it wasn't for me not going out with my powerful weapons! How could those flying tree roots chase me!" After taking a slanted look at Star-Lord, Rocket said while feeling very upset.

"Really? This gun is already one of your best-modified weapons, can't it deal with that tree-root monster?" Glancing at the big gun on the back of Rocket, Star-Lord continued.

“Hmph! That’s because they are too numerous and too fast! Otherwise, why would I need to run!” Rocket still stubbornly explained when the Star-Lord stabbed the painful spot.

In fact, just now, Rocket was detecting terrain not far outside the valley. Because he wanted to know how this valley in the middle forest had appeared. Even if it was built manually, he would learn about the civilization that built it at the beginning.

However, Rocket hadn’t detected anything yet, and those weird black tree roots came from nowhere, and they swarmed toward Rocket. Had he not reacted quickly to activate the Rocket injection system behind him, and fired two electrical bombs to block some tree roots, then Rocket might not be able to come back.

“I also encountered those monsters like tree roots yesterday. They are huge in number and attack fast. Moreover, their defense power is not low. So, before we have a wide range of effective attack weapons, let’s hide.” Seeing Rocket’s helpless, Lin Rui explained from the side.

“En! This time I will be getting ready before I go out and find them!” Rocket shouted angrily after being relieved by Lin Rui.

“Then, have you detected anything during this time?” The ridicule of Rocket ended here, and Star-Lord then asked seriously.

#### **Chapter 545 Discovers**

Kaka~

Hearing the words of Star-Lord, Rocket first fiddled with a tool in his hand. After sorting out a few data, Rocket raised his head and looked at Star-Lord.

“Although the detection time was not long, there are still some gains. I probably know why this valley is a restricted area for the beasts and monsters in the forest, because...” Speaking of the critical moment, Rocket deliberately dragged on.

“Because of what? Don’t try the suspense thing, it doesn’t work for you!” Star-Lord asked without giving a face to Rocket.

“Because, under this valley, there is probably an ancient ruin left by a civilization that came here before. Moreover, I suspect that this ruin should still have a certain degree of defense mechanism. Otherwise, those lifeforms will not fear coming in here.” Seeing that Star-Lord didn’t cooperate with him, Rocket had no choice but to finish his discovery.

“A relic left by the previous civilization? This is interesting, but...if this relic is still aggressive, why are we all right?” After hearing Rocket’s discovery, Star-Lord asked with a flash of light in his eyes.

Where the monsters in the forest can’t dare to take a step, if there is something hidden in the valley, then the attack power should be very powerful. However, neither Lin Rui who rushed in yesterday nor the Star-Lord who landed in Spaceship afterward trigger the relic counterattack inside.

“Maybe, this relic is specifically designed for the native lifeform of this planet? It is also possible, after all, this is a primitive planet. If the civilization that came here before has to stay for a while, in order to

not get disturbed the native lifeform, they have set up some attack systems to target local lifeforms.” Hearing Star-Lord’s doubts, Rocket explained after thinking about it.

“Is that so? Then if we find this ruin, maybe there is something good in it? Although we are leaving in a few days, if we excavate a ruin before we leave, it would be a windfall. Ah.” Since Rocket had judged the situation in this way, Star-Lord thought they might be able to dig up this ruin.

The universe is very big, and there are many civilizations bred in it. Although the relics of civilization left here are from a long time ago, there may be very valuable things here. Moreover, even if there are no high-tech things, there may be some antiques that would sell for a high price. There are people in the universe who like to collect some antiques and special things. If they dig out any antiques, Star-Lord might be able to make some extra money.

“I think so too, but if you want to dig, you need to do early detection. However, I don’t think my work earlier is detailed enough to detect in this valley. If you go outside, there are attacks from those monsters, which makes this situation a bit difficult.” Rocket thinks similar to Star-Lord too, but the work done in an excavation of the ruins must be prepared beforehand, but the detection is hindered by the native lifeform outside.

“Are you really planning to dig out this possible ruin?” Just when Star-Lord and Rocket were discussing how to dig the ruins in this area, Lin Rui, who had not spoken just now, suddenly asked.

“Well, we are just idle anyway, it’s better to do something. What’s wrong, do you have any plans?” Hearing Lin Rui’s words, Star-Lord turned his eyes and asked curiously.

“Uh...it’s nothing, it’s just that I am a little worried. The defensive power of the remains that can make the monsters in the forest dare not take a step, I am worried that you will get hurt.” Lin Rui felt someone looking at him before and he now has a sense of distrust of this area, so he doesn’t want Star-Lord and the others to dig out some ruins and do things.

“Haha! Don’t worry, we do this kind of thing all the time. The monsters outside may be very powerful because we don’t know them. But the ruins are different. You do know what our mercenary team is called. Don’t you?” Seeing Lin Rui looked a little worried, Star-Lord thought for a while and said.

