

Maxing MT 201

Chapter 201: The Incomparably Shocked Wang Ye Explores the Secrets of East Peak Mountain! 1

In the Nightless City in the clouds.

In the research laboratory on the top floor.

Dr. Cheng picked up a small tissue slice from the table.

He looked at the cell molecules wrapped in the liquid culture solution in the glass clip.

Professor Cheng was a little dazed.

These were the cells of Experimental 0731.

Even though two days had passed.

The active molecules in the cells were still not completely dead.

This incredible recovery ability was even stronger than some herbs. This made Professor Cheng doubt his life.

He had personally nurtured the experimental body, but after in-depth research, he realized that many of the things were unfamiliar to him.

Therefore, this monster that even he felt his scalp go numb...

Did he really die so easily in the underground arena of N City?

Naturally, it was impossible for him not to have suspected it.

Especially after seeing the powerful recovery ability of Li Yueming's cells that could not be explained by current technology.

This suspicion was magnified tenfold.

However, if the Experimentals did not die...

He rushed back to the battle scene as soon as the clone died.

The interval between the two was less than ten minutes.

However, the Experimentals had vanished under such circumstances, leaving behind only a few pieces of their bodies.

The entire land and sky around N N City had been sealed off. If the Experimentals were not dead, they would definitely not be able to escape from N City.

But even if he didn't believe it.

After that, he brought tens of thousands of people to N City for half a month.

However, he could not find any suspicious points.

Dr. Cheng couldn't imagine that someone could hide everything under such circumstances.

Therefore, in between these two inconceivable things.

He could only choose the ‘death theory’ that was easier to accept. After all, the genetic experiment he released back then was indeed very terrifying.

In terms of energy level, it had already reached [A+] class.

Although his strength was slightly inferior to that of an ordinary A+ class supernatural being, he was definitely not someone that an experimental subject who had just become a supernatural being could contend with.

He put down the tissue fragment in his hand.

After a moment of hesitation, Professor Cheng dialed the mysterious number.

About ten seconds later.

The call went through.

Professor Cheng said with a slightly perturbed expression, ””Lord Ye Tianzi, Experimental 0731 has been killed by us in N City. There are a total of four pieces of flesh collected at the scene.” When he said these words.

Dr. Cheng’s emotions fluctuated violently.

Son of Heaven Ye was one of the founders of Yunxiao Science and Technology Group and the most mysterious of the three behind-the-scenes bosses.

The other two bosses occasionally appeared in front of the media and employees.

In that case, Ye Tianzi was the only one whose true identity was unknown to his own employees.

It was to the extent that many employees in the company thought that there were only two behind-the-scenes bosses in the Cloud Sky Group. They didn’t know that there was someone who was hiding even deeper.

The outside world knew nothing about this.

His existence was like the neon lights in the city.

When you looked around, he was there, shining with colorful lights.

However, once you looked for him carefully, it was as if he had disappeared from this world.

Other than the old phone in Professor Cheng’s hand, no one else could contact Ye Tianzi.

However, it was under such circumstances.

Even someone as smart as Professor Cheng would not dare to play too many tricks in front of him.

Sometimes, he even felt that Ye Tianzi could read minds.

There were many things that he could not hide from.

That’s why.

Professor Cheng, who had his own plans in mind, was so resistant to talking to Ye Tianzi.

Under normal circumstances, they would never take the initiative to contact Ye Tianzi.

But now.

For the sake of Li Yueming, he had no choice but to go all out.

The hoarse voice on the other end of the phone was silent for a moment before saying, "The investigation of Experimental 0731 ends here. You can continue your research. With a portion of 0731's genes, you won't disappoint me again..."

Right?"

Li Yueming's death.

Ye Tianzi didn't seem to care.

Professor Cheng felt that it was a little strange.

However, in this situation where the information was extremely unbalanced, he could not figure out what the other party was thinking.

Most importantly, he didn't know how much Ye Tianzi knew about Li Yueming's value.

If it was just a superficial understanding, then it was normal to not care and be sensitive about it.

After all, Li Yueming was dead.

However, he still managed to bring back a portion of his genes.

The losses and losses that the company had initially invested in it could already be made up for with these genes.

However, if Ye Tianzi had a deeper understanding of Li Yueming, then it was strange that his reaction was so calm.

He thought about it.

Professor Cheng was a little uncertain.

He could only conclude that Ye Tianzi didn't know the true value of Li Yueming Ming.

Otherwise, he wouldn't have been able to call Ye Tianzi now. He would have been dragged out to be shot when he returned to the Darkness City.

Thinking of this, Professor Cheng heaved a sigh of relief.

As long as the biggest secret was not discovered, he would be a chess piece that could not be abandoned.

Hearing Ye Tianzi's question.

"Give me another year, and I should be able to develop the new drug!" Dr. Cheng said solemnly."

On the other side.

In the Resistance camp.

After taking control of all the power, Li Yueming began to reshuffle the cards in an orderly manner..

Chapter 202: The Incomparably Shocked Wang Ye Explores the Secrets of East Peak Mountain!_2

The six captains definitely had to be restricted.

After all, Li Yueming wanted to gather and redistribute the power, so the leaders naturally couldn't stay and disrupt the situation.

Li Yueming didn't kill them because they knew what was good for them.

Instead, they were transferred to a retirement home.

As for the others who could not see the situation clearly and stubbornly resisted.

Li Yueming, on the other hand, didn't have a good temper. He caught them and fed them to the peanuts.

Under such swift and decisive methods.

It took about three months.

He had basically cleaned out all the disobedient people in the Resistance camp.

Li Yueming arranged for Sun Ruo to be the head of the combat department.

As for the other three positions.

The logistics department was assigned to the bald man, Wang Ye, who had gone to Cloud Sky City to save Sun Ruo. The other two positions were assigned to two more capable young men in the camp.

What was worth mentioning was...

Sun Ruo had been trying to get in touch with Wang Ye and his companions ever since she arrived at East Peak Mountain.

At that time, a dozen thugs jumped down from the plane.

Later on, because Li Yueming had exposed some of his tracks, he had been forced to leave.

Most of the pursuers from the Cloud Sky Corporation were chasing after him.

Therefore, it could be considered as opening up a path of survival for the other Resistance.

However, even so.

Back then, half of the dozen or so thugs had died on the way.

