

Maxing MT 161

Chapter 161: Doctor, you don't want the Experimentals to be killed, do you?_1

Now, Li Yueming was only three years old.

Even though their growth was relatively rapid.

However, his body was still relatively weak.

His mortal body could not withstand the heavy firepower outside the door.

Therefore, he had no choice.

He needed the help of this group of thugs to escape from this dangerous laboratory.

However, when he said that he wanted to use her as a hostage..

Without a doubt.

He was immediately mocked mercilessly by the bald man.

The rest of the thugs around him also burst into laughter.

He gestured at Li Yueming and said, "Kid, you better hide well. Don't come out and act like a hero!"

It had to be said that this group of thugs who walked on the edge of death every day were really big-hearted.

He could still smile even at a time like this.

Li Yueming's face twitched.

Therefore, she felt helpless sometimes. He was clearly speaking in a serious manner.

However, his overly immature appearance always made others think that he was 'joking' or 'trying to be a hero'!

Fortunately, there were only this group of rebels in the special laboratory.

There were also seven or eight scientists who were preparing to do research.

After hearing him speak.

A few scientists who were crying beside him suddenly woke up from their dreams. They looked up as if they had found a life-saving straw and hurriedly said, "Yes, yes, yes. 0731 is the most qualified experimental subject for the 'Perfect Gene' project so far. Using him as a hostage should be enough to make the security department wary!"

In order to survive.

This group of scientists dared to say anything.

The group of thugs who were still laughing stopped when they heard that.

The way he looked at Li Yueming changed.

Good heavens.

At first, they thought that Li Yueming was just an innocent young man who was locked up here. However, he did not expect that this harmless young man in front of him was actually a perfect experimental subject nurtured by the Yunxiao Group?

After a while.

The bald man came back to his senses and sized up Li Yueming.

A moment later, he said in disbelief, ""Really?"

Without waiting for Li Yueming's reply.

The group of scientists began to nod.

Perhaps he was afraid that the bald man could not hear him clearly, he did not forget to repeat, "0731 is the perfect test subject that Professor Cheng is paying attention to. His life alone is worth a hundred of ours. If we can take him hostage, maybe the security department will be cautious!"

The bald man was still skeptical.

But beside him.

The red-haired girl, who had been silent all this while, had already reacted before everyone else.

She walked straight to Li Yueming with her long legs.

"I can use my ability to stop their guns from firing. Aren't you afraid of death?" Are you sure you want to be a hostage?"

As an Extraordinary.

Although the red-haired girl's strength was suppressed by the Transcendent Supporter, she was still a talented person.

Possesses the power to control metal.

Therefore, if the metal weapons outside were only to be silenced for a moment, it would be impossible for them to be killed.

The red-haired girl gritted her teeth.

"As long as I don't get beaten to death the moment I step out of the door." Li Yueming smiled, revealing a mouthful of white teeth as he continued, ""As for my safety, you don't have to worry about it. Even if I blast you into dregs, they will definitely not hurt a single hair on my head!"

He could not be blamed for being so confident.

In the past three years, Professor Cheng had spent a lot of money to fatten him up.

Let's not talk about anything else.

Just the nutrient solution alone cost Li Yueming 10 to 20 billion yuan.

He had spent two to three years of hard work, effort, and capital to nourish the plants.

Now, he was preparing to harvest the fruit for the next experiment.

Under such circumstances, if Li Yueming was beaten to death by the Garrison Guard...

Dr. Cheng's blood pressure probably soared by a few hundred on the spot.

Therefore, he had no choice.

Li Yueming's confidence was not so much that he believed in himself.

It would be better to say that she trusted Dr. Cheng.

After all, this professor, you don't want your Experimentals to be killed, right?

He didn't know why Li Yueming was so confident.

However, it was obvious that there was no other way now. The rebels could only try their luck.

After a brief discussion, they came up with a plan.

The group of people did not waste any more time.

After all, this was the headquarters of the Cloud Sky Corporation.

Chaos ensued.

They would not have more than 20 minutes to escape.

Once it was over twenty minutes.

The extraordinary human team of the Cloud Sky Corporation rushed over.

Even if the Resistance Army held Li Yueming hostage, it would be useless.

In front of high-level Extraordinaires, the thugs who did not carry mechanical equipment were almost powerless to fight back.

The muscular man held Li Yueming hostage.

Behind him, the red-haired girl also had a serious expression on her face.

When the group of people approached the laboratory door.

The red-haired girl waved her hand.

Suddenly, Li Yueming felt an invisible energy emerge from the girl behind him.

This energy was similar to spiritual energy.

However, there was also a mysterious and magical charm mixed within.

Li Yueming was shocked.

In the next second.

The gunshots that should have sounded outside the door instantly went silent.

Was this part of the power of this world?

It didn't seem that scientific!

However, at this moment.

Obviously, Li Yueming didn't have the time to think about such nonsense.

If the other party really did not recognize his family and shot him.

Li Yueming would not hesitate to abandon this group of thugs in order to protect himself.

When the group of rebel thugs walked out of the laboratory's door..

Chapter 162: Doctor, you don't want the Experimentals to be killed, do you?_2

Only then did he realize that there were already 300 to 400 members of the Yunxiao Group's security department gathered outside.

More than a dozen of them were armed with large-caliber sniper rifles.

Of course.

Most of the members were carrying small portable weapons.

After discovering that the metal weapon had misfired, the team leader of the security department, who was already prepared, quickly waved his hand.

In the blink of an eye, a batch of non-metallic weapons were carried up.

It was obvious that the security team leader had a good understanding of the red-haired girl's special ability.

The new firearms were all made of non-metallic synthetic materials. The red-haired girl who controlled the metal would definitely not be able to affect this batch of weapons.

However, just as he was about to give the order to open fire.

Dr. Cheng, who had already rushed over after hearing the news, saw Li Yueming being held hostage in front of him.

He looked at the innocent-looking Experimentals.

Professor Cheng's eyes turned red.

Damn it.

He had been looking forward to it for half a year. He was prepared to extract the perfect gene from Li Yueming's body for experiments in the next few days!

The cooked duck was almost ready to be served.

Unexpectedly, such a thing happened in the laboratory.

For a moment.

Dr. Cheng felt his blood surge.

Looking at the bunch of idiots in the security department who were ready to shoot, his anger had already risen to the red temperature.

He was only one step away from a complete explosion.

With red eyes, Dr. Cheng stepped on the security team leader.

Because his blood pressure was too high.

Professor Cheng accidentally used too much strength.

Instantly.

The head of the security team leader exploded like a watermelon.

Red, white, and yellow were scattered all over the ground.

“Everyone, put down your guns!!” Professor Cheng scanned the surroundings, and his voice seemed to come from the netherworld. “Should I ask your security department to transfer that damned aptitude user away? Do you think my words are nonsense? If anything happens to Experimental 0731, just wait to become my next batch of experimental subjects!” Hearing this.

