

Maxing MT 26

Chapter 26

Crisis Appears, Attack of Mutated Creatures!

The survival of Fallout Shelter 0911.

It was not that important to Gu Tianye.

After all, he had never felt warmth in this land, so where did he come from?

In comparison.

The Star Moon Alliance with his children and wife was his real home.

He looked at the old man on the bed.

Gu Tianye did not say anything.

He turned around and left.

...

After capturing the survivor base.

The Alliance's strength expanded further.

Under Li Yueming's push,

The Underground World had begun their migration.

They had completely left the sewers.

Headed to the Survivor Base and build a new home.

There were some minor disturbances.

However, they were all suppressed by Li Yueming's iron-fist methods.

Just like that.

The civilizations of the Surface World and the Underground World collided.

Both of them were extremely curious about the unfamiliar neighbor next door.

Overall, everything was fine.

Nothing happened.

Of course.

Li Yueming's focus was not on these trivial matters.

According to Gu Tianye's report,

The survivor base stored numerous documents and information left behind by Humans before The Cataclysm.

Moreover, the location of the base was a good place carefully selected by the old leader.

It was adjacent to a pre-Cataclysm mining site.

As long as it could stabilize and eliminate the mutated creatures in the mining field.

Human civilization would usher in a period of rapid development.

Towards these messy things.

Li Yueming basically did not care.

As long as the chaos didn't affect him, he would let the cadres of the Alliance do whatever they wanted.

As for himself...

He silently locked himself up.

In the next six months.

The seeds from the old civilization were continuously moved to Li Yueming's residence.

Not only were there building blueprints and various secret documents.

There were also more than ten boxes of various firearms blueprints.

These were all treasures.

Now that he had the breathing technique, ordinary Humans could also obtain strength that exceeded the limits through training.

However, compared to those mutated creatures that were constantly evolving,

The speed at which Humans strengthened their bodies through training was still too slow.

Now.

If he could digest these blueprints.

The overall combat power of the Underground World would rise to another dimension.

Hence...

Upon receipt of such information and documentation.

Li Yueming did not show up at the Alliance headquarters for more than half a year.

During this period, almost everything was handled by Wang Fei and Li Xiyue.

'That's right.'

Li Xiyue, who was only eight years old, was also a genius.

She had superintelligence and decisiveness that did not match her age.

When she was six years old.

Li Xiyue passed the examination set by the teachers of the Alliance with full marks for all subjects.

She was the student who graduated the earliest with the best exam results in the entire Underground World since the establishment of education.

Now, she had already entered the core circle.

Although the identity as Li Yueming's sister had provided her with a lot of convenience, However, her own ability was obvious.

Fortunately, this wasn't the first time Li Yueming had locked himself in to study.

In addition, the development of the Alliance was already on the right track.

Alliance members know their duties. The hunters, hunt, and the educators, teach.

There was basically no trouble.

...

Two years passed in a flash. Li Yueming was 21 years old.

When he first entered seclusion to study,

Li Yueming basically didn't see anyone.

Until a year later.

Li Xiyue came over.

Only then did Li Yueming give her the many military weapon designs he had deduced.

However, he still did not leave the house.

In response.

Li Xiyue was not very happy.

However, she was no longer like the ignorant brat when she was young.

Her brother was now shouldering the hope of the entire Human civilization.

It was no longer possible to touch her head and tell her those strange myths like when she was young.

With Li Yueming's continuous supply of technology,

Not only had the Star Moon Alliance's development speed not slowed down in the past few years,

Instead, it was getting faster and faster.

Just last year.

Wang Fei organized a Hunter team to clean up the mutated creatures on the mine.

After a year of crazy cleaning,

The Hunter team finally wiped out all the mutated creatures on the surface of the mine a year later.

At this point.

The Alliance began to organize people to mine and smelt ores.

Moreover, he had achieved some results half a year ago.

Overall.

Everything in the Alliance seemed to be developing in a good direction.

But everyone knew.

All of this was just the serenity on the surface.

The real danger has yet to arrive.

...

On this day two years later.

Li Yueming continued his deduction in his room as usual.

But at this moment.

Suddenly, there was a knock on the door.

Li Yueming got up and opened the door.

However, Wang Fei said with a tense expression, "Teacher, something big has happened!"

Hearing this,

Li Yueming's expression immediately turned cold as he asked, "What's wrong?"

Beads of sweat appeared on Wang Fei's face.

After taking two deep breaths, he said, "It's a long story. I want to invite you to the conference room immediately to preside over the situation!"

Hearing this,

Li Yueming did not say anything else.

He turned around and returned to his room to change his clothes before saying, "Lead the way!"

Wang Fei nodded and quickly jogged ahead.

The two quickly arrived at the central meeting room.

The moment he pushed open the door.

The originally noisy meeting room suddenly fell silent.

The members looked at Li Yueming, whose expression was normal.

There was an unprecedented sense of security in the air.

No matter when.

No matter how much they had grown.

Li Yueming would always be the backbone of the Alliance.

He was the soul of the Star Moon Alliance.

The moment he arrived.

The soul of the entire Star Moon Alliance returned.

Li Yueming said nothing.

An usher led the way through the surrounding subordinates.

He took his seat in the conference room.

After sitting down.

Li Yueming's deep gaze slowly swept across everyone.

Everyone felt his gaze on them.

All the members in the meeting room could not help but raise their heads, straighten their backs, and stand up straight.

It had been two years since they last met.

Everyone hoped to show their best attitude in front of Li Yueming.

Li Yueming looked around.

In the end, it landed on Li Xiyue, who had already grown into a little girl.

He waved at the little girl.

Li Xiyue, who was already ten years old, stuck out her mischievous tongue and trotted over behind Li Yueming with an obedient expression.

When he was done,

He looked at the silent central conference room.

Li Yueming slowly said, "Tell me, what happened?"

Below the stage.

Only then did the group come back to their senses.

Someone quickly came up with a simple summary of events.

After summarizing the cause and effect of the matter, he said, "Teacher, several of our transport teams that were transporting minerals were attacked by unknown creatures! The other party took our goods and strung the corpses of the transport team members on trees!"

"When the Exploration Team went to investigate, they found many humanoid footprints that were smaller than humans!"