In the plan that Wang Ye had formulated back then.

As long as all the parachutists were still alive, the final assembly point would be Mount Dongyue.

Now, due to a series of coincidences, Sun Ruo had also come to East Peak Mountain. Therefore, after settling down, she would naturally think of ways to contact Wang Ye and the others.

Under her constant attempts.

Finally, half a month ago, Sun Ruo made contact with the five surviving rebels of Mylta.

One of them was the bald Wang Ye.

This also eased Li Yueming's awkward situation of having no one to use.

After cleaning up the disobedient troublemakers in the base.

Li Yueming personally led more than 1,000 members of the logistics department to enter the East Peak Mountain to hunt.

After all, the six teams had been disbanded.

The hunting mission would be taken over by the logistics department.

However, the current logistics department was mostly a group of new recruits who did not know how to fight.

In the Resistance camp.

When he heard that Li Yueming was going to lead more than 1,000 members of the logistics department to hunt and collect food in Dongyue Mountain, he was shocked.

Countless soldiers laughed their teeth out.

Due to Li Yueming's iron-blooded methods.

The soldiers in the survivor base were submissive on the surface and did not dare to make a sound.

However, in reality, he did not know what he was thinking.

There were many wild beasts in East Peak Mountain, but hunting them was fraught with danger.

Even experienced veterans could be killed by some extremely powerful individuals if they were not careful.

Under such circumstances.

As the leader, Li Yueming led a group of new recruits from the logistics department up the mountain.

In their eyes, this kind of behavior was no different from looking for sh * t.

Of course.

They couldn't wait for Li Yueming to be unlucky.

Therefore, no one stood out to remind him.

In order to understand the specific situation of East Peak Mountain in detail, and to see if he could find the legendary crater of East Peak Mountain.

Li Yueming might be out hunting for a longer time this time.

Before he returned.

Sun Ruo was in charge of managing and training the soldiers in the base.

After a round of inspection, he didn't find any problems.

Under the gazes of the veterans who were looking at fools, Li Yueming brought his men and set off...

East Peak Mountain was located north of the Red Leaf Empire.

Southeast of the East Peak Empire.

Eighty percent of the mountain range was within the borders of the East Peak Empire, and only thirty percent belonged to the Red Leaf Empire.

300 years ago, this was also one of the battlefields between the corporations and the government forces.

However, due to the high mountains and dense forests, the frequency of military battles here was not particularly high. They were mainly fighting around a few key mineral resource points.

That's why.

The entire East Peak Mountain was still relatively well preserved.

Of course.

Most of the minerals in East Peak Mountain had already been dug up.

Only the deepest part of the mountain range where the magnetic field was the most chaotic and difficult to detect remained. There might even be some scattered ores.

The deep mines and dense forests created the complex terrain of East Peak Mountain.

Even ordinary people.

As long as they went a little deeper into the East Peak Mountain, they could see deep man-made mines. The local residents who lived here all year round could get lost in the caves and mountains if they were not careful.

To be on the safe side.

Li Yueming brought a few veterans with him to act as navigation.

However, these seasoned soldiers were obviously not very interested in this job.

As long as Li Yueming didn't take the initiative to ask them, they basically wouldn't take the initiative to report any information.

He had no choice.

Now, many veterans in the base wanted to see Li Yueming step into a few more pits.

Under such circumstances.

Why would they take the initiative to remind Li Yueming?

Fortunately, Li Yueming didn't express much about their attitude, or rather, he didn't ask them anything from the beginning to the end. The group of people walked in the forest for about three hours.

Finally.

Not far away, a group of Eastern Mountain Flower Deer appeared on a green hillside.

He took a cursory glance.

There were about 500 Eastern Peak Flower Deer.

Each of them was as large as a wild bull, and their fur was covered in a thick layer of hard soil.

It was obvious that he was not an easy opponent.

When the soldiers beside him saw the East Peak Flower Deer, their eyes instantly lit up..

Chapter 203: The Incomparably Shocked Wang Ye Explores the Secrets of East Peak Mountain!_3

They were very familiar with this thing.

An adult Dongyue Flowerdeer could weigh more than 300 kilograms. It could be said that each adult was extremely majestic.

The soil wrapped around their bodies could be used to resist mosquito attacks.

It could also play a super bulletproof role.

Ordinary caliber firearms could not penetrate the mud armor of the East Mountain Flower Deer at all.

Only a few large-caliber weapons could cause damage to it.

Of course, none of the above was the main point.

The main point was that although large-caliber weapons could cause damage to the East Mountain Flower Deer.

However, other than hitting the head and abdomen, which were vulnerable spots, hitting other spots could not cause fatal injuries.

The injured East Mountain Flower Deer didn't flee for their lives like ordinary deer. Instead, they would turn around and attack their attackers with red eyes.

Imagine this.

Hundreds and thousands of tank-sized deer were charging at the humans.

Therefore, he had no choice.

Under normal circumstances, there was no other prey to kill other than the surrounding area.

The Resistance camp basically wouldn't provoke herds of spotted deer.

Even if they had to provoke them, the veterans who were familiar with the jungle would make many preparations in advance.

For example, they could occupy the high ground and dig some traps along the way.

But now.

They were the inexperienced deputy leader who obviously knew nothing.

Moreover, most of the logistics troops were equipped with light weapons.

If they were to rashly attack the flower deer herd under such circumstances, they would be able to escape.

Then there would be a good show to watch.

Of course.

The few seasoned soldiers leading the way did not dare to show any abnormalities on the surface.

In order to prevent Li Yueming from paying attention and asking them questions, the veterans even slowed down their footsteps carefully.

Obviously.

They were very resistant to Li Yueming's order to disband the Sixth Brigade.

He was also not convinced by the new Deputy Chief, Li Yueming.

After all, in the past.

The six battalions were the highest-ranking troops in the entire Resistance camp.

They were the first to enjoy all the benefits in the camp.

But now.

Ever since Li Yueming changed the system.

A bunch of useless logisticians could enjoy the same treatment as them. Even even the horsekeepers who transported the axle-load were included in the team.

This naturally made them feel dissatisfied.

Under their deliberate silence.

As expected, Li Yueming, who was walking at the front of the team, did not ask about the various characteristics of the East Peak Flower Deer.

