

Maxing MT 251

Chapter 251: The Monster with the Most Perfect Body! 1

In the past ten years.

The intensity of the war between the corporations had been rising.

He didn't want to lose in this war.

The corporations could only continuously inject their soldiers with supernatural drugs.

After all, everyone was nurturing high-end superhumans to increase their strength. If you couldn't keep up with the pace, you could only be annexed.

However, the direct consequence of this disorderly expansion was: The number of Extraordinaires had rapidly increased by dozens of times in this war, and after the constant baptism of the flames of war, the surviving Extraordinaires' combat strength had also risen.

On the contrary, the power of the corporations declined severely in the constant friction of war.

After all, they were being sucked dry by supernatural beings.

Andre Company and Li Yueming would suck the blood of the higher ups.

No matter how rich the corporations were, they couldn't stand being exploited like this.

This is under the decline of the other.

The group of supernatural beings finally began to slowly break away from the control of the corporations.

In the end, when the Resistance was exposed to the public as the producer of the extraordinary potion, the people of the city were all shocked.

Only then did countless consortiums wake up from their dreams.

It turned out that they had been at war with each other for decades, trying to reshuffle the world order with the help of extraordinary potions.

However, after a round, he was just a clown from the beginning to the end. He had been schemed against by the deputy leader of the Resistance camp.

It was fine if he was just making a wedding dress for others.

Even their right to speak was greatly challenged by the Extraordinaires.

Extraordinaires absorbed the nutrition of the financial groups like parasites, but after they grew their wings, they no longer submitted to the control of the financial groups.

Many consortiums were so angry that they gritted their teeth.

If one were to say that the corporations' hatred towards supernatural beings had a Fury Wing value, then the number of Fury Wings would increase.

In that case, the corporation's Fury Wing Value for Extraordinaires might have already exceeded 90.

Of course.

It was also this Raging Wing.

If it was Li Yueming.

The corporations 'Fury Wings had probably exceeded 180.

If there was a chance,

They wanted to skin Li Yueming alive.

After all, he had fooled all the financial groups in the world for 20 years.

One could imagine how angry they were.

It was a pity that under the circumstances of the collective rebellion of the supernatural beings, the corporations were already unable to protect themselves.

Therefore, he could only curse furiously.

It verbal attacks could cause damage.

Li Yueming would probably disappear in an instant.

Under such circumstances.

When he heard that the Extraordinaires of the Association of Extraordinaires had gone to the Rebellion Army camp to cause trouble because of the problem of the Extraordinaire Potion, he was shocked.

Many corporations were extremely excited!

Now, it was finally the Resistance's turn to be bitten by their own dogs.

This was great news!

For a moment, many consortiums couldn't help but clap their hands in joy.

After all, if they were the only unlucky ones, the consortiums would be extremely depressed.

But now, they were in trouble when they saw the Resistance camp.

Their moods instantly became much more balanced.

"Extraordinaires are just a bunch of ungrateful wolves. How much manpower and material resources did our corporations spend to nurture them? Now that his wings had hardened, he turned around and bit his master. He was really not a thing!"

"Hehehe, the Extraordinaires are indeed nothing, but the Resistance Army is even more so!"

"That damned leader of the Resistance controlled the Extraordinary War single-handedly and thought that he could reap a lot of profits from it. Now that the Resistance has been devoured by the Extraordinary, did he ever think that this day would come?"

“Hmph, do you think that the Resistance can rise to power just because you defeated us? What a joke!”

“Although I’m very unhappy with the Resistance, what I want to see the most is the Resistance and the Extraordinaires fighting each other!”

“That’s right. I hope that the Resistance will be tougher and not be easily defeated!”

On the major news media.

The representatives of the corporations mocked him.

However, even though they wanted to skin the Resistance Army alive, they still had to fight.

But now, they did not want the Resistance to be easily defeated by the Extraordinaires.

After all, the strength of Extraordinaires had begun to show a trend of dominance.

If they really obtained the production method of the Extraordinary Potion...

Then the good days of all the corporations would really come to an end.

The Extraordinaires who had obtained the control of the Extraordinary Potion would no longer be able to be restrained.

Therefore, he had no choice.

The corporate powers were feeling conflicted.

On one hand, they wanted Li Yueming and the Resistance to die immediately.

On the other hand, they hoped that the Rebellion Army camp could hold back the Extraordinaires from continuing to expand.

After weighing the two.

The corporations were even prepared to intervene when necessary.

Anyway, no matter what.

The production method of the Rebellion Camp’s supernatural potion must not fall into the hands of the Association of Extraordinaires.

It could be said that the world order during this period of time was very strange.

Candor City.

Ever since the identity of the mastermind was exposed, the Resistance camp no longer kept a low profile.

They occupied more than half of the Cloud Sky Group’s land at lightning speed.

The Resistance camp had now become a territory spanning hundreds of thousands of kilometers.

A superpower with over 40 Large Cities.

Although the base of the resistance army was not eye-catching, it was still a small town.

But don't forget that it wasn't just the supernatural beings who had been absorbing the nutrition of the corporations over the years.

The resistance camp had also absorbed a lot of nutrients from the corporations.

In terms of financial resources, it was the world's greatest.

Other than the Andre Group.

Only a few top financial groups could be compared to the Resistance camp..

Chapter 252: The Monster with the Most Perfect Body! 2

What kind of concept was this?

Most of the world's top-class corporations had been established for two to three hundred years.

The Resistance camp had been established for less than 30 years.

In other words, the Rebellion Army camp had only used less than 30 years of effort, but its wealth was already comparable to the foundation of a first-rate financial group for 300 years.

Such a money-making ability could only be achieved by selling supernatural potions and other violent industries that were full of monopolistic nature.

Under such circumstances.

The strength of the Resistance camp could not be underestimated.

It could even be said that the current resistance camp had already surpassed the first-class corporations in terms of strength.

After all, the Resistance camp itself was the producer of the Extraordinary Potion.

