

## Marvel 691

### Chapter 691 Space Fold

“Dr. Banner is fine.” After Rogers saw the message from the drone, he shouted it out loud.

In addition to reassuring himself, Rogers also reassured other people who care about Banner. And the information from Banner was not only about his safety, but he also sent some basic information about the place he had landed in.

Therefore, SHIELD’s follow-up actions will also be changed according to Banner’s information. At this moment, Rogers really didn’t need to hurry. Since Banner can send a message back from a Drone once then he can send it back twice or three times.

Others were relieved after hearing Rogers’ words. Although the loss of an unfamiliar scientist was serious in their eyes, it was good that Captain America won’t be taking any risks.

Of course, if they knew that this weak-looking scientist was the Hulk then maybe they wouldn’t think like this.

“Dr. Banner is okay, but we still can’t contact Mirage Knight. What happened on his side?” After knowing that Dr. Banner was okay, Daredevil and the others were relieved, but they gradually got a little bit more concerned about not being able to get in touch with Lin Rui and a Bad feeling arose in their heart.

“Daredevil, don’t worry too much. Even Dr. Banner who has passed through the Portal is fine so nothing should happen to Mirage Knight who just went out for a walk. And he is not alone, Iceman is with him. Iceman is very strong and with Lin Rui, they would be able to handle any situation.” Seeing Daredevil’s worry about Mirage Knight, Jack murmured some comforting words from the side.

“I hope so, but I have a feeling that something is going to happen.”

...

While so many accidents were taking place at the base on this side of the Portal, Lin Rui and Iceman were standing silently in the ice field dozens of kilometers away from the base. For half an hour, Lin Rui had barely moved.

“What the hell is Mirage Knight doing? Is the Magic Cube really here?” As Iceman sat in the snow and tilted his head to look at Mirage Knight with his eyes closed next to him, he muttered a few words of frustration.

Since Lin Rui had said to Iceman that they might be able to find the Magic Cube half an hour ago, he asked Iceman to look after him and then closed his eyes to release his Psychic Power.

This had continued until now and Iceman doesn’t know what to do. Iceman also waited quietly for Lin Rui to finish.

Although Lin Rui’s Psychic Power has a suppressive effect on Iceman, as long as Iceman releases the Absolute Frozen Domain, he can isolate the mental suppression and continue to use his abilities.

But now Iceman has been waiting for half an hour, and his field cannot be used for such a long time even in such an environment.

Hum~

Finally, as soon as Iceman finished complaining, the Absolute Ice Field he had maintained until now dissolved in a jolt. As the field disappeared, the overwhelming mental pressure from the side nearly pushed Iceman directly into the ice.

“I...” Unexpectedly, Lin Rui’s Psychic Power had increased to this point, and Iceman was caught off guard and fell into the snow.

Huh~

Pū!

As Iceman plunged into the snow, Lin Rui’s powerful Psychic Power, which had been pressing on him, suddenly dissipated. Then Lin Rui’s eyes, which had just been closed, opened, but with an unspeakable sense of tiredness in them.

With a shake of his head to sober himself up, Lin Rui sees Iceman with his ass pouting next to him in the next second.

“Hey?! Iceman, what’s the matter with you? Why did you stick your head in the snow? Does this help you increase your abilities?” Lin Rui, who didn’t understand what happened to Iceman, asked with some curiosity. He didn’t know that this was something he had done to Iceman.

Pū!

As if spurred on by Lin Rui’s words, Iceman, whose whole head was stuck in the snow, slammed his arms against the ice, and then he pulled his head up as soon as he was able to.

Afterward, the ice and snow on Iceman’s head instantly dissipated, and it was obvious that Iceman had used his abilities.

Sii!

“Why did I put my head in the snow? Oh, Mirage Knight, you really have the nerve to ask that!” Iceman quickly stood up from the ground and he stared at Lin Rui with an indignant expression on his face.

Seeing the indignant expression on Iceman’s face, Lin Rui was stunned. Could it be that he did it? Lin Rui didn’t have any impression of doing that. He had just consumed a lot of Psychic Power in order to find the possible location of the Magic Cube so how could he notice Iceman’s situation?

“Why shouldn’t I ask, I was worried for you.” So, facing Iceman’s rhetorical question, Lin Rui replied with a blank expression on his face.

“Forget it! Forget it! Forget about it, did you find anything just now?” Hearing Lin Rui’s words, Iceman almost couldn’t hold back a kick out, and finally held back and asked.

“Of course I found something!” This inexplicable episode passed quickly, and Lin Rui replied a little excitedly after hearing Iceman’s question.

Half an hour ago, Lin Rui released his Psychic Power in search of the disappeared Red Skull's body. But when he retrieved his Psychic Power to no avail in his search, he suddenly found something weird.

That is, Lin Rui clearly only scanned an area of one hundred meters around him, but he had consumed a lot of Psychic Power. This is obviously abnormal.

Lin Rui's Psychic Power is so powerful now that even if he scanned the radius of a square kilometer, he would not consume so much. So there must be some eccentricities in this area.

After suspecting that there is something strange in this area, Lin Rui speculated that this area may be influenced by the energy of the Magic Cube, so he decided that the Magic Cube might be here.

Then he used his powerful Psychic Power to carefully scan the area again. He wanted to find out what was weird here, and if he was lucky, he might be able to find the Magic Cube. After half an hour, Lin Rui, who had almost exhausted her Psychic Power, finally made a discovery.

"What did you find!?" After getting this answer, Iceman quickly asked as he still remembers Lin Rui's previous statement that the Magic Cube might be here.

"Space here has been transformed! If Space here used to be One, now it's Ten!" Without holding back, Lin Rui spoke directly about what he had found.

Hearing Lin Rui's answer, Iceman was stunned. He obviously did not understand the meaning behind Lin Rui's words. What was the original space of one, and is now ten? This sentence is completely incomprehensible to the average person.

"What are you talking about? What space one? Space ten?" "Iceman continued with a frown, though he was a little embarrassed.

"I don't really know how to explain the situation, but the area would normally be this big..." Lin Rui crouches down and draws a circle in the snow as he spoke.

"Now, it still looks the same size, but it can hold ten times more space." After finishing the first circle, Lin Rui put a bigger one on the outside.

Then Lin Rui pushed all the snow from the big circle into the small circle in the middle. So this is a special case of the area where they are now, where everything looks normal, but the density of space has increased by almost a factor of ten.

"Here, Space is folded or it is squeezed!"

## **Chapter 692 Communication**

After Lin Rui finishes speaking, Iceman stares blankly at the small snowbank on the ground. Two seconds later, he jerked his head up.

"That's impossible! If space was really compressed or folded, how could we still be standing here?!" Finally, Iceman understood what Lin Rui was saying and asked the most obvious question.

Space Compression and Folding, this is not something that Iceman doesn't believe won't happen.

Although Blink can only break through the space to build portals or cut the space, maybe she would be able to compress the space and fold the space in the future, so you never know.

Moreover, the Sorcerers seem to be able to create a special space in which they can fold space at will. However, Sorcerers has separated the folded space from the real world and their actions will not have any influence on the real world.