“What?”

“Relic digger! Not every mercenary group and mercenary squad always have missions to do. What do we do when there are no missions? We find the relics to dig, like this small relic, don’t worry, everything would be fine!” After Lin Rui asked, Star-Lord smiled and explained their common way of life of the space mercenary squad.

In fact, in the infinite universe, countless civilizations have died and were born in the long river of time. In this cosmic era, there are countless advanced civilizations that have drowned in the long river of time, so there are many ruins everywhere in the universe.

The things left in some ruins are useless, and the things excavated by some ruins can make a large cosmic mercenary group stop taking orders from anyone for several years.

This is the fun of digging out the ruins, it's just like buying a lottery ticket. However, there are dangers in the process of excavating the ruins, but they are all experienced people and they are very confident in themselves.

"Isn't this similar to the grave robbers on the earth..." After hearing Star-Lord's explanation, Lin Rui murmured silently in his heart.

However, what Star-Lord said was also right, since they encountered this ruin, they would not let it go. Moreover, they are professional, so there is no need to worry about them.

Even if there is any danger, Lin Rui believes that with the protagonist aura of Star-Lord, they will be fine. As for the two unexpected visitors named himself and Deadpool, they are capable of taking care of themselves. Therefore, in this process, Lin Rui decided to protect himself at all times.

"Now that you have decided, I have no other opinions. However, if you plan to go out and explore, I can act as a bodyguard. Believe in my strength, I will not let those forest beasts and monsters disturbed Rocket's detection." Finally, Lin Rui said with a smile.

Anyway, Star-Lord and the others are already planning to dig out the ruins, so if he helps themselves, their speed will be faster and it will also help him leave the planet earlier.

"Really? I just detected that the energy values ??of those weird tree roots are very fixed, indicating that they are only part of a certain subject, and there should be something big behind them." Hearing Lin Rui's words, Rocket looked at him suspiciously before he asked.

"I know there is a big guy behind them, but as for whether they work or not, you will know if you try." Not minding Rocket's distrust of his tone, Lin Rui continued.

Are Star-Lord and Rocket not curious about his abilities and attack methods? Lin Rui is going to let them see enough. As the first person to leave the earth to see an Alien Civilization (not counting Star-Lord), Lin Rui intends to make the name of the earthlings.

"In this case... let's start!"

:

## **Chapter 546 Survey**

Ten minutes later, Rocket, Star-Lord, and Lin Rui, who had already brought their gear, were already standing on the edge of the valley. Deadpool was standing behind them, and Groot was still resting by the pool.

"I won't go out as I can't help much anyway. I am just going to wait here for you to come back, and by the way, I can take care of the tree over there... Well, no, take care of Groot." Deadpool spoke seriously while standing behind Lin Rui.

"Well, don't get too relaxed in the valley, the valley may not be that safe. If there is an accident, just wake up Groot and hide in the Spaceship. I have set up the AI defense system on it." Although Star-Lord thinks that the valley is very safe but he still reminds Deadpool as it better to be safe than sorry.

“Don’t worry, I will pay attention.” Deadpool waved his hand and replied with a smile on his face. He hadn’t finished playing around in the Spaceship last night, so he decided to wait and continue to ‘Study’ it. As for that tree, he will just let it sleep there.

Then, Rocket, Star-Lord, and Lin Rui assembled their equipment and walked out of the valley. A second before stepping out of the valley, Lin Rui glanced back at Deadpool, the expression in his eyes meant that he should not do anything else. Seeing the look in Lin Rui’s eyes, Deadpool looked back casually.

“La la la~ I will go back and tease the Cute Girl AI in the Spaceship.” After Lin Rui and the others walked out of the valley, Deadpool turned and walked towards Spaceship.

...

Huhu~

Holding some equipment in his hand, Lin Rui followed Rocket and Star-Lord to about 500 meters away from the valley to detect something. It has been half an hour since they walked out of the valley, and so far no beasts or monsters have attacked them.

However, since Lin Rui has promised them to be their bodyguards, he is always paying attention to the surrounding situation and he would be able to react as soon as the accident happens.

Dī Dī Drops~

Following the rhythmic Dī Dī sound from the instrument in Rocket’s hand, Star-Lord took the initiative to insert an alloy cylinder into the grass.

Although Lin Rui didn’t know what these things are for, he knows that they are marking the scope of this relic. This is what Star-Lord just explained to Lin Rui. Although only the valley is a place where wild beasts in the forest cannot set foot, the scope of the underground ruins may be much larger.

Phoo~

“It seems that the underground ruins are much larger than we thought before!” After inserting the instrument, Star-Lord stood up and twisted his waist and said.

Although they are only 500 meters away from the valley, if the underground ruins are a circle with the valley as the center, then the range is already very large.

