

## Maxing MT 151

Chapter 151: The shock of the experienced reincarnators. The third reincarnation began!\_2

She braced herself and shook hands with Wang Shuming.

The next few people who went on stage finally became a little more normal.

-referring to the way she dressed.

In fact, reincarnators had many different occupations and experienced different worlds.

Most of them would have some strange hobbies.

They were all members of Linjiang's local Reincarnator Association and were responsible for protecting the safety of this group of residents.

Originally, there was no need for so many reincarnators to escort the residents.

However, Li Yueming was an S-class newbie.

In a third-tier city like Linjiang, the City of Water

S-class newcomers were as rare as wild giant pandas.

Therefore, he had no choice.

After hearing the news, almost all the free reincarnators around Linjiang City came.

He wanted to see if Li Yueming had three heads and six arms.

Li Yueming could only smile bitterly.

About a dozen reincarnators came forward to greet Li Yueming one by one.

The atmosphere was generally harmonious.

The old Daoist named Wu De stroked his beard.

Looking at the dilapidated city behind Li Yueming, he frowned and said, "'The corrosion of the dark energy in this place is so serious. It's already beyond the scope of a new reincarnator, right? What are those investigators doing?'" Hearing him mention this.

Only then did the reincarnators on the city wall notice the black fog raging on the ground below the city wall.

Wang Shuming controlled the mechanical eye to scan the area and said, "The density of the dark energy has already exceeded 20%. There are probably rank 3 dark creatures in this area, and the corrosion is very serious... So, did those guys who were investigating have no oil in their heads? He actually gave this place to the newbies?!"

Hearing this.

Someone around said, "This might not be the fault of the group of people who investigated..." Recently, the situation of the dark corrosion had become more and more serious. The group of people who were investigating had already gone crazy. The land around Linjiang that was not protected by the reincarnators had a skyrocketing concentration of dark energy!"

These words seemed to resonate with him.

The other reincarnators also echoed.

“I wonder what the higher-ups are thinking. They clearly have the ability to expel a portion of the dark energy, but they still ignore it!”

“Ugh, I can’t say, I can’t say...” They discussed for a while.

He finally stopped.

Wu De looked at Li Yueming and took the initiative to say, “Little friend, since we’re all here, do you want me to help you clean up the dark forces in the city?”

This kind of territory with a concentration of more than 20% could only be handled by a level 3 reincarnator.

Obviously, it was beyond the scope of a newcomer like Li Yueming.

It was probably because of this.

Li Yueming had been here for more than a month, but he still hadn’t cleared out the dark creatures in the city.

The other reincarnators around him did not reject Wu De’s suggestion.

However, all eyes were on Li Yueming.

She wanted to see how he would answer.

Li Yueming glanced at the group of people below the city wall.

These people would be the residents of his territory in the future.

He then looked at the many reincarnators on the city wall who were watching him.

After thinking for a moment, he said, “I can handle the matters in my city myself. Thank you for your kindness! “”

As he spoke.

Li Yueming asked Zhao Xiaoya to bring over some fruits and spiritual rice as a form of hospitality.

“Seniors, wait for me for half an hour. I’ll immediately clear out an area for the residents to stay in!”

As he spoke.

He jumped down and entered the polluted city.

During this period of time, Li Yueming had been concentrating on his cultivation.

He almost never paid attention to the outside world.

That was why the residents of the territory had reached the entrance, and the dark creatures in the territory had not been cleaned up. This was a rather embarrassing thing.

However, for him now, clearing out the dark creatures was only a small problem.

There was no need for other reincarnators to help him.

The group of reincarnators on the city wall looked at each other when they heard this.

Their faces revealed an expression of 'I knew it'.

After seeing Li Yueming leave.

A senior reincarnator said, "Young people nowadays like to show off!"

Another senior reincarnator beside him also nodded and said, "Haha, I've just become a reincarnator. It's normal to be a little arrogant. You'll know after suffering a little!"

Wang Shuming's evaluation of this was only one word: "Stupid! "

Wu De stroked his long beard and smiled as well."After all, he's an S-class reincarnator. He's a little arrogant and arrogant..."

He was halfway through his sentence.

Under his feet, Li Yueming had already rushed into the vicinity of the city gate at an extremely fast speed.

A Tier 2 dark creature emerged from a corner.

Just when everyone thought that Li Yueming was going to fight with this second-tier creature.

However, he realized that Li Yueming did not even look at him before stepping on him.

The dark creature suddenly let out a miserable scream. It was actually stepped into a black fog by Li Yueming and dissipated!

Seeing this situation.

Wu De, who was originally prepared to comment on the country, almost pulled his beard off.

He could not help but exclaim,"F \* Ck.." F \* ck, f \* Ck this young man?" In the surroundings.

The other reincarnators, who were prepared to watch the joke, were also in disbelief.

What did they see?

A rookie who had just become a reincarnator for less than a month had actually killed a stage two dark creature with a single step?

The shock that this brought to them was like seeing a baby who had just drunk milk smash an adult to death with a hammer..

Chapter 152: The shock of the experienced reincarnators. The third reincarnation began!\_3

Was there anything more ridiculous than this?

However...

Before they could accept this scene...

He realized that something even more ridiculous had happened.

After Li Yueming stomped a 2nd rank dark creature to death like an ant.

He continued to venture deeper into the city.

About two minutes later, a Tier 3 dark creature appeared.

He charged at Li Yueming from behind.

From a distance, it looked very terrifying.

Under such circumstances.

It was as if Li Yueming had eyes on the back of his head. He easily turned around and threw a punch.

One punch.

It was just a punch.

A sound similar to the explosion of a cannonball erupted from the entire city.

“Boom!”

The huge force seemed to cause the ground to shake.

The 3rd rank dark creature was sent flying by the punch.

While still in midair, it had already turned into pieces inch by inch.

After doing all this, Li Yueming jumped up from the dust and continued to search for dark creatures in the city as if nothing had happened.

Seeing this scene.

All the senior reincarnators on the city wall widened their eyes like copper bells.

F \* Ck.

Was this really a newcomer who had just become a reincarnator less than a month ago?

Even a human-shaped tyrannosaurus can't be this terrifying, right?

For a moment.

All the senior reincarnators standing here fell into self-doubt.

What lingered in his mind was the classic triple question.

Who am I?

Where am I?

Why didn't the human race evolve with me?

If he didn't know Li Yueming well enough to confirm that he was really a complete rookie reincarnator...

To be honest.

At this moment, the group of senior reincarnators already had the urge to kneel on the ground and worship.

Such combat strength was among the senior reincarnators in Linjiang.

It could also be considered quite powerful.

It took less than four hours.

Li Yueming swept away all the dark creatures that entered the city streets.

