

Marvel 861

Chapter 861: Energy Clashes

When Thor and the others were all paying attention to Jane's situation, they didn't see Lin Rui, who was still standing closer, slowly moving out. Moreover, waves of unharmonious internal energy fluctuations poured out of Lin Rui's body.

Hoo!

While Lin Rui was trying to suppress the movement of the Magic Cube in the portable space with internal energy, the Aether particles that were constantly pouring out of Jane finally stopped. The Aether attached to Jane was finally stripped out by Malekith.

It seems that this kind of thing needs to be done by special people to have the best result.

"Haha! Finally!... More than a thousand years have passed but finally, it is in my hand again!" Malekith shouted with a laugh as he controlled the flying sand-like Aether particle floating in the air.

Looking at Malekith's almost crazy expression, Frigga's eyes blinked without anyone knowing what she is thinking.

Thor tightly hugged Jane after the Aether Particle completely separated from her body and began to check her over. After confirming that Jane was no longer in danger, he finally breathed out a sigh of relief.

It seems that Lin Rui was right, Malekith did have the ability to strip the Aether out of the human body without harming it. Moreover, he did not make any other moves in the process.

Because the deal with Malekith was for him to take the Aether out and keep Jane alive. So when Malekith controlled the Aether to fly towards his palm, no one from Asgard made a move.

However, Asgard would make a move as soon as the Aether touches Malekith's hands.

Huhu~

Carefully controlling the Aether with infinite energy to fly towards him, Malekith didn't forget the conditions of his transaction with Asgard just now in his ecstasy.

He knows that Asgard didn't take action against him because of the deal, and he also knew that as long as the Aether reaches his hands, countless attacks would descend down on him.

So, while controlling the Aether's movement, Malekith and The Kursed were getting ready to break through at any moment.

However, while Malekith was slowly pulling the Aether away from Thor and their vicinity, he suddenly saw a man walking silently away from the others.

"Huh? What is that kid doing? The energy fluctuations in his body are getting stronger and stronger." Having set aside some of his energy to observe Lin Rui, who was acting strangely, Malekith soon discovered something unusual about him.

“Is there any conspiracy?” Although Thor and the others did not do anything at the moment, Malekith, who had obtained the Aether was very suspicious at this moment.

“I can’t drag it any longer! Algrim! Go!” It’s better to act cautiously than to fall into a trap and Malekith did that by shouting at Algrim behind him while staring at Lin Rui.

Brush!

In the next moment, Malekith had gathered together all the Aether Particles that had floated in front of him and held the Aether just above his palm with his right hand. Malekith did not dare to touch this Item that could swallow anything.

Hum!

However, when Malekith was holding Aether and The Kursed Algrim together in a small group and was about to break out of the encirclement, powerful energy burst out of his hand holding the Aether. It was The energy of Aether!

“What’s going on?!” Malekith spoke in surprised voice as he felt the strong impact from his hands.

Buzz!

Then the Aether, which Malekith was holding in his hand, wrenched out of his control and flew into the air again. As if stimulated by something, the Aether, which is outside of Malekith’s control, continues to release intense fluctuations of energy.

“Damn it!” Seeing the Aether that had slipped out of his control, Malekith emitted powerful dark energy from his body as he cursed.

However, Malekith didn’t dare take any random action against the Aether Particle in this situation because he did not know what was wrong with it at this time, and it was likely that the Aether Particle would retaliate against him if he acted recklessly.

Pū!

At the same time when the Aether rushed out of Malekith’s hand, an energy shock wave sounded out from Lin Rui, who had quietly retreated dozens of meters away from Thor and the others.

“Shit!” As this sound came out, Lin Rui’s voice filled with surprise and worry also came out.

Buzz!

Then, a strong wave of spatial energy surged out from Lin Rui! It seems that the Magic Cube, suppressed by Lin Rui until now, broke through and showed a little effect. Its energy fluctuation broke through the block of the portable space and Lin Rui’s internal energy.

Whoosh!

The space energy fluctuations emanating from Lin Rui also seemed to have a very clear goal, which was the Aether fluttering in the middle of the air. Waves of space energy swept towards the Aether in the middle of the air.

The Aether also became more “crazy” after the space energy was transmitted from Lin Rui. The invisible crimson flying sand was constantly changing in various forms in the air, and a series of illusory or realistic energy also rushed out.

Boom! ~~

At the next moment, the space energy belonging to the Magic Cube and the reality energy belonging to the Aether Particle collided with each other in the grand palace of Asgard, and waves of pure energy shock wave were transmitted in all directions in a circle.

The first to encounter these powerful shockwaves were Malekith and The Kursed as they have been chasing the Aether, while Lin Rui had been thinking about escaping, so he was farther away from Thor and the center of the shockwave.

Whew!

When the shock wave generated by the inexplicable energy collision in front of him swept over, the expression on Malekith’s face was ashen. He put his scepter in front of him, and then dark energy enveloped his body.

As for The Kursed standing behind him, he just slightly bent his knees as the shock wave swept over him to make himself more stable.

Hum!

Thor and the others were also very surprised by this sudden situation in mid-air, and it was Frigga who reacted first and created defensive magic to cover Thor and the others before the energy shock wave could sweep them away.

“Fuck! I shouldn’t be dawdling!” After seeing the situation caused by the collision between the space energy of the Magic Cube and the energy of the Aether Particle, Lin Rui, who was still running away, whispered and then he was already lying on the ground.

Hoo!

After lying on the ground, a substantial amount of internal energy poured out of his body to protect him.

In addition, two light blue rays of light also appeared out of thin air and enveloped Lin Rui, which was obviously a defensive talisman that Lin Rui got from the System Shop.

It seems that Lin Rui is also very cautious about the energy impact caused by the collision of two Infinity Stones.

Chapter 862: Unable to Contain!

Boom!

The next moment, the shock wave generated by the collision of the energy of the Aether Particle and the Magic Cube had swept past Lin Rui and then rushed to a farther place.

Under such circumstances, the entire area was filled with chaotic and powerful energy, and Malekith and others are struggling against the chaotic energy impact. At this point, they just don't have the energy to care about what's going on around them.

...

Buzz~

When such a violent shockwave of energy sparring occurred inside Asgard Palace, this shockwave was also transmitted to a deeper place, and also the secret room where Odin was recuperating.

Hoo!

Sensing the energy fluctuations that passed through, Odin, who had been calmly meditating and recuperating with his eyes closed, violently opened his eyes, and golden light flashed out of his dark blue eyes.

"How could this happen? This is surprising!" After carefully sensing the cause of this special energy shock wave, Odin lying in the golden dome showed a little surprise and muttered to himself.

The appearance of the Aether didn't bother Odin much, nor did the presence of the Magic Cube. However, this particular reaction between the Magic Cube and the Aether was surprising. As someone who has seen and kept both Infinity Stones at different times, Odin had no idea that this particular reaction would occur between them.

"It seems that the boy's appearance will bring about countless incidents! I don't need to do anything yet. Let's see how you deal with it!" Sensing the intensity of the energy wave, Odin said a few words to himself and closed his eyes again.

