

Maxing MT 231

Chapter 231: The Beginning of the Transcendent War, Perfect Genetic Medicine (2)

To him, a reincarnator who was a person of the great power side.

There were no complete sets of cultivation techniques and secret manuals in this technological world.

After thinking about it.

The true value of this world to his strength growth was the special golden talent he obtained when unlocking extraordinary power.

This golden talent could be directly bound to the main plane world like the initial talent.

[Martial Saint of the Wilderness: You are the god of martial arts from the

Wilderness. When you were born, your genes carried a powerful martial will!]

“All basic abilities of the body will be permanently increased by 300%. Physical attack damage will be increased by 500%.

[Your Extraordinary Divine Power can be attached to any item. The item will obtain divinity under your Extraordinary Power and provide an additional 350% attribute!]

This was the second time Li Yueming had enhanced his talent after breaking through to S-class supernatural being.

In all sorts of ways.

To a reincarnator like him who specialized in personal strength, the Wilderness Martial Saint was a rather good talent.

It could increase one's attributes, increase attack damage, and even strengthen weapons.

This kind of increase did not seem too obvious in the technological world.

However, if it was a fantasy world or a Xianxia world.

The effect of this talent would be infinitely magnified.

Imagine.

The strongest people in the fantasy and xianxia worlds could easily punch the starry sky and step on the silver river. Their physical bodies could even tear space apart.

What would it be like if his physical attributes were increased by three times?

Therefore, he had no choice.

Li Yueming had already decided to try his best to raise this special talent to its strongest state at the same time as he was grinding his reincarnation score.

At that time, this trip would not be in vain.

However, it was very difficult to increase the talent attributes of an Extraordinary after awakening.

When A class advanced to S class, his extraordinary energy level would increase by a large margin. The Barbaric Martial Saint had only increased a small amount of his attributes. Now, he had already reached the top and wanted to take another step forward. Other than the two methods of breaking through to the SS and SSS-class, only the gene serum could help him. Of course. What Li Yueming needed wasn't some half-baked perfect genetic vaccine. Instead, it was a genuine perfect gene serum. It was a perfect gene serum that could allow him to transform his genes to true perfection! That's why. Only then would Li Yueming slowly shift his focus from scoring to improving his strength. After all, reincarnating was not too rare for him. Even if the score was slightly lower, it was not completely unacceptable to him. On the other hand, there was only one chance to increase the attributes of the golden talent. If he couldn't grasp it, it would be even more difficult to encounter such an opportunity next time. Hearing Sun Ruo's complaints. Li Yueming smiled and said, "They are messing with their alliance army. We are occupying our territory. What conflict is there?" He didn't seem to care at all. Sun Ruo could not help but glare at him. "You're dreaming. They've sent over five million troops. This is only the first batch of reinforcements..." Hearing this. Li Yueming smiled. "Do you think there's such a thing as sincere cooperation and mutual help between the corporations?" Sun Ruo was stunned. She tilted her head and thought for a moment before saying, "The conflicts between the corporations are quite frequent. It's definitely impossible for them to help each other... However, they should still understand the principle of losing the lips and the teeth being cold, right?" Li Yueming picked up a tube of medicine and placed it under the detector. As he operated, he replied, "[It's true that the lips are gone, but the teeth are cold. But it hasn't fallen on their heads yet, right?] As long as the knife was not placed on their necks, they would never feel cold! Continue to act according to the plan. As long as the allied forces don't attack our main cities, don't get into conflict with them!"

“If they want cities, we will give them cities. If they want money, we will give them money. Anyway, it was all Yunxiao Group’s money. It wouldn’t be long before they would fight each other!”

He looked at Li Yueming’s expressionless face.

Sun Ruo thought for a moment and nodded.

He looked at the potion in Li Yueming’s hand and brewed it for a long time before saying, ””You really want Han Bufan to be the leader?”

When he heard the name Han Bufan.

The research in Li Yueming’s hands paused.

“I’ve always been the Deputy Chief, haven’t I?” It’s good to let him be the leader.

At least I can save a lot of trouble!”

Sun Ruo didn’t quite understand what he meant.

She thought that he meant that she no longer had to manage the complicated matters of the Resistance Army. She could not help but ask in puzzlement, “You have been in a hurry all this time. What are you searching for?”

Li Yueming looked up at her.

Then, he quickly lowered his head.

After a long while, he said,” You won’t understand what I’m pursuing, and I can’t make you understand. If you’re lucky in this life, maybe you’ll see me again in the next life...”

Hearing this.

Sun Ruo’s face revealed an even more puzzled expression.

His face was filled with confusion as he repeatedly muttered and chewed for a long time.

Finally, she regained her senses and looked at Li Yueming with red eyes. “No matter what you’re looking for, I won’t give up. If you don’t tell me, I’ll find it myself! ”

Li Yueming didn’t say anything.

I don’t know where the word of emotion comes from, where it lives, where it is tied, where it is untied, where it goes, and where it ends.

In the end.

He could only sigh.

Be it joy or sorrow.

Feelings could be buried by time, but time could not bury him..

Chapter 232: The Beginning of the Transcendent War, Perfect Genetic Medicine (3)

All the karma formed in the reincarnation world would eventually fall on him alone.

Although the mark of reincarnation could seal his memories.

But wasn't that a kind of sadness?

If it wasn't for the fact that he had completely lost all thoughts and was only left with regret and pain...

Who would be willing to seal some of their precious memories in the bottom of their hearts?

The life and death separation in his previous life was enough to break his heart, so he was not willing to be easily affected in this life.

Han Longfei, the nominal leader of the Resistance, had returned.

All these years, he had stayed in N City. Finally, the day of the uprising arrived.

When the time was right.

He immediately responded to the resistance's slogan.

They directly separated N City from the Cloud Sky Group and brought the entire N City into the arms of the Resistance.

After receiving the news.

Li Yueming took the time to welcome him and then handed over all the power in his hands.

This action made countless Resistance soldiers feel incredulous.

However, Li Yueming's explanation was very simple.

The Resistance Army was established by Han Longfei in the beginning. Without Han Longfei's support, the Resistance Army would not have been able to overthrow the Cloud Sky Corporation so smoothly.

Now, he was only returning the rights that originally belonged to Han Longfei.

As for himself, he became a researcher in the supernatural laboratory.

Han Longfei had mentioned many times that he wanted to abdicate the position of leader to him.

However, Li Yueming did not care about it.