All these years, they did not want other forces to notice anything unusual, so they did not inject the army with the Extraordinary Potion on a large scale.

However, secretly, the secret troops that the Rebellion Army had been training already had close to a million supernatural beings.

He had money and connections.

Even if the Association of Extraordinaires was in the limelight for a while.

It was not easy to control the Resistance camp.

The leader shamelessly boasted that he would give the Resistance camp three months to consider.

On the surface, he looked extremely arrogant.

But in reality, it was just giving both sides a way out.

Even if the Association of Extraordinaires had made up their mind to snatch the production method of the Extraordinary Potion from the Rebellion Army's camp, it would still be a waste.

However, he still needed to make some preparations.

By the time they left, less than three people had passed. Only three days had passed.

Sun Ruo released the news through the media, stating that the Resistance camp would never hand over the production method of the Extraordinary Potion.

If the Association of Extraordinaires wanted it.

He would ask them to send their own troops to get it.

When the news spread to the outside world, it caused an uproar.

There was no doubt that the Resistance camp was very strong.

But no matter what, the foundation of the Resistance was still too shallow.

Even if the development in the past 30 years skyrocketed like a rocket.

However, there was still a considerable gap between their strength and the Association of Extraordinaires, which went all out.

Over the years, the Association of Extraordinaires had accumulated more than 5,000 A-class Extraordinaires, more than 70 S-class Extraordinaires, six SS-class Extraordinaires, and even two SS+ -class Extraordinaires.

This group of people were all super experts who had walked out of the raging flames of war and had experienced hundreds of battles. Most of them had two extraordinary talents!

On the other hand...

The number of S-class superhumans in the Resistance camp was relatively small.

On the surface, there were only three S-class superhumans in the Resistance camp.

Even if they considered the fact that the Resistance camp had a hidden trump card, there were at most ten S-class superhumans.

There was not even a single SS-class supernatural being of a higher level.

Even if the deputy leader of the Resistance Army, who had disappeared for many years, had broken through to SS-class. The Resistance only had one SS-class.

Under such circumstances.

If they really fought, the Resistance camp would be in a very passive position.

After all, an SS-class supernatural being had the power to destroy a large city.

Currently, the Association of Extraordinaires had eight such existences.

If no one could resist it.

Just these six SS and two SS+ superhumans were enough to make the Rebellion camp suffer. ,

Not to mention that he had more than 5,000 A-class superhumans under him.

Therefore, he had no choice.

Most people in the outside world were pessimistic about the upcoming war that the Resistance was about to face.

Many corporations were also hesitating whether they should take action.

However, they would never form an alliance with the Resistance again. After all, the old scores between the two sides had yet to be settled.

It was too disgusting to suddenly hold hands and walk together.

Of course, the main reason was that the corporations were scared of Li Yueming.

He was afraid that he would accidentally fall into Li Yueming's trap again. In the end, he would be sold by Li Yueming and even help him count the money.

They couldn't work together.

However, the corporations could act appropriately to restrain the Association of Extraordinaires.

They only needed to hold off 30% to 40% of the Association of Extraordinaires 'high-end combat power.

The Resistance and the Superhuman Association might have been able to have a 30 – 70 split.

At that time, the mantis stalked the cicada, unaware of the oriole behind.

Their consortium might also be able to reap the benefits.

Under the chaotic and complicated world order, all the forces were scheming.

However, there was nothing he could do. This was how chaotic times were.

Forces that didn't know how to plan ahead would have long perished when they merged with each other.

In the end.

Under the close watch of all the forces in the world.

Half a month later, the Association of Extraordinaires finally made their move.

They sent out three SS-class superhumans, one SS+ -class superhuman, over 50 S-class superhumans, and over 5,000 A+-class superhumans.

They charged straight at the capital city of Kandor.

As a force that was known for its individual strength, the Association of Extraordinaires naturally could not engage in positional warfare or military warfare with the Resistance.

The only thing they were good at and had an advantage in was to rely on their unparalleled personal strength to carry out beheading battles.

Sending a high-level supernatural being to take the enemy's head out of an army of thousands.

According to accurate information.

The laboratory in Candor City was the research and development site of the Extraordinary Potion.

All they needed to do was to break through Kandral City, massacre it, and finally bring back all the scientists and research materials in the laboratory.

The purpose of this war had been achieved.

The reason why they didn't send out five SS-class superhumans was that they were not as powerful as they thought.

Of course, it was also to prevent those filthy tycoons from interfering.

When nearly 10,000 high-level Extraordinaires arrived at Kandor...

Chapter 253: The Monster with the Most Perfect Body!J

Sun Ruo had been waiting in the city below for a long time.

In the supernatural troops.

The two SS+ level Extraordinaires scanned the city.

Only then did he realize that there was almost no one in the central area of the city.

Apart from Sun Ruo, the resistance army did not station a single soldier on the city wall. There was no sign of the resistance army's supernatural beings either.

He glanced around.

Including two SS+ superhumans.

Everyone felt a little strange.

Before coming here, they had done many war rehearsals to be on the safe side.

They were prepared for all kinds of possible situations.

After all, no matter how much they looked down on the Resistance Camp, the Resistance Camp was still a superpower.

Most of these supernatural beings were born in the soldier groups under the corporations.

To look down on the enemy strategically and pay attention to the enemy tactically was an essential quality for a mature army.

However, no matter which rehearsed plan it was.

They had never expected such a scene to happen.

In the city of the capital of the Resistance...There were actually no guards?

Was he playing the empty city tactic?

A moment later.

The two SS+ class superhumans in the lead turned their attention to the only guard on the city wall, Sun Ruo.

The long-haired man on the left said coldly,""What? The Resistance Army has such a huge territory, and you're the only woman who dares to stand here?" He looked at the supernatural beings in the sky.

On the city wall, Sun Ruo smiled and said,""Hehe, facing so many high-level Extraordinaires like you, it would be difficult for the soldiers to be of any use, right? The Extraordinary Potion is in the Extraordinary Laboratory in the middle of the city. If you want it, go get it yourself!"

