

## **Marvel 871**

### **Chapter 871: Recalls**

Half an hour later, the living room, which had been swept up by a blast of space energy, had been tidied up, and Bucky had done nothing about the unexpected visitor that teleported himself into his living room.

After determining that this person, like him, had lost part of his memory, Bucky decided to take him in, much to his own surprise.

Although the young man who had given himself the name Jackson didn't look like a Hydra-trained Soldier, Bucky could relate to him.

And, perhaps knowing he wasn't going to do anything to him, the young man who already had a name didn't plan to leave, and he wanted to stay with Bucky until he regained his memory.

In his own words, he can't remember who he is now and the first person he saw when he woke up was Bucky, so this is fate, he will stay with Bucky until he remembers everything.

Bucky was also feeling a little helpless in this regard, but he did not refuse, because he knew the young man in front of him was not ordinary, and that two people with the same problems might be able to take care of each other.

So, while Bucky went back to the kitchen to wash the apples, Jackson, who was left in the living room, cleaned up the mess. If he wants to stay, it is only right that he should do what he can. While cleaning, Jackson took a look at himself in the mirror. Looking in the mirror, Jackson saw a handsome young face looking back at him.

"So I'm pretty handsome and it looks like I am half-Asian!" Jackson said to himself with a smile after fiddling in front of the mirror a few times. Then he went on to clean up.

Bucky, who decided to take Jackson in, didn't know that the young man he was now taking in was more than just an abnormal person.

The young man who has forgotten his identity is Lin Rui, Jackson Lin who has made a difficult return to Marvel World Earth from the infinite space teleport.

No one knows what Lin Rui experienced in his teleportation, but he lost some of his memory after he came out. And the place where he was finally teleported turned out to be the place where Bucky Barnes, a good friend of Captain America Rogers, lived in seclusion.

Fortunately, Bucky has now recovered some of his memories and he was no longer the Winter Soldier who murdered without blinking. Otherwise, Lin Rui, who lost his memory, might have been shot by Bucky while he was unconscious.

Now, in addition to losing part of his memory, Lin Rui's internal energy has also been exhausted so he seems to be an ordinary person as well. However, as time goes by, Lin Rui's internal energy will certainly recover.

The most important thing is the Magic Cube, however, it was tucked away by Bucky. In addition, it is not known when Lin Rui will recover his memory or it is also possible that he will not recover his memory at all.

Hoo!

After cleaning the living room, Lin Rui, who lost part of his memory, threw himself on the sofa again. In addition to not remembering who he is and what he did before, Lin Rui has some common sense and he knew the basic things. Therefore, if someone were to look at Bucky, who also lost part of his memory, Lin Rui would be better able to adapt to the current situation.

“Bucky told me I came from a portal created by space energy, but I look like I am still in high school.” Lin Rui silently thought in his heart as he slumped on the sofa staring at the ceiling.

After deciding to let Lin Rui stay with him, Bucky didn’t hide his situation, what happened to Lin Rui, and his guesses about his identity. To help Lin Rui to better recall or find the differences between their memory loss, Bucky also shared with Lin Rui some of his speculation and some things in the world that ordinary people are not clear about.

For example, there are many Superheroes in this world, and there are many powerful forces, such as SHIELD and Hydra. Bucky explained whatever he could to Lin Rui and he is also holding on to see if he can use this information to jog Lin Rui’s recovery.

However, although Bucky said a lot of shocking things, Lin Rui in front of him was not surprised in the slightest, it was as if he knew these things. Therefore, Bucky became more certain that Lin Rui’s identity is not that simple.

“Why am I not surprised by those things? I don’t recall knowing any of these things, but my subconscious is telling me that those things are nothing to be surprised about. Could it be... Am I some sort of a Secret Agent? Or a super soldier? Am I someone trained by some mysterious power? What am I?” Lin Rui thought helplessly as he listened to some of the movements Bucky made in the kitchen.

Click ~ Click ~ Click ~

While thinking about it, Lin Rui unconsciously squeezed his fist. Then he heard the crack of the bones coming from clenched fists. It seems that he had abnormal strength.

Shout!

“Forget it! If I’m really like Bucky who was trained by Hydra then I don’t want to remember those things!” Lin Rui quickly observed his fist before he loosened it and decided on a course.

Because Bucky explained his identity and situation to Lin Rui in order to let Lin Rui decide whether to leave or stay, Lin Rui knew that the man with long hair who was busy in the kitchen was also poor. If Lin Rui is really like Bucky then he won’t be able to accept it. However, Lin Rui’s subconscious seems to be telling him that he is not such a person.

Bam!

When Lin Rui gave up searching for his identity in his mind, a crisp sound came from the kitchen, which was the sound of a bowl being broken. This was the third sound that Lin Rui had heard since he was cleaning the living room. In that time, Bucky had broken three bowls in the kitchen.

“Ah! It looks like it’s up to me!” Sighing softly, Lin Rui stood up from the sofa.

Then, Lin Rui walked into the kitchen and showed a helpless expression when he saw the broken bowls scattered on the kitchen floor and Bucky who was still busy preparing food.

“What are you doing here? I will be done soon!” Bucky said with a slightly embarrassed expression on his cold face when he saw Lin Rui walk into the kitchen.

“Bucky, you better get out of here, I’ll take care of this.” Not commenting on Bucky’s embarrassed expression, Lin Rui walked over and took the kitchen utensils from his hands.

“You know how to cook?” Looking at Lin Rui’s skillful appearance, Bucky, who was pushed aside, asked with a surprised expression on his face.

“I think so, maybe I worked in a restaurant?” Hearing Bucky’s words, Lin Rui, who had already found his senses, replied with a smile on his face.

Then, Lin Rui began to cook with the not-so-abundant ingredients in the kitchen with Bucky looking at him.

## **Chapter 872: Following the Event**

Ten minutes later, Bucky ate the meal prepared by Lin Rui. Although it was very simple due to the limited ingredients, it was the best meal Bucky had in months.

Because of Lin Rui’s cooking skills, Bucky felt that it was the right choice to take him in. However, the cost of two people living here is much higher than that of one person and he is running out of cash.

So, after dinner, Bucky was ready to go out for a stroll after dark. In such a small city which is neither far nor close enough to a big city, the law and order are not very good, and it is normal for some gangsters to fool around on the street at night, and Bucky’s goal is those gangsters.

All it takes is a few punks, and Bucky will have money for the next two weeks.

“Hey, Bucky! Where are you going?” However, as Bucky was about to go out after dark, Lin Rui, who was sitting in the room doing nothing, looked at him and asked.

“I’m going out for a walk,” Bucky explained with a straight face as he couldn’t possibly say that he was going out to rob the gangster because he didn’t have any money.

Brush!