Instantly, the entire security department slowed down.

Professor Cheng’s position in the laboratory was very stable. He was the main person in charge of several top scientific and technological projects.

The reason why she pretended to obey his words was because she was secretly going against it.

It was also a factional struggle between the higher-ups of the security department.

And now.

The small fries in the security department looked down at their captain, who was still twitching under Professor Cheng’s feet.

Then, he looked at Professor Cheng, whose eyes were red and his hair stood on end.

After hesitating for a while, they all wisely chose to follow the heart.

In this strange silence.

A group of rebels were shocked to find out that the brutal security department had really gone silent!

His confidence was instantly boosted.

The bald man carefully poked half of his head out from behind Li Yueming and said, “Hurry up and get us a spaceship, or I’ll kill him!”

At this moment.

The thugs were like bank robbers in movies.

He took Li Yueming as a hostage and prepared to escape.

On the other side.

Dr. Cheng took two deep breaths.

He finally calmed down.

He turned around and said to a small leader of the security department beside him, “Get them a spaceship!”

The leader of the security department opened his mouth and retorted timidly, "Doctor, this isn't good..." However...

He hadn't even finished his last word.

Professor Cheng, whose eyes were bloodshot from killing, had already stomped his head on the ground.

Immediately, the originally white laboratory bloomed with a touch of red.

After finishing all of this.

Dr. Cheng's face was so cold that it made one's heart skip a beat.

He continued to look at the next leader of the security department and said calmly, "Do you want me to repeat myself?"

She could feel the bone-piercing killing intent in his eyes.

The leader of the security department was so scared that he almost peed his pants.

"Doctor, I'll arrange it immediately! ""

About ten minutes later.

The members of the Rebel Squad held Li Yueming hostage and entered the spaceship.

The lean man took out the small equipment in the box and examined it.

After confirming that there were no time bombs or satellite positioning systems on the spaceship, he was shocked.

Only then did he activate cruising mode and fly out of Nightless City.

The entire process was extremely smooth.

It was so smooth that it made the thugs doubt their lives.

Looking at the huge city that was gradually disappearing into the distance, the bald man said in disbelief, "This is the headquarters of the Cloud Sky Group.

How can we get out so easily?"

The surrounding thugs came back to their senses.

Their faces could not help but reveal an excited expression.

Seeing this situation.

Li Yueming couldn't help but open his mouth to remind them, "I think it's too early for you guys to be happy!"

His words were like a bucket of cold water.

In an instant, all the thugs in the resistance team were brought back to reality.

In fact, it wasn't as if the Resistance didn't know their current situation.

The Cloud Sky Corporation would never let them leave so easily.

The reason why he didn't make a move just now was because he wasn't confident that he could eliminate them without hurting Li Yueming.

It was imaginable.

The pursuers sent by Cloud Sky City would be extremely terrifying.

But no matter what, to be able to snatch people from the Cloud Sky Corporation headquarters and escape unscathed.

It was something worth bragging about.

Not far away.

The red-haired girl with a pale face looked at Li Yueming and said, ""Who exactly are you?"

Li Yueming thought about it.

He replied casually, "It's just an ordinary experimental subject.." Well, if there's anything special about it, it might be that I'm especially expensive?!"

Chapter 163: Doctor, you don't want the Experimentals to be killed, do you?_3

The red-haired girl clearly didn't believe him.

She stared at him for a long time.

In the end, he stood up and handed a rusty brooch to Li Yueming. ""My name is

Sun Ruo. No matter who you are, you will be a friend of the Resistance in Mylta! Of course...If you don't mind that this friend is only left with a dozen defeated soldiers!"

Li Yueming glanced at the brooch and hesitated for a moment before accepting it.

In this life, he could be considered to have been killed by a lone star.

She was born in a test tube. Her father didn't love her.

A pure orphan.

Because of this, he knew nothing about the outside world.

Under such circumstances, having a few more friends was not a bad thing. At least it would allow him to integrate into this world faster and not have to spend a huge amount of time exploring alone.

In addition, through the observation just now.

This group of rebel thugs liked to meddle in other people's business, and their nerves were occasionally too thick.

In general, he was not a heartless person.

Therefore, Li Yueming naturally had no reason to refuse.

After receiving the brooch.

Li Yueming rubbed his fingers and asked the first question, ""Are you an aptitude user who has been injected with an evolutionary drug?"

Sun Ruo was stunned.

It was only after a moment that he remembered that Li Yueming seemed to be Yunxiao Company's experimental subject.

He had to undergo all kinds of inhumane experiments since he was young. He should have lived a miserable life, right?

Thinking of this...

She replied softly, "How can a group of low-level reptiles like us inject the evolutionary drug into the night?" That thing could be sold for millions on the black market! "

Hearing this.

Li Yueming thought for a moment and said, "So you are a self-awakened person?"

Sun Ruo nodded. "Yes, my luck is quite good. Not only did I comprehend extraordinary power, but I also awakened a talent for controlling metal!

At this point.

Sun Ruo's expression was a little gloomy, as if she was very conflicted with the relevant memories.

However, after a moment of silence, she continued, "You're asking this because you want to become an Extraordinary, right? However, the situation in which I comprehended extraordinary power is rather special. It might not be of any use to you..

Obviously, she had misunderstood Li Yueming's meaning.

She thought that Li Yueming asked this because he wanted to become a supernatural being like her.

Li Yueming didn't deny it.

After all, in a sense, he did have this idea.

"When I was ten years old, I saw my parents being dismembered by Yunxiao Technology Group because they couldn't pay off the high loan. My six-year-old sister was also captured by Yunxiao Company as an experimental subject. After hiding in a cabinet and escaping the disaster, my emotions were greatly stimulated, and I awakened my superpower..." Hearing this.

Li Yueming instantly felt his scalp go numb.

A sense of déjà vu resurrected from the memories of many years of death and attacked him.

Good heavens.

At the beginning, he sacrificed his parents to obtain the ability.

This kind of melodramatic scene had long been written by various anime and online novels, right?!

So you're also the chosen one?

Li Yueming closed his eyes and sensed for a moment.

He did not feel the aura of the chosen one from this young girl in front of him.

Of course, his intuition might not be 100% accurate.

Therefore, he could not completely rule out the possibility that the voting girl was the chosen one.

Thinking about how he did not have any parents to sacrifice in this life, it seemed that the process of the girl's awakening of supernatural powers was really not a reference.

Fortunately, Li Yueming didn't hold much hope for this.

"Where are we going now?" she asked after a sigh."

Hearing this.

The expressions of the Resistance Army members in the spaceship instantly turned solemn.

Sun Ruo glanced at the bald man.

Although she was the boss of this group, she was still the leader.

However, this bald man named Wang Ye was clearly the actual decision-maker.