Following Sun Ruo's line of sight.

The supernatural beings looked at a super building in the center of the city.

Obviously.

That should be the extraordinary research institute in the Resistance camp.

If it was any other time.

A group of supernatural beings would probably rush over immediately.

However, what was happening now was a little strange.

There must be something wrong with things.

He thought about it.

The two SS+ class superhumans looked at each other.

In the end, in order to avoid any traps.

The two of them decided to send more than 1,000 Grade A superhumans to scout the area.

However, to their surprise, the entire process of scouting the path was unusually smooth.

They did not encounter any ambushes or snipers throughout the entire process.

After the group of A-class superhumans entered the building, the long-haired man in the sky said, “Your Resistance Army...What was he up to? Could it be that he had transferred the production method of the Extraordinary Potion?” As an SS+ class supernatural being.

The long-haired man had two talents, one of which was spiritual talent.

Not only could it scan the surrounding environment on a large scale.

He could also use his mental power to control other supernatural beings and connect to the mental network to share the various senses of the controlled supernatural being.

Earlier, he had already scanned his surroundings.

Other than Sun Ruo, who was under his feet, there were no other intelligent life forms lying in ambush around the city wall.

Now that he had controlled several Grade A superhumans, he could see everything in the building through the eyes of the controlled ones.

There was also no one there, and all kinds of information was scattered everywhere. It could be seen that the researchers had evacuated in a hurry.

Could it be that the Resistance camp had given up on Kandor and hidden the research materials of the Extraordinary Potion?

This news sounded a little unbelievable.

After all, Candor City was the capital of the Resistance, and it was also the city with the strongest defense.

If he wanted to transfer the production documents of the Extraordinary Potion, where else could he be safer than here?

Could it be that the other party thought that the Resistance could hide the production documents of the Extraordinary Potion under the watchful eyes of hundreds of millions of people in the world?

But no matter what.

To the long-haired man, this meant that things had become even more troublesome.

Hearing the man's question, Sun Ruo revealed a calm smile and said, "Don't worry, the information is still in the city. There's even a complete copy in the laboratory. As long as you have the ability, you can definitely get it..."

He looked down at Sun Ruo.

Obviously.

The long-haired man did not believe Sun Ruo's words.

After all, even a normal person would find it hard to believe.

And just now, he had already controlled a few Grade A superhumans to search the entire laboratory.

Other than the messy documents.

They did not find any valuable information throughout the entire process.

Therefore, the long-haired man was certain that the Resistance camp had hidden the research and development information of the supernatural potion.

"The Resistance took away the information on the Extraordinary Potion and even gave up on guarding the capital. I have to say that they were unexpectedly decisive! However...What are you still doing here?" He grinned and licked his lips."Aren't you afraid that I will arrest you and torture you?"

As he spoke.

The long-haired man twisted his neck and continued, "But don't worry, I'm usually gentle to women, especially beautiful and powerful women. Perhaps I can let you enjoy the taste of ice and fire!"

Sun Ruo was also an S-class supernatural being.

However, as long as he tormented it until it was half-dead.

Chapter 254: The Monster with the Most Perfect Body!

It was just a little more effort.

However, just as he was about to make his move.

In the laboratory under his feet, the few supernatural beings who were controlled by his mind seemed to have made a new discovery.

After confirming that it was not an illusion, he calmed down.

It was only then that they realized that the Extraordinaires who were sent to the laboratory to search for information had found a mezzanine that led underground.

However, he did not know what the metal door was made of. Even a Grade A supernatural being would not be able to open it with brute force.

Now, the group of people was blocked outside the door and temporarily could not enter.

He thought about it.

The long-haired man decided to send twenty S-class and two SS-class superhumans to the underground mezzanines to open the metal door.

He himself led a large group of people to approach the supernatural laboratory.

It was to prevent the Resistance from ambushing behind the mezzanines.

About a minute later, a few SS-class Extraordinaires arrived at the metal door of the underground mezzanines.

The door that A-class superhumans could not destroy was no different washi in front of SS-class superhumans.

The few of them broke the metal door in a few moves.

However, after opening it, he realized that there was more than one metal door.

After the first door was broken.

The group of people walked down for dozens of meters before seeing the second and third door.

This discovery made everyone, including the SS-class supernatural being, look at each other in dismay.

They couldn't imagine what was locked in the laboratory that needed such a terrifying metal door to protect it!

After some effort, the Extraordinaires finally opened all three metal doors.

The last door collapsed.

A huge circular space appeared behind him.

In the sky, the long-haired man who was originally calm and composed seemed to have been electrocuted at this moment.

He opened his mouth wide.

He was stunned on the spot.

At the side.

Another short-haired SS + class supernatural being frowned and said, ““What’s wrong? Did something happen?””

The long-haired man did not respond. He seemed to be still immersed in deep shock.

In the huge circular space, there was a huge glass container that was dozens of meters tall. The glass container was filled with dark green nutrient solution.

This was because the corporations had also given them enjoyment when they were nurturing them.

However, the nutrient fluids that they had enjoyed back then were completely different from the nutrient fluids in this huge cultivation vessel. Every drop of the dark green nutrient fluid was the essence of the essence.

Even if it was just a small tube.

It could be sold for a sky-high price outside!!

However, in this petri dish, the culture fluid was as endless as seawater.

Through the dark green solution.

The long-haired man saw a scene that made his hair stand on end!!!

In the container, a huge figure was curled up.

The greenish-gray scales were densely packed all over its body, and its golden pupils opened and closed at times. Its snake-like body was slightly curled up, but two huge and sharp greenish-gray claws grew under its abdomen.

From afar, it looked like a giant dragon from ancient myths and legends.

However, unlike the sacred and majestic dragons in the myths, the creature in front of him was covered with all kinds of ugly patterns on its greenish-gray scales. Its ferocious blood vessels seemed to expand and contract rapidly as if they were breathing. Many lumps that looked like sarcomas bulged slightly as they continuously absorbed the nutrient solution in the glass container.