“Then I’ll go with you! I am feeling cooped up in here and I want to see the neighborhood seeing that I would be living here for some time.” Lin Rui rushed over and said after hearing Bucky’s answer.

Bucky’s eyes flashed as he noticed Lin Rui’s speed. But now he did not know whether he would ever get out. After all, he couldn’t take the young man to a robbery. That would be child endangerment!

“Huh? Bucky, why are you standing there? Weren’t we going out? Did you forget something?” Lin Rui, who had already reached the door, saw that Bucky was still standing so he turned his head and asked.

“Yeah, I forgot this.” Bucky had no choice but to take an umbrella from the cabinet by the door and walked over after agreeing.

Bam~

Then, Lin Rui and Bucky left their humble rental home. I wonder how Lin Rui will react if Bucky goes after those punks tonight. However, based on Lin Rui’s subconscious reaction, perhaps Bucky’s worry is unnecessary and he should worry more about the punks.

After all, Mirage Knight got its start fighting street thugs. When it comes to dealing with street thugs, Bucky has less experience than Lin Rui.

...

New York, in the basement laboratory of the Stark Industries building.

“JARVIS, turn off the energy monitoring.” Tony, who had been up all night, looked away from the unchanging screen and spoke to JARVIS.

“Yes, Sir.” Hearing Tony’s words, JARVIS, who is in full surveillance mode shuts down the all-around surveillance of the entire Stark Industries building.

Twelve hours had passed since Tony and Peter had the “illusion” at the same time, and during these twelve hours, JARVIS had used all his powers to monitor any accidents in the Stark Building. However, nothing was found. And Tony and Peter didn’t have that illusion again.

“Mr. Stark... Jackson will come back, right?” Peter, who also stayed up all night, asked hesitantly after Tony asked JARVIS to turn off the monitoring of dark energy and Bifrost energy.

Hearing Peter’s words, Tony didn’t know how to answer. Judging from yesterday’s situation when Lin Rui asked Thor to summon the Bifrost to save Jane Foster. That said, Lin Rui was confident that Thor will come back after he returns to Asgard. Otherwise, Jane will never be able to come back.

However, Tony and the others saw Lin Rui getting teleported away by Bifrost. At that time, Lin Rui probably didn’t expect that he would be enveloped by the Bifrost beam, but JARVIS also told Tony that at that time, Lin Rui had the space energy of Magic Cube surrounding him. So, maybe Lin Rui was brought to Asgard because of the Magic Cube.

“Don’t worry, Jackson was able to come back after being teleported to an extraterrestrial planet by an unstable portal, he will come back safely this time. Besides, didn’t he borrow Bifrost before which means Jackson had something to do with it?” After some thought, Tony said with relief.

“Yes! That’s right! Although Jackson made it sound simple, his first time off Earth was much more unexpected.” Hearing Tony’s words, Peter also remembered the time Lin Rui left the Earth.

Perhaps, it was because of the fact that this was not the first time that Lin Rui left the earth unexpectedly, so this time, Tony and the others were not so worried except for doing their best. Moreover, they all have an inexplicable trust in Lin Rui.

“Well, it’s best if you can think that way. What we should do now is to settle the matter in front of us, we still don’t understand much about the Extremis and we still have a lot to do! As for Jackson, I think he’ll be back on his own in a few days.”

“But... Can we keep it quiet by having JARVIS do Jackson’s voice and call Jackson’s house every day?” Although Peter also believes that Lin Rui will be okay, he still wanted to cover all the bases.

“Isn’t it on you and Harry? With the two of you to help cover his absence, you can keep going until Jackson comes back.”

“Uh... Yeah.”

...

When Tony and Peter were still waiting for Lin Rui’s return. In the suburb of London that was hundreds of kilometers away from New York.

The place that was invaded by the Dark Elves due to the emergence of the Convergence not long ago has been enclosed by the SHIELD. This kind of place has been counted as an S-level event, and they have to focus on researching it.

In the circled ruined battlefield, hundreds of researchers and equipped SHIELD elite soldiers were scanning inch by inch. This battlefield has left a lot of things worth studying, including the remnants of Lifeform arms of the Dark Elf race and the corpses of Dark Elf warriors, whose research value is impossible to estimate.

On the outskirts of the ruins, a cluster of base houses that houses Elite agents and Elite teams from SHIELD headquarters in charge of the area. One of them is a special agent Evan who had experienced this incident personally.

“Hey! Evans! Congratulations on your promotion but man jumping three levels in a row, who would have thought that when you just picked up the job for observe the target, you would encounter such a high-level event?”

“I would rather not have encountered such a thing, I almost died out there.” Evans, who had been promoted to a Fourth-Level Agent, smiled awkwardly when he heard the ridicule of his newly-acquainted colleague beside him.

“Hey, this is a normal thing, and you will encounter it often in the future.” Seeing the look on Evan’s face, the Elite agent, a senior, said with a smile.

Evans: “...”

### **Chapter 873: Evans’s Discovery**

Evans can only keep smiling in the face of ridicule launched by his new colleagues. After all, he is a newly promoted agent. He also knew that the higher the rank of an Agent in SHIELD, the greater the chance of encountering danger, but he was not afraid.

After all, if he got afraid so easily then he wouldn’t have been trained as a professional agent by SHIELD. However, Evans felt that this incident was not completely over.

Evans had previously followed Agent Coulson to the Stark Industries building but left without being able to see or hear anything about this situation.

As for Jane Foster, Thor, and the young man Jackson Lin, Evans still doesn't know anything about them and their situation. However, he had hoped in his heart that they would be all right.

"Hey! ~ Even though our level seems to be quite high, we can only do this kind of simple aftermath work. Although this is an S-level incident, but the most thrilling stage has passed." While Evans was lost in his thoughts, his colleagues next to him began to sigh again.

It seems that these agents are also people who can't stand peace. Now they are asked to be responsible for the aftermath of the battlefield in which no fights are involved. They still feel that it is too bland.

However, Evans felt that the aftermath work was just as meaningful as those combat teams dealing with front-line situations. Anyway, he didn't want to experience that kind of danger again. There is a difference between not being afraid and being foolish. To be honest, he will have to see a psychologist due to the things he has experienced.

Dī Dī Dī!

While Evans and the others were chatting in the base room outside the battlefield and watching the researchers cleaning the battlefield, a sudden alarm sounded out and Evans almost jumped up hearing this alarm sound.

Brush!

In the next moment, Evans has quickly taken out a small instrument from his waist, which is the instrument used to detect the concentration of Alpha Particles, and this alarm sound is emitted from this instrument.

"It's here again!" Seeing the rapidly rising value of the instrument, Evans spoke with an even expression on his face.

Ka Ka Ka!

This was not the first time that Evans had experienced this kind of situation so he responded quickly. Before other agents could understand what Evans said, he quickly sent the news out.

