

Maxing MT 211

Chapter 211: Full Power Explosion, Are You Lambs Ready to Die? 1

“Boom!”

With a loud bang, the entire Severny trembled.

Dozens of cracks appeared on the originally sturdy city wall due to the violent explosion.

Heavens, what’s going on?”

“I don’t know. There seems to be a commotion on the other side of the city wall.

Could it be that some faction is attacking the city?”

“Are you still asleep? This was Severny, far from the border. How could someone attack the city?”

“I heard that there’s a group of Resistance Army near S City recently. Could it be the Resistance Army?”

“How can the Resistance be so powerful?”

“I don’t know. I hope it won’t affect us!”

In Severny, countless residents woke up from their dreams.

He felt the vibrations.

All of them were bewildered.

Outside the city.

Li Yueming took the lead and flew out.

Behind him, the mecha and mechanical equipment troops followed.

In the past year.

Li Yueming had been hiding his true strength all this while, only displaying the destructive power of a Grade B Super.

That’s why.

In fact, all the cities in the northwest had seriously underestimated Li Yueming’s strength.

And this time.

Li Yueming finally stopped hiding and keeping a low profile.

Behind him, Sun Ruo, who had already advanced to Class A-, waved her hand.

Instantly.

All the firearms on the city wall were silenced.

Taking this opportunity.

Li Yueming led the most elite troops of the Resistance and charged in.

He poured all his strength into the other Resistance mechas and equipment around him.

He synchronized his body's attributes with it.

In just a few seconds.

Hundreds of Rebellion Army elite squads' combat power suddenly soared, transforming into Asuras as they charged forward.

Li Yueming was even more terrifying. He slashed down with his Dragon Slaying Blade.

The 30-meter-long golden saber swept across everything.

Almost none of the city guards could stand on it completely.

Countless residents of Severny walked onto the streets. When they saw the scorching and dazzling golden light on the city wall, they all felt a shock that shot straight to the top of their heads.

"Heavens...What was that? The power of a god?"

"A long golden blade that is dozens of meters long..."

"It's too terrifying. It's impossible for a human to possess such power. It's holy and scorching!"

At this moment, in the eyes of countless people.

Everything that Li Yueming displayed was undoubtedly the power of a god!

However, this golden god was now emitting a killing intent!!!

Two hours later.

Li Yueming expressionlessly took off the head of the City Lord of S City.

The resistance army that followed soon took over everything in Severny.

The next morning.

Under the threat of more than 10,000 fully armed 'riots', many residents of Severny were invited to the government square.

Under the uneasy gazes of all the residents.

Li Yueming stood on the high platform and said, "Everyone, please rest assured that we are a disciplined resistance army. We are committed to resisting the oppression of the corporations and restoring world order...In all senses, our interests are the same as yours!"

"However, now is a special period. In case of uncontrollable accidents, I want to announce three pieces of information to everyone!"

"First point: S City has been occupied by the Resistance Army and is no longer a city ruled by the corporations!"

” The second point: We will soon be issuing a few new city security regulations. Here, I will give you a heads-up. Anyone who dares to go against the new law, no matter who it is, will be killed without mercy!”

“Third point: S City will enter a closed management state for the time being, but please rest assured that the city will return to normal after cleaning up some old filth!”

After saying these three points.

It didn't matter if the residents could understand.

Li Yueming turned around and left.

He couldn't be blamed for being in a hurry. Time was really tight.

After occupying a city, the Cloud Sky Corporation's reaction would probably be very intense.

Li Yueming had to digest the entire S City in the shortest time possible.

Moreover, there were some things that could only be done when they first entered the city.

For example...Murder!

In the next month.

The heads of S City rolled.

The first law that Li Yueming issued was to eliminate the organization that sold human organs in the city.

The second law was to eliminate all organizations that sold certain small pills in the city.

The third law was to crack down on the evil forces in the city.

Two months, the entire S City was in chaos.

Li Yueming had personally killed dozens of forces and sects.

The streets of the city were littered with corpses.

At the same time.

Li Yueming started to resume production.

He opened up a few weapons production lines and hired people to work overtime to produce various weapons and equipment at five times the salary of the consortium.

On the other side.

Even if someone deliberately controlled the public opinion, the news of S City being occupied still spread.

Instantly, the entire Red Leaf Empire was in an uproar.

One had to know that in the decades since the establishment of the Cloud Sky Corporation, they had never lost their inner city.

Even if he suffered a slight loss.

That was also when he was at a disadvantage when he was wrestling with other corporations.

But now, there was actually a resistance army that had forcefully broken into Severny from the front.

What kind of concept was this?

When they heard this news, even the highest level meeting of the Cloud Sky Corporation was silent.

The higher-ups had thought that they could easily kill a Resistance army.

It only took them one night to occupy S City..

Chapter 212: Full Power Explosion, Are You Lambs Ready to Die? 2

The higher-ups finally sensed that something was wrong and began to investigate the entire matter.

In addition.

The hundreds of thousands of troops that had been mobilized to search for the Resistance in the northwest region also realized that they had been fooled.

They immediately turned their attention to S City.

However, when they were ready to take back S City and destroy the resistance in one fell swoop, they realized that Li Yueming had abandoned the city and fled.

Other than taking away the elite weapons that had been produced after working overtime for half a month.

He only killed a group of local ruffians supported by the corporations.

This feeling of madness made the pursuing troops angry and afraid.

He was angry that Li Yueming was so slippery that he couldn't catch him at all.

He was also afraid that Li Yueming was slippery and couldn't be caught at all.

If Li Yueming stayed behind to defend the city.

With the various weapons in their hands, they were not afraid of the resistance army, which only had 10,000 people and were not well-equipped.

But now, Li Yue's action of running away after shooting was the biggest headache for them.

He didn't know where to defend.

He could not find the exact location of the attack.

As he moved around.

They couldn't even touch Li Yueming's hair.

However, that was all.

After leaving Severny.

Just as Li Yueming was heading south, preparing to go to the next city to fight a guerrilla.

Halfway.

Nine of them wore black hoods.

A person with a wavy cloud tattoo on the back of his clothes blocked his way.

He narrowed his eyes.

Li Yueming felt a strong sense of danger from the other party.

If nothing unexpected happened, the hooded men in front of him should be extraordinary humans above Grade A.

He glanced at them.

Li Yueming turned around and said to Sun Ruo, "Take the troops and continue south. I will follow you!"

Sun Ruo's face was filled with worry. Clearly, she also felt that these mysterious people were not simple.

After hesitating for a moment, she finally gritted her teeth and said, "Don't take it head-on. We'll mark the road and catch up as soon as possible!"