On the other side.

Zhao Shiya, the secretary, was busy.

She had been trained in this aspect since she was young.

Therefore, he was quite efficient when he did things.

First, she selected a group of high-quality residents to help her manage the order of the residents.

Then, they began to let the residents into the city on a large scale.

He looked at the ruined city.

The dust had not completely settled in many places, and the group of residents only felt their mouths dry.

Fortunately, for them, it was already a very good thing that there were no dark creatures attacking them.

Therefore, he had no choice.

After a brief uproar, the group of people finally quieted down.

After Li Yueming cleared half of the city.

He returned to the top of the city wall.

At this moment, the group of experienced reincarnators in Linjiang City looked at him with complicated gazes.

Li Yueming smiled at them but didn't say anything.

Instead, he turned around and said to the residents below the city, "As everyone can see, this city is currently in a state of ruin. There's nothing...As the City

Lord, I don't have much to promise. However, I can guarantee that as long as I'm still alive, you can all live a peaceful life here and won't be invaded by darkness again!"

As he spoke.

The aura of a martial arts expert erupted from his body.

Everyone in the sky above Star-Moon City could feel his tyrannical aura.

Under the city.

Countless residents looked at their City Lord with shock and excitement in their eyes.

In the blink of an eye, half a month had passed.

Li Yueming had been busy settling the residents in the city.

This was his basic plan.

In the future, if he wanted to be on par with those top reincarnators, a rich and prosperous territory was necessary.

In the end.

Li Yueming spent a lot of effort to arrange for all the residents to enter the city, and then swept away the dark forces in the entire city.

The other trivial matters were all thrown to Star-Moon City's management, led by Zhao Shiya.

Sitting cross-legged in his room, Li Yueming took a deep breath.

Three months had passed.

The messy things in the real world finally came to an end. He could finally focus on his next reincarnation.

Chapter 153: Red Talent, Nightless City! 1

In the silver-white reincarnation space.

Li Yueming moaned there.

Without hesitation, he said softly, "Seal, activate reincarnation! ""

A moment later.

The reincarnation mark on his wrist began to glow and project a string of words.

[Detected reincarnator name: Li Yueming, serial number 7001611]

[Remaining Reincarnation Authority: 9]

[Mark of Reincarnation Level: LV3 (2000/10000)]

[Reincarnation Points Balance: 441000] [Origin Power: 100 times talent enhancement!]

[Fixed Talent: Infinite Deduction (Gold)]

[Special Talent Title: God of Martial Arts (red)]

[Fixed Talent: 2]

” Fixed number of additional talents: 1 ‘

[Do you want to purchase additional services? If he didn't need to click on the option, he could activate the reincarnation directly!]

Looking at his personal information template, Li Yueming's face revealed some pride.

Although there were some twists and turns in the first two reincarnations, he still obtained a good result in the end.

At least his busy life wasn't in vain.

According to the usual practice.

Li Yueming first spent 5,000 reincarnation points to buy a resource pack for the reincarnation world.

This thing was a natural cheat accelerator for Infinite Deduction.

Basically, it was Li Yueming's target of consumption. [Additional services purchased!]

A string of information was stuffed into Li Yueming's head.

Before he could fully digest it.

Turning around, a clear sound came from the will.

In the next second.

Li Yueming felt that he had gradually lost all sense of his body. Moreover, a familiar soul came out of his body and attacked again!

[World loaded]

[World loading successful. Planet serial number 3-15741!]

[The reincarnator is currently in the midst of a mystery in the womb. After the initial introduction, you can enter the reincarnation world.]

[This is a world with advanced technology. After a series of terrorist wars and public opinion infiltration, the federal government gradually lost control of the country. The major high-tech companies took the opportunity to control the actual ruling rights of the city and the government!]

[Under the rule of the major high-tech companies, human society is in chaos.]

[Human trafficking, organ trading, sex trade, street fighting... Dirty blood flowed through the veins of the city.]

[Technology has become a tool for rulers to control everything. The people at the bottom can only struggle numbly in a society that is constantly regressing like zombies.]

[Under the neon lights in the middle of the night, only the tycoons are partying with scarlet wine glasses!]

[Reincarnation world background introduction completed. Randomly drawing talent!]

[Congratulations on obtaining Talent: Useless (Gray)]

[Useless (Gray): What are you looking at? I'm talking about you. You lie in bed and drink coke every day. I don't know how you can sleep at this age!]

[Starting from the 100 -fold increase in origin energy talent, the effects of all your talents will be increased by 100 times!]

[Your talent 'Useless' has been amplified by 100 times by the origin energy and has turned into a purple talent 'Useless'!]

[Completely useless (tattered): You're synonymous with trash. You're a waste of air when you're alive, a waste of land when you're dead, and a waste of money when you're half dead!]

[The rules of this reincarnation world are level 2. Reincarnators can bring two talents into the reincarnation world!]

[Binding Talent: Completely useless (tattered), Infinite Deduction (gold)?]

He saw that the ‘useless’ talent on the Reincarnation Mark panel had become ‘completely useless’ after being amplified by a hundred times. Li Yueming’s eyes widened. He had learned a lot today.

Damn it, there was actually such a shovvy operation?

It seemed that it was not good not to get a chance to get a chance to bleed out. Of course, he could not bind such a lousy talent.

“Imprint, buy a new talent random die!”

[The first purchase of a new talent random die requires 20,000 reincarnation points. Are you sure?]

Twenty thousand it is.

At most, he could just collect more wool in the reincarnation world to replenish his blood.

[Congratulations on obtaining talent: Quick Healing (blue)]

[Quick Healing: You can quickly heal your injuries by replenishing your energy!]

[The origin energy talent will increase by 100 times. The effect of your talent will increase by 100 times!]

[Your talent, Quick Healing (blue), has been transformed into Rapid Recovery (red) after being amplified by 100 times the original power!]

[Rapid Regeneration (red): You can rapidly recover from your injuries by absorbing energy. Even if your body dies, as long as your brain function does not lose its activity, you can use the rapid regeneration ability to revive!]

He looked at the red talent called Rapid Recovery.

Li Yueming calmed down.

He walked the path of individual strength. This kind of recovery skill was naturally a top-grade talent for him.

However, it was also a blue talent.

The initial flash of spiritual light turned golden after being amplified by a hundred times.

And what if it was only red after a hundred times of rapid healing?

He pondered for a moment.

Li Yueming felt that it was very likely because talents of the same color had different levels of potential.

It was also a blue talent.

At that time, the term ‘sudden inspiration’ included the possibility of predicting the future.

Judging from the potential indicated on the entry.

It was obvious that a flash of inspiration was much better than a quick recovery.

He cleared all the messy thoughts in his mind.

Li Yueming’s thoughts gathered once again.