What Lin Rui is talking about now is the Spatial changes in the real world.

With Iceman's basic understanding of Space rules, if the real-world space is folded and compressed then it would be impossible for them to stand here safely now.

Even if Iceman and Mirage Knight are not ordinary people and they are both powerful but they can't resist the power of Space.

"Space Fold... Space Compression... Then we might not have been able to get in here. Even if we come in by accident, we should have been crushed into a meat pie by the power of Space force in an instant." Looking around at the very ordinary snowfields, Iceman continued. In any case, he did not believe that space had been folded or even squeezed.

"I know you won't believe it, and I don't want to believe it either, but this is the truth. And I don't know why this space is folded and squeezed in such a way that we can get in, or if that's because of the special energy of Magic Cube." Lin Rui frowns at Iceman's words.

Lin Rui came to this conclusion because he used his powerful Psychic Power to carefully scan this area in the past half an hour.

Lin Rui, who didn't need to consume much, actually consumed more than ten times the Psychic Power to scan this area, and he actually sensed that a trace of Spatial Power was hidden in various locations in this area.

After realizing that this was the power of Space, Lin Rui even increased the output of his Psychic Power.

Finally, he found that the area around a few hundred meters was completely different from the outside world. Although it looked the same, Space Energy was no longer on the same level.

That's why Lin Rui came to the conclusion that space here is folded or squeezed. After drawing this conclusion, Lin Rui is also very excited as this indicates that the Magic Cube really may be here.

"The power of Magic Cube? Really? Did you find out where the Magic Cube is?" No matter whether space here is folded or not, Iceman cares about the whereabouts of the Magic Cube.

Anyway, he's still standing here, and it doesn't matter if space is folded or not. So Iceman just doesn't think about it.

"Er... No." Lin Rui responded awkwardly to Iceman's question.

Lin Rui did discover something strange about space, but no matter how Lin Rui analyzed the spatial fluctuations, he had no clue about the origin of it.

In half an hour, Lin Rui has already consumed more than half of his Psychic Powers, but he still got nothing. No, it's not as if there's nothing at all as at least, Lin Rui has found some changes in the real world that might occur when space is folded here.

"So that's mean we found nothing! What does the folding of the space here have to do with us? And this kind of Space Folding doesn't even have any effect." Hearing Lin Rui's answer, Iceman said with some disappointment.

"It seems so! However, we finally found something. I didn't find the Magic Cube just now, but that doesn't mean I won't find it soon. And I have a hunch that the Magic Cube is coming soon, right here in the snow." Seeing Iceman's disappointment, Lin Rui continues.

Lin Rui didn't say this to comfort Iceman, he really had this premonition in his heart. Although he doesn't know the source of this hunch, Lin Rui knows that the Magic Cube is about to appear. Since this Space is weird, Lin Rui intends to wait here.

There are a large number of people staying behind to study the Portal and it won't be a surprise if the Magic Cube shows up there, while Lin Rui can continue to look for it here.

"Hunch? I do know some Mutants that have special abilities to predict the future, but that's not always true." Iceman says with a change of tone when Lin Rui says that he has a hunch.

"Well, you came out here to enhance your abilities, anyway. It's different over there. And space here has been folded, train your Absolute Frozen Field here. Maybe, if you train your move here for some time then you may be able to incorporate the power of space into your field." With that, Lin Rui has already sat down in the snow.

Phoo~

Seeing Lin Rui just sitting down like this, it seemed that he was going to stay a little longer, and Iceman had to sit down with him. Just like Lin Rui said, he just wants to train his abilities so it's the same everywhere. If space here is really so magical then maybe Iceman really has the opportunity to add something to his Absolute Frozen Domain.

"JARVIS, have you found anything?" Lin Rui who sat down quietly communicated with JARVIS. Lin Rui had not spoken to JARVIS for half an hour since he released his Psychic Power.

However, after Lin Rui asked, there was no answer from JARVIS in the headset. Even if JARVIS couldn't analyze the situation here, he wouldn't stop talking. So, something must have happened.

"En? Disconnected? The connection with the League of Defenders and SHIELD are also broken?!" Without waiting for a reply from JARVIS, Lin Rui soon found out that he had lost contact with the outside world.

"Iceman, can you still contact X-Men or SHIELD?" The connection on his side was broken so Lin Rui turned his head to look at Iceman and asked.

"Why can't... Um? No signal?!" Hearing Lin Rui's words, Iceman began to contact X-Men with some doubts, but he frowned when he was halfway through the conversation.

It appears that Iceman's communications were disconnected at some point.

“The signal was cut off, it seems that something is really going to happen here. Moreover, it should have started happening only recently!” Without trying to contact JARVIS or anyone else in the League of Defenders, Lin Rui glanced at the surrounding ice fields and spoke.

Hum~

### **Chapter 693 Fluctuation**

No sooner had Lin Rui finished whispering, an obvious Spatial Fluctuation rushed out of the Ice Field. Lin Rui and Iceman sitting on the Ice Field instantly sensed this Spatial Fluctuation and a faint Azura light flashed in their eyes.

A layer of Internal Energy had already rushed out of Lin Rui’s body. Then, Lin Rui moved closer to Iceman.

Although Lin Rui is sure to use his Internal Energy to defend against the Spatial Fluctuations coming from below but with Iceman by his side, his Absolute Ice-Bound Field is obviously more effective.

Phoo~

When Lin Rui released his Internal Energy Defensive Layer and approached him, Iceman had already released his Absolute Frozen Domain in an instant.

And just when Iceman’s Domain had just enveloped him and Lin Rui, who had come over, the Spatial Fluctuations rushing out of the ground had already swept towards them.

Kakaka!

The sudden burst of Spatial Fluctuations directly smashed against Iceman’s Absolute Ice Field. In the next moment, a thick layer of ice appeared on the outer layer of Iceman’s Absolute Frozen field and as the Spatial Fluctuations continue to sweep through, the ice layer rapidly thickened.

“Cough Cough!” A burst of ice blue light emerged from his eyes as Iceman coughed twice. Blocking the impact of this Spatial Fluctuation had obviously made him struggle.

“Holy sh\*t! Iceman, you can’t block it, can you?!” Seeing Iceman’s state, Lin Rui asked with great surprise.

Although the Spatial Fluctuation impact in front of him is very strong, but Lin Rui has also seen the power of Iceman’s Domain so blocking this should not be a problem for him but the situation is obviously not right.

Kakaka!

In the time it took Lin Rui to ask this question, the ice in the outer layer of the Absolute Frozen Domain had quickly spread to the inside, and if this continued, Lin Rui and Iceman would soon be sealed inside by the ice layer.

Originally the Absolute Frozen Domain was used to block the impact of Spatial Fluctuations, but now it seems that they will be trapped by the Absolute Frozen Domain.

Hearing Lin Rui's words, Iceman, who was trying his best to control the Absolute Frozen Domain, almost broke the Absolute Frozen Domain.

If Iceman hadn't just used this Absolute Frozen Domain to fight Lin Rui's Psychic Power for half an hour before this then he would have been able to block the impact of the Spatial Fluctuations very easily.