After discovering the flower deer.

Li Yueming's first order was to slow down the pace of the logistics troops.

Then, he ordered his men to find a flat ground with a wide view.

Immediately after.

Under the excited gazes of the veterans.

Li Yueming waved his hand and started firing.

Instantly.

Nearly a thousand large-caliber firearms opened fire at the same time.

The spotted deer hundreds of meters away were instantly alarmed, and they all began to snort and neigh.

Seeing this situation, the seasoned soldiers were overjoyed.

This was how a spotted deer would behave after it was provoked.

Then, the berserk deer herd would follow behind the deer and charge fearlessly in the direction of the gunshot.

At this moment.

They seemed to have already seen the scene of Li Yueming and the new recruits from the logistics department getting beaten up by the Dongyue Flower Deer.

At that time, he would return empty-handed and fail.

It would probably become a huge joke in the Resistance camp.

As expected.

Everything was as they had expected.

About ten seconds later, the spotted deer that were attacked not far away confirmed the source of the attack.

Under the lead of a 500-kilogram giant spotted deer.

Hundreds of deer began to attack Li Yueming.

The speed of these tanks was much faster than the speed of ordinary humans.

At this moment, running together felt like the earth was shaking.

The bullets of the retreating soldiers did not cause much damage to their fur.

The damage caused by a few armor penetrations was only a slight pain to the flower deer, making it more manic.

It could not cause fatal damage at all.

All the members of the logistics department were dumbfounded.

The hunting process was completely different from what they had imagined! When did a herd of wild deer become so aggressive?

Seeing this situation.

Li Yueming raised his eyebrows and waved his hand.

Instantly.

The power in his body turned into balls of golden energy that wrapped around the bullets fired by the soldiers.

After many days of trial and error and training.

Now, Li Yueming's control of his special talent had become more and more proficient.

He had already developed his martial arts to a very good level. It was very easy for him to control hundreds of bullets to enchant them.

Of course.

The more he controlled it, the more the synchronization attribute would decrease, and the extraordinary energy consumption in Li Yueming's cells would also increase.

However, under such circumstances.

The enchantment effect of strength was very obvious.

In the next second.

A scene that caused all the soldiers' jaws to drop appeared.

The bullets that had been hitting the East Mountain Flower Deer's body were now as powerful as a cheat.

The stampeding herd of deer suddenly suffered a heavy blow.

In the blink of an eye, dozens of 300 – 400 kilograms of Dongyue Flower Deer were pierced through by bullets.

Furthermore, the bullets that pierced through their bodies left fatal wounds.

“The sound of the law” “The sound of the law”

One after another, the East Mountain Deer fell to the ground.

A few of the particularly muscular individuals tried to stand up, but they were quickly riddled with bullets.

After the bullets were enchanted by Li Yueming.

Five to six hundred Fu Dong Mountain Flowerdeer were wiped out almost instantly.

When everything was over, Li Yueming's face was expressionless.

He said to the logistics department head, Wang Ye, who was beside him, “Call the transportation department to collect the body!”

Wang Ye looked at the corpses of the giant deer that littered the mountain and then looked at the logistics department soldiers with stiff faces.

After a moment of silence, he sized up Li Yueming and said, “Let me think it through. I remember that you were only five years old when I saw you three years ago, right?”

“What's wrong?” Li Yueming asked.

Wang Ye's face was filled with complicated emotions. He silently took off his hat and touched his bald head. “So...Are you eight years old now?”

He was one of the few people who knew Li Yueming's true identity. Wang Ye still remembered that when he parachuted, Li Yueming seemed to be just a young boy.

At that time, he even patted Li Yueming's shoulder and said goodbye to him, hoping to see him again in the future. However, he never expected that...

In just three years, everything had changed.

Li Yueming looked at himself and then at Wang Ye, who was almost half a head shorter than him. He said expressionlessly, “If I told you that I'm 18 years old this year, would you believe me?” Wang Ye was speechless.

Damn it, do you think I believe you?

Forget it.

Wang Ye decided that it was better for his body to think less about things he shouldn't think about.

Otherwise, it would be easy for her to lose her hair if she was stimulated.

He put on his hat again, shook his head, and walked to the side to take out his satellite phone to communicate with the Ministry of Transportation.

Li Yueming glanced at the surrounding soldiers.

His gaze finally landed on the few veterans who were leading the way. He walked over and stood in front of them.

Looking at the veterans, Li Yueming said coldly, "If you want to die, don't blame me for not helping you!"

At this moment.

A few seasoned soldiers were still immersed in shock and had yet to recover from their shock.

What did they just see?

Who knew what they had just seen!

He finally came back to his senses.

A few seasoned soldiers were instantly frightened and fell to the ground with ashen faces.

At this moment.

They finally understood why the captain of the sixth brigade didn't dare to make a sound after he was dismissed by Li Yueming.

Who could resist such a fierce Deputy Chief?

Chapter 204: A Beautiful Girl's Spit (1)

About half a day later.

The transport troops who received the order rushed over.

Looking at the corpses of the East Mountain Flower Deer on the ground, the 1,000-odd soldiers were dumbfounded.

What was going on?

It had only been two days since the Deputy Chief had set off with the new recruits of the logistics unit, right?

How did they kill so many Flowering Deer?

Even if they lined up, they wouldn't be able to shoot one head so quickly, right?

Looking at the fresh venison all over the mountain

All the soldiers of the transport troops fell silent.

When they looked at Li Yueming again, all the soldiers were shocked.

After a simple handover, the transport team began to clean up the battlefield.

When they spent a lot of effort to transport the giant deer back to the camp.

More and more deer meat was piled up until it almost became a small mountain.

The entire Resistance camp was in an uproar. Countless soldiers and civilians were extremely excited.

Hualu had a bad temper and was extremely aggressive.

Therefore, it was very difficult to hunt.

However, the meat of this thing was first-class and delicious.

In the past, when the sixth big team went out to hunt, they had never brought back such a large amount of high-quality meat in such a short time.

But now.

However, the new Deputy Chief did it.

To most of the ordinary people in the Resistance camp, this was undoubtedly a display of strength.

In the military camp.

The group of 'old men from the previous dynasty' who were still struggling at death's door almost couldn't catch their breath when they saw this.

They had thought that Li Yueming would return in a sorry state after climbing the mountain.