Hu~

Then, Odin seemed to fall into a deep sleep again.

...

Rumbling~

In the magnificent inner hall of the Palace, the energy shock wave that swept through almost the entire palace finally gradually showed signs of dissipating. And in the waning blast of energy, a few rays of light remained firmly on.

"Aether is mine!" At the center of the energy blast, Malekith is on his knees looking ahead and growling.

At this time Malekith looks very wretched, the armor protecting his body has been broken, revealing Malekith's thin but strong body. His original braided hair is also all spread out and combined with his crazy expression, he looked like a lunatic.

Malekith's scepter, which had almost been torn apart by the Damascus Reese Sword, broke in two under the impact of the collision of two Infinity Stone powers.

It was when the scepter broke in two that Malekith grabbed half of it in one hand and stuck it in the ground to keep his body from being swept away by the powerful blast.

Hoo hoo ~

The energy shock wave that swept past him had become weaker and weaker, Malekith stared ahead at the Aether floating in the middle of the air and grabbed the half scepter with his hands, and made a strong effort to get the Aether.

The next moment, his whole being was already rushing towards the Aether against the energy wave.

Whatever the hell was going on here, Malekith's ultimate goal was to get EtherParticle. And time is running out for Malekith.

Malekith and The Kursed will have a better chance of breaking through Asgard's defenses right now as they are in disarray and chaos is erupting due to their surprise attack.

Brush!

In the next moment, Malekith had already pounced on the Aether. Repeating the old trick, Malekith quickly gathered the Aether particles that had stopped releasing energy, separated them, and caught them.

This time, Malekith made some other preparations. After gathering the Aether Particles, Malekith took out a small metal ball from his arms and then controlled the Aether to fill into the metal ball.

Card!

After the Aether Particles without a fixed form were loaded into the metal sphere, the metal sphere immediately closed without leaving a single gap. Then, dark energy burst out of Malekith's hand that wrapped the metal orb and pulled it back.

"Finally!" Malekith finally breathed out a sigh of relief after carefully sensing the Aether Particle that was put into the metal sphere and making sure that there was no change in it.

"Algrim! Let's go!" Not wanting to stay here even for a moment, Malekith let out a loud shout and turned into a black shadow, and quickly chose a direction to rush out.

Whew!!

Then, Malekith and Algrim, who had been standing firmly behind him, rushed towards the outskirts of the Asgard Palace amongst the chaotic energy fluctuations.

Lin Rui was right in guessing that Malekith's raid on the Asgard was not only done with the eight Spaceships, but also several small invisible Spaceships that had been hiding near the Asgard Palace.

As long as Malekith and The Kursed break out of the Asgard's encirclement, they can quickly drive the Spaceship out of Asgard. That way, Malekith's plans would be back on track. But will things go as smoothly as Malekith thinks?

When Malekith sealed up the Aether Particle and quickly broke through the defense line, Lin Rui, who was lying on the ground, was half-hunched to the ground and was in a very awkward position. It seems that he also suffered a lot in this energy shock wave.

Hum! Hum! Hum!

Unlike the Aether Particle on Malekith's side, which had stopped releasing energy and was put away by him, Lin Rui's portable space continued to send out strong spatial fluctuations.

If it weren't for the fact that the target of these space energies wasn't Lin Rui, it would be impossible for him to persist even if his strength was doubled.

"Fuck! That Beginner Magic Cube manual is useless! Why is it impossible to control these spatial energies?" Kneeling on the ground with countless cracks on it, Lin Rui sipped helplessly with his hands on his waist.

In Lin Rui's hands, the rich internal energy is suppressed in the position of the portable space. However, the space energy emanating from it still penetrated the blockade of the internal energy and kept pouring out. Also, their target seems clear, which is the Aether Particle.

Every space energy gushing out from Lin Rui's space rushed out following the position of the Aether Particle. Even if the Aether Particle was still sealed by Malekith, this space energy could still accurately find the direction of his breakthrough.

Hoo!

"What the hell is going on?! These energies are out of control!" Seeing that his internal energy couldn't stop the outflow of space energy, Lin Rui let go of his hands and thought helplessly in his heart.

Tearing~

When Lin Rui had almost given up control of the Magic Cube, a black space crack suddenly appeared out of thin air due to the continuous interweaving of space energy around him!

Chapter 863: At Wit's End?

Tear! Tear!

With the appearance of the first spatial crack, several spatial cracks appeared next to Lin Rui one after another, and gradually the aura of danger strengthened around Lin Rui. Lin Rui also noticed these changes in the situation around him, so the expression on his face became even more ugly.

"This is cheating! I should have known not to put Magic Cube in my portable space!" Seeing that there were more and more cracks in the space around him, Lin Rui almost cried and muttered to himself.

Of course, this is not the first time Lin Rui had seen such cracks in space. As early as when he first came into contact with space capabilities, Lin Rui had already seen the power of space cracks.

Although Lin Rui's strength has increased a lot compared to before, he is also very helpless in the face of the almost unreasonable lethality of the space crack.

Hoo!

When Lin Rui was half kneeling and looking at the space cracks in front of him, a green light suddenly rushed from behind him. Lin Rui did not resist the light as it covered him. The next moment, Lin Rui's figure disappeared in place with the green light.

Pū!

When Lin Rui reappeared, he had returned to Thor's side, and by his side stood Frigga and Four Warriors. It seems that Thor and the others persisted for a long time from the collision of the energy of the Aether Particle and the Magic Cube and discovered the situation on Lin Rui's side, so Frigga used teleportation magic to teleport him back.

"Jackson! What the hell is going on?!" Lin Rui wasn't the only one who could feel the strong spatial energy emanating from him so Thor looks at him and asks in surprise.

The sudden burst of Aether just now was due to the sudden appearance of space energy, and this space energy fluctuation is being transmitted from Lin Rui, so everyone's eyes are focused on him. Of course, Frigga knew what was going on.

"It's the Magic Cube." Seeing that everyone was staring at him, Lin Rui couldn't keep it to himself, so he had to speak up and explain.

"Magic Cube?! What is that?" Hearing Lin Rui's answer, Thor and the Four Warriors looked back at him with confused expressions on their faces.

"It's something that can be compared with the Aether, and it was once stored in our treasury. However, it was lost for some reasons, and somehow found its way to Midgard." Seeing everyone's puzzled appearance, Frigga finally opened her mouth to explain the situation.

"Something comparable to Aether?! Jackson, Heimdall said that you took something from Asgard before... He wasn't talking about this Magic Cube, right?!" Hearing Frigga's explanation, Thor stared at Lin Rui and asked in disbelief.

"Um!... I... Is this the best time to discuss this? The situation is already so bad! If we can't suppress the magic Cube's energy then we will likely be swallowed by the chaotic space energy!" Seeing that Thor wanted to keep asking him many questions, Lin Rui reminded him with a helpless expression on his face.

Buzz!

Tear!

Just after Lin Rui finished saying this, the space energy surrounding him was entangled and another space crack appeared out of thin air.