But now, he simply hadn't recovered much of his powers to release the Absolute Frozen Domain again. Even if the environment here has a strengthening effect on Iceman's ability, the Absolute Frozen Domain is not something that can be used whenever he wants.

Siii!

After holding on for another two seconds, the ice in the Absolute Frozen Domain had already piled up in front of Iceman and Lin Rui and would freeze them in the next moment. And at this time, Iceman is finally unable to hold on.

"I can't hold on! You do it!" Throwing the last trace of power out of his body, Iceman quickly shouted towards Lin Rui beside him.

Hum!

As Iceman finished shouting, the Absolute Frozen Domain that had been compressed instantly disappeared, and the ice layer that was used to resist the impact of Spatial Fluctuations also stopped. However, without the ice barrier, the subsequent spatial fluctuations directly rushed in.

"Damn it! How did you drop your Domain at a critical moment!" Seeing the disappearance of the Absolute Frozen Domain, Lin Rui shouted helplessly and stopped in front of Iceman.

Omm!

A flash of Azura light flashed as Lin Rui instantly pulled out the Beheading Spirit Sword from his waist. Lin Rui's Internal Energy Defense can only protect himself and not the people in his vicinity like Iceman's Absolute Frozen Domain.

Therefore, he has to work hard to solve the current dilemma they were facing. Isn't it just a Spatial Fluctuation? He can just split it with his sword!

"Break!" With his right hand gripping the Beheading Spirit Sword, Lin Rui let out a low shout and quickly slashed forward.

Brush!

Kakaka!

Then, a dazzling Azura light burst out in front of Iceman, who was a little weak because of his energy consumption.

In the next moment, a few meters thick ice layer in front of them directly shattered into Ice chips. The power of the sword that broke through the ice layer did not diminish and continued to rush towards the Spatial Fluctuations outside.

Rumble!

...

Just when Lin Rui and Iceman encountered an accident on the Ice Field, in the SHIELD temporary base tens of kilometers away from them, people weren't exactly having a smooth sailing here.

The originally well-organized base now looked a little chaotic, with roaring noises and weapon sounds coming out from time to time. From the outside, it looks like a war is going on inside this base.

Bang!

Rumble!

Several white lasers rushed out from a warehouse in the middle of the base, and then the warehouse collapsed. The collapsed warehouse raised the snow on the ground, and in the chaos of the ruins, several figures that were obviously not human were quickly moving through.

"Damn! They are too fast! Where are the people from S-Squad? Block the eighth and ninth districts!" The Captain of the K-Squad shouted angrily as they watched the silhouettes move fast through the heavy snow and ruins.

"Yes! Captain Charlie!"

"The others, follow me! They must be stopped here, if they are let go..."

Then, Team K, which ranks first in combat effectiveness in SHIELD, has tracked those figures in an orderly manner and distributed them all over the base.

Except for this situation in the middle of the base, the situation at the core area where the Space Portal is located is even worse. However, there are also some strong people in the entire base here. Therefore, it is also the safest place.

Boom!

A Shield smashed into the ugly-looking monster and Captain Rogers scanned the surroundings with a cold look in his eyes.

In front of him, there are dozens of monsters around the Portal that look similar to hounds, but are much larger than hounds and have much stronger attack power. At this time, they are running fast, creating chaos in the base.

These Monsters had suddenly rushed out of the Portal five minutes ago. As soon as they rushed out, they frantically attacked all the movable things in front of them. Rogers and the others were the first targets to be attacked.

If it weren't for the fact that many Strong People were guarding the Portal, there would have been a lot more casualties.

Hoo! Bang! Hoo!

"Is it an error in judgment or did something changed in the Portal? What happened to Dr. Banner over there?" Rogers stared at the Portal in front of him and thought silently in his heart.

Originally, Rogers and the others had determined that this Portal should be a one-way Portal after preliminary research.

Later, the Drone could transmit back the information so although they knew that the Portal was not purely a one-way Portal, but at least nothing from that place had come here so they relax their vigilance.

And now that so many monsters had suddenly rushed out of the Portal, a bad feeling began to appear in Rogers' heart, and this feeling was slowly deepening.

## **Chapter 694**

Instead of letting that bad feeling spread in his heart, Rogers waved his hand and ordered the man next to him, "Go all out and attack them with our whole power! We are going to seal this area!"

Regardless of what happened to the Portal, the best thing Rogers could do now was to lock it down.

In the beginning, a few monsters had rushed out of the Portal without being stopped, but the rest were blocked by the SHIELD, X-Men, and League of Defenders. So, as long as they seal it off completely then no matter what happens next, the situation would be still under their control.

After Rogers gives the order, Daredevil and others, who are also fighting the monsters, took it a lot more seriously. Although the X-Men and League of Defenders were not affiliated with the SHIELD, Captain America's identity allowed him to issue orders in such a situation.

Then, Captain Rogers guarded the place near the Portal, Jack was also very close to Portal, and Blink on the X-Men side also approached this place. Rogers is also worried about Dr. Banner's situation.

Although Blink and Jack's abilities are inexplicably suppressed in the area surrounding the Portal, they can still be useful in the fight. By staying next to the Portal, they can better cope with the monsters that might rush out.

In addition to Rogers, Jack, and Blink, Daredevil and Harry of the League of Defenders stood in front of a passage, and with their strength, no monster could rush past them.

Colossus and Storm, who had already returned, guarded the opposite passage, also preventing the monsters from fleeing. As for the remaining channel, Falcon and Hawkeye were left from the team and they could easily deal with the Monsters with their tech and weapons.

Boom!

"Haha! Get the hell back!"

With a loud sound and roar, a monster's body directly flew over Blink's head and smashed into the Portal. The one who killed a monster so furiously and threw it into the Portal was obviously Colossus.

Although these Monsters have very large bodies and they are fast and strong but Colossus can still take them apart relying on his strong defense and metal fists.

Compared with Colossus's violence, Storm's efficiency is a little low. It's not that Storm's strength is lower than Colossus. If a comparison is made in terms of round strength and explosive power then Storm would undoubtedly be much stronger than Colossus.

But what Rogers asked them was to block this place. If Storm drove a Thunder Strike from the sky to this place then the building would be split apart and that would create a whole new set of problems.

Therefore, she can only control the power of her shots, so her efficiency will naturally be lower than that of Colossus.

Pū Pū Pū!

“Daredevil, still no contact with Mirage Knight?” Harry asked Daredevil, who was flanked by him, as he waved a volley of bullets that killed an oncoming monster.

Harry finally followed Lin Rui to participate in an Alliance Mission this time, but they unexpectedly encountered such an accident.

Fortunately, Harry’s body has been constantly strengthened to the point that he now has Super Strength and coupled with the continuous upgrade of the Exoskeleton Armor on his body, his strength has greatly increased, otherwise, Harry would have found this battle a little difficult.

“No, I can’t get in touch with him yet. Jerry, however, knows where Mirage Knight disconnected. He has been in touch with Jarvis, and an Iron Man Armor has come to see the situation.” Despite being in the middle of a battle, Daredevil still answers Harry.

In Mirage Knight’s absence, League of Defenders is lead by Daredevil. It’s not that Daredevil has a higher status than Jack and Harry, but Daredevil is after all a veteran member and has a calmer personality.