In the end, Han Longfei could only announce to the public that Li Yueming would continue to be the deputy leader, and all his powers would remain unchanged.

Only then did the many voices of dissatisfaction calm down a little.

In the outside world, the corporate armies sent by the various corporations had already set off.

Just the first batch of troops that were dispatched had already surpassed the total number of the five million elite troops of the Cloud Sky Group. However, just as everyone thought that a great battle was about to begin.

The Resistance suddenly pooped their pants.

When the army charged forward, they retreated.

When the army occupied the city, they would give up the city and flee after putting up a symbolic resistance.

Everyone asked around carefully.

Only then did he know that the Cloud Sky Corporation had a new leader.

The other party was once the mayor of N City, and through some unknown means, he had obtained the highest command of the Resistance Army.

Hence, the outside world immediately began to discuss.

After all, whether it was in the group or in the army, changing the leader was a rather big matter.

Now, the Resistance had actually changed their leader at such a critical time.

Did this mean that there were factional struggles and interest groups within the Resistance?

Of course, no matter what happens,

This was a good thing for many corporations.

And the subsequent situation was quite exciting.

The resistance army, which was originally invincible, was being defeated by the coalition forces of the financial groups.

It had been half a year since the army entered the territory of Cloud Sky Group.

They had easily recovered half of the 30 cities that the Cloud Sky Group had lost.

Such an outstanding battle record shocked many people.

One had to know that when Li Yueming was in power, the Resistance Army was terrifying.

He was no different from a lunatic when he fought without fear of death.

Now that they had a new leader.

Why did the Resistance suddenly collapse?

Could it be that everything in the past was just their illusion?

Or was the Resistance trying to sell something else?

In the beginning, the alliance army was still trying to find out the inside story.

But later.

The allied forces of the corporations didn't have the mood to care so much.

After taking back the city, the higher-ups of the Yunxiao Corporation naturally wanted to take the city back under their control.

However, the alliance army wasn't a philanthropist.

Why should I give you back the territory I've taken?

The two sides quarreled over the ownership of the city.

In the end, the Cloud Sky Corporation, which had already suffered a great loss, naturally fell into a disadvantageous position.

He could only grit his teeth and swallow it.

They could only watch as the army took over the city that belonged to them.

Under such circumstances.

The conflict between the Yunxiao Group and the alliance of the financial groups had already begun to show.

The alliance army was also quarreling among themselves.

After all, since it was an alliance army, the number of troops sent by the various corporations naturally could not be too different. Now, they had taken down more than ten cities.

How should the alliance army be divided?

With this, the alliance army, which did not have much cohesion, naturally collapsed.

The major corporations were quarreling over the fate of these cities.

The group of soldiers had no leader.

Naturally, they did not have much combat power.

Even if the alliance army and Cloud Sky Group guessed that this might be the deliberate act of the Resistance Army.

However, he still couldn't avoid falling into the trap.

After all, this was an open plot.

As long as the corporations had the desire, even if they knew that this was a trap, they would still jump into it.

As the two sides argued.

Within the Rebellion Army, the reform from top to bottom had begun.

Firstly.

Li Yueming personally led the research and development.

The research speed of the various experiments in the Kandor Extraordinary Laboratory was astonishing.

The latest version 3.0 of the Extraordinary Potion had a 20% chance of success.

Moreover, the mortality rate had been reduced to less than 10%.

In the past, they could not promote it, not only because of the lack of raw materials.

It was also because the production line was limited.

Currently, the Resistance Army had already occupied many cities.

The production efficiency of the Extraordinary Potion had naturally increased by a lot.

Of course, the most important thing was that Li Yueming had reduced the cost of the Extraordinary Potion through infinite deduction..

Chapter 233: The Beginning of the Transcendent War, Perfect Genetic Medicine 4

It made it more 'friendly to the people'!

It would allow more ordinary people to have the opportunity to touch the threshold of the supernatural.

In the past, the research of the Extraordinary Potion was the most confidential project in the Rebellion Army camp.

Therefore, the outside world had almost never heard of this matter.

Now, with the gradual emergence of research results.

Li Yueming began to instruct the few white glove companies that he had prepared in the past to sell them.

Extraordinary potion.

This was true for any corporation.

They were all strategic materials.

In the past, these drugs were controlled by Andre Company.

By controlling the supernatural potion, Andre Company made a lot of money.

It was the most fundamental existence that stood at the top of many corporations in the world.

And now.

However, a large number of extraordinary potions suddenly flowed out of the black market.

In the beginning.

The White Gloves Company took out 500 bottles of Extraordinary Potions.

These extraordinary potions were all packaged with the Andre Company's extraordinary potions.

Everyone felt strange.

However, he still spent a huge amount of resources to buy them all.

But it's only been a few days,

The White Gloves Company took out another 500 bottles of Extraordinary Potions.

Although it was still packaged with the Andre Company's supernatural potion, the buyers felt that something was wrong.

After all, Andre Company used to sell supernatural potions like a woman on her period.

Not only were there only a few days in a month, but the production was also extremely limited.

The outside world had no way of knowing whether Andre Company was unable to produce more potions or was deliberately using hunger marketing to raise the price.

However, after so many years.

However, she had long been used to the rhythm of the difficult labor in Andre Company.

However, it had only been ten days.

The amount of Extraordinary Potions that appeared in the black market was almost half a month's worth of Andre Company's production.

This inevitably aroused the suspicion of others.

However, most of them did not think too deeply about it.

After all, it was possible that someone had been hoarding it for a long time and only dumped it when something happened.

But it's only been a few days,

Hundreds of Extraordinary Potions appeared on the black market again.

And it seemed that it was because there were enough of them.

This time, all the extraordinary potions were filled with glass bottles.

It wasn't even wrapped in Andre's packaging.

This time, no matter how stupid everyone was, they could sense that something was wrong.

After all, Extraordinary potions were not cabbages. How could they be thrown out in such large quantities?

It was just an instant.

Countless corporations were like sharks that had smelled blood. They began to send spies to dig out the source of the information. In just a few days.

The spy found out that it was the White Gloves Company.

The White Gloves Company was prepared for this.

He placed nearly a thousand bottles of Extraordinary Potions on the table of the leader of the faction and said indifferently, "These potions are 50% more effective than the Extraordinary Potions from Andre Company on the market, and there are almost no side effects."

The leader nodded and looked at the potion on the table with greed and desire.

A moment later, the leader licked his lips and suppressed his greed.