He slowly absorbed the 10,000 reincarnation points resource pack he had just bought.

Li Yueming began to predict his fate in this life..

Chapter 154: Red Talent, Nightless City!\_2

[0 years old: You were born in a test tube from Nightless City's Cloud Technology Company! ]

[There are hundreds of thousands of babies born in test tubes with you!]

[Yunxiao Technology Company will extract the genes of every baby and choose the most perfect genes to nurture!]

[Your luck is not bad. You passed the first round of gene screening, but more babies were ruthlessly eliminated.]

[2 years old: Yunxiao Technology Company has begun to inject various drugs into many babies. They want to use the drugs to activate the various genes in your bodies!]

[You are extremely angry about this, but you are still in the petri dish and can't change anything!]

[4 years old: More babies were eliminated. Some of them had their organs removed to provide to the rich, while others with genetic defects were thrown into the trash and left to fend for themselves.]

[You're still very lucky, or rather, your genes are very strong, and you survived!]

[6 years old: Yunxiao Technology Company injected more drugs into you!]

[You have become irritable, your appetite has increased greatly, and you have suddenly become aggressive! ]

[You started to feel strange, but because you were imprisoned for a long time, you didn't have any means of resistance.]

[8 years old: Your super-strong genes have attracted the attention of many scientists. They are constantly extracting blood from your body and conducting experiments.]

[You've been changed to a more solid cage. Other than drowsy sleep and occasional hysterical rage, you can't care about anything else.]

[10 years old: Yunxiao Technology Company is preparing to transfer you to a higher-Sequence research institute!]

[Halfway through, you completely lost control of your emotions. You transformed into a beast and erupted with extremely powerful combat power. You broke through the cage and saw the unknown world outside for the first time.]

[12 years old: You kept escaping from the pursuit of the City of Darkness, but in the end, you were unfortunately captured due to physical reasons!]

[14 years old: Your body has turned into a puddle of mud!]

He looked at the endless deduction.

Li Yueming didn't know what to say.

What kind of heaven-defying opening was this?

He was born without parents and had been through inhumane experiments since he was young.

He had finally managed to escape from the laboratory at the age of 10, but he was caught and brought back after only a few months.

After a series of inhumane experiments, he finally lived for less than twelve years.

So, after all this time, the player who died and turned into a pile of mud because of too many gene serums was actually him?

And why did he die at the age of fourteen?

Did he form an indissoluble bond with the 14-year-old?

He couldn't live past the age of fourteen every time?

Forget it.

Li Yueming had already lost the desire to complain.

He was too lazy to continue deducing.

Just close your eyes and enter the world of reincarnation!

The lanterns were just lit up.

The neon lights in City M flickered in the pouring rain.

From afar, it looked like a hazy and faint bubble.

Above the skyscrapers made of new mixed materials stood a huge city.

It was supported by sixty-four super alloy pillars.

It symbolized the 64 cities under his command.

It was above the surface city.

Looking up, it was like a country that existed independently in the sea of clouds.

This is a city that never sleeps in the sky.

The headquarters of one of the Red Leaf Empire's six major commercial technology companies, Cloudsky Technology Company.

At this moment.

In the super laboratory at the top of Nightless City.

A few lab workers in white coats were yawning as they watched the scene behind the vacuum glass cover.

The wrinkled newborns were neatly placed in rows of petri dishes.

Needles were inserted into the newborn's umbilical cord one after another, extracting the most fresh blood for the next genetic screening.

This was a rather boring job.

Basically, the entire process was done by artificial intelligence.

The staff only needed to press buttons such as 'start stop', 'print data', and so on.

Then, he would just lay in the control room and hand everything over to the artificial intelligence.

At this moment.

One of the staff members noticed a meatball moving behind the glass cover.

Occasionally, something novel would appear in the boring observation, which would always attract the attention of humans.

"This meatball 0731 moved just now. I bet his genes are definitely different from the other meatballs!"

"Where?" The tall man was also interested in this at first.

He subconsciously glanced at the large number of meatballs not far away. It took him a lot of effort to find the number 0731 on the countless glass covers.

However, when he looked at it.

The meatball in 0731's petri dish had stopped moving.

The tall man, who felt that he had been played, rolled his eyes and said angrily, "These meatballs have been injected with sedatives and can still move? I think your genes might be very good. Why don't I apply to the supervisor to let you be the father of these meatballs next time?"

The staff member was a little angry when he heard that. He muttered, "Tsk, it really moved. If you can't do it, then forget it..." Although that was what he said.

However, the staff member was clearly not confident.

After all, there were so many meatballs.

Perhaps he was just seeing things.

The most important thing was that he heard that this damned, unreasonable, and stupid colleague actually wanted to apply to the supervisor to let him be Meatball's father.

Being the father of so many meatballs, he would probably be squeezed dry in one go.

He muttered a few words.

The staff member yawned and continued his boring work.

In 0731's test tube, Li Yueming was already one year old.

He had no choice.

When he spoke just now, he had no idea what was happening in the outside world.

It was only in the past few days that he slowly woke up from the mystery of his pregnancy and was finally able to barely control his body.

However, he was now trapped in the nutrient solution, and his umbilical cord had not even been cut.

Li Yueming didn't dare to show any difference.

The glass of the petri dish was made of special glass that could withstand the bullets of a large-caliber sniper rifle.

Under such circumstances, Li Yueming was no longer a god.

Even if he really was a god, he wouldn't be able to escape from this super laboratory with his baby body.

Therefore, he had no choice.

For the time being, he could only obediently stay in the petri dish and accept the tragic fate of his test subject.

He could feel the needle inserting into the umbilical cord to extract blood and nutrients.

Li Yueming shivered.

Damn it.

Was this the feeling of being a fish on someone else's chopping board?

It was too terrifying!

After collecting the blood.

The petri dish that Li Yueming was in was slowly placed back into the incubator by a metal clamp.

Next, the artificial intelligence would transport all the collected blood along the pipeline to the management center, where the blood of all the babies would be analyzed.

Those who do not grow crooked will continue to be nurtured.

Those that grew crooked would be destroyed or sold.

During the observation period.

Just like any other ordinary baby.

Li Yueming's blood was also injected with a lot of sedative and sleep-aiding drugs.

After all, the child was already one year old. According to normal development, he should have already left the mother's body and started to move around. However, as test subjects, they obviously did not have the luck to travel.

In order to allow them to live safely in the petri dish.

The technology company would inject some sedatives into the blood of all babies regularly to help them sleep.

According to the dosage of the drug that was injected.

Li Yueming definitely couldn't think clearly.

However, don't forget that Li Yueming had a red talent that allowed him to recover quickly.

Therefore, every time the technology company injected him with a sedative, Li Yueming would quickly wake up.

