

## Marvel 711

### Chapter 711 Return

“What is this familiarity? Could it be that the Alien Race behind these guys is the one that will appear in the original plot?” While landing, Lin Rui thought in his heart.

But for a while, Lin Rui, who hadn’t seen the guys with his own eyes, couldn’t really figure out what it was.

Phoo~

Finally, under JARVIS’s control, Lin Rui and Iceman landed steadily on the ground. In front of them, they found Rogers and others waiting for them.

Lin Rui and Iceman already knew that the news of them founding the Magic Cube must have reached them, so it’s normal for them to wait here for them to come back at this time.

Although the Portal is also very important but the Magic Cube which can create such Portals is even more important.

Moreover, among the people present here, almost everyone knows what the Magic Cube is. The Magic Cube is one of the top treasures in the entire Universe, and it is now in front of them so no one can remain reserved.

Kaka~

After landing, the two Iron Man suits quickly opened. Then, Lin Rui and Iceman, who were seriously injured, staggered and almost fell to the ground.

Fortunately, someone in front of them reached out to support them, otherwise, they would have really fallen down.

“Mirage Knight, are you okay!?” Spiderman asked with a concerned tone while supporting Lin Rui.

And Iceman was also being supported by Hawkeye and then he handed him to Storm and Blink who quickly came forward. Although JARVIS has already told everyone about Lin Rui and Iceman, they are still worried when they see them like this.

Since the Magic Cube contains infinitely powerful energy then the process of finding it and obtaining it wouldn’t have been easy. It can be seen from Lin Rui and Iceman’s situation at this time.

“I’m fine, I just need to rest for a few more days.” Lin Rui replied with a wry smile on his face.

Originally, Lin Rui thought that after returning from a foreign planet and solving the Killian and Extremis issues, he would be able to rest for a while, but he unexpectedly met Magneto who was fighting Stryker, and he was also injured because he was curious about Hulk’s strength.

He rested for no more than two days before another news came about the Magic Cube and Lin Rui was injured again.

Moreover, the injury Lin Rui suffered this time was more serious than the time when he fought with the Hulk.

If the injury at the end of the battle with Hulk was an external injury, then this time it was an internal injury, mainly caused by Lin Rui himself when he used more power than what his body could handle.

However, he was finally able to get the Magic Cube, which was inaccessible to everyone in the Marvel World. Although there is only one, Lin Rui is confident that with this Infinity Stone, the strength of the earth will be improved by leaps and bounds.

"That's good, we were worried about you." Peter, Harry, and others were relieved when they heard Lin Rui's answer.

Peter, Harry, and Lin Rui are good friends in real life everywhere. They are handsome teenagers, they have good grades, and their hidden identity is enough to make people feel amazing, but Lin Rui's adventurous character is really worrying.

And every time Lin Rui's adventures will hurt himself, although it is not fatal, it is enough to make people who care about him worry.

Da Da~

Just as Peter helped Lin Rui to stand still, Rogers quickly walked over to them. Looking carefully at Lin Rui, Rogers had some different expressions suppressed in his eyes.

"Mirage Knight, did you really find the Magic Cube?!" There were no extra sentences as Rogers directly asked the question he cared about most now.

That is to say, a person with a personality like Rogers will directly ask any question he has. After all, Lin Rui is still injured and most people will wait a while before asking this question and they would still offer some polite sentences.

Anyway, other people will let Lin Rui rest for some time before asking about Magic Cube. But Rogers was Rogers, and he was Captain America with the most integrity and upright character, and that kind of thing would never go wrong in any situation.

At least, no one else in the surrounding thought that Captain Rogers was asking this question at a bad time.

"Wow! Another guy with a low Emotional Quotient! I really don't know why people like such a person? If it weren't for the fact that you are Captain America, I would really have to give you a good talking to!" Hearing Rogers' words, Lin Rui secretly cursed Rogers in his heart.

Not only was Lin Rui complaining in his heart, but Iceman, who was held aside by Blink and Storm, twitched his mouth when he heard Rogers' words.

Blink thought it was because the wound on Iceman's body was hurting, and she deliberately relaxed some of the strength to support him.

"I really found it, do you want to look at it now?" Although he cursed Rogers in his heart, Lin Rui still nodded and replied.

Anyway, the people in front of him are insiders and his teammates in the alliance. In order to enhance the overall power of the earth, these people will need to benefit from the Magic Cube.

Moreover, Lin Rui did not intend to swallow the benefits of Magic Cube at first. Although, the temptations of the Magic Cube are quite big for Lin Rui.

Hearing Lin Rui's definitive answer, the depressing light in Rogers' eyes brightened, almost rushing out. However, he still suppressed his emotions.

"Don't, let's go in!" After making sure that Lin Rui got the Magic Cube, Rogers said with a wave of his hand.

Then, he had already turned around and walked towards a back room and Hawkeye and others were of course following Captain America.

"Let's go in, it's time for you all to see what this magical Magic Cube is like." Seeing Rogers turning back, Lin Rui said to Peter and others who were still standing around him.

"Well, slow down." In response, Peter helped Lin Rui and slowly followed Rogers and others to the secret room.

"Let's go in too, the Magic Cube, that's a special item that would make people attracted to it at a glance!" After the League of Defenders people followed up, Iceman was walking with Blink's help also followed with others.

...

After half an hour, everyone walked out of the secret room again. However, the expressions on everyone's faces at this time are somewhat similar compared to the expressions when they just entered.

There seems to be a feeling of suffering from gains and losses. It seems that everyone is attracted by its special beauty after seeing the Magic Cube.

Of course, there are also some normal ones. Well, it can't be said to be normal but it's just a little different from others.

For example, Dr. Banner had a fanatical expression, Lin Rui had a calm expression, and Captain Rogers had a neutral expression on his face, he is the only one who had the most natural expressions among those who had seen the Magic Cube.

Looking at Dr. Banner's enthusiastic expression, one can guess that he must be very excited about the technological changes that the Magic Cube can bring. As for what Rogers is thinking about, only he knows that.

## **Chapter 712 Thinking**

Rogers and Lin Rui didn't think about how to deal with the Magic Cube temporarily. Therefore, for the safety and confidentiality of the Magic Cube, it was once again placed with Lin Rui.

After all, only Mirage Knight has a very advanced Portable Space that he could bring around with him, and the Siberia Base is very special, it is impossible to directly take out the Magic Cube and store it in a secret room here.

“Now that the Magic Cube is finally in our hand, as long as I pay attention then the New York Battle shouldn’t happen!” Sitting in the wheelchair prepared by SHIELD and being pushed by Peter, Lin Rui was thinking about the original story of the Marvel World. The Main Storyline.

In the Original Main Storyline, the New York battle was a very big event.

It is precisely because of the New York War that combined the various Superheros on the earth (in fact, only those in the United States), and finally formed the Avengers to fight the Chitauri.

But now, even Extremis has appeared, and there is no shadow of the New York battle, so it means that the plot has already undergone huge changes due to Lin Rui’s existence.

Of course, it is also possible that the original plot development of this world is different from the movie plot.

At least, Loki in this world is a more decent guy. Although he didn’t deal with Thor very much and wanted to fight for the throne, at least, he wouldn’t do anything that would cross the line to achieve his goal.