Although he was greedy, he was not stupid.

Andre Company had monopolized the supernatural medicine for more than 300 years, and it was not just about the supernatural medicine technology.

In fact, countless financial groups around the world had secretly researched the supernatural potion.

However, to this day, no one had been able to successfully replicate its technology.

According to the information circulating in the outside world.

The main technical problem was that other researchers were unable to analyze a strange gene.

After the Andre Company, countless consortiums searched the entire world, but they could not find the same type of gene fragment that matched the strange gene fragment in the supernatural medicine.

Another message.

Andre Company, as a person with a fixed interest, monopolized the entire production and processing chain of the supernatural medicine.

The other consortiums that dared to touch certain restricted areas of research were basically eliminated through various means.

How deep was the water in this? Just listening to it was enough to imagine the coldness in it.

And now.

Since the other party was able to take out such a large number of extraordinary potions at once.

Moreover, she even dared to sell it in front of him.

Without considerable strength, playing this kind of thing was purely courting death.

Thinking of this...

The leader revealed a hint of fear." What's the price?"

Hearing this, the masked man on the other end of the table was silent for a moment before suddenly saying, "Would you believe me if I told you that the price is half of Andre's?"

The leader was stunned.

His face immediately revealed a look of doubt and he subconsciously asked, "How is that possible?"

In fact, it wasn't that Andre Andre Company didn't have anything better than the supernatural potions circulating on the market.

However, those high-end potions had always been exclusive to the major corporations.

It simply could not be circulated in the market.

Now, the man in front of her had claimed that his medicine was twice as effective as the medicine on the market of Andre Company, and there were no side effects.

Under such circumstances.

The price of these potions was actually less than half of the price of Andre Company.

In his opinion, this was simply a fantasy.

There was no credibility at all.

At the other end of the table, the masked man spread his hands helplessly and said, "So if you don't believe me, the price of our medicine is actually 50% more expensive than Andre Company's!"

Seeing this situation.

Only then did the leader's expression become a little better.

After all, if the price of the potion was as the other party had said, it would only be the same as Andre Company's.

Then he had to carefully examine whether the other party was a liar.

After all, there was no such thing as a free lunch.

If there really was, then the pies were most likely poisonous.

Looking at the mysterious man in front of him, he crossed his fingers and said slowly, "In that case, can I inspect the goods first?"

The masked man stood up.

She pushed the box in front of him.

He stretched out a slender hand and smiled, "Of course, sir. I wish us a pleasant transaction!"

Chapter 234: Please Reorganize Your Words

Ever since the underground black market began to continuously flow out of the extraordinary medicine,

The group of magnates did not even have the mood to continue fighting for the Cloud Sky Group's territory.

They began to send people to frantically dig into the power behind the White Gloves Company. After all, the Extraordinary Potion could not have been developed in a day or two.

The source of production was a matter that was thousands of times more important than fighting for territory.

Many scouts began to work overtime to gather information.

It only took a few days.

The information related to the White Gloves Company was flipped upside down.

The headquarters of the White Gloves Company was located in Beiluo City, a neutral city north of the Red Leaf Empire and west of the East Peak Empire.

As one of the few neutral cities in the entire Western Continent, Beiluo City was a very special place.

Being sandwiched between the Yunxiao Group, Hurricane Group, and Beihai Group, it belonged to a grey area where no one cared about it.

Its territory was a mix of good and bad. It was a paradise for countless fugitives and mercenaries in the Western Continent.

If there was still basic order in the city under the rule of the tycoons.

In a place like Beiluo City, there was no basic order. Everything depended on fists and strength.

His fists were big and his strength was strong.

In such a lawless area, no one could punish him even if he killed someone on the street.

His fist was not big enough.

Even if they were torn into pieces, no one would help to cry out for justice.

At the same time.

Beiluo's black market was also one of the largest black markets in the entire Western Continent.

Many high-grade goods in the gray area were collected from all over the Western Continent.

In the end, they would all gather at this black market exchange.

The White Gloves headquarters was located in the center of Beiluo City.

On the surface.

White Gloves was a technology company engaged in drug research and development.

In fact, it was backed by an unknown mysterious organization known as the Transcendent Gene Group.

However, after digging into this so-called 'transcendent gene company', all the clues came to an abrupt end.

He wanted to dig deeper.

The scouts were shocked to find that all the clues were gone.

Whether it was the White Gloves Company or the Transcendence Gene Corporation, they had never published any other experimental results before producing the transcendent drug.

Both of them seemed to have appeared out of thin air overnight.

The goal was to stop other organizations from continuing to investigate the true source of the Extraordinary Potion.

But even so.

On the surface, the information they found was enough to make many corporations tremble in fear.

After all, the first few batches of supernatural potions sold by the White Gloves Company had been proven to be twice as strong as the ones circulating in the market by the Andre Company.

The success rate of awakening had reached 20%, and the probability of death and disability from failure had also been greatly reduced.

And in this kind of foundation

The price of the new version of the supernatural potion flowing out of the black market was only half of the price of the circulating version of the potion from Andre Company!

Such a good and cheap product.

Naturally, the moment they appeared, they were robbed by many corporations.

Countless corporations and their agents found the black market stalls in various places.

He wanted to contact the White Glove Company to order the Extraordinary Potion alone.

However, the employees of the White Gloves Company's branches were just ordinary people who were recruited.

The role it played was only to act as a messenger.

According to them.

Every month, only on Saturday and Sunday would the masked man who called himself Star Moon call them to inform them to go to a random place to trade.

The rest of the time, the White Gloves Company did not have any items related to the Extraordinary Potion.

After receiving the news.

The emissaries of the corporations could only wait patiently.

Of course, at the same time,

A crisis regarding the Extraordinary Potion was also intensifying.

After all, the effect of this version of the potion was too good.

If the power behind the White Gloves Company was really their own research and development.

Then the problem behind this was huge.

It was very likely that it would involve the reshuffling of the order of the world!!!

After all, Andre Company had always relied on monopolizing genetic technology to stand above many corporations.

Now, they had long surpassed the limits of a first-class corporation.

He had become the world's only and publicly acknowledged top corporation! !!

Standing on the highest peak, he couldn't see his opponent.

And now, the power behind the White Gloves Company had successfully cracked the monopoly of the Andre Company's supernatural medicine for hundreds of years.

Not only that, but the effects of the medicine were even more powerful than those of Andre Company.

What kind of concept was this?

