

Master of Time 66

Chapter 66

I spend the rest of the night in bed, staring the ceiling while a beautiful woman resting upon my chest, sleeping rather soundly .

My fingers stroke her bare back gently and playfully, feeling the smoothness of her skin .

Our legs are entwined beneath the warm blanket .

Allison desires me partly due to her basic instinct, wishing to mate with an Alpha male .

Even with her fear, she is unable to contain the growing feelings .

That feeling only strengthened when she comes to understand that I always keep my promises .

Furthermore, the closed environment of the apartment building also changes some of her perception subconsciously .

Even if Allison doesn't join most of the people living here in their cohabitations, it is hard not to notice their intimate relationships and question herself .

It is subtle reprogramming .

When in Rome, do what the Romans do .

But it might also have something to do with the familial connection between us .

In a sense, Allison is my daughter along with countless others .

I obviously didn't bang her mother and father her the normal way .

That is her actual father's job – the man who has raised and loved her .

I did something else entirely . Something that I am not too proud off, hence the upmost secrecy even within my secret organization .

Ironic, isn't it?

The retrovirus that supplemented the prenatal vitamins Infinite Health has marketed throughout the last few decades inserts a part of my biology into the growing fetus .

So many mothers in the United States and all over the world take the prenatal supplements due to its effectiveness and relatively cheap pricings ever since 1975 .

They have no clue what they are subjecting their unborn baby to, but I do make sure that the retrovirus does not cause miscarriage 99 . 9% of the time .

It is impossible to get 100% due to everyone having different biology . Side effects will always happen regardless .

Regardless, it is necessary to bring forth the next evolutionary step in human .

That will happen naturally over time, but why should I wait centuries when I could do something about it? Waiting around for something to happen is also dumb .

However, a paternal test between Allision and me will not reveal anything . We are not actually father and daughter . It is more of progenitor and inheritor relationship .

I have already confirmed that familial relationship between us the day before yesterday .

It is when Hydra had experimented upon her .

Allison is as much my descendant as Antigone is .

The only difference is that Antigone is my direct daughter while Allison would be like my great, great granddaughter – depends on how much of her DNA has been altered by the retrovirus .

That doesn't make it less wrong though .

It is still incest, I believe .

Thankfully, Allison will never have to know .

Only three people know about this, including me .

And I prefer it to be that way .

The reason I am not too proud of what I did is because I am unable to care for all my descendants like I would for Antigone .

There is simply too many of them to keep track off .

Even with Shield Surveillance Network, only about a third of the babies are accounted for in the United States, not to mention the rest of the world .

And not all of them exhibits abilities like Allison .

In fact, only about 0 . 001% of the baby born between 1975 to 1990 do – which is still a lot considering millions of people take the supplements .

Infinite Health even give those supplements out for free to those that are unable to afford it . It is part of their plan for better health and longevity for everyone .

This makes the company has great public opinion, worldwide .

Of course, some dumbasses still try to sue the company for absurd reasons .

Due to my advance biology, Antigone is an evolved human . Her brain function is off chart even though she is only 5 months old .

Well, she is approaching 6 months now .

Therefore, I am sure Antigone is somewhat aware of her surroundings . How much she is aware is still to be seen, but I do hope she doesn't inherit my non-biological ability .

It will be a pain in the ass to track her down if she starts jumping through time .

Antigone is beginning to talk now, but her first damn word is Heinz .

It makes me sad, more than a little .

I will strive for her second word then . It shall be 'daddy', I swear of it!

If she doesn't, I will jump back in time and try again!

"Mr . Maxwell...?"

Allison mumbles when the first light enters the bedroom . She wakes up very early each day due to her job as Mr . Simmons' assistant .

She isn't any more since she has been promoted to senior .

I didn't show any favoritism on account of her being my daughter .

Great, great granddaughter is a mouthful . I will just call her daughter for simplicity .

Allison earned her promotion with her talent and skill alone . Her perfect memory helps a lot, but that can't really be called cheating .

People are not born equal .

If they did, the world wouldn't be so disunified .

And the entire wealth wouldn't be owned by a single person – me .

That is a joke . I don't own the world – yet .

Some companies are resisting my hostile takeover, and some people are beginning to investigate a lot of my holdings and corporations .

Several Governments do as well, including the United States . The temporal rifts incident couldn't truly be contained . Someone saw . Someone talked . Now the Government knows .

I have already given the heads up by all the moles I have planted in those Governments .

CIA and FBI are already been compromised by Shield .

The clashes against the United States Government will be inevitable, but I am prepared .

"Did you have a good night sleep, Miss Allison? I hope you do because I am such a great pillow . "

I response, causing her to blush .

Allison pulls immediately herself off my chest .

The blanket follows her, revealing my entire nakedness and a very erected member .

Her blushing grows when she can see my entire body far clearer than last night . I am not only a looker, but I am also well endowed .

It is thanks to my constant workout as well as the nanomachines in my bloodstream .

The nanomachines can keep expanding and contracting my muscles, forcing the muscle fibers to get into shape .

"There is no need to be embarrassed, Miss Allison . I had a great time last night, and I believe that you did too . Although I would love it if you do something about this . It has been awake all of the night . "

It didn't take more than for her to wrap her fingers around my shaft and gives it a tug .

She strokes my cock experimentally before easing herself into it .

Her mouth soon enclosed around the mushroom head, sucking on it .

"Oh, that's nice . Take it in a little deeper . "

I request as my hand presses on the back of her head, helping her taking my cock deep into her mouth and throat, inch by inch .

Allison gags when she reaches the base before pulling back for breath .

My cock is coated with her saliva, jerking excitedly .

Allison continues to work my shaft until I reward her effort with a creamy breakfast . It is probably the first time someone came in her mouth since she couldn't stand the strong taste .

Some of my seeds even spill out of her lips . She tries to stop it with both hands, cutely .

Her distasteful expression could be seen despite her effort to try and swallow the mouthful .

And after a few rather difficult gulps, Allison manages to get streaming down her throat and finally in her stomach .

I chuckle at her effort and pat her on the head like a little girl before having her bouncing on my cock, moaning and groaning erotically .

We didn't head out of the bedroom for breakfast until I pump two steamy loads into her cunt .

Her ass is still a virgin, so I will claim it later .

"We don't really need to go anywhere for breakfast, Miss Allison . It will come to us . "

I speak up and tap my finger on the kitchen counter .

The Hydra ring in my hand glows brightly before a mechanical whizzing could be heard .

The kitchen counter descended into the floor, leaving a rectangular hole .

A new machine emerges from the hole, causing Allison to stare in shock . There is a reason why there are huge gaps between the floors of the building .

There are also a lot of hidden secrets in the building, only available for Hydra and Shield members .

"This is food synthesizer, Miss Allison . It can make any kind of meal you wish . If what you want is not on the list, you can put in a request and it will have it as soon as possible . "

Of course, there is a fabricator dedicated to fabricating foods .

A perfect meal can be created each time thanks to its molecular assembler .

Foods and drinks are just a bunch of atoms string together, mostly carbons, hydrogens and oxygens .

It isn't more complicated than building a war machine or cloning a person .

Therefore, most people in the future didn't even bother to leave their houses .

"This is one of the benefits as a senior of the firm . Now, please, take a seat and join me for breakfast, Miss Allison . "

Allison still is in shocked . She would continuously be in shocked for the next few days as she is given a ring and introduction to Hydra .

Her perception of the entire world really has changed that day .