Loki didn’t unite with Frost Giant’s leader to deal with Odin after knowing that he was actually a Frost Giant. Instead, he took this opportunity to almost leave kill Laufey in Asgard.

In the subsequent war between Frost Giant and Asgard, Thor was banished to Earth due to his mistakes which were designed by Loki.

So Loki, as the Second Prince of Asgard, went into battle, and as the Prince of Asgard, he fought against the Frost Giants who he was related to.

And at the beginning of the war, Frost Giants weren’t Asguard’s opponent and even the leader of Frost Giants wasn’t Loki’s opponent, After all, he is the God of Lies and Mischief.

It wasn’t until the Frost Giants found an ally, which were the Dark Elfs, who were also at odds with Asgard that the situation changed.

After the Frost Giants and Dark Elfs joined forces, the power of the two races can finally fight against Asgard on equal ground, which has been strong for thousands of years.

However, even though the Frost Giants and Dark Elfs joined forces, they still couldn’t defeat Asgard.

They just made the war enter a stalemate state, and the two sides won and lose some small fights. Depending on the situation, if there are no accidents, it is possible that this war will last for several years.

Therefore, as the commander of the Asgard battlefield, Loki had no time to play ‘Tricks’ on his brother except for taking time to come to Earth once. And Thor has been on the path of real Self-Awakening and has not returned to Asgard.

As a result, Loki did not fight against Thor and he also didn't fall from the Bifrost, and then he did not find the Magic Cube on the earth, so of course, he would not go to the big boss Thanos to borrow the Mind Stone and lead the Chitauris to attack the earth.

Now, as long as the Magic Cube is in Lin Rui's hands, he would make sure that the battle of New York will never happen.

After all, even if the Power of the World wants to promote this kind of thing to happen. For example, letting the news of the Space Infinity Stone on the earth leak out, then it will definitely attract Thanos's attention.

But as long as Lin Rui holds the Space Infinity Stone, even if Thanos wants to attack the earth, he wouldn't be able to open a Portal to here and he would have to travel for a long time to reach here.

"But will things really go as I think they will? The earth has never been a place for slow, steady, and peaceful growth. It seems to move on and grow in a state of turmoil and chaos." While being pushed forward, Lin Rui kept thinking about it.

Phoo~

While Lin Rui was thinking about many things, Peter, who was following Rogers, pushed Lin Rui and stopped at the door of a secret room with a thick door.

"Mirage Knight, this is the secret room where the bodies of three aliens are being stored. Most of the Monsters have been completely destroyed, only a few are left for research purposes. And the bodies of the three aliens have all been preserved." After the wheelchair stopped, Peter reminded Lin Rui who was still in a daze.

They have temporarily put aside the matter related to the Magic Cube. Leaders of all parties must gather together to discuss this kind of thing in order to arrive at a resolution that would be satisfactory to all parties.

And now that Iron Man and Professor Charles are not there, Rogers and Lin Rui will of course not deal with the Magic Cube without them. Therefore, the Aliens who had previously rushed through the Portal is the most important thing now.

Although the Portal has now been blocked layer by layer, no one can be sure that these blockades and defensive forces can really block things coming from the Portal.

After all, this may be a struggle between two civilizations, and now the Earth is not ready for that struggle at all. However, the civilization on the other side of the Portal is also not ready for them.

"Oh, is it right here?" Lin Rui finished thinking and raised his head and agreed when he heard Peter's words.

"Mirage Knight, I know you have seen a lot of mysterious things, and you also seem to know a lot of things that we don't. Perhaps, this time you can help us analyze the current situation." Standing at the gate, Rogers turned and looked at Lin in the wheelchair and he spoke with a serious expression on his face.

Now, Mirage Knight and Deadpool's experience of going to a different planet in the Universe when they disappeared has been spread throughout their Alliance.

For the experience of Mirage Knight and Deadpool, everyone not only finds it very fantastic, but they also realize Mirage Knight as someone big and someone who is more than just a Vigilante.

He can even move around in the Universe and was able to make friends with some Aliens and that is not something that ordinary people can do.

"Uh... I'll try my best. After all, I don't know everything, and I have only seen a few Aliens." Lin Rui replied in embarrassment when he heard Rogers' words.

Kaka~

Sneer~

Then Rogers waved his hand to let the soldiers guarding the heavy door to open it. Without letting the two guards follow, Rogers walked in first, followed by Hawkeye and Black Widow.

And Peter continued to support Lin Rui to follow behind them. As for Falcon, Jack, and Harry, they stayed outside and did not go in.

Some of the X-Men's are not here as they have already observed the Aliens before. They are also not good at this kind of thing so all they can do is tell Professor Charles the whole thing.

Kakaka~

Pū!

When Spiderman's figure gradually disappeared at the door of the secret room, the heavy door slowly closed again.

### **Chapter 713 Suggestion**

As Lin Rui follows Rogers to see the Alien Lifeforms, the X-Men are in a room on a video call with Professor Charles.

"In that case, Iceman, do you want to come back now? From what you said, you can't recuperate very well over there now. And Colossus can also come back with you, let Blink send you back here." On the big screen in front of Iceman and others, Professor Charles said in a calm tone after listening to their report.

Professor Charles doesn't have much to say about Iceman and Mirage Knight finding Magic Cube together, except to worry about the injured Iceman and the Colossus.

"I see. I want to go back, too. But will anyone else be sent here when we get back?" Iceman nodded at Professor Charles's suggestion. Still, he had his own problems.

The Magic Cube is now in Mirage Knight's possession, and as long as it's tucked away there shouldn't be any more accidents.

But the Portal in the center of the base is different, and a lot of Alien troops could break out of it at any moment. When that happens, SHIELD and the League of Defenders won't be enough if the X-Men aren't fielding a fresh force.

"I know. I'll let Hank lead the team. Plus, he's really interested in Dr. Banner, and maybe they could become friends." Charles replied with a smile on his face knowing what Iceman was worried about.

"Hank?! What a relief!" Iceman is visibly relaxed when he hears that Hank is leading the team.

Hank, nicknamed the Beast, whose real name is Henry Philip McCoy, is not only an Advanced genius with a super IQ but his Mutant Ability to strengthen himself and protect himself allows him to put himself in many different situations.

Even though he is a scientific researcher, Hank can instantly become a combat member in many situations.

And this characteristic of Hank is very similar to Bruce Banner, both of them are top geniuses and scientists, and both of them can transform and strengthen themselves.

Although Hank is not as strong as the Hulk after his transformation, but his transformation can be completely controlled by himself.

"Well, Hank is also very interested in the Portal and the Magic Cube. It would be nice to let him know beforehand." Professor Charles on the screen went on to say as apparently there was more to Hank's visit than that.

"I see, then I will ask Blink to send me and the Colossus back immediately. Colossus is in great pain now and if he cannot be dismetalized then it may put his life in danger." With a serious nod, Iceman says that he'll be back soon.

"Then there is nothing else, if there is anything else, just contact me. If there's a special case where you don't have time to contact me then follow Mirage Knight." Professor Charles gave a final reminder before disconnecting.

"Follow Mirage Knight? Okay." This time it was Storm who answered. Although she was a little surprised, she still agreed. After all, after Iceman and Colossus went back, she was the only one here for the time being.