This was a concept that could subvert the entire world!!!

If the power behind the peddling of the drug could survive the crazy suppression of Andre Company.

Perhaps the entire world would change because of this!

or course.

This was something that many consortiums were happy to see.

After all, Andre Company harvested the world through the supernatural potion.

It had been stuck in the throats of many consortiums for more than 300 years.

Many consortiums were already gnashing their teeth in hatred.

For them, the more companies that could research the supernatural potion, the better.

If it wasn't for the fact that the Andre Group had a large number of supernatural beings and was extremely powerful, and they even had the only SSS-class supernatural being in the entire world...

Many of the tycoons who often got stuck in Andre's company had already joined forces.

He had overturned Andre's company countless times.

Now, someone had broken through this technological barrier. They couldn't be happier, so naturally, they couldn't make it public..

Chapter 235: Please Reorganize Your Words (2)

Therefore, after discovering this, many consortia even took the initiative to work together to suppress the information about the supernatural potion in the black market.

All he wanted was to buy more potions from the White Gloves Company before Andre Company discovered him.

Of course, if they could carry out a deeper " cooperation ", then they would truly grasp the future.

It was under such circumstances.

More than a dozen corporations sent agents to the headquarters of the White Gloves Company.

But even so.

However, he was still rejected by Li Yueming.

After waiting for a few days, his hard work finally paid off.

On Saturday, the masked man from the White Gloves Company, who called himself Star Moon, made a call.

He described a location to the employees of the White Gloves Company.

The employees then followed his instructions and truthfully passed on the location to the corporate agents who wanted to negotiate.

After several twists and turns, he heard the news.

A group of corporate representatives made their way to a stall in the Neutral City's underground black market.

After entering the stall, everyone looked up.

Only then did they realize that a man wearing a strange mask was quietly watching them in the living room not far away.

The man was tall and slender, and the mask on his face was very strange.

A disc and a hexagram. The disc represented the moon, while the hexagram represented the stars.

To this world where the two moons were hovering in the sky.

This mask that symbolized the stars and the moon was a little strange.

He finally suppressed the doubts in his heart.

The representatives of the corporations took their seats.

The representatives of the corporations exchanged glances.

In the end, Hurricane Group's representative stood up and said, "Will you sell the Extraordinary Potion this time?"

Li Yueming didn't mind.

He took out a silver-gray suitcase from under the table and said, "Since I've come, I naturally can't be empty-handed!"

He looked at the heavy silver-gray suitcase.

The group of corporate representatives exchanged glances again.

Clearly, they had come prepared this time.

The representatives of the various financial groups stepped forward to open the suitcases one by one to check the quantity and quality of the medicine.

After confirming that there was nothing wrong with it.

The representative of Hurricane Group slowly said, "We're here to talk about cooperation with you. I'm sure you're ready to negotiate, right?"

Li Yueming returned to his seat and crossed his fingers. "I don't need to make any preparations. You guys can just open your chips!"

The corporate representatives looked at him calmly.

He couldn't help but smile. "Before the formal negotiations, the two sides feel that we need to remind you that according to the regulations of the financial group council, extraordinary potions that are not certified by Andre Company cannot be sold in the market. You should know this, right?" Li Yueming pondered for a moment.

On the surface, this guy was just stating the so-called rules.

But in reality, it was a warning to him.

The so-called extraordinary medicine that had not been certified by Andre Company could not be circulated in the market.

In fact, it was a warning to him that once the secret sale of the supernatural potion was exposed to Andre Company, he would face the full power of the most powerful financial group in the world.

He stretched.

Li Yueming said impatiently, "I don't need you to remind me. Since I dare to sell the drug, I'm naturally not afraid of not being able to pass the so-called 'certification.' Besides, even if my drug is not certified, aren't you all rushing to buy it?"

"If I have to say it, according to the regulations of the Financial Magnate Council, the purchase of extraordinary potions produced by non-Andre companies seems to be subject to warnings and punishments, right?" Hearing his retort.

Hurricane Group's representative smiled and said, "In that case, let's get straight to the point!"

Obviously.

The attack just now was only to test Li Yueming's attack power.

If Li Yueming's rebuttal was accurate...

Then, the negotiations would proceed as usual.

Once Li Yueming showed weakness or lack of confidence, then the following negotiation process.

They were aggressive and forced Li Yueming to give up more benefits.

Although they were negotiating.

But in reality, the confrontation at the negotiation table was no different from the flashes of swords on the battlefield.

Li Yueming raised his eyelids and didn't say anything. He was obviously waiting for the consortium representative to speak.

He waited for about ten seconds.

A representative from the North Sea Group said, "First of all, we would like to

know how many new versions of the Extraordinary Potion can be produced by the factory behind you every month. This is the basis for our negotiation." After a moment of silence.

"Aren't you guys overestimating yourselves, or did I give you face?" Li Yueming asked.

"

Hearing this.

The group of corporate representatives were all stunned. They obviously didn't understand what Li Yueming meant.

Seeing this situation.

Li Yueming's aura that belonged to a super expert soared.

In the blink of an eye.

The entire meeting room was filled with extraordinary energy that made one's heart palpitate.

Li Yueming stood up and looked down at everyone. He said, "If you want to negotiate, then negotiate properly. Please don't court death in front of me. Otherwise... I can't guarantee that all of you will be able to leave this room alive!"

After he finished speaking.

The entire meeting room was so quiet that one could hear a pin drop.

Li Yueming glanced at everyone again and sat down slowly.. "Alright, please reorganize your words!"

Chapter 236: Please Reorganize Your Words

Many corporate representatives were speechless.

After so many years of professional life.

It wasn't like they hadn't seen people being unreasonable at the negotiation table.

However, it was the first time in history that Li Yueming had asked them to reorganize their speech.

On the way here.

It wasn't that the consortiums didn't send bodyguards to them.

It could be said.

Currently, there were at least one reinforced company of A+ class Extraordinaires outside the hall.

But now, in front of this strange man.

Even with the protection of so many Extraordinaires, the corporate representatives still felt a bone-chilling chill.

It was obvious.

It was very likely that the other party was an S-class supernatural being!

After thinking of this, he suddenly felt a little uneasy.

All the corporate representatives immediately sat up straight.

Furthermore, when he thought about how he had used his power in front of an S-class supernatural being just now...

The representatives of the corporations couldn't help but break out in cold sweat.

He calmed down for a moment.