After all, Sun Ruo didn't even look like an adult.

No matter how high her individual combat strength was, it could not make up for her lack of combat experience.

"We've caused so much trouble at the Cloud Sky Corporation. We definitely can't stay in the surrounding cities that are under the management of the Cloud Sky Corporation. It'll even be dangerous if we stay in the Red Leaf Empire! "The bald man touched his butt and took out a crumpled map from his pocket. "The only way to get rid of the pursuers is to cross the East Peak Mountain and enter the territory of the East Peak Empire!"

He gestured with his finger on the map.

Li Yueming followed the curve of his finger and glanced at the crumpled map.

After measuring the distance in a straight line.

Li Yueming Ming said, "It seems a little far. Why do I feel like you'll all die on the road?"

"Now that we're all in the same boat, can't you say something nice? Can you live if we die?"The bald man's face darkened when he heard that. He grumbled a few times before continuing, "If we escape together, we will definitely be wiped out. Our only hope is to escape separately!"

After hearing this, Li Yueming did not say anything else.

The escape route described by the bald man was obviously not that simple.

Just as he said.

There was absolutely no hope of survival if they gathered together. Only by spreading out would there be a chance of survival.

However, for Li Yueming, as long as he escaped from the laboratory in Nightless City, he would be able to do whatever he wanted.

The pursuit and whatnot was nothing more than a matter of soldiers blocking water with earth.

Furthermore, Professor Cheng clearly only cared about this priceless perfect experimental subject.

As long as he was capable enough.

The chances of the other members escaping should be greatly increased.

Just as the resistance team was still making plans in the spaceship.

Not far away, the man controlling the spaceship suddenly said, "Boss, our spaceship has been tampered with. We only have enough fuel for another 300 kilometers!"

Hearing this.

Everyone on the ship felt their hearts sink to rock bottom.

Wang Ye put the map into his pocket and said, "Set the spacecraft to automatic flight mode and start parachuting immediately!"

The vehicle could still travel 300 kilometers.

But at this time, as long as there was a person with a normal brain, they would know that they had to jump out before the spaceship's fuel was exhausted.

Otherwise, it would be too easy for the pursuers of the Cloud Sky Group to find them.

After explaining many things to take note of, people began to parachute out of the spaceship one after another.

Wang Ye patted Li Yueming's shoulder and said, "Little wimp, you have a sharp tongue. I hope I can see you again in the future!" As he spoke, he jumped down from the spaceship.

At this moment.

There were only a few members of the Resistance left on the spaceship.

Li Yueming was still young.

He was originally arranged to share a parachute with Sun Ruo.

Sun Ruo protected him as he landed.

However, it was obvious that Li Yueming was not too interested in this.

Looking at Sun Ruo who was not far away, he casually said, "You just need to run. The pursuers won't find you. I promise!"

As he spoke.

He grabbed a parachute.

He jumped down from the spaceship.

Chapter 164: A Thousand Miles of Exile, Extreme Pursuit?1

In the Nightless City in the clouds.

He looked at the group of thugs who swaggered away in the spaceship. Dr. Cheng's face was so dark that water was about to drip out.

He started the Perfect Gene Project under the guise of researching the life-prolonging drug for Ye Tianzi, and Li Yueming was the most perfect mutation experiment in the ten years since the project started.

On this basis.

He silently followed and observed for another three years.

Just the nutrient solution to nurture Li Yueming had cost more than 10 billion yuan.

He had invested countless other efforts.

If he could extract the perfect gene from Li Yueming and put it into research, he would be able to obtain the perfect gene.

Then, many of his key projects might be able to reach a higher level because of this.

In fact, if he could inject this mutated 'perfect gene' back into the bloodline container...

He might be able to step onto that supreme throne.

This was obviously something so important to him.

But in order not to give himself away.

He didn't even dare to show that he was paying too much attention to Li Yueming.

However, the plan that was originally thought to be foolproof was taken away by someone with a gun when it was about to ripen.

At this moment.

One could imagine the anger and irritability in Professor Cheng's heart.

He turned around and glanced at the members of the security department who were trembling like quails.

If it was possible, he would have turned all these damn idiots into experimental subjects.

Only by torturing him would he be able to vent his anger.

If it wasn't for those bastards from the security department locking that damned leader of the resistance in the laboratory...

How could such a humiliating thing happen in the end?

He took a deep breath and calmed down.

After thinking for a moment, Professor Cheng still chose to take out the satellite encrypted phone and dialed a string of numbers.

If it wasn't a last resort, he would definitely not be willing to provoke that existence.

But now, they wanted to mobilize their forces to capture Li Yueming.

He could not avoid that existence at all.

After all, no matter how powerful he was in the laboratory.

However, he was just a doctor after all. He didn't have much power after leaving the laboratory.

He still had to ask for help from that existence to support him in order to mobilize the troops.

After the call connected.

Professor Cheng suppressed the fear and uneasiness in his heart.

As far as possible, it was simple and concise: "Lord Ye Tianzi, 0731 was kidnapped by several armed thugs. It happened so suddenly, those bastards from the security department."

He was only halfway through his sentence.

However, a hoarse and cold voice interrupted him on the other end of the phone.

Ye Tianzi slowly opened his mouth and said, "The head of the security department has just been executed. I allow you to mobilize a small team of monitors and two large teams of security department to hunt down the hostage Experimentals. Within three days, you must capture the Experimentals!"

Professor Cheng's face was very cold.

The voice on the other end of the phone did not show much emotional fluctuation.

However, it was not the first time that Professor Cheng had dealt with that person.

He knew that the other party was probably very angry now.

Otherwise, he wouldn't have ordered the death of the head of the security department.

Although the security department was not the core department of Yunxiao Technology Group, the head of the security department was still quite powerful.

Executing a minister was already a huge blow.

He didn't hesitate to say anything.

"Alright, I'll definitely complete the task!" Professor Cheng nodded. "After hanging up, Professor Cheng took a deep breath.

Whether it was for himself, for the company's honor, or for the highly concerned Ye Tianzi.

He had to capture Li Yueming as soon as possible.

In addition, they also had to burn the bones of the resistance army who dared to provoke the Cloud Sky Group.

The head of the security department was dead.

If he didn't complete Ye Tianzi's order, would he be the next to die?

In the past, Professor Cheng would not have been worried about this at all. After all, he was the core scientific and technological personnel in charge of the production and research and development of many projects of Yunxiao Science and Technology Group.

It was completely the same concept as those consumables that could be replaced at any time.

But now, he didn't dare to take the risk.

An hour later.

Nearly a thousand assault helicopters and more than a hundred spaceships took off from the sky above Nightless City.

The commotion wasn't too big.

However, the person who gave the order was not from the War Department.

The fugitives that were being pursued were only a dozen thugs and a supernatural being.