It was like an exquisite piece of art.

It was shocking and intoxicating at the same time.

It was just a glance.

The long-haired man was certain that this was an existence that was between a freak and a perfect creature.

The other party held the most noble authority in the world. His muscles and blood vessels contained the power to destroy the entire world...However, the ugly and dirty warts on its body were so glaring that they looked like pieces of psoriasis-like filth.

It made people want to chop him into a pile of meat paste.

In other words.

The container in front of him contained a body with the most perfect body in the world.... A monster!

Chapter 255: 140, awakening an ultimate lifeform, shocking the world!_1

He ignored the sarcomas and blood vessels that were rotting like scabies.

The creature in the glassware was so beautiful that the long-haired man could not help but be intoxicated just by looking at it. He even temporarily ignored the danger contained in it.

He could not imagine what kind of existence could create such a living being.

In the end.

It was another SS+ class supernatural being beside him who woke him up.

“What exactly did you see?”

This short-haired SS+ class supernatural being had two talents in combat.

His perception was much weaker than the long-haired man with the spiritual talent.

At this moment.

The short-haired SS+ class supernatural being could only capture some rough information about the life forms beneath the surface.

As for what exactly happened, he had no idea.

Hearing this.

The long-haired man finally woke up from his intoxication.

It only took a moment.

He could smell an aura that made his soul tremble in the glass petri dish.

He forcefully suppressed the urge to flee in a panic.

The long-haired man said to the short-haired man with a solemn expression, “Below the laboratory. It was as if a terrifying existence was sleeping!”

Hearing this.

The short-haired man still had some doubt on his face.

Because in his perception, there was no danger in the entire laboratory.

However, he still trusted the long-haired man’s spiritual investigation.

He thought about it.

The short-haired man looked at Candor City and said, “To be on the safe side, why don’t we slaughter this city first...I don’t believe that the Resistance can perfectly hide the Extraordinary potion formula in such a short period of time. With your mental power, you will definitely be able to find traces of the Extraordinary potion formula!”

The long-haired man thought about it and felt that this was the safest method. After all, after witnessing the monster below the laboratory, he could already smell the scent of extreme danger.

However, before the two of them could exchange more information...

On the city wall, Sun Ruo revealed a sinister smile and said coldly, “So you think the Resistance’s main city is a pigsty that you can slaughter as you please?”

As he spoke.

A thin electronic tablet appeared in her hand.

Her nimble and fair fingers manipulated the virtual screen.

In an underground secret chamber hundreds of meters below his feet.

The glass petri dish that was originally sealed with the monster suddenly stopped supplying nutrient fluids.

The tumor under the monster's body was still devouring energy.

However, because the nutrient solution was cut off, the liquid in the glass petri dish was rapidly decreasing.

The dark green solution in the petri dish decreased rapidly.

After all the nutrient fluids worth billions were devoured, they were all gone.

The monster's body that was soaked in the glass container was revealed...

After losing the cover of the nutrient solution, the aura and pressure that erupted from the monster's body was like a bloodline pressure that directly attacked the soul, making all the high-level supernatural beings present unable to breathe!

Originally, they could already represent the most powerful individual life in this world.

But now, in front of this dreamy figure, they seemed to have turned back into ants under the feet of the gods.

He was so suppressed by the aura of a high-level life form that he wanted to kneel and worship...

This was a pressure that came from his bloodline and soul.

It was not something that could be controlled by human power.

At the same time.

The long-haired man who was controlling everything in the sky suddenly narrowed his eyes.

After sensing the strange state deep underground, he said in a daze, "Oh no... Oh no, hurry up and escape..."

Just as he finished speaking.

The thousands of Extraordinaires in the sky had yet to figure out what had happened.

However, he had already stood up and was actually preparing to escape on the spot.

However, before he could move.

The next moment.

Suddenly, a violent tremor came from the laboratory.

This time, even the short-haired man, who was about to continue asking questions, felt a divine aura.

Under this aura, all Extraordinaires were like ants.

It was difficult for him to even have the thought of resisting.

Boom!!!!

After a few more breaths.

The entire laboratory building collapsed in an instant.

Two huge tentacles stretched out from the depths of the ground. After sensing for a moment, the tentacles directly pounced on the supernatural troops in the sky.

After being targeted by the tentacle.

All the Extraordinaires in the Association of Extraordinaires felt a bone-chilling chill.

It was like someone had poured a bucket of cold water on her face in the middle of winter.

Even his thoughts seemed to be frozen, so cold that he could not help but shiver.

At this moment.

The group of supernatural beings wanted to escape or use their supernatural powers to resist.

However, at this moment, they discovered an even more terrifying phenomenon.

In front of the tentacles that blotted out the sky, the extraordinary powers that they were so proud of actually lost their effect at the same time!!!

The supernatural cells and supernatural powers in everyone's bodies became uncontrollable.

The awakened special talent was also kneeling on the ground like an emperor, unable to be used.

And the most terrifying is the a.s.m.

There was something in their bodies that was guiding them to fuse with the tentacles!!!

In the crowd.

The SS+ class short-haired man screamed, ""Dammit, what is going on?" His entire body suddenly turned red in a few breaths.

All the blood vessels under his skin were exposed, curling up like dark red earthworms..

Chapter 256: 140, awakening an ultimate lifeform, shocking the world!_2

His body was filled with energy that could destroy a large city.

It was surging chaotically in his body!!!

Under everyone's horrified gaze, the blood vessels of the short-haired SS+ class supernatural being suddenly burst open.

Countless drops of dark red blood surged toward the ferocious tentacle not far away like small snakes.

The blood was being sucked greedily by the tentacle. Even the transcendent genes and transcendent energy were being sucked away, but the SS+ class transcendent did not have the slightest bit of resistance. It was difficult for him to even move a finger!