Brush!

At the moment when the space crack appeared, Thor and others who had just been standing beside Lin Rui quickly retreated away from him by at least 10 meters. They also seem to know how much of a threat this space rift poses to them.

Lin Rui: "..."

Seeing their resolute retreat, Lin Rui hung up his head and black lines appeared above his head. However, Lin Rui also understands their behavior, and if he encounters such a situation himself, he will make the same choice as them.

"Do you know why the Magic Cube is behaving this way?" Frigga, who was standing ten meters away, frowned as she looked at the space cracks that had begun to appear next to Lin Rui.

No one cares about whether Malekith escaped Asgard with the Aether or not. The situation here is not at all as simple as Malekith leaving with the Aether Particle. Even if Malekith left with the Aether, he would have to go to the Earth and wait for the alignment of the Nine Realms so they have some time before that happens.

But if the situation on Lin Rui's side isn't resolved immediately then perhaps the Palace and even Asgard will be wiped out of the universe by the burst of energy from the Space Stone.

"How would I know that?! Maybe it's because of the Aether! The Magic Cube began to misbehave when Malekith began to extract the Aether out of Jane. You should be able to sense the space energies that are rushing out in one direction!" Lin Rui answered loudly after hearing Frigga's words.

Brush!

Hearing Lin Rui's answer, Thor and the others' eyes all turned to the direction in which the spatial energy waves were being transmitted. Then, they saw a very surprising scene.

In the direction where the spatial energy had rushed out about five hundred meters away, two figures were struggling in mid-air against the spatial energy fluctuations that kept coming towards them.

Needless to say, the two figures were Malekith and The Kursed Algrim who were planning to break out while taking advantage of the chaos.

For some reason, the spatial energies belonging to the Magic Cube are still chasing them even after the Aether Particle has been collected by Malekith, and energy fluctuations are no longer emanating from it.

If Malekith and Algrim were not strong enough, they would not have been able to hold on under the impact of this wave of space energy so how could they still break through the siege?

"Looks like Aether is the cause of this situation!" Seeing Malekith and Algrim's situation in the distance, Thor's eyes flashed with lightning as he spoke out in a low voice.

"Then what do we do now?!" Seeing that there were more cracks in the space beside him, Lin Rui shouted while looking at Thor and the others standing in the safe area.

Of course, Lin Rui is not without any way out of this dangerous situation at this time. The fastest and safest way is to directly exchange the Magic Cube to the System Shop. But that was inconsistent with Lin Rui's original purpose of obtaining the Magic Cube. He wanted to use the Magic Cube's abilities to improve the power of the people of the Earth.

If Lin Rui had intended to exchange the Magic Cube for Reward points, he would have done so when he got it. However, if there was no other way, Lin Rui would have no choice but to do so.

After all, his own life is still more important and something like this happened not long ago when he sold the Heart of Life to the System Shop even though he didn't want to in the beginning when he got it.

"Maybe... you can try to actively use the power of the Magic Cube instead of suppressing its power." Hearing Lin Rui's words, Frigga, who was standing beside Thor, thought for a while and said.

Chapter 864: Out Of Danger?

For the present unexpected situation, Frigga can give only this advice. Although the Magic Cube had been in Asgard's treasury for a while, they hadn't really used it either and were not very clear about its various functions.

However, Lin Rui's eyes suddenly lit up after hearing Frigga's suggestion. He has consumed a lot of internal energy to suppress the outflow of Magic Cube energy, and the stability of his carry-on space has also been affected, and it seems that he won't be able to last long. So, Frigga's suggestion does give Lin Rui another direction.

"There is no other way! I hope it works! The user manual produced by System Shop has to be useful!" Lin Rui silently spoke in his heart as if he had already made a decision.

Brush!

The next moment, Lin Rui, surrounded by strong spatial energy, quickly swiped his right hand around his waist. After a negligible space fluctuation came out, Lin Rui already had a square object dazzling with blue light in his hand, which was the Magic Cube.

Boom! Boom! Boom!

After the Magic Cube was taken out by Lin Rui, there was no isolation of the portable space, no continuous suppression of internal energy, and more intense space energy rushed out of the Magic Cube in waves.

As before, these spatial energies did not cause much damage to Lin Rui and the others nearby, but all ran towards Malekith who was fleeing in the distance. Almost at the same moment, after Lin Rui took out the Magic Cube, the situation on Malekith's side became even more dangerous.

Tear!

However, although these space energies did not actively impact Lin Rui and the others, the space cracks created by their entanglement became more and more. These space cracks are also uncontrolled, randomly appearing beside Lin Rui, putting a lot of pressure on him.

"It's now or never! I didn't expect things to turn out like this!" Lin Rui thought helplessly, clutching the Magic Cube that kept blinking with blue light in his hands.

Buzz!

The next moment, Lin Rui held the Magic Cube and a large amount of Azura light poured out of his hand, and the invisible Psychic Power also rushed out.

At this moment, Lin Rui is trying his best to control the Magic Cube's energy according to the method he read from the Magic Cube Beginner user manual he exchanged from the System Shop.

Tear!

When Lin Rui's powerful internal energy cooperated with the equally powerful Psychic Power to invade the Magic Cube, a space crack beside him suddenly collapsed without warning. In an instant, countless space debris quickly flew towards the surroundings.

Thor and the others, who were still standing ten meters away from Lin Rui, immediately retreated ten meters more when they saw this scene. No one wanted to try the power of those space debris.

As for Lin Rui, he doesn't have the energy to observe how the situation around him is changing. When he tried his best to control the Magic Cube, he realized how small his power was.

Compared to the energy contained in the Magic Cube, his power was like a drop in the ocean. However, Lin Rui doesn't want to be stronger than Magic Cube, what he wants to do is control it, he wants to stabilize the current situation.

Ceng! Ceng! Ceng!

When Lin Rui tried to control the Magic Cube to stabilize the situation, several shattered space debris quickly passed by Lin Rui. The Phantom Suit on Lin Rui's body was cut open like ordinary clothes, and then the space debris close to Lin Rui's body cut small holes in his body causing blood to gush out.

No one knew if Lin Rui noticed the damage the space debris was doing to him, but he didn't dodge it at all. Regardless of the bleeding from those openings, he completely let his body carry it.

Whoosh!

"That doesn't seem to be working! Mother! Is there any other way?" Standing a little farther away staring at Lin Rui, who was surrounded by spatial cracks in front of him, Thor couldn't help but speak to Frigga beside him after seeing blood rushing out of Lin Rui's body.

"Other ways..." Frigga hesitated after hearing Thor's words.

"There are none, it's up to him." Finally, Frigga shook her head and replied.

There are many solutions to the situation that Lin Rui is encountering now. In addition to Lin Rui's unknown System Shop exchange system, the easiest way is to throw away the Magic Cube, and then Lin Rui and Thor could escape from here together.

But that would mean letting the Magic Cube's energy cause chaos on Asgard, and no one knew how much destruction an unattended Magic Cube would deal to Asgard's land.

