

Maxing MT 221

Chapter 221: Eliminate the tyranny of the tycoons, the world belongs to the resistance!_2

Li Yueming's research objective for the scientists was to create a drug that could make everyone a supernatural being.

On the surface.

Li Yueming's current research project was no different from the research project of the Andre Group more than 300 years ago.

But in reality.

After more than 300 years of continuous improvement.

At present, the mortality rate of Andre Company's supernatural drug injection was still more than 50%.

Even if the person injected managed to survive the 50% chance of death, he would still die.

The probability of successfully awakening to become an Extraordinary was only ten percent.

Most of the others had either their brains or arms burnt out. Perhaps it was because of this that Hurricane Group's cosmetic modification brought a large amount of business.

In the case of the red race.

Extraordinaires were undoubtedly a very rare profession.

Even if an ordinary person worked hard for their entire life, they would not be able to afford it.

And now.

What Li Yueming wanted the scientists to research was a drug that could allow everyone to become supernatural beings.

When she heard his request.

The group of scientists was stunned.

Damn it...

Andre Group was now the most technologically advanced and powerful international group in the world.

It was a technical problem that millions of top scientists had been working hard on for more than 200 years.

They had dozens of big cats and small cats, and they wanted to do better than others?

Even in his dreams, he wouldn't be this ridiculous, right?

Thousands of scientists in the laboratory even thought that Li Yueming was a mentally retarded child who had popped out of nowhere. If it wasn't for the fact that Li Yueming's fists were too hard core...

They were probably already cursing collectively.

But even so.

There was still a scientist named Anthony who stood up and said to Li Yueming mercilessly, "I'm sorry, we can't complete your plan. I suggest you figure out what the Extraordinary Potion is first!"

Li Yueming only smiled.

He took out a bag of his own body tissue from his pocket and said, "How would we know if we don't try? Let's start with my genes!" The scientists were speechless.

He had been doing research for so many years.

It wasn't that many scientists hadn't seen lunatics before.

However, it was the first time they had seen a lunatic like Li Yueming who attacked them first.

Looking at the bag of blood and minced meat in Li Yueming's hand, the group of scientists didn't even know how to respond.

After completing the technological research.

The third aspect that Li Yueming grasped was the stubborn old problem left behind by Yunxiao Group.

An order was given.

Almost all the gangsters, organ dealers, and powder dealers were uprooted.

The resistance army's method of dealing with this group of people was very simple and crude.

Those who were obedient and hadn't been tainted by human lives were sent to be reformed. Those who were disobedient or had blood on their hands would be fed to the peanuts.

After a round of reorganization.

The security of the three cities under the Rebellion Army's rule was instantly improved.

When night fell.

Except for a few exceptions, most ordinary residents living in the city did not dare to go out.

Under the acquiescence and connivance of the Cloud Sky Corporation, the night in the city was a paradise for all kinds of criminals.

When ordinary people went out at night, they might encounter gang fights, drug addicts gathering in the corner to take small pills of different colors, and the cold gazes of homeless tramps. It was not a big deal to be caught on the streets at night.

And now.

After Li Yueming's reorganization.

The gangs that sold human organs were all used by Li Yueming as lab rats in the experiments of the Kandor scientists.

The girls in the red-light district were all sent to technical schools for re-employment.

As for those brothels and human traffickers.

Depending on the seriousness of the case, the lighter ones would be dragged to the factory for labor reform, and the heavier ones would be directly fed peanuts.

The 'Drug Gods' who liked to wear cyberpunk outfits and make and sell small pills on the streets.

After they were caught, they were fed small pills one by one.

Under such extreme pressure.

The residents of Bevaro, Candor, and the other cities suddenly realized that the entire city seemed to have quietened down.

In the past, when gangs fought with guns, a group of gangsters would pop out of a few streets every night with machine guns and shoot everywhere. However, during this period of time, those scenes seemed to stay in the past forever.

Those agents who were on the verge of committing crimes were all sent to the guillotine.

Some died, some went crazy.

All of them ended up in an extremely miserable state.

Now.

Every night, the residents opened the doors and saw that there were always rebel troops patrolling the streets meticulously.

In a country where the rule of law was strong, the people might not understand how rare and precious such a quiet night was.

However, in the city under the command of the Cloud Sky Group.

This was unprecedented.

The most obvious benefit was that many ordinary people no longer had to worry about being shot in the head by a grenade while they were sleeping at night, nor did they have to worry about their children accidentally getting involved in some bad cases when they were out.

Through the implementation of this series of public security laws.

The Resistance Army began to win more praise and trust from the ordinary people in the various cities..

Chapter 222: Eliminate the tyranny of the tycoons, the world belongs to the resistance!_3

This also meant that the Rebellion Army had finally gained a firm foothold in the three cities.

It began to expand rapidly.

In just two short years, the resistance army, which originally had less than 100,000 people, had expanded to more than 300,000.

And this was only in terms of soldiers.

Many ordinary people who joined the Resistance Army did not count.

If all of them were counted.

It was estimated that the actual members of the Resistance had exceeded a million.

As for the fourth matter, it was more sensitive.

Li Yueming printed some of the inappropriate promotional manuals into various qualification documents and small USB drives. There were also some messy private goods stories mixed in.

They were like light seeds.

It spread out like the wind through the channels that extended in all directions.

As for what kind of fruit it would bear in the end.

That would depend on how severe the crimes committed by the corporations were.

However, in this prosperous situation, the higher-ups of the Resistance did not smile at all.

The battle in the northern part of the Cloud Sky Group lasted for two years. At its hottest, both sides were just short of throwing nuclear weapons at each other.

But as they fought.

But now, they had already entered a truce.

Overall, Hurricane Group had the upper hand in this battle.

However, the strength displayed by the Cloud Sky Group was enough to make many corporations look askance.

Hurricane Group sent out three Growth-user armies, but they still failed to take down the genetic berserker troops of Cloud Sky Group.

The situation was extremely tense.

At this stage of the war, it was basically coming to an end.

After all, although the Hurricane Group wanted to annex or destroy the Cloud Sky Group.

However, judging from the combat strength displayed by the Cloud Sky Corporation, if Hurricane Group did not show their trump card, they would probably be crushed by the Cloud Sky Corporation. The risk of using his trump card was too great.

After all, Hurricane Group had enemies.

If he took out all his strength to annex the Cloud Sky Group...

In the end, the other financial groups might be behind.

Therefore, he went around in circles.

Both sides returned to the negotiation table.

The only difference was that the Cloud Sky Group was very smart this time.

Not only did he soften his stance, but he also expressed that he would share some genetic information with Hurricane Group in the future.

This naturally made Hurricane Group ecstatic.

After all, the reason why they were fighting against the Yunxiao Group was because the Yunxiao Group's genetic research had touched on their fundamental interests.