After all the supernatural energy had been devoured.

The short-haired SS+ class supernatural being had been reduced to an ordinary person.

It was to the point that he could not even fly anymore.

He fell from a height of several hundred meters and smashed into a pile of meat paste.

Such a scene had stunned countless supernatural beings.

To them.

Everything that had just happened was too ridiculous.

It was beyond their understanding.

When he saw the SS+ class supernatural being fall to the ground, he was shocked.

The first reaction of the other supernatural beings was not to run away, but to repeatedly wipe their eyes.

He had no choice.

Compared to accepting everything he saw.

They were more inclined to believe that everything that had just happened was a dream.

However, no matter how unwilling they were to believe it.

But nothing had changed.

A short-haired SS+ -class supernatural being, one of the few strongest people in the Association of Superhumans.

He died in the hands of the monster for no reason.

The monster that swallowed the blood was not satisfied.

The giant rolled up.

In the next second, more than a dozen S-class superhumans were hit.

It was no different from before.

The people who were targeted by him were like rotten tomatoes.

All the blood vessels in the monster's body burst open, and countless blood flowed toward the monster like blood-red corals.

The surrounding supernatural beings could only watch helplessly.

He didn't even have a way to escape or fight back.

Facing this terrifying ultimate lifeform monster.

Although they were not dead yet, for some reason, the extraordinary energy and special talents in their bodies could no longer be used.

The fact that they could still fly was their last bit of stubbornness.

Many Extraordinaires had lived for so many years. Even in their dreams, they had never thought that such a thing would happen.

A supernatural being who could not use supernatural powers or special talents.

What was the difference between him and an ordinary person?

Ever since the supernatural beings broke away from the control of the corporations, many newly risen supernatural beings began to call themselves gods.

In their eyes, ordinary people were all inferior creatures that were only worthy of being slaves and pets.

But now, in front of this strange and terrifying giant monster...

They were no different from the weak mortals that they looked down on in the past.

Thousands of Grade A Extraordinaires...

Nearly a hundred S-class Extraordinaires...

Four SS-class Extraordinaires...

Two SS+ class Extraordinaires...

In the entire world, this was a huge force that was enough to make all the factions look askance.

But now, it was like a weed.

The giant tentacle casually rolled up and devoured everything like cutting leeks.

Extraordinary energy, special talents, and even gene fragments...The monster's tentacles could perfectly absorb it.

It was visible to the naked eye.

After devouring thousands of Extraordinaires.

With the replenishment of the supernatural energy and gene fragments, the monster's aura became more and more unfathomable.

An hour later.

This one-sided massacre finally came to an end.

The ferocious tentacles underground shook off all the Extraordinaires that had been squeezed dry. After looking around and finding no other targets to attack, they slowly retreated into the depths of the ground!

On the city wall, Sun Ruo witnessed everything.

To be honest.

Even though she knew that the 'monster' wouldn't hurt her.

But just now, he had witnessed the monster's tentacles sucking like juice.

When he was crazily devouring supernatural beings.

Sun Ruo couldn't help but break out in a cold sweat.

It could only be said that after losing control, Li Yueming was too terrifying.

Ordinary S-class and SSSS-class Extraordinaires were nothing in front of him. He didn't even have the strength to escape. It was not worth mentioning at all!!!

Of course, what she did not know was...

The reason why Li Yueming was able to easily harvest this group of S-class and SS-class supernatural beings was because he was able to kill them all.

The real reason was because of the so-called 'powerful' Extraordinaires.

It was the 'chives' that he had planted in the ground. Now, they were only harvested in advance...

The 'Transcendent Gene Potion' was developed based on Li Yueming's own genes, and the 'Transcendent Gene Potion' was made by mixing Li Yueming's own perfect cells.

And Li Yueming himself had an initial red talent called 'Quick Resuscence'.

Even though it had been so many years.

Rapid Recovery didn't provide much help to Li Yueming.

However, the fact that the 'rapid recovery' had increased Li Yueming's genes and cells 'activity by ten to a hundred times was true.

Back when the Transcendent War broke out.

Li Yueming sold hundreds of millions of transcendent drugs and transcendent gene drugs to the corporations in bulk.

As an old man, how could he not hold back?

Through the 'Rapid Repeat' talent.

Li Yueming broke down his own genes and cells into the extraordinary medicine.

As long as these genes and cells could absorb nutrients, they would not die in a short period of time..

Chapter 257: 140, awakening an ultimate lifeform, shocking the world!_3

After injecting it into the body of an Extraordinary, it could accelerate the growth of the Extraordinary.

After all, Li Yueming's cell activity and strength were top-notch. If he was lucky, he could even help supernatural beings activate their second talent.

The effect of increasing his strength was very obvious.

But no matter what.

These cells and genes still belonged to Li Yueming, but they were temporarily stored in the bodies of other supernatural beings.

It was like a parasite that continuously strengthened itself by absorbing the energy from the body of an extraordinary person.

Usually, the Extraordinaires had no problem controlling this power.

But all of this was under the premise that Li Yueming didn't want to be calculative.

As long as Li Yueming was willing, he could take back those cells at any time.

The cells and genes that absorbed the energy of the supernatural being's body would feed back to Li Yueming, making him stronger.

In other words, all the supernatural beings in the world who had been injected with the supernatural medicine or the supernatural gene medicine produced by the Resistance.

From all angles, Li Yueming was their biological father!!!

Now, the unfilial son of the Extraordinaire Association was jumping on his father's face.

He had to admit that he had done a good job.

The entire Kandor Central City was in chaos.

A gap more than ten meters wide appeared on the city wall. It was a small scratch caused by Li Yueming's tentacle.

As the center of the battlefield.

The supernatural laboratory suffered the greatest aftershock, and dozens of tall buildings collapsed.

Only dust and smoke were left.

Fortunately, the important information in the laboratory had been transferred out.

Otherwise, the loss of research data alone would be an astronomical figure.

He watched as everything gradually calmed down.