Li Yueming nodded without saying anything.

The nine hooded men did not stop the team from leaving.

Obviously.

From the beginning to the end, they only had Li Yueming in their eyes.

As for the Resistance Army behind him.

From the beginning to the end, it was just an insignificant bug.

Amongst the hooded men.

A woman with a hoarse voice said, "Who are you?"

Li Yueming had been wearing his mecha the entire time. Therefore, they naturally could not identify Li Yueming.

This was what they were puzzled about.

A-class supernatural beings were not common existences.

In a peripheral city like Severny, there would at most be one [A+] class supernatural being guarding it.

The Yunxiao Corporation controlled 64 cities.

At most, there were only a hundred or so [A+] class Extraordinaires.

Every one of them had come up step by step from a weak period. Even now, there were legends of this group of people circulating in some places.

And now.

Li Yueming seemed to have jumped out of a crack in the rock.

He couldn't find any traces of the past.

This undoubtedly puzzled them.

In response, Li Yueming only smiled. "Is this important?"

After a moment of silence, the hoarse girl nodded and said, "It is indeed not important. In any case, it will only be a corpse in the end..." At this point.

The communication between the two parties ended.

The battle was about to begin.

Out of the nine A-class Extraordinaires, five of them were above A + class.

Three of them were originally pursuers sent by the three major cities, and the other six were sent by the headquarters of the Cloud Sky Corporation.

Back when they were chasing after Li Yueming.

Professor Cheng had only prepared a pseudo-A + grade genetic monster.

After all, Li Yueming hadn't awakened his superpower back then. Furthermore, the pursuit of the Experimentals had always been a private matter between Professor Cheng and Ye Tianzi.

If it wasn't for Ye Tianzi backing him up, Professor Cheng wouldn't have any power after leaving the laboratory.

Therefore, he only used the most basic part of the Nightless City's power.

Compared to the current five true A+ grade Extraordinaires.

The pressure was simply not in the same dimension!

The mech exploded with a blazing golden light. Li Yueming held the Dragon Slaying Blade and pounced forward.

Strictly speaking.

This was the first battle he had fought with the world's top experts.

It was a good opportunity to experience the mysteries of Extraordinaires.

The first one to fight Li Yueming was the woman with the hoarse voice.

Li Yueming rushed over and slashed down with his golden sword.

The woman was obviously shocked.

With a push of his hands, he flew into the air.

He dodged Li Yueming's attack.

With a wave of his hand, thousands of leaves shot towards Li Yueming like arrows.

Li Yueming's expression was very indifferent.

He ignored the incoming leaves and continued to chase after the woman who had already flown dozens of meters into the air.

It was obvious that he wanted to finish off one of them in one go.

But at this moment.

Another [A+] class supernatural being made his move.

Countless streams of air gushed out from the supernatural being's body and attached themselves to the leaves on the ground.

The leaves, which were already moving quickly, doubled in speed in the blink of an eye.

They flew up from the ground like thousands of fleeting streams of light. Before Li Yueming could prepare, nearly a thousand leaves had already hit his body.

Ding, ding, ding!

Even with the support of the golden martial talent.

Li Yueming's mech was also pierced by the steel.

The surrounding supernatural beings gasped when they saw this.

In midair.

The woman with the hoarse voice exclaimed, "He's actually unharmed? How is this possible? There was something wrong with the mech he was wearing...No, there was something wrong with the golden power.. That should be his talent!"

Chapter 213: Full Power Explosion, Are You Lambs Ready to Die?_3

It was obvious that after the hoarse woman and the other supernatural being's double blessing.

These leaves already possessed extraordinary attack power!

But now, they all hit Li Yueming, but they didn't leave any injuries on him.

It didn't even pierce through his armor.

At this moment, the hoarse woman's face was filled with an expression as if she had seen a ghost.

Li Yueming's expression was normal.

He glanced at the supernatural being on the ground and ignored him.

Instead, he continued to attack the woman.

However, at this moment, the remaining seven supernatural beings all charged over.

Obviously, he didn't give Li Yueming a chance to defeat them one by one.

After a few attempts, the attacks were all disintegrated.

A few supernatural beings revealed a playful look on their faces.

Obviously, Li Yueming's attack and defense were very high.

However, there were supernatural beings among them who could accelerate objects.

Some people could even control gravity to slow Li Yueming down.

Under the hunting of the nine of them.

It was impossible for Li Yueming to have a chance to fight one-on-one.

Someone even mocked, “You have claws and teeth but are restricted everywhere. Doesn’t it feel uncomfortable?””

Seeing this.

Li Yueming sighed.

He could not help but spread his hands and say, “I originally wanted to have fun with you guys, but I didn’t expect you guys to be like cowards...” Then there’s nothing I can do! All of you, go to hell!”

As a Martial Saint of the Wilderness...

Li Yueming had only been using his god-like martial strength.

After all, this thing was rather rare to a boorish man.

It was also more convenient to use.

Therefore, he would use it often.

But that didn’t mean that was all he knew.

In fact, Li Yueming’s best skill was still the Star Moon Art that had undergone countless modifications and changes.

And the martial arts that had been honed into his flesh and soul!!!

Since this group of nine people were fighting against him, they did not care about martial ethics.

Then don’t blame him for using a cheat!

Hearing this.

A male supernatural being sneered, ““I don’t know if I should laugh at your arrogance or your recklessness? I admit that you’re very strong, but that’s all..

And...”

He didn’t even have time to finish his sentence.

Li Yueming, who was not far away, seemed to have changed into a different person.

The golden light was no longer emitting from his body. Instead, it was slowly retracted into his body.

Moreover, the aura that erupted from his body was rising step by step.

His aura rose at an extremely fast speed.

In just a few seconds, it had already exceeded the limit of their psychological endurance.

“What happened? This fellow...Is it a monster?”

“This aura, could he be an S-class supernatural being? No, it’s absolutely impossible!”

“Could it be that he is the legendary...Ancient warrior? Didn't they hear that all ancient martial art practitioners had died long ago?” “Oh no, don't let him continue to improve!”

He witnessed everything.

The few Extraordinaires who thought they were playing with their prey finally felt a deep sense of fear.

Not far away, Li Yueming seemed to have transformed into a ferocious beast.

The sense of oppression he gave off was not much different from the few 'lords' they had come into contact with in the past!

Li Yueming stretched his body.

Just now, he had already circulated the Star-moon Art.

He mobilized all the cell strength in his body.

He directly transformed into a Martial God.

This was the benefit of creating a cultivation technique.

