

## Marvel 881

### Chapter 881: Beginning

Buzzing~

Like breaking a surface with a point, those few light blue beams were more effective than the previous countless attacks as they broke the energy defense shield of that black Spaceship in an instant.

"So it worked!" The chief, who had been staring at the changes on the battlefield, saw the scene in front of him, and his eyes lit up. He was also surprised by the fact that those weapons had worked.

In fact, although the light blue beams emitting weapons which were the trump card mentioned by the chief do exist.

However, he didn't actually know whether this kind of trump card would have been useful against that Spaceship. However, he could only give it a try since the situation had come to this. He just didn't expect the effect to be so shocking.

The light blue beams just now were actually fired from several sci-fi-looking weapons. These weapons were not independently developed by SHIELD. They just improved upon the original. The organization that created these weapons had been destroyed. Hydra.

After Hydra was destroyed a few months ago, almost all the weapons in Hydra's branches and headquarters were seized by SHIELD. They have many epoch-making technologies, most of which were weapons.

After all, Hydra has owned the Magic Cube for decades, and they created some good stuff out of the Magic Cube. What's more, there were no shortage of geniuses in Hydra, and energy weapons do have many advantages.

If SHIELD and other parties had not taken Hydra by surprise when dealing with Hydra, there is no telling how long the operation would have lasted and how much it would have cost them.

But, in the end, what they gained was quite a lot and those weapons that had just broken through the Spaceship's defensive energy shield just now are one of them.

On this occasion, when SHIELD headquarters sent a team to London, Rogers brought along some weapons that had been modified by SHIELD's Weapons Department in case of an unexpected appearance. These weapons have been tested and modified by the SHIELD Weapons Department to be the peak of SHIELD's attack power.

Huhu~

The defensive energy shield was broken, and the black Spaceship, which was just about to counterattack, seemed to stop and the weapons that had emerged did not fire anything for a while.

"Haha! Hit them with everything we have got!" And with the broken defensive energy shield, the Chief's confidence rose as he issued a new order.

However, the excited Chief forgot one thing, he had just issued an order for strategic evasion. Therefore, there are not many teams that can follow his orders to strike, and the Mobile Unit is the only unit that can give the fastest response as they haven't yet left the place.

Bang Bang Bang!

Under the rapid strike of the mobile team, their attack finally hit the Spaceship deck without the defensive energy cover. Different from the powerful energy shield just now, the deck of this Spaceship seems to be made of stronger alloy material, and it has also been damaged under various attacks.

Although some defense measures made out of alloy from the earth are stronger, they are completely within the acceptable range. After all, it needs to travel through the universe.

Ka Ka Ka!

Under the attack of the mobile team, the Spaceship, which had just stopped, quickly reacted, and the various weapons quickly turned and began to aim at the mobile units that were flying around the Spaceship.

Pū Pū Pū!

In the next moment, energy beams chased the mobile units as they were launched. At this point, the real battle has begun.

Bang!

"Don't just stand there! Attack!" Seeing the dangerous situation of the mid-air mobile Units being chased by those beams, the Chief slapped the table in front of him and shouted.

Bang Bang Bang!

The next moment, SHIELD'S armed team, which had already carried out tactical evasion maneuvers, took out their weapons and blasted the Spaceship that had no defensive energy cover in mid-air.

...

Looking at the Spaceship surrounded by SHIELD's various firepower, Wong and the other sorcerers showed surprised expressions in their eyes.

"I didn't expect SHIELD to have something like this, and without the defensive energy shield, it means that they will fight back." The image of the battle ahead was reflected in his eyes as Wong muttered to himself.

"Are we not going to do anything, Wong?" Of course, the other sorcerers understood what Wong meant, so one of them couldn't help but ask.

Now that the Spaceship's defensive energy shield has been broken by SHIELD, the magic circle they constructed can better strike the invaders. If they continue to wait, there will definitely be a lot of deaths on SHIELD's side.

"Don't worry, the people who should really deal with the invaders are coming." Hearing the voice of the sorcerer next to him, Wong said calmly.

"The people who should really deal with the invaders?" The other sorcerers were puzzled by Wong's answer. However, they still resisted the urge to attack and continued to watch the battle ahead.

Boom!

Under the massive firepower released by SHIELD and the Spaceship, this chaotic area quickly turned into ruins. However, every time an attack was about to land on the building where Wong and his sorcerers were located, they would inexplicably change their direction. Therefore, this building soon became a stand-out presence.

Ka Ka Ka!

While constantly firing energy attacks through those weapons, the bottom of this Spaceship also opened a hatch-like exit. Soon, small crafts shaped like a sunflower seed burst out of that hatch. Wong and the others guessed correctly, this Spaceship has started the official invasion!

Swoosh, Swoosh, Swoosh!

The small aircrafts that rushed out of the Spaceship were very nimble and fast, and a tall and ferocious humanoid warrior wearing strange thick bone armor stood atop every craft. Needless to say, these guys are Dark Elf warriors.

The target of these small aircrafts is very clear. They are after the Mobile Units who kept harassing the Spaceship by using guerilla tactics. Because the Spaceship used by the Dark Elves was very large and there were many weapon ports on both sides of the hull, they could do nothing against those Mobile Unit Soldiers.

Pū Pū Pū!

Soon, the individual flying fighters from the Dark Elves began to fight against the newly formed Mobile Unit. This is also the core responsibility given to the Mobile Units at the beginning of their formation. They have to exert their powerful battlefield adaptability. As it is now, it is the moment to test the strength of their newly formed squad!

### **Chapter 882: Mobile Unit Vs Dark Elf Troops**

Howls Whew!

Around the fast-moving Spaceship, dozens of small "sunflower seed-looking" craft circled it in constant pursuit of the equally fast mobile units.

Without knowing the enemy's force, SHIELD's mobile team temporarily adopted a strategy of hide-and-seek attacks. And after a few thrilling laps around the Spaceship, all the mobile units had a rough estimate of the combat effectiveness of the enemies who were chasing after them.

"How does it feel to be chased?!" The Captain of the team or No. 1 suddenly asked to in the team channel as he dodged an energy beam coming towards him.

"Haha! It's cool! I haven't experienced such a thing in my life!" Someone quickly answered with an excited voice.

"No. 3! You are a lunatic! However, I have to admit that this feels really good! We have accepted so many unknown experiments, and we have strengthened our persistence time and time again. So seeing all of that coming to this is really good!" After No.3 answered, another person spoke up in response.

"Haha! It seems that our thoughts are similar! However, it's time to show them that we are not good at running away! Let's show them that they just can't invade the earth whenever they want!"

"That's right!"

"Then... let's fight back!"

Brush Brush!

The next moment, the Mobile Units who were still dodging Dark Elf's small aircraft made an emergency stop in mid-air, and the Dark Elves, who were chasing them showed surprised expressions on their faces.

