

Marvel 681

Chapter 681 Missing

Huhu~

Seeing the Golden Portal disappearing in front of him, Deadpool standing in the lobby of the League of Defender base was very upset.

“Huh! Don’t take me with you! Who even wants to go there! Such a cold place, I hope it doesn’t freeze your balls off!” After the Golden Portal disappeared and Lin Rui and others were gone, Deadpool looked at the empty hall and said angrily.

Hearing what Deadpool said, Jerry who was standing behind him smiled helplessly. Then Jerry returned to his post and faced those cute computers again. Mirage Knight and the others have already rushed to Siberia.

The purpose of their operation this time is to find the missing Magic Cube, but no accidents can happen, so Jerry has to help Mirage Knight and others in some logistical assistance in the rear.

When Jerry ignored Deadpool and started his own work, Deadpool turned around after a while of fuming. Then he walked over to the unidentified person who had been unconscious and stared at the guy lying on the ground.

“Why do I feel a special feeling from you, it’s like... there is a special connection between you and me... who the fuck are you?” Deadpool squatted down beside the man and muttering in a low voice.

Although Deadpool and Lin Rui had roughly guessed that the identity of the stranger was either Stryker’s Mutants or a member of the Military’s secret team, they didn’t know that this person was the most special person in the Stryker Mutant team.

He is called Number two, that is, this is the guy who has many Mutant abilities integrated into his body.

In the battle two days ago, the Mutant abilities revealed by Number Two had reached a number of six or seven, and it was not known whether he had hidden some of his powers.

Such a transformed and powerful Mutant was a case of unexpected success after countless experiments even for Stryker, but now he has been accidentally brought into the base of the League of Defender by Deadpool.

Although it is not known why this Number Two has been in a coma, but if he recovers, it will definitely bring Lin Rui and the others a lot of surprises.

“No matter who you are, you can’t stay in a coma-like this forever! I hope I don’t end up regretting this!” After staring at Number Two on the ground for a while, Deadpool seemed to have made some decision in the end.

Pū!

At the next moment, Deadpool had already taken out a copy of the Recovery Serum and inserted it into Number Two's back. If No. 2 is allowed to recover slowly by himself like this then he will starve to death and there will be no recovery.

Deadpool, who didn't want him to fend for himself had to take care of it. Anyway, they don't lack this type of Recovery Serum now.

"If you are a threat to the League of Defender then I will kill you myself!" Deadpool silently thought as he injected the Recovery Serum into the unconscious person's body.

Phoo~

Then, Deadpool stood up and left. The League of Defender base has a full range of monitoring inside of it. If there is any movement then he will know the first time. Right now, Deadpool is very interested in Mirage Knight and others' actions.

...

Huhu~

Just when Deadpool was left at the League of Defender base to watch the stranger, Lin Rui and the other people have come through Jack's Magic Space Portal to the north side of Siberia where the Magic Cube Space Fluctuations were found.

As soon as they walked out of the Magic Space Portal, Lin Rui and the others felt the cold wind roaring on the Siberia ice fields.

If it were not for Lin Rui and others being unordinary people, such a cold wind would have been enough to make them unable to hold on.

"It seems that we did come a bit late." The moment he stepped on the ice field in Siberia, Harry saw a large number of SHIELD's personals not far ahead of them.

X-Men had informed the League of Defenders and SHIELD at the same time, but Lin Rui was delayed for one reason or another, so Captain Rogers's people have already arrived.

At this moment, a base is almost complete in front of Lin Rui and the other and this base shows the high efficiency of SHIELD.

"Captain Rogers is also over there, let's go over." Daredevil said after looking at the contents of his watch.

"Well, let's go, I hope the Space Portal will not be similar to the last one I encountered." Lin Rui and the others have already walked towards the base that is being established in front of them.

However, after walking a few steps, Lin Rui's eyes suddenly flashed when he looked at the vast ice field around him, and he seemed to have thought of something. Then, Lin Rui kept walking but secretly began to contact JARVIS.

"Hello, Mirage Knight, how can I help you?" Soon, JARVIS's voice rang in Lin Rui's headset. When Lin Rui puts on the Mirage Knight suit, JARVIS calls Lin Rui as Mirage Knight.

“JARVIS, how far is this location from the Secret Base of Hydra that I discovered last time?” Lin Rui directly asked without beating around the bush.

Lin Rui hadn't thought of anything when he set foot on this icefield, but after taking two steps, he felt a familiar feeling. After thinking for a while, Lin Rui thought that the secret base of Hydra that he had discovered before was also on the ice field of Siberia?

And the environment here doesn't seem to be much different from there, is it nearby? That's why Lin Rui asked JARVIS to find out.

“The straight-line distance is 25.7 kilometers,” JARVIS answered.

“Twenty-five point seven kilometers? It's really not far!” Hearing JARVIS's answer, Lin Rui's eyes flashed as he muttered.

Although it was in this harsh ice field, but with Lin Rui's strength, the distance of twenty-five kilometers was nothing.

It seems that the last time when Lin Rui and Red Skull were swallowed by the Portal together, the Magic Cube fell out in this vicinity. Then, the chance of finding the Magic Cube this time is really very high.

“By the way, JARVIS, after asking you to help transform that secret base, how is the transformation going now? Also, what did you do with Red Skull's corpse?” Understanding that the secret base is not far from here, Lin Rui then asked.

“The transformation of the base has entered the final stage, and there is still a week to go before the transformation is completely finished. As for Red Skull's body, I didn't find Red Skull's body at the location Mirage Knight told me about.” JARVIS quickly replied after he heard Lin Rui's question.

“Huh! You didn't find his body?!” Not caring about JARVIS's answer that the transformation of the secret base was almost completed, Lin Rui was surprised that the body of Red Skull was not found.

“I searched several times within ten kilometers of the location given by Mirage Knight, but I did not find Red Skull's body,” JARVIS replied again, seeming to hear Lin Rui's surprise.

Chapter 682 Low

Hearing JARVIS's definite answer, Lin Rui's brow furrowed even tighter. This is obviously something that should not happen as the location Lin Rui gave was the absolutely correct location given by the locator.

Unless unless Red Skull is not really dead and he escaped on his own after Lin Rui left! But this is also impossible to happen because at that time, Lin Rui clearly heard the system prompt and he also got the Quest Rewards for killing Red Skull.

“It is impossible for the system to go wrong, and it is impossible for the System to give out Rewards when Red Skull is not dead! So Red Skull must be dead! But why didn't JARVIS find his body? Is it the wrong location? Or did some Animal go over after I left and ate Red Skull's body?” Lin Rui, who had learned that Red Skull's body had not been found quickly thought of some scenarios in his mind but he could not figure it out.

“JARVIS, didn't you find anything at all?” Lin Rui asked again feeling very puzzled.

“No, even if some Animal had appeared here, they would have left some traces on the scene. However, after I searched, there was no trace of the Red Skull in that area.” It seems that JARVIS knew what Lin Rui was thinking and quickly answered.

“Then this is weird!” Lin Rui frowned and muttered in a low voice when he heard JARVIS’s answer.