If the increase in the concentration of Alpha Particles this time leads to the emergence of dimensional gates linking to other worlds then the researchers in the ruins must retreat quickly.

"It's an S-Class alert!"

"We are actually going to see this! It seems that Evans is quite lucky!"

After Evans sent out this alert, the other agents also reacted accordingly, and everyone lost the relaxed expression they had just now.

These agents all understand what the Alpha Particle concentration represents. When it rises to a certain level, there is a high probability that a situation involving another planet will occur. As for the current situation, it is SHIELD's current focus.

After Evans had sent the alert, all SHIELD personnel stationed on this battlefield quickly moved. The researchers who were still conducting scientific research in the ruins of the battlefield all quickly retreated under the cover provided by the soldiers.

At the same time, all kinds of powerful weapons transferred by SHIELD during this period were also quickly charged and ready. Once something like a dimensional gate or a portal appears, they will be able to respond as soon as possible.

Dī Dī!

However, the AlphaParticle concentration stopped rising as SHIELD responded, but it kept floating at a dangerous value. It looks like Alpha Particle is teasing Evans and the others.

“Something’s wrong! This is...” Evans, who had been observing the change in the concentration of Alpha Particles for a while, frowned and muttered.

Because he has personally experienced an S-Class incident of an intruder rushing out of the dimensional gate before, although Evans is very clear that this concentration of Alpha Particles is not enough to open the dimensional space gate. However, this situation represents the imminent emergence of a space gate-like energy.

“Perhaps, this dimensional gate is not here!” After staring at the instrument for a few seconds, Evans suddenly thought of a very possible guess.

The instrument in his hand has a detection range. If it exceeds a certain range, although Alpha Particles can still be detected, it is definitely not so accurate, and the concentration values ??will vary greatly.

If the space energy was present in other areas this time then they would be able to detect Alpha Particles here as well. However, the concentrations detected here have never been able to break through to dangerous values.

“My name is Evans, a fourth-level agent and I am applying to expand the detection range of Alpha Particles. The larger the range, the better!” While everyone was still preparing for the possible S-Class incident, Evans had already applied for an expanded search.

“Huh? Expand the detection range of Alpha Particles?! Okay! Let the other agents and patrol soldiers in London open all the Alpha Particle detection equipment! Report to me once you find anything!” At that time, the Agent in charge of the aftermath of this incident was stunned for a moment before he quickly reacted and issued an order.

Brush!

Then, a message was quickly sent out from this base. The SHIELD agents and soldiers all over London quickly turned on the Alpha Particle detection equipment they were carrying after receiving the order.

Those without detection equipment also paid more attention to other anomalies. If space energy really appears somewhere then there will definitely be an abnormal situation.

“Who thought of it?” After issuing the order to test the whole city, the Agent in charge of this base wanted to see who had made the request.

“Huh? Evans, is he the newcomer who was just promoted? It seems that people who have personally experienced this incident do have more ideas.” After seeing that it was Evans’s application, the Agent in charge was somewhat relieved and sighed with emotion.

Dī Dī!

At the time when the Agent in charge sighed with emotion, many reports had already passed to him one by one. The Alpha Particles have been detected by agents and soldiers spread across London, and the concentration varies from location to location.

“This?! Could the upcoming incident cover the whole of London?!” Seeing the range of the Alpha Particle displayed on the tablet in his hand, the Agent in charge, who has experienced many storms and waves, also showed a shocked expression on his face.

However, the next latest alert dispelled his thoughts as the concentration of Alpha Particles in one place has exceeded the critical point!

#### **Chapter 874: Interfere**

Dī Dī Drops!

The newly transmitted alarm location is more than ten kilometers away from the suburban battlefield here and is the location where the temporary Alpha Particle concentration exceeds the critical point throughout London.

“Are you sure?” The Agent in charge asked solemnly when he saw the area marked with a conspicuous red dot.

“Positive! A large amount of space energy has been detected!” Soon, further news came back, answering the Agent’s question.

Hearing the answer from the frontline agent, the Chief’s eyes suddenly became very serious. (Calling Agent In Charge Chief from now on)

“Then, start the First-Level Emergency Plan!” In the next moment, the Chief issued an order.

Brush!

As soon as this order was given, the large army which had been holding the ruins of the battlefield was set into motion, and separate groups of soldiers hurried to their positions near the heart of London.

Now that the space energy is clearly there, it doesn’t matter if ordinary people see SHIELD’s special forces. Exposing the SHIELD team is better than letting an invasion happen which would have ruined London. The authorities would have to find an explanation afterward.

Dī Dī!

When the forces in the base began to move, the orders for Evans also came directly from the Chief.

“Agent Evans, set off with the first mobile team, this operation needs you!” This was a very simple order from the Chief, but it showed the importance he attached to Evans.

Evans is also excited to hear the orders from the Chief. He felt that his recent lucky streak is still going strong.

Although he would definitely encounter a dangerous situation following the mobile team to the front line, isn't this what he as a SHIELD agent, should do? Why should he continue to guard this ruin where a dimensional space gate is unlikely to appear?

Brush!

"Brothers, I am going first!" Then, Evans shouted to the other agents who had not received further orders while running towards the gate.

Bang!

The veterans, who had just made fun of the newly promoted spy, looked at each other and wondered what to make of Evans's dashing back and the closed door.

"Damn! How is this kid's luck so good?!" After the door was closed again, the first agent spoke with some resentment in his heart.

"Perhaps, it's not a matter of luck. Evans is very smart and he has the potential to become an Elite Agent. Maybe, we are not as good as him." Another Agent spoke meaningfully when he heard his colleague's words

"Then... what about us now? Do we continue to stay here?"

"Of course not! Although there are no new orders, we are not a garrison team!"

"So, we should be going there soon!"

Brush!

Then, several other agents in this room also quickly left after Evans. Although they could not follow the first mobile team to the scene, they could follow the follow-up team. As veteran agents, they would not give up such a good opportunity.

...

Huhuhu~

As SHIELD mobilized a large force to go to the center of London, the agents stationed here noticed that there were significant spatial energy fluctuations in the area.

Prior to the arrival of the SHIELD force, the SHIELD agents stationed nearby had already called some of the nearby police forces on their own authority to start evacuating the crowd.

However, it will take some time. If there is a dimensional space linking the extraterrestrial universe when the energy of the square space reaches the critical point, it would cause chaos in the heart of London, which is something no one wants to see.

"By the looks of it, the space energy will reach a critical point soon." The agent guarding the edge of the outgoing Alpha Particle area gave a silent murmur as he looked around at the rapidly retreating civilians.

The scope of the Alpha Particle was large this time, at least five times larger than the size of the outer London dimension. The dimensional space over there is as big as a patio, and the area over here is at least five times larger, so the spatial anomaly will appear in a large range.

“Bailey, should we pull back a little, too much concentration of Alpha Particle will affect us.” After the agent’s mutter, his teammate reminded him.