"Then, I'll wait for you back at the School."

Card~

Then, this time, the communication was disconnected. And Professor Charles has given Iceman and his colleagues a plan for what to do next, along with some necessary reminders. Crucially, it is important to replace the injured with new members.

"Iceman, do you know why the Professor wants us to follow Mirage Knight instead of Captain America in case of a special emergency? Isn't Captain America better than Mirage Knight?" Storm asked Iceman feeling somewhat confused after Charles' call was disconnected.

"This..... Well, I don't know why the Professor reminded us to do so. But I think he must have had his reasons. And I think Mirage Knight is a good reference." Iceman responds with a smile to Storm's doubts.

Anyway, the relationship between Iceman and Mirage Knight is better, and when Professor Charles asked them to refer to Mirage Knight's actions, which is of course easier for Iceman to accept.

Moreover, he was going back soon, so this worry should be left to Storm and Hank who is about to take over.

"Well, I'll listen to Hank when the time comes. He will never have to look at others before making a decision." Without getting the answer she wanted from Iceman, Storm had to think so for the time being.

"Come on, I'll send you back. Our Allies can't think that we are weak." Blink spoke right after Iceman and Storm finished speaking to each other.

In the battle not long ago, Blink was suppressed due to her Spatial Ability. In the beginning, she broke out and cooperated with Rogers and others to kill the first guy who came out of the Portal.

But the other X-Men didn't do so well this time, so Blink, who had always been indifferent, was a little worried.

"Well, can you directly send us back to the academy now?" Iceman asked after looking at Blink.

"The suppression on my ability has been reduced by a bit. Even if I can't send you all back at once, a few more visits will suffice, let's go!" As she said, Blink raised her hand to draw a Portal in front of her.

Hum~

In the next moment, a Portal that just allowed one person to walk in appeared in front of Iceman and others.

Sure enough, the other side is X Academy, so it looked like they were coming back more often. Blink then pushes Iceman and Colossus in wheelchairs through the portal.

...

Just when Iceman and the others contacted Professor Charles and Blink opened the Portal to send them back to the X-Academy, Lin Rui who followed Rogers into the secret room finally saw the monster that rushed out of the Portal before.

The few remaining monsters' bodies were placed in very large alloy boxes. Although they were temporarily made, the refrigeration system has been installed inside to keep their corpses fresh for a longer period of time.

"Are these the Monsters that ran out of the Portal? There is nothing special about their appearance." Lin Rui muttered in a calm tone after carefully observing the monsters in front of him which looked like an enlarged version of Earth's hounds.

After several days of traveling to another planet and seeing many monsters, Lin Rui is no longer impressed by this “gentle” looking monster.

However, when Lin Rui said this, Rogers and others, who were standing next to him, twitched their lips, apparently not expecting Lin Rui to say this. They had never seen an alien lifeform, not even Venom, so they were surprised by what they saw.

“Let’s take a look at the Humanoid Aliens.” Lin Rui went on to say as he didn’t found anything about this lifeform in front of him in his mind.

## **Chapter 714 Dark Elf**

Card~

Hearing Lin Rui’s soft whisper, Rogers felt a little uncomfortable in his heart, but he closed the alloy “Coffin” containing the Monster’s bodies.

Then, Rogers continued to lead Lin Rui and others forward. After walking in front of three metal boxes that looked more like coffins, everyone stopped again.

“These are the three Aliens,” Rogers spoke seriously to Mirage Knight behind him, his hand resting on one of the coffins.

“Well, open it.” Lin Rui said unceremoniously when he heard Rogers’ words.

Card~

Pūchichi~

Without further comment, Rogers opened the coffin. Although everyone had already seen the three Aliens closely before, the look in their eyes were very serious as they moved along the slowly opening metal door.

Finally, the alloy coffin completely opened in front of Lin Rui’s expectant and nervous eyes.

Call!

After the alloy coffin was opened, a blast of cold air spread out, causing Lin Rui, who was leaning his head over, to put his head to the side.

But with his current strength, even if he is injured, it is almost impossible for him to tremble because of this cold, not to mention that he is wearing a Phantom Suit and a mask!

“What’s going on...” His body inexplicably shivered as Lin Rui suddenly felt a cold hand gripping his heart.

In the next moment, Lin Rui had already seen the Alien lying in the alloy coffin.

“En!? This is...” At the first sight of the Alien, something seems to flash through Lin Rui’s mind. The images of JARVIS and the entities in front of him gradually overlap with each other, and a vague shadow appears in Lin Rui’s memory deep in his mind.

“This is!... A Warrior of the Dark Elf Race!” When the figure that popped out in his mind was compared with the entity in front of him, Lin Rui’s eyes instantly became sharp, and he couldn’t help speak out loud.

Call!

At this moment, Lin Rui, who had been seriously injured couldn’t control the Internal Energy in his body as it rushed out and created an explosion in the air. Of course, it is precisely because of Lin Rui’s serious injury that he couldn’t contain his energy and an uncontrolled outburst of momentum appeared in the surrounding.

“Cough, Cough, Cough!” Lin Rui, who had unintentionally let loose of his Internal Energy, immediately turned red and coughed to hide his embarrassment. It seems that this had caused the wounds in the body to reopen again.

“What’s wrong?! Mirage Knight!” Peter quickly asked when he saw Lin Rui’s sudden expression change and severe coughing.

Because he cared too much about Lin Rui’s physical condition, Peter didn’t care much about the words Lin Rui shouted just now. But Rogers and others heard that sentence, so the eyes of the few people instantly fixed on Lin Rui’s body.

“Ahem... It’s nothing, I was just a little surprised.” Lin Rui gently moved Peter aside who was blocking his vision as he spoke.

Then Lin Rui saw Rogers and others staring at him. In contrast to Peter’s concern for him, Rogers and others seemed to have some other concerns, as well as expectations that could not be concealed in their eyes.

“Hey~ Allies are just Allies and they are not my Best Friends! Even a perfect fighter like Steve Rogers cannot care more about my injury in this kind of thing. In the eyes of Captain America, the origins of these Aliens are obviously more important.” Lin Rui sighed silently in his heart as he thought with emotion.

“Spiderman, just stand next to me.” Lin Rui said while pulling Peter to his side when he saw Rogers and other’s increasingly expectant eyes.

“Mirage Knight, do you recognize them?” Finally, Rogers couldn’t help but speak. Just like Lin Rui thought, his low shout just now was enough for normal people to hear something.

Hearing Rogers Captain’s words, Lin Rui slowly lifted his gaze from the Alien in the coffin and looked at the few people in front of him.

“Yes, I know of them. They are Fighters of the Dark Elf Race, one of the races in the Nine Realms.” Lin Rui replied with a very serious tone with a calm look in his eyes.

Dark Elf is one of the nine kingdoms that exist on the World Tree along with The Frost Giant, Asgard, and Earth. Thousands of years ago, the Dark Elfs were powerful enough to compete with the equally powerful Asgard.

However, just as the Dark Elfs were about to do something big with the Aether, also known as the Reality Stone, Asgard defeated the Dark Elfs.