Looking down and thinking for a while, Lin Rui raised his head again, “Forget it, anyway, Red Skull must be dead. If we can’t find the corpse then it’s also alright. Anyway, he is just a failed Super-Soldier, and there is not much research value to his body.”

“JARVIS, then this time when things are over here, I will go to the base over there and take a look. If the construction has been completed over there then I think it’s time for League of Defenders to move as well.” No longer bothered by where Red Skull’s body went, Lin Rui then spoke to JARVIS.

“Okay, Mirage Knight.”

Phoo~

“Mirage Knight, Captain Rogers is here.” Just when Lin Rui had finished talking with JARVIS, Harry leaned in to remind him in a low voice.

Just now Lin Rui had secretly communicated with JARVIS and while Harry and others knew that, they didn’t listen carefully to what Lin Rui said to JARVIS and they weren’t bothered by it either.

But now that they have arrived at the gate of the temporary base built by SHIELD, Captain Rogers has already been waiting for them at the gate of the base.

So, Lin Rui heard Harry’s reminder when he raised his head, Captain Rogers had just walked out of the base to meet them.

Next to Rogers were a man and a woman, they were Black Widow, Natasha, and the man who wrapped himself up like a polar bear was Dr. Banner.

Dr. Banner doesn’t have a superhuman body like Rogers and the others and he is just an ordinary person when he is not being the Hulk.

“Hello, Mirage Knight, and everyone from the League of Defenders.” Captain Rogers spoke with a smile on his face.

“Hello, Captain Rogers, Miss Natasha, and Dr. Banner.” After Rogers spoke, Lin Rui also responded with a smile.

“Mirage Knight, it seems that you are really powerful! You recovered from such a serious injury in two days!” After Lin Rui spoke, Dr. Banner, who was standing next to Rogers, looked at him and spoke with some surprise in his voice.

Although it was the Hulk who injured Lin Rui two days ago, Dr. Banner still had some hand in it. So he knew that the power of Hulk’s last move was the extent of Mirage Knight’s injury at the time.

But now only two days have passed, and the seriously injured Mirage Knight reappeared in front of him again. Of course, if Dr. Banner knew that Lin Rui just laid in Tony's place for two hours and he was almost healed then I don't know how shocked he would be.

"Oh, it's not still Dr. Banner's 'fault'." Hearing Banner's words, Lin Rui's face twitched as he spoke in an odd tone.

For Dr. Banner's surprise, Lin Rui felt very speechless. It was obvious that his injury was caused by Dr. Banner, and he was still surprised at the speed of his own recovery here. If the Emotional Quotient of someone was not low to a certain level then who would ask this in front of the person who was injured by himself?

"Hey? Why is it mine..." Just when Dr. Banner was still wondering what Lin Rui meant by saying this, Natasha standing next to him quietly poked him with her arm. Natasha's small gesture made Dr. Banner Shut up.

If Dr. Banner continues to ask then even the mild-mannered Mirage Knight will become angry and that is something that Rogers and Black Widow don't want to see. Although Dr. Banner has a very high IQ, his EQ is really too low. This may be a kind of balance from heaven.

Seeing Natasha's little movements, Lin Rui suffocated a smile. For this Dr. Banner, who has a super high IQ but a low EQ, Lin Rui is also very helpless.

"Let's go inside, I want to see what's going on inside now." Resisting the feeling of wanting to laugh in his heart, Lin Rui looked at Rogers and said.

"Yeah, let's go in. Although this base was built temporarily, it can prevent the harsh environment of Siberia." Upon hearing Lin Rui's words, Rogers quickly replied.

"Yes, that's right! Let's go in! I'm freezing myself to death here!" Not paying attention to Natasha's interruption just now, Dr. Banner stomped and rubbed his hands and urged.

Then, under the leadership of Rogers, Lin Rui and other members of League of Defenders entered the simple base in front of them.

...

While Lin Rui had rushed towards Siberia to follow Rogers into SHIELD's temporary base, Tony, who was still in New York, was doing a new round of experiments.

Lin Rui left behind a lot of materials he got from the Alien Planet, and these things are what Tony is mainly focused upon. Although Tony had also learned about the Magic Cube, he was not in a hurry.

"Peter, did you write down the characteristics of the thirteenth? This will be useful for me in the future, so pay special attention to it, don't let it die!" Tony was holding a green ball in his hand as he looked back and shouted.

"It's done! Mr. Stark, that number 13 is amazing! Just now it almost melted the experimental glass and ran out!" After Tony finished shouting, Peter's loud answer came from the other direction of the laboratory.

"If it wasn't great then it wouldn't be so useful. Okay...this series is finally done!" Hearing Peter's answer, Tony murmured and then put away the green bead in his hand.

"Is it finally done? Ah! I can finally rest and go home!" Hearing Tony's words, Peter happily jumped up in the other direction of the laboratory.

Chapter 683 Strange

Seeing Peter jumping up and down, Tony also had a relaxed look in his eyes. However, Tony also knew that Peter was not happy because he could rest and go home, but he could finally go to Siberia to find Lin Rui.

Tony had received the news about the Magic Cube's appearance long ago, and Peter apparently knew too. Therefore, when Tony lets Peter leave, he will definitely not go home but will go directly to Siberia to find Lin Rui and others.

"You! Go ahead, but don't think I don't know what's in your mind!" Peter had already packed up his things and was ready to leave the lab when Tony said in a loud voice behind him.

"Haha! Thank you, Mr. Stark!" Peter, who had run to the door of the laboratory, shouted with a smile on his face when he heard Tony's words.

"Go to the next door and choose an Armor, JARVIS will take you there," Tony added when Peter's figure disappeared at the door.

"I know!" Peter's voice came in from outside the door from a distance.

In the end, only Tony was left in this huge laboratory. Looking at the laboratory filled with various high-precision experimental machines, Tony's face gradually revealed some special expressions.

"Sir, I've been here all the time." Just as Tony looked at the empty laboratory in front of him, JARVIS's voice suddenly came out.

"Haha, of course, I know you've been in. And only you will always be by my side, JARVIS, promise me that you will always be by my side." Hearing JARVIS's voice, Tony suddenly smiled and said.

"Sir, I will always be there for you, I will always be there when you need me." Hearing Tony's words, JARVIS replied in a serious tone.

"I believe you, then, this time the search for Magic Cube will be left to them, I will not personally go over. JARVIS, pay more attention to them." The Magic Cube will be handed over to Tony for joint research when it is finally found, so Tony is not in a hurry.

Moreover, Tony currently has a lot of things in his hands that are no smaller than studying the Magic Cube.

"Okay, sir."

...

Just when Peter was already driving an Iron Man quickly towards Siberia, Lin Rui and his party finally entered the temporary SHIELD Base. In this base, Lin Rui also saw several people from X-Men.

Professor Charles did not come this time, and it was Iceman who led the team. The cold environment of Siberia seems to have a good blessing effect on Iceman's abilities.

Iceman is just wearing a simple sportswear, and it doesn't look like he is affected by the cold which is obviously different from the other people who are tightly wrapped in many clothes.

"Haha! Mirage Knight, you guys are here too! You have fully recovered!" Iceman smiled and said as he saw Lin Rui coming over.

"Eh, I'm late, thank you for your concern." After a brief hug with Iceman, Lin Rui returned with a smile.