“Don’t be in a hurry. We have to report back the situation here as soon as possible. As Agents, we can’t leave those civilians.” Hearing his teammate’s words, Bailey shook his head and replied.

“All right!”

Buzzing~

As Bailey and his team stared intently at the area in mid-air where space energy appeared, they didn’t know that in a building not far from them, three people in retro suits were standing in the window house on the third floor that had been emptied.

These three people are the Sorcerers who were originally guarding the Sanctum in London. After receiving the news from Ancient One, they have been paying attention to the situation in the whole of London. After the space energy appeared here, they arrived as soon as possible.

“Looking at the range covered by this space energy, could there be a massive invasion?” Standing by the floor-to-ceiling window looking at the situation outside in mid-air, one of the sorcerers frowned and asked.

“I don’t know, but judging by this, it won’t be a small fight if a space tunnel is actually opened.” After the first man speaks, the Sorcerer next to him shakes his head and replies.

“As per Ancient One’s orders, we will do our best to protect London and its people no matter what happens.” The third man spoke.

However, although the Ancient One sends a message alerting them to possible cosmic invaders coming to London, the Sorcerers are somewhat confused. They are not supposed to meddle in such affairs as this is not a Mythical threat.

The situation that needs the Sorcerer would be similar to Harry being possessed by a demon from another dimension. Sorcerers protect the Earth from these kinds of dimensional threats.

They wouldn’t have interfered if not for Ancient One’s warning/order even if an enemy force from the outer universe invaded the earth as this is not their responsibility.

In fact, if the three sorcerers of the London Sanctum and the sorcerers of the New York Sanctum were in constant contact with each other then they would have known the reason.

They have broken the original rules more than once since the Sorcerers and Mirage Knight became familiar with each other. Moreover, Ancient One didn’t say anything to oppose their actions which means that he was also agreeing with their actions.

## **Chapter 875: Worry and Requesting Reinforcements**

The three sorcerers guarding the London Sanctum stood by the floor-to-ceiling windows on the third floor of the building above the two SHIELD agents, watching the energy changes in the space ahead, while the two agents below were also watching the situation and waiting for support.

No one noticed that huge planets are rapidly moving according to their established orbits in the outer universe. These are the Nine Realms.

At this moment, the Nine Realms in the World Tree, including the earth, are finally about to run into a linear orbit again after more than a thousand years. This is a very special kind of celestial body Convergence, and the average person can't observe it at all.

According to the current operation of each planet, the Convergence will appear in about fifteen minutes. That is, if Malekith's plan goes well, he will travel through the space tunnel to Earth within those fifteen minutes.

Because the earth is at the center of the Nine Realms, and here he can use the Aether to devour the Nine Realms and plunge everything into darkness at the fastest speed.

"Something seems to be wrong here, have you noticed it?" As time passed, a sorcerer standing by the floor-to-ceiling window asked with a frown.

"Yes, I feel it too."

"The environment has changed, and the air pressure and air composition outside are changing rapidly."

Hearing the sorcerer's words, the two sorcerers next to him nodded and spoke. As sorcerers, they do not need scientific instruments, and they are very sensitive to changes in natural elements.

"It seems that big trouble is coming here this time!" After confirming the drastic changes in the outside environment, the sorcerer who just opened his mouth muttered with a worried expression on his face.

"Would we actually be able to handle it? I'm afraid the three of us won't be able to handle whatever's coming here." After the first sorcerer expressed his worry, the second sorcerer also spoke with a helpless expression on his face.

"I don't know, the Ancient One told us to keep London safe and not allow the invaders to cause huge damage to the earth. But... if the invaders are powerful then we would get some support..." After listening to the two beside him, the third Sorcerer said with uncertainty.

The London Sanctum has the weakest defense compared to the other two Sanctums, but they haven't encountered any troubles for so many years. They usually meditate in Sanctum, and can also open a portal to communicate with other sorcerers in the Himalayan sorcerer seclusion place.

The three Sorcerers are getting worried now that things have finally happened in London. After all, they cannot open a large-scale Mirror Dimension with their strength. Without the Mirror Dimension, there is no guarantee of how much damage would be done to London by the invaders.

"We... We can contact other Sanctum sorcerers. I don't think it's a bad thing to call someone to help in advance. It would be easier for us even if the intruder is not that strong and if they are then we have support with us." Looking at the outside area saturated with space energy, the first sorcerer suggested.

“That’s a good idea. The Master at the Hong Kong Sanctum is very strong, and he would be willing to help us. It should be no problem to ask him to come here.”

“There is another person, Sorcerer Yeshua, I heard that she recently traveled to New York, and she is very powerful!”

“No matter who you invite, send a message now! I’m worried and we seem to be running out of time!” While the two sorcerers were discussing who to call for help, the third sorcerer quickly interrupted their conversation and reminded them.

“Okay!” The two sorcerers agreed and quickly sent out two messages.

Shhhhh!

In the next moment, two golden rays of light flashed in front of them and disappeared. These two golden rays of light will appear in New York and Hong Kong in an instant, they will find the location of Sorcerer Yeshua and Wong and pass the news of the two sorcerers here to them.

“Huh? Bailey, did you see something flashing just now?” When the sorcerers on the third floor sent a message, an agent standing below looked up and said to his partner.

“No, don’t start seeing things now, the cavalry is arriving so we can retreat a little bit.” Bailey, who had been paying attention to the change in the mid-air situation, replied without turning his head when he heard his partner’s question.

“Ohh, it feels like someone is watching us...”

Buzz!

The moment the sorcerer, who guards the London Sanctum, sent a message for help, the Alpha Particle in the area in front of them that was emitting space energy suddenly soared again.

Dī Dī!

“Holy Shit! The Alpha Particle concentration has exploded! Withdraw!” The SHIELD agent, standing next to Agent Bailey, shouted as the instrument used to measure AlphaParticle’s concentration was no longer displaying the value accurately and was simply issuing an alarm.

“Yes! Withdraw!” Bailey, sensing that the situation was no longer in need of a closer look, said yes and turned to leave.

By the time Bailey turned around, his men had retreated. The civilians in the vicinity had all been evacuated, and the local forces on the London side had not been involved in this kind of thing at this level, so they had to get them out of the way first.

When the two agents of SHIELD retreated because of the high concentration of Alpha Particles, the expressions of the three sorcerers who were standing by the floor-to-ceiling windows on the third floor of the building next to them also became very grim.

Because, when the concentration of Alpha Particles exploded, they also noticed that the energy in the mid-air space had reached a level sufficient to form a large-scale space portal.

“It should be clear what kind of invasion it is!” Staring at an area in mid-air that has been engulfed by turbulence energy, one of the Sorcerer said with a grave expression on his face.