Every mobile unit soldier controlled their Hoverboard to flexibly move around them and did a big loop of 360 degrees in the sky.

Then, many attacks shot toward the Dark Elves soldiers who are chasing behind them, and the counterattack from the mobile team officially started!

The Dark Elf soldiers weren't afraid when faced with the sudden counterattack. Each Dark Elf fighter controlled their aircraft and rammed them toward the Mobile Unit soldiers.

It seems that they are very confident in their aircraft and their strength. In other words, they underestimated the force of the earthlings in front of them.

Bang Bang Bang!

The first round of confrontation between the Dark Elf individual flying team and the SHIELD mobile team kicked off with excitement. Every second, dozens of miniature missiles or various energy beams flew around the Dark Elf's Spaceship.

Covering the Dark Elf individual flying team is the huge black Spaceship and behind the SHIELD mobile team is the support of various armed departments of SHIELD.

Shoo, shoo, shoo!!

Bang!

In the middle of the chaotic battlefield, No. 3, the most fierce fighter on the mobile team was the first to be hit and that hit damaged his Hoverboard, it lost a lot of power and control and was hit several times in a row over the next few seconds.

Then, No. 3 drove his Hoverboard that was about to fall apart desperately, and rammed into a Dark Elf aircraft in mid-air.

"No. 3!" Noticing the situation, the other mobile unit soldiers shouted anxiously.

However, the current battlefield is so chaotic that no one can help No. 3. As for the sorcerers, although Wong and the others have been paying attention to them, they didn't intend to make a move when they saw No. 3 crashing into the Dark Elf aircraft.

Whoosh!

"Go to hell you disgusting monster!!" No. 3 shouted while driving the almost out-of-control Hoverboard into Dark Elf's aircraft. From No. 3's expression, it was obvious that his behavior was suicidal.

"Bastard!" Seeing No. 3 rushing straight in front of him, the Dark Elf warrior who was targeted by him cursed out loud.

Then, the target of No. 3 also drove his aircraft and hit No. 3 without dodging or evading. The Dark Elf warrior has absolute confidence in themselves. Their current action this time is to dominate the entire Nine Realms so how could they allow anyone from this backward planet to stop them?

Bang!

In the next moment, No. 3's Hoverboard collided with the Dark Elf aircraft. The Hoverboard, which had been attacked several times and was about to fall apart, completely exploded at the moment of impact, and No. 3, who had insisted on fixing himself to the Hoverboard, broke away from it at the moment of impact.

Then, No. 3 directly flew to the opposite side of the Dark Elf aircraft, which was not seriously damaged, following the inertia of the two aircraft after they stopped in mid-air.

In the process of rushing toward the opposite side, No. 3 raised his two weapons with sci-fi shapes. It turned out that No. 3 did not plan to commit suicide and he was planning to continue to fight!

"Humph! Tiny dirt man!!" The Dark Elf warrior, who also suffered inertia from the impact of the craft stopping in mid-air and rushing forward, saw Number Three flying along, coldly snorted, and also directly lunged out.

Pū Pū Pū!

When the Dark Elf warrior rushed over, the weapon in No. 3's hand continuously fired energy beams at him. However, these energy beams only left a scorched black mark on the skeleton armor of the Dark Elf warrior, failing to break his defense!

"Scum!" With a low voice of disdain, the Dark Elf warrior had already smashed his hammer-like weapon at No. 3. Of course, No. 3 couldn't understand his curse either, so it didn't matter to him.

Hoo!

Facing the hammer that was smashing to the top of his head, No. 3 threw away the useless weapon in his hand and raised his arms to block the coming attack. No. 3 wasn't afraid as he faced the Dark Elf warrior!

Bang!

In the next second, the hammer of the Dark Elf warrior had already smashed into No. 3's arm, and a loud sound echoed on the chaotic battlefield. However, the Dark Elf warrior who smashed the hammer was stunned. Because the seemingly weak man on the other side actually blocked his attack with his arms.

"What?!..." The hammer slammed down like a sturdy alloy, and for the first time, a shocked look appeared in the eyes of the Dark Elf warrior.

Brush!

Then, the Dark Elf warrior felt the shock of the hammer slamming down with a force and saw No. 3's bloodshot eyes peeking out of the torn tactical helmet.

"Although I don't know what you are screaming about?! However, you are nothing more than that!"

### **Chapter 883: Formidable**

No. 3 raised his arms to block the Dark Elf warrior's attack and looked at him with a cold look in his eyes and let out a low bellow. At this time, the aura around his body had risen to a very terrifying level.

Although he is still no match for the Dark Elf warrior in front of him in size, his strength seems to be comparable to that of his opponent. It is even possible that No. 3 is even stronger.

All 30 Mobile Unit Soldiers had gone through a lot of screening and then survived an unknown number of dangerous enhancement tests before they reached their current level. In addition to being equipped with SHIELD's most advanced weapons system, each mobile unit soldier is also physically powerful.

It can be said that Captain America, who has Super Soldier Serum would not have been as good as these soldiers in terms of pure strength if he didn't have the protagonist's aura.

Of course, Captain America has the protagonist's aura. Also, his role is more reflected in his identity, not his strength.

"You insignificant Midgardian human!... Th...I... Impossible!!" The hammer in his hand was forcibly pushed up by No. 3, and the Dark Elf warrior couldn't accept such a result.

Bang!

No. 3, who had fully exploded with his strength stopped talking. The next moment, he directly raised his foot and kicked the Dark Elf warrior in the chest. This kick directly caused the opponent to fly back, but No. 3 quickly retreated in mid-air because of the power of this kick.

Whoosh!

When No. 3 retreated in mid-air, and there was nothing behind him, the armored armor on his legs suddenly lit up. Then, two light blue flames shot out from under No. 3's feet, pushing No. 3's backward attitude toward the position where the Dark Elf warrior had flown just now.

Without the Hoverboard, there are still many good things in the armed armor of the No. 3 body. Although it is impossible for Tony Stark to provide SHIELD with his own exclusive Iron Man suit, SHIELD's own scientific research is enough to develop a similar armor.

This armor combined with the Hoverboard is there to protect the Mobile Unit Soldier in dangerous times. In addition to the propellers on the legs, each mobile suit armor has a parachute on the back.

Brush!

No. 3 skillfully used the power of the leg thrusters to charge toward the Dark Elf warrior and the red light in No. 3's eyes did not fade at all. One would be able to see his exploding muscles and bulging blue veins if No. 3 disarmed his armor at this time.

No. 3, whose body has been strengthened many times is matched with his own manic belligerent personality. At this time, he is a super warrior, a warrior stronger than the Dark Elf warrior!

"Get the fuck out of here!!" No. 3 rushed in front of the Dark Elf warrior who hadn't adjusted himself and yelled as he swept his leg like a whip.

Bang!

Ka Ka Ka ~

With the addition of leg thrusters, No. 3's kick is powerful enough to kick through a wall. Therefore, when No. 3 swept his leg toward the Dark Elf warrior's chest again.