"Well, now that we all have arrived except for Tony. So, it's time to do some probing of that space portal as well." Captain Rogers said from the side without giving Lin Rui and Iceman too much time to chat.

In fact, it doesn't matter whether Tony comes or not. Anyway, JARVIS is also here and Tony will know everything as it happens.

"Well, Mirage Knight, you haven't seen the Portal yet. If you see it, you will be very surprised." Hearing Rogers' call, Iceman put his arm around Lin Rui's shoulder and said before they walked toward the center of the base.

As Iceman took Lin Rui towards the center of the base, Rogers, and others quickly followed. After walking in this way for three minutes, Lin Rui could finally clearly sense a Spatial Energy Fluctuation that belongs to the Magic Cube.

This kind of fluctuation impressed Lin Rui when they dealt with Hydra last time, and now a little bit of this Space Energy from Magic Cube is closely stored in Tony's laboratory.

Phoo~

Finally, after turning a corner, the surrounding base disappeared in front of Lin Rui and a snowy plain with few artificial traces appeared in front of him. And in this piece of snow, the Space Portal with a diameter of about five meters was located.

Because this area has been surrounded by SHIELD's base, although there is not even a trace of wind. However, from time to time, a breeze would suddenly come out from the Portal, blowing some snow on the snowfield.

"So this is the Space Portal that you discovered this time? It's big!? And it also looks stable!?" Lin Rui was shocked the moment he saw this Space Portal.

Compared to the Space Portal that accidentally teleported Lin Rui and Deadpool to a different planet in the universe, this Space Portal is undoubtedly too solid and much larger.

However, why did such a huge and stable Space Portal has not been discovered until now. If it hadn't been surrounded by SHIELD, the environment should have changed drastically because of this Space Portal.

"Mirage Knight, are you also wondering why such a huge Space Portal has only been discovered now?" Rogers suddenly asked as he saw Lin Rui staring at the Space Portal in a daze.

“Yes, such a Space Portal shouldn’t be so quiet. There should have been some turbulence.” Lin Rui nodded and replied after hearing Rogers’ words.

“That’s right, this is also a result that we came across. So, we are guessing that this Space Portal did not appear right after the Magic Cube disappeared, but it only appeared a short time ago.” After Lin Rui finished his opinion, Rogers continued to speak with a calm expression on his face.

“Appeared not long ago? Could it be that” Hearing Rogers’s words, Lin Rui suddenly had a not-so-good feeling in his heart.

Although his heart suddenly had a not-so-good feeling, but Lin Rui could not think of what was wrong for a while. So, he could only continue to stare at the huge questioning Space Portal in front of him and observe.

“Mirage Knight, do you remember anything?” Jack, who was beside him, suddenly asked when he noticed the change in Lin Rui’s eyes. After seeing the Space Portal in front of him, Jack also felt a bad feeling in his heart.

“I don’t know, but this Space Portal is definitely not that simple. We should be careful and detect the situation on the other side!” Lin Rui shook his head as he answered and then suggested.

“Well, our unmanned robot is ready, and we can go to detect it now,” Rogers said quickly when he heard Lin Rui’s words.

“Then, let’s not wait any longer! Let’s get started!”

Chapter 684 Survey

A minute later, a team of unmanned robots that SHIELD had already prepared had already lined up and entered the huge and stable Space Portal.

With the experience of Mirage Knight and Deadpool last time, Rogers allowed SHIELD to manufacture several batches of such robots this time.

As long as this Space Portal doesn’t lead to a cosmic black hole, then these Robots will gain something no matter how harsh the environment is.

Huhu~

Finally, more than twenty unmanned robots with different functions have entered the Space Portal under Lin Rui’s gaze. Then, everyone quietly waited.

“The signal is strongly affected! But it’s not completely cut off!” Just after the last robot disappeared into the Space Portal, a SHIELD Agent standing behind Rogers looked at the tablet in his hand and said with some excitement on his face.

Surprisingly, the signal is not completely cut off, so it means that this side of the Earth can transmit information with the world on the other side of this Space Portal.

It seems that the Space Portal can not allow objects to pass through but it can also transmit various special waves.

“Over there, are they still on the Earth?” Since the signal can be transmitted, Rogers then asked a very important question.

The Space Portal that Mirage Knight and Deadpool passed through last time directly leads to a different planet in the universe.

Although Lin Rui did not say the specific situation, and what Deadpool said was too hard to believe but Rogers at least believed that Lin Rui and Deadpool were on a different Planet in the universe.

So, now that there is a bigger and more stable Space Portal, the thing Rogers cares about is where it leads.

“Number Fifth to Ten are gathering the information about the environment over there, it will take a while to send back the exact situation.” Hearing Rogers’ question, the agent behind him replied with an excited look on his face that did not dissipate.

“Well, let’s wait then.” Rogers nodded and didn’t urge anymore.

This is a Space Portal made by a special item like Magic Cube. No one knows what’s on it, so it’s better to be more careful.

“It won’t lead to an Alien Planet in the universe, right? That’s too much of a coincidence!” Lin Rui, who was also standing beside Rogers, also heard the Agent’s words and silently thought in his heart.

Although the direction of the Space Portal is completely random, the universe is infinite and the Planets in it are also infinite, although there are few planets with lifeforms and even civilizations, there are not too many planets with such a large base. However, Lin Rui doesn’t believe that tier luck would be that good.

Of course, Lin Rui only thought of the benefits for them if there is a planet with a lifeform or civilization on the other side of this Space Portal. He hasn’t thought of the huge threat that such a situation will bring to them for the time being.

After all, Lin Rui went to a foreign planet and although he had experienced a lot of dangers, he still came back safe and sound and brought back a lot of very valuable things to Tony.

For Lin Rui, if this Space Portal leads to such a foreign planet then the Earth will have a secret back garden. However, even if it is a primitive material-rich planet like that, Earth may not get many resources.

With the current strength of the earth, if they want to get something from that Alien Planet, at least people of Lin Rui’s level would need to take action as they may encounter various unpredictable situations.

If they encounter an S-Class Lifeform again then the Earth may really get destroyed in an instant.

“En? It seems that it is not on the earth anymore!” Just as Lin Rui was thinking about some things, Dr. Banner, who was on the other side of Rogers said in a slightly surprised tone.

In addition to the SHIELD Agents who were in charge of the robots, Dr. Banner also held a tablet in his hand and he also paid attention to some of the data on it. Before the Agent could analyze the intermittent signals from the Robots, Dr. Banner had already seen something.

“Dr. Banner? Did you find something?” Rogers asked with a bright look in his eye when he heard Banner’s words.

“Well, judging from the situation of these particles that have been passed back now, the Space Portal leads to an environment that is not found on the Earth, even the harshest environment on the earth can’t reach such a special particle concentration.” Dr. Banner raised his head and replied after he heard Rogers’s word.

“Many of these particles are Alpha Particles... their concentration is not low wither. Therefore, the opposite end of this Space Portal likely leads to someplace in the Universe, or perhaps in a galaxy with Neutron Stars.” Banner made some more careful judgments.

It is also fortunate that the Robots sent by SHIELD this time are all manufactured according to the highest level. They would be completely fine even if they have to perform some missions in the universe.