In order to prevent the Dark Elf Race from using the Aether, Odin hid the Aether in a place that no one knew. In fact, not only the Dark Elf Race didn't know where the Aether was, but even the people of Asgard didn't know.

Because, in order to prevent anyone from finding the Aether, Odin put the Aether in a place where even he could not be able to find it again.

As Odin thought at the time if you want to hide something then hide it in a place where even you wouldn't be able to find it.

In the plot of Thor II, Thor fought against the Dark Elf while his brother Loki pitied himself while helping him.

Of course, the last battlefield was unsurprisingly on the earth, and no one knew if it was because the Earth was unfortunate or something else. Every time there is a big event, it will always have something to do with the earth.

In the plot of Thor II, Aether was accidentally discovered by Thor's girlfriend Jane Foster, and even more unexpectedly, the Aether Particles were attached to her body.

The Dark Elfs wanted to use the Aether to make Nine Greater Realms plunge into eternal darkness again so that they will dominate the whole Nine Realms once again.

Of course, the battle between Thor and Dark Elf resulted in Thor's victory, which once again undermined Dark Elf's conspiracy to rule the Nine Realms.

It was because of this that Lin Rui was so surprised after seeing the appearance of the Alien in the coffin. Because he had already found the source of the familiar feeling in his mind.

It turned out that the Alien in front of him was a Dark Elf, and he was also a powerful warrior in the Dark Elf Race. Although he doesn't know what level this guy is in front of him but from what JARVIS had described before, his power isn't that low. The highest rank Dark Elf fighter can stand alone against Thor and was almost immortal.

"Dark Elf?! What kind of weird name is that?" Upon hearing Lin Rui's answer, Rogers frowned and muttered to himself.

Looking at Mirage Knight's expression, it was obvious that he was very surprised by the dead alien in front of him. However, Rogers had no idea what the word Dark Elf really meant.

## **Chapter 715 Explanation**

Of course, apart from the unfamiliar word Dark Elf, Rogers also didn't understand the word Nine Realms.

However, in order not to show that he is too ignorant, Rogers can't ask anything at this time. At this time, it reflects the emotional quotient of the people around him.

“Mirage Knight, what’s the matter with this Dark Elf and the Nine Realms? Is it the Alien’s name and the planet’s name? Just like we humans live on earth.” Natasha asked in a timely manner after Rogers muttered to himself standing next to her.

One has to say that the Black Widow is not only beautiful and a deadly fighter but she also has a very high IQ and EQ. When everyone doesn’t understand what Mirage Knight is talking about, it’s best for her to be the only woman who asks unintentionally.

Hearing Natasha’s words, Lin Rui looks at her. Lin Rui is very appreciative of Natasha. At least her guess was very accurate. Dark Elf was indeed the name of the Alien, just like the Human on Earth. But the Nine Realms are not a planet, but a special plane of existence.

“I will get a professional to explain this to you as soon as possible. After all, I know something, but I can’t explain it to you very accurately. “However, Lin Rui is not going to explain it now even with Natasha’s question and everyone’s doubts.

Apart from the fact that it is too tedious for Lin Rui to explain, he really does not know much about other aspects of Nine Realms. So, Lin Rui needs to find professionals to give lessons to Rogers and them.

Of course, the professional Lin Rui is talking about cannot be Thor from Asgard. Lin Rui does intend to ask Thor about this, but he won’t involve him in their alliance.

Lin Rui has another professional in his mind, Erik Selvig. With all the research Erik had done in this field, he could have explained to Rogers and his colleagues what was the words Nine Realms are all about.

“Professionals? Do we even have people like tats?” Rogers said curiously when he heard Lin Rui’s answer.

As far as Rogers knows, there is no organization on Earth that has researched Aliens. Although there are many organizations that claim to be studying aliens, Rogers knows that those are just done to attract people. Therefore, Lin Rui’s mention of a professional causes him to become very curious.

“You will see soon, I do not know much about the Alien in front of me other than the fact that they are called Dark Elf. It’s just that they are a very strong race, at least a lot stronger than the current earth.” Without answering Rogers’ words, Lin Rui looked at Dark Elf in the coffin and said.

“Stronger than the Earth?” Rogers frowned, even more, when Lin Rui said that Dark Elves were much stronger than the earth.

Although no one has been exposed to Alien Civilizations except Lin Rui before this, everyone here knows the basic common sense.

If two civilizations meet and the strengths of the two civilizations are equal, then there may be the possibility of mutual exchanges and common progress.

But if the strengths between the two civilizations are not equal, then there is only one situation, that is, the stronger civilization will launch an attack to plunder the wealth and resources of the other civilization. This is inevitable, and it is also the law of the universe.

“Of course, things are not so absolute. Maybe their individual soldiers are stronger than the people on earth, but their population should be far less than that of the earth. Moreover, we are not that weak.” Lin Rui went on to say when he heard the worries in Rogers’s tone.

There is really not much information about the Dark Elf in Lin Rui’s memory. After all, in the plot of Thor II, Dark Elves sneak attacked Asgard and they didn’t dispatch any ordinary troops.

Lin Rui also knew that there could not be many of them that could have a head-on battle against Thor.

If the Dark Elves had so many people and so many fighting powers then they wouldn’t be standing here now. Of course, the premise is that Lin Rui and the others are prepared for Dark Elves.

And the Dark Elf still doesn’t have the Aether, which is the Reality Stone. The power of Infinity Stone is very strong, otherwise, why did the Dark Elves, who had been weak for so many years, risk launching such a war?

“Okay, I see. Mirage Knight, apart from the origins of these Aliens, Dark Elf, do you know anything else? Regarding the situation over there.” Rogers looked at Lin Rui and then asked as he temporarily put down the matter regarding the Dark Elves.

“Other things...” Lin Rui was a little confused when he heard Rogers’ subsequent question. Lin Rui has already introduced the origins of this Alien and the Planet they are on. Isn’t that enough?

“I mean... from your point of view, can we get something beneficial to us from this Portal connected to the Dark Elf planet.” Rogers slowly reminded when he saw that Lin Rui did not understand the meaning of his words.

In fact, Rogers had a vague idea in his mind as early as after the first Monster had rushed out of the Portal. That is, they can use that Portal to train soldiers! SHIELD is in urgent need of strong people, especially people who can stand alone against any odds.

And fighting against Aliens with powerful abilities is a very good place to get battle experience.

Knowing that earth is far from the only human civilization in the universe, Rogers knew that it was only a matter of time before Earth burst out of the solar system and onto a larger cosmic stage.

Before that, the planet clearly needs more sophisticated force. And these high-end forces deserve more than just people with special abilities like them, they need more resources and advanced technology.

“Captain Rogers, you are quite bold!” Who wouldn’t understand the meaning behind Roger’s words now that he had said it like this? That’s why Lin Rui was very surprised. This is not some simple Portal that can be opened and closed at one’s will.

If the Dark Elves at the other end of the Portal became interested in the earth here then they will come here with an army. If Lin Rui and others don’t grasp the degree of this then the entire planet will be in great danger.

Of course, Lin Rui is thinking that Rogers intends to use the Dark Elf’s powerful power to stimulate the people of earth. But that’s not how Rogers sees it.