“Yeah, but doesn’t this mean that there is a greater probability that there are some good things in this ruin?” Rocket, who continued to scan forward with the instrument in his hand, said without looking up. Rocket is more interested in underground ruins than Star-Lord at this moment.

“Well, maybe there is nothing below~” Star-Lord raised his heel and said when he heard Rocket’s words.

Rustle~

Stabbed~

Just as Lin Rui and the other two were talking boringly while exploring the scope of the underground ruins, a rustling sound suddenly came from the nearby grass. Then, a few electric lights flashed past Lin Rui not far to the left.

However, neither Rocket nor Star-Lord at work raised their heads about what happened around them, and Lin Rui didn't pay attention to them either. Because it was just the lowest-ranking beast in the forest and it was electrocuted by the power grid they placed nearby.

Shout!

However, just when they ignored the weak beasts that were electrocuted, a crimson shadow suddenly rushed out of the grass beside Rocket's feet and leaped directly towards Rocket's face.

This sudden attack from his side was unexpected and Rocket could only strengthen the energy shield of his protective suit.

Brush!

However, just as the crimson shadow was about to hit the Rocket's helmet, an Azura Light faster than the crimson shadow swept from the Rocket's side. In just an instant, the crimson shadow that had attacked Rocket disappeared directly in the Azura light.

Call!

The sneak attack of the crimson shadow was broken, and after abandoning the front part, it twisted a few times before retracting toward the ground at a faster speed than before.

However, another Azura ray flashed, and the crimson shadow that had retracted to the ground twitched twice before it went soft, and finally collapsed on the grass without any movement.

Whoo~cha~

Rocket and Star-Lord looked towards Lin Rui after the crimson tentacle-like thing spread on the ground. At this time, Lin Rui was putting the unsheathed Beheading Spirit Sword back into the scabbard.

The Beheading Spirit Sword was put back into the scabbard can continuously accumulate sword energy, so that it can exert its greatest power at the first moment of attack.

"Is this... a cold weapon or some special energy weapon?" Without paying attention to the tentacle-like thing that got out of the grass on the ground, Rocket carefully looked at the Beheading Spirit Sword that was hanging on Lin Rui's waist and asked curiously.

"This...I am also not very clear about it. However, this sword can only be used with my special abilities. It would be no better than a cold weapon in other people's hand." Lin Rui explained briefly to Rocket's questions.

"An exclusive weapon? Is it made from some special technology or a magic weapon?" Hearing Lin Rui's answer, Rocket's eyes flashed as he whispered.

Rocket and Star-Lord have also seen a lot of things in their travel of this universe for many years. The magic that is very rare on Earth is just a special kind of technology for them, just like Asgard's Magic System which also exists in the universe.

So, after Lin Rui explained his Beheading Spirit Sword, Rocket naturally thought of that aspect.

“Forget it, let’s take a look at the thing that attacked us, how did it escape our detection?” Rocket wanted to study Lin Rui’s weapon but he also knew that it was not the time, so he turned his attention to the tentacle on the ground.

“Its main body is there, that should just be an attack from the other part on its body.” Seeing Rocket preparing to squat down to study the tentacles, Lin Rui pointed to a position beside him to remind.

In fact, Lin Rui’s first sword attack was to help Rocket escape his fate of getting seriously injured, but the second sword attack did not rush to the tentacle, but towards the ground. That’s because after the tentacle attack appeared, Lin Rui had sensed its body, which was underground.

### **Chapter 547 Premonition**

“Really, let me see.” Hearing Lin Rui’s words, Rocket clicked on the tool in his hand.

Kaka~

Then, the tool used to detect underground ruins became a shovel. Rocket shoveled out the land in a few strokes. After Rocket shoveled away the soil, the things underneath were also exposed to the three of them.

“What’s this? It looks disgusting!” Rocket frowned when he saw the monster corpse mixed with soil underneath.

At this moment, a group of dark red, unknown monsters that had dark green pus flowing on the surface and mixed with the surrounding soil appeared in front of Lin Rui and the other two, the scene looked extremely disgusting.

Judging from the crimson tentacles extending all the way to the surface of the earth, this monster should have been crimson in color. As for the dark green pus flowing on the surface of its body, it should be because of Lin Rui’s sword attack just now.

Chuckle~

As the pus in the monster continued to flow out, its body was rapidly shrinking and melting.

Soon, the monster seemed to be getting dissolved by a strong acid as it turned into a disgusting pus substance and infiltrating the soil. It seems that this lifeform should be a species that lives underground even when it was alive and it went into the underground after it died.

“Huh! I am getting goosebumps!” Seeing the monster disappear with his own eyes, Star-Lord touched his arm and complained.

“It seems that this is a lifeform that will not see light for his entire lifetime. It is very likely that it will not move more than a few meters in its lifetime. As for its energy source, it should be some rots in the ground and small animals walking on the grass. This is how it was able to escape our detection because it was already part of this land. If so, I don’t know how many such lifeforms there are in this underground.” After carefully observing the death process of this monster, Rocket made a bold guess.