This attack combined with the previous few attacks and the somewhat damaged skeleton under the foot just made a clicking sound. It sounded like the armor should have been broken by No. 3's kick.

Hoo!

And this Dark Elf Soldier was kicked out of his aircraft under continuous attacks by No. 3. With a shocked expression on his face, the Dark Elf fighter tried to rush into the battlefield in the rear. In less than a second, the Dark Elf warrior had been smashed by various energy beams.

So far, in the official confrontation between the SHIELD mobile team and the Dark Elf individual team, the first person to die is a soldier from the Dark Elf side. Such a result was not only surprising to the Dark Elves, but also to SHIELD and the four sorcerers including Wong.

"Haha!" Seeing that the Dark Elf fighter was kicked and turned to ashes under various firepower, No. 3 laughed and landed on the Dark Elf Warrior aircraft.

However, the Dark Elf aircraft that lost its pilot was out of control and it was impossible for No. 3 to know how to fly it. Therefore, No. 3 standing in this aircraft can only helplessly fall to the ground with the aircraft.

The thrusters on his legs can only support a short-lived mid-air action, and it is not as flexible and durable as the Iron Man Suit.

Brush Brush!

And as No. 3 fell to the ground, more than one Dark Elf soldier drove their aircraft to chase after him. It seems that the loss of one Dark Elf Soldier makes the other Dark Elf pay attention to him.

However, No. 3 is not without teammates and when the Dark Elves rushed over, several mobile unit soldiers also rushed over to help him.

Pū Pū Pū!

The next moment, with the No. 3 as the center, a more intense firepower match suddenly erupted in midair. In the end, No. 3, who saw the opportunity to jump out of the Dark Elf aircraft was picked up by his teammates.

"Haha! No. 3! Well done!! You proved to these monsters how good we are!" It was No. 7 who caught No. 3 and he was also very excited about No. 3's behavior as he killed a Dark Elf warrior just now.

"Actually, these monsters are also very powerful. That guy just underestimated me. So, we still have to be cautious!" Hearing No. 7's words, No. 3 said quickly spoke on their radio. After unleashing continuous attacks just now, No. 3's strength has also declined a bit.

"Understood! We won't fight recklessly when it's time to withdraw!"

Hoo!

Then, the battle between the mobile squad and the Dark Elf individual team continued to a stalemate. However, the Dark Elf Spaceship, which had been fighting with the SHIELD armed team, seemed to have finally reached the position they wanted and stopped in mid-air.

Then, in addition to sending more soldiers to attack SHIELD's armed forces, the Dark Elf's Spaceship was so stably suspended in the air that no one could guess what they were doing.

However, SHIELD doesn't have a particularly good approach to it either. Because their firepower can only leave some damage on the surface of the Spaceship which is not enough to really hurt the important parts of the Spaceship.

The previous beam that broke the Spaceship's defensive energy shield was useless when targeting such a hard deck, and could only be consumed by continuous firepower. But will Dark Elf give them that much time?

...

"Chief, the opponent's number is getting bigger and bigger, the mobile squad can hardly hold it anymore, should we pull back?" The Dark Elf Spaceship stopped and sent more and more soldiers and the assistant beside the Chief asked in a low voice.

Buzz!

The Chief frowned and was about to issue an order to withdraw the mobile team that was clearly in a dangerous situation when a special and powerful energy wave suddenly came from the Dark Elf Spaceship suspended in midair.

### **Chapter 884: Surprise Attack**

Buzzing~

"Retreat!" Without bothering to analyze what the odd energy emanating from that Spaceship was, the Chief had given the order to retreat!

"The Helicarrier has arrived from headquarters and has entered British airspace. We've just got to keep it under control for a little longer!" Looking at the new casualty figures, the Chief said with a grim look on his face.

Then, SHIELD's fighting team retreated while fighting, quickly widening their encirclement. In this case, many Dark Elf fighters are rushing out of the spaceship, and they can also fight separately. Also, the Dark Elf Spaceship has stopped moving and had become a huge target, making their attacks easier to hit.

However, SHIELD didn't know that with the appearance of the special energy fluctuation just now, the entire battlefield was about to undergo huge changes. Because some important people are about to appear here.

...

"Looks like we can't underestimate the development of the earth! SHIELD had managed to surprise me once again!" Before that special fluctuation came out from the Dark Elf Spaceship in mid-air, Wong looked at the mobile soldiers who engaged with Dark Elf warriors and couldn't help but feel some admiration towards them.

Wong and the other three Sorcerors saw what happened between No. 3 and the Dark Elf warrior just saw now and they also had a new understanding of the strength of this special team of SHIELD.

Although the sorcerers can attack at close range and at a distance, there is still a big gap between their physical fitness and these strengthened soldiers.

"Depending on how it goes, SHIELD's teams are going to be stretched too thin soon enough."

"Well, they should be retreating."

Buzz!

While the Sorcerers over here were watching the battle, that particular energy fluctuation rushed out from Dark Elf's Spaceship. Sensing this special and powerful energy fluctuation, all four sorcerers, including Wong showed surprised expressions on their faces.

"This!... What kind of power is this?!"

"This power... is too powerful! And it has the ability to devour everything! Not good!"

Brush Brush!

Surprised by the special and powerful nature of this energy, Wong quickly started to print out some seals with his hand. The next moment, with the three sorcerers behind him, a pale golden magic shield enveloped the four of them.

Boom!

The moment Wong and the other three sorcerers completed the magic shield, a reddish light suddenly burst out from the Dark Elf Spaceship in mid-air. This light red light is exceptionally gorgeous, but it contains a frightening power. Ignoring the retreating mobile unit soldiers, this reddish ray of light directly rushed towards Wong and the other three sorcerors.

Bang!

Boom!

Without giving them much time to react, the reddish light slammed on the roof of the building. The building that had been spared from the chaotic battle just now was finally blown up by the red light attack, and the figures of Wong and the other sorcerers also disappeared from the collapsed roof.

Shasha~

As the first floors of the building were blown up and rocks were flying, the next weird thing happened.

Under the wandering of the light red light, objects touched by it, no matter stones or steel bars or some electronic products in the building, all become Particles in an instant, and then quickly disappear inexplicably, it was as if they were swallowed up.

This very strange scene of the red light blowing up several floors of the building was duly transmitted to the SHIELD ground headquarters, and all the people who saw this scene, although they tried to show calm faces, were shaken up.

It's probably not surprising that an entire building gets blown up, but the idea of anything suddenly becoming Particle and then disappearing is pretty scary.

"That... what happened?!" After being silent for a while, a researcher was the first to break the silence.

"I don't know... it seems to be some kind of energy attack!"

"What a weird way to attack! It's like nanotechnology!"