## **Chapter 716 Wrong Intent**

“But... I just like your adventurous spirit!” after a pause, Lin Rui suddenly looked up at Rogers and said earnestly.

Deep down, Lin Rui is also an out-and-out adventurer. Perhaps he was a little lucky before and wanted to live steadily in this familiar and unfamiliar world.

But now, Lin Rui clearly knows that if he does not grasp his destiny, he would likely be destroyed in the next second. So, now that something has happened, it's better to take the initiative!

“Uh... So Mirage Knight, do you have a more detailed understanding of these Dark Elves? Especially the planet they live on, how does it compare to the earth?” Although Rogers doesn't know what Mirage Knight is thinking about. But Rogers also knew that Mirage Knight seemed to have agreed with his decision.

Of course, if Rogers knew that Lin Rui was thinking that he was saving the Portal so that he could use the Dark Elf to train his soldiers, and further send the Dark Elves to earth to cause some casualties and stimulate the people of the earth to fight back, he might yell that he isn't even thinking like that.

Rogers, who was in charge of SHIELD at the time, did understand that the earth was in a relatively comfortable environment and that there was not much of a sense of crisis among the general public, but at most, there is some internal struggle within the earth.

However, Rogers's character would not allow him to stimulate the people of the earth to “Wake Up” in this way, and his bottom line would be to allow people like him to be pioneers in contact with a powerful alien race like the Dark Elf.

If it takes a few casualties to awaken the world to the threat in the universe, then Captain Rogers is clearly not up for it. He would rather carry so many dangers on his own, but also protect the so-called innocent people.

The reason Rogers asked Mirage Knight about the situation after learning that the Aliens were Dark Elves and the Dark Elves were very powerful was because he wanted to consider whether to keep the Portal.

If Lin Rui understands the situation there then they could use it to attack the Dark Elves even if the Dark Elves are stronger than the people on Earth. And by doing that, they would achieve the purpose of enhancing their forces with advanced technology and strength.

After all, this is the first time the Earth has come into contact with an Alien Civilization at such a close distance. Even if Rogers didn't want to risk the Earth being invaded, he didn't want to give up such a good chance.

Because Mirage Knight said long ago that the Earth would be involved in a great danger that would sweep the entire universe. At that time, the Earth would face something more terrifying than just an opponent from such a small Portal.

“I am not very clear about this for the time being. However, wait for a few days and I will have some information for you.” Lin Rui frowned slightly when he heard Rogers' next question and answered.

Lin Rui only knew about the Dark Elves and he didn't know about their specific strength and the planet on which they lived. Therefore, Lin Rui intends to have a good chat with Thor after going back to New York this time, and he will know more after that.

Of course, Lin Rui now only has to expect Thor to know something about Dark Elf. If Thor doesn't know, then Lin Rui will have nothing.

"Okay, I believe you! I will also wait for you for a few days! But for now, this Portal must be completely sealed off! We need to put on 24-hour surveillance with our best weapons and our best teams. Whatever comes out, we can't let it leave the base!" Hearing Lin Rui's answer, Rogers nodded and said. Finally, he also gave strict orders regarding the Portal.

"If we're lucky, maybe we'll be all right for a few days." Lin Rui says lightly as his eyes once again turned towards the Dark Elf Warrior in the coffin.

If the Dark Elves were still fighting the Asgard then they wouldn't care about such a Portal. After all, it was only the loss of three warriors, and the loss of three warriors was nothing to the Dark Elves race who were trying to plunge all Nine Realms into darkness.

Of course, if they're looking for Aether now then perhaps they'll pay attention to the three missing warriors, and this Portal is where they'll focus their attention to.

"That's all we can hope for..."

Card~

Rogers then closed the coffin of the Dark Elf warriors once more. It will soon be filled with extremely low levels of gas, and the alien body will be well preserved and will be studied later by professionals.

However, I don't think there are any experts studying aliens on Earth right now. As of today, however, SHIELD will at least have such a special department.

A few minutes later, Rogers and others emerge from the chamber where the bodies of the Dark Elf warriors and the cannon fodder lifeforms are kept.

After being exposed to the sun, the coldness around Lin Rui's body slowly dissipated. He doesn't know if it was the Dark Elf's aura that made him feel uncomfortable. Anyway, he felt better after he came out.

"Mirage Knight, I have sent the information about the Dark Elves to the X-Men and Tony Stark. They are also very interested in this Alien Race, and they are all waiting for the Professional you mentioned to explain the Nine Realms. Of course, I am also waiting for your information." Standing at the door of the secret room and instructing the soldiers to guard the door, Rogers looked at Lin Rui and said.

"Don't worry, when I say that there are professionals then I will get them to you. And, maybe I will find something unexpected." Lin Rui replied after hearing Rogers' words.

The Magic Cube is already in his hand and although the Portal is connected to the Dark Elves Planet, the first wave of danger has passed. Now SHIELD has sealed the place and even if a dozen more such powerful fighters come out of the portal, they will be wiped out in an instant.

Lin Rui, who suffered serious internal injuries, also wanted to go back to recuperate as soon as possible. Of course, he would always remain worried about this side.

“Okay, then I won’t delay you in going back to rest.” Seeing the fatigue in Lin Rui’s eyes, Rogers continued.

Then, without saying anything, Peter had already pushed Lin Rui and quickly walked towards the aisle ahead. There is a platform in the aisle today, where several Iron Man Armors are on standby.

## **Chapter 717 Secret Base**

“JARVIS, where do you think I should go?” Lin Rui, who was pushed by Spiderman, was communicating with JARVIS.

He was considering whether to return to New York or to heal in the base here first. After all, the Planet of Dark Elves is located on the other end of the Portal, and Lin Rui doesn’t want to leave this place at this time.

“I know what you’re worried about, but, Mirage Knight, there’s not much you can do here. Do you want to wait at the space portal for the Dark Elf to come? Although this base is being built very quickly, the medical equipment will not be ready for at least five hours, and your injury certainly cannot be delayed.” While Lin Rui expresses his reluctance to leave Siberia, JARVIS gave his advice very sincerely.

“JARVIS, you don’t need to be so blunt! I know something they don’t know anyway, and if there is an accident, I should be here to deal with it.” Lin Rui curled his lips when he heard JARVIS.

“Do you want me to call Mr. Stark? I believe Mr. Stark will not let you stay here.” JARVIS put out Tony’s name knowing that Lin Rui might not listen to what he said.

“Don’t... Please don’t do that!” Lin Rui quickly refused when he heard JARVIS say Tony’s name.

At this time, Peter had already pushed Lin Rui to the front of an Iron Man Armor. Here, the members of the League of Defenders are already waiting for them.

“Mirage Knight, go back and recover first, leave this place to us.” Harry spoke with a concerned tone when he saw Lin Rui who was so weak that he was sitting in a wheelchair.

Compared to the return of X-Men’s two main attackers from serious injuries, the League of Defenders is in good condition except for Lin Rui who was injured.

After Jack rested for a period of time, his previous minor injuries have also recovered a lot, at least, they would not affect his actions. Therefore, even if Mirage Knight is not there, the League of Defenders has four strong members guarding this base.

“Then... I will figure out the situation as soon as possible and get back here!” After thinking about it carefully, Lin Rui decided to go back.