“The Sanctum defenses are working, right?” As they stared nervously in the air, a sorcerer suddenly asked.

“There is no problem with them. There is a defensive talisman engraved by Ancient One himself, who can break through?” Another sorcerer answered quickly when he heard the question from his friend.

“That’s good, our large defense talisman for guarding London this time is connected with the Sanctum as the heart. As long as there’s no problem over there, London can’t be damaged very badly by the invaders.”

Whoohoo!

Tear! ~~

While the three Sorcerers were talking to each other, there is a clear sound of space being torn from the space energy that has been gathered for a long time, and the space tunnel is opened!

## **Chapter 876: Space Transmission Gate Formation!**

Whoosh!

Evans was very excited as he stood on the Hoverboard with a soldier from the newly established mobile team at SHIELD headquarters, and felt the strong air passing by.

“I don’t know what kind of soldiers will be selected for the mobile team. Even the fighters from the S Team and the K Team don’t have strong combat power!” Evans thought as he tried to make his posture more comfortable on the Hoverboard.

K and S Squad are the most powerful squads in SHIELD. It was normal for them to be strong, after all, they are equipped with the latest high-tech equipment.

Moreover, the main mission of the S and K Squad is to cooperate with powerful people like Captain America to fight against the enemy, and now it exists as an auxiliary role of the Avengers.

However, the positioning of the newly formed mobile team is different at the beginning. They do not exist to enhance the combat effectiveness of Avengers against the enemy.

As a team with mobile ability as its main combat mode, the role of the mobile team is actually more as free men on the battlefield, to carry out the biggest tactical attack and harassment on the enemy, to support their own side, and so on.

Moreover, the Soldiers selected for the mobile team are fortified with OsCorp’s new Titan series genetic enhancement Serum. Even if they did not have that high-tech equipment, they are strong enough to rush into the battlefield.

As the first group to arrive in downtown London, the mobile unit with less than 30 people can see the energy fluctuations in the space in front of them.

Tear!

And when Evan saw the area in front of him that was shrouded in strong space energy, a huge space crack suddenly appeared in the middle of the sky. Then, the space crack that ripped apart the space barrier quickly expanded, creating a portal.

“The portal is opening! It is also many times bigger than before!” Evan’s eyes widened as he exclaimed at the rapidly expanding crack in the air.

“Pay attention Agent, We are going to speed up.” A calm reminder came from the side as the soldier who was operating the Hoverboard spoke.

“Uh!...Got it!” Evans quickly agreed when he heard the reminder.

Pū!

Hoo!

The moment Evans finished answering, the Hoverboard under his feet spurted out more firepower, and the huge thrust carried the Hoverboard and the two people to the center of London.

In the rear of this mobile unit, SHIELD’s main force followed closely, and various mechanized teams rushed from the avenue in the heart of London to the location where the space portal appeared. If the civilians in this area had not been evacuated, and the official forces in London had cooperated, this action of SHIELD would have had a great impact.

And in the rear of this mobile force, large forces from SHIELD also followed. A variety of mechanized teams rushed into the heart of London and to the location of the Portal. If it were not for the fact that the civilians in this area have been evacuated, and the local forces are helping SHIELD, this action of SHIELD would have had a great impact.

However, the extraterrestrial invasion was imminent, and the location of the invasion was in the British capital, London. The people at the highest level in the United Kingdom are so unhappy but they could do nothing but allow the specialized forces of SHIELD to rush into their country with full force.

As a small country, the UK does not have a strong-armed force of its own, so they would have to rely on SHIELD in the event of a major global crisis. SHIELD doesn’t belong to any country on Earth anyway, it’s just that the United States has given soldiers and resources to SHIELD but the United Kingdom has also provided a lot of financial aid to SHIELD.

...

Buzz~

The three Sorcerers, who were standing by the floor-to-ceiling windows of the third-floor building near the area, have disappeared as the crack in the mid-air space grows. They were now standing on the top floor of a ten-story building in front of an almost palpable crack in space.

“I wonder why the Ancient One didn’t take care of this problem if he knew about it in advance. Why wait till they come here?” One of the sorcerers muttered in confusion as he looked at the space crack.

"I don't know. But the Ancient One must have his reasons for doing this. Maybe he wants these guys on Earth to see the power of the Alien Invaders and open their eyes to a wider universe." The first sorcerer standing next to him responded.

"It's possible! Or we wouldn't have been hiding in the dark!"

"They seem to have come! Let's take a look at the situation first and take action at the critical moment."

"The critical moment ..... I'm really worried that they won't be able to hold on to that point."

Brush!

Then, a golden light flashed on the roof of the building, and the three sorcerers disappeared. It seemed that they are hiding themselves using magic.

Boom!

The three sorcerers guarding the London Sanctum disappeared from the roof, and when the SHIELD mobile force, which was still a few hundred meters away, had rushed over, the space crack in the air had gradually expanded to form a very large and stable Portal.

Swoosh Swoosh!

The portal had barely taken shape, and already dozens of missiles of varying power and variety were hurtling towards it. The three Sorcerers can wait for the portal to be fully formed, and for the invaders on the other side to move in. But SHIELD certainly won't. To minimize the potential threat to Earth, it's best to destroy the portal before it takes shape.

Boom!

The next moment, those dozens of missiles exploded in mid-air one after another. Whether it was a conventional fire missile, an electromagnetic wave bomb, or a missile with extreme ice-cold energy, all of them exploded in this instant at the location of the space portal, and all kinds of chaotic energy shock waves swept around!

Huhu~

"Did it work?!" Evan asked as he saw the first round of attack.

"I don't think so. After all, it is a space force. However, it would be good if it can have a little effect." Hearing Evans's words, the Soldier riding with him replied.

## **Chapter 877: Luck?**

Brush!

After answering Evan's question, the soldier controlled his Hoverboard and quickly rushed to the ground. The portal has been fully opened, and the invasion can happen at any time. Therefore, he has to quickly put down the "burden" that has little combat power behind him.

“Agent Evans, you stay here. The backup team will come here soon and I want you to join them.” Landing on the street that is still some distance away from the portal, the soldier ordered Evans as he loosened him.

“Thank you! What’s your name?” After getting off the Hoverboard, Ace looked at the soldier of the Mobile Unit and spoke.

Evans wanted to make some friends and make connections. After all, the person in front of him is a soldier of the newly formed mobile unit at the SHIELD headquarters, and it would be good for him to be able to make friends with him. Moreover, although the two of them didn’t speak that much to each other, Evans felt that they should be able to become good friends.

“Forget the name, I almost forgot my original name. However, you can call me No. 7, this is my code name in the mobile unit. And I don’t think we would have any chance to meet in the future, even if it is in the headquarters.” Hearing Evans’s words, the Soldier calling himself No. 7 responded in a flat tone.

“Uh... Then...”

Brush!

