

## Maxing MT 271

Chapter 271: Super Gold Talent, Constantine's Diary 3

After all, the great clans and monopolies could never be eliminated.

Li Yueming couldn't do much. He just wanted to leave a clean situation for the new country.

As for the slaughter involved, let him shoulder it alone!

After all, he was the only one in the world who could shoulder this heavy responsibility.

He wanted to build an idealistic country!!!

Transcendence Calendar Year 373.

The leader of the Resistance, Li Yueming, who later became the Extraordinary Emperor, made his first move and defeated the coalition army formed by many corporations and Extraordinary individuals.

In the subsequent bloodbath, he single-handedly slaughtered nearly ten million corporate and supernatural powers 'higher-ups.

In just two short years.

Li Yueming killed the entire world into silence.

Many of the previously arrogant tycoons were trembling under his butcher knife.

While crying and begging for mercy in the international community.

At the same time, he used various channels to secretly label Li Yueming as an 'executioner,' 'killing innocents,' 'bullying the weak', and so on. They wanted to use all kinds of efforts to cause public discussion.

This would arouse the sympathy of the entire world.

He had to use all means to save his life.

However, just as many of the consortiums thought that the whole world would condemn Li Yueming's atrocities...

However, they realized that in many cities, countless civilians under their rule did not condemn Li Yueming.

On the contrary, they all walked onto the streets, cheering and excitedly holding up signs to welcome the arrival of the Resistance. He even called the cold-blooded butcher Li Yueming a hero.

No one spoke up for them the entire time.

No one stood up for them.

All kinds of public opinion shells were thrown out without even making a sound.

At this moment.

Seeing this scene, a deep sense of powerlessness enveloped the hearts of many old factions.

It turned out that they were the ones who were abandoned by the lower class people in this war.

After a thorough purge, the flags of the Resistance began to be planted all over the world.

In the past few decades, Li Yueming's promotional pamphlets had been spread through various channels.

Furthermore, the scope of its spread was vast.

It was already impossible to count how many people had seen it.

Although the world had not changed much in the past few decades under the rule of the corporate world.

But now, the Resistance had finally gained power.

Many sparks of fire started to burn like a prairie fire.

Most of the time, the Resistance Army had yet to conquer a city.

The civilians of a certain city had already spontaneously organized themselves to form a branch of the Resistance Army and began to drive away the old forces in the city.

If it was in the past

Both sides would probably have to fight.

But now, the resistance army was unstoppable.

Many of the remnants of the old forces did not even dare to fight. They packed their things and left dejectedly.

Otherwise, they would be caught by the Resistance.

The consequences would be quite serious.

During this process, Li Yueming did not stay idle.

After cleaning up the higher-ups of the corporations around the world.

The rest were just some small fries. There was no need for Li Yueming to waste any more effort. The Resistance could handle it themselves.

Therefore, he had no choice.

Li Yueming began to investigate the ancient martial arts practitioners.

After all, he had lived on planet 5-07312 for hundreds of years.

He had also established the Qingdu Empire and the Star-Moon Pavilion all over the world.

Not to mention that damn Five-Colored Immortal Deer back then. It kicked him out of the reincarnation world halfway through the story.

He did not have any accurate information about Li Xiyue.

Therefore, he was naturally very concerned about the 'ancient martial art practitioners' on this planet.

He wanted to investigate ancient martial arts practitioners.

The Andre Group was one of them.

Based on the information he knew so far.

It was Constantine, the old man, who had hidden the information about the ancient warriors.

As a result, all the forces in the world could only hear some legends about ancient martial arts practitioners, but they could not find any evidence of the true existence of ancient martial arts practitioners.

In order to get an answer.

Li Yueming grabbed Andre Davis.

He brought him into the core secret laboratory of the Andre Group.

It was said that.

In the past, Constantine had developed the Extraordinary Potion in this secret laboratory.

In the next few hundred years.

Only Constantine could enter the laboratory at will.

At other times, even his great-grandson could not enter without permission.

He closed the laboratory door.

Li Yueming began to check the items in the research room.

The most eye-catching thing was an ice coffin in the center of the laboratory.

I took a few glances at it

Li Yueming quickly found the reason why Constantine could live for more than 300 years.

The ice coffin could seal some of his cells to prevent aging.

However, this thing was of little value to Li Yueming, who had a transcendent genetic body.

It was not worth paying much attention to.

The reason why he stopped here was because there was a neat stack of research materials and a rather ancient diary in the ice coffin.

He didn't expect Andre to have a special hobby like writing a diary.

How should he put it...

Which normal person would write a diary in this day and age?

However, this was a good reference for Li Yueming.

The old man had been kicked into a bloody pulp by him.

After fighting for a long time, Li Yueming didn't leave anything behind. Now, he finally started to drop gold coins.

He picked up the diary in the ice coffin and flipped through a few pages..

## Chapter 272: Super Gold Talent, Constantine's Diary

Only then did she realize that the diary seemed to have been written by Andre in his early years. The information recorded in it was very rich.