They could mobilize such a large number of armed forces in just an hour.

The strength of Yunxiao Science and Technology Group was evident.

To be on the safe side.

Professor Cheng didn't just send out the superhumans from the inspector team.

He even sent out a few of the more stable freaks he had created over the years.

One could imagine how much importance he placed on the pursuit of Li

Yueming.

If not for the fact that he was afraid of attracting attention.

He probably couldn't wait to go down and personally chase after them.

Mottled light scattered from the clouds, and the wind brought with it traces of desolation.

Clouds rolled and dispersed, and the clouds and mist dissipated.

In the deep, glass-like sky, three abnormally bright giant planets appeared.

A light similar to the moonlight shone on the ground.

His line of sight stretched.

More clearly defined asteroid branches flickered with their own brilliance in the sky.

This was the true appearance of planet 3- 1741.

From afar, it was as beautiful as a painting...

However, Li Yueming, who was in the middle of it, was not in the mood to enjoy the beautiful scenery that he had never seen before on the planet he had reincarnated into..

Chapter 165: A Thousand Miles of Exile, Extreme Pursuit? 2

Because he was very lucky, his parachute was caught on a tree branch when it landed.

Alright then.

It might not be accurate to call it a branch.

To be precise, the parachute was hanging in a pile of garbage.

He felt the stench that rushed straight to his face.

No matter how shocking the scene in the sky was, Li Yueming couldn't feel the slightest poetic feeling.

He did not know if the heavens were messing with him.

In any case, he always felt that someone was messing with his mentality when he came to this world.

He covered his nose and fell to the ground.

He looked around.

Lights could be seen flickering about ten kilometers away.

He should be in a garbage collection station in some city.

However, this planet's technology was already so advanced. Why was the garbage still piled up in such a mess? Li Yueming threw the parachute into the trash.

Speaking of which...

Strictly speaking, landing here wasn't a bad thing for him.

At the very least, it prevented the possibility of being tracked by smell.

Just as he was about to leave for the city more than ten kilometers away, Li Yueming discovered another figure appearing on the garbage dump.

Under the illumination of the giant round moon.

The red-haired girl's slender and thin figure was set off, making her seem exceptionally detached and independent.

Of course.

No matter how beautiful things were, as long as they were related to a large pile of smelly garbage, they would appear more nondescript.

Looking at Sun Ruo on the garbage heap, Li Yueming asked in confusion, "Why are you following me?"

Sun Ruo rolled her eyes at him and covered her mouth and nose. "How old are you and you dare to parachute on your own? Aren't you afraid of falling into meat paste?"

Li Yueming was speechless.

Although most of his reincarnation memories were sealed in the depths of his mind by the reincarnation mark, it was difficult for him to pretend to be an old monster who had lived for hundreds or thousands of years. However, in reality, based on his limited memories.

Li Yueming wasn't young anymore.

However, there was no way to reason about this matter.

After all, whether it was his appearance or his body, he was no different from a five or six-year-old child.

Sun Ruo quickly jumped down from the garbage heap.

He walked to Li Yueming's side and took out a map from his pocket. "While we still have time, let's quickly formulate an escape route!"

Li Yueming was obviously not interested in this.

He glanced at the map and said, "First of all, I'm not on the same side as you. Secondly, I'm the main target of the Cloud Sky Group. If you don't want to be captured and dissected for research, you'd better stay away from me."

Sun Ruo sized up Li Yueming.

There was no more talk about the escape route.

Instead, he suddenly opened his mouth and asked, "The intersection between us is limited. Why are you doing this?"

"I don't understand what you're saying!" Li Yueming shook his head.

Sun Ruo ignored his coldness and continued, "If my estimation is correct, this is the garbage dump outside N City, less than 5,000 kilometers away from the headquarters of the Cloud Sky Corporation!"

Li Yueming didn't say anything and quietly waited for her to continue.

Sun Ruo was extremely calm at this moment.

She first placed her finger on N City's location on the map, then pointed at the East Peak Empire that Wang Ye had decided to escape to.

After measuring the distance, he said, "If we want to go from N City to the East Peak Empire, our team will have to travel at least 3,000 kilometers on foot... If no one stayed behind to bring up the rear, there was no doubt that no one would survive!"

Li Yueming finally understood what she meant.

"So you think I'm a Bodhisattva in the flesh, fighting for your chance to live?"

Sun Ruo's expression was still normal as she said indifferently, "Although I don't want to believe it, your actions have revealed this meaning!"

Li Yueming sized up Sun Ruo.

This girl was pretty and had a good figure. No matter how he looked at her, she didn't look like an ordinary girl!

Who gave you the courage? Liang Jingru?

Li Yueming thought for a long time, but he didn't know how to answer.

Finally, he said, "Is there a possibility..." Is it because I think you guys are too troublesome?"

Sun Ruo shook her head.

Obviously, Li Yueming's current identity as a cute four-year-old boy was not convincing enough.

Seeing this situation.

Li Yueming could only sigh, "Forget it, think whatever you want!"

me cuun•c waste any more worus wun bun Kuo.

He found an abandoned road full of potholes and walked towards the city on the other side of the skyline.

Sun Ruo turned around and glanced at the pile of smelly garbage.

He could not help but look a little dazed.

In fact, when Sun Ruo first saw Li Yueming in the petri dish, for some reason, she thought of her sister who had been separated many years ago.

At first, she thought it was an illusion.

Now, after looking at Li Yueming for a long time, she realized that Li Yueming's appearance was strangely similar to her sister's.

This made her even more absent-minded.

Once again, I repeatedly compared them with my own.

Sun Ruo felt that Li Ming was very different from the figure in her memory.

So what was this vague sense of similarity? Could it be that she was imagining things?

He shook his head.

He threw away the messy thoughts in his mind.

No matter what, she had already secretly decided to advance and retreat with Li Yueming.

He came back to his senses.

Sun Ruo waved his hand and took out a steel pipe from the pile of trash.

He followed behind Li Yueming and walked towards the city in the distance.

About two hours later.

Thirty kilometers away in the sky, a helicopter was rumbling in the night sky.

Thousands of propellers kicked up a cloud of dust on the ground.

A group of fully armed soldiers jumped off the plane.

They brought along infrared night vision devices, genetic search dogs, and all sorts of sophisticated and complicated advanced equipment.

Just search for a few hours.

The armed forces found two parachutes from the stinking garbage dump.

The soldier respectfully turned on the walkie-talkie and said, "Doctor, we have found traces of 0731. There are a total of two parachutes. The other members of the Resistance seem to have scattered and fled!"

On the other end, Professor Cheng's dull voice came through. "Don't worry about the others for the time being. Find 0731 first. Remember, don't hurt him!"

After the communication was completed, the communication was temporarily cut off.

A group of armed forces members scanned the area with infrared drones and found a large number of emaciated beggars lying in the garbage dump.