As Evans was about to say something, No. 7 had already driven the Hoverboard directly into the air. It seems that he doesn’t want to continue chatting with Evans and his teammates in front are still waiting for him.

“Hey...” Evans sighed silently as he watched No. 7 fly away. He also understood from the answer that the other party didn’t want to be friends with him that much.

If No. 7 was willing to make friends then he, a new agent, a new spy will have had his first friend at SHIELD headquarters and a very different one at that. Although the secret forces are not involved in frontline combat, the relationship between them is very tight. Evan is having some regrets right now, maybe he should have talked more on the way here.

Huhu~

Sensing the violent and abnormal airflow caused by the formation of the mid-air portal, Evan pulled back his thoughts from No. 7, who was drifting away in mid-air. Then he saw two familiar figures emerging from a corner of the street ahead.

“Huh? Isn’t that Agent Bailey and Agent Boldt?” As he got a good look at the two approaching figures, Evan muttered with a twinkle in his eye.

Then, Evan walked toward them. This time, it was these two agents who first discovered the abnormal concentration of Alpha Particles here, and they made a small contribution to Earth’s protection.

“Hello! Agent Bailey, Agent Boldt!” Evan was already waving his hand before Bailey and Boldt had noticed.

After hearing Evan’s voice, Bailey and Boldt raised their heads and looked forward at the same time. And at the moment when they saw Evan, a bolt of silver-white lightning suddenly slashed down from the air, just towards Evan’s position.

Bang!

"Watch out!" Before Bailey and Boldt's worried shouts came, the silver lightning had already landed.

Then, Bailey and Boldt hurried towards Evan. From their close view, Evan must have been struck by that bolt of lightning. Although even the smallest lightning strike would have given the person little hope of survival, Bailey and Boldt were not about to give up.

But their eyes widened when they reached the spot where lightning had struck them. Evan, who was supposed to be struck by lightning, was safe and well and he was just holding his head in shock.

"Hey! Are you alright?" Agent Bailey asked as he looked at the young man who was holding his head trembling in front of him.

"Ah!... I'm fine?!" Hearing Agent Bailey's voice, Evan, who was holding his head, quickly put down his hands and spoke with a surprised expression on his face.

"Well, you're fine, and that was weird. There was clearly a lightning bolt that just struck down. However, looking at you, and the ground over here, it seems like it was all an illusion on our part just now." After confirming that he was okay, Agent Bailey said suspiciously.

"Huh! It's fine if you are okay! It seems that the space energy has somehow messed up this area. We'd better withdraw far away!" After Agent Bailey finished speaking, Agent Boldt, who was standing beside him, reminded after letting out a long breath.

"Yeah! Let's retreat first, the frontline soldiers have already arrived, and we, the less armed guys, should hide behind them and watch." Agent Bailey said quickly after hearing his partner's reminder.

"Uh... Who are you? Are you also an agent of SHIELD? I haven't seen you before!" When Bailey and Boldt were about to continue to retreat, Bailey remembered and asked the identity of the young man in front of him.

"My name is Evans. I am a fourth-level agent." Evans quickly replied after hearing Bailey's question.

"Oh! So you are the lucky newcomer! It seems that the rumors are indeed right, your luck is good!" Bailey said in surprise after hearing Evans's answer.

He is fine even after being struck by lightning. This can no longer be explained simply by good luck. This is simply a supernatural event. Of course, the agents in SHIELD have also seen a lot of unusual things. So they don't think this situation is so special.

Evan: "..."

Then, Evan, Bailey, and Agent Boldt quickly withdrew to the outside of the affected range of the portal. As for the mobile team flying in the air, they don't need to worry about the three guys as they were moving away from the portal.

Of course, none of the three knew that when the silver-white lightning struck just now, there was a wave of magical energy on the roof of the adjacent building about 200 meters away from them. In fact, it wasn't that the silver lightning had no effect, but that it was transferred by the sorcerers.

“Being struck by space energy can be even worse than being struck by lightning. You guys should stay away.” Watching the three quickly leave the block, a Sorcerer, standing on the top of the building hiding his figure, muttered to himself.

## **Chapter 878: Magic**

Rumbling~

By the time the sorcerer standing on the roof rescued Evan, the shock wave of the continuous explosion in the air in front of them gradually weakened and slowly dissipated.!

As expected, dozens of missiles with different powers did not cause much visible damage to the portal. However, various energies were interconnected with each other near the portal to form a very chaotic energy field.

Brush Brush!

Below the huge portal in mid-air, the mobile units had already rushed over after the first attack by fighter jets ended.

Evan and the others had to retreat because they were not equipped, but the soldiers in the mobile unit were armed to their teeth and they could withstand the chaotic changing energy in mid-air and observe the portal at close range.

“Number 1 has arrived at the designated location!”

“Number 2 has arrived at the designated location!”

“No. 3... No. 7 had arrived at the designated location!”

“All 30 soldiers have arrived at the designated location!”

Thirty mobile unit soldiers were surrounding the portal from every direction, and everyone has established a stable connection with others, and this stable connection is also connected to the SHIELD Headquarters.

“The ground troops are ready, all of you pay attention to your safety. If something unexpected happens then secure your safety first, and then you can deal with the enemies.” When the mobile team started to set up defense lines around the portal, the rear commander’s order passed over.

“Yes, Sir!”

Boom!

When the mobile team established a defense line in mid-air, space energy that was much stronger than before suddenly came from the portal.

Dī Dī Drops!

The strong space energy caused the alarm to rung out on their detection equipment. The equipment detection level was obviously higher than that of Evans, so the detected situation was more severe.

Such strong spatial energy fluctuations are enough to prove that something is about to come out!

“Look out! Staggered by the intense space energy, each mobile soldier alerts nearby their teammates.

Ka Ka Ka!

At the same time, the mobile suit soldiers suspended in mid-air have also adjusted all the weapons control to their pre-launch condition. As soon as anything gets out of the portal, they'll attack it.

Huhu~

However, nothing appeared from the portal during the continuous outflow of intense space energy, it was as if this space energy was just pouring out of the space tunnel.

“Something's wrong! The intruder should be here already!” While SHIELD's team is still waiting for an enemy to appear from the portal, the Sorcerer, standing on a nearby roof, suddenly shouted.

Buzz~

After the sorcerer frowned and said these words, a golden light circle suddenly appeared beside him. Then, a figure quickly stepped out from inside.

“That's right! The invaders have appeared! They are invisible!” The man who came out of the magic circle looked at the portal in front and said.

“Wong!” The Sorcerer, who had sent a signal for help, shouted in surprise when he saw the thick figure that suddenly appeared behind him.

That's right, the guy who appeared from the magic portal is the Master of Hong Kong Sanctum and he is a very powerful sorcerer.

“Do something, or they won't know where the intruder is and it would be too late when they find out.” Wong quickly said without greeting them as he looked at the situation ahead.