Under such circumstances, Li Yueming was constantly exploring his own path of survival.

According to the future direction of the deduction.

The first two years should be the observation period of Yunxiao Technology Company for this batch of infants.

Those were babies whose genes were unstable and imperfect. They would be eliminated as defective products.

The remaining stable and perfect seeds would be preserved.

When he was almost done observing.

Only then would he proceed with the next step of the experiment.

Therefore, the only thing Li Yueming could do now was to grow as strong as possible before the age of two.

Chapter 155: The Perfect Gene Project, The Unjustly Found! 1

In the Nightless City in the clouds.

It was hundreds of meters above Mylta, supported by 64 unbelievably huge Sky Climbing Pillars.

It was the headquarters of the Red Leaf Empire's six top commercial technology companies, the Cloud Sky Technology Group.

There were millions of people living there.

The relatives of Yunxiao Company's executives and researchers from various departments made up 80% of the population.

The remaining 20% were hired workers.

Doing some dirty and tiring work that people looked down on.

Under such circumstances.

The Nightless City's security and defense level was still the best in the world.

Li Yueming was born as a test subject in the technology laboratory of Cloud Sky

Nightless City. This kind of hellish opening was enough for 90% of the reincarnators to feel their scalps go numb.

For Li Yueming.

The only good news was that the nursery's security level was not too high among the various departments of the Cloud Sky Corporation.

After all, no one would be so bored as to keep a strict watch on a group of children who were locked in petri dishes and had no combat strength.

Therefore, he just had to be careful.

There was still hope of escaping.

Hmm, probably?

When he was one year old.

Li Yueming was often taken out by the staff for blood tests.

It was visible to the naked eye.

The number of meatballs around him was rapidly decreasing.

Obviously,

Those babies with genetic defects were quickly eliminated.

It wasn't that Li Yueming hadn't thought of causing problems with his body so that he could become a defective product that was eliminated and escape the fate of being controlled.

However, the problem of genes seemed to be a little too much for Li Yueming.

In addition.

The most important thing was that he had the red talent of rapid recovery.

No matter how much trouble he went through, the rapid recovery would be able to quickly adjust his body.

Therefore, he had no choice.

After trying a few times, Li Yueming gave up on this option.

If he wanted to escape, he would have to rely on his own methods.

This year.

Li Yueming began to reveal his uniqueness!

For example, even if he was injected with sleeping and calming drugs, he would occasionally move his body.

For example, it could absorb nutrients at an extremely high efficiency.

His little tricks quickly caught the attention of the researchers.

There were two groups of people in the laboratory.

One group was staff in gray.

This group of people was responsible for recording and controlling data. They did some simple and boring work.

Their status in the research base was also relatively low.

The other type was scientists in white coats.

This group of people was responsible for following up on various projects and generally did high-end things.

His status in the research base was only lower than the senior managers and research project leaders.

Usually, the staff in gray was responsible for recording the data in the nursery.

Their daily job was to filter out the meatballs with 'perfect genes' from the large number of meatballs.

Not only was it boring, but the control was also very strict.

He didn't even have the chance to slack off.

He heard that a certain BOSS of the company had aged a lot over the years.

They urgently needed to develop a new medicine to save their lives.

The Perfect Gene project would not only pave the way for the company's plan to create the strongest human.

It could also provide a huge amount of data support for the pharmaceutical department's research on gene agents.

Therefore, the higher-ups attached great importance to the progress of this research.

Naturally, the staff members were also under heavy pressure.

Under such circumstances.

A freak like Li Yueming, who could still behave abnormally in a petri dish, naturally attracted their attention.

One year and a half, the time of the game

The staff had been observing Li Yueming for almost a month.

After some discussion, they came to a unanimous conclusion: The child in the petri dish, 0731, was a special existence. He should be isolated as an important observation target.

After the discussion.

The staff compiled Li Yueming's data into a document and submitted it to the project leader.

Less than two days passed.

The approval from the project manager came.

The researchers were allowed to set the child 0731 as the key observation object.

Just like that.

Li Yueming was placed in an independent laboratory.

What was worth mentioning was...

Li Yueming was not the only one in the laboratory. Beside him was a red-haired girl who was soaked in nutrient solution.

The young girl's eyes were tightly shut, and her brows were tightly knitted.

Her entire body curled up into a ball, and a large part of her skin was white from the nutrient solution.

It revealed an extremely devilish beauty.

Of course.

Li Yueming wasn't interested in whether his new neighbor was sick or not.

The key was that this special laboratory was more strictly guarded than the nursery. Not only were there many armed security guards patrolling back and forth, but there were also staff members on duty 24 hours a day.

Obviously.

It was impossible for these security guards to be set up specifically for Li Yueming.

After all, no matter how important he was, he was just a mass-produced test subject.

Perhaps due to some special reasons, it seemed to be relatively rare.

However, in the end, they could not escape the fate of being sexual consumables.

Yunxiao Technology would definitely not invest too many unnecessary resources on consumables like him.

Therefore, he had no choice.

The only mission of these security guards here was probably to 'protect' or 'watch' the red-haired woman who was soaked in the nutrient solution.

Of course, this was not good news for Li Yueming. The woman in red was like an unstable bomb..

Chapter 156: The Perfect Gene Project, The Unjustly Found! 2

He didn't know when it would explode or if it would.

However, Li Yueming couldn't change his current situation.

Thus, he could only take advantage of the situation.

After gaining a certain amount of attention, at least he no longer had to worry about being easily abandoned!

Therefore, he could finally carry out the 'rapid growth' plan he had formulated step by step.

On the third day of being transferred to the special laboratory.

Li Yueming revealed an even more terrifying characteristic.

Originally, the artificial intelligence had prepared ten days worth of nutrient fluids in the petri dish for him.

In the end, Li Yueming absorbed all of it in just one day.

After hearing the report from the artificial intelligence.

At first, the staff members thought that there was something wrong with their ears.

After reading the information on the report a few times, he ran to the incubation room to confirm it a few times.

Only then did the researchers confirm that this matter had really happened.

That night.

More than 30 researchers in white coats from the entire 'Perfect Gene' breeding program had all arrived at the special laboratory.

He looked at Li Yueming, who was still absorbing the nutrient solution.

All the researchers were in disbelief.

Among them, a bald man in a white coat swallowed.

He looked at the staff member who was also terrified and said, "What's going on? Won't he die from eating like this?"

The staff member panicked and said, "Reporting to the supervisor, 0731 has been continuously absorbing the nutrient solution in the afternoon. After the nutrient solution in the petri dish was sucked dry, it showed signs of waking up. We had no choice but to keep injecting the nutrient solution. Now... He had been absorbing it for three hours!"