Sun Ruo hurriedly activated the petri dish through the control panel again.

Deep underground, countless dark green nutrient fluids enveloped Li Yueming in the container again.

After all of Li Yueming's aura had disappeared.

Sun Ruo heaved a sigh of relief.

Ever since the injection of the perfect gene serum, Li Yueming had been undergoing constant transformation in the petri dish.

Since Sun Ruoyou's first transformation, Li Yueming had completed eight transformations.

Just when the transformation began, the time for the

Li Yueming turned into an ugly meatball.

At that time, Sun Ruo was so scared that her face turned pale and she almost collapsed.

The aura on his body also became more and more terrifying as he continued to transform and reorganize.

Only after the next transformation did he recover his biological characteristics.

Now, Li Yueming's transformation had reached a relatively late stage.

Even though there were still a lot of impurities in his body that had yet to complete the transformation, most of his body parts had already transformed to a relatively perfect level.

On this basis.

Li Yueming's subsequent transformation became especially crucial.

As a result, the amount of time he spent awake was decreasing.

Most of the time, he was in a daze.

His entire body was in a state of disorderly growth.

The last time he was sober was two months ago.

After hearing that the supernatural beings had left the corporations to establish their own organization, they were shocked.

At that time, Li Yueming only smiled, and a mocking expression appeared on his unrecognizable face.

Then, he concluded that after the Association of Extraordinaires had established itself, the first thing they would do was to come to the Rebellion Army camp to snatch the formula for the Extraordinary Potion.

That's why.

Taking advantage of the fact that his mind was still clear, Li Yueming arranged an 'empty city stratagem' for Sun Ruo.

He had emptied all the important research materials in the Kandor Extraordinary Laboratory in advance.

The soldiers on the city wall were all transferred away.

They also moved all the residents near the central city to the outer Urban area far away.

It was to prevent Li Yueming from hurting his own people.

Now, this empty city tactic was clearly very successful.

The Association of Extraordinaires had sent thousands of high-level Extraordinaires.

Under the dual restrictions of his genes and extraordinary cells, he did not even emit a single ripple when facing Li Yueming.

In the end, it became the nutrient solution that helped Li Yueming complete his transformation.

In the outside world.

Many forces were watching nervously.

The Association of Extraordinaires sent thousands of Extraordinaires to form a top-notch team of Extraordinaires and went to the Rebellion Army camp to snatch the production method of the Extraordinaire Potion.

This had basically become a semi-public matter.

Therefore, at this moment, almost all the forces in the world were paying close attention to the movements of the Resistance camp.

He craned his neck, wanting to know what the situation was like.

After all, even though the supernatural beings were now powerful and powerful, they were still very powerful.

However, before he obtained the method to make the Extraordinary Potion, the existence of Extraordinaires was still like rootless duckweed, in danger of capsizing at any time.

After all, it was very difficult for Extraordinaires to awaken on their own.

As long as he could control the production of the Extraordinary Potion, it was equivalent to controlling the lifeblood of the Extraordinary individuals.

Of course, the Association of Extraordinaires had to seize this vital lifeblood at all costs.

This was undoubtedly a major event that would affect the entire world's structure.

If the Extraordinaires managed to snatch the production method of the Extraordinary Potion...

Then, 90% of the world's corporations would basically have to withdraw from the stage of history.

The supernatural beings would no longer be restrained by any force.

Under such circumstances.

The eight forces naturally had to adapt to the situation in order to protect themselves in this turmoil that swept through the world.

However, once the Extraordinaires' attacks were thwarted and did not achieve the desired effect, the battle would be over..

Chapter 258: 140, awakening an ultimate lifeform, shocking the world!_4

In that case, many factions would have to re-examine their methods of dealing with Extraordinaires.

After all, although the corporate world had suffered a great loss, as the rulers of the corporate world for more than 300 years, the various trump cards and methods in their hands could not be underestimated.

However, under the nervous gazes of billions of people.

The Association of Extraordinaires had such a powerful army, but for some reason, it was like a stone sinking into the sea after entering the capital of the Resistance, Kandor.

There was no news in an instant.

Because the Resistance Army had blocked off the main roads between many cities.

They also did not allow foreign forces to enter the territory of the Resistance.

Therefore, the scouts of many factions could only choose to sneak in carefully and obtain first-hand information about the battle between the two sides from the cities around the Resistance.

However, the group of spies waited for several days.

The Resistance camp, which should have been turned upside down, seemed as if nothing had happened.

The Resistance Army in the city should be eating and drinking. Those who should stand guard stood guard.

He did not even receive a single transfer order throughout the entire process.

It was simply strange...

With such a large number of high-level Extraordinaires entering the city, even if there was a fart, the capital of the Rebellion Army should be in chaos, right?

However, a few days had passed.

The Resistance camp did not receive any unusual news.

How was this possible?

In this strange atmosphere.

Many corporations could smell the extraordinary aura.

A week later.

There was still no news of the Association of Extraordinaires attacking the army of high-level Extraordinaires in Kandor.

However, the ban on the Resistance camp was suddenly lifted.

Many scouts who were itching for the release of the city rushed to Candor as soon as possible.

He wanted to obtain first-hand information as quickly as possible.

However, just as he was about to sneak into the city from Kandor...

A group of scouts saw a scene that they would never forget for the rest of their lives.

On the walls of Kandor, thousands of corpses were neatly hung outside the walls.

These people should have been dead for a few days.

Even from far away, they could smell an unpleasant odor.

In the beginning.

Many of the scouts thought that the dead were a group of ordinary civilians.

After all, he didn't sense any supernatural aura from the other party.

However, when the scouts really got close and carefully examined the corpse, they realized that they had made a huge mistake.

The corpses hanging on the wall were actually Extraordinaires, and they were rather famous high-ranking officials in the Association of Extraordinaires!!!

In an instant, all the scouts were in an uproar.

News began to spread to the various factions that had long been waiting.

At the same time.