Now, the Cloud Sky Group had taken the initiative to express that they could compromise on this core principle.

Hurricane Group naturally could not continue to make a big fuss.

Both sides quickly stopped the war.

Although they were still negotiating the specific details of the terms of the agreement.

However, the end of the war was already in the bag.

Under such circumstances.

The Resistance was in a worse state.

Originally, when the Cloud Sky Group and Hurricane Group were fighting each other, it was simply too good for the Resistance Army to occupy three cities.

But now the war is over.

The Cloud Sky Group, which had escaped from the vortex, would obviously turn their attention to the Resistance Army at the first possible moment.

Li Yueming wasn't surprised by this.

After all, Yunxiao Group was not simple. It would be strange if it was really swallowed up by Hurricane Group.

Just as he was still thinking of a way to deal with it.

Behind

Sun Ruo quickly walked to Li Yueming.

She was holding an encrypted satellite phone in her hand.

After a moment of silence, Li Yueming picked up the phone.

On the other end of the phone, Han Longfei said, "I estimate that in at most a month, the main force of the Cloud Sky Corporation will return. As far as I know, the reason why they compromised on the core genetic authority is very likely because of our Resistance Army..." "This time, the Cloud Sky Corporation is serious!"

Li Yueming naturally knew about this.

At the beginning of the guerrilla warfare, Han Longfei could provide Li Yueming with a lot of key information.

However, as the Resistance grew in power, Han Longfei's information became somewhat useless.

Although the two of them still often exchanged information.

However, the initiative fell from Han Longfei to Li Yueming.

Li Yueming didn't say anything. He just smiled and said, "Don't worry, I haven't agreed to their ceasefire yet. Why should they stop?!"

Hearing this.

Han Longfei's face was full of question marks.

After thinking for a moment, he laughed." Don't say it. You're really a genius.

This plan is not bad!"

The two men were talking in riddles on the phone.

Between each other, a smile of mutual understanding

Only Sun Ruo, who was beside him, was left dumbfounded.

What was going on? Why did he suddenly feel a chill?

After hanging up the phone.

Sun Ruo thought about it and didn't dwell on the plan that the two of them had talked about on the phone.

Instead, he changed the topic and said,"In the past few days, more and more people have joined the Resistance Army in the nearby cities..."

Li Yueming hid the expression on his face and pretended to be puzzled. 'What's wrong? Isn't this a good thing?"

"You really don't know?" Sun Ruo scratched his head."

She leaned closer to carefully observe Li Yueming's expression. After confirming that she did not see anything wrong, she continued, "The first thing they said when they ran over was to eliminate the tyranny of the tycoons and the world belongs to the resistance army...If it weren't for the fact that the mental fluctuations were normal, I would have thought that they had escaped from a mental hospital!"

Li Yueming blinked his eyes and smiled,""Not bad, this is the true resistance!"

Sun Ruo felt that Li Yueming knew something.

However, Riddler was never likable.

She bared her teeth and bit Li Yueming before leaving angrily.

In the blink of an eye.

Two months passed quietly.

Yunxiao Group and Hurricane Group reached a truce agreement, and the troops deployed at the border between the two sides began to slowly retreat.

According to the normal process.

It wouldn't be long before Yunxiao Group and Hurricane Group returned to the capital.

But at this moment.

A large army appeared on the battlefield once again.

Warriors wearing strange mechas and reproductive equipment suddenly attacked the unprepared Cloud Sky Group's headquarters.

At the same time, on the other side.

Hundreds of powerful 'genetic monsters' appeared in Hurricane Group's factory and wreaked havoc.

The soldiers from both sides were already tense during the retreat.

Now, he was suddenly attacked.

Before the higher-ups could give the order, they almost subconsciously started fighting each other.

For a time, the northern border was filled with rumbling sounds.

The faces of the corporate executives who had just come down from the negotiation table and were about to go back to their own homes immediately darkened.

He finally calmed down.

After the attack, the first reaction of both sides was that there was something wrong with the peace talks.

Cloud Sky Group suspected that Hurricane Group was trying to use the so-called 'peace talks' to numb them.

In fact, they were secretly mobilizing their forces to annex them in one fell swoop.

On the other hand, Hurricane Group believed that Cloud Sky Group was using the excuse of peace talks to launch a sneak attack.

Back then, he took the initiative to kick out the Gene Contribution Project as bait for them to eat.

Damn it, that damned Sixth Brother.

You like to use cold knives to scheme people, right?

Just you wait, if I don't beat your sh * t out, I'll count it as you pooping clean!

Chapter 223: A Spark Catches a Prairie, You and I Are Plants

Transcendence Calendar Year 350, Li Yueming was seventeen years old.

Two years ago, Cloud Sky Group and Hurricane Group signed a truce agreement.

However, during the retreat.

Li Yueming sent the Resistance Army to strike at both sides at the most critical time and place.

He sent a mecha to pretend to be from Hurricane Group to attack the headquarters of Cloud Sky Group.

He also sent the genetic warriors that Kandor had researched to Hurricane Group's repair shop.

The result was obvious.

The representatives of Hurricane Group and Cloud Sky Group sat at the negotiation table, their saliva flying everywhere. They had negotiated for more than a month before they finally signed the truce agreement.

In the end, it was immediately destroyed less than two hours after it took effect.

The soldiers on both sides started fighting again.

Although the higher-ups later discovered the problem and suspected that there were other forces behind it.

However, cracks had already appeared in the basic trust between Yunxiao Group and Hurricane Group.

It was naturally extremely difficult to repair it.

Therefore, the two sides fought for almost two years.

In the end, they slowly shrank the battle line and began to disband the border troops.

After all, war burned money, and the corporations believed in the greatest benefits.

In the absence of attractive output, burning money was no different from burning their lives.

The war was about to end.

Han Longfei gave Li Yueming an idea, wanting him to send someone to disrupt the situation again.

But this time, Li Yueming didn't have such an intention.

War is the art of deception.

Can one, can two, can not three.

If he fanned the flames too much, he might really get into trouble.

Li Yueming didn't believe that the corporations would be so stupid.

After being tricked a few times, he was still unprepared.

Moreover, two years ago, he was fanning the flames to buy time for the Resistance to develop.

Now, the Resistance had grown into a strong tree.

It was no longer the sapling that had just sprouted and could be easily blown down by a gust of wind.

In these two years.

The number of the Resistance increased exponentially.

The three cities had a population of about 40 million.

Currently, there were nearly a million rebel troops.

More than 80% of the ordinary residents had already applied for the identity documents of the Resistance.

Under such circumstances.

Li Yueming already had the confidence to contend with Yunxiao Group's main force.

It was really unnecessary to play some underhanded tricks.

The reason why it's developing so fast

The main reason was that the Resistance had brought tangible benefits to the residents.

After all, one person would not treat another person well for no reason.

Not to mention tens of millions of people.