The well-trained soldiers chased the beggars out of the garbage dump.

The person in charge of the search operation stepped on a beggar's chest and asked coldly, "I'll give you one chance. Where did the two guys who landed just now go?"

Chapter 166: N City, Apprentice of the Bio Repair Shop! 1

It was past three in the morning.

On the broken road outside N City, a few large trucks were driving along with dust.

In the driver's seat.

The truck driver yawned and narrowed his eyes.

If it weren't for the potholes on the road and the shaking of the truck, it was hard not to wonder if he would fall asleep in the next second.

The truck was loaded with some mechanical parts of the artificial body. It was pulled from Cloud Sky City all the way to N City and sent to private artificial body modification shops of all sizes.

Although it was very tiring to run long distances.

However, the cloud leaf coins he earned from this trip were still quite generous.

At the very least, it would be enough for them to find a bar and order a few drinking girls to have a good time for a few days.

The journey was bumpy.

About two hours later.

The outline of N City was finally in sight.

The truck driver washed his face with cold water.

After confirming that he had regained consciousness.

Only then did he realize that there was a long queue of trucks waiting to enter the city.

The rumbling sound of the truck starting was very ear-piercing.

Upon hearing the sound, the few mercenaries sent by the owner of the goods in the passenger seat woke up from their sleep. They subconsciously picked up the old 625 automatic rifle in their hands and said in a daze, "What happened?"

The chauffeur looked at their tired expressions.

A trace of disdain rose in his heart.

This group of mercenaries didn't know how to sit or stand properly. In fact, they were a mob.

Just because he had a few mechanical organs installed on his body and followed a capable boss, he had turned into a so-called mercenary.

He could earn more money by taking a long trip than an ordinary driver like him.

However, although he was quite disdainful of them in his heart, the driver did not dare to show it on his face.

He stuck his head out and looked around for a moment.

After seeing the situation at the end of the road, the driver said with a strange expression, "Strange, strange, the city defense troops actually ran out of the city to search at this time... What happened?"

There was a long line of trucks waiting for inspection outside the city.

Most of the items on it were supplies for the city.

Originally, they only needed to pay the entrance fee to enter the city and the truck could enter without any obstruction.

However, for some unknown reason, the City Defense Army had gathered here and were searching the trucks entering the city one by one.

In the beginning, there were more sensible drivers who got out of the car to give the City Defense Army some money.

However, the City Defense Army, which used to be corrupt, seemed to have changed completely today.

Not only did he not eat and take the card.

He even beat up the driver who had given him the oil.

Seeing this situation, the truck driver shrank his neck and whispered to the mercenary beside him, "Something big has definitely happened!"

The mercenary was still half asleep.

He was very open-minded about this. He waved his hand and said, "Who cares? As long as it doesn't affect us!"

About ten minutes later.

The truck driver and a group of mercenaries were called down to stand in a row.

Some soldiers checked their identity documents and genetic information.

He even led a special breed of dog to sniff around them.

After confirming that there were no problems.

Soldiers armed with guns opened the trunk of the truck and took out infrared detectors and life detectors to scan it.

He didn't find any problems.

Then, he did not forget to turn on the flashlight and bent down to scan the truck.

After checking everything inside and out.

The truck was finally allowed to pass.

After entering the city, the bumps were no longer violent.

The truck drove along the main road of N City for half an hour before stopping at the entrance of a repair shop.

A few minutes later, five or six youths in their twenties walked out of the repair shop.

They started moving the goods.

When moving one of the oil barrels, a yellow-haired young man tried his best but failed.

“What the hell is this? Why did it feel like the oil barrel was much heavier than the last time?”

Hearing this, a young man beside him laughed and said, “Dongzi, I told you not to lie on a woman's stomach at night. Are your legs weak now?”

Hearing the other party's mockery.

The yellow-haired youth instantly exploded and cursed, “F * ck, try it yourself and see if you've become heavier.”

He cursed for a long time.

In the end, the blonde-haired young man gritted his teeth and moved the oil drum into the warehouse.

However...

He hugged the oil barrel for a long time and couldn't move. This situation still attracted the attention of his companions around him.

He was flustered and exasperated.

The yellow-haired guy placed the oil barrel back into the warehouse.

He also found a crowbar to see how many liters of engine oil were inside.

However, when he pried open the lid of the oil barrel.

A horrifying scene appeared.

He saw two pairs of cold eyes staring at him from the oil barrel.

Just as he was about to retreat and shout, the dark woman in the oil barrel took out a steel pipe and placed it on his neck.

Sun Ruo's movements were very fast. She put a finger on her lips and made a silent gesture.

The yellow-haired youth named Dong Zi instantly felt a dense killing intent.

It seemed that if he dared to make any unnecessary movements, the other party would smash his head with the steel pipe without hesitation.

Under such circumstances.

Dong Zi quickly understood his situation.

Beside him, a young man seemed to have noticed his abnormality.

“What’s wrong, Huang Xundong? Don’t tell me you’ve really been squeezed by a woman until you can’t even lift an oil barrel?”

Dong Zi maintained his composure and replied, “What, I’m tired, can’t I rest for a while?”

Chapter 167: N City, Apprentice of the Bio Repair Shop! 2

Hearing his reply.

The young man cursed and left the warehouse to continue unloading the goods.

He looked at the two people in the oil barrel.

Dong Zi shrunk his neck and whispered, “You guys came from outside the city, right?” Don’t worry, I won’t expose you. Let’s talk things out!”

The so-called illegal immigration rule.

It referred to scavengers who lived outside the city without a household register and were unable to pay the entrance fee.

The consequences of sneaking into the city and being caught by the law-enforcement officers were extremely serious.

If it was light, he would be put into the death assembly line for three to five years.

At worst, he would be killed on the spot.

Therefore, he had no choice.

When he saw Li Yueming and Sun Ruo hiding in the oil barrel, Huang Xundong subconsciously thought that they were stowaways.

Hearing his words.

Sun Ruo did not explain his identity, but he still did not restrain his killing intent.

The steel pipe was unceremoniously placed on Huang Xundong’s neck, emitting a bone-piercing chill.

“I’ll ask you a question and you answer it. If you dare to play tricks, I’ll make sure your head falls off!” Seeing that Huang Xundong did not resist, Sun Ruo asked, “Who are you? What is the place?”

Huang Xundong was so scared that he almost peed his pants as he felt the chill on his neck getting colder and colder.

Naturally, he did not dare to hold back at all. He opened his mouth like a bamboo tube and said, "My name is Huang Xundong, an apprentice. This is a private repair shop in the slums of N City's west! In addition, I'm actually a stowaway like you, so you really don't have to be so nervous!" Hearing this.

Sun Ruo subconsciously turned to look at Li Yueming.

Li Yueming nodded at her.

Only then did Sun Ruo slightly restrain his killing intent.