If you want to stabilize the current situation, it is necessary to have a strong influential figure that can suppress the power of the Magic Cube. Seeing the extent of Magic Cube's current riot, if Odin or Ancient One were to step in, they should be able to stabilize the situation. However, it doesn't look like they are planning to step in.

The rest depends on Lin Rui himself. If he can control Magic Cube with his power, then Frigga may understand the reason why Ancient One and Odin treat this young man differently.

"On his own?! Jackson is powerful but he can't control the Magic Cube, it is one of the Six Infinity Stones!" Thor said with great concern when he heard Frigga's answer.

"You should have a little more confidence in your friend." Frigga also knows Lin Rui's situation, but she wasn't as worried as Thor.

Then, everyone looked at Lin Rui, hoping that something would happen.

Buzz!

"Damn it... STOP!" As the wounds cut by the spatial debris in Lin Rui's body increased, his eyes snapped wide and all of his Psychic Power surged out with a loud bellow.

Bang!

Following that, a strong spatial energy wave was suddenly rushed out from the Magic Cube. This spatial energy swept over Lin Rui's body and then spread outwardly with him in the center, instead of rushing toward Malekith's position.

In the process of spreading out, this space energy swept out other chaotic space energy surrounding Lin Rui, and the space cracks and space debris began to collapse around him.

When this powerful spatial energy spread out, Lin Rui was no longer in the center of a chaotic spatial storm. This scene made Thor and others who were standing in the distance widen their eyes. Did Lin Rui, who was in extreme danger just now, settle the crisis so easily?

"So it was useful after all!" After the space storm beside him was cleared, Lin Rui, who was clutching the Magic Cube in his hand, finally let out a long sigh.

"It should be fine..." After taking a breath, Lin Rui glanced at the Magic Cube whose light was gradually fading in his hand, and muttered softly.

Hum!

Just after Lin Rui finished muttering these words, the Magic Cube in his hand suddenly flashed with a bright blue light again.

Lin Rui: "..."

Chapter 865: Missing Once More

When Lin Rui suddenly controlled the Magic Cube and cleared the surrounding chaotic space storm, the space energy beside Thor, who had been hiding far away, was also instantly swept away.

The look that came into Frigga's eyes after the energy of the chaotic space around her had been cleared away was something more than sheer surprise. As for Thor and the Four Warriors, they did not know how to make any other expressions except shock.

"Jackson!... He did it! Could he really control the Magic Cube? That's..." Thor opened his mouth in disbelief when he saw the space energy storm that had been completely swept away.

"As I said, you should have more confidence in your friend," Frigga said with a smile on her face as she saw Thor's shocked look.

"My Queen! Malekith is escaping!" When Thor and others were shocked by Lin Rui's, Sif, the Goddess of War suddenly waved a long spear in her hand and pointed in a direction to remind them loudly.

In the direction pointed by the Sif's spear, Malekith and The Kursed, who were trapped by countless chaotic space energy just now, also recovered from the impact of space energy because of Lin Rui's move.

So, of course, they took advantage of this opportunity to flee. While Thor and the others were talking, Malekith and Algrim were almost out of their sight.

“Humph! We would have a big problem if we let Malekith run away!” Looking at the fast disappearing figure of Malekith and The Kursed, Frigga said with a frown.

“Then what do we do? The Aether is still in his hands and Jackson is all right, should we go after them!” Thor asked worriedly when he heard Frigga’s words.

In order to save Jane, they had made a deal with Malekith, and the Aether was allowed to remain in Malekith’s hand when he finished, so if Malekith really did leave with the Aether then Thor would feel very guilty.

Moreover, they all knew that Malekith’s departure with the Aether would not be for collection purposes.

“We have a team to intercept, but we are not sure if we can stop them. If not, maybe we can only wait for Malekith’s next move. Taking the etheric Particle, Malekith must want to continue the unfinished work thousands of years ago. Therefore, the movement must not be small.” Seeing the figures of Malekith and Algrim disappearing in front of him, Frigga said calmly.

“Mother! Let me help you!”

Frigga’s eyes softened when she saw the serious look in Thor’s eye, but she didn’t answer.

Buzz!

While Thor and the others were worried about Malekith’s departure, a familiar space energy suddenly passed over them. Sensing this sudden burst of space energy, Thor’s expressions became strange, and their eyes quickly shifted to Lin Rui’s side.

...

“Damn it! I didn’t plan to do this at all!!!” Lin Rui shouted helplessly while holding the Magic Cube when Thor and the others sensed the spatial energy fluctuations.

Whoohoo!

The Magic Cube in Lin Rui’s hand had once again emitted the same dazzling white light as before, but the chaotic space energy was not released from it. However, judging from Lin Rui’s expression, the change of Magic Cube this time is not a good thing.

Brush! Brush!

After Lin Rui shouted helplessly, a spatial energy gushed out from the Magic Cube. Then, two portals suddenly appeared out of thin air beside Lin Rui!

After Lin Rui controlled the Magic Cube to send out energy to clear the previous chaotic space storm, the Magic Cube suddenly turned on another special state, and was able to open space portals instantly! And, it could open several at once!

“Fuck!...” Looking at the two seemingly stable space portals that suddenly appeared beside him, the expression on Lin Rui’s face became even worse.

Buzz!

As Lin Rui muttered to himself, more and more spatial energy poured out of the Magic Cube, and then, more and more spatial portals appeared beside Lin Rui.

Lin Rui’s earlier strike seemed to have turned on a special function switch of the Magic Cube, and the spatial portals that normally would hardly appear now appeared one after another like cabbages by Lin Rui’s side.

In just a few seconds, a radius of several hundred meters with Lin Rui as the center was filled with portals and like mirrors of various sizes instantly filling in the depths of the Asgard Palace, each space portal represents an unknown location.

Buzz!

Lin Rui, who was surrounded by countless portals did not dare to move, he sensed the space energy fluctuations beside him, but this time, the energy fluctuations were at his feet.

Hoo!

“Damn!...” Lin Rui could only speak this sentence before he was swallowed up by the portal appearing under his feet. In the next moment, Lin Rui had already fallen into the portal.

Buzz!

At the same time that Lin Rui was teleported away by the portal that suddenly appeared under his feet, the number of portals in the area also stopped increasing. It should be because of the Magic Cube that disappeared with Lin Rui.

Pū Pū Pū!

A few seconds after Lin Rui disappeared, these countless portals also quickly collapsed one by one due to the unstable energy. In the process of their collapse, the hall of the Palace of the Asgard, which was already riddled with holes, caused unpredictable damage. It is expected that there is not a single intact stone in the hall.

Huhu~

Thor and the others walked out silently from the corner of the hall after the space debris from these space portals had completely dissipated. To avoid being swept away by the space storm again, Thor and the others had hidden far away before the portals appeared. However, they also saw with their own eyes how those portals had appeared.

“Is this the power of the Magic Cube?!” Looking at the hall that has almost turned into ruin in front of him, Volstagg could not help but ask.