In order to gain their support and recognition, the Rebellion Army naturally had to offer something tangible.

The most important thing was to have the identity of the Resistance. As long as they obeyed the unified arrangement and were willing to lower their pay.

All medical, housing, and educational resources belonging to the Resistance would be open to them for free.

The labor time was also cut from the original twelve hours to eight hours.

Food and accommodation during working hours were also included.

For the ordinary residents who were used to being exploited by the corporations.

These few things were simply things that he did not even dare to dream about.

One had to know that under the control of the corporations.

Medical care, housing, and education were basically high-voltage lines that ordinary people could not touch.

The first was medical treatment.

In order to monopolize resources.

In the city, doctors without qualifications were not allowed to practice medicine.

Once they were caught practicing medicine illegally, they would be sent to the assembly line for training.

In the worst case, he would be locked up in prison for seven to eight years until he had a mental breakdown.

If ordinary people wanted to get treatment, they could only go to hospitals certified by the corporations.

However, the hospital's fees were probably more than the number of doctors.

It was common for a family to be emptied of all their assets when they went to the hospital when they were sick.

As for the house.

Those who knew about it would understand, and those who didn't wouldn't dare to say anything.

However, the corporate world was a little more complicated.

In the city, housing prices were not only linked to geographical location.

It was also related to the security of the surrounding area.

Houses with poor security often sold at a cheaper price.

However, the residents living here had to endure the harassment of some 'unknown' gang members and human traffickers who were armed with firearms.

What was that? Unsatisfied with this?

Then buy a safe house!

They only needed to pay two or three times the price of the house to buy a high-end building with security patrols.

Under the condition that the protection fee was sufficient.

To ensure that you and your child will not be harassed by gangs and human traffickers.

As for the final aspect of education.

It was also a very simple operational logic, and many of them were not complicated.

However, as long as it involved the monopoly of resources, it would be a huge profit.

And now.

As long as they joined the Resistance, they would receive free housing, free medical care, and free education.

How could this not make ordinary people ecstatic?

If not for the various restrictions on joining the Resistance, the number of ordinary people joining the Resistance would probably be even higher.

However, it was under such circumstances.

The economy of the entire city did not explode as many people had imagined.

Instead, it became even more prosperous.

After all, although the basic facilities of the Resistance were free of charge.

However, while ordinary people enjoyed everything, they did not have to pay for it.

They had to work at least eight hours a day.

He had to work five to six days a week..

Chapter 224: A Spark Catches Fire, You and I Are Plants (2)

However, under such a strict plan and arrangement...

Ordinary people who joined the Resistance Army had less time to work than before, but their work efficiency was higher than the twelve hours they worked under the pressure of the consortium.

After all, they were forced to work in the past.

Now, although it was the same as the labor force of the company, it was still the same.

However, the things they produced were actually used on themselves.

The clothes they produced were not only supplied to the Resistance, but also sold to the residents at a very low price.

A large portion of the drugs produced were also collected by the hospitals and schools under the name of the Resistance.

The difference in power was obvious.

Now, as they walked on the roads of the three cities, they could see the laughter of the residents everywhere.

The once quiet and depressing streets were now cheerful and bright.

Under Li Yueming's pressure.

All the black and gray forces in the city under the rule of the Resistance had basically been wiped out.

Whether it was day or night.

He didn't have to worry about encountering all kinds of arrogant criminals when he went out.

If you have any problems, you can ask the Resistance Police Department for help.

The entire city was filled with vitality and vigor.

What was the will of the people?

This was the will of the people!

In addition.

The seeds that Li Yueming had sown in the past had also borne rich fruits.

There are a total of sixteen cities in the northwest.

The Resistance had only occupied twelve of them.

But now, many of the residents of the remaining four cities had fled overnight to the city occupied by the Resistance Army. Just to become a glorious member of the Resistance.

For this reason.

The four City Lords who had yet to be occupied were so worried that their hair was almost empty.

When they first discovered that the residents of the city had fled, they were shocked.

The four City Lords immediately issued a lockdown order.

The residents of the city were not allowed to escape.

However, in less than two days, Li Yueming brought the Rebellion Army troops to visit the Castellans for tea.

It almost scared the few City Lords to the point of fainting on the spot.

The next day.

On the surface, the four cities were still under lockdown.

But in reality, the side door was already wide open.

The City Defense Army turned a blind eye to the ordinary residents who went out.

He couldn't beat them, and he couldn't run away.

They could only watch as the population in the city decreased day by day.

The few City Lords were about to go crazy.

Now, they only hoped that the Cloud Sky Group headquarters would hurry over and kill the Resistance Army, or just lie down and join the Resistance Army.

Under this kind of incomparable torment.

Finally.

They had been looking forward to the news of a total truce on the northern front line.

Before the troops that returned from the front line could even heave a sigh of relief, they were directly transferred to the northwest by the Yunxiao Group's chief.

The desert city of Onlado.

Yellow sand covered the once glorious city.

Withered vines, old trees, black crows circling.

The Cloud Sky Group had gathered more than 500,000 troops here.

They wanted to destroy the resistance forces that had occupied the three cities in the northwest in one fell swoop.

In the distant city wall.

Li Yueming, who had already received the news, was also making his final preparations.

Four years ago, Li Yueming had completely digested the strength of the Northwest Army that had followed the S-class Extraordinaires to attack the Resistance.

Currently, Li Yueming had more than 500,000 fully armed soldiers.

Under the overtime production.

The number of weapons and equipment was also considerable.

The number of supernatural beings might be relatively small compared to the Cloud Sky Corporation.

However, there were thirty-two A+ class Extraordinaires, and fifty-five A and A-class Extraordinaires.

The reason why there were so many.

First of all, it was naturally because the group of extraordinary humans who had been captured back then were also here.

Secondly, the Resistance's Extraordinary Research Institute had also contributed a considerable amount of power.

That's right.

Through Li Yueming's perfect genes and golden talent, he could deduce endlessly. In addition, thousands of scientists worked overtime to research and experiment.

the newly established Resistance Extraordinary Laboratory in Kandor. In just three months, they had developed the first extraordinary potion for the Resistance.

After injecting this extraordinary potion, the result was a total of 10,000.

The probability of becoming a supernatural being was 4% lower than that of Andre Company.

In other words.

It only took three moons.

The Rebellion version of the Extraordinary Potion already had a 6% chance of turning ordinary people into Extraordinaires.

This was already a very heaven-defying research result.

At that time, when the scientists of the Extraordinary Research Institute walked out of the laboratory with the drug, almost all of them could not believe their eyes.

After all, this was a transcendent gene serum!

The Andre Group had studied the technology for more than 300 years before they could completely clear it.

They only spent three months to replicate the youth version.

Could it really be so smooth?

However, what Li Yueming wanted was obviously not this kind of trash potion.

Under his constant deduction.