Brush! Pū!

“I hope nothing’s happened to him. These Monsters aren’t very powerful, but I wonder if there’s anything going on in that Portal. Do you think Mirage Knight would regret leaving if he knew what is happening here? He loves to meddle in unexpected situations.” Harry worked with Daredevil to kill two monsters as he spoke. Obviously, the current situation doesn’t make Harry feel too nervous.

Daredevil gave no response when Harry mentioned Mirage Knight, they both knew that with Mirage Knight’s current strength, even if he encountered any unexpected situation, he would be able to deal with it.

But when Harry said that there might be some unexpected situations on the Portal, Daredevil’s heart shook.

“That shouldn’t be the case here, Harry doesn’t have a Black Mouth like Deadpool.” Daredevil glanced at the Portal as he silently thought in his heart.

Hum!

However, just as Daredevil’s eyes shifted to the Portal, the portal, which had been quiet for a while, started vibrating again. Then, in front of Daredevil’s widening eyes, a tall, humanoid figure burst out of the Portal.

After the Humanoid Monster rushed out of the Portal, many Monsters similar in appearance to hounds but many times higher in size and strength also appeared with him.

“Humanoid Form?! This is where things get complicated!” Daredevil muttered with a wry smile on his face at the sight of the tall figure who had completely stepped out of the Portal.

It has only been about ten hours since X-Men had discovered this Portal, and it took even less time to establish a temporary base after SHIELD was notified.

Although they didn’t know when this Portal had appeared, they at least know that it hadn’t come into existence too long ago.

During these hours of hurried research, they came to the conclusion that the opposite side of this Portal is undoubtedly a place that is different from the Earth.

And Dr. Banner, who had gone inside the Portal also sent back the exact information. Although the opposite side is not the cosmic sky like they have imagined, it is indeed an extraterrestrial place different from the earth.

But the development of things did not go as smoothly as everyone expected. First, the rope connecting to Dr. Banner broke, and after a few minutes, many Monsters rushed out of the Portal.

If it was only this then with the SHIELD, X-Men, and the League of Defender’s combined forces, they had enough power to cope with it. After all, they have long known that there is more than a civilized planet in this universe, and it is normal for a Planet to have some other Animal Lifeforms.

However, having a brutal and powerful lifeform and having a high-level Civilization are two completely different concepts.

For example, before the appearance of human beings on earth, there were many Lifeforms that were much stronger than the current beasts.

However, there was no civilization on earth at that time, and the overall strength of the Earth was not as good as it is today.

The appearance of the tall Humanoid Figure represents that there is at least a civilization on the other side of the Portal and the collision of two civilizations would undoubtedly be a violent affair.

### **Chapter 695 Surprise**

After Daredevil saw the tall figure, Rogers, Blink, and Jack who were closest to the Portal, also saw it. However, although they were all very wary of the person who had appeared from the Portal, they did not make the first move to attack this figure.

Obviously, their judgment after seeing this figure is the same as Daredevil, this is the collision between two civilizations. So if this is not handled well then that the result would be something that no one wants to see.

Da Da~

Under everyone’s tense and grave gaze, the tall figure that came out of the Portal finally revealed its full appearance.

From the appearance, this guy is not special except that he is very tall, and his size and body type are comparable to Colossus who is still punching a monster, but there is nothing special for it.

However, this tall guy was wearing a very flashy armor, as if made with the bones and skin of various powerful lifeforms. And he also wore a skull helmet made of bones on his head, and there was a protruding spiked bone at the front of the helmet.

If this guy's body shape and decorations are still acceptable to be similar to those of human beings on earth, then his appearance is completely out of the category of human beings on earth.

The dark gray skin looked like scales, which looked very scary, with a mottled Axe in his drooping hand, and sharp nails at the tips of his long fingers. As for the guy's face, it was impossible to tell that it was a person.

This creature has the same two eyes, one nose, and one mouth, but its ears are invisible because of the cover of the helmet. But his eyes, nose, and mouth are completely different from human beings, they seem to have evolved from some beast, and they look very vicious.

After walking out of the Portal, this humanoid creature stopped about one meter away from it. Then, this creature scanned the surroundings with a condescending expression on his face and it looked like this creature was judging the situation he was in at this time.

There were no fluctuations in this big guy's fierce eyes when he saw those monsters being eliminated and killed, but he paid more attention to the situation of Colossus and the others. Finally, the big guy's gaze withdrew and fell on Rogers, Blink, and Jack, who were closest to him.

"@#%&@%#\*&....." Staring at the three men who were watching him with alarm, the tall fellow opened his withered bark-like mouth and uttered a long string of words that no one could understand.

Rogers' eyes flashed when he heard the Alien speak.

Although he didn't understand what the guy in front of him was saying, if the two civilizations can talk to each other without raising their weapons against each other then there would still be a chance to avoid war.

So, after quickly thinking about the situation at this time, Rogers also spoke up.

"I don't understand what you're talking about? But can you stop these monsters?" As he said, Rogers also gestured to express his meaning.

Although there are countless languages ??in this world, body language is quite similar everywhere. Rogers believed that the big guy in front of him should be able to understand him if he wasn't a fool.

Of course, Rogers not only made a gesture to communicate with the other party but he also secretly communicated with Jack and Blink.

If there was any change in the guy in front of him then they would instantly destroy him. It would be nice if there were peaceful exchanges, but if not, then they would also not back down.

Jack and Blink, who received Rogers' signal, nodded silently, and they were also ready to take action at any time. Although their powers are somewhat suppressed, Jack, as a Sorcerer has other magic.

Moreover, Blink's ability is the power of Space. Although it is suppressed very strongly in this situation, it is not impossible to show her strength if it comes to that.

After Rogers spoke and gestured, the big guy tilted his head as if thinking about something. Seeing the big guy in front of him, Rogers felt a little relaxed. It seemed that this guy wasn't from a barbaric civilization that couldn't be reasoned with.

But the next moment, the big guy who seemed to be thinking about the meaning of Rogers' words suddenly raised his right hand. In just an instant, the Axe he was holding in his hand flew out and slashed towards Rogers's chest.

Sii!

When the Axe covered with dark-red mottled color had already cut into Rogers' chest, a cracking sound came out, which showed the swiftness of that guy's strike and the power of his force.

"Damn it!" Rogers stared at the huge Axe that had smashed into his chest, and he only had the time to let out a curse in his heart, but it was too late to react and block it with his shield.

Buzzing~

And just as the Axe got closer and closer to Rogers' chest, a golden light quickly appeared on Rogers' chest, and it was Jack who moved.

However, at the speed at which the golden light appeared, the Axe would definitely strike Rogers before this magical defense was formed.

"Come on!" Seeing that Rogers was about to be hit by the Axe, Jack, who had already made his move roared in his heart. He had already aroused his strongest power.

Hum!

Pū!

Finally, when the axe was less than twenty centimeters away from Rogers' chest, a Golden Shield of light appeared on the front of the Axe, but it looked a little illusory.

In order to accomplish this magic, Jack couldn't condense too much magical energy in a hurry. And the next moment, the Axe slashed on the golden light shield, and a soft sound was heard as the golden light shield shattered, it couldn't stop the power behind the Axe!