The bald man was stunned for a moment before he rebuked angrily, "Don't you know how to inject large amounts of sedatives and sleeping pills?"

The staff felt a little unconfident when he heard that. He said weakly, "Too many sedatives and sleeping pills may cause irreversible damage to the Experimentals. We don't dare to act rashly without permission!"

Hearing this.

The bald man wanted to continue.

However, a silver-haired elder with gold-rimmed glasses spoke before him. "What are the characteristics of the experimental life forms?"

Hearing the old man's words.

The bald man immediately put out the fire.

When the staff member saw the old man, his eyes revealed a hint of fear.

'Professor Cheng,' he said carefully, 'the life signs of the experimental subject are stable. All the data are very healthy!''

The silver-haired old man known as Dr. Cheng was the person in charge of the Perfect Gene project.

It was said that he was also the main person in charge of the research and development of the life-prolonging medicine specially sent by a high-level BOSS of the technology company.

Even in the entire Cloud Sky Laboratory, Professor Cheng held a lot of power.

He heard a reply.

"In that case, let him continue absorbing. I want to see how magical this experimental body is!" Professor Cheng adjusted his gold-rimmed glasses and picked up Li Yueming's research file. After looking at it for a moment, he continued, "In addition, raise the observation level of Experimental 0731 to S and assign six A-grade

researchers to observe it twenty-four hours a day. If there is any movement, report to me directly!”

After saying that.

Dr. Cheng put down the files.

Finally, he looked at the petri dish of the red-haired girl beside Li Yueming and said, “Is this the leader of the Resistance in Mylta?”

‘Yes,” someone explained.” The security department said that the resistance in Mylta would not let the matter rest. As a precaution, they locked her up in our laboratory!”

As he spoke.

The person hurriedly handed a copy of the information to Dr. Cheng.

However, Professor Cheng was obviously not very interested in this. He casually threw down the information and said, “Get the security department to get rid of her quickly. What’s the point of leaving her here? The Perfect Genetic Engineering was a project that Ye Tianzi was personally concerned about. If anything happened, the head of the security department would die even if he had ten lives!”

He finished speaking.

He ignored the shivering security team members outside the door.

Professor Cheng waved his hand and left with the research team.

Li Yueming stayed in the petri dish.

Although there was a glass cover between them, they couldn’t hear what was being said outside.

However, the research team did not stop supplying the nutrient solution, which meant that his test was successful.

Yunxiao Technology Group was one of the six largest financial groups in the Red Leaf Empire.

Whether it was technology or financial resources, they were the top existences on this land.

It was born here.

For Li Yueming, apart from extreme danger, there were also many opportunities.

Let’s not talk about anything else first.

The nutrient solution that he had swallowed was actually an extremely expensive resource in the technological world.

And the most important thing was...

The researchers provided Li Yueming with the best nutrient solution that could be perfectly absorbed by the human body after repeated purification and refinement.

Not only could it replenish all the nutrients needed by the human body.

It could also increase the potential of the human body.

After all, being able to absorb it perfectly meant that there were not many impurities in the nutrient solution.

The absence of impurities meant that the human body could always maintain its pure and flawless texture.

Under the condition that his entire body was flawless.

No matter what humans did, they would have higher potential.

Now, Li Yueming was bathing and swimming in this extremely luxurious nutrient solution.

He inhaled deeply.

When his body could not take it anymore.

Only then did Li Yueming stop the whirlwind and began to guide the explosive energy in his body to wash his body through the Star-moon Art..

Chapter 157: The Perfect Gene Project, The Unjustly Found!—3

He did not dare to cultivate for the time being because the various functions in the petri dish were very complete.

Once Li Yueming's physical strength exceeded the threshold, the alarm system would be triggered. Exposing his aggressiveness would only alert the researchers and bring him endless trouble.

Therefore, he had no choice.

Li Yueming didn't plan to cultivate the Star-moon Art before he was fully prepared.

He had only been cleansing and widening the meridians in his body through the energy of the nutrient solution. He had used this primitive method to lay the foundation and increase his potential for future cultivation.

The few researchers who had been observing the situation all this time were already numb.

In just half a day.

The value of the nutrient solution absorbed by Li Yueming had already exceeded 100 million cloud leaf coins!!!

The nutrient fluid consumption of hundreds of ordinary Experimentals in the nursery downstairs was not enough for him to survive for half a day.

As a result, in the next few hours.

A group of researchers with red eyes looked at Li Yueming and burped in satisfaction.

All of them heaved a heavy sigh of relief.

There were even some staff members who sat on the ground and patted their chests as they muttered, "It stopped, it finally stopped!"

The speed of absorbing the nutrient solution was much faster than burning money.

If it lasted for a day or two...

Li Yueming would probably suck all the nutrient fluids in the laboratory dry.

At that time, they would probably not have to do anything else. They would all line up and get ready to get out of Cloud Sky City.

A moment later.

One of the researchers heaved a sigh of relief and said with lingering fear, "Damn it, we won't be nurturing a monster, right?"

"Monster? Did Professor Cheng not nurture enough monsters?" Another staff member who was sitting on the ground got up and patted the dust off his body. "Moreover, it will be time to reap the benefits in a few months. The money we invested in 0731 may be earned back ten times or even a hundred times from the subsequent research results!" After hearing this analysis.

The researchers finally calmed down.

Otherwise, when he thought about how Li Yueming had spent 100 million cloud leaf coins in less than half a day, he would be shocked.

There was no need to mention how terrified they were.

After all, the Cloud Sky Financial Group was able to grow until today and become a behemoth that controlled one-sixth of the Red Leaf Empire. The internal management of large amounts of funds was very strict.

Although they were not the masterminds. However, as a scapegoat, it was just right.

In the next two months.

Li Yueming had to take in a large amount of nutrient fluids every half a month.

Every time it was the middle of the month.

He looked at the constantly decreasing nutrient solution reserves on the virtual interface.

The group of scientists on duty felt their eyelids twitch and their breathing become difficult.

Fortunately, Li Yueming's growth did not disappoint them.

In just two months, Li Yueming's body had grown a lot.

Furthermore, the genes in his body were constantly changing, becoming more and more perfect.

Finally.

A few months later, Li Yueming was two years old.

According to the original plan that the 'Perfect Gene' project had been carrying out all this time, the gene reagent had already been refined.

After the Experimentals grew to two years old in the nutrient solution, they could proceed to the next step of the experiment.

Therefore, in the special laboratory.

A group of scientists, who had been tortured by Li Yueming, quickly submitted the experiment application.

However, in less than two hours.

The relevant materials were rejected by Professor Cheng.

The reason was simple.

As long as Li Yueming's genes were still evolving, he had to be fed well.