After that researcher spoke up, the other researchers next to him also spoke one after another. What these guys who usually specialized in these energies had in mind was not the destructive nature of that red light, but what its essence was, so they reacted at a much simpler point than the other soldiers.

"Keep withdrawing! Widen the circle of encirclement!" Without listening to what the researchers said, the Chief stared at the half-building that disappeared out of thin air and quickly issued the next retreat order.

Then, SHIELD's team retreated to the outer edge again and fought. The Dark Elf combat troops were no longer something that their armed forces could stop. The key is that the position of the red light attack just now seems to be the position of the allies mentioned by Tony Stark.

During the melee, both SHIELD and Dark Elf attacks landed on the other side of the building, but they were always blocked for no reason, so SHIELD had already made sure that the person who was building the magic circle was in that building.

And that red, all-consuming energy was heading that way, so it must have been aimed at someone over there. No one should be able to survive a freak attack like that.

As he was retreating with the bulk of the troops, the Chief caught a glimpse on the screen. It was high up in the air and his eyes suddenly brightened when he saw what was going on in the air.

"En?! That magic circle..." The Chief suddenly whispered as he stared at the screen.

Because, after the building was inexplicably swallowed in half, the magic circle in the sky did not change. According to normal circumstances, after those who built it died, the magic circle should have disappeared.

Whoohoo!

Then, the Chief quickly tapped the screen a few times and pulled the battlefield perspective to the half-devoured building again. Then, he saw a golden light shining through from the pale red light.

...

Buzz!

In the center of the building which was continuously engulfed by the pale red light, a golden circle of light was protecting Wong and the other sorcerers, separating them from the outside pale red light.

"Wong! Do you know anything about this?!" A Sorceror asked as he and the others constantly poured magical energy into the shield to resist the engulfment of the red light from the outside.

### **Chapter 885: Malekith Finally Takes Action**

Wong also felt a little helpless when he words the sorcerer's question. He did know something about the Dark Elf invasion from the Ancient One! However, the Ancient One didn't mention anything about the Aether, so Wang didn't know where this mighty power is coming from.

"No matter what the situation is, let's hold it up first!" Unable to answer, Wong could only say this while increasing his magic output.

They are four powerful sorcerers so how could they even be unable to stop this unknown energy attack?

However, if Wong knew that the reddish light that bound them and constantly devoured their magical energy was actually from the power of the Aether which is the Reality Stone then I wondered if he still show such confidence.

Buzz!

Hearing Wong's words, the three sorcerers had no choice but to increase their magic output. Now they can only hope that the reddish light that surrounds them will not last forever.

Ka Ka Ka!

The three sorcerers and Wong were trapped by the unexpected appearance of the Aether Particle energy while the hatch in front of Dark Elf Spaceship suspended in mid-air suddenly opened.

Then, Malekith, who had escaped from Asgard in disarray, came out with great vigor. It seems that Malekith, who had obtained the Aether and could simply use it, had regained his confidence.

"So this is Midgard! The most central position on the World Tree and it is also the planet with the lowest strength and the most depleted resources." Standing on the hanging platform of the Spaceship, Malekith glanced at the city center, which had been destroyed by the battle, and said disdainfully.

For Malekith, Midgard is indeed a trivial place. After all, in the history of the Nine Realms, it seems that Midgard has not participated in any major events involving the Nine Realms. It can be said that Midgard has always been a backward place in the Nine Realms.

And just now, SHIELD's attack on the Dark Elf's Spaceship and the performance of the mobile unit did not attract any attention from Malekith. The strength of the mobile squad's soldiers is really strong but it didn't have any effect on Malekith because those Dark Elf out there are just cannon fodder.

After scanning the situation in the heart of London with disdainful eyes, Malekith retracted his gaze and looked at the place shrouded in red light not far below, where the four sorcerers including Wong were still trapped inside.

"If it wasn't for the Convergence time, I would have taken care of you sorcerers." Looking at the four sorcerers trapped by the Aether Particle energy, Malekith muttered to himself with cold eyes.

Malekith also knows about the sorcerers of Earth. After all, the name of the Sorcerer Supreme, the Ancient One, is also well-known in the Nine Realms, and his reputation is no worse than Odin. It's just that although Ancient One is powerful, he generally doesn't get involved in Nine Realms' affairs, and has always remained on Midgard.

And the target of the Earth's Sorcerer is actually not a threat from within the Nine Realms, but a threat from other Dimensions. Therefore, Malekith is feeling more puzzled that his invasion of Midgard caused the Sorcerers to appear this time.

However, the Dark Elf's plan has developed to this point and Malekith will not stop even if the Ancient One appears himself.

"Algrim, keep an eye out while I take care of this annoying magic circle." After confirming that the four sorcerers couldn't break through the blockade of the Aether Particle energy for a while, Malekith calculated the time and instructed The Kursed, who was standing beside him.

"Yeah." Algrim simply agreed when he heard Malekith's words.

Hoo!

Then Malekith's eyes quickly turned crimson and his hands slowly rose. The next moment, a mass of flying sand, almost black in color, appeared between his hands. These flying sand that is about to turn black are of course the Aether Particles.

After being controlled by Malekith in a special way, the shape and color of Aether Particles are gradually changing.

After summoning the Aether, Malekith's raised hands quickly created a seal and then swung it sharply in one direction. Then, those flying sand-like Aether particles flew high into the sky, and their target was the huge magic circle that enveloped the entire battlefield.

Huhu~

The fluttering posture of the flying sand is very beautiful, but its speed is very fast. When Wong, who was trapped by the Aether particle energy below, noticed the situation, the flying sand had already flown below the magic circle, and then directly merged into the entire magic circle.

Buzz~

After the Aether particles were merged into the magic circle, the originally golden magic circle gradually appeared with a deep red light from the position where the Aether particles were merged into the magic circle.

In less than two seconds, the magic circle built by Wong and the three sorcerers was completely invaded by the Aether.

“Not good!” The expression on Wong’s face changed when he saw the crimson magic circle in the sky and felt his connection with the magic circle disappear.

Huhu~

Then, under the surprised eyes of Wong and the SHIELD team who had already retreated, the magic circle that had originally enveloped the entire battlefield was silently shattered into crimson Particles that filled the sky. Then, the particles quickly gathered together and fluttered back to Malekith’s hand.

“I didn’t expect this magic circle to contain so much energy. It seems that after being sealed for more than a thousand years, the Aether has indeed lost a lot of energy. However, starting from today, I will use your most primitive power!” Malekith muttered to himself as he felt the change in the Aether Particle in his hand.

Then Malekith jerked his head up, and his gaze seemed to see through the thick atmosphere of the Earth to the boundless space above. In Malekith’s gaze, the nine planets located in the world tree were now about to run in a straight line. This is a rare celestial phenomenon that happens once in a thousand years, and his plan would officially begin in the next few minutes.

“It’s almost time, then... Let’s get started!” Undeterred by anyone, Malekith’s eyes almost burst out with a frenzied light.