The Four Warrior who don’t know much about the Infinity Stones have never seen such pure and massive power, and that is saying something as they have seen Odin use his powers before.

However, compared to this space power that had just happened in front of them, Odin's magnificent power seemed to be nothing.

"This is the power of the Magic Cube, but this is only a small part of the energy it contains," Frigga replied upon hearing Volstagg's words. Seriously, she didn't expect Lin Rui to be able to do this.

"Where's Jackson?" When everyone was shocked by the explosion of the space energy, Thor stared ahead with a blank expression on his face and asked

Chapter 866: Unlimited Extent Transmission

Looking at the ruined hall, Lin Rui's figure seemed to disappear with the disappearance of those portals.

"It couldn't be... did he fall in one of those portals?..." Volstagg's eyes glanced back and forth in the middle of the ruins several times as he spoke uncertainly.

"Didn't he create these portals? Why was he teleported away?" Hearing Volstagg's words, Fandral beside him asked with an inexplicable expression on his face.

"The situation was clearly out of control and the young man must have made a mistake. Still, he wouldn't be in danger even if he's been transported through a portal." Frigga said quietly as the Warriors discussed the situation behind her.

"Where will Jackson be teleported now?" Thor asked worriedly after hearing Frigga's explanation.

"Don't worry, your friend is strong and he seems to have a lot of good luck. And he can use the power of the Magic Cube so he will be fine." Knowing that Thor was worried, Frigga simply stated her assumptions.

And she was right, even if these portals were unintentionally created by Lin Rui, he may not be in danger. After all, the Magic Cube is still in his hands, and as long as Lin Rui can still control it, he will not be in any danger.

"Okay, we can ask Heimdall, maybe he can find where Jackson was teleported to." After hearing Frigga's words, Thor thought of something and said.

"Yes, but Heimdall may not be able to find him."

"We have to try!"

Brush~

As Thor and the others were worried about Lin Rui's disappearance, a golden light shot from outside. It exploded in front of them to form a light curtain. The light curtain had rows and rows of large characters upon it. It was news from Heimdall.

"Malekith and The Kursed left Asgard with a small stealth ship. They were hit eight times during their breakout process. The Spaceship was severely damaged. Malekith and The Kursed should have also suffered varying degrees of damage. The Bifrost is ready to attack the Dark Elf territory at any time. We should strike now." This was the news from Heimdall, who was on Bifrost Bridge and had seen Malekith and the others escape.

However, although Malekith and Algrim escaped, their situation definitely wasn't that good due to Asgard's interference. And, if Asgard took any action against the Dark Elf planet then Malekith may return to his home only to find it destroyed by Bifrost.

As a bridge between Asgard and the other Realms, Bifrost is not without its lethality. It can be said that Bifrost was created as a deterrent to other Realms besides being used for teleportation. If Bifrost is used then it can penetrate and destroy any planet.

In the original plot, Loki used Bifrost like a madman to destroy Jotunheim of the Frost Giants. Jotunheim would have been destroyed by Bifrost if Thor hadn't destroyed Bifrost at the last minute.

So, if Malekith can't be stopped this time then Asgard may make drastic decisions.

However, this is the ultimate solution that no one wants to use. If Asgard used Bifrost to destroy the planet where the Dark Elves are located then how are they any different from Malekith who wants to do the same for all the Nine Realms?

It's just that one would be destroying a race, and the other is thinking of killing all races.

"So they managed to run away! We must stop Malekith before he uses the Aether to destroy everything!" Thor clenched his fists and said after seeing the message from Heimdall.

"This..." Seeing Thor's serious expression, Frigga wanted to say something but was interrupted by someone.

"Uh..." When Thor wanted to make up for the consequences of losing the Aether Particle because of saving Jane and taking the initiative to fight, Jane Foster, who had been holding him all the time, suddenly moved.

Then, Jane slowly opened her eyes. At this moment, her eyes no longer had the crimson light filled with Aether particle energy, but clear green eyes. When Jane opened her eyes, she saw Thor holding her and spoke.

"Thor, I had a horrible dream!"

...

Brush!

Brush!

Brush!

While Jane woke up in Thor's arms, Lin Rui, who fell into the portal, was in a very special and helpless situation. Lin Rui was not directly teleported to another place, but shuttled between countless portals, appearing and disappearing at times.

At the same time, Lin Rui's figure appeared in various places in the universe, but they just disappeared in a flash, and so far it has caused a lot of chaos in the area.

But Lin Rui had no way to stop this, he could only follow the chaotic power of space to shuttle around the universe, and what flashed in front of his eyes were scenes from all over the universe.

In such a rapid space transfer, Lin Rui could not feel the passage of time, it was as if he would spend his whole life constantly jumping through space. However, when Lin Rui traveled through many worlds, several familiar figures suddenly flashed before his eyes.

“Huh?! Tony! Peter!” Although the scene in front of him was fleeting, Lin Rui still recognized who the figure was in the scene that crossed his eyes just now.

At this moment, Lin Rui, who was almost lost in the infinite space jump, finally woke up. Feeling the Magic Cube tightly held by his hand, Lin Rui realized that he could not go on like this.

Brush Brush!

“I must stop! Otherwise, I will never be able to go back!” The scene in front of him was still changing rapidly as Lin Rui firmly thought in his heart.

“Since I saw Tony and the others just now, then one of the countless space teleporters must lead to the earth! I can go back!” Holding the Magic Cube and feeling the continuous gushing space energy inside, Lin Rui made a quick mental analysis.

“So the way home! Start from now!”

...

Tony and Peter are busy doing a series of Extremis experiments in the underground laboratory of Stark Industries on Earth, New York.

Since Lin Rui was teleported away by Bifrost, Tony and Peter didn't bother about Lin Rui's departure after discussing Asgard's situation and focused on other things. Because they knew that they could not help Lin Rui this time.

Hoo!

And as Peter was making a note, he jerked his head up to look ahead.

Chapter 867: Detection

When Peter suddenly looked up at Tony, he saw Tony looking up at him, too. It was like they both discovered something at the same time.

“Did you just... Do you feel anything?” Peter and Tony looked at each other for a few seconds. Finally, Tony spoke first.

He didn't explain what it felt like, but Tony simply asked. However, Peter's eyes brightened a lot after hearing Tony's words.

“Mr. Stark! Did you feel it too?! Just now... It was as if someone had appeared to watch us!” As his eyes brightened, Peter spoke with some excitement.

“So you also felt it?! Who do you think is looking at us?” Tony asked with a twinkle in his eyes when he heard Peter's answer.

Originally, Tony thought he was delusional. After all, this was in the underground laboratory of the Stark Industries building, and the level of confidentiality and security at his building would not be any worse than the SHIELD Headquarters.

It was highly unlikely that someone could just appear silently behind Tony and Peter without being noticed.

But if Tony's feelings are right, there's a good chance it could be that person. So, Tony needs further confirmation from Peter.

"I seem to... feel... I feel it was Jackson!" Peter replied hesitantly under Tony's questioning.