Otherwise, even particle impacts of this concentration would have been enough to completely destroy normal Robots.

“Is that so?” Hearing Dr. Banner’s words, and then seeing his eyes that slowly became fanatical, Rogers faintly responded.

“En! Dr. Banner is right! The opposite side must be a Cosmic Star!” After Banner finished his judgment, that agent of SHIELD also finally determined the situation on the opposite side.

“In that case, gather as much information as possible about the situation over there, and then recover the Robots. Next, we will discuss properly what to do with this Space Portal.” Since the situation on the opposite side of the Space Portal had been roughly determined, Rogers didn’t show whether he was happy or disappointed, and then spoke to the agent behind him.

“Yes, Sir!” The agent excitedly controlled the Robots to detect the situation at the other end of the Space Portal.

“Be careful, close this area before recycling those Robots. I think you know how to deal with the Particle in the universe.” Dr. Banner reminded the person in charge when he saw the excited expression on his face.

“I know, Dr. Banner!”

Then Rogers took the lead to turn around and prepare to leave here. Although they have already begun to detect the situation on the other side of the Space Portal, it will obviously take a long time, and they don’t need to wait here all that time.

“Hawkeye, I’ll leave it to you and Coulson. If there is an accident then you know what to do.” While turning around, Rogers looked at Hawkeye who had been standing in the corner, and ordered.

Hawkeye silently nodded after hearing Roger's words. Then, Rogers was the first to go out. Behind him, Lin Rui glanced at the Space Portal again, and then he finally turned around and went out. However, Jack and Daredevil stayed there.

Chapter 685 Conference

Leaving the professionals to detect the situation across the Space Portal, Lin Rui and others have arrived in a large room like a conference room.

With the exception of Tony Stark, this is the first time that the League of Defenders, SHIELD, and X-Men had gathered together for the first time. Obviously, they attach great importance to such a magical and infinite energy item like Magic Cube.

"Mirage Knight, do you have anything else you want to say about the Magic Cube? If the Magic Cube is not found on this Space Portal this time then what should we do next? After all, we all know how dangerous the Magic Cube can get." After everyone had sat down in the conference room, Rogers looked at Lin Rui who was sitting opposite to him, and spoke.

"I have made it very clear about everything I know last time. I also have no other good way to find such a magical item, otherwise, I would have already told you. However, chasing after such a Spatial Fluctuation is definitely right." Hearing Rogers's words, Lin Rui's eyes flashed as he replied.

In fact, Lin Rui had a hunch in his heart that even if they couldn't find the Magic Cube in this Space Portal this time, they would find the Magic Cube next time, and it won't be too long.

Although he doesn't know what the source of this premonition is but Lin Rui feels this way.

Because of Lin Rui's intervention in this world, the plot has changed too much. The New York battle that was supposed to have happened has not even shown a shadow yet.

And since Loki has not betrayed Asgard, he will not find that there is a Magic Cube on the Earth, and he will not make a deal with Thanos and bring the Chitauri Army to attack the earth. Therefore, Lin Rui is not very clear now whether the New York War will come.

If the New York war comes then in what way will it appear? This is something Lin Rui is very interested in now. And the Magic Cube has not been found yet. Even if the Magic Cube is found, Lin Rui will definitely pay more attention to the use of Magic Cube, and he will not allow that Magic Cube to open a Space Portal that can connect to outer space for Aliens to attack the Earth. Therefore, Lin Rui didn't feel as urgent as before.

"In this case, it seems that we can only wait with peace of mind. I hope we can gain something this time." Hearing Lin Rui's answer, Rogers had no choice but to say this.

Although SHIELD is now under Rogers's control, SHIELD is also the World's Largest Official Organization. However, Rogers knew in his heart that SHIELD couldn't match his allies in terms of high-end strength.

Perhaps Dr. Banner is invincible after transforming into Hulk, but Dr. Banner's abilities obviously cannot be measured by the Hulk.

Therefore, Captain Rogers is very anxious about the whereabouts of the Magic Cube. Lin Rui has already told him about the power of the Magic Cube.

In addition to studying the special and infinite space energy of Magic Cube, they can also research many technologies beyond their current development present.

And now, SHIELD lacks this kind of technological products that can use foreign objects to enhance its strength. After all, there are not many Mutants or Supernaturalists inside SHIELD.

Rogers has formed the Avengers and he has brought together a team of powerful people but they are not strong enough. There is no harm if there is no comparison but there is comparison.

Captain Rogers, as the leader of the Avengers is actually not particularly strong. Hawkeye and Falcon also rely on high-tech equipment in part for their strength.

If their equipment is not updated in time then their strength will be far inferior to Lin Rui and others, whose strength has been improving. Rogers still envied the continuous improvement of Mirage Knight and the others.

“Even if we can’t find the Magic Cube this time, we will still have a lot of gains. The things I detected just now would be enough for me to study for a long time.” While Rogers was feeling a little helpless, Dr. Banner sitting next to him suddenly said.

As a very talented scientist, Dr. Banner will certainly not only have the Magic Cube in his eyes. He pays attention to those things that can improve science.

And this time, there are things that Dr. Banner is interested in on the opposite side of the space portal, especially those Alpha Particles with a very high concentration. Those are...

“Well, yes, even if the Magic Cube is not found over there, we can still consider getting a lot of things from there,” Rogers spoke with a bright smile on his face after he heard Dr. Banner’s words.

Rogers was just considering the whereabouts of the Magic Cube but after hearing Dr. Banner’s reminder, he suddenly reacted. There was a universe of stars on the other side of the Space Portal!

A cosmic space under their control that may be filled with boundless treasures! Moreover, this Space Portal seems to be very stable and they still don’t know how many valuable things they can get from the other side.

Even without the Magic Cube, the treasures of the universe would be enough to make him happy.

“Captain Rogers, although the X-Men are mainly here for the Magic Cube, if the Universe is very stable then we will not give up our rights.” Hearing Rogers’ words, Storm sitting next to Iceman suddenly said.

Although this is an Alliance, there are still some benefits that you have to fight for. And Professor Charles did not come from X-Men this time so Storm is the leader in the negotiation of these matters.

After all, she follows Charles all the time and knows how to act in certain situations.

“Although the League of Defenders does not have any systematic research system yet, we also need the wealth in the universe.” Lin Rui also spoke after Storm.

Originally, Lin Rui didn’t think of this, but he remembered it after Storm spoke. This time, this Space Portal is pointing to someplace in the universe.

If it is the kind of planet that he has visited then their alliance will have to talk about the allocation of the resources. And now, Lin Rui couldn't help but speak.

"Of course, this is the foundation of our alliance," Rogers said with a smile upon hearing Storm and Lin Rui's words.

Captain Rogers really has no plans to monopolize these resources. Anyway, SHIELD's research system is the most complete, and their harvest will definitely be the greatest by then.

"Then, in this case, we don't have to wait here all the time. If it's okay, I want to go out for a walk. I want to see the scenery of this snowy field." The exploration of the Space Portal will take a lot of time and Lin Rui who didn't want to wait in this base all the time, spoke again.