Hoo!

In the next moment, Malekith raised his hands and the Aether floating in front of him was constantly changing into various forms, and the energy fluctuations emitted from it became stronger and stronger.

Hum! Hum! Hum! ~~

“Wong!! Where’s our support?! Didn’t you say that there are guys who can deal with the invaders?!” Watching the strong energy fluctuations emanating from the invader, the sorcerers couldn’t help but ask.

“They... have arrived!!”

### **Chapter 886: Support Arrives**

Hearing Wong’s answer, the three Sorcerers raised their heads and looked at the sky at the next moment. There they sensed huge energy quickly coming down from the boundless space.

Boom Boom Boom!

At the moment when the three sorcerers raised their heads, the originally gloomy sky suddenly gathered a large number of black clouds, and they quickly brewed thunder.

If these three sorcerers have paid attention to the international news the day before yesterday, they will surely remember that this happened in the heart of New York two days ago.

"This is!..." Looking at this phenomenon that appeared high in the sky, the three sorcerers showed surprised expressions on their faces.

"The Bifrost is about to come down! And our support with it! As I said before, there is someone who would deal with the invaders, and that someone is Asgard!" Wong quickly explained as he looked up at the changing sky.

"Asgard?! They're not..." Hearing Wong's words, the three sorcerers were all surprised as they didn't know Asgard's recent and frequent "communication" with Earth.

Boom!

When the three sorcerers still had some doubts in their hearts, the gorgeous seven-colored light of Bifrost suddenly broke through the thick clouds and shot straight down through those thunder clouds and descended into the heart of London, which is also the location of Malekith's Spaceship.

It seems that Heimdall has already seen Malekith's landing point and he is going to use the huge power contained in Bifrost to bombard him!

Boom Boom Boom!

In the next moment, the Bifrost that had broken through the clouds had already slammed down towards Malekith's position.

Seeing Bifrost descending to his location, Malekith's face, who was controlling the Aether Particle, turned black, although it was originally black.

"Asgard!!~" Malekith raised his head and roared and raised his hands to control the Aether Particle above his head.

Boom!

Then, the Bifrost light hit Malekith with such precision that even the five-meter radius beside him was enveloped by the Bifrost. The huge energy of Bifrost directly smashed Malekith and The Kursed beside him from the suspension platform of the Spaceship and they were quickly shoved under the impact of Bifrost.

Huhuhu~

This power is obviously normal and it lasted for about five seconds before disappearing. However, there is already a deep hole with a diameter of five meters in the center of London. Maybe in the near future, it will become a famous attraction.

Bang!

After the mighty Bifrost blasted Malekith and The Kursed into the ground, the four sorcerers, including Wong, who had been trapped by the energy of the Aether Particle, finally broke free from the reddish energy.

In fact, it was only because the Aether lost Malekith's control that they got a chance.

"Is that Bifrost? As expected of the strongest weapon that can intimidate the Nine Realms!" One of the Sorcerer, who escaped the trap, looked at the huge pit blasted out by the Bifrost in front of him and spoke with a shocked expression in his eyes.

"Well, if it wasn't for this, Asgard wouldn't have remained at the top of the war that happened thousands of years ago and ruled the Nine Realms. The power of the Bifrost may have continued to be hidden if it wasn't for the recent war." Wong spoke with a calm expression on his face when he listened to the Sorceror's words.

"However, didn't you say that there would be backup? Could that only be this Bifrost's attack?" The Sorceror glanced at the pit below which Bifrost had blasted out but he didn't see the support from Asgard, so he asked.

"Uh... I'm not very clear about this, they should have sent someone here too!" Hearing the sorcerer's question, Wong finally felt a little embarrassed.

Boom!

However, just after Wong and the others finished speaking, there was a violent lightning strike in the thick cloud layer that had not yet dissipated. Then, Wong and the others sensed a powerful force that was rapidly descending on the earth.

"Looks like this is our backup even if they don't know about it," Wong muttered to himself as he sensed the intensity of the energy.

Boom!

The next moment, the light of Bifrost shot down from the black clouds. It once again appeared in the center of London and was less than ten meters away from the location of the previous Bifrost Beam.

However, the power of this Bifrost is obviously much smaller, at least it would be impossible for it to shoot a huge deep hole in the ground.

Huhuhu~

Two seconds later, the Bifrost disappeared, leaving a circle of magic marks on the ground that slowly dissipated, and in the center of the circle stood five uniquely dressed people, a normal-looking Earth woman, and a tall Colossus Man.

Asgard's support finally arrived not long after Dark Elf's Spaceship came to Earth through a portal.

If Lin Rui was here at this time and he hadn't lost his memory, then he would have recognized these people at a glance. The five warriors with unique dresses are Thor and the Warrior Four, the earth-looking woman is Jane Foster, and the tall Colossus is Asgard's war weapon Destroyer.

When Thor was exiled to Earth a few months ago, Loki sent a Destroyer to defeat or kill Thor. At that time, the Destroyer was defeated by the Iron Man.

However, the Destroyer's strength is far more than what was shown at that time. After all, it is the ultimate weapon created by Odin to guard Asgard's Vault. How could it be defeated by a dozen Iron Man?

At that time, Loki was just playing with Thor and he thought it was enough and stopped. Otherwise, unless Thor really awakened his power, there is really no one on earth except the Ancient One who could have stopped the Destroyer.

So, this time Asgard didn't send too many warriors to Earth to stop Malekith and they just sent the Destroyer who could exert his full strength.

"Are these people the support sent by Asgard? They are fewer than I imagined!" Looking at the people who appeared from Bifrost, one of the Sorcerer said hesitantly.

"They don't need to send their army, just enough people to get the job done," Wong said lightly after hearing the words of the Sorcerer standing next to him.

Wong knew more about Asgard's situation than the other Sorcerors here. For example, he can probably guess the identity of the five warriors in front of him. And as for that tall Colossus, Wang felt a strong threat from it.

After Wong and the others noticed a few people who appeared from the second Bifrost beam, SHIELD, who had already withdrawn from the battlefield, also saw what happened just now through their monitoring system.

In addition to being shocked by the great power of the first Bifrost beam, the people who appeared from the second Bifrost also surprised them.

### **Chapter 887: Fight Continues**

"That one just now... Didn't the same thing happen in New York the day before yesterday?"

Apparently, the truth about Bifrost is still only known to some people of sufficient rank, such as the Chief of this operation. Of course, Evans, who participated in the S-Level incident, does not know what Bifrost is, but he has already seen the person who emerged from the Bifrost.

"That's! ... Miss Foster and Thor?! How did they appear here!?" Evans couldn't help but say to himself as he stared at the few people who suddenly appeared in the middle of the battlefield on the screen.

"Huh? Evans, do you know those guys?" After hearing Evans's words, Agent Bailey, who had been standing beside him, asked.

Bailey was still interested in the newly promoted young agent beside him. Judging from this operation, it became obvious that Evans knew more than them.