Even if they were in a different world, as long as Li Yueming was given enough time.

He would be able to convert the energy of unknown nature from other worlds into energy that he was familiar with.

In addition.

Although the cultivation techniques he had bought in the previous martial arts world could not be used.

However, the few top-grade martial arts techniques that he had bought from Wang Linlin with reincarnation points could still be used with the help of the Star-moon Secrets.

[Barbarian Blood Battle Technique]

It was a top-grade secret manual that focused on punishment in the martial arts world.

Its effect was that it could obtain extremely powerful combat strength by burning Vitality.

After entering this world, he only needed to slightly change the way he obtained power. He would change from burning his martial arts blood to burning the extraordinary energy in his cells.

It could be used perfectly.

Now, Li Yueming's strength had already risen to an extremely terrifying level!

Looking down at the nine A-class superhumans of the Cloud Sky Group, their expressions changed drastically.

Li Yueming licked his lips.

“Are you ready to die, lambs?”

Chapter 214: Gun in Hand, Follow Me! 1

A-class Extraordinaire.

Even in the Cloud Sky Corporation, each of them was a well-known powerhouse.

Initially, when he was fighting with Li Yueming.

Although they were also surprised by Li Yueming's strength and powerful offensive ability, they were still shocked. However, it was still within their reach.

But now.

Looking at Li Yueming in the sky, the group of people felt an unprecedented terror.

The aura on the other party's body had already far exceeded the scope of their understanding.

It was impossible for an [A+] class supernatural being to unleash such power.

Hence, the two of them were in a daze.

There was only one explanation.

The guy in the mech not far away had already touched the threshold of an S-class supernatural being.

What did this mean?

The group of Extraordinaires 'minds were blank.

In fact, they did not know what this meant.

They only knew that each other's faces were already extremely pale, and they were no longer teasing each other.

A moment later.

Finally, someone came back to their senses.

The woman with the hoarse voice said hurriedly, "Hurry up, don't let the transformation continue!"

He heard her voice.

The other A and A+ class Extraordinaires also woke up from their daze.

He began to use all kinds of methods to stop Li Yueming from continuing his transformation.

However, no matter how they attacked.

Li Yueming, who was in the sky, did not seem to feel it at all.

The breath is still unstoppable and becomes stronger.

At the end of the attack, the A+ grade superhumans felt their scalps explode.

They couldn't imagine what kind of monster Li Yueming was. He was able to escape unscathed after being surrounded by so many Grade A+ Extraordinaires!

After a few breaths, Li Yueming finally adjusted his condition.

Being surrounded by four A class and five A+ class Extraordinaires, even he had no choice but to use his trump card.

Barbarian Blood Battle.

Li Yueming had spent 200,000 reincarnation points to buy a top-grade martial arts technique.

After using it, it can increase Li Yueming's attributes by 500%.

The price was that it could only last for five minutes.

After five minutes, he would enter Sage Time, and he would need to rest for a few days before he could fully recover.

Therefore, Li Yueming had to end the battle quickly!

He stretched his body.

Golden light flowed out of Li Yueming's body again. A moment later, the Dragon Slaying Saber in his hand was dyed with a layer of pure gold.

Now, Li Yueming's attributes had been greatly enhanced.

In contrast.

The attributes of the Dragon Slaying Saber naturally rose with the tide.

The golden light transformed into a hundred-meter-long giant blade that was like a huge golden sun, dyeing the entire sky with brilliant colors. Li Yueming suddenly fell from a height of a hundred meters.

He swung the long saber in his hand.

Suddenly, golden light bloomed.

Amongst the nine, a weaker A-class supernatural being's eyes were filled with fear.

Because he realized that Li Yueming seemed to have his eyes on him.

The sharp light that erupted from the golden longsword made him smell the thick aura of death.

The A-class supernatural being subconsciously controlled his body to retreat nearly a hundred meters.

However, he was still hit by Li Yueming's tyrannical saber light.

There were no surprises.

Under the powerful attack of the Dragon Slaying Blade.

The A-class supernatural being was split in half.

Seeing this situation.

The other eight Transcendents were almost scared out of their wits.

It was just one slash.

An A-class supernatural being didn't even have the chance to make a sound before he died.

Such a scene.

It made the other Extraordinaires want to retreat.

He had no choice.

Li Yueming's current combat strength was too terrifying.

It had already exceeded the scope of their enemies.

One had to be an [S] class that could destroy a city to fight against this monster.

Li Yueming's explosive speed extinguished their thoughts of escaping.

After killing an A-class supernatural being.

Li Yueming appeared in front of an A-class supernatural being in a few flashes.

Li Yueming's fist was like a missile that pierced through his chest.

Fortunately, this A-class supernatural being had a life-saving talent.

Even though there was a huge hole in his chest that was clear from the front to the back.

The supernatural being was not dead yet.

However, his face quickly turned pale.

He staggered back a few steps and glanced at Li Yueming with fear. He met Li Yueming's crazy and indifferent eyes.

Instantly.

The supernatural being broke down and completely lost the will to fight. He turned around and prepared to escape. But how could Li Yueming let him have his way?

Another punch was thrown.

But this time, he did not attack the torso.

Instead, it directly blasted the head of this tenacious supernatural being into an exploding ball.

In just a short span of two breaths.

Out of the four A-class superhumans who had surrounded Li Yueming, two of them had died.

The remaining two were scared out of their wits.

When they saw Li Yueming's gaze sweep over, they shivered.

He turned around and wanted to run.

Seeing that the situation was not looking good, one of the remaining five A+ class Extraordinaires hurriedly said, "'Don't run, you can't escape. If you stay with us now, you might still be able to survive, but if you run, you will all die!"

Hearing this.

The remaining two A-class superhumans also calmed down a little.

Indeed, judging from the speed that Li Yueming had displayed just now, escaping would only lead to death.

Instead of doing so, it was better to take a gamble and see if he could find a chance of survival.

Seeing that the two of them had calmed down a little.

The woman with the hoarse voice said, "Don't be afraid. Although I don't know how this guy suddenly became so powerful, there's no doubt that this state won't last long. We just need to stall him and wait for him to exhaust himself!"

Chapter 215: Gun in Hand, Follow Me!_2

"In addition, I've already called the surrounding ambush troops to move closer to us. We just need to stall for a few more minutes. Once the firearms are in place, they can also play a very good role in restraining us!"

Among the nine people.

She was the captain of this operation.

In the beginning, no supernatural being, including her, took this operation to heart.

As a result, he did not even have a basic plan.

After all, in their eyes.

The biggest difficulty of this operation was actually to find Li Yueming.