In fact, Lin Rui wanted to see where he and Red Skull were thrown out of the Space Portal last time. Although JARVIS said that there are no traces there, Lin Rui still wants to go and take a look.

Chapter 686 Shadow

After Lin Rui said this, everyone in the conference room looked over at the scenery of this snowfield, which is not special to people like them, and the cold is not that painful to them.

So other people in the room were a little confused when Lin Rui proposed to go out for a walk. Especially now since they are very likely to find the Magic Cube.

"Haha! Actually, I really want to go out too! Mirage Knight, should we go together?" While everyone was staring at Lin Rui, Iceman suddenly smiled and spoke.

Compared to other people's aesthetic fatigue towards the wind and snow outside, Iceman can feel the comfort that is not available in other places in such an environment.

Although Iceman's ability is brought to him by the Mutant Gene in his body, the external environment can also affect the changes in his ability.

For example, Iceman's strength will have a big effect in this Ice Field whereas he will be a little weak in a desert. Therefore, Iceman wanted to go out for a long time now.

"Of course!" Lin Rui agreed with a smile when he heard Iceman's words.

"Then, everyone is free to arrange the rest of their time, but the necessary equipment on your body should be brought. If anything happens here then I want you all to be back in the fastest possible time." At a time when the Magic Cube has not been found and the situation over the Space Portal is still unknown, Captain Rogers also knows that these people cannot afford to be idle.

"Don't worry. Let's go, Mirage Knight!" After Rogers finished speaking, Iceman got up from his seat and walked towards Lin Rui's side in a few steps.

"En, then, I'll leave it to you here." Lin Rui also stood up. Before turning around, Lin Rui spoke to Harry beside him.

"Got it."

Then Lin Rui and the agitated Iceman left the meeting room, and the rest of the people also dispersed. In addition to Lin Rui and Iceman who went out to play in the snowy field, Storm also went out alone shortly after Iceman left.

She can also learn new things in such an environment. While Rogers and SHIELD tried their best to stay close to the Space Portal, Captain Rogers would not be as relaxed as Lin Rui and the others.

...

Ten minutes later, Lin Rui and Iceman, who had been far from the SHIELD temporary base, walked casually on the vast snowy field.

Huhu~

The cold wind never stops on the ice sheet of Siberia, and the wind with fine snow keeps blowing around Lin Rui. However, Lin Rui and Iceman are safe without a trace of cold on their body.

"Iceman, it would be too wasteful for you to release the Absolute Frozen Domain like this!" Lin Rui said with some doubts as he looked at Iceman beside him.

The wind on the Siberia ice sheet can't do anything to Lin Rui and Iceman. Lin Rui didn't even block them with his External Internal Energy as Iceman had directly released his Absolute Frozen Field Domain.

In Iceman's field, the cold wind from outside can't affect them at all. However, the temperature in the field of absolute freezing will never be warmer than the outside world.

"Haha, of course, I wouldn't release the Domain in other places. But here, it doesn't take much to release the Domain." Iceman replied with a smile on his face after he heard Lin Rui's words.

"Moreover, the environment here will allow me to get some exercise to improve my strength."

This is also one of the reasons why Iceman came to Siberia. In addition to tracking the Magic Cube's clues, the environment here can also allow Iceman to exercise his abilities. After all, his nickname Iceman was not just for show.

Compared to other Mutants with lower Mutations, Iceman had a very high Mutation Gene in his body. People with Low Mutation will not have much improvement in their Mutant Abilities from their awakening to adulthood.

However, people with high Mutation Levels will not only awaken more of their abilities as they grow up but they can also be strengthened in some other special ways.

There are many ways to strengthen their Mutant Abilities, the most common and simplest is undoubtedly the use of special drugs for Mutants.

The world has already developed drugs that can suppress and even eliminate Mutant Genes, so obviously, there are drugs that can also strengthen the Mutants.

However, this kind of medicine is not only small in variety, but they are also not particularly effective in many cases, so some accidents often occur. The team led by Stryker has been studying such drugs, and his modified Mutants are also his experimental products.

In addition to drugs, there are also other ways to stimulate Awakening again to enhance the Mutation Ability. Under normal circumstances, a Mutant can only awaken once in their lifetime.

But later, it was discovered that a Mutant can awaken a second time under special circumstances.

The second Awakening has a high chance of greatly increasing the strength of a Mutant, but there is also a high chance that their Mutant ability will be weakened or it may even disappear.

In addition to these, high-level Mutants like Iceman have another way to improve their Mutant Abilities. That is to influence themselves through some natural environment, and then influence their own mutant gene.

For example, if the Iceman Mutant ability belongs to the ice category, then he can use the cold here in Siberia to train his abilities.

“Oh! So that’s how it is, this is the first time I am hearing about this!” Lin Rui said with some surprise and his eyes lit up when he heard Iceman’s answer.

In Lin Rui’s original impression, Mutants’ abilities seemed to be limited from the beginning. Who is stronger and who is weaker, their level can be compared at a glance.

But now Lin Rui learned that the mutant ability can also be enhanced through training in certain environments, which is indeed something he did not know before.

“What about you? Mirage Knight, why did you come out? Do you also want to use the harsh environment here to train yourself? If this is the case then I can reduce my Domain.” Iceman looked at Mirage Knight, who was shrouded in his Domain and asked with a smile on his face.

Buzzing~

While talking, the Absolute Frozen Domain released from Iceman began to shrink, and it seemed that Lin Rui was going to be exposed to the outside environment.

“Hey? No! No! I don’t need to train in the cold wind outside. I was just bored sitting in the base so I wanted to come out and walk.” Lin Rui quickly spoke as one of his arms can already feel the cold wind outside.

“Is that so?” Iceman obviously didn’t believe Lin Rui’s answer.

Hum~

In the next second, Lin Rui’s whole body was exposed from the Absolute Frozen Domain. Even though Lin Rui was wearing the Phantom Suit, he still swayed a little in the cold wind on the Siberia ice sheet.

Chapter 687 Discovery

Two minutes later, under Iceman’s questioning, Lin Rui also briefly explained the reason why he wanted to come out.

“So it was like this! So since you are sure that Red Skull is dead then why even bother to find his body?” Iceman asked with a puzzled expression on his face after he heard Lin Rui’s explanation.

“Perhaps... But I’m still a little worried!” Lin Rui said helplessly when he heard Iceman’s words.

In fact, Lin Rui really has no idea about the whereabouts of Red Skull’s body. Although the Reward of the System has been given to Lin Rui, this is the Marvel World and anything can happen here.

If Red Skull died at the time then what happened to his body? Perhaps after Lin Rui left, something happened there that caused Red Skull’s body to disappear.

“Well, then I’ll come with you to take a look.” Iceman decided to accompany Lin Rui after hearing his words.

“Haha, thanks, maybe there are some surprises waiting for us along the way.” Lin Rui suddenly smiled while looking at the endless ice field in front of him.

Although Lin Rui came out to determine the whereabouts of Red Skull’s body this time, after he left the temporary base of SHIELD, a special feeling suddenly appeared in his heart.

It seems that something else will happen on this ice field. However, Lin Rui didn’t feel much danger from this feeling, so even if something happened, it shouldn’t be a bad thing.