"Uh... This is a confidential situation, I can't tell you anything for the time being, I'm sorry!" Evans replied embarrassedly when he heard Agent Bailey's question.

Thor's identity involves the S-Level Incident and it is impossible for Evans to explain what he knows to other agents without being permitted.

"Really? We understand!" Bailey blinked his eyes after hearing Evans's answer, then nodded.

Then, their eyes once again focused on the big screen in front of them. The Bifrost that appeared just now blasted the intruders who had come out of the Spaceship into the ground, and no one know if they would survive.

...

When those two Bifrosts attracted the attention of everyone in the heart of London, Thor and others who were sent by Bifrost were already aware of their situation. After all, the huge Dark Elf Spaceship in front of them and those Dark Elf Warriors rushing towards them told them everything they needed to know.

However, Thor and the others were not scared when they saw those hundreds of Dark Elf warriors rushing towards them and the Spaceship weapons pointing at them.

"Jane, this place is dangerous. Allow the Destroyer to take you to a safe place." Looking at the Dark Elf warriors rushing towards them, Thor turned to his side and spoke to a shocked Jane Foster.

"Huh? What?!" Jane turned around and asked back.

Hoo!

However, Thor didn't have time to explain anymore and the Destroyer came over and wrapped Jane into his body. With Destroyer's protection, Jane's safety is assured. However, Jane had to be sent away in order for them to exert their greatest strength.

"Everyone, I don't need to tell you what to do, right?" Looking at the swarming Dark Elf, Thor weighed the hammer Lin Rui gave him in his hand and asked in a relaxed tone.

"Haha, of course! I wouldn't be able to show my face anywhere if we can't even beat these Dark Elves!" Hearing Thor's words, Volstagg shouted with a big laugh.

Brush!

The next moment, Volstagg took the lead in raising his weapon and rushing out. Behind him, Lady Sif and the other two Warriors also chose a direction and rushed out.

Not long ago, Asgard was invaded by the Dark Elves and now they have changed the battlefield to continue that, Thor and the others have become angrier and angrier as time passed!

"Destroyer, take Jane to the Sorcerors. They can be trusted, and they are powerful enough to protect Jane." After Lady Sif and the three Warriors rushed out, Thor quickly ordered the Destroyer.

Hearing Thor's words, Destroyer nodded its metallic head. However, he did not leave with Jane Foster immediately, but raised one of his legs, and then quickly stepped on the ground.

Bang!

Hoo-hoo-hoo!

After a loud sound, a strong shock wave spread out in all directions with Destroyer as the center. Those Dark Elf warriors who rushed over were all swept off of their crafts by the shockwave, and Destroyer also flew into mid-air directly after this kick.

"Thank you!" Thor shouted as he watched Destroyer fly out.

Then Thor also rushed out with his hammer. As for the deep pit in front of them, they had a tacit understanding and ignored it for the time being.

Because, apart from Destroyer, none present here can defeat Malekith who has the Aether with him, not to mention that he also has The Kursed, who has an outstanding combat power with him, Thor might have had a chance if he had access to his full powers.

So, they would take out the minions first, and then join Destroyer to deal with Malekith. Anyway, Malekith won't be feeling good after being blasted with the Bifrost.

Whoosh!

Bang!

The Destroyer, who jumped up with Jane Foster, killed a dozen Dark Elf fighters in mid-air and landed in the half-height building and saw Wong and the three sorcerers standing in front of him.

Kaka~

Without any extra movement, the silver armor on Destroyer's chest split open, and then Jane fell out. Although Jane looked a little roughed up, she landed safely.

"Hey! Who is she? Why are you bringing her here?!" Wong hurriedly asked when he saw the Destroyer in front of him leaving a woman and turning to leave.

Bang!

However, Destroyer did not answer Wong's question. He stepped on his feet and took off into the sky, leaving Jane, Wong, and the others looking at each other with bewildered looks on their faces.

"Hello, I'm Jane Foster, I'm from Earth, and I'm from New York, USA." Facing the four quaintly dressed guys in front of her, Jane, who had already experienced quite a lot, spoke up.

"Huh?! So you are from the earth! No wonder you were sent to us! However, we are not doing this! So, we would leave you to a more professional person." Hearing Jane's self-introduction, Wong suddenly 'realized' something, and then thought of something and said.

Huhu~

Then, Wong began to draw an outline of a Magic Portal in the air.

"What?" Jane, who didn't understand Wong's words, looked at his actions and asked suspiciously. Don't these people know Thor?

"Miss Foster, there are people who can take care of you over there, and I believe you can find your way home from there too." Without answering Jane's question, Wong quickly spoke after the construction of the Magic Portal was completed and lightly pushed Jane's shoulder.

### **Chapter 888: Destroyer VS The Kursed**

Huh~

"What are you doing?!" Jane pushed back against Wong and turned around with a surprised expression on her face.

And then she unconsciously step backward and entered the Magic Portal. The next moment, the portal quickly disappeared, and Jane was "Sent Away" by Wong.

Thor wanted to give Jane to the Sorcerer to take care of her, but Wong and the others had no such plans. Anyway, SHIELD's team is still on the side, and they rather leave this kind of thing to them.

"Wong, is this okay? She was sent here by Asgard. What if they ask us for her later?" Seeing that Wong had finished sending Jane away using the Magic Portal, a sorcerer standing next to him asked with a worried expression on his face.

"Don't worry, it would be alright. Besides, that woman is from Earth, so it's best to leave her to SHIELD. As for us, our time would be best spent dealing with the current situation. Do you really think that everything is fine now that Asgard is here? You have all experienced that weird energy just now, I don't believe that the intruder can be defeated so easily." Hearing the sorcerer's words, Wong explained briefly and seriously.

"That's right! That kind of energy just now... that kind of terrifying devouring power is something I've never heard of!" After listening to Wong's explanation, one of the sorcerers said with a lingering fear.

"So, things are far from over!" Wong stared at the deep hole in front of him and whispered with a solemn look on his face.

Buzz~

When Wong teleported Jane away, a strong energy wave suddenly came out of the deep pit, which was the dark energy exclusive to Dark Elves! Malekith and the undead Algrim could not have been defeated much less killed by the energy of Bifrost.

Brush! Brush!

In the next moment, two figures rushed out of the huge pit one after another. It was Malekith and Algrim. Malekith and Algrim didn't look beaten up as one would expect, perhaps it was because the Aether finally helped them resist most of Bifrost's energy attack.

However, being blasted into the ground abruptly made Malekith extremely angry. Moreover, because of Asgard's intervention, Malekith was about to miss the best time for the appearance of the Convergence.

Boom!

As Malekith and Algrim got out of the crater and had not had time to reconsider their surroundings, a beam of energy blasted at them from overhead. It was the Destroyer, who had waited until Malekith and Algrim appeared after taking out most of the Dark Elf warriors.