"Let me finish!" After feeling the killing intent weaken, Huang Xundong raised his head and glanced at the two people in the oil barrel. He struck while the iron was hot and said, "We are all stowaways, so we can help each other. After I finish unloading the goods, I can even introduce you to a job that doesn't require a household registration!"

After saying that, he saw that the two of them did not react.

Huang Xundong picked up the lid and slowly put it back on.

Huang Xundong heaved a sigh of relief when the oil barrel closed again.

She jogged away.

In the oil barrel.

Li Yueming and Sun Ruo looked at each other in silence.

Originally, according to Sun Ruo's estimation.

The two of them should have enough time to enter N City.

However, it was obvious that she had underestimated Yunxiao Group's sensitivity and Professor Cheng's determination to find Li Yueming.

The two of them had only walked less than half the distance.

The plane sent by the Cloud Sky Corporation had already roughly locked onto the location of the two people's parachute.

If it wasn't for the fact that their parachutes had fallen into the garbage dump, it would have been even more challenging to chase them down.

It was likely that the two of them would encounter the pursuers on their way to N City.

As expected, this group of people from the Cloud Sky Corporation's security department were really dogs.

Even if the two of them only revealed a slight flaw.

The other party might catch up with them.

Under such circumstances.

Li Yueming and Sun Ruo's plan to sneak into N City on foot naturally fell through.

Only then did he resort to climbing into the truck and entering the city.

Li Yueming would not be able to fight against firearms with just his physical strength.

He wanted to escape this inescapable net that was constantly tightening.

The two of them had to be careful not to reveal any flaws.

After a moment of silence.

“Are we just going to wait?” Sun Ruocai asked. Aren’t you afraid that he’ll call someone over?”

Li Yueming used his talent to deduce.

After confirming that there were no problems, he said calmly, “Don’t be afraid.

Just wait! ”“

Although he couldn’t understand why Li Yueming was so calm from the beginning to the end.

However, Sun Ruo ultimately chose to believe his judgment.

After all, he was a little boy who looked like he was only five or six years old.

It wasn’t the first time Li Yueming had surprised and confused her.

He looked at the pitch-black Li Yueming in the oil barrel.

Sun Ruo thought for a moment and asked, “When you entered the city just now, how did you avoid the abandoned inspection?

The infrared detector and life detector were extremely sensitive to heat and life.

Although they stayed in the oil barrel.

However, as long as his heart was still beating and his body was still emitting heat...

Logically speaking, it should have been detected by these two instruments.

The reason why Sun Ruo could avoid it was because she was a supernatural being. She could adjust her body’s condition through supernatural energy.

However, Li Yueming should only be an ordinary person without any extraordinary power.

He could actually control his body temperature and heartbeat to hide from the scanning of the instrument.

This was very illogical.

Therefore, he had no choice.

In fact, Sun Ruo had already wanted to ask when they were halfway there.

It was just that he had never found the opportunity.

Regarding this.

Li Yueming explained casually, “You must know that the constitution of humans is different. When I am extremely angry, I can produce extreme anger energy. Not only can I pretend to be dead, but I can also really die...”

Hearing this, Sun Ruo seemed to understand.

However, when she saw Li Yueming's cold face, she nodded and said, "I see. No wonder the Yunxiao Group wanted to use you as an experimental subject for research!"

He saw that she really believed him.

Li Yueming didn't know what to say.

Sometimes, this girl seemed to be quite smart, but sometimes, she seemed to be so stupid that she was a little cute!

Just as the two of them were discussing.

Finally, Huang Xundong, whose hair was dyed yellow, returned.

He carefully removed the lid of the oil barrel and said, "I'll take you to take a bath!"

Chapter 168: N City, Apprentice of the Bio Repair Shop!—3

Hearing this.

Only then did the two of them climb out of the oil barrel.

Looking at the mechanical parts on the ground, Li Yueming asked, "What are these for?"

Sun Ruo casually picked up a few parts.

After examining it for a moment, he said, "It should be some assembly and replacement parts!"

Seeing this situation.

Li Yueming also picked up a few mechanical parts that looked like arms.

After a few strokes, he felt that it was quite interesting.

If martial arts, technology, and supernatural powers were combined, what interesting things would happen?

However, it seemed a little far away to say that now.

Li Yueming shook his head.

He saw that the two of them seemed to be interested in the parts in the shop.

Huang Xundong could not help but remind him in a low voice, "These parts are all Old Lin's treasures. You can't take them. If one of them is missing, that old man will cause trouble!"

The two of them followed behind Huang Xundong for about half an hour.

Finally, they arrived at an old residential area.

The houses here were all very narrow and crowded.

He looked up.

Hundreds of houses were neatly arranged in a row, covering more than twenty floors.

The most ridiculous thing was that this was not even an elevator room.

The mottled walls, the broken neon lights missing a few corners, and the old posters hanging on the walls.

For a moment, Li Yueming thought that he had transmigrated to the past.

It seemed to be a product of two different eras from the Nightless City he had seen before.

This was an extremely strange feeling of being cut apart.

Without a doubt.

The west side of the city was Mylta's garbage dump.

They were in the chain level that the elites of the upper class looked down on the most.

Usually, there were all kinds of people from all walks of life.

However, for Li Yueming and Sun Ruo, these two wanted criminals, this place was a good place to stay.

After all, he wanted to escape the pursuit of the technology company.

It was definitely not possible to stay in an area filled with cameras and only AI.

Only the slums where there were few surveillance cameras could hide it.

Under Huang Xundong's lead.

The two of them went to his small room that was less than 30 square meters to take a shower.

When Li Yueming and Sun Ruo came out of the bathroom.

Huang Xundong's eyes widened.

Let's not talk about Li Yueming for now.

Sun Ruo, with her delicate face and delicate skin and delicate eyebrows, was definitely the most beautiful woman he had ever seen in his life.

However, Sun Ruo merely raised her eyebrows.

Huang Xundong immediately lowered his head.

After taking a shower, she ate some dry bread.

Li Yueming and Sun Ruo found a place to rest against the wall.

Huang Xundong did not stand on ceremony.

She lay on the bed and snored.

The next morning.

Li Yueming was the first to open his eyes.

He opened the only window in the house and looked down.

After not discovering anything he shouldn't have, he expressionlessly walked up to Sun Ruo and said, "Don't sleep anymore. Hurry up and get up!" Sun Ruo rubbed her eyes and turned on her phone after a while.

Li Yueming called Huang Xundong up and said, "You said you would find us jobs. What jobs?"

Huang Xundong was also a little confused.

After finally waking up and sizing up Li Yueming, Huang Xundong thought for a moment and said to Sun Ruo, "Is this your brother? I have a way to introduce him to the wealthy district in the east of the city. As far as I know, some rich women who can't produce love him very much..."

Li Yueming's face darkened.