As for capture or annihilation.

What kind of strategy was needed for a IV9?

He would just have to directly attack.

But now.

They realized that Li Yueming was tens of times more troublesome than they had imagined.

As the core leader.

The role of women began to show.

She quickly analyzed the current battlefield situation and made a temporary battle plan.

However...

This also successfully made Li Yueming target her.

After all, Li Yueming had his eyes on her from the very beginning.

After sensing Li Yueming's murderous gaze, he felt a sense of dread.

Even though women had experienced countless storms and waves.

But now, he felt a bone-piercing chill.

It felt like a sheep being targeted by a ferocious T-rex.

It was a powerful sense of oppression that came from the level of life.

He looked at the nervous woman.

Li Yueming smiled and said, "Your analysis is correct, but... ' Can you really stall the enemy?"

As he spoke.

His figure flashed again.

In the blink of an eye, he disappeared from the spot.

In the next moment, he appeared in front of the woman and raised his Dragon Slaying Saber.

The woman clenched her fists.

It directly turned the empty air into a wall of air that was hundreds of times harder than metal.

Previously, when Li Yueming attacked a few times.

The Dragon Slaying Saber was blocked by the woman's Air Wall.

But now, Li Yueming's strength was no longer the same as before.

Therefore, the moment the knife touched the wall of air, a gap was instantly cut open in front of the woman.

Li Yueming exerted his strength.

The wall of air was immediately torn into nothingness.

The other seven supernatural beings also charged at Li Yueming.

Each of them used their strongest power.

However, Li Yueming did not care about this. He still raised his long knife and slashed at the woman.

Obviously, he had made up his mind to kill this troublesome woman first.

In the next second.

Dozens of attacks landed on Li Yueming.

Cracks appeared on the mecha.

However, Li Yueming still acted as if nothing had happened.

Under the woman's terrified and desperate gaze, he cut her into two.

In just a few breaths, Li Yueming killed another person.

This time, he had killed an [A+] class supernatural being.

The remaining six supernatural beings couldn't help but stare at him in anger.

Two of them were completely scared out of their wits and turned around to run.

After all, Li Yueming was fast.

But there were six of them.

If the remaining four people could stay behind to cover the rear.

Then they might still be able to run.

However, Li Yueming was clearly prepared for this.

After using his trump card.

He didn't want to let anyone go.

About half an hour later.

Nearly 100,000 soldiers of the Northwest Coalition Army followed the commotion and arrived on the battlefield.

He looked at the mess on the ground and the traces of blood.

The commander of the Northwest Coalition Army had a bad feeling.

He finally calmed down.

The commander waved his hand, and the soldiers behind him began to clean up the minced meat and blood residue on the ground. Then, he began to perform a genetic comparison.

A moment later.

A lot of information was delivered to the commander.

Looking at the lines on the screen, the commander's expression became more and more frightened.

When he finally saw the last message.

He was silent for a long time.

When he finally came back to his senses, the commander said with a livid face, "The four Grade A Extraordinaires and five Grade A+ Extraordinaires who are pursuing the leader of the Resistance Army... They were all annihilated!

Heavens, what exactly did we provoke?"

One had to know that three of the A-class superhumans were sent out by the northwestern city.

He could be considered a top-notch combat power among supernatural beings. He originally thought that capturing Li Yueming would be a piece of cake.

However, he realized that Li Yueming was hiding his strength.

He had actually captured S City by himself.

That's why.

The Northwest Coalition Army realized the seriousness of the matter.

That was why he urgently went to the headquarters of the Cloud Sky Corporation to apply for more and stronger supernatural beings to join the pursuit.

However, he never dreamed that...

The four Grade A Extraordinaires and five Grade A+ Extraordinaires who had participated in the pursuit had all died without a sound on this barren land.

The shock this brought to the commander was unimaginable.

He did not even know what monster he was chasing.

On the other side.

Li Yueming followed the traces left behind by the Resistance.

Previously, he had withstood the attacks of six A+ class Extraordinaires.

Li Yueming was actually a little injured.

However, for Li Yueming, who possessed the Rapid Recovery Skill, if the supernatural energy in his cells wasn't completely drained by the Barbarian Blood Secret, then he would have been killed.

That injury could not be called a loss. It could be recovered in just a few breaths.

Because his body had been emptied.

His injuries affected Li Yueming's speed and delayed him for quite a while.

Finally, two days later.

Li Yueming caught up with the panicked Resistance Army.

When he saw that he was completely unharmed.

The entire Resistance Army erupted in cheers..

Chapter 216: Gun in Hand, Follow Me!—3

At this moment, Li Yueming was their soul.

Only with Li Yueming here would the soul of the Resistance be there!

After a short rest.

Li Yueming led the Resistance Army and started to engage in guerrilla warfare.

When there was a lack of resources.

The Resistance Army would occasionally attack two cities and plunder the resources of the Cloud Sky Group.

Right now, the Cloud Sky Group was in a heated battle with Hurricane Group.

They could not spare too much strength to deal with the Resistance.

There was no need to mention the cities in the northwest. Li Yueming and the rest of the Resistance had a headache.

At the same time.

Public opinion was also spreading.

Almost all of the cities in the Red Leaf Empire had heard that a Resistance army had appeared in the northwest.

They were wandering around the cities in the northwest and even captured several third-floor cities.

It caused trouble for the Cloud Sky Corporation.

For this reason, many troops went to war.

However, even after expending tremendous effort, he still could not catch it.

There was even a rumor that the Cloud Sky Corporation had sent more than ten A-class superhumans to suppress the bandits.

However, he suffered a fatal blow in the wilderness.

More than a dozen A-class Extraordinaires were wiped out.

The commander-in-chief of the Northwest Army was so frightened that he called the headquarters overnight to report.

Of course, no one believed this rumor at the beginning.

After all, a dozen or so A-grade Transcendents were no ordinary force. They could already be considered the most top-notch combat power that could be mobilized.

Some third-rate financial groups could only send out so many A-class superhumans.

As for the higher-level S-class supernatural beings, they could already destroy cities.

Under normal circumstances, even the financial groups would find it hard to order them around.

Therefore, no one was willing to believe it.

However, as time passed.

Many people realized that several A and A+ class Extraordinaires who were guarding the city had disappeared.

At the very beginning.

The Yunxiao Group and the government were still trying to cover up.

However, the things that Li Yueming did were more terrifying and shocking.

The commotion was getting bigger and bigger.

Naturally, this information could no longer be concealed.

In the end, not only could it not be covered, but the more it was covered, the faster it spread.

After all, this was how ordinary people thought.