Pū!

As the golden light shield shattered, Jack, who was not far away, was shocked, and a mouthful of blood was already spouting from his mouth. He had done the best he could in this time, at least he had helped Rogers and others gain a little reaction time.

"Block it!" Although the golden shield shattered in an instant, it also gave Rogers a moment of time, so Rogers had already raised his shield in half. Although the Shield could not be completely put in front of him, the Axe would not be able to completely cut into his chest.

Brush!

And at the moment when Rogers' shield was half raised, a red figure suddenly rushed over from the side and crashed into Rogers in the nick of time. This sudden figure rushed sideways, just so that Rogers's body fell into the direction of the shield.

Dang! ~~

In the next moment, the Axe had already hit Rogers. But at this time, Rogers, who was slumped, just used his Shield to block the attack. A loud noise accompanied by a strong shock wave rushed out of Rogers's shield that swept directly across the battlefield.

## **Chapter 696 Collaborates**

Hoo!

With that strong shock wave sweeping out, this large chamber that was built to separate the Portal from the outside world actually shook.

One must know that in order to ensure safety and to prevent dangerous particles that may rush over from the Portal from affecting the earth, this huge chamber is built according to the highest specifications. Although it was a little rushed, but its defensive power is not weak.

It is such a strong defensive chamber. After suffering the destruction of those monsters and Colossus, Harry, Storm, and others, it finally suffered damage under the shockwave. And, of course, that also shows how powerful the blow that Rogers just blocked was.

Bang Bang~

After the shock wave swept through the area, the two silhouettes flying out at an angle hit the solid wall and fell down. Obviously one of these two silhouettes was Captain Rogers.

Although Rogers had blocked the Axe with his shield, but the force behind the attack had hit him and left him with a nasty wound.

As for the guy who kicked Rogers at the last minute, he was lying on his back with one leg across Rogers's chest, in a very awkward position. And this unexpected figure is none other than Peter Spiderman, who has come in a hurry from New York.

Peter's Spider-Sense alerted him of danger as soon as he arrived, allowing him to rush to Rogers' rescue at the last moment. If it hadn't been for Peter's kick, Rogers would have only been able to block half the force of the Axe and he would have been seriously injured.

"Cough!" After coughing twice, Rogers forcefully removed the leg that was resting on his chest.

Looking at the shield that landed not far from his side, Rogers had a lingering fear in his heart. Had it not been for Jack's action and the appearance of Spiderman at the last moment, Rogers would really be in danger of losing his life!

Although he doesn't know why the big Alien guy suddenly attacked him but it was clear that Rogers' initial plan had not worked. After that guy attacked him, no matter what Rogers had planned before, it would be impossible to implement that plan now.

In fact, without Rogers having to give any orders, everyone else who was watching had already done the same thing after the big guy took Captain America out of the air with a single blow.

With the exception of Jack, who was a little injured, everyone else in the room abandoned the remaining monsters to attack the big guy.

Hoo!

When Rogers and Spiderman flew out, a cold light had already shot out towards the Big Guy from the inconspicuous corner of this secret room. Hawkeye had already made his move before everyone!

As a member of the Avengers, Hawkeye has been paying attention to the situation on Rogers's side. The moment the Big Alien threw the axe, Hawkeye had already attacked.

Buzzing~

As Hawkeye's arrow hit the Big Alien, a Spatial Fluctuation appeared beside the Big Alien.

Different from the stable and peaceful space power of the Portal, the space fluctuations that occurred at this time were very sharp, and it was the space power that was enough to cut everything.

Obviously, Blink had also made her move and she intends to wipe out the guy in front of her in one fell swoop.

In addition to Hawkeye and Blink, everyone else is also attacking the Big Alien. However, their attacks are slightly behind Blink and Hawkeye. However, if all of these attacks were hit, even Hulk would not be able to come out unscratched.

Facing the sudden attack in front of him, the Big Alien's dark eyes flashed a few times. In the next moment, attacks from the Avengers, X-Men, and the League of Defenders had all hit him.

Boom!

Rumble!

In an instant, the big guy who did not dodge was covered by a violent fire, from which a burst of powerful shock waves rushed out one after another. Faced with the unfriendly attitude of this extra-terrestrial humanoid lifeform, everyone present chose to destroy it without holding back!

Hoo!

And when Hawkeye and others joined forces to attack the big guy, a figure quickly rushed to the place where Rogers and Spiderman fell. Reaching out to support the two injured guys, Daredevil breathed out a sigh of relief.

"Spiderman, you came just in time!" Daredevil said as he lifted Spiderman up. If it wasn't for Spiderman's last kick this time, Captain America would not know what it would be like.

"Uh-Oh! It hurts!... Hey? Of course, I came in time!" Originally, Peter yelled twice because of the pain when Daredevil lifted him up but then he suddenly resisted the pain when he heard his words and spoke with a smile on his face.

Peter was able to save Captain America this time and he can now brag about it for the rest of his life. Moreover, Peter was originally a fan of Captain America. One can imagine how excited he is seeing as how he is also a fan of Captain America.

“Captain, are you okay?” Without speaking any more to Spiderman, Daredevil looked at Rogers and asked with some concern.

Daredevil has been at SHIELD for a long time now, and he also sincerely respects Rogers because of his character, so now he is also concerned about his situation.

“I am okay, two broken ribs at most!” Rogers replied with a wave of his hand when he heard Daredevil’s words.

With the physical fitness of the Super Soldier, two broken ribs are really not a serious injury. Moreover, there are more important things to deal with right now, even if Rogers is seriously injured, there is no time to deal with it now.

“Who is that big guy? Why did he suddenly attack Captain Rogers? And, I am also getting a very bad feeling from him.” Peter, who knew the severity of the situation now, was no longer sloppy, as he turned his gaze to the Portal and asked.

Boom!

Huhu~

After Peter’s questioning, the area in front of the Portal surrounded by flames and explosions finally weakened, and it gradually revealed the situation inside.

However, to everyone’s surprise, there was a tall figure standing there. Under such a high-intensity joint attack, even a piece of superalloy would have been destroyed by them, so why can that guy still stand?!

Huhu~

After another two seconds, the automatic exhaust system in the secret room blew away the smoke and dust and Rogers and others were finally able to see the situation of the big guy clearly again at this time. However, after seeing the big guy, the expression in everyone’s eyes changed.

### **Chapter 697 Severe Wound**

Huhu~

The last trace of dust was blown away, and the situation in front of the Portal was completely exposed in front of Rogers and others.

“That... How is this possible?! Even a man of iron could not have survived that attack!” The first exclamation came from Peter, who didn’t get an answer because he saw that the guy who had hit him and Captain America with an Axe was still standing there as if he were unhurt.

Everyone at the scene was surprised when they saw this scene. Because the previous round of combined strikes was enough to wipe out anyone in this world, at least no one they know now can take

up the previous round of attacks (Bruce Banner is now on the Portal, he's no longer on the earth so they didn't count him).

However, the guy in the leather and bone armor did not look much injured. Except for the sharp arrow inserted in his chest, no other injuries can be seen on this Big Guy's body.