After all, hunting was something that required a lot of experience. In the entire Resistance camp, only the veterans had this kind of experience.

Therefore, as they had expected.

When Li Yueming realized that he couldn't do anything to the ferocious beasts on the mountain, he was shocked.

He would invite them back and entrust them with important tasks again.

At that time, they might be able to take advantage of this opportunity to extort some benefits.

However, he never expected that...

How long had it been?

The first batch of prey that Li Yueming had caught had already arrived.

Moreover, there were so many of them...

It made them doubt their lives.

Since when was the herd of flower deer so easy to kill?

This shouldn't be!

An adult spotted deer weighed more than 300 kilograms, and when it was injured, it could run at a maximum speed of more than 100 kilometers per hour.

They were like extremely fast armored vehicles, and ordinary weapons could not do anything to them.

Could it be that they had been hunting for decades, and all they hunted were fake flower deer?

However, just as they were collectively doubting their lives.

Soon, he realized that the nightmare was far from over. In fact, it had just begun!

The transport team had just packed up all the spotted deer and transported them back to the camp.

The group of soldiers had yet to heave a sigh of relief.

Wang Ye, the logistics captain on the mountain, called again.

“North Latitude 34, East Latitude 108, we killed more than 200 Mud Boars.”

He hung up the phone.

The transportation team was dumbfounded.

Damn it.

Even the donkeys of the production team wouldn't use it like this!

It had only been a short while, and the Deputy Chief had already hunted more than 200 Mud Boars?

He had no choice.

The transport team could only enter the mountain again.

They began their painful yet somewhat happy process of transporting the goods.

When more than 200 giant rolling boars were carried back to the rebel camp.

Nearly a thousand soldiers in the transport team were almost paralyzed from exhaustion.

Even those who were equipped with prosthetics had applied oil on their prosthetics countless times.

But even so, there were still a few of the lower quality ones that started to smoke.

However, before they could catch their breath.

Wang Ye's phone rang again.

The person in charge of the transport team felt like his scalp was about to explode.

No way, sir, you're still here?

This was too much!

In the end.

The transport troops in the rebel camp were completely exhausted after only three days.

As a last resort, Li Yueming began to recruit ordinary people who were in high spirits as temporary transportation teams. He used fresh meat as a reward to send them up the mountain to transport the hunted animals.

This decision naturally caused countless ordinary people to cheer.

Li Yueming had personally promised that as long as they could transport 100 kilograms of meat back to the camp, 30 kilograms of it would be rewarded to the porter.

Under the encouragement of eating meat.

The ordinary people in the entire Resistance camp were all passionate.

They began to organize groups to enter the mountain to transport the goods.

There were nearly 100,000 people in the Resistance camp.

Except for the elderly and children who had no labor force and the soldiers who needed to guard the defense.

There were about 50,000 workers in the country.

And now.

Out of the 50,000, almost 20,000 joined the transport relay race.

The twenty-five thousand people were divided into five batches and began to enter the mountain one after another.

Most of these 25,000 people were ordinary humans.

There were even only a few who were able to use artificial limbs.

Therefore, their transportation efficiency was much worse than that of a regular transportation force.

However, he couldn't resist the crowd.

With tens of thousands of people taking turns to come down, even a small mountain could be emptied.

In the beginning.

Many people in the camp thought that Li Yueming was making a mountain out of a molehill by organizing so many people to move the prey into the mountain.

However, they were soon slapped in the face.

Every time tens of thousands of people entered the mountain, they could actually bring out a huge number of animal carcasses.

Many of them were still working overtime.

“What happened? What was the logistics team doing in East Peak Mountain?

How could a team of more than a thousand people hunt so much prey?”

Chapter 205: A Beautiful Girl's Spit (2)

“I heard that the Deputy Chief has the power of God. As long as the guns and bullets that he has blessed can cause huge damage, it's simply too terrifying!” “What bullshit divine power! The Deputy Leader is a powerful Extraordinary! I heard that even a supernatural animal that has become a spirit can't escape the fate of being killed by the Deputy Chief!”

“The animals in the camp are piled up like mountains. The machines that process the canned meat are almost smoking. This is the first time I’ve been worried about having too much food...”

“To be honest, I’ve lived in the camp for more than ten years, but I’ve never thought that I could see such a ridiculous scene.”

Originally, many members of the Resistance camp were waiting to see Li Yueming make a fool of himself.

But now, as the food in the base became more and more abundant, some rumors and rumors about Li Yueming became more and more widespread.

Naturally, the trend started to change.

As ordinary members of the Resistance living in the camp, their loyalty to their leader was mostly based on their contributions to the camp.

Li Yueming could bring them benefits.

To them, he was a qualified leader.

As for the other messy power struggles.

They couldn’t and didn’t want to interfere.

This party of tens of thousands of people transporting the corpses of the night guards lasted for a week.

A week later.

Every household in the Resistance camp was about to vomit from eating meat.

Looking at the endless corpses of the wild beasts, the members of the Resistance camp were numb.

So, what kind of monster was the Deputy Chief? Wasn’t he too good at creating?

According to this trend.

He was afraid that all the large wild beasts in the entire East Peak Mountain would not be enough for him to kill.

Fortunately, a week later, the exhausted logistics team finally returned from the mountains.

Look at them.

All of them were so exhausted that it was as if their bodies had been emptied.

Only his mouth was stiff.

No matter how many people asked, they just wouldn’t say what happened in the mountains.

The only thing everyone knew was that...

After killing enough wild beasts as food, Deputy Leader Li Yueming went deep into the mountains alone.

The river of time flowed into the ocean.

Li Yueming stayed in East Peak Mountain for more than a month before returning.

When he returned.

He brought out a dozen fist-sized dark gray ores from the depths of the mountain range.

If nothing unexpected happened.

This should be the legendary meteor that fell from the sky above the moon.

It contained a heavy metal with super hardness and malleability. It was enough for him to forge a weapon that could withstand it.

This year, Li Yueming was nine years old.

After he successfully seized the position of deputy leader.

The entire Rebellion Army camp had undergone earth-shattering changes.

The first problem was the organization.

Reassigning the troops made the division of labor clearer.

The combat troops were in charge of combat and guarding the base.

He was no longer training and farming as usual.