Soon, the scientists at the research institute were provided with a few new solutions.

After getting the plan, the scientists were more excited than if they were on drugs. They began to work overtime and devote themselves to the research.

For lunatics like them who walked on the edge of truth every day, there was nothing more fascinating than science.

Then 'Science guided by Li Yueming' was at the top of the list.

The reason why he was able to develop the first version of the Extraordinary Potion in just a few months.

It was because Li Yueming had provided them with genes that were infinitely close to perfection.

Every time they encountered a bottleneck, Li Yueming provided them with various options.

In the beginning, they thought that Li Yueming was a complete lunatic..

Chapter 225: A Spark Catches a Prairie, You and I Are Plants (3)

After all, there were many people who used him as an example these days.

However, there were fewer people who used him as an experimental subject.

To put it bluntly, it was probably the only scorpion poop.

Take your own body when the experiment and also can give all kinds of experimental direction and research theory. That was truly a great departure from the world.

Li Yueming had achieved all three.

Not only did he use himself as an experimental subject.

He even set the research direction himself and guided them in the direction he set.

Thousands of scientists studied it for half a month, only to find that they seemed to have opened the door to a new world.

Then, it started to get out of hand.

From Li Yueming's research project to the battle with Yunxiao Group.

It took less than four years.

The Extraordinary Research Institute had produced several versions of the Rebellion Army's Extraordinary Potions.

The first to come out was the new version of the Rebellion Army's Extraordinary Potion.

There was a 20% chance that the Rebellion's Extraordinary Potion could awaken an ordinary person into an Extraordinary.

At the same time, the side effects were much lighter than Andre Company's supernatural medicine.

The fatality rate was less than 10%, and the probability of disability was only 25%.

When this drug was just developed.

All the scientists in the Extraordinary Research Institute suspected that there was something wrong with their brains.

After all, the research was going too smoothly.

It was as if they had cheated on their way to scientific research.

As long as he followed the research plan provided by Li Yueming, he could bypass all kinds of difficult and complicated diseases and get to the source.

But later, they became numb.

One after another, more heaven-defying potions were produced.

One of the supernatural potions was specially prepared for awakened supernatural beings. It was called the Strengthening Needle, the Resistance Supernatural Gene Potion 1.0.

The Rebellion Army Transcendent Gene Potion 1.0 could make up for the genetic defects of Awakened Extraordinaires.

It could strengthen the control of supernatural beings over their talents to a certain extent.

Furthermore, there was a 10% chance of awakening an Extraordinary for the second time. A successful Extraordinary could have two different talents at the same time!

However, due to the lack of equipment and raw materials.

The production of Extraordinary Potions was very limited.

The production of gene serum 1.0 was especially rare.

After all, the Cloud Sky Corporation was not stupid.

Most of their genetic research equipment and basic materials were stored in the headquarters of the Nightless City.

The other cities had also established research departments.

However, the amount of equipment and raw materials was very limited.

Of course.

Even so, the potions produced were enough for Li Yueming to use for the time being.

After injecting the transcendent gene serum 1.0.

Now, the most powerful Extraordinaires in the Resistance had powers that far surpassed other Extraordinaires.

Furthermore, Li Yueming had successfully lured over 20 Grade A Extraordinaires who had surrendered to join the Rebellion Army.

That's why.

Only then did Li Yueming have the confidence to face the attack of the entire financial group.

He looked at the sea of people below him.

Li Yueming's expression was cold.

From his appearance, he had completely shed his childishness and had become a calm young man.

He took a deep breath.

Fellow countrymen of the Resistance Army," Li Yueming said loudly," Yunxiao Group has gathered more than five million troops and wants to exterminate us. They want to treat us like pigs, dogs, cattle, horses, and slaves again. Can we let them succeed?"

Beneath his feet.

More than a million rebels responded in unison,""No! No! No!"

Li Yueming smiled and said,""Of course not. We have to protect our city, protect our families, and protect the beautiful life that we have not obtained easily... Therefore, let us sing a resounding slogan and pour our blood and fire the first shot against the corporations!"

"The fire will start a prairie fire. You are all plants and trees. Are you ready to sacrifice yourself for your ideals?"

More than a million rebels responded in unison,""One after another, I have no regrets even if I die!"

“In that case, there is no need to say anything else...” Li Yueming laughed.”

Destroy the tyranny of the tycoons. The world belongs to the Resistance!”“

Hearing this slogan.

After a moment of silence, it wasn't just the one million rebels who agreed. Tens of millions of residents in Kandor shouted in unison,”

“Destroy the tyranny of the corporations, and the world belongs to the Resistance!”

“Destroy the tyranny of the corporations, and the world belongs to the Resistance!!”

“Destroy the tyranny of the corporations, and the world belongs to the Resistance!!!”
Millions of voices were deafening.

For a moment, the entire land trembled.

When so many ordinary people gathered together, the power that erupted was actually so terrifying!
Just like that, the war began.

It was simple and swift.

The two sides did not have any conversation throughout the entire process. They fought to the death the moment they started.

Obviously, both the Cloud Sky Group and the Resistance knew this.

The conflict between them was different from the other way around. It was a conflict at the core.

In this kind of conflict, it was either you die or I die. There was no possibility of negotiation.

Everyone in the Red Leaf Empire was watching the northwest.

Even the neighboring financial groups were more or less paying attention to it.

The television station was broadcasting the news in real-time.

Originally, everyone thought that with all kinds of high-tech weapons and the suppression of more than five million soldiers, they would be able to suppress the enemy.

The Yunxiao Group should be able to easily crush the Resistance Army.

However, after they really started fighting, the group of people quickly realized that this was not the case.

This group of resistance was completely different from the forces that the corporations knew of in the past.

The most obvious thing was that almost all of them were not afraid of death.

When the fight started, everyone rushed forward with all their might as if they were drenched in chicken blood.

Not only that.

Before they died, they would try to drag others down with them.

He's even crazier than a madman.

This kind of reckless fighting style caused the Cloud Sky Group to suffer a loss in the first battle.

Over 300,000 troops had suffered over 200,000 casualties.

However, this was not what made the Cloud Sky Group feel terrified.

What made the Cloud Sky Group feel the most terrified was: The number of the resistance army seemed to be much more than they had imagined.

The Cloud Sky Group now had more than 500 million troops. They were all elite regular troops who had just fallen from the front line and experienced the flames of war.

This was already considered the strongest military force in the entire Cloud Sky Corporation.

However, the other party was just a random resistance army that had occupied three cities.

When they fought a few years ago, they did not even have 100,000 armed forces.

How long had it been?

It had been less than four years.

But now, they had mustered a super force of more than a million fearless soldiers.

The commander of the highest command of the Yunxiao Group could not figure out what was going on even after scratching his head.

In the end, the scientists came up with a hypothesis.