A consortium representative said word by word, "Hello, we are present. Fourteen financial groups, including Hurricane Group, hope to cooperate with you and contract all the supernatural potions you produce at a price that is one-third higher than the market price. In addition, if..."

At this point.

He glanced at Li Yueming.

Seeing that his expression under the mask didn't seem to have changed much.

If you are willing to disclose the production method of the supernatural potion, all the organizations present can share the responsibility of the Andrea Group with you. We can also promise to give you or your company 20% of the profits of all the supernatural potions produced later! "

Hearing this.

Li Yueming finally understood what these tycoons were up to.

These guys were certain that he would not be able to withstand the strangulation of Andre Company alone.

Therefore, he wanted to use this weakness to control him and use it to obtain the method to make the Extraordinary Potion.

However, it was obvious.

Li Yueming wouldn't let this kind of question get to him.

In fact, after researching the Extraordinary Potion, he could have digested it within the Resistance.

After all, although the Resistance had gradually become stronger, they were still in the midst of a war.

However, in reality, his foundation was still very shallow.

Let's not talk about the number of ordinary Extraordinaires for now.

The number of high -end Extraordinaires was far less than the number of legitimate second -rate corporations.

The reason why he came here to sell was only to realize one part of his entire plan.

This plan was called the Extraordinary Calamity Plan.

Li Yueming wanted to use this plan to cause turmoil in the entire world.

In the turbulence, he would achieve a perfect genetic body.

Of course, that was what Li Yueming thought.

However, his face didn't show any emotion. He said indifferently, "'1 can't hand over the formula of the Extraordinary potion to you, but I can give you a 20% discount on the ex-factory price, and I guarantee that I'll produce at least 1,500 vials every month. If you can accept it, we'll cooperate. If you can't accept it, we'll break up!"

Hearing his words.

The representatives of the corporations at the table looked at each other.

However, due to Li Yueming's aura as an S-class supernatural being, they did not dare to refute loudly.

After a moment of silence, they called the leaders of their respective consortiums to ask for instructions.

About ten minutes later.

The result of the discussion was out. The consortium was willing to accept the treaty.

The only objection was that once the news of the new version of the Extraordinary Potion was leaked.

If he was unwilling to hand over the formula when he was besieged by Andre Company, the major consortiums would not protect him.

Li Yueming naturally agreed.

After the two sides signed a top-secret agreement, the consortium's negotiating team slowly left.

Li Yueming crumpled the contract into a ball and stuffed it into his pocket.

If the consortium's representatives had seen the piles of paper balls in his pocket just now.

They would discover that these were all top-secret negotiation agreements!

With a cursory glance, he estimated that there were at least 20 drivers.

Li Yueming raised his hand to look at the time. It was already past eight o'clock in the evening.

After a sigh, he said tiredly, "'This time management is really f * cking hard.

I'm exhausted!"

These consortium representatives probably wouldn't even dream of it.

In just a few months.

Other than the East Continent where Andre Company was located.

Li Yueming had almost traveled all over the Western Continent and the Northern Continent.

During this period, he set up dozens of leather companies and secretly sold new versions of supernatural potions on several unrelated gray nodes.

This action naturally attracted the attention of the countless organizations, like sharks that smelled blood.

Li Yueming also successfully contacted the representatives of the major corporations in the Western Continent and the Northern Continent through repeated routines.

Moreover, they had all signed similar 'exclusive' purchase contracts.

That's right.

The representatives of Hurricane Group and Beihai Group were the last ones to sign the contract with Li Yueming.

Before them, Li Yueming had already spread his network of selling extraordinary potions in all directions.

More than 50% of the corporate groups in the entire Western Continent and Northern Continent had signed an 'exclusive' purchase contract with him.

After both parties agreed on the payment method and delivery method.

What Li Yueming needed to do next was to send a few reliable people to place the potion at a random location.

Then, he would inform the corporations and let them collect it themselves.

It saved time and effort.

This kind of 'top secret' information was tightly covered up by the corporations everywhere.

Other than the small scale discussions that had been stirred up.

Soon, the corporations used various methods to calm things down.

After all, the Extraordinary Potion was very important.

Therefore, it was not too much for the corporations to pay attention to it.

Naturally, he couldn't share it with other consortiums that didn't know about it.

In fact, every financial group wanted to monopolize the sales channel of the Extraordinary Potion.

The Extraordinary Potion was a hard currency. If it was sold in the black market outside, it could earn several times the price difference.

And even if he didn't sell it.

Keeping it in his hands to nurture more extraordinary humans would be a rather powerful foundation.

One had to know that the Andre Group could grow into the current leading giant.

Selling extraordinary potions to make money was one thing.

Only with fists could one earn money.

If you didn't use your fists to earn money, you would only be robbed.

The Andrea Company was able to look down on the rest of the superhumans because they had nurtured a large number of powerful superhumans.

However, no consortium could face the sword of Damocles of the Andre Group alone.

Therefore, the major consortiums did not dare to monopolize it.

Even so, forming an alliance with a few neighboring consortiums was already the limit of what they could tolerate.

Think about it.

Now, they had an additional way to obtain hundreds or thousands of extraordinary potions every month.

Furthermore, these extraordinary potions were even more effective than the ones sold by the Andre Group outside.

Under such circumstances.

As long as he kept a low profile and developed for a few years.

There was no doubt that the number of extraordinary humans under the control of these consortiums who controlled the new version of extraordinary medicine would soar.

Right now, they were counting on the Extraordinary Potion to quickly increase their strength. Then, when the time was right, they would take the opportunity to annex other consortiums.

Why would he share information with them?

He looked at the last group of consortium representatives who left happily.

Li Yueming smiled under the mask.

The seeds of the Transcendent Calamity had already been planted.

Next...He just needed to be patient and wait for the show to begin!

Chapter 237: Extraordinary Calamity Outbreak, The Arrogant Li Yueming!_1

Transcendence Calendar Year 252.

Countless supernatural potions were distributed to the entire Western Continent and Northern Continent through Li Yueming's hands.

Inside Kandor City.

The factory that was set up by the Resistance as a top secret rotated three shifts a day.

One after another, extraordinary potions were produced.

Through various means, it was finally sent to all parts of the world.

This batch of Extraordinary potions was the second version developed by the Extraordinary Research Institute.

By peddling extraordinary potions.

Li Yueming earned a lot of money and obtained enough funds.

The wealthy Li Ming waved his hand and added hundreds of billions of special research funds.