“Uh... didn't you hear me say that I am getting goosebumps with just one and now you are telling me that there may be more of that thing under the ground! How many monsters are we stepping upon right now?” Hearing Rocket's words, Star-Lord said with an ugly look on his face.

“It's very possible! But we don't have to look for them. From the perspective of its survival method, it should not be the kind of lifeform that will often take the initiative to hunt. And, don't we have Mirage Knight? They can evade the detection of machines but they can't hide from Mirage Knight's discovery.” Seeing the ugly look on Star-Lord's face, Rocket continued.

“Hey! Right! We have Mirage Knight!” After hearing Rocket's words, Star-Lord smiled and leaned to Lin Rui's side.

“Safety matters can be handed to me, but I suggest you speed up the detection speed. Because I have a bad feeling in my heart.” Lin Rui didn't say these words because of the disgusting monster just now but it was because he was really getting a bad feeling in his heart.

After killing the disgusting monster underground, Lin Rui suddenly felt something staring at him in the forest. However, this feeling of being watched was not as strong as last night.

It was more like the feeling that Lin Rui and Deadpool felt in the forest when they were roaming in the forest. However, this time Lin Rui felt even more targeted.

“Bad Feeling? Okay, Rocket, speed up!” Hearing Lin Rui's words, Star-Lord didn't ask much and he turned his head to say to Rocket.

“Okay! But this may disturb the beasts in the forest. You two would handle any beast that comes here.” Although he didn't know where Lin Rui's feeling comes from but Rocket still intends to speed up detection speed.

“Relax! I think what you should worry about is not the ordinary beasts in the forest!” Lin Rui said seriously while gripping the Beheading Spirit Sword with his hand on his waist.

Kakaka!

Hearing Lin Rui's words, Rocket didn't delay, and the shovel in his hand changed quickly into the original detector. Moreover, this time the detector seems to be bigger than before. Star-Lord also had several cones in his hand, just waiting to mark the location that Rocket had detected.

Then, Lin Rui and the other two people once again started to explore the underground ruins around the circle around the valley. Of course, the detection speed this time has increased a lot. After speeding up, Rocket also felt that something seemed to be moving in the forest.

However, Lin Rui didn't care at all about these changes in the forest. These ordinary-level beasts cannot threaten Lin Rui, nor can they threaten the heavily armed Rocket and Star-Lord. What he needs to pay attention to is the monster that reaches B-Grade Lifeform, the huge monster that chased after Lin Rui yesterday.

As time went by, Lin Rui felt more and more uneasy in his heart and he felt that the giant monster who was staring at him secretly was the exact giant monster that chased after him for half an hour yesterday.

However, besides the huge monster, there seemed to be something else. Anyway, Lin Rui's bad feeling is true.

Dī Dī Drops~

Pū Click!

Following the sound of the instrument in Rocket's hand, Star-Lord quickly inserted a cone in the ground. Now, they are about to complete the peripheral detection, and they should be able to detect the next range in about ten minutes.

However, just as Rocket and Star-Lord continued to move forward to speed up the detection speed, a voice that Lin Rui was very familiar with suddenly came out of the forest.

Then, a large strip of black shadow shot out from the depths of the forest, and the target was Lin Rui and the other two with him. Seeing the familiar dark shadow, the expression on the faces of Rocket and Star-Lord was not so good.

Because, that is the dangerous and strange root attack Lin Rui mentioned before, and once attacked Rocket before.

!!!

The dark shadow rushed towards Lin Rui and the other two people and a large flash of light flashed in the area. However, the power grid that was enough to electrocute the elephants in an instant did not hinder those shadows, and they still rushed towards Rocket at extremely fast speeds.

Brush!

Before the power grid failed, Rocket and Star-Lord had lost the detection instruments in their hands and took out their own weapons. When the black shadow rushed through the power grid, Rocket and Star-Lord had already opened fire at the same time. In an instant, the powerful energy attacks shot towards the dark shadow.

However, when Rocket and Star-Lord fought back for the first time, Lin Rui, who was supposed to protect them, did not take action, instead, he stared in a certain direction in the forest with an ugly look on his face.

"Damn it! They have joined forces! Didn't strong beast divide their territory more strictly? Will monsters of this level still join hands?!" Lin Rui stared coldly at a certain direction in the forest and felt helpless.

### **Chapter 548 Withstand**

Faced with the attacks from those weird roots, Lin Rui did not choose to take action. That's because he was glared at by another powerful overlord in the forest. Lin Rui had noticed a giant monster in the forest before, but if there is only one, he is not very worried.

But now, the guy who had been hiding behind and attacking them with the roots of the tree actually took action, which shows that the two guys must have joined forces.