They felt that Li Yueming might have mastered a very effective brainwashing method.

It could control the minds of ordinary people.

This was why he was able to build such a powerful army in just a few years.

After receiving this news, the entire Cloud Sky Corporation and the outside world were in an uproar.

Countless media outlets swarmed over.

The leaders of the various corporations also personally called to inquire about this matter.

In the end, it was the big boss of Yunxiao Group who personally came forward to suppress the public opinion and the attention of the other corporations.

However, it was obvious.

Everyone was very interested in the mental brainwashing methods controlled by the Resistance.

After all, a group of resistance soldiers could use this method to control millions of soldiers.

If they could also master this method, wouldn't they be able to form an army of tens of millions or even hundreds of millions?

After coming up with this possibility.

Countless scientists swarmed out of the headquarters.

He began to study the captive Resistance soldiers on the battlefield.

However, no matter how hard they tried, they couldn't find any difference between the brains of the Resistance soldiers and those of normal people.

No matter how much I think about it, I can't get rid of it.

The higher-ups of the Yunxiao Group organized an observation group to personally go to the laboratory. They wanted to talk to the awakened

Resistance Army and see if they still had the thoughts of a normal person.

In the silence.

The big boss of Yunxiao Corporation asked a few questions personally.

The Rebellion Warrior who had just woken up sneered.

If you think the Chief is brainwashing us, then so be it. We are willing to be brainwashed!" We risked our lives to hang you guys on the street lamps!" After saying that, the rebel soldier slammed his head into the glass cover.

Instantly, all signs of life disappeared.

Chapter 226: Destroy Like Ruin, Nuclear Strike? 1

The laboratory was eerily quiet.

All the higher-ups had dark clouds on their faces.

It had not been a long time since they felt a trace of terrifying terror.

So what did the leader of the Resistance force do to these people? They were actually so loyal to him.

Even if he knew that he would die in the next second.

However, he could still rush up and bite them without caring about his own safety.

However, there was some kind of conflict between the two sides that made it impossible for them to know. Or rather, even if they knew, they would pretend not to see it.

After all, this was a battle that could not be defeated.

If they failed.

He might lose everything he had now.

Houses, cars, superior social status, money, and beautiful women...

In this battle, the Cloud Sky Corporation went all out and mobilized thousands of troops.

There were dozens of corporations watching from the sidelines. They were obviously also studying the methods of the Resistance.

However, it was under such circumstances.

The Resistance had been stubbornly resisting, and their counterattack was very fierce.

The Cloud Sky Group's five million troops had fought against Hurricane Group for four to five years. They had originally thought that they could be called an elite army that had been through hundreds of battles.

In the end, in just a few months, the Resistance had beaten them to the point of doubting their lives.

It was as if the other party did not care about his life at all.

After retreating once, he would rush back.

Destroying a layer of defense would form another layer of defense.

They were all working part-time. Was there a need to work so hard?

The soldiers of the Cloud Sky Corporation were all numb.

The more the war progressed, the more intense it became.

The more numb the soldiers of the Cloud Sky Corporation became.

The higher-ups seemed to have gone crazy. They wanted to destroy the Resistance at all costs.

The Resistance Army seemed to have gone crazy. No matter how they fought, they could not be killed. Instead, they fought more and more fiercely. They were stuck in the middle, unable to please either side.

The war has entered a stalemate.

The morale of the soldiers of the Cloud Sky Corporation was also getting lower and lower.

Seeing this situation.

The higher-ups of the Cloud Sky Group were clearly ruthless. They used all sorts of methods to force the soldiers to go up and fight.

He didn't know when.

Some sneaky figures began to wander around the Cloud Sky Corporation's military camp.

Someone was walking around with a small booklet, and the information was spread one after another.

A commanding officer noticed this.

And began to investigate.

It would have been fine if he hadn't investigated. Once he did, he fell into a deep shock.

I don't know when.

A "Rebellion Army Booklet" had already appeared in the Cloud Sky Group's military camp. More than half of the soldiers in the camp had heard of it and observed it.

The officer walked forward and took a brochure.

Originally, he just wanted to see what was written inside.

Then, he could report it to the headquarters for a reward.

However, after reading a few chapters, the officer felt that his worldview had been impacted.

He even became muddleheaded.

On this day, the higher-ups of the Cloud Sky Group finally noticed the problem.

A group of commanders from the headquarters gathered in the conference room. A rebel propaganda manual was displayed on the virtual screen behind them.

The faces of the high-ranking officials in the meeting room were as dark as ink.

The chief commander of the operations department stood in the middle of the meeting room. He was so angry that his beard was sticking up. He questioned angrily, "Who can tell me who brought this thing into the military camp?"

He felt the commander-in-chief's gaze that was as if he was about to devour someone.

The high-ranking officers all lowered their heads and did not dare to make a sound.

No one answered.

The commander-in-chief's voice became even colder as he continued, "'Then can any of you tell me how long this thing has been circulating in the military camp? Why did you only show it to me now?"

The officers felt a chill down their chrysanthemums again and did not make a sound.

The commander-in-chief glanced around and said with a sinister smile, "'Don't tell me any of you want to join the Resistance?"

Hearing this.

The officers panicked.

He hurriedly shook his head in denial.

The commander-in-chief scanned everyone's faces and finally closed his eyes. "We can't delay any longer. Pass on my order. The entire army will launch a general attack tonight! If you still can't defeat those madmen of the Resistance, you'll be sent to the military court to eat bullets!"

Night fell.

The three cities where the Resistance were located were brightly lit as if it was daytime.

On the other side of the distant skyline, heavy trucks were slowly approaching.

Behind him was the army of millions of Cloud Sky.

They had yet to reach the city.

The powerful pressure had already made countless people unable to breathe.

Military bomber after bomber flew across the sky.

The city-defense elevated cannons were intercepting them. The cannonballs landed one after another, and then exploded with a loud bang.

From afar, they looked like balls of gorgeous fireworks.

Li Yueming stood on the city wall and looked at the army in the distance.

There was a trace of seriousness on his face.

The battle of offense and defense began.

For the sake of destroying the Resistance Army and capturing Li Yueming alive.

This time, the Cloud Sky Corporation had dispatched a total of seven S-class superhumans, more than a hundred A+ class superhumans, and more than three hundred ordinary A-class superhumans!!!

It could be said.

They weren't this crazy when they fought Hurricane Group.

But now.

However, when facing the Resistance Army, he blocked all his assets. One could imagine how much pressure the existence of the Resistance had caused them!

He looked at the many Extraordinaires in the sky.

Nearly a hundred people behind Li Yueming also flew up..

Chapter 227: Destroy Like Ruin, Nuclear Strike?_2

Compared to the 400 plus A-class superhumans and the seven S-class superhumans.

Their strength seemed extremely small.

Standing behind Li Yueming at this moment, he seemed a little nervous and uneasy.