The resistance camp had also completed the aftermath. After all, Li Yueming's existence was a taboo to the outside world.

If he did not want to cause unknown chaos.

The Rebellion Army camp had to hide Li Yueming, who had yet to complete his transformation.
After the end.

The Resistance camp released a statement.

” The Association of Extraordinaires sent two SS+ class Extraordinaires, four SS class Extraordinaires, fifty-three S class Extraordinaires, and 5,246 A class Extraordinaires to attack the Resistance’s capital, Kandor...”

“Now, it has already been attacked by the Resistance... Kill them all!” The message was simple.

However, the content contained within it made one’s eyebrows twitch.

At the very beginning.

When all the factions heard this news, their first reaction was to wonder if the Resistance had gone crazy.

What was this announcement?

Killed more than 5,000 high-level Extraordinaires?

Hahahaha...

How was this possible?

This news was so unbelievable that no one was willing to believe it at first.

However...

After looking at it several times to make sure that there was nothing wrong with his brain...

In an instant, the entire world fell silent.

All the organizations, including the Association of Extraordinaires and Andre Company, were shocked by this piece of information.

Especially the Association of Extraordinaires.

Although they had a bad feeling when they couldn’t contact the army a few days ago, they were still worried.

But now, when they heard the news from the Resistance Army...

However, he still felt dizzy.

Resistance camp... He actually killed thousands of high-level Extraordinaires that they had sent out?

These were thousands of high-level Extraordinaires!!!

Even in the Association of Extraordinaires, which was at its peak, it was an absolute backbone force. It was enough to easily flatten any financial group except Andre Company.

However, after entering the Resistance camp, they all died without causing any trouble.

How was this possible?

Even an SSS-class supernatural being shouldn't be able to do it!

So, could it be that a terrifying power that they didn't know about had joined the battle?

Chapter 259: Nine metamorphoses, Fish Leap into Dragon, Perfect Genetic Body!_1

When he heard that the Resistance had killed thousands of top-notch

Extraordinaires from the Association of Extraordinaires without a sound... After a short period of silence and disbelief, the countless forces in the world were all in an uproar.

"More than 5,000 Extraordinaires, and two of them were SS+ level super big shots, but all of them died in one night! "

"Could it be that the Resistance is hiding some kind of killing weapon? Even an SSS-class supernatural being might not be able to do such a thing, right?"

"SSS-class superhumans are known as gods who walk the earth. Killing a group of SS-class superhumans is definitely not a problem...But the problem was that an SSS-class supernatural being should have made a huge commotion when they attacked. It was impossible for them to be so silent!"

" That's right. Most importantly, not a single one of the 5,000-odd

Extraordinaires, the lowest of whom was an A-class existence, managed to escape...It can only be said to be terrifying!"

"Looks like the Resistance isn't as simple as I thought. Is there some unknown existence behind them that secretly controls everything?"

"That seems to be true. Otherwise, there's no way to explain the rapid development of the Resistance!"

The moment this battle came out.

All the forces in the world gasped.

In the beginning.

The Rebellion Army was just a small force that occupied a small corner of the land.

Just the Cloud Sky Corporation alone was enough to make him anxious.

But later.

The mysterious deputy leader joined the Resistance.

After that, the Resistance seemed to have suddenly turned on a cheat.

It began to develop at a speed that left all the corporations dumbfounded. It had only been thirty years.

In the past, the group of less than 100,000 people that occupied East Peak

Mountain had developed into a super force that spanned hundreds of thousands of kilometers and had a population of more than a billion.

On the surface.

The Resistance was developing very fast.

However, there was nothing unreasonable about the entire process.

But in reality?

Where did the Rebellion Army's extraordinary potion technology come from?

Now, why did the Association of Extraordinaires send out thousands of high-level Extraordinaires and suddenly die without even making a sound?

All kinds of doubts that had been ignored in the past were once again raised by the world.

The more he thought about it.

The more the factions thought about it, the more terrified they felt.

After all, if the Resistance was really just a force without a foundation on the surface, it would be impossible for them to resist. How could he become so powerful in just 30 years?

Thinking of this...

For a moment, many forces around the world fell silent.

Of course, many corporations heaved a sigh of relief.

After all, the Association of Transcendents did not obtain the formula for the supernatural potion from the Resistance camp.

In this way, the basic structure of the world ruled by the corporations would not change for the time being.

This was undoubtedly the best chance for them to catch their breath.

On the other hand...

The Association of Extraordinaires was in a worse state.

To be safe.

This time, the Association of Extraordinaires had sent more than half of the high-level Extraordinaires they could mobilize.

He had thought that he would be able to obtain the formula for the Extraordinary potion in the Rebellion Army camp.

Unexpectedly, none of the high-level Extraordinaires who had been sent out came back alive!!!

Such an outcome.

To the members of the Association of Extraordinaires.

This was worse than breaking their arms.

Not only did the morale of the entire association plummet.

The association's influence, which was originally thriving, suffered a head-on blow.

After all, humans were very realistic creatures.

When the Extraordinaires were successful, everyone was extremely respectful to them.

But now, the Extraordinaires 'Association had suffered a huge setback in the Resistance camp.

Many of the forces that were originally smiling began to oppose him in the blink of an eye.

If they had known that the Rebellion Army camp was so dangerous, the Association of Extraordinaires would never have picked on this so-called 'pushover' even if they were beaten to death.

On the contrary, he would rather go to the famous Andre Group for a fight. He might even be able to gain something.

However, money couldn't buy medicine for regret.

After suffering such a huge loss.

The originally arrogant Extraordinaires instantly weakened.

After all, newborn calves often felt that they were invincible.

Usually, it would be fine after being slapped twice by reality.

After this battle.

The current world order began to gradually stabilize.

It was a three-pronged situation.

The corporations represented the order of the Old World.

For the past 300 years, they had been the undisputed rulers of this world.

Now, although his power had declined again and again.

But a starving camel was still bigger than a horse.