As a powerful force that had been sent by Asgard to deal with Malekith and Algrim this time, Destroyer came at them with full power.

Facing the energy beam blasted by Destroyer, Malekith raised his hand and waved a piece of dark-red energy in front of him!

In the next moment, the energy beam hit the half-arc energy shield. Although the energy beam emitted by the Destroyer was powerful, it was blocked so that Malekith and Algrim, who were standing behind the dark-red energy, were not harmed at all. Apparently, Malekith had drawn on the energy of the Aether.

"Algrim! Go and deal with it!" Malekith, who had blocked Destroyer's attack, certainly didn't want to remain in such a stalemate, and then ordered Algrim beside him.

Brush!

Hearing Malekith's words, Algrim, who had never attacked anyone other than Lin Rui since Asgard or after arriving on Earth, disappeared instantly.

When his tall figure reappeared it was already above Destroyer's head. The next moment, Algrim raised his Sword and slashed it toward Destroyer's head below, which was still releasing an energy beam.

Bang!

With a loud bang, Algrim's blade slashed into Destroyer's head. The enormous force slashed Destroyer's head, thereby also interrupting his ongoing energy beam attack.

Ka Ka Ka ~

However, Destroyer, whose head was slashed, didn't seem to have suffered any injuries. After he stopped emitting the energy beam, Destroyer's neck quickly turned backward, and soon, his entire head had turned 180 degrees to look at Algrim behind him. At this time, the long blade in Algrim's hand was still stuck in Destroyer's head.

Bang!

Before Algrim had time to draw his long sword, Destroyer's fist was already pounding at him. No one would be able to tell how Destroyer's fist came out backward but his head can be turned 180 degrees at will, and his arm can also do the same. Algrim was sent flying by Destroyer's punch.

Then, Destroyer didn't look at The Kursed, who has been knocked away, and turned his head back again to look at Malekith's position below. This time, Destroyer's Mission is to prevent Malekith from destroying the Nine Realms with the Aether Particles, defeating or killing The Kursed is not his goal.

However, when Destroyer was about to continue to attack Malekith, Algrim, who had just been blown away, appeared behind him again.

As the most powerful of the Dark Elf, Algrim has a vast amount of fighting experience, not to mention that his body has been transformed by the Aether and he is an almost undead existence.

Although his original tall body is a few sizes smaller than Destroyer, he is really not inferior to Destroyer in terms of strength and defense!

Buzz!

Algrim, who reappeared behind Destroyer, was much more powerful this time than before, and a thick layer of dark energy poured out from the long blade in his hand, and his eyes covered by the skeleton mask also shone with a scarlet light. At this time, The Kursed had released his full strength.

Brush!

Algrim quickly slashed his sword behind Destroyer, but it didn't hit him. The slash was still about a meter away from Destroyer when the dark energy gushing out from the long blade split into two directions and quickly surrounded Destroyer in front of him. Then, Algrim also rushed directly into the dark energy.

Pū Pū Pū!

Next, the dark energy that enveloped Destroyer and Algrim kept sending out energy fluctuations in mid-air, and its shape was constantly changing.

However, the Destroyer isn't able to get out of it. Apparently, he was trapped by Algrim. Without Destroyer's interruption, Malekith was free to do whatever he wants.

### **Chapter 889: Status Confirmation**

When Destroyer and The Kursed were fighting in the middle of the battlefield, Jane, who was pushed into the Magical Portal by Wong was looking at the suddenly changing environment beside her with a look of surprise.

The place next to her was clearly a ruin, but now she has come to a room that is obviously an important place.

Because at the moment she appeared here, dozens of weapons were already aimed at her. Needless to say, Jane had already been thrown into the SHIELD headquarters by Wong.

Ka Ka Ka!

It was the sound of every weapon going live, and Jane, who had suddenly appeared in SHIELD Headquarters, was considered very dangerous by the SHIELD.

"She... seems to be the one who appeared from that colored beam of light!" When everyone on the SHIELD side was waiting for Jane to identify herself, a voice sounded out from behind.

It turned out that someone had recognized Jane Foster, who had suddenly appeared in their headquarters, as one of those who had come to Earth with those outsiders who were fighting the invaders. If she's really with those guys then she's not the enemy.

Also, she may be quite powerful, and SHIELD may not be a match for her. After all, Sif who is fighting on the battlefield is a real female warrior.

"That's right! It's her! They were together!" After the first person recognized Jane Foster, a second person recognized her as well.

Then another two seconds passed, and the soldiers who were holding various weapons aimed at Jane put their weapons down as they received orders from the Chief.

Da Da~

Then, the Chief slowly walked out from behind the crowd. The Chief stopped when he was a few meters away from Jane and stood straight.

"Ma'am, can you understand what I'm saying?" The Chief stopped and looked at the "detached" Jane in front of him and asked in a serious and slow tone.

In fact, Jane was just stunned and there was not much expression in her eyes, but the Chief regarded her with a very calm attitude.

"Uh... why wouldn't I understand what you are saying?" Jane replied immediately after hearing the Chief's polite question.

After hearing Jane's answer and seeing her expression at this time, the Chief found that their judgment just now seemed to be wrong. Could it be that, apart from looking the same as the Earthlings, this woman from outer space also speaks the same language? But there cannot be such a coincidence in this world!

"Excuse me... are you... from Earth?" The Chief asked as he looked at Jane.

"I'm from Earth, my name is Jane Foster, I'm from New York, and I'm a teacher at a university. You should be able to find out my identity if you want." Hearing this, Jane completely understood the situation at this time and answered.

"From Earth!" Exclamations echoed throughout the command room when they heard Jane's answer. Everyone was shocked, after all, they had just seen her come out of that rainbow beam with their own eyes.

At the same time, the Chief quickly instructed the assistant beside him to check her identity according to what Jane Foster said.

Sii!

Before the assistant could find out her identity, the door of the command room was pushed open. Then, Evans walked in behind Bailey and Agent Boldt. As soon as Evans walked into the command room, he noticed the woman surrounded by a dozen soldiers.

"Huh?! Miss Foster?! Why is she here?!" Evans spoke with a surprised expression on his face after confirming that the woman surrounded by a dozen Soldiers was Jane Foster.

"Evans, do you know that woman?" Hearing Evans's words, Agent Bailey, who also saw Jane in front of him, asked back.

"Well, she is..." As he was about to explain, the Chief over there had already obtained Jane's true identity from his assistant.

After learning her identity, although the Chief was a little disappointed but he was also a little surprised by what he had found. In SHIELD's database, Jane Foster's identity is quite special.

She is the ex-girlfriend of Thor. She has been under SHIELD's secondary-level monitoring, and the person in charge of monitoring her is the recently promoted Evans.

Moreover, Jane has also made good achievements in the research of Alpha Particles. The original Alpha Particle concentration detector used by SHIELD was confiscated from her lab.