Hearing Peter's answer, Tony's eyes brightened completely. Because he felt the same as Peter, just now he sensed that someone was watching him, and the gaze was from that guy Lin Rui.

"Cou... Could it be that Jackson is trying to contact us in some way?" Tony continued to ask without considering whether the illusion just now was true or not.

"I think it's possible. The information from SHIELD shows that Thor is from Asgard, and we have got further information about Asgard from Miss Jane who says that Earth and the other Nine Realms are contained within the World Tree. Maybe Jackson is over there contacting us somehow." Hearing Tony's question, Peter thought for a moment and answered.

Now, Peter and Tony are looking beyond the earth as they learn more about hidden situations surrounding them and their planet. They no longer doubted the idea of the world tree and the existence of all kinds of strange things in the universe.

"So why did Jackson contact us? And it only felt like a fleeting illusion. Is he in some kind of trouble, and why didn't Bifrost send him here?" After Peter finished answering, Tony asked several questions in a row, talking to himself.

"So, can we find a way for him to contact us? Maybe we can connect with Jackson without waiting for that Bifrost." This time Tony said what was on his mind without waiting for Peter's answer.

"That's right! That's right! As long as we can find out how Lin Rui appeared!" Peter shouted excitedly after hearing Tony's question and answer.

"JARVIS!" The next moment, Tony called out to JARVIS.

"I'm here, sir. I've analyzed everything that happened in this lab and the entire Stark Industries building when you and Mr. Peter got delusional at the same time but I have found nothing out of the ordinary." JARVIS' voice came after Tony finished shouting and he had already spoken his analysis, though Tony hasn't told it what to do yet.

Tony and Peter were stunned when they heard JARVIS' answer. They were not stunned by JARVIS's early answer, but by JARVIS's assertion that nothing was out of the ordinary.

Through mutual verification of the feelings of Tony and Peter, they could almost confirm that Lin Rui did appear in this laboratory by some means just now, but JARVIS said that there was no abnormality.

Tony and Peter trusted JARVIS' inspection and it was precisely because they trusted in JARVIS that they were stunned. Because they are also very confident in their feelings. So, now there can only be two answers to this.

"One, it is possible that both of us experienced the same illusion at the same time, and the other situation is that JARVIS can't find the way Jackson contacted us." After being stunned for a while, Tony calmed down and analyzed the situation.

Hearing Tony's words, Peter nodded silently. Asgard is another civilization with advanced technology. If Lin Rui had used their method to contact them then JARVIS probably won't be able to analyze it.

"It's going to be hard to do that unless Jackson can contact us again." Tony frowned without asking JARVIS to re-check.

The illusion that Tony and Peter saw this time was too short, so short that they only noticed the appearance of Lin Rui with their sixth sense. If Lin Rui reappears and it lasts a little longer then Tony and Peter can still provide some help based on the news from Lin Rui.

"JARVIS, from now on, we will do our best to monitor this laboratory! No, not only this laboratory but anyway that can be used to contact me or Peter. Also, we can't just monitor it in the usual way. We need to pay attention to extraterrestrial energy, such as Magic Cube energy, Bifrost energy, and even dark energy." After analyzing the situation at this time, Tony quickly instructed JARVIS that he would wait for the next arrival of Lin Rui.

"Okay, sir." JARVIS agreed quickly after hearing Tony's order.

Then, JARVIS' core system went into full swing, and it won't release this energy-intensive monitoring until Tony's orders are over. Tony and Peter also temporarily put down the experiments in their hands, they are waiting for Lin Rui to contact them.

...

While Tony and Peter on Earth were trying their best to prepare for the short glimpse of Lin Rui, Lin Rui was also trying to control the Magic Cube to find the portal back to Earth again.

In this space teleportation without the concept of time, Lin Rui's body seems to have not changed, but it is already on the verge of breaking. After all, Lin Rui's strength has been greatly increased, especially in all aspects of his body, but it is not enough to resist the backlash effect brought by an Infinity Stone.

If Lin Rui cannot escape from this state in a short time, it is likely that Lin Rui will be trapped forever. However, it would be his soul that would be trapped here, and his body will travel through infinite space and disappear completely.

Chapter 868: Sudden

Brush! Brush! Brush!

Lin Rui is struggling helplessly while teleporting into infinite space. The sight in front of him made him start to feel dizzy, but he is still insisting on finding his destination.

The uncountable number of transmissions has made Lin Rui's body very tired, and he has also become acutely aware that he may not be able to last much longer. If the Heart of Life was still there, perhaps Lin Rui could continue to hold on for a longer time.

But now, the most he could do was to exchange some Beginner items from the System Shop that could enhance his vitality and body strength.

"Come on! Come on! Where the hell is the earth?!" He searched for traces of the earth in countless teleports, but Lin Rui still couldn't sense the location of his planet.

Brush!

And as Lin Rui continued to curse, a few scenes that he was very familiar with suddenly blinked in front of his eyes.

"It's Earth! But..." The sight in front of him was only fleeting, but Lin Rui could still be sure that it was the Earth. However, he felt that the scene just now was a bit strange.

The scene Lin Rui saw just now was not in Tony's Stark Industries building, nor was it the New York that Lin Rui had been living in for more than ten years and was very familiar with. Through the familiar characters on the street side, Lin Rui determined that the place he had just seen was the place he had never gone to in his life: China.

Although Lin Rui has lived for more than ten years in his life, he has never been to China of this world, but he often reads news about the country on the Internet.

Aside from the things that were deliberately distorted by other countries, Lin Rui also knew that China in this world was very different from the China he initially lived in.

"That..... just now is..... the place where I used to live! Another Earth!" After carefully recalling the scene he glimpsed just now, Lin Rui couldn't help but exclaim.

At this moment, Lin Rui's belief that he had been thinking about returning to Earth was shaken unconsciously. Because, he suddenly discovered that in this infinite space teleportation, he still has a chance to return to the ordinary world he once lived in.

Therefore, Lin Rui suddenly remembered an idea that he had when he hadn't officially opened the System Mainline Mission before his sixteenth birthday, which was to return to the world he once lived in.

Although Lin Rui was ordinary in that world, there was a life he was familiar with. However, after the emergence of the Main Missions, Lin Rui began to walk further and further on the road to becoming Superhero, and he gradually faded away from that idea.

Shhh!

"That world... the place where I once lived, I don't know what it will look like now." Lin Rui muttered to himself without paying attention to the other sights that kept flashing in front of him.

Buzzing~

While Lin Rui was absentmindedly talking to himself, the Magic Cube in his hand continued to pour out space energy, and it continued to consume Lin Rui's body. It won't be long before the things that Lin Rui exchanged from the System Shop will run out. At that time, if he hadn't gotten out of this state, he might never be able to leave.

Click!

When Lin Rui fell into this state and gradually stepped into danger, his mind suddenly sent out a blast of energy.

The sound of the explosion in his mind made Lin Rui's blurred eyes recover in an instant, and then Lin Rui found that his situation seemed to be dangerous.

"I almost lost myself!" Not bothering about what exactly had just exploded in his mind, Lin Rui had now refocused his attention to get out of his current state.