The next step of the experiment could only be carried out when the gene gradually approached perfection or when the gene could no longer transform.

Obviously.

Professor Cheng also had high hopes for Li Yueming.

He was the one who submitted the Perfect Gene Project back then.

It had been implemented for nearly ten years now.

During this period, the data and experimental subjects produced did not meet Dr. Cheng's expectations.

Li Yueming, an unheard of alien, was undoubtedly used by Professor Cheng as a breakthrough point.

As long as he could analyze the secret of the perfect gene.

Not to mention burning billions of nutrient fluids.

Even if he burned billions of yuan, Professor Cheng wouldn't even frown.

In the petri dish, Li Yueming was only two years old.

However, his body was growing very quickly.

Now, other than the fact that his face was still a little tender, he was no different from a four-year-old teenager in other aspects.

Moreover, this was under the condition that he did not undergo any training.

It was obvious.

Yunxiao City did not calculate the cost of putting in concentrated nutrient solution to give Li Yueming a huge benefit.

It was no exaggeration to say that.

The hundreds of millions of funds would at least reduce Li Yueming's future growth by ten years.

When he was two years old, Li Yueming thought that Professor Cheng was going to kill him.

After all, in the initial deduction, he was also extracted and injected with various drugs at the age of two.

However, he never expected that no researchers would come to give him an injection after he was two years old.

Moreover, the supply of nutrient solution was still extremely sufficient.

After thinking for a long time.

Li Yueming quickly guessed what had happened.

Obviously, the higher-ups had stopped the experiment that should have been carried out on him and changed it to continue training and observation.

He probably wanted to fatten him up before killing him.

After confirming this, Li Yueming almost burst out laughing.

This was a good relationship!

Let's see who's the last super wronged one.

Therefore, in the next half a year.

Li Yueming was even more unrestrained when he absorbed the nutrient solution. Almost every time, he would empty the nutrient solution in the special incubation room.

Time flew by.

When he was two and a half years old, Li Yueming had completely developed into a teenager.

Although his body did not have direct sunlight all year round, he was still able to survive.

It looked a little sickly pale.

However, it still couldn't hide his incomparably vigorous figure.

At the beginning, Li Yueming was still complaining that this was the beginning of the game.

Now, Li Yueming wanted to stay in the petri dish and not leave.

After all, he only needed to lie down in a petri dish every day to be fed a lot of resources.

It was simply too satisfying.

On this day.

Li Yueming was preparing to swallow the nutrient fluid like a whale as usual.

In fact, the nutrient solution was almost useless to Li Yueming now.

It was just that he believed that it would be a waste not to eat it.

Li Yueming had no reason to miss it.

However, at this moment, a group of fully armed soldiers arrived outside the special laboratory.

Seeing this situation.

Li Yueming's muscles tensed up.

What was going on?

Had he been discovered for stealing food?

Was there a need to mobilize the army to deal with him?

Just as Li Yueming's mind was spinning, he suddenly realized that the group of fully armed soldiers did not seem to be coming for him.

They handed a document to the researchers in the laboratory.

Then, he went to the glass chamber where the red-haired woman was imprisoned.

It looked like he was preparing to move the red-haired woman out of the breeding room.

However, just as Li Yueming thought that this matter had nothing to do with him...

However, an accident suddenly happened.

In the blink of an eye, a piercing red siren suddenly sounded in Li Yueming's laboratory.

Chapter 158: Riot, Li Yueming, Waiting for an Opportunity to Act! 1

In the special laboratory.

The new scientists looked at Li Yueming as if he was a perfect piece of art.

From their gazes, Li Yueming could read several layers of special meaning.

Praise, greed, desire, eagerness...

There were all kinds of messy emotions.

Li Yueming knew that he did not have much time left.

Thus, after nearly three years.

This was the first time he had used the Starmoon Art to temper his body.

It was not easy for Li Yueming to escape from this tightly guarded laboratory.

After all, the combat strength of the ordinary people in this world was not like the previous two worlds.

As long as they held all kinds of high-tech weapons with amazing damage, ordinary people could even kill martial arts grandmasters in their previous lives.

Moreover, there were powerful 'Extraordinaires' among the ordinary people.

Their individual strength could also grow to a level that was not inferior to a Martial Saint or even a Martial God.

Speaking of 'Extraordinary' ,

He had to mention the components of this world's power.

Previously, when the Reincarnation Mark introduced the world's background, it did not introduce the power composition system of this world.

Li Yueming also had a rough understanding of this through the information he bought with the reincarnation points.

In the past 500 years of war.

3-15741 The various forces on the planet were constantly exploring ways and means to increase the combat strength of humans.

About 400 years ago.

Now, the world's largest financial group, Andre Technology Group, had become the first force to eat crabs.

They had successfully discovered a kind of power that could allow humans to walk toward the extraordinary. Andrei Technology Group named this power 'Extraordinary Energy'.

After that.

Andre Technology Group began to privately mass-produce extraordinary humans with powerful combat strength.

Decades later.

Extraordinaires had officially stepped onto the stage of the era.

They were wearing giant mechas to attack cities and conquer land, and they were invincible.

They had defeated the government armies all over the world.

The entire planet was in an uproar because of this.

Caught off guard, many governments fell into a passive position.

The world was in chaos.

It was also because of the birth of the Extraordinaires that the world government's military order was destroyed.

Ever since then.

Technology corporations and corporations replaced the world government.

And he became the new ruler of this planet.

After hundreds of years of accumulation, the supernatural beings were now widely known.

Correspondingly.

A hierarchy that differentiated the strength of Extraordinaires was already widely known.

According to the amount of supernatural energy that a supernatural being could mobilize.

People divided it into nine grades, F, D, E, C, B, A, S, SS, and SSS.

Among them, the S-class Extraordinary could destroy a small city.

SS-class superhumans had the power to destroy large cities.

An SSS-class supernatural being could even destroy a country.

In the end, this world was very scientific, but it didn't seem to be particularly scientific.

However, the beaver was right.

Until today.

There were three ways for ordinary people to become stronger.

The first and most common method was to inject the supernatural drug developed by Andre Biotech Company.

After injecting the drug.

Humans with strong physiques, tenacious willpower, or good luck had a chance of evolving into supernatural beings.

A small number of Extraordinaires would even obtain various magical innate abilities during the awakening process.

Those with weaker innate abilities might even find it difficult to kill a chicken.

However, some special talents could also help extraordinary people grow to become extremely powerful.

Of course, the effect of the potion was very strong.

Most of the people who were injected would not be able to survive the side effects of the drug.

Breaking limbs, brain death, and becoming disabled were only minor reactions.

In serious cases, they could even become super-powered monsters that had lost their minds.

Or they could just die on the spot.