However, no one ran away.

Transcendents also had their own pursuits and ideals.

After following Li Yueming for four years, many supernatural beings witnessed the development of the Resistance Army.

From the initial 10,000-strong guerrilla force.

It became a large army of 100,000 people.

In the end, it became the current large-scale organization that ruled over a dozen cities in the northwest. Each step he took was extremely firm.

Similarly.

Many Extraordinaires also felt the vitality of the city ruled by the Resistance.

In their eyes, Li Yueming was a mysterious man.

Most of the time, he was always unknown.

But in the end, he was always the one who had the last laugh.

Therefore, he had no choice.

Although it was now the most crucial moment of the final battle.

Many Extraordinaires actually did not see any hope of defeating the Cloud Sky Group.

After all, the Cloud Sky Corporation was different from before.

They had really brought out all their trump cards. Putting aside the hundreds of A-class sunerhumans. there were seven S-class sunerhumans.

As for the Resistance.

Only Li Yueming was an S-class supernatural being.

Even so, they still chose to believe in the man in front of them who was always full of miracles.

After all, most of the time, people had to have a little pursuit, right?

He had stayed in these cities for so many years.

It was time to contribute to this city.

Beneath his feet.

The Rebellion Army and the Cloud Sky Group's combat troops had already started fighting.

In the sky.

The seven S-class superhumans led by Yunxiao Group sized up Li Yueming.

There were no formalities or small talk.

They only exchanged a glance, and the battle was about to start!

Among the seven people.

A woman with psychokinesis waved her hands.

Suddenly, an invisible force squeezed towards Li Yueming.

Psychokinesis was an extremely strange attack. It was invisible, colorless, and had no end.

However, its destructive power was extremely powerful and impossible to guard against.

Li Yueming snorted coldly.

The golden martial force rose into the sky and blocked the woman's psychokinesis attack.

In the next second.

The Dragon Slaying Saber emitted a golden light that was nearly a thousand meters long. It was like a divine sword that came from the sky in the darkness.

He suddenly slashed down.

The woman's face instantly turned extremely pale.

He could no longer care about attacking and only managed to dodge this attack by dashing thousands of meters away.

The expressions of the other S-level Transcendents changed drastically when they saw this.

Previously, they had heard that Li Yueming was an S-class supernatural being.

Furthermore, he had a record of killing Extraordinaires of the same level.

However, he had never taken it to heart.

After all, those who could become S-class superhumans were all proud people.

But now.

Looking at Li Yueming's blade, they finally realized how terrifying the other party was.

He did not dare to put on airs anymore.

Soon, an S-rank talent rushed up.

Relying on his incredible strength.

His entire person was like a cannonball, and his every move could cause the sound of air being torn apart.

On the other side.

Under everyone's astonished gazes.

Li Yueming suddenly reached out his hand and punched the superhuman who was known for his strength in midair!

"Bang!"

There was a loud bang.

Everyone on the battlefield felt the energy fluctuations coming from the sky.

Under everyone's astonished gazes.

In the air, their fists collided.

Li Yueming's entire body was covered in golden flames.

He had actually punched the S-class supernatural being with a strength talent and sent him crashing onto a hill not far away!

Immediately, the ground was filled with smoke and dust.

Trembling like an earthquake, the supernatural being with a natural strength talent struggled to fly out of the hole after a long while.

Looking at the figure standing in the sky, the S-class supernatural being with Strength talent said in a daze, "'How is that possible? Why can you fight me naked?'"

It was no wonder that he had doubts about life.

The only thing extraordinary people with strength talent were proud of was their super-strong bodies.

After reaching [S] class, he could easily destroy an entire city.

Ordinary firearms, as long as it was not a nuclear bomb.

To him, it was just an attack that tickled him.

But now, the physical fitness that he had always been proud of had actually been completely defeated by Li Yueming with a single punch!

How was this possible?

He desperately wanted an answer.

In the sky, Li Yueming looked down at the supernatural beings below and sneered, “Why not? You don’t think your body is very powerful, do you?”

She heard his faint smile.

The strength talent was on the verge of collapse.

He felt that his three views had suffered a serious blow.

Seeing this situation.

The other five people in the sky sky felt a chill in their teeth.

It was just a short exchange of blows.

The strength that Li Yueming displayed shocked them.

As an S-class supernatural being.

They were quite knowledgeable.

But Li Yueming...

In terms of spirit, it could withstand the pressure of an S-class psychokinesis superhuman and launch an attack.

In terms of physical strength, it was an existence that could fight against a strength talent and gain the upper hand.

However, this was the first time he saw a knife cut his butt.

How was this an ordinary supernatural being?

This was clearly the father of all Extraordinaires!

Chapter 228: Destroy Like Ruin, Nuclear Strike?_3

Initially, the seven S-class superhumans were calm and composed. They thought that one or two S-class superhumans could easily take care of Li Yueming.

But now.

However, all of them felt a chill run down their spines.

It was obvious that they should be the one with the advantage in numbers and strength.

But now, in front of Li Yueming, they were even more like the weaker side.

It was enough to show Li Yueming’s current power!

The seven of them finally saw Li Yueming as an opponent that they needed to work together to suppress.

Li Yueming's current performance among the S-class superhumans.

It was enough to shock them.

In terms of might alone, only the SS-class Extraordinaires who stood at the top of the world could compare to it.

All seven of them used their strongest techniques.

However, even though he was surrounded by them, Li Yueming remained calm.

He raised his hand.

The golden greatsword that was nearly a thousand meters long pierced through the sky like a torch.

None of the Extraordinaires dared to take it head-on.

They all avoided him.

Li Yueming's figure flashed after he escaped from the siege.

In the blink of an eye, he arrived before the psychic.

He punched out.

The psychokinesis superhuman formed a seal with both hands and activated his strongest move with his mind as one.

Only then did he manage to escape from Li Yueming.

However, Li Yueming seemed to have locked her in place.

The golden longsword slashed down, forcing the other S-class superhumans who had rushed over to rescue them to retreat.

Once again, he came close and threw a punch.

This time, the psychic was not as lucky as before.

Li Yueming's punch pierced through his chest.

A huge hole appeared in his chest.

In the surroundings.

When the other S-class superhumans saw this, their eyes widened.

Looking at the woman who couldn't be any more dead, they finally felt a chill.

The man in front of her didn't look like an S-class supernatural being at all.

The strength he displayed had far exceeded the threshold of an S-class supernatural being!

On the battlefield below.

Countless Resistance Army and Cloud Sky Group troops noticed this scene. After seeing Li Yueming kill a supernatural being from Yunxiao Group in just a few minutes...

The entire battlefield fell into a short silence.

Many ordinary people found it hard to imagine what kind of existence an

S-class supernatural being was.

However, he knew a little about it from all kinds of rumors and understanding.

Now.