[Government Calendar Year 422'.]

[It took me five years to finally graduate from the Federal Institute of Technology in Zürich!]

[At this time, I was full of pride and high-spirited. I felt that a bright future was waving at me, so I began to submit my resume to various major companies, hoping to seek a job with an annual salary of around 300,000 yuan!]

Good heavens.

Why did this look like the format of a novel?

Entering the Work World, Right?

Li Yueming narrowed his eyes and resisted the urge to complain as he continued reading.

[Government Calendar Year 423:]

[It's so difficult to find a job. Nowadays, the minimum requirement for a large company's academic qualifications is a post-graduate. They also require work experience in the relevant industry... This was too much. They wouldn't hire graduates who had no work experience, but how could they have any work experience if they gave them a job opportunity?]

[After I graduated, I've been staying at home for more than half a year without a job. My girlfriend ran away with another man. My parents despise me. They think that it's very embarrassing for a university student like me to go out and not be able to find a job...]

[Sigh, if I had known earlier, I would have gone to Germany to apply for an art school. I shouldn't have learned this damn genetic programming!] This smell.

It was still the familiar pattern of first suppressing and then raising.

The high-spirited male protagonist had suffered a blow when he found a job, and his girlfriend had run away with another man.

Now, he was just short of his parents dying to activate the cheat.

[Government Calendar Year 428:]

[It's been six years since I graduated. In the past few years, I've sent my resume everywhere and finally found an energy exploration company that was willing to hire me... This has nothing to do with my professional horse, but at least it can help me get rid of the label of squatting at home, so I finally decided to enter the company to work!]

He had lived for 300 years.

Can't you be a little more cool when you write in your diary?

Forget it, Li Yueming was too lazy to complain. He would just make do with it.

[Government Calendar Year 432:]

[My efforts were appreciated by the company's boss, and I was promoted to the position of the leader of the energy detection department. Just this year, the manager told me that someone had found some strange metal fragments deep in Dongyue Mountain, which the locals called 'Meteorite Gold'!]

[I heard that this metal's various performance tests were excellent, and it's suitable for building the fourth generation spaceships that are currently being planned. Therefore, the higher-ups sent me to the depths of East Peak

Mountain to investigate the amount and specific location of the 'Meteorite Gold'. On the day before I left, the boss patted me on the shoulder and told me that if I could complete the mission well, he would marry his daughter to me!]

[I'm very touched but fearful... I was touched by the boss's high regard for me and was afraid that the boss's daughter's thigh weighed more than 100 pounds.]

[Just like that, I set off with conflicted feelings. I called myself a means of transportation and secretly made my way to Mount Dongyue, north of the Red Leaf Empire!]

[Government Calendar Year 438:]

[During the six years of exploration in Dongyue Mountain, I didn't find much 'meteoric gold'. According to various signs, the so-called 'meteoric gold' was not a natural metal as the company initially thought, but an alloy that had been processed by living beings.]

[I hid the matter about the alloy and only reported that the amount of meteorite gold was very limited and was not enough to support the construction of the spaceship. The company was very disappointed. The boss also married her daughter to the leader of another exploration team!]

[But this didn't stop me from being excited at all because I found a very large circular pit deep in the East Peak Mountain. Thinking of the 'meteorite gold' scattered all over the East Peak Mountain, I have reason to suspect that extraterrestrial creatures have descended on the East Peak Mountain. In order not to attract attention, I applied to the company for a resident investigation and began to enter the deeper parts of the East Peak Mountain.]

[Government Calendar Year 442:]

[Although this sounds a little unbelievable, I really did find extraterrestrial life. They are ancient warriors from a huge planet in the same system. They are the civilization with the most powerful information in this area. Because they resisted the attack of the Dark Star Insect Race, the ancient warriors suffered heavy casualties. They were attacked during the process of support and were forced to land here!]

[There are a total of seven of them, and all of them are heavily injured.

However, I can still feel an incomparably terrifying aura from them...]

[These seven people are recuperating in the depths of the forest...I feel that although they say that they are recuperating, in fact, it seems that not only have their injuries not recovered, but they are also getting worse. A reddish-brown energy is constantly lingering in their bodies, causing their wounds to be unable to heal!]

[A certain ancient martial arts practitioner said that I am the 'chosen one' of this planet, so he was prepared to give me a good fortune. However, what they gave me wasn't a good fortune. It was clearly a few bloody corpses. I was frightened, but I didn't dare to disobey their orders. Later on, I realized that this was really a great fortune.]

[After bringing the corpse back to the city, I didn't dare to make a sound. I quietly quit my job and began to return to my profession. I collected blood and genetic samples from the corpse for research...Even though their corpses are terrifying, I want to become stronger!]

[Transcendence Calendar Year 450:]

[Eight years have passed, and my research has yielded preliminary results.