Lin Rui didn't know what kind of agreement had happened. Do they just want to kill Lin Rui? Maybe this situation happened because of the Guardian of the Galaxy?

Because even if Lin Rui and Deadpool did not come to this planet, Star-Lord and the others would still have come here and then they would have encountered these monsters. So, is Lin Rui getting dragged down by the Guardian of the Galaxy?

Swipe!

While Lin Rui was staring at the giant monster in the forest that hadn't attacked them yet, Rocket and Star-Lord had already been hurriedly attacked by countless black tree roots rushing out of the forest.

Because they have already experienced an attack from these roots, Rocket and Star-Lord are not incapable of destroying these extremely fast black shadows. However, their counterattack is also limited, and the number of shadows has not decreased. If this continues, they are likely to be consumed by the shadows.

"Mirage Knight, why don't you come to help?!" While trying to block the attacks of the dark shadows, Star-Lord glanced at Lin Rui, who was standing behind him without moving and shouted at him.

"You need to handle it, there is a more dangerous thing here!" Lin Rui replied helplessly when he heard Star-Lord's voice. Lin Rui can't be distracted at all now, otherwise, the guy hiding in the dark will definitely take action.

"What is more dangerous!? Are we not facing dangerous enough now?!" Hearing Lin Rui's answer in the noisy environment, Star-Lord frowned and continued shouting.

Lin Rui said before that there are two monsters in this forest that he thinks are very powerful. One of them is the guy behind the roots that are attacking them. At the time, Rocket and Star-Lord didn't care too much, but now, they know that they underestimated the strength of this guy.

Originally, Star-Lord was fortunate that Lin Rui was here. At least he said before that he would protect them. He also saw Lin Rui's strength along the way. But at this time, Lin Rui stood motionless, which made Star-Lord feel that something is wrong.

Huhu!

As soon as Star-Lord's words fell, a huge black shadow quickly pressed down from the top of their heads. Because the shadow was pressing down very quickly, the air above the Star-Lords was quickly squeezed, and at this moment they actually felt the pressure of the air.

If the black shadow above them were to fall, Star-Lord and the others would almost become a crushed potato.

"What the hell!?" Feeling the huge threat from above, Star-Lord and Rocket couldn't help but look up.

Brush!

Just when Star-Lord and Rocket were fighting the attack in front of them and wanted to look up to see what was going on, a figure quickly rushed out from behind them and rushed directly into the sky.

“Leave it to me! Hurry up and retreat to the valley!” Lin Rui’s voice came out at the same time as his figure plunged into the air.

Huh!

When Star-Lord and Rocket finally raised their heads against the gust of wind, they saw a huge paw pressing down in mid-air, while the tiny figure of Lin Rui was holding his sword and going against the shadow.

Just when the Star-Lord and Rocket were stunned thinking that Lin Rui would be crushed in the next second, a dazzling Azura light flashed in front of Lin Rui, and the Azura light instantly rushed out and became Half Moon Shaped.

At the next moment, the Half Moon Shaped Azura Sword Energy smashed directly into the center of the giant claw. Then, the claws quickly stopped.

Chii~

They didn’t know if they were hallucinating but Star-Lord and Rocket seem to see a shallow mark in the middle of the giant claw, and dark green liquid began to flow out of it.

Although Lin Rui made a hasty attack, the Beheading Spirit Sword, which had just been pulled out of the scabbard had a sword aura bonus. The power of this attack was strong, but it only broke the skin defense of the giant monster.

Pū Pū Pū!

Because of this moment of stunningness, several dark shadows broke through the defense of the Star-Lord and hit him. However, because Star-Lord wore protective clothing, these shadows did not cause him much physical damage. But these attacks awakened Star-Lord and brought him back to his senses.

“Damn it! What kind of monster is that!?” After waking up from the stupefaction, Star-Lord shouted in shock while holding Rocket, who was also attacked by the strange roots.

“That should be what Mirage Knight said before, a monster as big as Spaceship.” Star-Lord quickly flew away and Rocket replied while changing bullets for his modified gun.

Now, Rocket and Star-Lord have seen the two monsters that Lin Rui mentioned before. The original contempt they have for these monsters was completely dispelled in less than a minute. Now Star-Lord and Rocket couldn’t wait to return to the Spaceship and drive the Spaceship to bomb these monsters.

“What’s as big as Spaceship!? It’s obviously bigger than my Spaceship!” With an activated jet system behind him, Star-Lord running with Rocket shouted loudly.

Shoo!

“Speed ??up, that thing is getting closer!” While shooting bullets, Rocket also made Star-Lord speed up his escape.

“Do you think I don’t want to be fast?”

Buzz~Boom!

With the spark of the jet system behind Star-Lord, his speed has increased a lot again. Finally, they have almost shaken off the pursuit of countless black shadows behind them.