Instead, he was only responsible for combat and training, and did not worry about anything else.

Other than managing the logistics, the logistics team was also responsible for developing new weapons and equipment.

The current technology of the resistance base was very backward.

In addition to the lack of industrial facilities, there were also very few high-end research talents.

Under such circumstances, Li Yueming could only personally take action.

Once again, he would rely on his own strength to help the Resistance camp upgrade its core technology.

Of course.

All kinds of resources were in short supply, and the infrastructure was not perfect.

Even if Li Yueming had a heaven-defying ability, he couldn't use it.

Let me give you the simplest example.

Just changing the muzzle of the standard rifle required a complete industrial chain to match it.

And even if he could really make a rifle.

However, most of the bullets on the market today were 5-56mm, 7.62mm, and 9-79mm.

The magically modified rifle could not be reloaded at all.

If he wanted to use it, he had to make the ammunition that matched it.

However, this required a complete industrial production line.

This was like a strange circle of magic.

If he couldn't make a breakthrough at a critical point, it would be very difficult to improve his technology.

However, Li Yueming couldn't magically modify the weapon.

However, he could modify his mech and grow it.

After all, as an apprentice of a repair shop, he had learned a lot from Old Lin.

In addition to his infinite deduction talent.

All kinds of fancy operations could be completed more thoroughly.

It took a whole year.

He established the first exoskeleton mecha unit. This unit was codenamed 'Zero' and represented destruction and restart.

It took another half a year.

He established the first team of transmigrators, codenamed 'Mechanical Ascension'.

Under his constant training.

These two troops quickly gained a decent fighting strength in a short period of time.

They had become the mainstay of the Resistance.

Of course.

Li Yueming himself didn't stop.

The power of this world originated from two aspects. One was the storage of supernatural energy in the cells.

It was also the standard to measure the strength of extraordinary humans.

Another aspect was the extraordinary talent awakened from the genetic chain.

When Li Yueming had just been injected with the supernatural potion, he had directly broken through to become an A+ grade supernatural being.

Now, after a few years of tempering.

He had long since shed the light luxury he had when he had just mastered extraordinary power. He had grown into an experienced A+ class extraordinary human..

Chapter 206: Beautiful Maiden 's Original Spit (3)

However, there was something worth mentioning.

There was a huge difference between an A+ class supernatural being and an S class supernatural being.

If the supernatural energy contained in the body of an A+ class supernatural being was like a bucket of water, then the energy contained in the body of an S class supernatural being was like a stream.

The gap between them was huge.

An S-class supernatural being could easily annihilate a city without the interference of other supernatural beings of the same level, while an A-class supernatural being would at most cause some commotion and panic.

He wanted to advance quickly.

Other than the injection of the gene serum.

The only thing Li Yueming could do was to continuously train his body to accommodate more extraordinary energy.

Fortunately, his foundation was solid enough, so his tempering speed was faster than ordinary people.

However, even so.

He was still quite a distance away from becoming an S-class supernatural being.

On this day.

Li Yueming walked out of the exclusive forging room of the logistics department.

In his hand was a blue metal saber.

He waved it gently.

The long metal blade brought with it a breathing sound that sounded like a dragon's roar.

It was as if it could cut a mark in space.

This was the weapon that Li Yueming had forged using the meteorites from the East Peak Mountain and other metals.

It was an extremely sharp and hard Tang sword.

Using force to pour on the Tang knife, Li Yueming could feel that the attributes of the long knife were constantly rising at this moment.

When it was about 90%.

Finally, the saber reached its limit.

This increase was similar to what Li Yueming had expected.

The distance between the true perfection and the distance.

However, it was enough for Li Yueming to use it for a long time.

At this moment.

The fluctuations that erupted from the saber were extremely terrifying.

Li Yueming named it the Dragon Slaying Saber after feeling it for a moment.

Although the name was simple, it was still considered grand.

Outside the door.

Sun Ruo walked in with a satellite phone.

In this year.

She was the head of the combat force, and she was doing a good job.

As for the specific work content...

He followed Li Yueming every day and asked about his training plan.

The poor combat troops had been trained like devils for half a year and had always thought that Sun Ruo was the one who made the training plan.

He couldn't afford to be looked down upon by his beautiful minister.

The group of men shouted and gritted their teeth to persevere.

However, what they didn't know was...

Sun Ruo was just taking the blame for Li Yueming.

Occasionally, when she checked the progress of her training, her mind would be filled with questions such as what to eat tonight and where to play. He had no idea how much strength the soldiers had mustered under his feet.

And now.

Sun Ruo rushed over with a phone in her hands.

Clearly, something had happened.

Li Yueming sheathed his Dragon Slaying Saber and took the phone."Hello?"

Han Longfei's voice came from the other end of the phone."Recently, the situation has been a little tense. The supplies that I promised you might not be able to arrive."

Li Yueming pondered for a moment.

Suddenly, he smiled and said,"City Lord Han is so resourceful. I didn't expect him to tell me that the news was tight..." It's really strange!"

It was no wonder Li Yueming made such a big fuss.

As the leader of the resistance forces around N City, Han Longfei actually held the position of the city lord of N City at the same time.

This pangolin was already more ridiculous than the real version of the Mission Impossible.

The most important thing was...

At that time, Li Yueming was a wanted criminal who was the focus of Yunxiao Group. Professor Cheng even mobilized an A+ grade genetic monster for him. However, when he escaped later on.

Li Yueming and Su Ruo hid in the container and escaped easily without much interrogation.

At that time, even Li Yueming himself did not dare to escape.

It was because the encirclement that Professor Cheng and the Cloud Sky Group had set up near N City was too all-rounded and had no blind spots.

It was like a spider web.

As long as Li Yueming made a move somewhere, it would attract all the predators on the spider web.

There was the slightest movement of wind and grass.

The overwhelming firepower was enough to destroy everything.

However, it was under such circumstances.

However, Li Yueming was able to escape easily under Han Longfei's arrangements.

One could imagine how powerful he was.

Now.

Han Longfei actually called him to say that the situation was a little tense recently.

It really sounded a little flattering.

As for the other meaning in his words...

Han Longfei didn't answer, but smiled and said, "I've been running in N City for more than ten years, so I have some connections... However, the Cloud Sky Corporation seems to be on guard against me recently, so I probably have to behave myself for the next period of time!"