They watched as their leader easily killed the Cloud Sky Group's S-class supernatural being while surrounded by seven S-class supernatural beings.

The entire Resistance was naturally enthusiastic.

The countless rebels fighting on the surface were all cheering.

In contrast.

The morale of the Cloud Sky Group soldiers, which was not high to begin with, plummeted even more under such circumstances.

If it wasn't for the supervision of the army and the military court in the rear.

Most likely, some troops would have already started fleeing.

It was five million against one million.

To be able to defeat a party without any fighting strength, one could imagine how terrifying the Resistance Army was.

Of course, the most important thing was that Li Yueming had already planted the seeds before the war.

The pamphlets that were distributed in the Yunxiao Group's troops were operated under his instructions.

It was also because of this.

As a result, the cohesion of the entire Yunxiao Group's internal army suddenly dropped.

As for the specific content...

He could only say Avacaniya.

The battle continued.

However, the situation was completely reversed.

In the sky, Li Yueming was using a split formation to pick on the weak.

After paying the price of minor injuries, he successfully killed the already injured and unstable strength talent extraordinary person.

This way...

The original IV7 situation instantly became IV5.

However, the superhumans behind them were not weak. The key was that they did not have obvious weaknesses like the previous two. Therefore, Li Yueming was still dealing with him.

But even so.

However, the ending was already decided from the very beginning.

The battle below was also one-sided. Of course, it was not a one-sided massacre.

Instead, it was the countless soldiers of the Cloud Sky Corporation who had lost their will to fight.

They began to flee in small groups.

Ever since Li Yueming killed the third S-class supernatural being in the sky, and the golden longsword had killed dozens of A+ class supernatural beings like cutting wheat.

The millions of soldiers in the Cloud Sky Corporation could no longer hold it in.

Their morale was completely broken.

Countless soldiers began to flee for their lives.

If there was a small-scale escape of the troops, the military supervision and military court could still restrain them.

Then, when the troops were in a large-scale escape.

All the supervision and threats were like a piece of paper that would shatter at the slightest touch.

Millions of soldiers fled for their lives.

Even if they lined up to be executed, the Cloud Sky Group would still need a year and a half to fight.

How could it continue to form a binding force?

Under such circumstances.

The supervisor was more worried about not being trampled by the soldiers who were like wolves and tigers.

He didn't want to pull out his gun to block the fleeing soldiers.

They were anxious during the battle.

However, when they fled, they were extremely swift and violent.

Before the higher-ups of Yunxiao Group could react.

More and more soldiers began to flee.

However, this was not the most ridiculous thing.

The most ridiculous thing was that many of the soldiers of the Cloud Sky Corporation had even taken off their military uniforms as they ran.

Many of them directly joined the Resistance.

The Resistance seemed to have been prepared for this. They even prepared their exclusive tokens for them.

All the soldiers of the Yunxiao Group had to surrender on the spot and be able to match the slogan.

The Resistance would give them a token..

Chapter 229: Destroy Like Ruin, Nuclear Strike?_4

Then, he turned around and led the surrendered soldiers to join the battle.

This is under the decline of the other.

The number of rebels on the battlefield was still snowballing!

More and more Cloud Sky Group soldiers joined the Resistance Army.

They began to attack the Battle Command.

Regarding this.

The staff members of the Cloud Sky Group's headquarters were all dumbfounded.

Most of them were top students who had graduated from military academies, and quite a number of them were second or third generation soldiers.

Or they came from a powerful family.

They were the elites of the nobles.

Even so, this was the first time he had seen such a ridiculous move on the battlefield.

A second ago, they were still soldiers of the Cloud Sky Corporation. They took off their clothes and got their slogans right. In the blink of an eye, they became the Resistance.

This was really a f * cking war.

Instead of playing house?

Beside the sand table, the commander-in -chief of the Cloud Sky Corporation sat down on a stool when he saw the situation.

He threw the military cap on his head.

“It's over, it's all over. The Cloud Sky Corporation is finished...” he muttered with red eyes.

In fact, he had already smelled something unusual before the battle began.

His intuition told him.

If this continued...

Something unexpected might happen on the battlefield.

It was also because of this that he was so impatient to announce the final battle.

However, no matter how much he overestimated him.

He didn't expect that the Resistance's mental infiltration would be so thorough.

In less than a month.

He was actually able to turn the millions of troops and hearts of the entire Yunxiao Group into a pile of loose sand.

In the command room.

The advisors looked at each other.

A timid expression appeared on his face.

Very quickly.

A young man stood up and said to the commander, "Commander-in-chief, now that the situation has become like this, we should fly back to the headquarters to discuss countermeasures!"

Seeing him take the lead, the other staff officers around him stood up.

"That's right. As long as the Nightless City is still around, we won't lose!" He looked at the group of advisors.

The commander in chief was a little desolated. "I'm not going anywhere. If the army disbands, it's equivalent to me dying!"

Hearing this.

The advisors looked at each other.

The young man who had been the first to persuade them continued, "Commander, I'm the only son of the Nick family. The family is still waiting for me to inherit. You should send a Raven helicopter to send me back!"

The young advisors around them were also excited. They said, "Commander, I am the youngest son of the Herman family. The family has already sent someone to pick me up..."

The commander came from an ordinary family.

To be able to sit in this position was entirely due to his many years of management and his own military accomplishments.

Now.

He looked at the noisy young people around him.

They had all been sent by their rich parents to serve in the army.

From the surface of their resumes, they were all outstanding people.

But in reality.

When they had nothing to do, these guys would indulge in debauchery in the army.

When he was fighting, it buzzed like a fly beside his ear.

If he didn't take their advice, he would receive a call from his superior.

The euphemism was that he wanted him to give more opportunities to the young people.

However, in reality, they were just using the lives of the frontline soldiers to help these second-generation soldiers complete their colorful resumes.

It was said to be a staff officer.

In reality, they were just a bunch of idiots floating in the air.

But now, after the defeat at the front line.

This group of idiots in the past had all arranged their own escape routes at the first moment.

For some reason, the commander suddenly thought of the contents of the rebel army's propaganda manual that he had read before. In a trance, he seemed to have realized why he had failed.

That's right...

The children of ordinary people bled and sacrificed themselves on the battlefield.

And this group of people with brains full of oil sat in the command center and enjoyed fame and profit openly...

Was it really worth it to serve such a group of people?

Thinking of this...

The commander suddenly felt lost.

After a long silence, he waved his hand and said, "Don't worry, I'll arrange for all of you to board the plane. However, I don't care if the big boss will blame me!"

She heard him let go.

The group of advisors all heaved a sigh of relief and smiled. "It's okay. As long as we can go back, our family will protect us! When the time comes, we'll get the clan leader to put in a good word for the big boss. This battle was all because the Resistance was too cunning. It's not your fault!"

He looked at the flickering expressions on the faces of these second-generation heirs.