The more they didn't know, the more curious they became.

The more they denied it, the more they believed.

In the end, Cloud Sky Corporation could only give up.

On the surface, it was still forbidden to spread all information about the Resistance.

However, there was no way to control the news that was being released in the dark.

Now.

Many towns were discussing the matter of the Rebellion Army.

Among them, some slogans about the Resistance made countless ordinary people in the various major cities excited.

It was said that this was what the Rebellion Army's commander, the man wrapped under the mecha, had read to the people in the city after the city had been captured.

At that time.

His hands were still stained with the blood of the higher-ups of the Yunxiao Group.

"You are not slaves of the corporations, nor are you dogs tied to a rope that only deserves to bark..."

"You are human, the same as those so-called elites and nobles!"

"Your labor should be rewarded sufficiently, and the fruits you produce should be returned to yourselves!"

"The Rebellion Army's dream is to unite all the people who can't afford medicine, hospitals, or houses to overthrow the tycoon's rule and establish a Crimson Dynasty where everyone is equal!"

"A single spark can start a prairie fire. All the corporations in the world will tremble under the Crimson Dynasty's iron fist."

This slogan was an extremely taboo message for the Cloudsky Group.

It had once caused a complete ban on all channels.

In fact, once someone announced it...

The City Defense Army and the Special Agent Team would immediately throw the apostle into prison.

But even so.

In many corners where the sunlight could not reach.

These slogans were still growing and spreading in secret.

Transcendence Calendar Year 344.

Li Yueming was twelve years old.

In the past two years, he had turned the entire northwest of Yunxiao Group upside down.

Originally, the Cloud Sky Group was still chasing after them.

However, they suddenly realized that they couldn't find any traces of the Resistance Army.

It was as if the other party had installed surveillance cameras in their army.

No matter where the pursuers appeared, they could easily avoid them.

Furthermore, they knew better than the commander of the Northwest Legion where the defense was weak and where it was strong.

No matter how the commander tried to adjust the defense, it was useless.

This strange phenomenon made the commander of the Northwest Army think that there was a traitor among them.

However, after searching from top to bottom.

The commander couldn't find anything.

Just as he was still doubting his life, the Cloud Sky Group headquarters sent law-enforcement officers to find his headquarters.

An arrest warrant was issued for him on charges of leaking military secrets.

Good heavens.

After investigating for a long time, he was the most likely person to leak the secret.

After all, in the entire Northwest Army.

No one knew the military's defense better than him.

As expected, the clown was actually me.

After taking the commander away.

The headquarters of the Cloud Sky Corporation had found a new commander.

However, the situation did not change at all.

Most importantly, the new commander who had just been transferred over and had not had the time to figure out the deployment of the Northwest Army had really become someone who knew more about the deployment of troops than the Resistance.

Under such circumstances.

Li Yueming's Resistance Army had been doing well for the past two years.

He didn't have to worry about food or clothing.

Occupying a city was no different from going home.

It could be said.

The few cities in the northwest were still under the jurisdiction of the Yunxiao Group in name.

In fact, it had already become a private plot of land for the Resistance.

On the surface, the Resistance still had more than 10,000 people, but in secret, the Resistance had already expanded to more than 30,000 people. However, most of the newly joined resistance forces were in the city.

Or they became spies.

Or they could organize their own people to provide logistics for Li Yueming and the others.

It could be said that as long as the time was right.

Li Yueming stood on the stage and waved his arm.

His voice probably shook the sky.

As for why this happened? That would be up to the corporations themselves.

In his previous life, there was a widely circulated joke on the Internet that could summarize everything.

” When a loaf of bread costs 500,000 marks, people no longer care whether they follow the devil or God.’

It was the same in this world.

When living was more torturous than death.

As long as they could see the light, the sound of people pulling their guns was faster than anyone else.

Chapter 217: As long as the ideal is not extinguished, even a single spark can start a prairie fire!_1

Transcendence Calendar Year 346.

Li Yueming had already reached the peak of the A+ class supernatural beings.

Li Yueming had already reached the peak of the A+ class supernatural beings.

He was just a step away from becoming an S-class supernatural being.

This year, he was only thirteen years old.

This kind of heaven-defying improvement speed was related to the nutrient solution that Professor Cheng fed him regardless of the cost.

Back then, he had sucked hundreds of millions of blood in a petri dish. As a result, Li Yueming’s cells were able to squeeze out a considerable amount of energy.

Thus, there was no need for him to slowly comprehend the power of his breakthrough like ordinary Extraordinaires.

At the same time, Hurricane Group and Cloud Sky Group were really on fire at the northern front line.

The most direct manifestation of this was that Hurricane Group had sent out a team of Growth-users.

The Cloud Sky Corporation had also dispatched a considerable number of genetic warriors.

At the very beginning.

Most of the surrounding corporations who were watching the show thought that the Cloud Sky Group would be defeated.

However, to everyone’s surprise.

The Cloud Sky Corporation actually did not show any signs of weakness on the battlefield.

Part of the reason was that Hurricane Group hadn’t revealed their trump card yet.

But similarly, there was no evidence to prove that the Yunxiao Group had already used all their trump cards!

This result caused many consortiums to ponder.

Hurricane Group was one of the first group of established magnates to rise up behind the Andre Group, which developed the superpower drug.

But now, he did not have much of an advantage in the battle with the Cloud Sky Corporation.

The amount of information contained in this was relatively large.

The genetic warriors and the Growers represented the core technology of both sides.

In a sense, this was not as simple as a war against foreign countries.

It could also reveal to the outside world the difference in strength between the two paths.

The Cloud Sky Group, which had only been established for less than 50 years, was able to rely on genetic warriors to contend against the Hurricane Group.

This was enough to show how powerful a genetic warrior was.

Was this another path after the supernatural?

Extraordinaries awakened their own genetic locks and then awakened their extraordinary powers.

Genetic warriors, on the other hand, achieved the same goal through artificial genetic manipulation.

Does this mean that after the technology matures, humans will be able to master the method of creating supernatural beings?

Without a doubt.

The related topics swept across the entire planet.

At the same time, more and more people were looking at the Red Leaf Empire and the East Peak Empire.

Of course, all of this had nothing to do with Li Yueming.

Seeing the Cloud Sky Corporation and Hurricane Power fight to the death..

When the time was right.

He directly led the resistance army to capture Severny.

This time, Li Ming didn't resort to guerrilla warfare. Instead, he completely occumea City.

However, his actions did not anger the surrounding cities.

On the contrary.

The higher-ups of the few big cities were almost celebrating.