"As for the development of the Resistance base, I believe that you won't disappoint me!"

Li Yueming was smiling.

However, there were not many smiles.

He organized his schedule from Degrading to end.

For some reason.

He smelled a strange aura, as if there was a gaze watching his every move.

He thought about it.

Li Yueming didn't say anything and hung up after exchanging a few pleasantries.

At the side.

Sun Ruo pouted. "This baldy actually has something he can't do. I thought he was Superman!"

Li Yueming glanced at her and smiled. He took out a relatively delicate mech from the studio behind him.

He handed it to Sun Ruo and said, "Here, the big mecha you asked me for last time. I'll give it to you as a birthday present.. Try it on!"

Chapter 207: Beautiful Girl 's Original Spit (4)

Sun Ruo looked at the mech in his hands and asked, "You didn't even measure my height and three measurements. Could this thing be mass-produced to fool

Hearing this.

Li Yueming glanced at her from head to toe and said speechlessly, "I estimate that you are 1.68 meters tall. As for your three measurements, are you sure you have them?"

Hearing this.

Sun Ruo was instantly unhappy.

“Why not?” she asked, straightening her chest. Wasn’t this it? And, and...Being small now didn’t mean that she wouldn’t grow up in the future!”

She was already sixteen years old this year, and from her height, she seemed to be no different from her peers.

However, the other two things on a girl who was sixteen years old had never shown signs of development.

Even now, when he lowered his head to look, his line of sight could still easily look past his chest that was as flat as an airport and straight to his toes. Li Yueming rolled his eyes and said, “Wait until you grow up!”“

Sun Ruo was speechless.

Mental damage-10086, Aggro +10086!

Seeing her face full of black lines and murderous intent.

Li Yueming added,” If you’re really worried, you can try drinking more milk. You can eat whatever you want, understand?” In addition, I heard that rubbing it more often will help you grow bigger...”

Sun Ruo’s eyelids twitched as she heard him ramble on.”Ahhh, if you say it again, do you believe that I will bite you?”

Seeing that she couldn’t afford to be anxious.

Li Yueming Ming mocked,” Hehehe, women are indeed more temperamental with smaller breasts!”

Hearing this, Sun Ruo couldn’t hold it in anymore.

She rubbed her shiny little canine teeth and pounced on him.

He opened his mouth and bit Li Yueming’s arm.

Seeing this, Li Yueming took two steps back and said,””I know. You’re a dog, right?”

Sun Ruo became even angrier.

She couldn’t help but put more strength into her cheeks.

A moment later, he realized that his actions seemed a little inappropriate.

She was too embarrassed to stand up. However, when she stood up and let go of her mouth, there was still some sparkling liquid stuck to her mouth and arm.

Li Yueming wiped it with disdain.

He placed it at the tip of his nose and smelled it. It was filled with the stench of saliva.

Tsk, beautiful girl’s saliva.

It was really too much!

After a while, Li Yueming stopped teasing and said seriously, "During this period of time, prepare well. There's going to be a big move!"

A year ago, when he was looking for meteorites to forge a saber.

Li Yueming had already roughly surveyed the East Peak Mountain.

Most of the valuable mineral resources here had already been dug up by the various tycoons.

Otherwise, there would not be such a large mountain range that no one cared about.

Only a few ores were left in the mines and deep in the mountains. The cost of collecting and transporting them was too high, and they had no value at all.

The Resistance camp had a population of 100,000.

There was no science and technology, and there was no basic industry.

Even military supplies had to be transported from N City by Han Longfei.

Under such circumstances.

Staying in the Forgotten Land of the East Peak Mountain, which was barren of resources, obviously had no prospects for development.

It would be fine if he only wanted to seek peace in a corner.

However, if one wanted to condense a huge fist that could compete with the corporations.

The Rebellion Army camp had to occupy an area with rich resources and a complete industrial system to have any hope.

However, the problem was that the more abundant the resources, the more dangerous it would be.

Moreover, the Resistance was an existence that everyone hated in the corporate world.

There was no doubt that this was another path that needed to be forged with blood and bones.

Before stepping on this path.

There wasn't much time left for Li Yueming and the Resistance camp to prepare.

Sun Ruo's chest was still heaving.

She took a few deep breaths to suppress the girl's shame and forced her gaze away from the bite marks on Li Yueming's arm.

"What big move?" he asked curiously.

Li Yueming glanced at her but didn't answer.

Seeing this situation, Sun Ruo stuck out her tongue and did not continue asking.

After all, although she did not appear very smart most of the time, she still had some basic political sense.

Not to mention anything else, just from Li Yueming changing some of the internal systems of the Resistance Army, it could be seen that the other party's demands were far greater than she had expected.

Under such circumstances, it was the most correct thing to hold back from anyone.

She got up and walked out.

When he reached the door, he suddenly stopped and turned around to look at the figure standing behind him under the light. It was a youth with delicate features.

Just based on age.

She was even five or six years older than him.

But for some reason, under the roof where the lights and the night alternated.

The other party's figure seemed particularly silent and heavy.

He hesitated for a while.

The young girl mustered her courage and whispered, "'Thank you for remembering my birthday... Also, I like this gift very much. I, I will keep it well!"

In the shadows, the young man did not speak.

He just waved at her to say goodbye.

Chapter 208: Three Years of Sharpening the Sword

Time flew like an arrow, and the sun and moon flew like shuttles.

In the blink of an eye, a year passed quietly.

Li Yueming was ten years old.

In this year, due to the abundance of food, the number of soldiers in the rebel camp doubled.

The 'Zero' exoskeleton mecha team and the 'Mechanical Ascension' transmigrator team became the ace elite troops of the entire Resistance camp.

Li Yueming began to personally supervise the soldiers in the base to train.

There were no strange substances in this world, so it was naturally impossible to cultivate breathing techniques. However, this did not mean that breathing techniques were useless.

After the ordinary soldiers learned the breathing technique.

Through breathing, one could control the various functions of the body and use this to increase one's combat strength.

This was for an organized army.

It could already be considered a very useful training method.

In addition, this year.

The conflict between the Cloud Sky Group and the Northern Hurricane Power Group became more and more intense.

The large number of troops deployed by both sides on the border clearly had the possibility of a large-scale conflict.