Beside him, Sun Ruo covered her mouth and almost laughed out loud.

However, at this moment, Huang Xundong also looked at her.

After sizing up Sun Ruo, Huang Xu hesitated and said, "As for you... Uh, actually, I also know a faster way to get money..."

Hearing this.

Sun Ruo, who had been overjoyed just a moment ago, also turned black.

Seeing that the two of them did not look too good.

"You guys aren't proper wanderers, are you?" Huang Xundong asked seriously. In the slums, I can only find these few good ways for you!"

Seeing this.

Li Yueming stopped beating around the bush.

Huang Xundong's face revealed a stunned expression when he heard this.

In fact, when Li Yueming and Sun Ruo took a shower last night, he already knew that the other party was definitely not as simple as a stowaway.

After all, stowaways were usually sallow and skinny.

It was impossible for them to be as graceful as the two in front of them.

Therefore, he had no choice.

That was why he specifically said that he had two not-so-good options.

He wanted to take the opportunity to cut ties with Li Yueming.

But now.

Li Yueming actually said that he wanted to be an apprentice in the repair shop with him.

This surprised him greatly.

However, Old Lin was very picky when it came to accepting disciples.

Li Yueming's small arms and legs looked as if he had never suffered before.

It would probably be very difficult to pass.

When the time came, he would be able to get out of trouble after being rejected.

After considering the cause and effect, Huang Xundong nodded and said, "I can bring you to see Old Lin, but whether you can become an apprentice or not depends on yourself!"

Li Yueming naturally had no objections.

A few minutes later.

Li Yueming followed Huang Xundong back to the repair shop.

In order to prevent himself from being recognized, he had made some slight modifications to himself.

She had smeared her face and wore a tattered shirt that did not fit her.

Just like the refugees in the sewers of the previous two worlds, his face still carried the innocence and simplicity of a child.

The owner of the cosmetic repair shop was called Lin Xiao. He was a skinny old man in his sixties.

Because of his stinginess, he was often called Old Lin.

Li Yueming stood in front of Old Lin.

He found the old man lying on the rocking chair and watching the posters of beautiful women on the television.

He knocked on the door.

The old man immediately changed the TV station.

When he turned around and saw that it was Huang Dong, he immediately cursed, "Why are you only here at this time? What did you do? Don't even think about getting a single cent of today's salary!" He was scolded.

Huang Xundong did not dare to say anything.

After the old man was tired of scolding, Huang Xundong handed him a glass of water.

"Master, my friend wants me to help his brother find a job to make a living!" Following Huang Xundong's line of sight.

Only then did the old man notice the innocent Li Yueming behind him.

"Where did this beggar come from?" Do you think my repair shop is a shelter for beggars?"

Hearing this.

"Master, could you be so kind as to let him try?" Huang Xundong pleaded." The old man's eyes widened.

He flicked his sleeves and said," I'm not trying, I'm not trying. This is not a welfare home. Don't stuff all that junk into my place!"

Hearing the old man's complaints.

However, he was already prepared for this.

He turned around and gave Li Yueming a look, meaning that this was all he could do to help.

However...

Just as he was about to get up and leave with Li Yueming.

Li Yueming suddenly walked forward and picked up a few broken parts from the ground.

He quickly assembled the broken parts together.

Seeing this, the angry old man was stunned.

She took the component from his hand and studied it for a moment before saying, "Interesting..."

After a while, the old man stood up.

He pointed at the work desk not far away and said, "'11 prepare a blueprint for you. If you can assemble the finished product within the stipulated time, I can make an exception and let you be an apprentice! "

Chapter 169: 113, Nuclear Equipment, If You Can 't Buy It, You'll Be Scammed! 1

He looked at the mechanical parts that Li Yueming had assembled.

Old Lin was obviously surprised. He looked at the young man who was less than a meter tall and said, "You've learned how to put together artificial parts?"

Li Yueming shook his head." I haven't learned it systematically, but I've been interested in this since I was young."!"

Hearing this, Old Lin's eyes revealed a hint of doubt.

Obviously, he didn't believe what Li Yueming said.

One had to know that the assembly of body parts was not a simple industry.

Not only did it require a high level of understanding of machinery, but it also required a long period of experience.

Right now.

Although Li Yueming had only picked up a few parts and pieced them together to make an inconspicuous gadget, it was still very simple.

However, judging from his operation method and assembly speed, he was able to do it quickly.

For some reason.

Old Lin actually felt a strange sense of familiarity.

That's right.

Experienced !

This youth looked to be no more than five or six years old.

Logically speaking, even if he started learning mechanical assembly in his mother's womb, he should have only just started learning it after five or six years.

How could it give him the illusion that he was experienced?

After some thought, Lin said to Huang Xundong, ""Bring me the blueprint for the first drawer in my studio!"

Huang Xundong was stunned.

He looked at Li Yueming in surprise before running out to get the blueprints.

Old Lin lay back in his chair and hummed a few songs.

After Huang Xundong brought over a stack of blueprints.

He glanced at the stack of blueprints and took out one of them and handed it to Li Yueming. ""If you complete the assembly of the blueprints within a day, I can take you in as an apprentice. If you don't complete it within the specified time, or if you make more than ten mistakes, you can go back to where you came from!"

He took the blueprint from Old Lin.

He saw a mechanical component with a relatively simple structure drawn on it.

The blueprint was huge, and the complete mechanical parts looked like a mechanical arm.

Below was a simple record of the technique and precautions of the machine.

It was also matched with a top view, a side view, and a cross-section view...

Before he escaped from the laboratory.

Li Yueming had never studied the field of mechanical equipment, but don't forget that he was a pure cheat player.

His favorite was 'Technology and Viciousness'.

It was just a mechanical prosthetic arm.

To Li Yueming, who had unlimited deduction talent, it was just an appetizer.

He took the blueprint and looked at it carefully.

Li Yueming brought a stool over from not far away.

Then, under the watchful eyes of Old Lin and Huang Xundong, he placed the blueprint on the workbench.

Then, he began to use Infinite Deduction to analyze the structure of this blueprint.

About ten minutes later, Li Yueming made his move.

First, he unhurriedly picked out the parts he needed from the workbench.

Then, he arranged the parts neatly in a row.

Then, he began to assemble the parts according to the blueprint.

In order to make his 'technological' content not seem so high.

Li Yueming didn't try to maximize his efficiency.

Even so, Huang Xundong's eyes were wide open.

Nominally, Huang Xundong was also an apprentice under Old Lin.

There was a distance between the apprentice and the real apprentice.

Say it simply and straightforwardly.

In fact, it was just that the stingy Old Lin was unwilling to pay them too much.

Therefore, they were given the title of apprentices.

He would teach them some knowledge about the assembly and modification of their body parts regularly.

He used a little bit of knowledge and hope to offset their actual wages.