And although Hawkeye's Arrow has been inserted in his body, the big guy didn't even frown, and nothing blood-like appeared at the location where the Arrow was inserted, and it was as if it had been inserted in a dummy.

"Humph! I'll do it!" After the initial surprise, Colossus roared and already lunged towards the big guy.

That round of attacks just now was the premises of the long-range people of all the forces on the spot, and the melee people hadn't struck yet.

If those long-range attacks are ineffective against the guy in front of him, then Colossus will have to show him if his iron fist is hard enough. And, compared to the size, Colossus is not much weaker than that big guy.

Huhu~

"Be careful! Colossus!" Storm's voice sounded from behind as Colossus' huge fist blasted the head of the big guy who seemed to be frozen in place.

No one knows what Storm saw, but Colossus was already in front of the big guy and his fist was already out, and it was too late to stop it now.

Therefore, although Colossus knew that the strength of this guy was definitely not simple, he didn't plan to back down, instead, he increased the power behind his fist.

Boom!

In the next moment, Colossus' iron fist blasted on the head of the big guy in front of him, and unexpectedly, the big guy in front of him didn't even perform any counterattack.

However, Colossus felt that his punch had hit the withered bark of a hundreds-year-old tree and he didn't feel any sensation of hitting a flesh and blood body.

But Colossus didn't have much time to consider why the guy in front of him didn't dodge and counterattack, because he had already felt a sense of extreme danger in his heart after hitting the big guy.

"Fuck!" Colossus whispered after sensing the danger in his heart.

Hoo!

In the next moment, the fist that had hit the Big Guy's body had been taken back, and Colossus crossed his other arm on his chest before he retreated, Colossus is trying to protect himself with a defensive posture.

Boom!

As soon as the Colossus fist was pulled back and his arms were crossed over his chest, a dark shadow quickly hit him and just hit the crossed arms of the Colossus.

The body made of high-strength metal with a net weight of several tons was directly hit by this dark shadow and flew up in the air. If someone could see Colossus's expression at this time, they would see a dark black substance appearing on his dark silver face.

Huhu~

Colossus flew upside down and he temporarily lost control of his body. If he flew out at such a high speed then he would definitely suffer injuries when he lands.

And just as Colossus flew, a Golden Portal suddenly appeared behind him, and Jack, who was slowing down, had made a move to save Colossus.

In the next moment, the burly figure of Colossus fell into the Magic Portal and appeared in another location, where a spider web had been waiting to catch him.

Tear~

"Almost missed!" Watching Colossus who fell and almost smashed a hole in the web he had prepared, Peter murmured nervously next to him.

"Are you okay? Colossus!" After Colossus was caught by the spider web, Storm rushed over and asked with a worried expression on her face.

The reason why Storm had to remind Colossus to be careful just now was that she had suddenly noticed that the Portal had changed.

And when the Portal changed, a black shadow had rushed out, flying directly over the guy who was knocked down by Colossus and hitting Colossus on the chest.

"Cough cough! I won't die just yet!" Colossus was still a little out of breath as he endured the pain in his arms and chest.

"Don't act without thinking, leave it to us!" Seeing the gloomy expression on Colossus's face, Storm didn't know what the situation would escalate to so she said in a serious tone.

Although the X-Men are led by Iceman this time, Storm is still the leader, not to mention that Iceman is not here now.

"I can still... Okay." Hearing Storm's words, Colossus wanted to insist on fighting, but after seeing the serious look in Storm's eyes, he finally compromised.

At this time, Colossus noticed the changes in the situation on the Portal. He also saw what it was that attacked him just now and seriously injured him.

It was a hammer, a black hammer similar to the Axe used by the big guy to hack Rogers and Spiderman!

In addition to the hammer, there was already another person in front of the Portal, this person was a big guy who looked almost the same as the guy who was suddenly knocked down just now.

At this time, Rogers, Daredevil, and the others had surrounded the Portal, tightly surrounding the newly-emerged guy in the center.

As for the monsters that were running around before, Harry and the others had already cleared them out. Now those Monsters are not important anymore, only these two “people” are important.

Hoo!

In front of Rogers and others, the newly appeared big guy picked up his hammer on the ground, and then he glanced at the guy who had fallen to the ground, and then his eyes flashed with a few hints of surprise.

Because, in his senses, this fallen companion beside him seemed to be dead. But powerful warriors like them were almost invincible and immortal, so why would they die after entering such a civilized land that should be incomparably weak?

This was something he didn’t understand very well, and that’s why he felt a little alarmed at this time.

### **Chapter 698 Counter-Attacks**

It turned out that the first big guy who came out of that Portal had died after being hit by the Avengers, X-MEN, and the League of Defenders. It’s just that his powerful body didn’t show many wounds in a series of attacks, but he himself was dead.

Also, if this guy was able to survive being attacked by so many Superheros and powerful warriors, then he would have been able to sweep the entire earth alone.

If Colossus knew that the guy he punched was already dead, and he was severely injured by a sudden blow from behind because he rushed over in a hurry then I don’t know how wronged he would feel, this is really a disaster!

And as the guy who fell on the ground remained silent, Colossus and the others on the scene almost guessed that the guy should be dead, and everyone felt very speechless in silence.

And now, because of that new guy, Rogers and others have no extra time to lament about the scene that had just occurred in front of their eyes. Although that guy died under the combined attacks of everyone, it still couldn’t hide his powerful strength.

At least, his only attack wounded Captain America and Spiderman. Therefore, everyone is now paying attention to the new guy who suddenly appeared in front of them.

Whether it was the behavior of the guy who died at the beginning or the attack of the new guy just now, it showed that the civilization they represented could not live in peace with the earth.

Therefore, in order to protect the safety of the earth, Rogers had already condemned the guy in front of him to death. Moreover, this Portal, which may bring countless benefits to the earth, has also become a terrifying threat in Rogers’ heart.

Phoo~

When Rogers and the others were staring at the guy who had no weapons, the guy suddenly raised his hand.

Then, the hammer that had previously smashed into Colossus suddenly flew from the ground and quickly rushed towards the person's position. And looking at that guy's appearance, it seemed that he didn't intend to say anything to the guys in front of him.

"Attack!" Before the hammer could fall into that guy's hand, Rogers waved his hand and gave the order to attack.

Regardless of whether the guy in front of him got the hammer back to him to attack or just because he wanted to get back his weapon, Rogers wouldn't let him do it.

Now the situation inside the Portal is unknown and he doesn't know if Dr. Banner was still alive or not. So Rogers won't allow this guy to go anywhere.

If Dr. Banner had not entered the Portal then Rogers and the others could have chosen to destroy the Portal.

Although they would have lost an opportunity for the earth to contact the universe for benefits, it would have prevented the earth from being invaded by other civilizations in the universe.

But now, Dr. Banner is on the other side of the Portal, so Rogers and the others cannot destroy the Portal. Not only can they not destroy it, but they have to rush to rescue Dr. Banner after defeating the guy in front of them!

Crack!

As soon as Rogers' voice fell, a thunderbolt smashed from the side and directly fell on the big guy's body. After Colossus was injured, Storm couldn't hold back, but for the sake of the overall situation, she persisted until Rogers issued an order.