The most important thing is that they are about to rush into the valley. It's not that Star-Lord and Rocket didn't want to help Lin Rui, but they can't help much at this time. They can only help Lin Rui when they return to the valley and drive the Spaceship out.

Shoo!

Sure enough, when the Star-Lord was about to rush into the valley with Rocket, all the dark shadows which were chasing behind them stopped. Then they quickly drilled into the ground and rushed towards the battlefield between Lin Rui and Giant Beast behind them.

Huhu!

"Hurry up! Hurry up!" Flying all the way to his Spaceship, Star-Lord yelled loudly while controlling the Spaceship to start.

Boom! Boom! Boom!

With Star-Lord's remote control to start Spaceship, the Spaceship that had stopped quietly in the middle of the valley suddenly started. A few seconds later, the entire Spaceship had already rushed into the sky, and Star-Lord had already pulled Rocket into the cockpit.

When Star-Lord and Rocket entered the Spaceship cockpit and began to drive the Spaceship, Deadpool climbed up from the cabin under the cockpit with a dazed expression on his face.

"En?! En? What happened? Why did you come back so quickly?" Deadpool asked very incomprehensibly after he saw Star-Lord and Rocket driving the Spaceship swaying and rushing into the sky with nervous expressions on their faces.

He was watching the Spaceship enthusiastically just now, but suddenly the Spaceship moved, causing Deadpool to roll several times underneath.

"Mirage Knight, he is in danger!"

:

## **Chapter 549 Strange**

Brush!

Hearing Star-Lord's words, Deadpool, who was still relaxed, rushed to the front of the cockpit in an instant.

"What are you talking about? What happened to Mirage Knight?!" Deadpool asked in a deep tone while staring at Star-Lord.

For Deadpool, on this Alien planet far away from the earth, the only thing that can reassure him is Mirage Knight. Whether it was Lin Rui taking care of himself when he came to this planet before, or looking for a way back to the earth to travel through the perilous forest, Lin Rui protected Deadpool all the way.

But now, just when Deadpool thought everything was stable, Star-Lord actually said that Mirage Knight was in danger?

“We were just exploring the underground ruins outside the valley, and then we encountered the previous black tree root attack.” Hearing Deadpool’s words, Star-Lord answered while driving the Spaceship towards Lin Rui’s position.

“So? It’s impossible for those tree roots to threaten Mirage Knight. I know his strength.” After the Star-Lord said that they were attacked by those tree roots, Deadpool asked.

“I think... you should be able to see it now...” Under Deadpool’s questioning, Star-Lord, who had already driven the Spaceship out of the valley, motioned him to look in front of Spaceship.

Rumble!

Shoo!

When Deadpool shifted his gaze to the transparent glass in front of Spaceship, he saw a picture that made his heart tense.

About a hundred meters below the Spaceship, there is a huge monster that looked like a dinosaur and had a snake-like tail, it was three or four stories high and it was frantically waving its huge paws to attack something. Under the attack of this huge monster, large tracts of trees in this virgin forest collapsed.

“So that thing hasn’t left!” Seeing the huge monster in front of him, Deadpool felt a faint pain all over his body and cursed out loud. He was killed by the tail of this monster before. If it weren’t for Deadpool’s mutant ability, he would have died on this guy’s tail.

“Mirage Knight is there! He’s okay! But, what is that?! My God...” Just when Deadpool and Star-Lord’s eyes were attracted by the huge monster in front of them, Rocket suddenly shouted out in shock.

Brush!

After Rocket yelled out these few words, his two cup size paws quickly clicked on the translucent light curtain in front of him. Then, an image appeared on the transparent glass in front of them.

It was Rocket who played the video captured by Spaceship directly on the light screen in front of them. After seeing the picture on this screen, Star-Lord and Deadpool also knew why Rocket was so shocked just now.

Shout! Shout! Shout!

On the light screen, there is a location marked by Rocket, which is Lin Rui’s. At this time, Lin Rui was constantly moving in the air to avoid the attacks from everywhere.

While avoiding the huge monster’s attack, Lin Rui also waved the Beheading Spirit Sword from time to time to counterattack. Rocket shouted just now because Lin Rui is fine and he is able to injure this monster.

Although Lin Rui's size is quite different when compared to the Giant Monster, Lin Rui can still leave a shallow scar on the monster every time he swings his sword.

However, Lin Rui can avoid every attack of the monster by virtue of his already accomplished footwork. In this way, Lin Rui is very not feeling pressured right now.

Shout!

Bang!

In the battle below, Lin Rui escaped the claws of the giant monster again. However, at this moment, a black shadow suddenly drew towards him from a tricky angle, and it appeared in front of Lin Rui's body. The space outside Lin Rui's body twisted a few times which was visible to the naked eye.

Lin Rui, who had not escaped the attack, became unstable and was almost directly blown back to the ground by the attack. However, after falling two meters, Lin Rui rushed out with a few clicks on his feet.