With his power, Wong could barely sense something coming out of the portal, but he couldn't tell what it was. Therefore, they must first break the intruder's disguise. In this way, the force gathered on the Earth's SHIELD side can also be used.

“Okay!” The three sorcerers who had been waiting to do something removed their disguise.

Anyway, if they make a move, their movement will be noticeable and since they have not created a Mirror Dimension, it is better to use their own magic generously. After all, the Ancient One didn't tell them to hide during their mission.

Brush Brush!

Under Wong's leadership, the four sorcerers quickly formed the seal, and the golden rays of light quickly shot into the sky. Soon, a magic circle composed of golden rays of light appeared out of thin air below the portal.

Buzzing~

After the golden magic circle was formed, magic waves were sent down from the sky. This scene doesn't look like it would happen in real life at all, it's more like a scene out of a movie. However, ordinary movies can't create such real-world special effects.

After the golden magic circle shrouded the portal, Evans, who had withdrawn to the position of the SHIELD ground force, saw the magic circle like everyone else.

"I... Wha....! What is that!" Of course, Evans's expression at this time was not much different from that of other people who saw the scene in front of their eyes.

"The abnormal energy that suddenly appeared cannot be detected, but they have a record of something like this inside SHIELD!" The assistant behind the Chief quickly stated his findings the moment the golden magic circle appeared.

"Is there a record?! Whose record?!" Hearing the assistant's words, the Chief quickly asked.

"Yes... They are records from Mr. Stark. However, he did not provide specific data and sources of this energy. He just told us that those who possess this energy are not enemies." Hearing the chief's words, the assistant quickly replied.

"Tony Stark? Not the enemy..." Hearing the assistant's answer, the chief was slightly taken aback, and then his eyes turned to the golden magic circle in the sky.

"This world...is becoming more and more unfamiliar..."

...

Hoo!

"Now!" When the magic circle that appeared out of nowhere in the sky frightened the soldiers of SHIELD, Wong had already controlled the formed magic circle and made his move.

The moment Wong shouted, every golden ray of light in the golden magic circle suspended in the sky quickly blinked a few times. Then, golden thunder transformed by magic elements appeared out of thin air in the magic circle, and in the next moment, they slashed towards the position of the portal.

Boom!

At this moment, the chaotic area around the portal received a special golden thunder baptism. Countless golden thunder fell one after another from the huge magic circle, smashing into the portal one after another.

However, the golden thunder that was supposed to smash directly into the portal or to the ground was blocked before the portal, and every golden thunder hit the void in front of the portal and could not fall.

"Sure enough, they are already here!"

## **Chapter 879: Invasion Appears**

Boom!

Under the continuous bombardment of golden thunder, a vague outline gradually appeared in the void in front of the portal. As the lightning strikes intensified, those outlines became more and more obvious.

“They can’t hide now!” Wang said coldly as he looked at the revealed outline of something.

Then, Wong and the three sorcerers behind him accelerated the movement of their hands. Now that the magic thunder has forced the invaders out, they have to make a big move to cause some casualties. After all, if the other party was really strong enough to ignore the earth’s powers then they wouldn’t have decided to become invisible, which mean that they could fight them.

Buzz~

At the moment when the sorcerers stopped moving, a wave of energy that was many times stronger than before suddenly came from the magic circle in the sky. Then, the entire magic circle emitted a dazzling golden light, and a golden thunder with a diameter of ten meters blasted towards the object with a rough outline below.

Boom!

When the huge golden thunder in the sky slammed down, the object that had not been fully revealed seemed to want to avoid this attack. However, it seems that it has not completely escaped the portal, and its movement speed is not enough. Therefore, this golden thunder slammed directly in front of it.

Pū Pū Pū!

Under the blow of the golden thunder that almost gathered the energy of the entire magic circle, the huge object showing part of its outline finally could no longer maintain its concealment function. In the scattered golden thunder, pieces of black decks were revealed out of thin air outside the portal. As the disguise disappeared, what appeared from the portal quickly appeared in front of those who were paying close attention to it.

“That’s!!... An alien Spaceship?!” After the huge object at the exit of the portal was revealed, Evans, who had been watching the scene exclaimed again.

Of course, Evans was not the only one who was frightened by the scene in front of him. Almost everyone in SHIELD was shocked by the huge black Spaceship that had not yet completely emerged from the portal. SHIELD wouldn’t have been able to find the intruders if it wasn’t for the golden thunderstrike that revealed this Spaceship.

“It’s an Alien Spaceship!! This is above the S-Class Event, damn it! Our weapons won’t be able to handle a Spaceship!” The Chief also saw the Spaceship leaving the portal and his brows furrowed tightly together, and he became a little worried for the first time today.

The point is that this time, the armed team of SHIELD he led is based on the standard of an S-Class event. If the event similar to dimensional space had appeared again then these armed forces would have been enough to deal with those monsters and powerful warriors. However, their current firepower is simply not strong enough to deal with the huge black Spaceship in front of him!

According to the development of normal technology, a Spaceship capable of space travel and teleportation has enough force to deal with its entire force as they have not yet entered the era of

Interstellar travel. Therefore, the Chief was worried after confirming that a complete alien Spaceship had come out of the portal.

“No matter what... give it everything we got! I won’t believe that our weapons would not affect it!”

Although the Chief was a little scared, he as a former soldier cannot retreat now, so he gave the order to attack.

“Acknowledged!”

“!Acknowledged”

After the Chief gave his orders, the combat units of SHIELD, who were shocked by the alien Spaceship in front of them, responded quickly. It was also the first time that they had encountered such a situation. It was an alien Spaceship for crying out loud. If this battle was won, they would be able to tell a legendary story to their grandchildren.

“Mobile Squad! Quickly retreat! Your firepower won’t be enough for this!” After determining whether the black Spaceship could launch an attack before it completely escaped from the portal, the chief quickly ordered the mobile unit surrounding the portal and ordered them to retreat.

If the giant war beasts or bone armored warriors with great combat power appear from the portal then the mobile would be able to play a great role. But now, in the face of an alien spaceship, the role of the mobile unit has become negligible.

“Yes, Sir!”

Brush Brush!

After responding, the mobile team, also shocked by the black Spaceship that appeared so close in front of them, quickly drove their Hoverboards away from the moving Spaceship.

Huhu~

With the rapid actions of SHIELD’s combat departments, the fighter group that had just flown from high altitude flew back again, and the Tank troops on the ground also aimed their muzzles at the black Spaceship that was almost completely out of the portal in mid-air. As for other combat units, they are preparing their most powerful offensive weapons.

At a time when Earth faces a true formative Spaceship invasion, everyone has to give it their all. The Soldiers who can enter SHIELD and stand out here are the best of the best, and no one here would think that the Spaceship came to Earth with good intentions. Since the other party already has the technology of teleportation across the universe, they can’t establish diplomatic relations with the earth.