So, this time, Storm almost used her full power and she didn't care if she would destroy this room.

Anyway, the monsters rushing around have been wiped out, and it doesn't matter if this room is destroyed. Moreover, if a war really breaks out, this room will not really last for long.

Boom!

However, to Storm's surprise, her almost full-powered attack only knocked the big guy back by two steps, leaving a scorched black mark on the guy's chest.

It seems that Storm's signature Thunder attack was absorbed by the weird skin armor on the big guy's body and it didn't cause much harm to him at all.

Shout!

And just after Storm took the shot, a black line almost chased after the thunder that quickly shot at the guy's head, it was Hawkeye who made the next move!

Although the guy who died before left no traces of injuries, Hawkeye's arrow was still stuck in his chest which means that this guy must not be able to prevent Hawkeye's arrows!

Sii!

However, when Hawkeye's arrow was less than half a meter away from the guy's head, the hammer in his hand had already flown back. The guy reached out his hand to hold the handle of the hammer, and then lifted his backhand to block Hawkeye's arrow.

Bang!

The arrow exploded at a position one meter beside the guy, and the turbulent explosion shock wave instantly rushed towards him.

But for the explosion that happened next to him, the expression in the guy's eyes didn't fluctuate much. That's right, even Storm's thunder attack couldn't hurt him, so the power of the explosion didn't make much of a difference.

However, just when this big guy got his own hammer and was about to start a counterattack, a series of attacks had already rushed over. The first attack that fell on his body were several whips made up of several golden rays.

The injured Jack was supposed to go to rest like Colossus, but he felt the great danger from the guy in front of him, so he had to fight but it aggravated the injuries on his body.

Hoo!

The golden whips under Jack's control wrapped around the limbs of the big guy, and then the limbs of the big guy were bound by the Golden Whip. Jack wanted to control his actions and make him a target for his teammates to attack.

However, the man whose hands and feet were entangled in the golden whip seemed to be enraged and a beast-like roar emerged from his throat before he broke free.

Collapse! ~~

He broke one of the golden whips and Jack's face on the other end of the golden whip became paler.

"Hurry up!" Desperately maintaining the control effect of the remaining whips, Jack gritted his teeth and shouted.

Brush!

"Here I come!" When Jack couldn't hold on, a red-figure flew over and Spiderman's voice also came out.

Pū Pū Pū!

Several webs were fired from Peter's wrist and stuck to the guy's body, then Peter dragged the webs before falling behind the guy, and cooperated with Jack to control the guy's actions.

Although strong currents are constantly being emitted from the spider silk, it seems to be of little use to the enemy in front of them.

After Jack and Spiderman both controlled the guy's limbs so that he could not move, Rogers and Daredevil finally rushed over. In the next moment, Captain America's shield and Daredevil's stick had already hit the guy's head with their full force.

### **Chapter 699 Reappears**

Boom!

Collapse! ~~

Pū Pū!

Several different sounds came from the center of the battle. The first sound was the sound of Rogers's shield and Daredevil's stick hitting the enemy and the second sound was the sound of the guy breaking Spiderman's web and Jack's golden whips.

The sound right behind that was the sound of the enemy swinging his hammer towards Rogers and Daredevil.

Although Rogers and Daredevil both blocked the attack with their weapons, they still flew back faster than they had arrived.

The tall guy also bent down at this time, apparently unable to maintain his high standing posture under the combined blows of Rogers and Daredevil.

Swipe!

"Ahhh! Shoot! Shoot! Shoot!" Just when Rogers and Daredevil were repelled by the guy's counterattack, Spiderman behind him suddenly used his flexible body to his advantage and continuously fired spider silk threads around the enemy.

Of course, his mouth also didn't remain quiet, but no one knew if anyone here could understand what he was speaking at this time.

However, although Peter fired a lot of spider silk threads at the enemy, but the effect was not that great as the big guy just pulled off all the spider silks threads with his hand.

However, although these threads can't cause him any harm, at least it can disgust him and cause him a little trouble. And this is also what Peter wants because he has a lot of teammates with him here.

Shoo!

When Spiderman wrapped the spider silk around the enemy, Falcon and Harry had already released all their prepared attacks. In the next moment, dozens of micro-missiles and laser attacks greeted the enemy who was still tearing the web.

Rumble!

After the previous round of siege of the dead fellow, this room once again welcomed a powerful explosion shock wave.

“Roar! ~ ~ Roar!” The big guy who was enveloped by the explosion kept roaring, apparently, he was also very uncomfortable under such serial blows.

Listening to the roars at the center of the explosion, Rogers, who had fallen steadily to the ground, didn't have a good expression on his face.

Because, since that enemy can still roar like this then it means that an attack of this level will not cause him serious injury.

“Captain! The energy level in the middle is constantly increasing!” As Rogers waited for the explosion to reside and judge the situation, a shout suddenly came from behind him.

Hearing the reminder from behind him, Rogers' eyes flashed and he was not ready to wait for anything and rushed out again with the shield in his hand.

Today, they must solve all the crises that come out of the Portal, no matter what the price is.

Huhu!

Behind Rogers, Spiderman and Daredevil also followed. Hawkeye, Falcon, and Storm were slightly behind them, and Jack was also fully focused and ready to continue his attacks.

The thoughts in their hearts are the same as Rogers, no matter what comes from Portal, it must be resolved in this room!

Bang!

When Rogers and the others had rushed to the periphery of the explosion area, a tall figure rushed out of the flames. This figure looked like a demon who crawled out of hell, and there was still a burning flame on the bone armor of the big guy.

Ignoring the flames remaining on his body, the big guy was holding a huge hammer in his hand and just rushed towards Rogers and others.

“Attack with everything you got!” With an angry shout, Rogers had already jumped up to meet the enemy.

...

Back in time a few minutes ago.

Before the first humanoid life form appeared from the Portal, on the other side of the Portal, Dr. Banner was still studying the environment near the Portal in an orderly and swift manner.

Although the drones passing through the Portal have suffered a lot of damage, there are still a lot of them that can be used, so Dr. Banner tried to collect more and more reliable information and send it back to the earth.

And just as Dr. Banner was intensively studying the environmental information of this extraterrestrial planet, a dark shadow suddenly flashed behind him. Then, the two drones shattered behind Dr. Banner.

But because the environment here is very different from the earth, Dr. Banner did not find out what was behind him in time. So, when the dark shadow rushed from behind Banner, Banner couldn't respond to it.

Tear! ~

In the next moment, Banner, who was carefully collecting a piece of underground soil, felt a strong force coming from behind him, and this strong force not only threw him forward but also carried a very strong tearing force.

"Damn it!" Hearing the tearing sound coming from the Space Suit, the expression on Banner's face changed, and something was already in his mind.

Pū!

The weak Dr. Banner fell to the ground by the sudden attack from behind, but the Space Suit on his body that was sufficient to survive the harsh environment of the universe was directly torn open.

Moreover, the unknown thing that fell on Banner is still tearing his Space Suit. In just one second, Banner will be exposed to an extraterrestrial environment that is completely different from the earth.