After making some improvements, it became the current Alpha Particle detector. He also wonders if Jane will ask SHIELD for the patent right after knowing about it.

"So you are really Jane Foster. Are you all right?" The Chief waved his hand to signal the surrounding soldiers to retreat and took two steps forward before he spoke.

According to the information seen by the Chief, the last record of Jane Foster was that she became unwell after coming out of that Dimensional Space Gate in the suburbs of London, and then she inexplicably recovered.

When they went to the Stark Industries building in New York to help Mirage Knight, Jane Foster disappeared along with Thor and Mirage Knight.

Combined with the rainbow beam that appeared in the center of New York at that time, and the two rainbow beams that just descended in front of them, the Chief quickly analyzed that Jane Foster, Thor, and Mirage Knight should have taken away from the earth by that rainbow beam. And just now, Jane, Thor, and the Four Warriors were all sent back by the same rainbow beam.

"Well, I am okay," Jane replied calmly after hearing the Chief's question.

However, Jane doesn't want to give any more answers to these guys anymore, she cares about where she is now, who the other party is, and what's going on outside. So, she began asking her own questions.

"Who are you?"

"Miss Foster, we are SHIELD."

Jane Foster: "..."

...

While Jane's sudden appearance at SHIELD headquarters caused them some tension, the fighting outside continued.

However, Malekith, who has been left alone for the time being, has released the energy of the Aether again. As long as he was given some time, he could plunge all the Nine Realms into eternal darkness the moment Convergence align all the realms in a straight line.

**Chapter 890: The Halicarrier**

Buzz~

"The Great Dark Elves will set out from the World Tree and sacrifice the entire universe to the Eternal Darkness! "Feeling the powerful force of the Aether pouring from his own hand, Malekith roared with fanaticism.

The Destroyer was trapped by Algrim, and Lady Sif and the Three Warriors were fighting against the other Dark Elf soldiers. Although the losses were great, Malekith would not care about the casualties at this time.

As long as he can successfully use the Aether to sink the Nine Realms into darkness, then he will be able to create countless warriors as powerful as Algrim, so these sacrifices are necessary and he wouldn't worry about them!

"Haha! The Realms are finally aligning with each other! Now, who can stop us from dominating the whole universe?!" Malekith shouted frantically as the moment of the Convergence was getting closer and closer.

However, it seems that all the villain's plans will always go wrong when they are about to succeed, and Malekith's is no exception.

When he controlled the energy of the Aether and prepared to start linking the nine planets, a strong magic wave suddenly poured out from the half-destroyed building.

Brush Brush!

Then, several consecutive golden beams flew from the half-collapsed building, targeting Malekith, who was concentrating on casting his spell with the Aether Particles. The Sorcerers finally made a move after the Destroyer was trapped by The Kursed.

After all, they came here to fulfill Ancient One's order, and they couldn't just watch Malekith destroy the earth in front of their eyes.

Although Malekith had reached the key point in casting his spell, he still noticed the golden beams coming toward him. Although somewhat angry with this interruption, Malekith waved his hand and controlled some of the energy of the Aether to stop those attacks from reaching him.

"SORCERORS!" Malekith roared toward Wong and the others. If he wasn't on a time limit then he would have killed these sorcerers first.

Bang!

As Malekith roared, the golden beams had already blasted toward him, but they were blocked by the energy of the Aether. The engulfing properties of Aether Particles have played a great role in Malekith's hands.

If Malekith's plan is successful then he may really allow the Aether Particles to devour the entire universe, thus making the Reality Stone far superior to other Infinity Stones.

"My plan has reached the last step! No one can stop me!!" After blocking the magic attacks, Malekith roared frantically while speeding up his hand movements.

The Convergence will happen in a few seconds and Malekith will not let his plan be destroyed at the last moment. In order to prevent the impact of the next attack, Malekith wrapped himself in the energy of the Aether Particle.

No one can stop Malekith's plans unless their power can break through the energy of the Aether Particles.

Tick Tock.

As time elapsed, although Wong and the others never stopped their attacks, they were not able to break through the defense formed by the Aether energy. And the Destroyer was still being dragged by The Kursed. Although the dark energy in the air was about to be dispersed, the Destroyer still couldn't rush out.

"Hahaha!! The Time has come! The Nine Realms are about to become mine!!" In the World Tree, the nine planets finally moved in a straight line, and Malekith, who was protected by the Aether Particle energy, roared with excitement.

In the boundless space, the nine life planets finally coincided with each other in a straight line after running their course for thousands of years. And the middle, where the earth is located happens to be the center of the nine planets.

This is also the reason why Malekith chose to release the Aether on Earth so that he can cover the entire Nine Realms with darkness in the shortest possible time.

Hoo!

While roaring, the Aether Particle in Malekith's hand surged into the sky. If the Aether really infects the entire Nine planets with the earth as the heart, then no one would be able to stop it. After all, the dark energy of an entire planet is enough to render Ancient One and Odin powerless at their level.

However, when Malekith frantically pushed out the Aether, intending to let it devour the earth in a short time, a powerful energy fluctuation suddenly came from the high sky where the Aether had rushed out.

Boom!

In the blink of an eye, a beam of energy with a larger diameter than Bifrost shot down from the sky, penetrating the clouds, and hitting the released Aether that devoured its power. The light of this energy beam is pure white and this arrow-like attack looked as if it was shot out from a massive bow.

Boom!

Before Malekith could react, the dazzling white energy beam slammed into the Aether Particle and the Aether that was rapidly devouring the surrounding buildings was bombarded by this energy beam and sent out a strong devouring force and began to devour this energy!

Buzz!

At this moment, the energy beam falling from the sky continued to increase its energy intensity, and the consuming power of the Aether Particle was not weak either. No matter how strong the energy beam was, the Aether Particle could block it.

However, although the Aether blocked the energy beam that was suddenly shot down from a high altitude, the expression on Malekith's face looked very ugly at the moment!

"Damn it!" Malekith cursed emotionally as he looked up at the situation where the Aether Particle devoured the energy beam.

In order to block this attack, the Aether did not continue to devour the surrounding area, but time continued to pass, and the Convergence would soon be missed.

Fortunately, with the continuous devouring of the Aether Particles, its own power is also increasing rapidly, and the speed of devouring is also increasing, which is a shortcut for the rapid growth of the Aether.

As the Aether Particle consumes more and more power, it seems that this energy beam is almost finished by it.

In the place where the energy beam was shot down from, the Helicarrier is humming as it remained suspended at an altitude of nearly 10,000 meters.

This attack is directly sent from the core power of the Helicarrier, and it is already the most powerful energy attack that the Helicarrier can send out.

"Captain Rogers! The enemy is constantly strengthening under our attack, and it will become unmanageable if it continues like this!" When the Aether rushed toward the sky along the energy beam, Agent Coulson standing in the command center of the Helicarrier looked at the tall figure beside him and spoke nervously.