At present, Andre Company had very strict control over the supernatural medicine.

It was basically impossible for ordinary people to find a channel to buy and use extraordinary potions.

Therefore, he had no choice.

Other than the extremely small probability of becoming an Extraordinary through natural awakening.

The other path that ordinary people could reach was the modification of artificial body parts.

By inserting the mecha core developed by Hurricane Power Technology Company into his body, he could transform into a transmigrator.

The upper limit of the growth of the modified body parts was much lower than that of a real supernatural being.

However, its lower limit was even higher, and it had very good destructive power.

The most important thing was that he was close to the people.

The price was still within the range that ordinary people could reach after working hard for most of their lives.

Meanwhile, Hurricane Energy Technology Company had made a fortune by selling the mech core and the mechanical parts that matched it.

As for the final strengthening method, it was genetic modification.

The so-called genetic modification was to modify the genes to release the shackles of human birth to obtain super combat strength.

At the forefront of this sequence of research was the Cloud Sky Technology Group and the other two major technology companies.

The shortcomings and strengths of genetic modification were very obvious.

Its strength was that it could mass-produce genetic warriors, and it could possess extremely powerful combat abilities in a short period of time.

As for the weakness, it was that due to the limitations of the current technology, genetic warriors could go berserk at any time.

If he used too much genetic modification drug, it was even more likely that he would explode into a pile of meat paste on the spot.

Because the technology was not mature enough.

This kind of strengthening method probably only existed in the laboratory..

Chapter 159: Riot, Li Yueming, Waiting for an Opportunity to Act! 2

There was still some distance before they officially landed.

However, it could also be considered a means of becoming stronger that was recognized by the current mainstream public opinion.

Under such circumstances.

Before he fully matured, Li Yueming had already decided to be cautious and low-key.

However, for now.

The most important thing for him was to escape from Yunxiao Science and Technology Group's laboratory.

After all, if he didn't run, he would really become a pig that was fattened and waiting to be slaughtered.

Li Yueming didn't want to sit up in shock while he was dying. The clown had become him.

In the end, he would have to bear the consequences.

In the next half a month, Li Yueming continued to strengthen his physique.

At this time.

More and more researchers entered the laboratory.

They looked at Li Yueming more and more blatantly.

It was no different from the leek farmers looking at the green leeks in the leek field.

Under such circumstances.

For the first time, Li Yueming's physical strength exceeded the threshold set in the petri dish.

After receiving the data and documents.

The group of scientists in the special laboratory were puzzled.

“What happened? Why was 0731’s body rapidly becoming stronger?”

“Could it be a natural change caused by the gradual perfection of the genes?”

I don’t know. 0731 has absorbed 10 billion worth of nutrient fluids for half a year. That much nutrient fluid is enough to hatch a dinosaur. In the end, 0731’s physical characteristics are still normal and healthy... To be honest, I wouldn’t be surprised if anything happened to this super freak!”

“Should we change his cage? 0731’s physical strength alone was enough to break the glass cover of a petri dish!”

“A new round of experiments will begin in a few months. At that time, 0731 may be locked in a cage. There is no need to waste time and effort to change the petri dish. However, before starting a new round of experiments, that resistance supernatural being must be taken away. The security department has been getting bolder recently. Call Professor Cheng and report it!”

Outside the glass cover.

A group of researchers pointed at Li Yueming with their reports.

Because of the glass cover, Li Yueming couldn’t hear what they were saying.

However, Li Yueming was sneering in his heart.

These guys treated him like a pig in a slaughterhouse, but in reality, he was a ferocious and brutal Tyrannosaurus Rex.

The consequences of underestimating a Tyrannosaurus Rex...It was very serious!

The Star-moon Art was absorbing the remaining nutrients in Li Yueming’s body.

Due to the different rules of the world, Li Yueming still didn’t understand what extraordinary energy was.

Therefore, he could only strengthen his body through the Starmoon Mantra.

Now, he already had the physical strength to break free from the petri dish.

However, in a sci-fi world with all kinds of firearms...

His physical strength alone was obviously not enough for Li Yueming to escape with great fanfare.

Therefore, he had no choice.

Li Yueming was waiting for an opportunity to help him escape.

Just like that.

In the blink of an eye, Li Yueming was three years old.

The researchers in the special research room had already drawn blood from him three times in a row.

Clearly, his genes were gradually stabilizing.

It would not continue to transform.

One day.

Li Yueming once again saw the silver-haired scientist through the glass.

He knew that his good days were over.

After the silver-haired scientist left.

Many of the ordinary staff in the special laboratory were soon transferred away, replaced by more and more senior scientists in white coats.

Li Yueming was still patiently waiting for the right opportunity.

At this moment, he was like a fierce tiger lurking in the grass.

Waiting quietly for the prey to reveal a weakness, when the time comes to attack.

Finally, on this day.

Outside the special laboratory, a team of heavily armed soldiers appeared.

A few soldiers guarded the door outside the laboratory.

The remaining soldiers entered the laboratory and showed a document to the researchers.

The two sides negotiated for a while.

The researcher pointed at the soldier's nose and cursed.

About three minutes later.

The researchers opened the door to the cabin next to Li Yueming's where the red-haired girl was locked.

A few soldiers came over with a cart.

It was obvious that he was preparing to take the girl away from this special laboratory.

Li Yueming witnessed everything from the petri dish.

The 'opportunity' he had been waiting for had finally arrived.

Just as a few soldiers were about to push the red-haired girl away.

Suddenly.

A piercing alarm sounded in the laboratory.

The overwhelming red light stunned all the researchers.

The soldiers who had been extremely solemn in the laboratory a moment ago could not help but change their expressions when they heard the alarm.

The tall and strong 'soldier' in the lead cursed, "Those guys from the Green Sky

Security Department are really dogs. Brothers, plan B!”

He took off his heavy helmet, revealing a hideous bald head.

Hearing this.

The group of ‘soldiers’ turned their guns around.

He pointed at the confused researcher in the laboratory and shouted, “Idiots, raise your hands. Everyone, stand against the wall!”

Hearing this incomparably violent roar.

Then, he saw the muzzle of the black cloth in the other party’s hand.

Obviously.

No matter how slow the researcher was, he knew what was going on.

This group of people were not members of the security department at all, but a group of daring rebels!

She hurriedly stood up and raised her hands to leave the workbench.

Soon, among the group of soldiers.

A thin man inserted a mechanical device filled with ports into the port below the petri dish..

Chapter 160: Riot, Li Yueming, Waiting for an Opportunity to

After fiddling with it for a moment.

The cultivation of the red-haired girl next door was opened.

Li Yueming witnessed everything from the side.

Looking at the other party’s skilled movements.

From the moment the alarm went off to the moment they turned their guns to control all the researchers.