The many Kandor scientists who were on steroids began to work overtime to study the third version of the Extraordinary Potion.

At the same time.

The Resistance was still poaching people everywhere.

They offered high salaries to the scientists in the surrounding cities and countries.

In just two short years.

He poached hundreds of top-level scientists.

The third-generation drug was still based on Li Yueming's cells and genes.

With the help of Li Yueming's infinite deduction talent, the research progress was very fast.

It took about two years.

The research institute had successfully developed the third generation of extraordinary potions.

The success rate of the third-generation Extraordinary Potion awakening had reached 30%, the mortality rate had been reduced to 7%, and the probability of disability had also been reduced to 20%.

After the research results were released.

The entire laboratory was excited.

One had to know that even the highest-priced top-tier version of the extraordinary potion from Andre Company.

The effect was basically the same as the third-generation Extraordinary Potion produced by the Resistance.

He did not consider the fact that the other party was hiding a deeper level of technology.

They only spent five to six years.

Now, the level of the extraordinary potion on the surface had already reached the height of the Andre Biotech Group.

Under such circumstances.

Li Yueming was still not satisfied.

What he wanted was a product that had a probability of awakening of more than 50%, and a probability of death and disability of less than 5%. Furthermore, the cost had to be kept below 50,000 cloud leaf coins.

This was the only way.

Only then would he be able to promote the Extraordinary Potion to the entire world.

After a short period of excitement, the research institute immediately devoted itself to the research and development of the fourth-generation Extraordinary Potion.

At the same time.

The number of new students in the three big cities run by the Rebellion Army was increasing exponentially.

Originally, in order to let the ordinary people in the major cities have children, the Cloud Sky Group had tried all kinds of methods to coerce and bribe them, but there was not much effect.

In other words, under the general trend of the tycoons ruling the world.

The number of new students was declining every year.

And this infuriating trend had not been reversed so far.

After all, ordinary people were already tired enough to live.

The next generation was nothing more than adding more cheap labor to the corporate world.

Instead of having children and watching them suffer.

It would be better to end it in their generation.

And now.

In the city occupied by the Resistance.

Li Yueming did not encourage anyone to have more children.

However, with food, clothing, and a house to live in, and the entire city's security was unbelievably good.

On the contrary, the ordinary people began to formulate their own reproductive plans.

There were many young couples holding hands on the streets.

They began to enjoy leisure and peace after they finished their work.

In the past few years.

The surrounding streets were in ruins.

There were all kinds of custom shops, gambling dens, and street thugs who would draw their swords at each other.

But now.

The streets had long been clean and tidy.

The messy shops of the past had long been replaced by flower shops and cafes.

The married couple began to plan to raise their next generation after receiving the free house allocated by the Resistance.

After all, they no longer needed to worry about all kinds of high-interest loans.

After the Resistance took over the entire city.

Almost all the schools and hospitals were set up for the public, and children did not have to worry about not being able to pay for school fees.

Under such circumstances.

The residents of the Resistance Army were bursting with happiness.

The entire city became lively and prosperous. Even the neon lights that were originally flashing in the middle of the night became gentle and stable.

In the outside world.

After receiving the extraordinary medicine provided by Li Yueming, many corporations were shocked.

He started to become low-key, which was rare.

In the next few years.

Even the areas where border conflicts often broke out in the past had recently calmed down.

After all, he had obtained so many extraordinary potions.

Many corporations naturally had to take advantage of the time when they were not noticed by others to quickly develop.

As a result, countless ordinary people living at the border suddenly realized.

The entire world seemed to have become quiet overnight.

Many corporations were no longer as unscrupulous as before.

Instead, they began to slowly shrink their forces. Sometimes, they would even willingly give up some of their interests rather than make a big fuss. They only wanted to be stable and peaceful for a period of time.

This abnormal behavior naturally attracted the attention of countless people.

After all, it was rare for corporations to take the initiative to admit defeat.

However, as time quietly passed, more and more corporations withdrew their forces.

The group of people were still puzzled.

However, the amount of attention they received was decreasing.

After all, if a financial magnate suddenly became low-key, people might find it strange.

However, hundreds of consortiums kept a low profile..

Chapter 238: Extraordinary Calamity Outbreak, The Arrogant Li Yueming!_2

Although it sounded even stranger, there was nothing much to think about.

Anyway, for ordinary people, it was a great thing that the corporations had become low-key.

Only a few people could smell the difference in the air.

He also began to investigate the deeper secrets.

However, the further he investigated.

The more he realized that the water under these actions was unfathomable.

For some reason.

Many people could smell a storm brewing.

Transcendence Calendar Year 262.

It had been nearly ten years since the first batch of Extraordinary Potions had been circulated in the market.

In these ten years.

Everyone in the world welcomed a short period of peace.

The corporations were ten times or a hundred times more low-key than usual.

The frequency of wars and battles had also decreased significantly.

Except for a few hotheads who had been provoking everyone.

It was very peaceful most of the time.

However, under such circumstances.

One day ten years later, on an ordinary afternoon.

The incident that was later called the 'Extraordinary Calamity' suddenly erupted, and the flames of war that engulfed the entire world burned fiercely!

Northern Continent, Mingxiu Biotech Group.

In the Security Council's assessment, Mingxiu Biotech Group was a medium-sized second-rate consortium.

A few years ago.

For some reason, Mingxiu Biotech Group suddenly withdrew their defenses.

However, unlike the other financial groups that had shrunk their defenses.

Mingxiu Biotech Group also had a sworn enemy called Zhuyue New Alliance on the southern border.

A few hundred years ago, Mingxiu Group was a subsidiary of Zhuyue Xinlian.

At that time, Chasing Moon New Alliance was still a first-class group.

But later, because of some conflicts.

Mingxiu Biotech Group broke away from the Chasing Moon New Alliance and became independent, which directly caused the Chasing Moon New Alliance to lose half of its territory and suffer a huge loss.

From a first-rate financial group, it was downgraded to a second-rate financial group.

The conflict between the two sides had already been planted on that day.

After more than a hundred years of conflict, it had long evolved to the point of not stopping until one of them was dead.

Therefore, when they saw Mingxiu Biotech Group shrinking their defense line, their arch-enemy, Chasing Moon New Alliance, naturally did not think too much and attacked.

In ten years, Zhuyue New Alliance had occupied thousands of kilometers of Mingxiu Biotech Group's land.

He even forcefully snatched two cities.