“Surprise? What surprises will there be in this deserted place?” Iceman asked with some disbelief in his voice when he heard Lin Rui’s words.

“I don’t know, but we will know when we see them.” Lin Rui has already strode forward as he spoke.

“What a weird guy!” Iceman muttered silently in his heart as he watched Mirage Knight walking outside his Absolute Frozen Domain.

Then, Iceman continued to keep his Absolute Frozen Domain open and followed Lin Rui on the ice field towards the position where Lin Rui had appeared with the Red Skull last time.

...

Just when Lin Rui and Iceman left the SHIELD base and went out, SHIELD’s research on the Stable Space Portal was steadily improving.

In just half an hour, a lot of data has been sent back, and SHIELD has set up a special team to study those data simultaneously and analyze the situation on the other side of the Space Portal.

And this group was led by Dr. Banner. At this time, he looked at the data in his hand with a lot of enthusiasm.

“I can’t believe there’s so much first-line information in the most intuitive way! This is of immeasurable value to my understanding of the universe!” Staring at the data on the tablet in his hand, Dr. Banner spoke with a wild expression on his face.

From the present situation, there is a Cosmic Starry Sky on the other side of this Space Portal. If the Magic Cube is over there then it would be really difficult for them to take it back.

However, even if they can’t get the Magic Cube, Dr. Banner thinks that as long as this Space Portal remained open, they will get enough things.

“But, if our unmanned robots can safely go through and send back information, why can’t the cosmic rays and some cosmic Particle come through over there?” After the initial surprise passed, Dr. Banner muttered again with a frown.

The general Space Portals are similar to a two-way door, whether it is the Mutant Ability of X-Men member ‘Blink’ or the Space Portals created by the Sorcerer, they are all two-way.

And the Space Portal made by the Magic Cube in front of him seems to be one-way, which means that things from one side can pass but things from the other side cannot pass and come to this side.

“If this is the case, then its value will be dropped by a lot. But...” Banner thought and he already put down the tablet in his hand.

“However, it is good that this is a One Way Portal, otherwise, if the Cosmic Storm rushes through this Space Portal then the entire Earth will be destroyed.” In the end, Dr. Banner seemed to accept the situation as good news.

“Whether it’s one-way or two-way, the protection measures still need to be done, the current defense is still a little too simple.” With a small muttering under his breath, Dr. Banner went to find Captain Rogers to ask him to strengthen the defenses on this side.

...

Huhu~

“This is where you were thrown out of the Space Portal with that Red Skull?” Iceman, who had already withdrawn the Absolute Frozen Domain, looked around the white snow scene and asked Lin Rui, who was looking around in front of him.

“Yes, it’s here. The position given by JARVIS cannot be wrong, but I don’t know where I was lying at the time.” Hearing Iceman’s words, Lin Rui simply replied.

Lin Rui almost died when he was tossed by the Space Storm from the Space Portal and he was unconscious when he was thrown out. He laid here for a long time before waking up.

When Lin Rui woke up, there was a snowy rodent trying to bite his finger, but Lin Rui grabbed it and let it go. And after such a long time, even if Lin Rui has the location at the time, it is impossible to accurately find the place where he and Red Skull were lying.

“I don’t know how many layers are covered by the snow here. I can’t find the exact location. However, if Red Skull’s body was still here then JARVIS should have been able to find it!” Lin Rui couldn’t help but silently scan the surrounding area again.

Buzzing~

Then, Lin Rui released his powerful Psychic Power. If JARVIS can’t find it with normal means then Lin Rui has to use his Psychic Power to try it. Perhaps, after Lin Rui left, something special happened here.

Under Lin Rui’s powerful Psychic Power scan, all the conditions in the snow and ice layers of this ice field were displayed in Lin Rui’s mind. However, the more areas he scanned, the tighter Lin Rui’s brows wrinkled. Because he also did not find anything.

Hum~

Finally, after spending half of his energy, Lin Rui rubbed his brows and retracted his Psychic Power. It seems that Red Skull's body has really disappeared.

"Mirage Knight, are you okay? Your face is getting a little pale, are you still injured?" Seeing Lin Rui's pale face because of using his Psychic Power, Iceman asked with a concerned expression on his face.

"It's okay, I just consumed a lot of my Psychic Power." Hearing Iceman's concern, Lin Rui waved his hand and spoke.

However, just as Lin Rui waved his hand, a bright light flashed in his mind and it was as if a lightning bolt had struck his mind.

"Psychic Power Consumption?! Psychic Power Consumption?! Haha! There really is something weird here!" Lin Rui suddenly shouted with a smile on his face.

"Uh...Mirage Knight, what's the matter with you?" Iceman, who had been looking at him, asked incomprehensibly when he saw Lin Rui shouting with excitement.

"Iceman, maybe we can find the Magic Cube here!" Hearing Iceman's words, Lin Rui suddenly stared at him and spoke with a serious expression on his face.

Chapter 688 Go

More than an hour after Lin Rui and Iceman left, the Portal, which was originally just enclosed, was now covered with a pot-lid-like structure made of high-strength alloy plates.

SHIELD is indeed worthy of being the World's Largest Organization, and its infrastructure power and resources are enough to dazzle people.

In addition to the alloy cover that covers the Portal, the original rudimentary temporary base has also undergone a major change in this time, it has become a very mature base, at least from the perspective of infrastructure.

As long as it is determined that the Portal really is stable then SHIELD will build a larger base here in the later period and vigorously develop themselves with the resources available to them from the opposite end of the Portal.

"The third batch of equipment and resources will arrive in ten minutes. I would feel more at ease when the equipment is fully installed here." Dr. Banner's eyes reflected the silver light of the Portal as he stood next to it and observed its changes.

They would be able to react to any accident from the Portal as long as they are fully prepared on this site and they would be fine even if there is a Universe and empty galaxy on the opposite end of the Portal.

Dr. Banner is now about to build a solid barrier around this Portal that can withstand the impact of the special environment in the universe. Unless there is a cosmic storm rushing over there, Dr. Banner thinks that this barrier would be able to cope with some unexpected situations.

“Only Seven of the first batch of 20 Drones are still working, and five of the 30 in the second batch have lost contact. However, there has also been a lot of information. We already have a general idea of ??the situation at the other end of this Portal. Perhaps, it’s time...” Dr. Banner silently thought as he sorted out the information in his hand, as for what he is going to do next, no one knows.

Bang!

Five minutes later, there was a loud noise in the room next to the Portal to the center of the base, followed by Captain Rogers’s voice.

“That’s impossible! I won’t agree to this!” After slamming his fist hard on the table in front of him, Rogers spoke with a serious expression on his face as he looked at Dr. Banner in front of him.

“Captain Rogers, as I said before, even if I join SHIELD or the Avengers, we would be partners and I won’t be working under you. Therefore, I can ignore your disagreement.” Dr. Banner spoke with a calm expression on his face when he heard Roger’s words.

“Dr. Banner, I know that we are Partners but I really don’t think that you should do this.” Hearing Banner’s words, Rogers continued with a helpless look in his eyes.

Just now, Dr. Banner had told Rogers that he would put on a Space Suit and go through the Portal. If they keep relying on those Drones then although they would continue to get some information but it wouldn’t be better than what a person might see with their own eyes.