The commander smiled helplessly.

As a wily old fox, how could he not know what these guys were up to?

They might be saying nice things now, but they would definitely put in a good word for the big boss when they went back.

But in reality, as long as he let them go back, all the blame for this battle would be placed on him.

However, at this moment.

He no longer cared about those things.

Therefore, he only waved his hand and said, "Let's go, let's go..."

After listening to the helicopters take off outside.

The leader took out the Rebellion Army brochure that he had previously regarded as taboo from his pocket.

He fumbled around the paper page for a while.

A moment later.

An encrypted call came in.

The commander only glanced at it and ignored it.

After a while.

A soldier walked in.

Report," he said. "Nuclear 07, 08, and 12 are ready. Do you want to initiate a nuclear strike?"

The commander closed his eyes and remained silent for a long time.

Finally, he said slowly, "Give up the nuclear strike!"

The soldier was stunned.

"Commander, the resistance is about to reach our headquarters..."

The commander put the Rebellion Army brochure into his pocket.

At this moment, he regained the spirit of a commander and said firmly, "I repeat, give up the nuclear strike!" This time, the soldier did not hesitate.

"Yes!"

Seeing that he was about to leave.

The commander stopped him and asked casually, "Those guys just took off, right?"

The soldier was stunned.

After a moment, he nodded. "Commander, we've taken off!"

"That's good. Order the artillery to shoot down all these sons of b * tches!" The commander lit a cigarette and took a deep puff. He threw it on the ground and stomped it out. "You want to run away after making a mess? No way!"

Chapter 230: The Beginning of the Transcendent War, Perfect Genetic Medicine

Transcendence Calendar Year 351, Li Yueming was 18 years old and was about to welcome his coming of age ceremony.

In this year.

The war between the Rebellion Army and Cloud Sky Group became the most eye-catching topic on the entire planet 3-15741.

Countless consortiums and ordinary people were watching everything.

In public and in private.

All kinds of rumors and rumors were flying around.

The most shocking event was the final battle last September.

The Yunxiao Corporation had mobilized an army of more than five million.

Most of them were elites among elites.

Everyone thought that the Resistance Army would be easily wiped out in a few days.

However, what made everyone's jaws drop was...

Not only did the Rebellion Army not walk towards destruction under the siege of the various armies, but they also did not dare to attack.

On the contrary, he became braver as he suffered setbacks, directly giving several big ears to the millions of troops of the Cloud Sky Corporation.

During this process.

Many corporations also realized the problem.

A few years ago, the Rebellion Army was only a small-scale rebel army of less than 100,000 people.

How did it grow into a powerful organization that commanded millions of troops in just four to five years?

This question had troubled them for a long time.

Before they could figure out the reason, every corporation felt a strong sense of danger.

After all, in their eyes, the unknown was equivalent to danger.

Regardless of whether the other party was brainwashing or some other methods, they had to find the problem and study it in depth.

Just like that, copies of the Resistance Army's pamphlets spread all over the world.

The irony was that...

These manuals were supposed to be distributed among the people at the bottom.

But now, the first to study it were the members of many consortiums.

In the process of research and investigation, many corporate members felt their scalps go numb and their hair stand on end.

In the follow-up battle.

It was as if the Resistance Army was cheating.

In less than half a year, the main force of the Cloud Sky Group was utterly defeated.

The leader of the Resistance, Li Yueming, was even more terrifying.

In the final battle.

He had single-handedly suppressed the entire Yunxiao Corporation's seven S-class superhumans!!!

Four of them were killed on the spot.

The remaining three S-class superhumans were so frightened that they fled in panic. They wished their parents could give them two more legs.

The power was overwhelming.

The rest of the several hundred A-class superhumans did not even dare to breathe loudly in front of him.

It was fine if the low-level soldiers fled in defeat.

The top-level extraordinary humans were almost completely wiped out.

It was just a battle.

It directly caused the originally prosperous Cloud Sky Group to collapse.

It shocked countless onlookers.

According to the facts.

Li Yueming seemed to be an experimental subject that escaped from Yunxiao Group's headquarters.

The Cloud Sky Corporation's pursuit was fruitless. In the end, he successfully escaped with a golden cicada shedding its shell.

In just a dozen years.

This escaping Experimental was like a seed with excessive nutrients.

It continued to grow.

In the end, it only took a dozen years to grow into a towering tree.

Now, he had even become the terminator of the Cloud Sky Group.

He had personally sent this once prosperous large-scale financial group into destruction.

What was worth mentioning was...

The commander-in-chief of the Yunxiao Group actually gave up on the ultimate nuclear strike after his defeat. He even sent people to shoot down several planes that were carrying the descendants of large families.

This caused several hundred-year-old families to suffer heavy losses, and they were furious.

It was said that when the resistance army rushed to the command center, that damn commander had already committed suicide.

Before he died, he only left behind a neatly folded military uniform.

After the battle was won.

The Resistance Army began to attack the cities in a frenzy.

In just a year, they had snatched away half of the 64 cities occupied by the Yunxiao Group!!!

Wherever the flag of the Resistance reached, there would be countless responses.

After occupying thirty-two cities.

The Resistance had grown into a behemoth in an extremely short period of time.

Although the Cloud Sky Corporation was still organizing their forces to resist, they were still fighting back.

However, anyone with discerning eyes could see that their strength was constantly weakening.

In the end, the Yunxiao Group even began to ask for help from other corporations, wanting to use their strength to suppress the Resistance.

If it was any other time.

When the surrounding corporations saw the Cloud Sky Group in trouble, they would probably clap their hands and cry out in joy.

But now.

He watched as the Cloud Sky Group, which was originally extremely prosperous and could make a fuss about Hurricane Group, fell to such a state.

The surrounding corporations couldn't help but feel sad.

Although it was strange to describe it this way.

However, after the discussion of the consortium, the council decided to establish with them.

Some of the surrounding corporations still decided to send out a certain amount of power to help the Cloud Sky Group.

Of course, the reason why a corporation was a corporation was that it was a corporation.

It was something that could not be changed in their bones.

Therefore, he had no choice.

Although the various consortiums had mobilized their forces, they had also taken a few cities from the Cloud Sky Group as interest for the troops.

In Candor City.

After hearing this news.

Sun Ruo stormed in from outside the door and said, ""These damn corporations actually formed an alliance to deal with us!"

Now.

Except for a few rare cases, Li Yueming basically didn't intervene in the specific matters of military warfare and city management.

He spent most of his time breaking through to Extraordinary Power.

It was to immerse himself in the laboratory and lead a group of scientists to develop a certain drug day after day.

After occupying more than 30 cities.

The number of scientists under Li Yueming's control reached nearly 100,000.

Among the numerous scientists, Li Yueming selected the most powerful batch and sent them all to the extraordinary laboratory in Candor..