A few years ago, Mingxiu Biomedicals had swallowed their anger.

The defense line had even retreated thousands of miles, and several cities had been abandoned.

This caused the Chasing Moon New Alliance to become even more unscrupulous.

Every year, they would provoke him crazily.

However, all of this had changed one day after ten years.

Unable to take it anymore, Mingxiu Biomedicals immediately mobilized an army of more than 30,000 B-class superhumans.

In just three days.

Mingxiu Biomedicals 'superhuman army directly invaded the capital of Chasing Moon New Alliance, and they chopped the unprepared Chasing Moon New Alliance's boss into eight pieces and fed them to the dogs.

This sudden war had shocked countless people.

As an ordinary second-rate corporation, Mingxiu Biomedicals should have at most 10,000 B-class superhumans.

But now, Mingxiu Biomedicals had actually sent out an army of more than 30,000 B-class superhumans.

What kind of concept was this?

An ordinary first-rate financial magnate should only be able to control this many supernatural beings.

Even some of the weaker first-class corporations probably couldn't reach this level.

But now, Mingxiu Group was able to gather more than 30,000 supernatural beings overnight.

Could it be that the Mingxiu Group had already lived to such an extent that they had directly entered the ranks of first-class corporations?

Many gazes were filled with astonishment.

Someone sensed that something was wrong.

They sent out spies to start digging deeper into Mingxiu Group.

However, before anyone could dig out any useful information.

All of a sudden, the corporations that had been quiet for a long time seemed to have come alive overnight.

The incident with Mingxiu Biology Group was like a fuse.

He ignited the explosives that had been brewing for a long time.

In just a few days, intense wars broke out all over the world.

The first-class financial magnate of the Western Continent, the Wuyue Group, suddenly launched an attack and sent 150 ,000 supernatural beings from the sky to swallow up the Southern Return Group, which had a feud with them.

The second-rate financial magnate of the Northern Continent, the Dragon Logistics Group, had gathered more than 50,000 supernatural beings to attack the Mountain Goat Logistics Group.

The war between the two sides was about to break out.

However, while the ordinary soldiers were still engaged in a fierce battle, the high-end combat power of the supernatural beings was in a one-sided situation.

Goat Logistics Group only lasted for less than two months before it could no longer support itself.

He could only announce his surrender.

In a trance, the flames of war burned.

The corporations, who had been keeping a low profile for the past ten years, had suddenly transformed into fierce tigers.

It began to devour the other forces around it.

The most shocking thing was that almost every financial group that initiated the war displayed extraordinary power.

Even an ordinary second-rate financial group could send out an army of 20,000 to 30,000 Class C or Class B Extraordinaires at once!!!

When did supernatural beings become so worthless?

Shouldn't ordinary second -rate financial groups only be able to mobilize an army of less than 10,000 supernatural beings? This sudden war caught everyone off guard.

In the beginning.

Most people thought that it was just an ordinary war.

However, not only did the intensity of the subsequent battles not decrease, but it also continued to increase.

More and more consortiums began to participate. The scope of the war was getting wider and wider..

Chapter 239: Extraordinary Calamity Outbreak, The Arrogant Li Yueming!_3

The number and level of Extraordinaires participating in the battle also increased.

This made people wonder if these corporations were preparing to start a new round of world-class war.

When the Andre Company developed the Extraordinary Potion, the world order was completely reshuffled.

In this round of reshuffling, the government army was washed into the trash heap of history.

At the same time, the entire world had been in turmoil for more than 200 years under the cover of smoke and flames of war.

The corporations that could still stand in the world after more than 200 years had already dealt with each other countless times.

I'm in the process of dealing with you, I'm finding out who you are, but I'm not finding out who you are.

The corporations had established a new order that could operate stably.

The latecomers who wanted to beg for food could only follow this order.

Therefore, for a long time in the past.

The war between the corporations was actually more reserved and restrained.

Most of them were limited to border friction.

At most, they would occupy a few cities.

A war of higher intensity was usually not one where there was a great disparity in strength or deep contradictions.

Basically, they would not really fight.

But now, the aggressiveness displayed by these corporations was beyond everyone's control.

What was most frightening was the number of Extraordinaires revealed in this war.

Even the unknown second-rate financial groups could suddenly send tens of thousands of supernatural beings in this war.

The more established first-class financial groups had armies of hundreds of thousands of supernatural beings.

The group of consortiums who did not know what was going on were dumbfounded.

In the past few years, the supply of the Extraordinary Conceal Potion from Andre Company had been very stable.

On the surface, there was no act of selling extraordinary potions.

So when did the number of supernatural beings become so high?

During this period, some corporations suspected that Andre Corporation was behind all of this.

After all, in the entire world, if there were any forces that could control all the consortia's chaotic battle, then there would be no way for them to escape.

Then, the company that controlled the supernatural potion, the Andrea Company, would definitely be the first to bear the brunt.

However, Andre Company, which was located in the Eastern Continent, quickly clarified that they did not sell supernatural potions on a large scale.

When this news was released, the entire world was in an uproar.

If Andre Company did not control this war, then who was controlling everything behind the scenes?

Obviously, no one believed that this was a coincidence.

Many consortiums showed such tacit synchronization.

They had all shrunk their defenses ten years ago to develop in a low-key manner, but they had all erupted at the same time. If there was no powerful mastermind behind the scenes.

That would be haunted!

After the Andre company clarified.

Many corporations were skeptical about this, but on the surface, Andre Corporation did not benefit from this strange struggle.

After all, the current world order was formulated by Andre Corporation. If it wanted to manipulate a consortium, there were ten thousand ways and means. There was no need to go through so many twists and turns.

Not to mention that overthrowing the world order that he had established was an extremely brainless act.

As long as the Andre Group had not lost its mind, it would not shoot itself in the foot.

Therefore, after some consideration, many corporations temporarily ruled out its suspicion.

But soon, under the joint efforts of all the corporations in the world who had not bought the new version of the supernatural potion.

Some of the clues hidden in the dark were found.

That's why.

A piece of news that shocked the entire world was finally made public.

Ten years ago, a mysterious person had broken through the technical barrier of the Andre Company's supernatural medicine.

This mysterious person had contacted many corporations in the Western

Continent and the Northern Continent through registered shell companies.

In the following ten years, this mysterious man began to sell extraordinary potions crazily.

Moreover, it was said that the effect of the extraordinary potion he was selling was better than the VIP version of the extraordinary potion developed by Andre Company.

