

Chapter 304

"What!"

Bruce yelled in anger. Gamma Abraham had rushed to the hall to inform him of the news, as he was the future Alpha, and Bryan was also not present.

"What will we do now?" Juliana asked Alpha Harry with a worried look.

Alpha Lucas was fiercer as he got mad at his son. "I should kill him today," he said.

Bethany hurriedly grabbed his hand and reminded him,

"He is still the head Alpha of the Moon Valley Pack. If you kill him or harm him, you will be punished by the council. We have no evidence against him to harm him either. Only the people of this pack are able to do that."

Alpha Lucas snatched his hand away from his wife's grip. "So what? I can assist them. I don't care if I am labeled a traitor. I can't let them destroy my daughter's life this time. He may have come here to kill Bruce and seize the throne."

Mila tightened her fists as she felt hatred for Victor. That man had already ruined her life twice. She would not let him kill her mate.

"We will fight against him," Mila said as anger was visible in her eyes.

Bruce looked at Beta Robert and said,

"Declare the war. I will kill that man tonight. Even if I have to lose my legs, I will not let him go alive."

Bruce's red eyes shone in rage. He hated Victor for harassing Mila, and he hated him for poisoning Sophia. At the same time, it was time for him to show the pack members that he was not a waste but an Alpha who could give his life for them.

Robert told the guests to leave for tonight. He cast a glance at the stage, which remained untouched. The crown ceremony had to be canceled.

He closed his eyes, hoping to mind link Bryan one last time in the hopes that his best friend would return. 'Where are you, Bryan? Your pack needs you.'

Delta Edger declared war against the Moon Valley Pack. Because their Alpha leader attacked their pack, they had no choice but to wage war on them.

Gamma Abraham led all the pack fighters to the forests. Before going to war, he promised his mother that he would not let go of the man who poisoned his sister and pushed her to the mouth of death.

His mother cried but did not stop him because it was his duty to protect his pack.

Everyone shifted and started to run in the forest, heading to the border. Alpha Lucas was also with them since he was by their side.

They left the female members in the pack house.

Though Bruce told Mila not to come to the war, Mila was stubborn and decided that she would join the war since she was the future Luna of the pack. It was time for her to let go of every fear in her heart for Victor and face him like a strong woman.

Before they could reach the border, they witnessed thousands of wolves killing their border guards. Bruce's eyes widened as he noticed the wolves lying dead on the ground.

He growled at the wolves who approached him and attacked them.

The war began in full rage and hatred.

All of their goals were not only to win the war, but also to kill the man responsible for their remorse.

Mila's brown wolf was strong, as she killed wolves like a Luna. When Juliana said she was Luna material, she was right. Indeed, she was perfect to be a Luna.

But she was not that powerful to stand next to Alpha Bryan. No one could match him, which was why Mila and her parents had felt so blessed all these years.

However, fate had other plans. It did not snatch the position from her but changed the man of her life.

Mila glanced at Bruce and saw how he was fighting with his teeth and nails.

She was amazed by his strong moves and enthusiasm about the war. Perhaps it was his first war, and he had to prove himself to be an Alpha leader.

The atmosphere turned wild as they kept fighting.

Robert and Edger frowned as they saw their own pack fighters kill their fellow pack fighters.

They turned to Abraham with wide eyes. Abraham did not realize it until Theta Noble's mind linked him to say it.

"How is that possible? They are our pack fighters!" Abraham groaned in anger.

They were losing the war.

It looked like Victor had bought their pack fighters to fight for him. Since they knew Alpha Bryan was not here, they agreed to be with them.

All the sub-Alphas who were the pillars of the Night Shade Pack were here to fight, but not against Victor but their own pack.

They betrayed them!

Robert was losing his mind as he had to kill his own pack fighters when he saw them killing their other warriors.

Their eyes fell on the man who hadn't shifted yet, as if he did not need to. He was grinning as if he had already won the battle.

"Keep fighting. Even if you kill your own fighters, you will eventually lose the war."

Victor's voice echoed as his gaze shifted to Bruce and all of the officials.

Abraham growled and rushed toward him since he was in a close direction. But before he could reach Victor, a few wolves rushed to him and attacked him together.

Bruce looked around in fear of losing everything. Victor was not a fool, but a great player who steered all of their warriors toward him.

They were already doomed to defeat in the war.

At that time, a loud growl echoed through the forest, which not only shook the leaves of the tree but also shook the legs of the wolves in the war.

There was a cold wind blowing, and the black clouds covered the moon completely.

Everyone turned to look in the direction where the growl came from.

They saw the silhouette of a giant wolf approaching. The pack fighters of the Night Shade took a back step as they realized who had come to join the war. They did not expect him to be here. They regretted their decision to support Victor.

The giant wolf came to a halt before Beta Robert, his red eyes darting around the fighters. His black fur was so dark that it made the Moon Valley Pack fighters afraid to approach him.

All the wolves shook internally and said in their minds links,

"Alpha Bryan is here!"