It was true that the corporations had suffered great losses, but their remaining strength could not be underestimated.

As for the other two.

The Association of Extraordinaires and the Resistance were two new forces with completely different standpoints.

The Extraordinaires established the Extraordinaire Association.

It was dedicated to winning over all the supernatural powers in the world and gathering them together to create a new world order led by supernatural beings.

The Extraordinaires who could rise from the flames of war in the past few years were all elites among the Extraordinaires.

If it wasn't for the fact that he had suffered a setback in the Resistance Army this time...

The Association of Extraordinaires was probably the strongest among the three major factions.

But now, they had lost so many high-end combat forces.

The Association of Extraordinaires had also suffered a great loss, and they no longer dared to be as arrogant as they had been in the past.

Therefore, he had no choice.

Among the three major forces in the world, the Resistance camp, which was originally the most inconspicuous, had become the most glorious newcomer..

Chapter 260: Nine metamorphoses, Fish Leap into Dragon, Perfect Genetic Body!_2

They enjoyed the attention of thousands of people.

Under such circumstances.

The Resistance finally stopped cowering and began to show their talents.

Transcendence Calendar Year 371.

The Rebellion Army changed their usual low profile and mobilized their army to completely defeat the Yunxiao Group, which was still hanging on by half a breath, with an unstoppable momentum.

In just three months.

More than five million soldiers were stationed at Mylta, their swords pointed at Nightless City.

At this moment.

The appearance of the Nightless City in Cloud Sky was exactly the same as the night Li Yueming was born in the petri dish more than 40 years ago.

The lanterns were just lit up.

The neon lights of Mylta flashed in the pouring rain.

From afar, it looked like a hazy and faint bubble.

The Nightless City stood above Mylta, supported by 64 super alloy pillars.

It symbolized the 64 cities under his command.

However, at this moment, this giant financial magnate company that could once resist the attack of Hurricane Group.

Now, the last of his ribs had been broken by the Resistance.

The majestic 64 alloy pillars supported the stability of the Nightless City.

However, under the siege of millions of resistance soldiers, they were like swallows swaying in the wind.

The big boss of the Cloud Sky Corporation hung up the last call to the unknown.

After realizing that no one answered the call.

In the end, he sighed and slowly got up and jumped down from the top of the Nightless City.

Just like that.

The Rebellion Army naturally took over all the land and people under the Cloud Sky Group.

The only unfortunate thing was...

In order to prevent the Resistance camp from taking away any useful information.

All kinds of scientific research materials in the Nightless City laboratory were urgently burned. The blazing flames burned for three days and three nights without extinguishing.

After the Resistance Army took over the Nightless City, they only managed to save a small portion of the Cloud Sky Group's scientific research results.

This was naturally a pity.

After all, the Cloud Sky Group was one of the corporations that had the most profound research on genes among all the corporations in the world.

There was a lot of genetic knowledge that could be absorbed.

Then, the Resistance's Kandor Extraordinary Laboratory might have more scientific research power.

The only thing worth rejoicing about this misfortune was...

Many of the researchers in Nightless City were retained.

Due to the collapse of the situation over the years, more than half of the hundreds of thousands of scientists in the Nightless City had fled.

However, the remaining 30,000 to 50,000 scientists were enough for the Resistance to eat their fill...

Destroying the Cloud Sky Group was easier than he had imagined.

After all, the Resistance Army's power had soared over the years.

Currently, there were millions of supernatural troops.

On the other hand, the Cloud Sky Corporation was actually on its last breath after so many years of decline.

The other consortiums around were afraid of provoking the Resistance Army, so they did not dare to take over the Cloud Sky Group.

That was why it had been struggling to survive until now.

Now that they had completely occupied the Yunxiao Group, the territory of the Resistance had expanded by another third.

The number of cities and population under its banner was also steadily increasing.

The Resistance grew stronger and stronger.

Many consortiums felt the danger. After all, the slogan of the Resistance had always been to overthrow the rule of the corporations.

Now, his arrogance was so high.

This was not a good thing for the corporations.

However, the current world was in a delicate balance. No one on the chessboard dared to rashly start a war to break the current situation.

Therefore, he had no choice.

The corporations thought about it again and again.

In the end, he restrained his desire to attack and prepared to observe the movements of the Resistance.

After all, a few years ago.

The Association of Extraordinaires had suffered a huge loss at the hands of the Resistance Army once.

Now, after so many years, the cause of the deaths of thousands of high-level Extraordinaires had yet to reach a convincing conclusion.

Under such circumstances.

How could the corporations have the guts to probe the actual situation of the Resistance camp?

However, just when the corporations and supernatural beings thought that this superficial balance could be maintained for more than ten years...

The capital of the Resistance, the depths of the laboratory in the City of Kendall.

Sun Ruo opened the layers of alloy metal doors by verifying fingerprints, irises, and DNA.

This was the most heavily guarded area in the entire laboratory.

Similarly, the security level had never been lower than SSS level in the past few decades.

In the entire Resistance Army.

Other than Sun Ruo, there were no more than three people who knew that Li Yueming had gone through a metamorphosis here.

Even their leader, Han Bufan, knew nothing about this.

Now.

It had been nearly 30 years since Li Yueming had been injected with the perfect gene serum.

He had not been active in the world for such a long time.

Many consortiums thought that he was dead.

However, not only did Li Yueming not die, he had also survived eight times of evolution.

However, this final ninth evolution was especially difficult to endure.

This was because the first eight evolutions and transformations had also greatly increased his strength.

However, they were not perfect creatures.

From the exterior to the core, there were always all kinds of filth and flaws that made one's scalp tingle.

And now, the ninth transformation.

It was the ultimate leap to transform a fish into a dragon.

As long as he could pass this stage, Li Yueming would be able to evolve into a lifeform with perfect genes.

In order to get through this.

Li Yueming had been sleeping in the nutrient solution for ten years. It was only now that he had barely found the opportunity to transform and evolve.

But before that..