Call!

The moment Lin Rui rushed out, the claws of the giant monster next to him appeared behind him. Had Lin Rui not reacted quickly, he would have been hit twice in a row. Then Lin Rui may have become subject to a series of combined attacks.

Under such a powerful attack, Lin Rui, who withstands a set of combined attacks, may not be able to stand it.

Swipe!

Just when Lin Rui was about to rush out, a familiar black shadow suddenly rushed in front of him. Moreover, this time it was not a shadow, but a dozen shadows. In the eyes of ordinary people, only the black shadows passing by can be seen, but Lin Rui can clearly see what these powerful black shadows are with his reaction ability.

"So you are going to attack me together?!" Seeing the dozens of shadows blocking his way in front of him, the expression on Lin Rui's face looked ugly.

That's right, the one who had just found a chance to give Lin Rui a blow, and the black shadow blocking him now does not belong to the giant monster behind him, but the Plant Monster.

Before attacking Lin Rui, Rocket, and Star-Lord in the forest were only small roots that could only fly short distances, but now these dark shadows attacking Lin Rui are vines with roots as thick as an adult's legs!

Had it not been for the blocking of these fast and high attacking vines, Lin Rui's speed would have long been out of the attack range of the giant monster behind him. In the brief confrontation just now, Lin Rui was not touched by the giant monster, but he left a few scars on it.

However, Lin Rui was attacked twice by these weird vines. If it were not for Lin Rui keeping his body covered with Internal Energy to protect himself, the vine would have caused him some serious injuries.

Bang!

Facing the interception of more than a dozen tree vines, Lin Rui obviously couldn't breakthrough. Therefore, he can only step down a little. With a sound of breaking through the air, Lin Rui once again raised himself in the air and rushed to the side quickly.

While rushing out, the Beheading Spirit Sword in Lin Rui's hand also quickly waved twice. When those tree vines chased over, the two crossed Azura Sword Energy just burst out and rushed towards them.

Pū Pū Pū!

With a muffled sound, the sword energy which has enough power to cut through the heavy alloy plate only cut half a centimeter wound when it hit the tree vines. Although the main reason for this was because the dozen tree vines shared the sword aura damage, it was enough to show the defense power of these tree vines.

Call!

Lin Rui, after slamming two sword energy attack to stop the vines, also failed to rush out of the encirclement, because the giant monster he had thrown away a little earlier had already caught up with him.

A big mouth that looked similar to a blood basin is less than five meters away from Lin Rui's body. Lin Rui, who was running in mid-air, could see some structures in this giant monster's mouth. In addition to the oddly shaped teeth, the structure of this monster's entire mouth was completely different from any lifeform of the earth.

"You want to swallow me!? Aren't you having too big of an appetite?!" Staring at the mouth that was quickly approaching him, Lin Rui took out something from the portable space.

Brush!

Without hesitation, Lin Rui threw out the object he took out of the portable space into the big mouth of the giant monster.

### **Chapter 550 Enter**

As the fist-sized object flew into the Giant Monster's mouth, Lin Rui avoided the fate of being swallowed into the big mouth.

"Taste the power of the high-energy shock bomb!" Lin Rui avoided the big mouth of the Giant Monster and flew to the side of its neck and stared at its mouth.

If it weren't for the high amount of Reward Points that are needed to exchange for a Micro Nuclear Bomb and the fact that Nuclear Bomb has a relatively large radiation range, then Lin Rui would have just thrown a Micro Nuclear Bomb out. However, the power of the high-energy shock bomb is also sufficient in Lin Rui's view.

Pū!

After Lin Rui passed the Giant Monster's mouth, it closed its mouth under inertia. As for the little thing that flew into its mouth, it didn't feel it at all. After it caught Lin Rui's figure flying to his side, the Giant Monster continued to turn his head and bite towards him.

Buzzing! Pū Pū Pū!

However, just as the Giant Monster turned its head, a muffled noise suddenly rang out from its huge closed mouth. Then, an angry look flashed in the four eyes of this Giant Monster, and the closed mouth was abruptly opened by a powerful explosive shock wave.

Pū Pū! Huhu!

As the Giant Monster's mouth opened, a large piece of dark green liquid mixed with red flesh and white teeth spewed out.

"Hoo~~Hoo... Hu Hu Hu!" At first, the Giant Monster could still roar in pain, but it seemed that because the mouth was blown open, the voice behind it was not so domineering.

Huhu!

After blowing up the Giant Monster's mouth, the power of the high-energy shock bomb slowly dissipated. However, the damage it caused to this Giant Monster is the worst that Lin Rui has dealt with so far. There is already fear in addition to anger in its heart and it can be seen in the four eyes of this Giant Monster.