“Well, we would be waiting.”

Finally, Lin Rui was armed with an Iron Man Armor with the help of his teammates and friends.

“JARVIS, let’s go.”

Boom!

Then, several Iron Mans rose from the base and rushed towards New York in front of Spiderman and others. However, just as these Iron Mans left the sight of the base, they suddenly turned to another side at a high altitude, and then quickly fell towards the ice field.

Huhu!

“Hey! JARVIS, you said that the base has been transformed with complete Recovery Serum equipment.” Lin Rui looked at the destination displayed on the translucent light screen with a smile and said to JARVIS.

Not long after JARVIS controlled Iron Man and took Lin Rui to the sky, Lin Rui suddenly remembered Hydra’s Secret Base in Siberia, which he had never told others about. So he asked one more question, wanting to know how the base was renovated over there.

If the reconstruction there is very good, and there is already complete Recovery Serum equipment there then Lin Rui does not have to go back to New York.

Moreover, Lin Rui suffered internal injuries this time, and his recovery mainly depends on his own meditation.

Some of his external injuries cannot be recovered even with the help of Recovery Serum and he wouldn’t quickly recover unless he has enough Reward Points to exchange from the System Shop for special items such as Elven Holy Spring Water that directly affect the vitality.

However, Lin Rui is now so poor that he cannot even exchange half a bottle of Elven Holy Spring Water.

After Lin Rui inquired, JARVIS could only answer him truthfully. The base here is in a very good situation. Except for some finishing work, the entire base has already been completely renewed.

Moreover, the finishing work is something that does not affect the entire base, so Lin Rui can go to Recovery Serum Cabin over there without any problem.

And it’s very confidential there as apart from JARVIS and Tony, no one knows that there is such a secret base in Siberia, and it is very close to the place where the Portal was found.

Therefore, Lin Rui immediately decided not to return to New York. Of course, JARVIS could not refuse, so he could only take him to the base.

In this way, when everyone thought that the injured Mirage Knight had returned to New York, he landed on another secret base not far from the SHIELD base. If something unexpected happens here, Lin Rui can quickly arrive in a few minutes.

Huhu~

Quickly falling from mid-air, several Iron Man escorting Lin Rui landed steadily on the ice sheet. In front of these Iron Mans is an ice mountain range, which looks utterly unremarkable.

However, this is the location of the Hydra base that Lin Rui found last time. After the transformation, the concealment here is now even better, at least it can remain hidden under modern high-tech investigations.

"I really don't know what it looks like now but I'm still looking forward to it!" Lin Rui said with a little excitement.

"Open the door, JARVIS."

"Okay, Mr. Jackson." This time, JARVIS's name for Lin Rui has changed from Mirage Knight to Jackson. When no one else was present, JARVIS used to call Lin Rui by his real name.

Drop~

Kakaka!

After JARVIS agreed, Lin Rui heard a slight beeping sound from the Iron Man Armor on his body, and then the sound of mechanical operation came from inside the seemingly ordinary mountain stone wall in front of him.

Boom~whoop!

Two seconds later, there was a crack in the middle of the heavy wall in front of Lin Rui. Under the continuous sound of mechanical operation, the crack slowly enlarged, forming a gate with a width of five meters and a height of three meters, and the thick wall was retracted into the mountains on both sides.

The gate hasn't been remodeled, at least Lin Rui can't see it, for the time being, maybe JARVIS just repaired the opening that Lin Rui had opened the first time he came in here.

"Huh? The heating is turned on inside?" After the door opened, Lin Rui felt the warm currents blowing on him and softly muttered.

This place should be cold as the base was built into the Ice Field of Siberia. Lin Rui had felt the cold the last time he came here. But now, as soon as the door was opened, Lin Rui's face was blown up by hot air, which showed Stark's wealth.

Even if no one is there, this base still maintains an environment perfectly suitable for life.

Then, Lin Rui walked into this secret base that already belonged to him and Tony. Lin Rui came to this base for the second time, but there was a huge gap in Lin Rui's mood from the time when he first came in here.

## **Chapter 718 New Base**

Booming~

After Lin Rui walked into the gate, the thick gate that had just been taken into the mountain moved out again as it tightly closed behind Lin Rui. From the outside, no one would even think that there is any base here

Da Da Da~

Crisp footsteps sounded in the clean corridor of this base, and Lin Rui, who was still wearing the Iron Man Armor, was constantly looking around.

Lin Rui has to say that for the efforts made by Stark and JARVIS in the past month, the internal changes of this base are so great that Lin Rui almost can't tell that this used to be a Hydra Base.

Although Hydra's secret base has been relatively advanced in the past, it was advanced in terms of technology that was 60 years old.

Hydra was literally the most technologically advanced force on the planet 60 years ago, a secret base that was at least 20 years ahead of the rest of the world.

But after more than 60 years, even the best of the base's interior facilities are already obsolete, let alone taken over by Tony Stark, a genius who also possesses technology many years ahead of earth's average.

Therefore, after JARVIS finished renovating this place in a month's time, except for the main body of the secret base, the various lines and decorations, as well as some warehouses, laboratories, and other facilities have been greatly changed.

Moreover, with the energy support of the miniature Arc Reactor, there is no need to worry about energy issues in this secret base.

This base used to be able to rely on a power generator to maintain itself for 60 years, and now it has stronger functions and survivability under the Arc Reactor.

"JARVIS, did you really do all this in a month?" Lin Rui asked JARVIS in amazement as he looked at the familiar equipment and some style decorations beside him.

"Yes, the installation of these pieces of equipment and the preparation of some daily necessities were actually very simple. The complexity came when I have to replace the base's core energy generator and the takeover and optimization of the original network." Hearing Lin Rui's words, JARVIS answered in a calm tone.

"Really? That's amazing!" Lin Rui said emotionally as he continued to walk forward.

Da Da Da~

Soon, Lin Rui walked to the control center square that he found last time at the base. However, at this time, the control center looks completely different.

In the place of the original row of huge computer units, the bloated huge computer has disappeared and a whole set of advanced thin and light computers, projectors, and touch screen integrated systems have replaced them.

And this control center square has also been transformed into a processing center full of brand-new technologies, which at first glance is somewhat similar to the control center of the SHIELD Helicarrier.

Perhaps, JARVIS also borrowed something from SHIELD when the data was uploaded on the internet.

Lin Rui's eyes gleamed as he surveyed the new control center. The last time Lin Rui was here, he had done something and looking at how JARVIS rebuilt the base. Lin Rui's little trick should have gone undetected.

Of course, Lin Rui now will not be stupid enough to ask JARVIS whether he found anything when transforming this control center and network. Therefore, Lin Rui just surveyed the control center and then continued to walk towards the back.

Unbeknownst to Lin Rui, however, the changes in his mental activity had already been transmitted to JARVIS through the Iron Man Armor after he arrived at the revamped control center.

Now that Lin Rui is seriously injured, the Phantom Suit is not shielding his body and mind so JARVIS can monitor his health at all times.

Just because of this, JARVIS was able to think of the matter in Lin Rui's mind and discover the changes in his mental activities.

"Is this a normal brain wave change?" In the background, JARVIS "looked" at Lin Rui's brain wave changes just now and wondered.