Hurricane Energy Technology Group was one of the largest corporations in the East Peak Empire.

Its main business was to sell various types of mechanical equipment and heavy machinery.

In front of the huge Hurricane Group.

The Cloud Sky Group, which had only been established in recent decades, could only be considered an inconspicuous small company.

Whether it was in terms of foundation or strength, there was an obvious gap between them and the Power Group.

The reason for the conflict.

It was because the genetic modification plan that Cloud Sky Group was working overtime on made Hurricane Group feel a huge threat.

The sales of transplants accounted for 30% of the annual income of Hurricane Power Group.

It was the most important part of the company's main business.

However, if Yun Xiao Corporation's research on the gene serum was really successful, in the future, humans could improve their physical strength and strength through the genetic level.

Then wouldn't the reproductive equipment produced by Hurricane Group be eliminated by the times?

After all, if given a choice, how could an ordinary human be willing to replace his flesh and blood with a cold body?

A gentleman should not stand under a dangerous wall.

They knew that the genes researched by Yunxiao Group might affect their position as the overlord of the financial group.

How could Hurricane Technology Group sit idly by?

As early as five years ago, Hurricane Technology Group had already sent people to deliver several ultimatums to Cloud Sky Group.

At that time, the Cloud Sky Group had only two choices.

The first was to disclose the research results of genes to Hurricane Energy, and the two sides would work together to develop the gene serum.

The second was that Hurricane Power had ordered the Cloud Sky Group to stop all genetic-related research. Otherwise, Hurricane Power would personally lead the army to Cloud Sky Nightless City to 'take away' the relevant research results.

As a top tech tycoon, Hurricane Power Group's arrogance and dominance could be seen from this.

Without a doubt,

The Yunxiao Group was unwilling to share the results of their genetic research.

He was also unwilling to stop his genetic research.

The two sides didn't come to an agreement and eventually broke up. The conflict could only become more and more intense.

Under such circumstances.

Li Yueming had been patiently waiting for an opportunity.

After all, with the current strength of the Resistance Army base, once they rashly clashed with the corporations, they would probably be taken care of in no time.

He had to wait until the large-scale war between the Yunxiao Group and the Hurricane Group officially began.

Only then would the Rebellion Army base have a chance to take action.

Finally.

At the end of the second year.

Hurricane Group and Cloud Sky Group started fighting on the northern border.

This time, it was not a true full-scale war.

However, the scale was not small at all.

In order to deal with the oppression from the giant financial groups, the Cloud Sky Group began to mobilize their forces to the north to fight.

On this basis.

Li Yueming knew that the time had come.

On a certain dawn, he quietly led the Resistance camp of about 30,000 soldiers and left East Peak Mountain.

He headed toward the town of Gillette that the Cloud Sky Group occupied in the Northwest.

Gillette itself was not a resource center.

However, it was one of the transportation hub of the Northwest Inner Land of the Cloud Sky Group.

Most of the resources from the resource towns in the Northwest would pass through here and then be transported to the surrounding powerful industrial cities.

It was one of the more important towns on the map.

According to the insider information given by Han Longfei, the king of the Super Snitches.

Eighty percent of the military forces in Jilie Town had been conscripted to the northern battlefield by the Cloud Sky Group half a month ago.

Now, only the local defense forces and a small number of Yunxiao Group soldiers were left.

This meant that Li Yueming had an opportunity to take advantage of it.

He spent more than two months traveling day and night.

Li Yueming led more than 30,000 fully armed Resistance soldiers down the mountain.

They went south through the desert city of Onlado.

They brushed past several resource towns in the northwest of Yunxiao Group.

The tip of the blade pierced into Gillette Town.

The Cloud Sky Corporation probably would not have dreamed of it. As soon as the flames of war were ignited on their front lines, tens of thousands of resistance troops would suddenly appear from the rear.

He looked around.

After confirming that Han Longfei's source of information was correct.

Li Yueming led the travel-worn Resistance Army and fired the first shot.

“Boom!”

A series of explosions sounded.

All the defenders of Jilie Town were dumbfounded.

Ever since the establishment of the Cloud Sky Group.

Although there would occasionally be some rebel forces in various places..

Chapter 209: Three Years of Sharpening the Sword

However, it was only a small fight.

In most cases, the Cloud Sky Corporation did not even need to step in.

The local government could handle it themselves.

After all, the current era was different from the primitive era.

All kinds of production materials and powerful firearms were in the hands of the corporations.

No matter how dissatisfied ordinary people were, they would not be able to do so.

They were powerless against the powerful and cold superweapons.

That's why.

The defenders had long gotten used to the days of standing guard and slacking off.

No one would have thought that such a well-equipped force would suddenly appear in the heavily controlled area to attack the city.

Tens of thousands of fully armed soldiers descended from the sky like the Grim Reaper.

The defenseless Gillette garrison wanted to resist.

However, the Zero Mecha Team and the Mechanical Ascension Growth-User Team had already sneaked into the city.

They all rushed out when they heard the explosion.

At this moment, they had already broken through the defense line on the city wall.

For a moment.

The city was in chaos, and the screams of the soldiers guarding the city rang out.

The entire Gillette Town was covered in blood.

Li Yueming led the Resistance Army and took over the place without much effort.

During this period, more than a dozen supernatural beings who belonged to the Cloud Sky Corporation stood up.

However, under Li Yueming's thunderous methods, it only took less than two minutes for the heads of several supernatural beings to leave their necks forever.

At this moment.

Li Yueming was wearing the Warrior Sage mecha and holding the Dragon Slaying Blade.

His entire person was filled with killing intent, as if he was the reincarnation of a war god.

He chopped off the head of the last soldier who was still firing and looked at the other soldiers who had raised their hands to signal surrender.

Li Yueming did not say anything. After looting some supplies, he left Gillette Town.

Half an hour later.

A large number of armed tanks and helicopters arrived at the ruined town of Gillette.

The commander in the lead was the deputy commander of S City's city defense.

Looking at the town of Gillette that had been blown up beyond recognition, the attackers seemed to be just passing by.

He had already left.

The City Defense Commander's expression was so gloomy that it was about to drip water. He cursed at the adjutant beside him, "Who can tell me what is going on? Where did such a powerful force come from around S City?"

The adjutant felt wronged.

However, he did not dare to talk back.