However, if he wanted to advance from an apprentice who had nothing to do with him to a proper disciple...

Learning how to assemble a Level 1 arm was Old Lin's minimum requirement.

Therefore, he had no choice.

Huang Xundong had also tried to assemble a Level 1 arm in his spare time.

However, even if it was the simplest combination.

However, the difficulty was still hell.

The Level 1 Bio Arm required a total of 2,400 mechanical parts of various sizes.

The largest component was half the size of a palm.

The smallest one was only as thick as a strand of hair.

The design was extremely complicated and delicate. A slight carelessness during the assembly process would lead to all previous efforts being wasted.

After a few attempts, they all ended in failure.

Huang Xundong once suspected that this thing was not something that an ordinary human brain could do.

But now.

Li Yueming only spent less than two hours.

He actually picked out nearly 2,000 mechanical parts from the parts box on the workbench.

Although he didn't know if they matched.

However, the efficiency of the search still left Huang Xundong flabbergasted.

Damn it.

Why didn't he bring him along when humans evolved?

Not far away.

At first, Old Lin was still lying on the chair with his eyes closed.

However, when Li Yueming picked them out one by one, Old Lin could not sit still anymore.

Huang Xundong's vision was limited, so he naturally couldn't see the depth in Li Yueming's every move.

However, Old Lin was an experienced transforcer.

How could he not see the profundity within?

First of all, Li Yueming picked the parts in order from big to small.

First, he found the most important arm support.

Then, the parts were displayed one by one according to the assembly order of the frame.

Although the speed of picking parts was not very fast, the speed of picking parts was not very fast.

However, the terrifying thing was that Li Yueming's speed was abnormally stable.

The most important thing was that he saw Li Yueming take nearly a thousand parts, and none of them were wrong..

Chapter 170: 113, Nuclear Equipment, If You Can't Buy It, You'll Be Scammed! 2

This was ridiculous.

Even if Old Man Lin had already assembled over a thousand Level 1 Bio Armors, he could not guarantee that he would not get a single component wrong. However, Li Yueming did it.

If it wasn't for the fact that Li Yueming had chosen the wrong parts in a row.

Old Lin would probably be carried to the doctor on the spot.

The two of them looked at the monster.

It took about four hours.

Li Yueming basically finished arranging the parts needed for the assembly.

Immediately after, the most critical assembly process began.

After watching Li Yueming assemble the equipment for half an hour, he was stunned.

Old Lin clutched his chest as he stood up and staggered."Don't fight anymore, don't fight anymore. You're my disciple from now on!"

Just like that.

Li Yueming had successfully become the disciple of Old Man Lin.

Old Lin provided food and accommodation, but he didn't pay them.

If Li Yueming wanted to make money, he could only rely on repairing customers.

On this basis.

Old Lin allowed Li Yueming to read the blueprints in the first three drawers of his studio.

Li Yueming was very satisfied with this.

He didn't care about money at all.

As long as they had a safe place to stay, they would not be discovered by the pursuers of the Yunxiao Corporation for a short period of time.

It could already satisfy most of his needs.

Not to mention that the repair shop could also let Li Yueming understand some of the deeper things in the technological world.

In the next two months.

Li Yueming was studying in Old Man Lin's studio.

The blueprints were divided into three categories.

The equipment in the level 1 blueprint was some ordinary mechanical products.

Other than the special modifications.

The price of this kind of normal equipment was not particularly high, and most of them would be sold to ordinary white-collar workers.

He installed a first-grade body.

It could allow ordinary office workers to have power that surpassed the limits of human beings.

The second type of equipment was called the mechanical core equipment.

This type of equipment had a weapon activation system and was very expensive. It could greatly increase the combat strength of the human body.

However, before replacing or installing the mechanical core.

The buyer needed to install a mech core produced by Hurricane Power into his body in advance.

The mecha core was connected to the central nervous system of the human brain.

It was the core item that humans used to drive their mechanical suit, Only with the mechanical suit core installed could ordinary humans use the second class mechanical suit to fly in the sky.

The third type of equipment was called military equipment.

Old Lin definitely wouldn't dare to sell it. He reckoned that only the black market had channels to obtain it.

With the talent of infinite deduction, Li Yueming's learning ability was extremely terrifying.

In just three months.

Li Yueming scanned through all the blueprints of the Class 1 and Class 2 equipment in Old Lin's drawer.

Together with the deduction.

Li Yueming could understand the principle of many simple assembly and assembly with just a glance.

There were only a few particularly complicated blueprints that Li Yueming spent a lot of effort to study.

But that was all.

On the fourth month.

Li Yueming had already studied the blueprints of the first two cabinets in Old Man Lin's repair shop.

Fifth month.

Li Yueming was holding a newly assembled Level 2 Steam-powered Mechanical Arm expressionlessly.

Old Lin fell into silence and confusion.

From now on.

Li Yueming started to help Old Lin assemble some orders for the repair shop.

Most of the customers in the repair shop were ordinary people from the slums.

In this world, as long as an ordinary person had a little ambition, most of them would choose to save money to buy some reproductive equipment to transform their body.

He had no choice.

Compared to the cold machinery, it's a total of 100

The bodies of ordinary humans were too weak.

For example, his arm.

He installed a normal mechanical arm of a higher level.

It could also allow ordinary people to instantly possess strength that surpassed the limits of humans.

The highly-paid porters at the cargo port had to have at least one Level 1 arm for the equipment.

For example, his eyes.

As humans grew older, their eyes would age as well.

However, as long as a mechanical eyeball was installed, one would instantly have vision that far exceeded that of ordinary humans.

In order to maintain their competitiveness.

It was only natural that the poor, who were eager to survive, chose to install various mechanical parts to replace their original flesh and blood.

As for the second type of equipment.

It was basically a luxury item in the slums.

In a month, he could take seven or eight orders at most.

Most of the people who could afford such high expenses were the gang leaders in the slums of the west of the city.

There was also a small number of boxers from the underground boxing ring who occasionally came to change and maintain their bodies.

In the beginning.

Li Yueming Ming was responsible for receiving the guests who came here to buy a level 1 implant.

In the first month or two, his cooking was still a little 'jerk'.

However, after a few months of training, he had gradually become more stable.

Whether it was repair, installation, or maintenance.

Li Yueming could basically satisfy the customers who came here to spend money.

Regarding this.

Old Lin was already numb.

Li Yueming's talent was too heaven-defying.

He had been in the field of body parts modification for more than 50 years, but he had never seen such a heaven-defying monster like Li Yueming.

A year later.

Li Yueming was almost five years old.

The crisp sound of the Reincarnation Mark rang out.

[You have successfully changed your fate. At the age of five, you have escaped from the laboratory of the Cloud Sky Corporation and avoided the tragic fate of becoming an experimental subject!]

[The score for this reincarnation has increased greatly!]