After all, Li Yueming's guerilla tactics were the ones that made them feel uneasy.

The kind that knew the enemy was in the dark.

However, the feeling of not being able to find him no matter how hard he tried was too unbearable.

In comparison.

After Li Yueming occupied Severny, they at least knew that they had a clear target.

Instantly.

Hundreds of thousands of troops set off.

This time, as long as they could surround Severny, the Resistance would not be able to escape even if they had wings.

However, more than ten days after the army set out.

Yunxiao Group was located in the third largest city in the northwest, Bellevue.

Li Yueming appeared with the Resistance.

He had already played this trick many times.

In the past, he had only played in small cities. This was the first time he had targeted a big city.

Severny had indeed been occupied.

However, he only showed his face.

The other movements were organized by the newly recruited resistance forces in Severny.

Speeches and patrols.

The huge commotion successfully deceived the decision-makers of the Northwest Group.

Of course, the most important thing was that Yunxiao Group was in the open while Li Yue was in the dark. There was always a sufficient information gap between the two sides.

This was the most important factor that allowed Li Yueming to take the initiative.

After observing the movements in the city.

Li Yue Ming led the Resistance Army and charged in.

With his current combat strength, as long as he was not attacked by a few extremely powerful weapons. Ordinary firearms could hardly hurt him.

Of course.

In this kind of siege battle, Li Yueming himself was not the most useful.

It was Sun Ruo, who was following behind Li Yueming.

As a metal-type Extraordinary, he is a member of the group.

Now that Sun Ruo had successfully reached [A] class, her control over metal had reached a whole new level.

He used all his strength to activate it.

It could render all the metal weapons on the city wall useless.

This was a devastating blow to the City Defense Army, which relied on firearms to defend the city.

Therefore, after rushing up to the city.

Li Yueming did not spend much effort to clear the obstacles.

More troops were gathered. Unlike the small cities, Bevaro had sent out tens of thousands of troops.

However, there were still at least 100,000 soldiers stationed in the city.

However, just as Li Yueming and the others thought that there was going to be a bloody battle.

However, he discovered that many soldiers were actually jogging and surrendering.

He took a closer look.

Only then did he realize that the commander of Bevaro was leading the way in raising the flag.

When he saw Li Yueming, his face was filled with excitement.””I’ve finally waited for you. I’m Balrod, the commander of Bevaro. I want to join the Resistance!”

Li Yueming, [Concealment.]

Many members of the Resistance Army were speechless.

It was fine if ordinary people joined.

You, a high-ranking official of Yunxiao Group, also want to join?

The man named Balrod was a middle-aged man in his fifties..

Chapter 218: As long as the ideal is not extinguished, even a single spark can start a prairie fire!_2

The most eye-catching thing was that there were two large golden incisors embedded in his right tooth. When he opened his mouth, he gave off the aura of a traitor and lackey.

Everyone was dumbfounded.

Balrod’s smile was even uglier than when he cried. “I know what you’re thinking, but I really want to join the Resistance. If I have to give a reason, it’s actually that the pursuit of you guys has been unsuccessful over the past few years, and the higher-ups are prepared to push the blame on me... Son of a b * tch, why don’t you guys be reasonable? What are they doing?” Li Yueming glanced at him.

Then, he glanced at the surrendered soldiers behind him.

The Resistance looked at Balrod.

Then, he used his orders to gather all the defenders of Bevaro together.

He began to reorganize the troops.

At this moment, the ideals of the Resistance that he had been promoting in the past came into effect.

Most of the soldiers did not show any resistance after hearing that Bevaro was occupied by the Resistance.

On the contrary.

They even burst out with great enthusiasm.

After all, ordinary soldiers were at the bottom of the army.

Moreover, they were only the City Defense Army and not the direct troops of the Cloud Sky Group.

Therefore, he had no choice.

Naturally, he did not have much loyalty to the Cloud Sky Corporation.

Li Yueming asked them to help organize the weapons and various firearms.

Now.

With the help of the defense of an entire city.

Li Yueming had the confidence to fight to the death with the hundreds of thousands of soldiers.

As expected.

When the army rushed to S City and found out that Li Yueming had occupied Bevaro, they were shocked.

They split up in exasperation.

Most of the troops rushed back, but in order to prevent being deceived again.

There was also another army heading to S City. They had made two preparations.

However...

By the time the counter-attacking soldiers arrived at the city of Wallow.

Li Yueming was already standing on the city wall, waiting for them with his weapons.

The battle was about to start!

Under the barrage of artillery fire, Li Yueming used the Wilderness Martial Saint to sync his attributes with the surrounding heavy weapons.

Instantly.

The entire pursuing army was stunned.

It was the same cannon.

They could only damage the buildings on the city wall.

However, the golden cannonballs that were fired from the city walls were able to kill a large number of them.

This was the first time they had encountered such a strange scene.

The Resistance Army had more than 15,000 people, and they were all elites who had never lost a hundred battles.

In addition, Li Yueming and Sun Ruo, two powerful supernatural beings, were guarding the place.

The current Li Yueming already had the power to dominate the entire northwest hinterland!

The Northwest Group's troops, who had been beaten up until their faces were covered in dust, were now completely doubting their lives.

They had a feeling that they were not fighting the so-called Resistance Army.

Instead, he was an omniscient, omnipotent, and incomparably powerful God! !!

The news of Bevaro's fall spread throughout the entire Red Leaf Empire.

Instantly.

Nearly a hundred cities were shaken.

Bevaro was a pseudo-first-tier city in the northwest of the Cloud Sky Group.

There were 200,000 permanent city defense troops and a complete industrial system.

Now.

It had actually fallen into the hands of a group of resistance forces.

How could it not shake the entire Red Leaf Empire?

At the highest level of the Cloud Sky Corporation.

On the surface, one of the two big bosses, the big boss, instantly realized the danger when he heard the news.

In the past, the Resistance Army was like a small ant that the corporations could easily crush.

But now, this tiny ant had taken advantage of the moment when the giants were fighting to suddenly climb up and bite him.

If he didn't take precautions.

Once the ants built their nests, it would be too late.

He decisively mobilized 300,000 troops from the Cloud Sky Group's headquarters from the surrounding cities, along with 20 A+ class superhumans and 3,000 genetic warriors, to charge straight at Bevaro.

In addition.

If 20 A+ class superhumans and 3,000 genetic warriors were unable to take down Bevaro...

Then, this S-class was the last resort.

This was already the strongest force that the Cloud Sky Group could mobilize at present.

After all, the war in the north was intense.

No matter how powerful the Cloud Sky Corporation was, it was impossible for them to mobilize more forces.