Brush Brush!

"I've already reached this stage, and I'm still hesitating about which world to return to, I didn't know I was holding so much back." Lin Rui said helplessly to himself, looking at the scene in front of him.

Then, Lin Rui dismissed all distracting thoughts and silently closed his eyes. He wants to find his way home in the shortest time, and the key lies in the Magic Cube in his hand.

After Lin Rui flashed through hundreds of different worlds, his eyes suddenly opened, and the light belonging to space energy enveloped his eyes.

"Found it!"

Boom!

In the next moment, Lin Rui's constantly blinking image freezes in an instant, and he finally stabilizes a portal. Then, Lin Rui's figure fell into it.

...

When Lin Rui was trapped in infinite space teleportation and managed to escape, he did not know that on the earth of Marvel World, Ancient One felt a sudden burst of strong magic and time fluctuations just now.

Huhu~

In the building where the Ancient One lived, the intense magic and time energy fluctuations gradually dissipated. The secluded sorcerers who originally lived in this yard were all frightened by the sudden energy fluctuation just now, but Ancient One did not give any explanation.

"Phew..." Sitting cross-legged on the futon in his room, Ancient One took a long breath and opened his eyes.

Ka Ka Ka ~

Then the Ancient One dropped his hands which had been sealed on his chest. There, the Eye of Agamotto is slowly closing, and the green light from it is rapidly converging into it. It seems that Ancient One just used the Time Stone.

“That kid! I didn’t expect to be able to do so many things!” Ancient One, who put his hands down, looked a little tired, and then said to himself.

As for the kid he mentioned, there was no one else except Lin Rui. Since Lin Rui was teleported to Asgard by Heimdall, Ancient One had been watching him. Besides saying his greetings to Odin, Ancient One also wanted to see how Lin Rui was doing.

Overall, Lin Rui’s previous performance did not exceed Ancient One’s expectations. Even if Lin Rui accidentally triggered the Magic Cube’s power, Ancient One was just a little surprised just like Odin.

As for Lin Rui being teleported away by the portal, Ancient One didn’t worry too much at first. Anyway, Ancient One left a trace of his Magic Psychic Power in Lin Rui’s body, which he could still handle.

However, Ancient One did not expect Lin Rui fell into the infinite space teleportation this time. He tracked his Psychic Power in Lin Rui’s body but it was impossible to track Lin Rui’s whereabouts under such circumstances.

Therefore, Ancient One had to make a move, and while contacting his magical Psychic Power, he used the Time Stone to explore the countless possibilities of Lin Rui’s situation.

And when Lin Rui flashed on Earth for a while, Ancient One seized the opportunity and started the Psychic Power in Lin Rui’s mind. It was also at that time that Lin Rui, who was in a state of confusion, suddenly came to his senses.

Chapter 869: Small Town

And Ancient One couldn’t track Lin Rui’s whereabouts again after making his move at the moment Lin Rui appeared on Earth, so he wasn’t very sure that his move was effective. However, he has also been using the Time Stone to probe Lin Rui’s possible future.

It is not that Ancient One has not done such a thing before, but the future of Lin Rui cannot be seen through. However, Ancient One can confirm that Lin Rui’s existence is good for the world.

However, this time, when Lin Rui saw the world he used to live in and his belief wavered, Ancient One’s prediction of his future showed great changes.

Of the almost countless possibilities seen with the Time Stone, a large number indicated that Lin Rui would leave this world forever this time, and his departure would have immeasurable effects on the world.

“This kid’s future... I hope he can make the right choice!” Using Time Stone to see so many futures, it was too much for the Ancient One.

However, at this time, he can only expect Lin Rui to make the right choice this time. After all, he had already made so much impact and changes in the world. If he does leave then maybe Ancient One would have to go to that universe to get him back.

“Well, the boy must be left to his own devices. As for Malekith, does he really think that Earth is someplace he can come to any time he wants? For him to plan to use earth as the focal point when the Convergence start, how foolish.” Then, the Ancient One, whose face had recovered to normal, said to himself with a cold look in his eyes.

Brush!

The next moment, two golden rays of light shot out from Ancient One’s hand and rushed out of the courtyard where he lived. The two golden rays of light flew to Sanctum the Masters of London and New York, respectively, with his orders.

As for the message inside, it depends on the actions of the Sorcerer. However, judging from Ancient One’s self-talk just now, at least Malekith will have a hard time getting things done on Earth.

Having done all this, the Ancient One rises from the futon, and some of his actions have alarmed the Sorcerers who are in seclusion here, and he had to go out to explain his actions.

After all, not every Sorcerer takes orders from the Ancient One. There are many Sorcerers living here that are no less powerful than the Ancient One.

...

The Ancient One had already done what he had to do for Lin Rui, while Tony and Peter are seriously waiting to receive Lin Rui’s next possible contact. Lin Rui, who fell into the last space portal, is falling into a space tunnel filled with space energy.

Whoosh!

In the space tunnel leading to nowhere, the unconscious Lin Rui was still holding the Magic Cube whose light had dimmed. Ancient One’s magic Psychic Power has been activated once, and will not be effective for a short time.

It can be said that Lin Rui’s current situation is completely dependent on the will of God and this time he will be teleported to any one of the countless futures that Ancient One saw.

...

The Earth of Marvel World, the United States. An unknown town in the western state of Minnesota.

There are many old buildings in this small town, and some migrants with unstable jobs live in some of these old buildings. A temporary tenant lives in a house on the seventh floor of one of these old buildings.

He had arrived a month ago and was living a very regular life, not communicating with anyone except the landlord. Of course, the landlord didn’t mind as long as he paid cash.

On this sunny afternoon, the tenant of 7002 came back from the outside alone, carrying a bag of cheap food. It looked as if the burly outsider was one of those social idlers who didn’t do his job properly.

Card~

Taking out the key and opening the door, the outsider tenant stood at the door and waited for a little before stepping in. After his figure entered the room, the door closed quickly behind him.

Throwing the key in the utility closet behind the door, the person walked to the kitchen with the food he had purchased.

He had been in hiding since he left the control of that organization, and all the cash he had obtained was through some not-so-legitimate means. Now, he had little money left. Perhaps he would have to change his place again.

He put the bag on the kitchen counter and was about to wash an apple to eat. Today, he was able to buy some apples due to the low price and he wasn't sure if the stall owner who sold them to him deliberately lowered the price for him.

Buzz!

A sudden burst of energy came from the living room just as he took out the apple to wash. A cold light flashed in the eyes of the foreign tenant who sensed this energy fluctuation. In the next moment, he left the kitchen and rushed into the living room.

Buzz!

When the foreign tenant rushed into the living room, a mass of silver-white spatial energy appeared in the middle of the living room, and bursts of spatial fluctuations were constantly being transmitted from it.

And after seeing the situation in front of him, the tenant who rushed over already had a modified submachine gun in his hand which appeared at some point.

"Space Energy!" Holding the submachine gun in his hand, the foreign tenant couldn't help but let out a low roar.