"Whirring ~ ....." Because the monster vomited out several teeth, the mouth is also less than half gone, now it is only a Giant Monster with a whirring sound that does not amount to anything.

The Giant Monster may be using its own roar to frighten Lin Rui, but the sound made Lin Rui feel a little more relaxed. Because Lin Rui knows that the defense of this Giant Monster is not that abnormal, at the very least, it is relatively simple to damage it from the inside.

"Huh! Didn't you join forces with that other thing to deal with me? Now face the consequences!" Once again avoiding the attack of the Giant Monster's claws, Lin Rui looked at the result of his High-Energy Bomb and smiled while shouting in midair.

Pū!

While Lin Rui was watching his work, two dark shadows just drew from below and from the side. Lin Rui only had time to avoid the dark shadow from below and was finally hit by the dark shadow on the side.

The shadow seems to know that Lin Rui has a protective layer on his body, and the power of these black shadows is getting stronger and stronger. Moreover, the two tree vines seemed to have something that was not there before.

Huhu!

Lin Rui, who was hit by that vine, fell for more than ten meters again. Looking at the number of vines hidden in the forest below, Lin Rui tried his best to stabilize himself in the air. Sensing the Internal Energy Defensive Layer on the surface of his body, Lin Rui's brows wrinkled tightly.

"At the moment the tree vine attacked, the Internal Energy defense layer was weakened by more than half! This had not happened before, did the main body of the tree vine find a way to eliminate my Internal Energy defense?" Lin Rui thought deeply in his heart while waving the Beheading Spirit Sword towards the vines that had attacked him from all around.

Although Lin Rui was hit twice by the vine before, the Internal Energy defense layer was not reduced too much. With Lin Rui's current Internal Energy reserve, he can continue to fight for a while. However, if the tree vine's attack can absorb his Internal Energy in this way, then Lin Rui will not be able to continue to fight.

"It seems that the thing that has been hiding behind the scenes is the most difficult one! Even if all these vines are cut off, I don't think it will hurt him too much." After thinking about this, Lin Rui didn't want to fight these two monsters anymore.

In this sudden outbreak of battle, Lin Rui did not blindly dodge and was forced to fight back but he also had a purpose in the fighting. Lin Rui had fought against these two monsters separately when he was walking through this forest before, although he had only simply attacked them.

However, the System in Lin Rui's mind also gave a Damage effect based on Lin Rui's damage to the two monsters.

Now, Lin Rui's damage to the Giant Monster has accumulated to 7%, and the damage to the tree vine monster has only accumulated to 2%. After Lin Rui found out that the tree vine monster can absorb or destroy his internal energy defense layer, he can no longer fight like this.

Rumble!

Seeing that the sword energy attack he swung out once again helped him cut a way out, Lin Rui rushed away while thinking in his heart how to get rid of these two monsters completely. As for killing these two monsters to get a lot of Reward points, Lin Rui doesn't have this idea now.

He may still have a chance in a one-on-one battle. But with these two monsters working together like this, Lin Rui should run. However, Lin Rui felt that he had overlooked something.

Pū Pū Pū!

Boom! Boom! Boom!

Just as Lin Rui continuously swung out Azura Sword Energy attacks to cut away the tree vines blocking the way and flee, there was an abnormal explosion sound behind him.

According to Lin Rui's judgment, it should be the explosion sound only made by thermal weapons. Therefore, in the process of fleeing, Lin Rui took the time to turn his head and glanced backward. And it was this look that shook away Lin Rui's intention to escape. It turned out that he forgot about Star-Lord and Rocket who had run away before.

...

"Kill that fucking thing! Hit it hard!!" In the Star-Lord's Spaceship cockpit, Deadpool was leaning on the glass staring at the Giant Monster outside and roaring loudly.

After Star-Lord and the others rushed over in a Spaceship, they soon discovered that Lin Rui was not dead, but was fighting with the two monsters. So, after the initial shock was over, Star-Lord and Rocket began to fight back.

The explosion that Lin Rui heard just now was the effect of the attacks done by Star-Lord Spaceship which began to pour on the Giant Monster whose mouth was blown off by Lin Rui. The monster that was four or five stories high was blown away by this round of fire.

Under the intensive firepower of the Star-Lord's Spaceship, the Giant Monster who was chasing after Lin Rui just now constantly twisted its body to avoid attacks from high altitude.

However, Star Lord's Spaceship occupies the advantage of being in the air at a high altitude, and the Monster couldn't avoid most of the firepower when they twist so much. So, in the end, it didn't hide at all, but began to uproot the big trees beside it and smashed them towards the Spaceship in the sky.

Huhu!

However, no matter how powerful the Giant Monster is, it is impossible for it to hit the very flexible Spaceship.

"Weren't you very powerful?! What happened to you now?" Deadpool exclaimed triumphantly as he looked at the Giant Monster that was attacked from top to bottom by the Spaceship.