“Attack!”

“Attack!”

Pū Pū Pū!

There is no need for the chief to issue any further orders. After all the armed teams were ready, they launched a fierce attack on the black Spaceship in the air.

...

“SHIELD is pretty tough. Although their firepower is limited, they can see the capabilities of this Spaceship.” When SHIELD launched the attack, Wong, who was standing on the top of a building, muttered to himself.

“Wong, should we create a Mirror Dimension here? SHIELD’s attack would be useless against this Spaceship. It will be troublesome when it completely comes out of the portal.” Hearing Wong’s self-talk, the sorcerer standing behind him asked.

Although it was very difficult for the three sorcerers to establish a Mirror Dimension but now they Wong with them, and their joint efforts would be enough to build a Mirror Dimension that would cover this area.

“No, the space energy is too chaotic, it won’t allow the Mirror Dimension to exist with it.” Hearing the sorcerer behind him, Wong shook his head and replied.

The essence of the Mirror Dimension is also an application of space energy, but the current situation wouldn’t allow them to build a Mirror Dimension. Moreover, Wong himself did not intend to establish a Mirror Dimension to deal with the intruders in front of him.

### **Chapter 880: Formidable Defense**

The reason Wong arrived so quickly was that in addition to the request for help, it was also because he had received more information from the Ancient One. Wong knew very well who the other party was and what kind of strength they possessed. And, apart from the SHIELD and Sorcerers, others will come to stop the intruders.

“Wong, do you know anything else?” Seeing the calm expression on Wong’s face, the other sorcerers asked with some doubts.

“Well, I do know some things. However, you will find out later.” Wong answered casually after hearing the question.

Then, Wang made another move to stabilize the magic circle in the air. The last lightning strike just now consumed a lot of energy from the magic circle. Next time, Wong will use this magic circle to release more attacks.

Boom!

After Wong and the others used the magic attack to break through the stealth system of the black Spaceship, they temporarily stopped. The next moment, all kinds of firepower from SHIELD rushed towards the Spaceship.

Bang! Bang! Bang!

All sorts of powerful weapons exploded around the spaceship, but none of the attacks hit the black spaceship’s hull itself. Because, although the stealth technology was broken by the golden thunder, there was still a transparent energy light curtain on the surface of this huge black Spaceship, which blocked all attacks.

Huhu~

The Black Spaceship quickly got out of the Portal while receiving all kinds of powerful attacks.

As Wong and the others thought, although SHIELD's firepower is strong by the standards of the earth, it is not enough to damage a Spaceship that has deployed its protective energy shield. They wouldn't have been able to do much damage even without that shield.

Boom!

"It's useless!" The Chief spoke in a low voice as he looked at the black Spaceship, which had completely escaped from the portal.

Although he had thought that the firepower might not be able to cause much damage to the black Spaceship, he did not expect that the firepower that was enough to level several blocks could not even break the ship's shield.

"Chief! What should we do next? Our weapons seem to be useless!" As the Chief was shocked, the deputy beside him who was also frightened by the situation asked with a worried expression on his face.

"What can we do?! What can I do? It hasn't been that long since the Helicarrier flew back to the mainland, and it would take it at least half an hour to come here, and the armed forces that we can mobilize within half an hour are simply not enough to deal with the situation!" The Chief answered with a helpless expression on his face.

"Then... Should we evacuate? As long as we retreat to a safe location, I believe the Council will agree to use a nuclear strike. After all, we are now facing the threat of being invaded by aliens. It's nothing..." Hearing the Chief's helpless answer, the assistant proposed the use of nuclear weapons to clear the situation.

Bang!

"What the hell are you talking about?! I won't issue a retreat order even if we all die here! This invasion threatens our entire world and SHIELD was established to defend the entire earth! So, give up the idea of ??retreating, it is useless, we have to fight until we are all dead or they are dead!" When the assistant suggested retreating, the Chief's heavy palm slammed on the table in front of him as he shouted.

"Yes!!" Hearing the Chief's words, the assistant instantly gave up the idea of ??retreating. He was just frightened by the powerful defense of the black Spaceship.

"Since conventional weapons are useless... Then, it's time to show all our cards! That Spaceship has completely escaped the portal, and we must break that defensive shield before it strikes us!" Then, the Chief waved his hand and said solemnly.

"Do we still have something?!" The assistant asked in surprise when he heard the Chief's words.

As the assistant to the Chief of this operation, he is very clear about the armed forces of SHIELD and their hidden weapons. The biggest card in their pocket is also a space-based weapon, but it takes time to use that weapon. Moreover, looking at the appearance of the Spaceship, it may not be effective.

Without answering, the Chief quickly tapped a few keys on the command screen in front of him. Then, a very important message was sent out. After this message was sent out, the armed teams of SHIELD, which were still attacking the Spaceship in mid-air, quietly changed their attack methods. Simple firepower attacks were reduced a lot, and energy attacks such as laser beams became more prominent.

Pū Pū Pū!

The Defensive Energy Cover is still going strong under the continuous energy blows from SHIELD. With their final analysis, it is constructed from basic energy, and it will be consumed if they continuously attack it with their energy weapons. However, according to SHIELD's current attack strength, they still don't know when they will be able to break through this defense.

Whoosh!

While the Sorcerers temporarily stopped to reinforce the high-altitude magic circle, and SHIELD continued to pour firepower on the Spaceship in mid-air, the black Spaceship that blocked all attacks also accelerated its flight speed after leaving the portal. After getting away from the chaotic portal behind it, the black Spaceship quickly adjusted its lower angle in mid-air, and then the black decks on both sides of the enormous hull opened many square openings.

Ka Ka Ka ~

Then, weapon muzzles came out of those openings. It seems that although the protection of the defensive cover keeps the Spaceship from being harmed, it cannot be passively beaten all the time, and it is finally going to fight back!

"Everyone! Start tactical evasion!" After seeing the weapon ports appearing on both sides of the Spaceship hull, the Chief quickly issued an order to evade.

Hoo! Hoo! Hoo!

However, when the black Spaceship was about to launch a counterattack, a few light blue light beams suddenly appeared from the armed team of SHIELD below, and the laser beams hit the Spaceship's transparent defensive light curtain.

Pū Pū Pū!

Unlike other energy attacks that were blocked by the energy shield, these light blue beams are obviously different energy attacks. After hitting the transparent light curtain, these light blue beams were not blocked, but directly broke through the defensive light curtain and shot to the Spaceship hull itself.

Hoo!

Like puncturing a bubble, after the light blue light beams smashed through the transparent defensive light curtain, the defensive light curtain covering the entire black Spaceship quickly collapsed with the penetration point as the center. It turns out that the Chief was right, they really have other hidden weapons!