He could only bite the bullet and say, "Sir, I suspect that Hurricane Power Group has sent elite special forces into our territory. I just asked the surviving soldiers. They said that they saw many soldiers wearing mechanical suits and exoskeleton power mechs. They have super combat strength!" Hearing this.

The expression on the deputy commander's face softened a little.

"The Battle Command is a bunch of lunatics," he continued after a while. "I told you that it was irrational to start a war with Hurricane Power Group. They just don't understand!"

As he spoke.

The deputy commander of the city defense paused for a moment.

Actually, he wanted to say that he was the boss of a higher level, but he didn't dare to point fingers. Therefore, he could only take a step back and ask the old lady of the Battle Command.

He cursed for a long time.

After calming down a little, the deputy commander of S City began to call the higher-ups. Hurricane Power Group actually sent troops to invade their Cloud Sky Group's territory. At this moment.

This battle, which was originally still in the observation and probing stage, was suddenly completely different.

After all, in the past, they could fight and fight.

There was still some tacit understanding between the two sides.

The consortiums would not really invade and annex the other party's territory unless they had a falling out.

And now.

The Hurricane Power Group had actually sent troops to attack the hinterland of Cloud Sky City. It seemed that they were really prepared to fight the Cloud Sky Corporation to the death this time. After making the call and reporting.

The deputy commander left the soldiers from Severny in Gillette Town.

After all, although Jilie Town did not produce resources, it was one of the places where the surrounding resources had to pass through.

They couldn't let them be exposed to the elite troops of Hurricane Power Group who might appear at any time.

On the other side.

He wanted to eliminate Li Yueming and the others.

The next morning.

Countless of reporters who had caught the scent of the smell were trying to find a way to rush to Gillette Town.

However, the Cloud Sky Corporation was clearly not prepared to announce this humiliating news. Instead, they sent more troops and began to fight with Hurricane Group.

After all, if one wasn't ruthless, one wouldn't be able to stand firm.

Even if Hurricane Power Group was an old-fashioned financial magnate.

However, if the Cloud Sky Corporation could still admit defeat in such a matter...

They would become a laughing stock in the eyes of other corporations.

Hearing this.

Many members of the Resistance were momentarily confused.

After a moment, a few sparse voices spoke, "In order to overthrow the rule of the corporations and restore the order of human civilization!"

He looked at the confused eyes of the Resistance members.

Li Yueming's expression was cold and emotionless. "If that's the case, why are you all so lost now that you're firmly walking on this path? Are you ready to give up on your dreams?"

What was an ideal?

In fact, many members of the Resistance didn't understand this concept.

The real reason why most of them joined the rebellion was not for their so-called ideals.

It was because he couldn't stand being squeezed by the corporations in the city and chose another path.

The so-called overthrow of the tycoon's rule and the restoration of order in human civilization.

To them, it was more like an empty slogan.

After all, everyone knew that this was impossible.

The power of the corporations had spread all over the world, and even the government forces had become lackeys under their hunting.

They had less than a few tens of thousands of people, so how could they fight against the corporations that had reached the peak of glory?

He seemed to have sensed their thoughts.

Li Yueming smiled.

Standing in the yellow sand, he said firmly, "I know that you joined the camp of the Rebellion Army because you couldn't find a way out in this morbid world and had nowhere else to go. In fact, for most of you, joining the camp of the Rebellion Army is nothing more than a change of place to make a living! !

"I understand your thoughts, but the Resistance camp is not your safe haven.

There is no place in this world that can be a safe haven for cowards.

Remember, everything that humans have is created with their own hands!"

"If you want a beautiful world, it's useless to rely on fantasies and escape. You have to bleed and sacrifice yourself to create it!"

"In addition, even a single spark can start a prairie fire!"

"Just because we're alone now doesn't mean that we'll be alone in the future!" "Even now, there are still countless people struggling in this sick world...'

“They can’t afford to see a doctor, take medicine, or live in a house. Many of them even lost their freedom when they were born and could only become slaves of the consortium!”

“What we want to do is to gather all these people who are still struggling...”

“By then, all the corporations in the world will tremble in fear under the iron fists of the Resistance Army! ”

The whole process of the statement

Li Yueming was neither emotional nor hot-blooded.

Instead, his face was cold.

This sick world was like a ball of hay.

The corporate giants seemed to be powerful, but in reality, they were already on the chopping board.

All Li Yueming needed to do now was to ignite a small spark.

He looked at the Deputy Chief who was as hard as iron in the desert.

All the members of the Resistance fell silent.

They did not reply, but their confused expressions finally became clear.

Perhaps the majority of the Resistance didn’t fully believe Li Yueming’s description.

However, people always had a thought.

Even if you die, you have to know why you died, right?

In the blink of an eye, another half a year had passed.

Li Yueming was eleven years old.

The original 30,000 Rebellion Army soldiers had been reduced to 10,000.

However, it was even more troublesome for the towns in the northwest.

After being chased and intercepted again and again, the Resistance had learned their lesson.

Usually, they would change places after firing a shot, collect some military supplies, and then escape.

I will never stay in battle.

In the past, when there were many people, they could still track the traces of Li Yueming and the others.

But now that the number of people had decreased, the remaining were all elites who had never lost a hundred battles.

It became more and more difficult to track and eliminate them.

In addition.

Now, many people had come to their senses.

Li Yueming and the others didn't seem to be the elites sent by Hurricane Power.

It was a small force organized by the rebels.

Of course, the flames of war on the frontlines had already been completely ignited.

Now, it was obviously impossible to call off the army.

The headquarters of the Cloud Sky Corporation had no time to care about the matters here.

After all, in the eyes of the higher-ups in the headquarters, it was just a resistance army of 18,000 people.

No matter how much trouble he caused, his influence was limited.

It was not worth their attention at all.

Therefore, he had no choice.

The cities in the northwest region could only think of their own ways to seek help.

After finally finding the traces left behind by the Resistance.

The three large cities in the northwest joined forces and sent out nearly 100,000 troops.

He wanted to swat this annoying fly to death in one fell swoop.

In order to prevent Li Yueming from escaping.

Among them, there were even three A + class existences.

However, just as hundreds of thousands of troops were searching along the traces left by the Resistance, Li Yueming led the Resistance to Severny, which had the weakest defense.