In fact, JARVIS's transformation of the base control center was not as fruitless as Lin Rui thought. In the process, he had discovered that something had been deliberately eliminated.

However, because Lin Rui eliminated it very cleanly at the beginning, JARVIS could only find the record of 'what' it was and it was most likely the record of a Winter Soldier.

JARVIS did not tell Tony Stark about this record as this was not important to JARVIS, but he kept it as a small matter.

Soon, Lin Rui, who had left the control center, arrived outside the chamber where Winter Soldiers were found. At this time, this room has been transformed into a laboratory for the study of lifeform technology.

And the original Cryogenic Chambers are still preserved. This kind of Cryogenic Chamber can maintain human life force frozen for decades and it also has some research value, at least, JARVIS can research an upgraded version based on them.

Perhaps, in the near future, rich businessmen on earth who do not want to die of some incurable disease may continue to live in such a Cryogenic Chamber, frozen in ice, until the time when the world's technology can recover their disease.

Of course, such scientific products that violate the normal life trajectory of human beings should be seriously considered even if they are actually introduced.

"Jackson, up ahead is the infirmary. It's equipped with everything you need right now. Of course, since you said that the external Recovery Serum had little effect on your injuries this time so I arranged for some Recovery Serum which would stimulate your body's natural healing activity." JARVIS's voice is heard again after Lin Rui walks through the room that has been converted into a lab.

"Yes, I see. JARVIS, can you get me a sealed, transparent box in the infirmary?" "After saying yes, Lin Rui made another request.

“Do you want to place the Magic Cube here?” JARVIS immediately asked when he heard Lin Rui’s request.

“Uh... Yes.”

“Okay, it will be ready soon.”

Five minutes later, Lin Rui, who took off his Iron Man Armor was already sitting on a soft bed in the Infirmary.

Beside the bed, Lin Rui’s eyes are fixed on a square box made of high-strength glass. This glass box was brought by JARVIS according to Lin Rui’s request, and it was enough to trap a special lifeform like Venom.

“The Magic Cube...” Sitting on the edge of the bed, Lin Rui’s Psychic Power was connected to his portable space, and he whispered as he watched the blue cube inside his portable space.

Brush~

In the next moment, Lin Rui’s right hand was already drawn across his waist. Then, the Magic Cube with a pale blue light appeared in his hand.

Holding the Magic Cube in his hand and slowly raising it, the light blue light radiating from the Magic Cube gradually moved from Lin Rui’s body to his face, and finally, the blue light shined into his clear eyes.

## **Chapter 719 Puzzled**

The light blue light emitted by Magic Cube was reflected in his clear eyes. At this time, Lin Rui’s eyes seemed to be in a trance, and no one knew what he was thinking.

Phoo~

Finally, after looking at the Magic Cube in front of him for more than ten seconds, Lin Rui put down his hand.

However, Lin Rui did not immediately put the Magic Cube into the glass box in front of him. Because Lin Rui is now really engaged in a very intense ideological struggle in his mind.

No one knows that Lin Rui and Iceman were trapped in the chaotic space more than an hour ago. When Lin Rui finally got the breakthrough of Magic Cube, the system prompt sound sounded louder than before in his mind.

For the Magic Cube that Lin Rui got, the system gave Lin Rui a condition that he could not refuse to allow him to exchange the Magic Cube to the system.

“One and a half million Reward Points! This is undoubtedly the price of an item that has reached S-Level!” Lin Rui looked at the exchange conditions given by the system in her mind and still did not react.

For the Magic Cube in Lin Rui’s hand, that is, the Space Infinity Stone, the system directly gave the exchange number of 1.5 Million Reward Points. Lin Rui, who knows the value of 1.5 million Reward points, knows what he can do with it, which may instantly make him the most powerful person on earth.

When Lin Rui met Mjolnir for the first time, he was curious about whether he could pick up Mjöltnir and he passively accepted Mjöltnir's test. The condition for Lin Rui to pick up Mjöltnir was to have the power of Thor and be able to have a similar power level to Odin.

The system can also meet the requirements of these two points, but 1.5 Million Reward Points are needed for it. In other words, 1.5 Million Reward Points can make Lin Rui's strength reach the level of Odin and Thor!

Now Lin Rui has such an opportunity to exchange the hard-won Space Infinity Stone with the System, and then take the 1.5 Million Reward Points to strengthen himself. In this way, Lin Rui can grow into a superpower in a very short time.

Such a result is actually very beneficial, at least compared with Ancient One or Odin, a superpower like Lin Rui who has grown up unexpectedly does not have many worries.

He can lead the Earth Civilization out of the Solar System and out of the Nine Realms onto the big stage of the universe.

However, if Lin Rui really exchanges the Magic Cube for Reward Points then only he himself will be able to increase his strength to become a superpower in a short period of time, but the development of the earth will not have much explosive growth.

Unless Lin Rui uses those 1.5 Million Reward Points to redeem a lot of items and technologies that would help the development of the planet, then Lin Rui will not be able to become a superpowered Individual in a short time.

In that case, the significance of exchanging the Magic Cube does not seem to be great. After all, the research on Magic Cube will also make the earth's science and technology advance by leaps and bounds.

"However, if I exchange the Magic Cube, then the Universe will have no Space Infinity Stone, right? So even if Thanos eventually collects the other five Infinity Stones, he won't be able to get the Space Infinity Stone that is no longer in this Universe unless he can run into the System Shop and get it back." In addition to a large number of Reward Points, Lin Rui believes that the exchange of Magic Cube will prevent future Thanos from collecting all Six Infinity Stones that he would use to wipe out half of the people in the whole universe.

"But what would Tony and Rogers think if I actually exchange the Magic Cube to the System? Do I really want to expose the bug that is the System?"

Although the temptation of more than One Million Reward points is really great, Lin Rui also knows that he can't really treat the Magic Cube as his personal item without any scruples.

"Ah! This is really tough! Isn't there a way to do both? Like exchange a portion or something, so I can keep the Magic Cube and get some Reward points from the System Shop!" Lin Rui couldn't help thinking that as he really didn't want to give up the Magic Cube to the system, but he also didn't want to give up so many Reward Points. Lin Rui had a very difficult time these days without Reward points.

"En?! Exchange a part of it?! Maybe..." When thinking about this, Lin Rui suddenly thought of something before his mind returned to reality while the Magic Cube was still in his hands.

“Perhaps, I can extract some of the power belonging to the Space Infinity Stone in the Magic Cube? Maybe I can get some Reward Points for such Space Energy. After all, this is the Space Energy obtained from the Space Infinity Stone.” Carefully observing the Magic Cube, Lin Rui’s eyes are getting brighter and brighter.

“Okay! Let’s try it!” Thinking of this, Lin Rui has quickly made up his mind.

“JARVIS, I still need something. Did you study the equipment that extracts the Magic Cube energy when you cleaned the Hydra Base last time? I need those machines now!” Lin Rui suddenly raised his head and shouted loudly.

Since Hydra was able to extract the Magic Cube Energy then Lin Rui now has better technical support, so why can’t it be done?

Moreover, even if Tony and others knew that Lin Rui was privately studying the Magic Cube, they wouldn’t mind too much. After all, they originally wanted to study the Magic Cube.