This group of ‘soldiers’ had a clear division of labor and lined up neatly. The entire process took less than a minute.

Compared to his identity as a soldier.

These guys were clearly a group of well-trained thugs.

In just a few breaths.

The group of thugs had already carried out the red-haired girl who was imprisoned in the petri dish.

During this process, one of the thugs took out a syringe from his backpack.

He removed the soft plastic pad and injected a blue potion of unknown composition into the red-haired girl’s neck.

About a minute later.

The red-haired woman woke up.

At this moment.

Even Li Yueming, who was in the petri dish, felt a hint of danger.

However, this aura came and went quickly.

However, it disappeared very quickly.

After the red-haired girl woke up, she immediately looked around.

She didn't need to ask. She only needed to glance at the mess around her to understand what had happened.

He forced himself to stand up and said, "Retreat quickly. My superpower is affected by the suppressors. I can't use it smoothly!"

Hearing this.

His expression instantly turned extremely ugly.

Originally, the most perfect plan A was to sneak into the laboratory and transport the red-haired girl away.

However, this plan had obviously failed completely with the sound of the alarm.

The second plan, Plan B, was to forcefully awaken the red-haired girl and use her powerful metal-type talent to kill a bloody path and escape as quickly as possible.

However, they never expected that the security department would have a hidden card up their sleeves.

He had been injecting the red-haired girl's body with the Extraordinary Suppressor.

Under such circumstances, Plan B could not be carried out.

The tall and strong bald militant cursed when he saw this. "Motherf\*cker, these bastards are actually playing dirty with me...Brothers, execute plan C!"

When he heard about Plan C.

The ugly expressions on the thugs' faces quickly calmed down.

The Cloud Sky Corporation was one of the six top technology companies in the Red Leaf Empire.

The success rate of rescuing someone in the headquarters of the Nightless City was so low that it was almost negligible.

Therefore, all the thugs were mentally prepared before they came here.

The sound of Yunxiao Technology's security department setting up weapons and equipment could already be heard outside the door.

Obviously, as long as he walked out of this room.

What awaited them would be overwhelming firepower.

The thugs began to execute Plan C in an orderly manner.

He gathered a group of researchers and prepared to use them as hostages to fight for the last chance of survival.

However, at this moment.

Not far away, the skinny man pointed at Li Yueming in the glass cover and said, "Boss, who is this little brat beside you? Why is he locked up with you?" Hearing this.

All the thugs, including the red-haired girl, looked at Li Yueming in the petri dish.

Outside the glass door.

The red-haired girl shook her head. "I don't have any impression of him. He probably wasn't captured with me!"

As the leader of the famous Resistance Army.

Although the girl in red was very young, she clearly knew many people.

However, even though she searched her entire mind, she still had no impression of Li Yueming.

The lean man beside him immediately said, "Then let him out. He's going to die here anyway!"

As he spoke, the skinny man pressed a button on the control panel.

In the next second.

There was only a puffing sound.

The glass door of Li Yueming's laboratory opened slightly.

Before the glass door opened completely...

A group of aggressive thugs rushed in.

They swarmed up and smashed Li Yueming's petri dish into pieces with their guns.

He felt the nutrient solution dripping all over the ground.

Li Yueming was speechless.

Finally, Li Yueming couldn't take it anymore.

She snatched the blue potion from the man's hand and stabbed it into the man's neck.

"Who are you?" Li Yueming opened his eyes and asked coldly. She heard his voice.

The man who was about to give him an injection trembled in fear.

In the next second.

When he realized that the needle that should have been on Li Yueming's body was actually stuck on his neck, he couldn't help but fly into a rage out of humiliation. "This silly kid, he's already awake and still pretending to be asleep?"

Regarding this.

Li Yueming didn't have any extra expression. He still said with a cold face, "Who are you? I don't want to ask a third time!"

He looked at the child in front of him.

For some reason.

The man who was injecting the needle felt a rare chill.

It seemed that as long as he dared to say another trash talk.

His head might very well be removed immediately.

Therefore, the man shrunk his neck and said, "We are the remnants of the Resistance Army in Mylta. You should have been captured by Yunxiao Company and brought here."

Li Yueming did not say anything else.

The Resistance sounded interesting.

Seeing him let go.

The man who was injecting the needle could not help but heave a sigh of relief. He gritted his teeth and said fiercely, "Silly boy, I'll deal with you later!" As he spoke.

He didn't continue to argue with Li Ming. He got up and led the team out of the cabin.

Gunshots were heard outside the laboratory.

If not for the fact that they could not use weapons of mass destruction.

At this moment, the group of thugs had probably gone to hell to meet the King of Hell.

At this moment.

Not many thugs paid attention to Li Yueming.

After all, no matter what, he was just a child.

Even though it was a little strange for Yunxiao Company to lock up a child in a prison cell.

However, at this critical moment of life and death, it was naturally impossible for him to have the mood to think so much.

In the laboratory.

As the core of the team, the muscular bald man said in a low voice, "Fifth

Brother, see if the hostage is useful!"

The thug who had been called took out a gun and detained a scientist in the laboratory.

However, she had just reached the door and did not have the time to speak.

The sound of gunfire could be heard.

The thug named Fifth and the detained scientist were instantly beaten into minced meat.

Seeing this scene, the resistance army's thugs did not collapse.

The other scientists who were detained broke down. They knelt on the ground and cried, “We’re not high enough to be your bargaining chips. Killing our security department will only compensate you with a sum of compensation.

Please let us go! ”

He said.

The group of scientists cried.

Not long after, everyone smelled a fishy smell.

For a group of researchers who spent their time in the laboratory.

This kind of scene was obviously too exciting.

He looked at the mottled bloodstains on the ground.

The muscular man’s eyes were red as he cursed angrily, “These bastards are really f \* cking evil. They actually killed their own people!” His plan C was to kidnap a few scientists as hostages.

He wanted to see if he could use this to find a chance of survival.

However, the ruthlessness and decisiveness of the Yunxiao Science and Technology Group’s security department were clearly beyond their imagination.

The other party did not care if it was their own people or the enemy. As long as they appeared, they would be covered in fire.

Under such circumstances.

All the resistance soldiers in the laboratory obviously had no chance of survival.

However, just as the atmosphere was silent.

Li Yueming, who had just finished stretching, suddenly said, ”“Do you want to

Hearing his words.

Everyone in the laboratory looked at him.

Li Yueming revealed a bright smile and can be your hostage, but you have to let the lunatics outside see me, not be beaten to pieces before you reach the door like before!”

The bald armed thug looked at Li Yueming, who was the size of a bean.

He couldn’t help but let out a sneer, “Little brat, you’re not even as high as your

Imees yet. You’re quite bold!””