If it wasn't for the fact that the slogans shouted by the Resistance Army were too terrifying.

The Great Commander would definitely not mobilize so many forces to target Li Yueming before the front line was stable.

In his heart and mind.

The big boss's face was very ugly.

After thinking for a moment, he took out a phone from his pocket.

After a few moments of hesitation, he dialed the number.

However, it only rang twice.

The other end of the phone said that the call could not be connected.

Hearing this.

The big boss, who was originally nervous and uneasy, suddenly turned pale.

A month later.

Under the big boss's attention, the mighty army of the Cloud Sky Group began to attack Bevaro City.

At this moment, the Resistance Army, who had been hiding in the East Peak Mountain to recuperate, had already entered the city under Li Yueming's preparation.

With a large-scale fresh army as a supplement.

The Resistance temporarily withstood the pressure.

As the logistics department head.

Wang Ye led a large group of art troupe members around the city to do some thought work.

Some people were persuaded to join the Resistance.

There were also some people who tasted the sweetness of the resistance—a lot of food and medicine.

He also chose to join the Resistance.

With internal and external replenishment.

Although it was difficult to defend the position, Yunxiao Group could not easily break through Li Yueming's line of defense.

On a certain day, at the time of the day,

Li Yueming was resting in the command post below the city wall.

A moment later..

Chapter 219: As long as the ideal is not extinguished, even a single spark can start a prairie fire!_3

He could sense thousands of people approaching.

He jumped into the city and saw nearly a thousand genetic warriors under the city wall, led by more than 20 supernatural beings, rushing toward the city wall.

Seeing this situation.

Li Yueming smiled and muttered, "I've been waiting for you for a long time. From today onwards, Yunxiao Group will be the first financial magnate to be swept into the trash!"

As he spoke.

His body emitted an incomparably terrifying aura.

It had far exceeded the upper limit of what an A+ class supernatural being could achieve.

That's right.

He had become an S-class supernatural being.

Moreover, he had comprehended the stronger usage of the Wilderness Martial Saint.

Not only could it strengthen other objects, but it could also strengthen itself at the same time.

One had to know that the effect of this talent was to increase the attributes of items through one's own attributes.

Now, even his own body could be strengthened.

When the two were combined, the effect could be said to be a qualitative change!

It was just one attack.

The dark gold greatsword had already killed dozens of genetic warriors.

The twenty or so A+ grade superhumans in the sky instantly stopped when they saw this.

He was so suppressed by Li Yueming's powerful aura that he didn't even dare to move.

S-class supernatural being.

Possesses the power to destroy small cities.

An existence of this level was not something that the [A+] class experts could match up to.

Fortunately, they had an S-class supernatural being behind them!

He felt the power from Li Yueming's body.

A man in his thirties stood out from the crowd.

He looked at Li Yueming.

The man revealed a greedy expression and said, "Although I don't know who you are, you smell delicious. I hope you won't disappoint me!"

Li Yueming didn't say anything.

Only battle!

A powerful black energy gushed out of the man's body.

As long as one came into contact with it, all energy would be devoured by it.

Li Yueming's martial strength was greatly affected.

However...

That was all.

Li Yueming circulated the Star Moon Art, and the man could no longer absorb any more energy from him.

After fighting with the man for a few minutes.

“Star Moon, Heaven Slaying!”

Li Yueming shouted.

The dark golden long saber in his hand erupted with a dazzling light.

A huge and majestic golden saber light rose like a full moon.

It forcefully cut open the black energy on the man’s body.

And it directly split it into two halves!!!

In an instant, black blood dripped down like rain.

The entire Bevaro was silent.

This was an S-class supernatural being, yet he was slaughtered so easily by the leader of the Resistance?

Including the Resistance.

Everyone who witnessed this was in disbelief.

However, the man’s final counterattack before his death also shattered Li Yueming’s mecha into pieces.

In the golden light that filled the sky.

Li Yueming’s figure appeared in front of everyone.

This was the first time Li Yueming had shown his true face in the past few years.

Everyone on the surface.

Whether it was the Resistance Army or the Cloud Sky Group’s troops.

At this moment, they all raised their heads.

They widened their eyes, wanting to see who the leader of the resistance army was.

Under the gaze of four to five hundred thousand people.

Li Yueming stretched his body.

Her long black and smooth hair was messy because she hadn’t trimmed it for a long time.

However, the young man’s slender body and handsome face...

There was also that pair of clear and abyss-like eyes.

However, it still shocked countless people.

Among them, the ones who were most shocked were definitely the troops of the Cloud Sky Corporation.

All along, they had no idea who Li Yueming was.

However, looking at the young man in front of them, the soldiers of the Cloud Sky Group could not relate him to the cunning and black-bellied leader of the Resistance Army in their minds.

Of course.

At this moment, their thoughts were no longer important.

Li Yueming killed an S-class supernatural being, and black blood dripped down like rain.

At the same time, it also shattered the fighting spirit of the entire Cloud Sky Corporation's soldiers.

They stared blankly at the dream-like figure in the sky, not knowing what to do for a moment.

High in the sky.

Li Yueming looked down at the hundreds of thousands of leaderless Yunxiao Group soldiers.

After a moment of silence, he slowly said, "We won't kill those who surrender or surrender. Those who resist or escape will be killed without mercy!" His voice was not very loud.

However, at this moment, it was like a panic-stricken voice. He was just a human.

However, under the black blood rain, it was stronger than an army. The twenty A+ class superhumans were being stared at by him, so much so that they did not even dare to move an inch.

The pressure that Li Yueming gave them was comparable to the Grim Reaper.

The ability that the S-class supernatural being had mastered was one of the top abilities in the supernatural sequence.

It could summon extraordinary power to devour everything.

However, in front of Li Yueming, it was only a few minutes before it was split into two halves.

They didn't think they could be mischievous in front of Li Yueming.

Therefore, he didn't even dare to run away.

He could only raise his hands in surrender.

Their surrender was the last straw that broke the camel's back.

The troops of the Cloud Sky Corporation no longer had any thoughts of resisting. They all threw their weapons on the ground.

They were afraid that Li Yueming would cause them trouble.

On the city wall of Bevaro.

Tens of thousands of rebels were watching everything with fanaticism. This was their leader, a man who had led them from the impossible to the possible.

After fighting for so many years.

Their admiration for Li Yueming had long been engraved in their bones.

"The leader is invincible!"

"The Resistance Army is invincible!!"

"The civilization of mankind is invincible!!!"

Many of the resistance fighters who had followed Li Yueming from East Peak Mountain roared.