“The instruments? Not yet, but I have all the information and equipment here. If you need it badly, Mr. Jackson, I can put it together in an hour.” Hearing Lin Rui’s shout, JARVIS answered quickly.

Although this base has been basically transformed, there is still no machine dedicated to studying Magic Cube.

Since no one knew before today when the Magic Cube would be found, Tony did not ask JARVIS to build those instruments to analyze space energy in advance.

JARVIS, however, has long looked at Hydra’s machines and has made some improvements that allow it to quickly build one on-site.

“One hour? Okay, I’ll wait for you to assemble it!” Lin Rui said loudly after hearing JARVIS’s answer.

It’s just an hour and Lin Rui can afford to wait. Moreover, he is still seriously injured now, so he needs to get well enough to do the next experiment.

“Okay, Mr. Jackson, I have already started the preparations. And the Recovery Serum is ready so you can rest for now.” After agreeing, JARVIS reminded.

“Well, I see. Thank You, JARVIS.” After thinking about so many things just now, and then excitedly arranging for this matter, Lin Rui was almost unable to hold on.

“No thanks necessary, Jackson.”

Phoo~

In the next second, a tired Lin Rui had fallen on the soft hospital bed. Then, a faint Azura light appeared on Lin Rui, and he had already begun deep self-meditation recovery.

## **Chapter 720 Action**

When Lin Rui entered deep meditation without any preparation, JARVIS quietly removed the glass box next to the hospital bed, followed by a set of Recovery Serum equipment focused on recuperation.

With the sound of Lin Rui's even breathing, this set of medical equipment would be used to recuperate and stimulate the body's own Recovery and they have been carefully connected to Lin Rui.

Then, Lin Rui quickly recovered her internal injuries with the help of her own deep meditation and JARVIS' Recovery Serum.

In addition to keeping an eye on Lin Rui's Recovery, JARVIS also manufactured the equipment from Hydra in the experimental warehouse.

Of course, The news of Lin Rui in this base and the things he asked JARVIS to do for him were all reported to Tony in New York by JARVIS.

Bang~

The glass bottle in his hand shook and hit the corner of the table with a loud noise. Tony quickly grabbed the unstable glass bottle and put it on the table. This is Tony's performance after hearing the news about Lin Rui from JARVIS.

He doesn't know why he was so surprised when he heard it that he almost couldn't hold the things in his hand.

"Sir, Mr. Jackson has asked me to build the device that Hydra uses to use the Space Power of the Magic Cube. I think in an hour he'll be using the lab in the Siberia base to work on the Magic Cube." This was what JARVIS had just reported to Tony, and it was this that surprised Tony a little.

Lin Rui wanting to get up and recuperate in the secret base in Siberia was not unexpected by Tony.

Based on Tony's understanding of Lin Rui, if he knew that there was a complete Recovery Serum system in the base of Siberia, he would definitely not go back to New York.

So, when JARVIS and Lin Rui rushed to the secret base, Tony didn't even bat his eyes at it.

Anyway, the confidentiality of that base is very good, and the security is no problem after JARVIS' had done the transformation and it is as good as the base in New York so Tony also felt a little relieved.

But what Lin Rui did next surprised Tony. Tony also knew about Lin Rui finding the Magic Cube.

If Tony and Professor Charles had not agreed to Mirage Knight holding the Magic Cube first, Rogers would not have let Lin Rui leave with the Magic Cube so easily.

However, just because Lin Rui holds the Magic Cube in his hand doesn't mean he can study it alone. As for the Magic Cube, Tony has seen its powerful abilities firsthand.

"Jackson is really messing up! Even if Hydra's equipment can extract Space Energy from the Magic Cube, who can guarantee that there will be no accidents?! That is a powerful Space Energy, as long as there is a trace of uncontrolled Space Energy, it is possible that the entire base is destroyed!" After placing the glass bottle on the table, Tony muttered to himself with his brows tightly clenched together.

Not to mention the powerful attacks that Tony has seen from the Magic Cube Space Energy, Lin Rui himself has been injured several times because of the Magic Cube's Space Energy.

It can be said that since the discovery of Hydra, Lin Rui suffered several major injuries because of the Magic Cube and Spatial Energy Fluctuations. If the device created by Hydra is not that safe then Lin Rui would be playing with fire.

And Lin Rui is still alone in the base and he is still injured.

"Sir, after my calculations and research, that set of equipment has been upgraded during this period, and there should be no problem," JARVIS said when he heard Tony whisper in annoyance.

"It was upgraded on the basis of Hydra's equipment. If the original equipment has a problem, then you have upgraded a set of problematic equipment. Perhaps the original minor problems have also been magnified. Because we didn't find the Magic Cube last time, I did not personally pay attention to the research on that set of equipment, and now I can't really say anything for sure." Tony did not relax at all when he heard JARVIS's words.

"So, should I stop manufacturing this equipment?" Not minding Tony's doubts about his research and upgrade, JARVIS continued to ask calmly in anticipation.

"Don't stop. Is Jackson in Recovery now?" Tony asks with a twinkle in his eye, without telling JARVIS to stop making the device.

"Yes, the system detected that Jackson's heart rate remained very low, but his brain wave intensity is very active and he is experiencing a steady and rapid increase in all aspects of his body." Hearing Tony's question, JARVIS answered quickly.

"That's good, JARVIS, how far do you think Jackson can recover in an hour?" After knowing that Lin Rui was quickly recovering, Tony was relieved and then asked.

"Judging from the current testing situation, one hour would be enough for Jackson to perform his normal actions without any difficulties. As for how much strength he can exert, because I myself have not accurately judged Jackson's strength, so there is no way to judge it." Facing Tony's question after question, JARVIS answered very quickly.

"It's not that you didn't accurately judge the kid, it's just that he's growing much faster than we expected!" Hearing JARVIS's answer, Tony snapped.

"Well, since the boy is so impatient, I'll go there myself! I thought this time I'd be safe in New York even if something big happened, but I'm still running around because of this kid!" Finally, Tony decided to go to Siberia himself.

"Okay sir, what about the dinner with Miss Pepper tonight?" JARVIS agreed and then reminded.

Because he had been in the laboratory for several days in a row, Tony had left Pepper in the cold for several days, but today he promised Pepper to accompany her to dinner.

"Uh... Damn it! JARVIS, order a bouquet of roses and send it to Pepper's office, and say that I'm sorry. If she asks me where I'm going, tell her I'm saving the world!" Tony replied after hearing JARVIS's reminder.

"Yes, Sir."

Five minutes later, two teams of Iron Man flew out from under Tony's villa, then quickly rushed to the sky and disappeared.

...

While Lin Rui was resting in a secret base in Siberia and Tony knew he was going to work on the Magic Cube himself, Rogers and others were still guarding the Portal.

Buzzing~

With this alloy circle, Dr. Banner also spent a lot of energy in it, otherwise, it would not have any effect on the space energy.

The emergency lockdown has had some success, as the completely exposed Portal is now encased in a ring made out of superalloy. The alloy ring that fits the Portal inside is used to maintain the size of the Portal and prevent it from getting larger.

Without this alloy ring, which Dr. Banner had put a lot of effort into, nothing would have any effect on the space energy otherwise.