Moreover, the Drones have been more or less damaged and there is still no clear picture of the opposite side of the Portal. They don’t know if they are being affected by the environment or lack of there. Therefore, Banner wanted to go and see for himself.

However, Rogers was unwilling to allow Banner’s crazy request. The Portal leads to an unknown place. They have lost many Drones and Rogers can’t let Banner pass through that. If anything happens to Banner over there then Rogers will regret it for the rest of his life.

“Those Drones can only do so much. If we want to get more information then we have to send someone over there. However, no one else will be as professional as me. Moreover, you know about my special situation so you don’t have to worry about me dying.” Banner knew that Rogers was worried about him so he said in a lower tone.

‘No matter how special your situation is, you can’t take this risk! Is the Hulk really invincible?! And it’s hard to say whether the Hulk can even be controlled.’ Rogers thought helplessly in his heart when he heard Banner’s words.

“Dr. Banner, what if I said that I wouldn’t let you through?” Finally, there is no way out, and Rogers could only go with his last card.

Although Bruce Banner is indeed in a Partner relationship with SHIELD, it also means that Banner has no ground to demand anything from SHIELD. Therefore, Rogers can still control others to a degree while SHIELD is strong. Now this entire base is built by SHIELD and Banner still has to rely on Rogers’s permission if he wants to get his own equipment.

Banner frowned when he heard what Rogers said. It seems that he didn't expect Rogers to say this. Captain America's tough attitude caused quite a lot of distress to Banner.

Just like Rogers thought, in order for Banner to pass through that Portal, he needs SHIELD's support. First of all, Banner needs a set of Space Suit that allows him to move freely in Space, something that is more advanced than the technology of the National Space Agency.

"Captain Rogers, you can disagree with me going over. But what if I say that it's not just me wanting to go over there?" Banner did not back down in front of Rogers' tough attitude and he pulled out a last trick.

Phoo~

As Dr. Banner finished speaking, his body suddenly leaned forward, and his entire upper body approached Rogers. Then, a green light suddenly flashed in his eyes, and his whole aura also changed tremendously. At this moment, Rogers felt that Dr. Banner in front of him had suddenly become a peerless beast.

"I am Hulk! I go wherever I want!" There was a faint green light under Banner's skin as he groaned out these words.

Seeing the change of Dr. Banner in front of him, and hearing the voice that clearly belonged to Hulk, the expression on Rogers's face gradually became ugly. If he still doesn't agree with Dr. Banner's request then he is worried that Hulk will pop out in the next moment and tear down this newly established base.

"Forget it! Since you are this determined to go then I can't stop you!" In the end, Rogers had no choice but to compromise. At this time, Rogers was feeling very entangled, he had already begun to doubt whether it was a good thing or a bad thing to call Dr. Banner back.

"Haha! It would have been better if this had happened earlier! We are already quite late, fortunately, I have long asked others to prepare Space Suit for me." Hearing Rogers finally agreed, Banner instantly recovered to his original smiling state. As he said

"Dr. Banner, I hope your decision is correct this time. We can't afford to lose you now." Although he agreed, Rogers still reminded him with a serious expression on his face.

"Don't worry, I know. Also, Three Drones have just returned, and they have brought back a lot of information. So, don't worry, I will definitely come back safely." Banner also replied seriously when he heard Rogers's words.

"I hope so."

Then, Banner left the meeting room and began to prepare his own things to go through the Portal.

Chapter 689 Suppression

Half an hour later, Dr. Banner, who was fully prepared, was standing under the Portal wearing a Spacesuit that would allow him to move freely in the Space and any other environment within reason.

In this half an hour, Banner has carefully studied the Drones that came back and he determined that there is no threat to him or Hulk on the other side of the Portal.

But to ensure his safety, many experiments were done with some small animals before Banner went in.

They put a laboratory Rabbit in a cage and then they sealed that cage with a Spacesuit and tied a rope to the cage before they threw it into the Portal.

After a few minutes, they pulled it back again, and after observing the situation of the experimental rabbit, Rogers was finally relieved.

"I'm going through!" Banner's voice came out of his armed body.

"Be careful! Whatever you find over there, I'll pull you back as soon as ten minutes are up." Standing beside Banner, Rogers said seriously.

"Don't worry!" Banner smiled as he raised his hand in a reassuring gesture before he turned to take a step towards the Portal.

Then, under the gaze of Rogers, Falcon, Daredevil, and others, Banner walked into the Portal. In the next moment, his figure disappeared.

"Carefully watch the changes in the data. If Dr. Banner's physical condition changes then immediately pull him back!" As Banner disappeared, Rogers ordered the SHIELD agent next to him.

"Yes, Captain!"

After instructing his subordinates to pay close attention to Banner's situation, Rogers did not leave either but stared at the Portal in front of him. For ten minutes, he will wait here for Banner to come back.

If Banner really had any accidents then he might have to personally take action. It would be a risk but he wouldn't be Captain America if he didn't take risks!

Of course, in addition to Rogers who was worried about Dr. Banner, everyone else in the room was also very concerned. Jack and Daredevil, who were left behind by Lin Rui, got together and talked in a low voice.

"Daredevil, we've already sent Mirage Knight a message about Dr. Banner entering the Portal, why haven't we heard back anything yet?" Jack kept his eyes fixed on the Portal and asked Daredevil with his mouth moving slightly.

"I don't know, but it must be something important that Mirage Knight choose to go out at this time." Hearing Jack's doubts, Daredevil replied after thinking about it.

"What can be more important than this! This is related to the whereabouts of the Magic Cube, and this Portal is obviously not simple. Such a large and stable Portal must lead to a place, which represents something that even Mirage Knight shouldn't know." Jack frowned slightly and asked again when he heard this answer.

"We can do nothing about it, we can only wait for Mirage Knight's reply or you can ask him when he comes back. Dr. Banner had stepped into the Portal so let's wait and see if he discovers anything." Daredevil has no good explanation for Jack's doubts and they can only wait for Lin Rui to come back and explain it to them.

“Well, I just think this Portal is not simple. Here, my Space Magic seems to be suppressed.” Jack continued to speak as he helplessly nodded.

“Really? What about Blink? Have you ever asked if her ability is suppressed?” Hearing Jack said that his Space Magic could not be used here, the expression in Daredevil’s eyes suddenly changed as he asked.

“Blink? I didn’t ask, we are not that familiar with each other.” Hearing Daredevil’s question, Jack was taken aback and replied.

After Jack finished answering, Daredevil turned and walked towards the X-Men. If Jack’s Space Magic cannot be used, then this Portal may only directly suppress the Space Power in this area.

Therefore, Daredevil has to go to Blink to verify his guess. And Jack just watched Daredevil walk over to X-Men, and after a few words with Blink, he walked back.

“What is it? What did she say?” Jack asked quickly after Daredevil returned.

“Blink’s ability has also been suppressed. She can’t use her power within a hundred meters of this Portal.” Daredevil directly said what he had just learned.

“So the reason for our power suppression is this Portal, but what effect does this have? So what if we can’t use the power of Space...” After hearing Daredevil’s answer, Jack frowned and muttered.