"Although the environment here has some similarities with the earth, but I still can't live here even if it's me! It seems that there is only one way. I hope Hulk can find a way back later." Feeling the pressure against his body and with the violent tearing of the thing behind, Dr. Banner thought helplessly.

After so long of research and investigation on the surrounding environment, Banner has almost figured out the environment here.

Although there are many differences from the earth, it has not reached the absolute human forbidden zone and the environment of Space. It is more similar to Earth but it is harsher and crueler and ordinary humans wouldn't be able to survive here.

And the lifeforms that can survive on such a planet must adapt to such an environment, and they themselves will inevitably be much larger and stronger than the lifeforms of the earth.

Tear!

Just as Dr. Banner thought about it, the last layer of his Space Suit had been torn apart. Then, the black claws grabbed Dr. Banner's exposed back.

However, the back of Doctor Banner, which should have become bloody under this sharp claw, had only a few shallow marks after the blow.

In the next moment, the color of Dr. Banner's exposed back skin changed rapidly, and it turned green in less than a second!

Stab!

As Dr. Banner's skin changed toward dark green, his body was swelling at a rapid rate. Just as the Owner of the claws continued to launch follow-up attacks, it suddenly discovered that the prey under its claws had become different.

The prey that had been under him turned into something that it couldn't even imagine.

"Hulk!" Banner, who had turned into Hulk, let out an angry roar as the remaining Space Suit exploded out from his body.

## **Chapter 700 Weak**

Stab!

Letting out a roar, Hulk had torn apart the Space Suit on his body and the remaining Space Suit entangled itself around his body.

The Space Suit, which was strong enough to withstand all kinds of cosmic rays and some accidents was torn apart like a poor-quality t-shirt, and then Hulk has thrown it out with a wave of his hand.

Even if this is not the earth and the entire environment here is completely unsuitable for the survival of the people on earth, but it seemed to have no effects on Hulk. After all, the Invincible Hulk is not just a nickname.

It is precisely because of this that Dr. Banner released the Hulk with confidence as only Hulk can help Banner survive such a crisis.

After Dr. Banner released the Hulk, his consciousness sunk deep into Hulk's mind. Last time, Dr. Banner released the Hulk to test SHIELD's strength, but Hulk was still under Banner's control at the beginning.

After all, Dr. Banner would not let Hulk cause heavy damage to SHIELD.

But this time, Dr. Banner almost directly gave full control to the Hulk because there is nothing Dr. Banner needs to pay attention to, and even if Hulk breaks something here, Dr. Banner wouldn't have to take any responsibility.

Moreover, Banner is not always able to reach an agreement with Hulk every time he transforms a Hulk also wants to come out with his full force.

"Roar~~~" Just after Hulk tore off the tattered Space Suit from his body and threw it away, a roar of wild beasts suddenly came from behind him.

Hoo!

Hearing the roar behind him, a green light flashed in Hulk's eyes, and then he turned around. When Hulk turned around, the two shadows had already rushed towards him.

Looking at the two black shadows, they are so fast that one can hardly see their trajectories in the dim surroundings.

Before Hulk had completely turned around, the two shadows had already rushed and attacked his chest. In the next moment, the four sharp claws had already grabbed Hulk's strong chest.

Ceng Ceng!

Turning half of his body, Hulk seemed to have no reactions to this sudden attack, letting the four paws scratch his chest.

The two dark shadows were ready to retreat immediately after the attack because although they had low IQs, they still had basic animal instincts. They also knew the results of the attack just now, so they turned their heads and retreated.

Because the paws that were strong enough to tear apart the gold and iron did not even leave a trace on the growing prey in front of them!

However, just as the two dark shadows were about to retreat, Hulk's thick arms had already come over them.

Even if the Hulk didn't react to their attacks at first, he wouldn't let them go at this time. Moreover, did they really attack the Hulk thinking that he wouldn't retaliate?

Pū~Pū!

Then only two muffled noises were heard and it was as if something had been smashed. Then Hulk raised his hand and waved it outwards, and the two black shadows were softly thrown out by Hulk, just like throwing two pieces of trash.

"Too weak!" The Hulk let out a low growl with disdain in his eyes when he threw away the two monsters who looked like oversized mutant hounds.

Swipe!

Just when Banner turned into the Hulk to solve his own crisis, there was a burst of rapid chaotic footsteps around him. Then, many pairs of blood-red eyes lit up between the dim mountains and rocks.

These red eyes were slender and fierce, and each pair of eyes represented a monster similar to those who had just been extinguished by Hulk.

"Huh!" Seeing that he was surrounded by countless monsters, Hulk sniffed and let out a sigh of disdain.

Judging from the attack on Hulk by the two monsters just now, these monsters would not be able to cause any harm to him even if he stood here and didn't make a move.

Hulk and these monsters are not on the same level at all and Hulk can slap them to death one by one. Even if he gets surrounded by a few hundred monsters, it is just a few hundred slaps, so Hulk felt disdainful towards them.

"Roar!..."

However, although Hulk knew that those monsters could not pose a threat to him, those monsters with low IQ also knew that the huge prey in front of them was not easy to mess with.

But they still roared at the Hulk and attacked him because they had a fierce temper engraved in their bones, and at this time, they also received what they felt was an attack order.

Huh~

Facing the monsters coming towards him from all directions, a green light flashed in Hulk's eyes. At the same time, he quickly raised his arms and then quickly clapped them in front of his chest.

“Hulk Clap!” With a roar, Hulk’s huge palms slammed against each other in front of his chest.

Boom! Hum~

In the next moment, a transparent shock wave rushed out from between Hulk’s palms, and it was swept out in an instant and rushed towards the monsters.

Pū Pū Pū~Pū Pū Pū!

The transparent shock wave spread out at an extremely fast rate and it reached the monsters when they were more than 30 meters away from Hulk. The monsters at the front have already been hit.

Then, the group of monsters that rushed to the front exploded into black flesh and blood in the sky without even screaming.

The flesh and blood scattered on the monsters that followed behind, not only did it not make them retreat, but it instead aroused their ferocity even more, and they rushed towards Hulk one by one while roaring desperately.

After paying the price of dozens of monsters, the remaining monsters finally rushed to Hulk. Then, they attacked Hulk just like the two monsters that were killed by him before did.

Huhu!

Facing the monsters that had fallen in front of him, Hulk did not use Hulk Clap anymore.

One of the reasons for that is that the Hulk Clap requires a lot of energy, and the other reason is that Hulk felt that these monsters in front of him weren’t strong enough for him to use his signature move.

Bang Bang!

In this way, Hulk kept waving his hands, sending the monsters flying in the sky. Hulk showed no mercy and almost every monster that was shot in the air died, and it was impossible for the rest to break through Hulk’s tight defense.

And even if a monster breaks through his defense, the seemingly sharp claws can’t even leave a trace on Hulk’s body.

“Too weak! Too weak!” Hulk roared as he slapped the two monsters.

However, the surrounding monsters didn’t understand what the prey in front of them was saying, and they didn’t know what fear and death was, so they used the corpse of their companions as a way to constantly attack Hulk.

And behind these monsters, several tall humanoid lifeforms are silently watching the situation here.