This was their encouragement to Li Yueming and themselves.

Behind them.

Many newcomers who had just joined the Resistance were also watching this.

When they saw the arrogant S-class supernatural being killed on the spot, they were shocked.

The other soldiers of the Cloud Sky Corporation did not dare to resist.

The excitement in the hearts of this group of rookies was like a surging tide.

A few days ago.

Li Yueming had once described the future to them when they joined the Resistance.

At that time, although they were fascinated by what they heard, they still retained some doubts in their bones.

After all, the power of the corporations was too strong.

The entire planet was filled with corporations and their lackeys.

They were not even supernatural beings.

They were just a group of ordinary people who were not even comparable to ants.

In the eyes of the corporations.

They were not even worthy of being called humans. It was simpler and more accurate to call them 'consumables.' Under the rule of such overwhelming power.

They couldn't see where the life Li Yueming described came from.

But now.

It was still the same place and the same person.

But now, he had personally proved to them the feasibility of the path he had mentioned.

Even if there would be many hardships along the way, even if they would be oppressed and bleed.

However, it was just as Li Yueming had said.

Everything that mankind possessed was not given by God, nor did it rely on the help of the gods.

They were all created bit by bit by his own hands.

As long as the ideal in his heart was not extinguished, even if it was just a spark, there would always be a day when the prairie would be destroyed.

Chapter 220: Eliminate the tyranny of the tycoons, the world belongs to the resistance!_1

Transcendence Calendar Year 348.

It was two years after the Northwest Coalition Army surrendered.

The resistance army had occupied 80% of the land in the northwest.

The largest city was called Kandor. It was one of the four first-tier cities in the entire northwest. Not only did it have a complete industrial system, but it also had an independent military factory. There were also nearly ten thousand scientists engaged in scientific research.

After Li Yueming occupied it.

The entire Red Leaf Empire was in an uproar.

In just one or two years, countless pairs of eyes had been watching the northwest.

Many people and even the higher-ups of the Cloud Sky Corporation found this unbelievable.

Judging from the current conflict between the Cloud Sky Group and the Hurricane Group at the border, the Cloud Sky Group might not be as well-established as the Hurricane Group.

However, it could also be considered one of the most powerful consortiums in the last 100 years.

However, it was such a powerful corporation.

However, thousands of square kilometers of land had been taken away by a group of rebels of unknown origins.

No matter how one looked at it or heard it.

This was an incredible thing.

If he hadn't heard that the leader of the Resistance was an S-class supernatural being, he would have been killed.

There would probably be many higher-ups of the Cloud Sky Corporation who would doubt their lives.

But even so...

In the cities ruled by the Yunxiao Group, all kinds of news about the Resistance Army had already begun to spread widely.

Some people said that they had seen the true appearance of the leader of the Resistance during the battle of the Northwest Coalition Army two years ago.

The other party seemed to be just a young man with a tender face.

Some people even uploaded some blurry side photos to the Internet.

However, due to the lockdown of the Cloud Sky Group, these pictures could not be widely circulated.

However, even under such circumstances, the messy news was still being discussed by countless people. There were even quite a number of people who risked being caught to share it with their friends.

In the second year.

For some reason, another piece of news suddenly spread.

According to a senior executive of the Cloud Sky Corporation who did not want to be named.

This so-called leader of the resistance seemed to be an experimental subject that they had hunted down more than ten years ago.

Back then, he was chased by the helicopters mobilized by the Cloud Sky Corporation for more than 3,000 kilometers.

In the end, he relied on faking his death to deceive the Cloud Sky Group's tracking.

Now, it was very likely that they were seeking revenge on the Cloud Sky Group.

All in all.

The outside world was abuzz with discussion.

However, as the main focus of attention.

After the Rebellion Army took control of three cities, they changed their usual arrogant attitude and began to keep a low profile.

There were also different opinions in the outside world.

Some people felt that the resistance camp was no different from the previous corporations. They were just carrying the flag of the resistance corporations and walking the path of becoming corporations.

Now that they had conquered a few cities, they were ready to develop technology.

There were also people who said that the resistance army was strong on the outside but weak on the inside. Most of the credit for taking down these cities was due to the commander of an S-class supernatural being.

Of course, most people were pessimistic about the continuation of the Resistance.

After all, even though S-class supernatural beings were very strong, they were still very powerful.

However, the standard for becoming a second-rate financial group was that the entire group had to have at least five S-class superhumans.

Obviously, the number of S-class superhumans that the Cloud Sky Corporation possessed would only be above this number.

The reason why they could tolerate the resistance and not say a word was that they were not afraid of the resistance.

The biggest reason was that 90% of Yunxiao Group's energy was focused on the northern border and they had no time to care about the Resistance Army.

However, once they freed up their hands from the front line.

The Resistance Army, which occupied more than half of the northwest, would be the first to suffer.

Of course, no matter what they thought.

Anyway, Li Yueming was not prepared to provoke Yunxiao Group again.

The current situation of the Resistance was very delicate.

Yunxiao Group was fighting with Hurricane Group. The battle was very intense.

More than half of the manpower, material resources, and financial resources of the 61 cities of the Cloud Sky Group were sent to the battlefield.

The rear had fallen into an unprecedented emptiness.

This was also the fundamental reason why Li Yueming could take this opportunity to rise.

But now, he had occupied three big cities, which should have reached the limit of what the Cloud Sky Corporation could tolerate.

If Li Yueming dared to continue expanding his territory.

It was likely that the Cloud Sky Group would divert their energy from the battlefield to cause trouble for the Resistance.

This was obviously not good news for the Resistance, which was not strong enough.

Besides, Li Yueming was a person who was flexible and liked to develop.

Before his fists were not strong enough, he was not prepared to be the one who wanted to die.

Wouldn't it be nice to sit and watch them fight?

mererore, ne naa no cnolce.

After taking over three cities, the Resistance became more restrained.

Other than fighting for some resources that were necessary for development.

If he could avoid conflict with the Cloud Sky Corporation, he would not.

The two sides had lived in peace for a long time due to some kind of indescribable tacit understanding.

During this period of time.

Li Yueming focused on four aspects.

First, speed up the internal restructuring.

Schools, hospitals, and factories no longer served the corporations, but belonged to the entire resistance.

As long as they joined the Resistance, they would become residents under their rule.

Everyone could enjoy free public resources.

Secondly, the scientists captured by Kandor were put to use again.

Moreover, he used the laboratory originally set up by the Cloud Sky Group to start scientific experiments.

After all, this was a technological world. If one wanted to get twice the result with half the effort, one had to become a technological maniac..