From the roar, he seemed to understand what the silvery white light in front of him represented. In this way, he is not an ordinary person. There may be a lot of people in this world who can recognize space energy, but there are not many, at least ordinary people can't recognize it.

Hoo!

After determining the silver glowing space energy in front of him, this outsider who originally held the submachine gun with only one hand unconsciously used both hands to hold it up. Because he knew that this spatial energy was likely to appear as a case of teleportation, and there was no telling who or what would appear from this teleportation.

When he raised his arms to hold the submachine gun, his left hand, which had been wearing gloves, also showed his arm above the wrist, which was not a normal human arm, but a special metal arm!

Buzz!

Pū!

When the foreign tenant dragged his submachine gun towards the space energy in front of him, there was a sudden burst of strong fluctuations in the silver space energy, and then a figure was directly sprayed out.

Bang!

The foreign tenant was directly knocked into the air by the sudden surge of space fluctuations and then stopped flying backward after hitting the wall of the living room. Judging from how quickly he turned over and jumped up, he should be fine. However, the submachine gun in his hand has become a part of the ground after being reduced to parts.

The tenant jumped up from the ground and walked back to the center of the living room empty-handed. The space energy just now had all disappeared. However, on the sofa in the middle of the living room, a stranger appeared out of thin air.

Chapter 870: Who Am I?

Looking at the stranger who was lying on his couch, the tenant who had run out of submachine gun pulled another pistol from the back of his waist.

Kaka!

The pistol was loaded in an instant, and the muzzle was aimed at the guy who appeared from the white energy, and then he slowly approached him.

“Ugh...” A few seconds after the outsider pointed his gun at the guy on the couch, the man lying on his stomach suddenly moved his fingers, and then let out a muffled groan.

Huhu~

It seemed that it was very uncomfortable for his head to be buried in the sofa. The guy who fell out of the portal moved his arms slowly on the sofa a few times and then turned over with difficulty while supporting half of his body.

Then, the tenant saw what the unexpected visitor in front of him looked like, and it turned out to be a mixed-race young man.

“It’s so uncomfortable!...” As he turned over, the strange guy was still muttering in a low voice.

Finally, after a few seconds, he turned himself over and lay on the sofa on his back. However, when he turned over, he found a man in front of him pointing a gun at him.

“You, you! ... What are you doing?” The guy lying on the sofa man was frightened by the scene in front of him and then shouted in fear.

“Who are you? Why are you here?!” Without speaking any nonsense, the man holding the gun stood on the spot and asked.

“I am!... Uh... I am... Who am I?” Hearing the question from the burly man with the gun in front of him, the guy lying on the sofa was going to answer, but when he spoke, he realized that he can’t even remember what his name is.

“What’s my name? Why don’t I even know this?!” The stranger who didn’t remember his name for a while seemed to be stunned, he raised his hand and tapped his head with difficulty, and muttered a few words.

“You don’t remember your name?” Hearing the stranger muttering to himself, the cold eyes of the outsider holding the gun suddenly softened and he asked.

“Uh... it seems more than that... I don’t seem to remember anything...” Looking up at the stranger with a gun in front of him, the guy who appeared from the portal said helplessly with eyes wide open.

Hearing this, the tenant of this house stared carefully at the guy in front of him, and then put down the right hand holding the gun. He believed the words of the stranger in front of him, perhaps because he had the same experience.

“Huh? What’s on my butt?” After thinking for a while and not remembering who he was, the guy lying on the sofa suddenly frowned and muttered.

Then, he reached out his hand and slowly touched the place under his buttocks. And at the moment when his fingers touched the thing that was sticking to his butt, tiny space energy blinked.

“Ah!” With an exclamation, the unexpected visitor who had lost his memory suddenly retracted his hand and jumped up from the sofa at the same time.

Brush!

As the guy on the couch jumped up, the outsider standing in front of him pulled out his gun and pointed it at him again.

“It’s not me! It’s it! It scalded me!” Seeing the burly man in front of him draw a gun at him again, the unexpected visitor hurriedly pointed to a place on the sofa and shouted.

Following the direction of the guy’s finger in front of him, the foreign tenant saw the square blue thing at a glance. However, this thing did not originally exist in his living room. Therefore, it should have fallen out of the portal just like the guy in front of him.

Hu~

With a pistol in his right hand pointing at the unexpected visitor, the room tenant stretched out his left hand to grab the square object. In that accidental visitor’s astonished gaze, the tenant’s gloved left hand had grabbed the object that had just burned him. Then, he picked it up without suffering.

“Hey?! Why don’t you feel anything?” Seeing that the guy in front of him didn’t react at all, the unexpected visitor widened his eyes in surprise. He was scalded just now, although there was no sign of injury on his hand.

In the surprised expression of the unexpected visitor, the tenant put away the square object. Regardless of whether this thing appeared from the portal with the guy in front of him, it was right to put it away anyway.

“You don’t remember your name?” The tenant asked again after putting the thing away.

“Well, I don’t remember. But... I vaguely remember that I should not be an ordinary person.” Hearing the question of the burly man in front of him, the unexpected visitor answered with a confused expression on his face.

“Of course, I know you won’t be an ordinary person. How can an ordinary person be exposed to space energy, and how can it be possible for an ordinary person to pass through the portal and be intact.” The tenant was not surprised at the conjecture of the unexpected visitor.

“By the way, my name is Bucky, Bucky Barnes.” Looking at the unexpected visitor with a confused expression in front of him, the tenant put away his gun and introduced himself.

It turned out that the guy living alone in this old building was none other than the Winter Soldier that Alexander dispatched when Hydra attacked the SHIELD headquarters a few months ago: Bucky the Winter Soldier!

Since Hydra attacked SHIELD in full force a few months ago, Bucky fell from the SHIELD headquarters building while being pursued by Lin Rui. The situation at that time was very dangerous and any average person would have died. But Bucky was unusual, and SHIELD and Rogers never found Bucky’s body.

So Rogers was sure Bucky wasn’t dead, and kept looking for him, but couldn’t find him. Under Lin Rui’s suggestion, Rogers also used some of SHIELD’s resources to search for the small country called Wakanda but found nothing.

Unexpectedly, it turned out that Bucky did not leave the United States but just came to the northern city. Perhaps Bucky didn’t have enough money to take the smuggling route out of the country. After all, he didn’t recover his complete memory and he has not fully accepted modern society.

“Uh... Hello, Bucky.” Hearing the self-introduction of the stout man in front of him, the unexpected visitor responded with some embarrassment, rubbing his head. He didn’t have any special feelings about the name Bucky-Barnes either.

“Why don’t you give yourself a name for now? Or I wouldn’t know what to call you.” Perhaps it was the unexpected visitor’s youthful appearance or the fact that he had also lost his memory, that Bucky felt empathy for him, and his attitude toward the unexpected visitor was more relaxed than that of other strangers.

“Any name?... Then... call me... Jackson!” Hearing Bucky’s words, the unexpected visitor thought for a moment and then said with a bright eye.