Although there are many strange people on the entire earth, there are still very few people who possess the power of Space. And the scope of influence of this Portal is only so small that it won’t have much influence on Jack and the others.

“I don’t know what effect the suppression of this Space Energy will have, but it’s never wrong to pay attention.” Daredevil didn’t know how to explain this situation.

Since they were not clear about it, Daredevil and the others stopped struggling to find an answer, and then they stared at the Portal in front of them. More than five minutes have passed since Dr. Banner had entered the Portal and he should be back after a while.

Dī Dī Drops!

However, just as Daredevil and the others shifted their sights to the Portal, there was a sudden siren sound from the tablet in the hands of a SHIELD Agent who was standing next to Rogers. When everyone glanced over, they saw the Agent staring at the tablet in his hand with a pale face.

“What’s the matter?” Rogers asked with a bad feeling in his heart when he saw the face of the person beside him.

“Just now, we lost all contact with Dr. Banner!” The Agent replied in a trembling voice, staring at the data on the tablet in his hand.

Buzzing~

Sii!

Just after the agent finished answering Rogers' question, there was a slight fluctuation in the Portal in front of them. This degree of fluctuation was the same when the Robit Drones entered and exited the Portal.

Then, in the surprised and worried eyes of Rogers and others, the rope that connected Dr. Banner through the Portal had retracted.

However, there was no Dr. Banner at the end of the rope. Instead, there was an obvious split in the retracted section of the rope, which had broken down from the middle!

"Damn it! Get me a Spacesuit!" Rogers yelled while squeezing his fist.

The rope holding Banner broke and although it was not certain what happened to Banner over there, Rogers could only plan for the worst. And now, he was going to bring Banner back in person.

"Something happened! Where did Mirage Knight go?!" Jack whispered with furrowed brows while watching the situation in front of him.

Chapter 690 Responsibility

Buzzing~

The Portal in front of him still stood firmly there without any change, and Banner helplessly looked at the broken rope connected to his Spacesuit.

Banner passed through the Portal and he wasn't surrounded by an endless starry sky as he had previously thought but a dimly lit wilderness.

The hills in this wilderness are undulating, and the rocks are deep black, which is obviously different from the Earth's environment.

In addition to the endless barren plains in front of him, Banner also saw the Drones that had been dispatched here before near the Portal.

Except for a few which are still working normally, the rest have stopped working and there was no movement from them, It was obvious that they have malfunctioned. There are also some Drones that are scattered into many parts and Banner didn't know the cause of that.

"It's really not easy to send back so much information in such a situation!" After seeing the situation in front of him, Banner couldn't help but sigh.

Although Banner still doesn't know what's going on here and he also didn't know why these Drones lost control or become scattered into parts, but his determination to explore this strange land has not changed even though the rope behind him has been broken.

However, before he could start to explore this unfamiliar place, Banner walked towards the nearest drone next to him and fiddled with it for a while, and threw it into the Portal behind him.

The rope connecting him from the earth had broken, and Banner certainly knew that the people waiting for him over there would be worried. Therefore, he needs to send a message back so that they don't worry too much.

Moreover, Banner didn't feel anything here that could threaten him now.

After the Drone disappeared in the Portal, Banner suppressed the nervousness in his heart and stopped worrying about the Drones around him. After the rope was simply cleaned up, he started the action he originally planned.

"The gravity is different from the earth's, but it's not that different, it's about a third of the earth's... The instruments with cameras on them seem to have been affected by something here as they couldn't take any clear pictures..." Dr. Banner, who had started his own operation, soon fell into the role of a scientist, he cast aside all the other things and focused on doing his own things.

However, Dr. Banner, who walked around the surrounding environment to carefully study it did not know that this wilderness was not as barren as he had imagined. Among these black rocks, some hidden things were silently observing this serious researcher.

However, Banner couldn't detect the specific situation around him because many functions of his Spacesuit were inexplicably broken after he got transmitted to this site.

...

On the Earth, Portal Site.

"Captain! You can't go over there!" Just when Dr. Banner started his work as if nothing was wrong, Natasha stood up in front of Captain Rogers and spoke with a serious expression on her face.

Less than a minute after the rope connected to the Banner broke, Rogers was already wearing a Spacesuit and was ready to go through the Portal to look for him.

However, SHIELD has already "Lost" Banner and they cannot let Captain America, who is in charge of the overall situation, take any risks. So, Natasha, who was very sensible in these situations stopped in front of Rogers.

Although Falcon and Hawkeye standing behind Rogers did not speak, if Rogers really insisted on going over then they would obviously stop him.

SHIELD has gone through so many things and it has finally stabilized. Now is the period of steady development. They can't take so many risks and sacrifice Captain America.

"Natasha, you can't stop me!" Rogers said seriously as he looked at Black Widow who was stopping him.

"Rogers, if you're going to send someone over to save Dr. Banner, it's not going to be you," Hearing Rogers's words, Natasha spoke without taking a step back.

"I was the one who told you to bring Dr. Banner to SHIELD and now we have lost contact with him. No one except me should take the responsibility to go there!" Rogers certainly didn't want to let others take risks as it was his responsibility.

"Captain Rogers, ten minutes haven't even passed yet. Maybe nothing happened to Dr. Banner." Just as Rogers was about to force his way through, Daredevil came up from behind to talk to him.

Dr. Banner personally urged to enter the Portal, but Captain America did not stop him. Of course, the League of Defenders or X-Men, as an ally, would not be able to say anything to him.

And now that they have lost contact with Dr. Banner and the rope pulling him is broken, the X-Men and the League of Defenders have no position to say whether to save him or not. However, Daredevil's identity allows him to speak out in this situation.

"But it was clearly an accident. We don't know what would happen if we wait a few more minutes." Rogers said in a serious tone when he heard Daredevil's words.

"Although this is true but take some time and think about this situation. If something really had happened there and if you go there then you may not be able to come back together. Do you think your disappearance would be good for the current situation?" Daredevil tries to persuade Rogers in other manners as he knew that Rogers feels a strong sense of responsibility which makes it impossible for him to give up on Dr. Banner.

Rogers is the person in charge of SHIELD, and he has many responsibilities on his shoulders. In addition to Dr. Banner, he is responsible for the entire SHIELD.

In addition to his responsibilities towards SHIELD, Rogers is still the core figure in SHIELD's alliance with the League of Defenders and X-Men, and he must not have an accident.

After hearing Daredevil's words, Rogers finally calmed down. However, he still won't give up rescuing Banner. Therefore, within a minute, he had directly sent dozens of Drones into the Portal.

If Dr. Banner is okay over there then he will definitely be able to come back through these Drones. However, Rogers will only wait for ten minutes and once the time is up, no one would be able to stop him from going after Banner.

Hum~

Bang!

And when the Drones sent by Rogers were halfway in, a badly damaged Drone suddenly flew out from the Portal and knocked off a few Drones that were in line and it rolled down at Rogers' feet.

When he noticed the Drone rolling down to his feet, Rogers' eyes lit up, and then, regardless of whether the Drone was carrying threatening substances or not, he directly reached out and picked it up.

After seeing the information that the drone had brought back, Rogers finally let out a long sigh of relief.

"Dr. Banner is fine for the time being!"