However, the price was only one-fifth of Andre Company's VIP Extraordinary Potion!!!

According to the rough statistics.

This mysterious person had provided hundreds of millions of extraordinary potions to many corporations in ten years! !!

If the success rate of awakening was 20%.

That was 30 to 40 million supernatural beings...

When he found out about this news.

Almost all the corporations who did not buy the new version of the Extraordinary Potion felt a chill in their hearts.

No wonder so many of his enemies had suddenly quieted down over the years.

It turned out that they had gathered their financial and material resources to secretly nurture an army of supernatural beings.

Of course.

The biggest reaction from this group of tycoons was naturally Andre Company.

In fact, it was not that they did not feel anything strange in the past few years.

The most obvious thing was that the circulation of the company's extraordinary medicine in the black market had suddenly deteriorated.

The Extraordinary Potion, which was originally sold for millions of dollars, had become unsalable in some places in recent years.

Although the corporations would still buy them all in the end.

However, Andre Company still felt that something was wrong.

However, after a rough investigation, he came to the conclusion that the market was sluggish.

Andre Company still didn't investigate carefully.

After all, for the consortium, as long as the money could be steadily received every month, it was the most stable tranquilizer.

Moreover, Andre Company had monopolized the supernatural medicine for so many years.

No one had ever been able to break through their technological barrier.

After all, as the creator, they were the only ones who knew what the most crucial gene of the medicinal machine was..

Chapter 240: Extraordinary Calamity Outbreak, The Arrogant Li Yueming!_4

Over three hundred years.

In the beginning, Andre Company was still very strict with its competitors.

However, as time passed.

All of the competitors were sent into the dust of history by the Andre Group.

In addition, the root gene for the production of the supernatural potion had already been cleaned up by the Andre Group.

This directly led to the Andre Group's control over the supernatural drug becoming more and more superficial over the past few decades.

The two factors overlapped, so much so that the Andre Group only realized now that someone had spent ten years stealing his home under their noses.

In his fury.

Andre company issued a statement.

He wanted all the tycoons who injected the illegal Extraordinary Potion to hand over the culprit who produced the illegal Extraordinary Potion.

Regarding this.

Many corporations that had received the new version of the Extraordinary Potion were silent for a while.

In the end, he chose to ignore Andre Company's statement.

After all, although the corporations were evil, they were not stupid.

Li Yueming's whereabouts were strange, and he seemed to be a very powerful supernatural being, making it difficult to capture him.

After punishing Li Yueming, it was hard to guarantee that Andre Company would not seek revenge from them.

After losing Li Yueming, the source of the Extraordinary Potion, they would have no resistance against Andre Company.

After realizing that threats and pressure were useless, he was stunned.

Andre Company looked at the entire world and realized that things had far exceeded the scope of his control.

Hundreds of first-rate and second-rate consortiums had developed in a low-key manner for ten years.

Now, his wings are full.

Andre Company had the most supernatural beings in the world.

However, it still felt like a headache to hold such a huge financial group.

Hence, he decided to do it.

Angrily, Andre Company issued a second statement.

They said that they would use the strictest means to punish the financial groups that illegally injected the supernatural medicine.

At the same time, he issued an international arrest warrant.

He called on everyone in the world to search for the mysterious person or mysterious force who was selling the extraordinary potion.

If they could provide accurate information or bring back the other party's head, they would be rewarded with an SSS-grade Extraordinary Fusion Potion.

After this arrest warrant was issued.

It stirred up the fanaticism of countless supernatural beings in the entire world.

SSS-grade Extraordinary Fusion Potion.

There was a certain chance that an S class or above supernatural being could break through the genetic chain and awaken a second supernatural power.

This was extremely attractive to those high-level Extraordinary individuals.

The second day after the arrest warrant was issued, the world's largest assassin organization.

Assassin Dynasty announced that they would accept this mission.

They also began to use the overwhelming intelligence network to trace the source, trying to find the organization that developed the supernatural potion.

At the same time.

Andre Company was not idle either.

Many Extraordinaires began to set off for the Western Continent and the Northern Continent.

Other than investigating the mastermind behind the incident.

The other mission of this group of Extraordinaires was to maintain order and stability in the Western Continent and the Northern Continent.

For the time being, Andre Group would not send troops to participate in the war.

After all, if they really sent troops to participate in the battle, it would definitely cause the situation to get out of hand.

Even Andre Company itself might be involved in the flames of this war.

After thinking about it.

Andre Company decided not to sell any supernatural potions to all the blacklisted consortiums.

He turned around and handed all the potions to the financial groups that did not buy the new version of the Extraordinary Potion.

Moreover, they had formed a huge alliance with them.

Andre Company would provide an endless stream of extraordinary potions to fight against the corporations and countries that used the new version of the extraordinary potions.

There was a certain risk involved in this act of driving a tiger and swallowing a wolf.

But for the time being, this was the best plan that Andre Company could come up with.

It was better for him to fight among the corporations than to be embroiled in a war.

Moreover, if the two sides fought more fiercely, they might be able to obtain more benefits.

Of course.

The premise of all of this was to capture the guy who peddled the Extraordinary Potion and tear him into pieces.

Otherwise, Andre Company's glory of ruling the world in the past would be completely destroyed.

Without a single sign of the right

A full-scale war broke out between the corporations.

The corporations that possessed the new version of the Extraordinary Potion had been silent for more than ten years.

swallow one's pride and grow.

All of this was for the sake of catching the other forces off guard with the help of the large number of Extraordinaires.

In fact, they had done it.

They had to pass through several times, or even dozens of times, the number of supernatural beings from other ordinary financial groups.

In just a few months, they had annexed a large number of territories and cities.

Such a smooth war had nourished their ambitions.

After all, they had endured hardships for so long just for this day.

Now that they had just tasted a little sweetness, they naturally wouldn't let them be obedient so easily.

After discovering that the Andre Group was furious and cut off the supply of drugs, they formed an alliance.

They also quickly established a so-called 'New Order' alliance.

He would unite all the forces that had been injected with the new version of the Extraordinary Potion and annex the other ordinary financial groups in the surrounding area.

Even if the Andre Group provided its allies with extraordinary potions.

However, nurturing a powerful supernatural being was not something that could be completed in a day or two.

Therefore, the army of the New Order Alliance was unstoppable in a short period of time.

Large pieces of land in the Western Continent and the Northern Continent were annexed by them, and countless financial groups disappeared into the wheel of history..