Although I can't be as powerful as them, I can still control a portion of their power through their blood and genes...Now, as long as I release the results of my research, all the governments in the world will treat me as a guest of honor!]

[But I'm not satisfied with this. In the past, you ignored me, but now, you can't reach me. I want to change the entire world through these potions!]

[At the same time, the appearance of those ancient martial arts practitioners around the world has attracted the attention of the governments of various countries. I don't have much time left... I was the first to discover the ancient martial arts practitioners, so why should you share the secret? [I'm not willing!]

[Transcendence Calendar Year 456:]

[My research has made great progress. After injecting the Extraordinary Potion I developed, I began to become stronger. At the same time, those ancient warriors finally couldn't stand the infection and died. I sent people to quietly collect their corpses. No one can share my secrets!]

After reading this.

Li Yueming basically only glanced at the diary entries below.

After Constantine officially established Andre Company, the contents of the diary were completely cut off.

After all, everything in the past was the old man's dark history.

He probably woke up in his middle age and finally felt ashamed of writing in his diary every day, so he quit.

However, the information that Li Yueming wanted to know the most had been recorded clearly.

Although Li Yueming was quite interested in the other bullsh \* t things, he would probably be scolded if he continued.

First, ancient martial arts practitioners.

He did not expect that the ancient warriors of this world were forced to land here because they were fighting against the so-called Dark Star Insect Race.

It was probably because they had found an ambush, and the wounds caused by the Zergs could not heal.

In the end, they all died here.

Just like the rumors in the outside world, the reason why Andre Constantine was able to develop the Extraordinary Potion.

It was because he was the first to obtain the genes and cells of an ancient warrior.

After establishing the Andre Group, Constantine's strength grew.

After learning that the seven ancient martial art practitioners were all dead, they sent people to seal and collect all traces of ancient martial art practitioners through various channels.

Then, the era of Extraordinaires that everyone was familiar with arrived.

Andre Company began to sell the Extraordinary Potion crazily.

Furthermore, Andre himself was already a rather powerful Extraordinary when he first appeared.

In the end, the era of government that had ruled the world for nearly five hundred years came to an end, and Constantine personally sent it to the trash heap of history.

These were all secrets that had been buried in time.

If Li Yueming were to search for it himself and piece together all kinds of clues, it would probably take at least eight to ten years to find something.

But now, with Andre's diary, the history of the past hundreds of years was clear and complete.

It was like opening a treasure chest. It gave him a sense of accomplishment.

Now, the only two questions left were where the seven ancient martial art practitioners 'corpses had gone.

Other than the information that Andre had hidden for hundreds of years, did the ancient martial art practitioner leave any other information?

Of course, these were two different questions.

However, there was only one problem left for Li Yueming.

Because Li Yueming could guess where the ancient warrior's corpse had gone.

As for whether the ancient warrior had left any other information that Constantine had yet to discover...

At the very least, Li Yueming knew that the Star-Moon Emblem in the Rebellion Army camp had a lot to do with ancient martial arts practitioners..

Chapter 273: A burning star, the establishment of a utopia!\_1

Constantine's diary had restored a dusty secret.

Instead of saying that the Andrea Group monopolized the production of the supernatural potion, it was better to say that they monopolized all the information about ancient martial arts practitioners.

As for the whereabouts of the seven ancient warriors 'corpses...

Li Yueming reckoned that all of them had been processed into Extraordinary Potions.

It had spread all over the world.

It was also because of this that Andre Company had never produced much supernatural medicine for so many years.

Almost every year, the amount of Extraordinary Potions supplied to the world was fixed.

That was because the core raw materials of the supernatural medicine, which were the genes and cells of ancient warriors, were limited.

It was a non-regenerative resource that could not be used continuously.

Otherwise...

If the Extraordinary Potion could really be produced without limit, then the world should have already entered the Extraordinary Era. There would not be as many problems as the other corporations and Li Yueming.

He continued to walk around the laboratory.

Li Yueming noticed that Constantine was also researching the gene serum.

However, they all failed.

The closest he had gotten to success had only given him the appearance of a muscular man.

It had to be said that this perfect gene serum was truly too difficult to produce.

Even Li Yueming, who had unlimited deduction talent.

He had only managed to obtain such a small one by relying on some luck.

When they wanted to continue producing.

He immediately realized that even if he copied all the manufacturing processes one-to-one, he would not be able to do it.

It was impossible to produce a second perfect gene serum.

According to Li Yueming's guess, the reason for this result should be the will of the world on this planet.

However, it was no wonder.

After all, the perfect gene serum was too heaven-defying. If it could be mass-produced, even the Zergs, which had harmed countless worlds in the universe, would have to stand aside.

After all, they were a group of humans who could evolve indefinitely.

The Zergs were nothing!

Even though Constantine was the chosen one from hundreds of years ago, it was probably impossible for him to study this thing.

One could imagine how rare it was.

To be able to land in Li Yueming's hands, it was purely by relying on the super powerful cheat of infinite deduction and enough luck.

That was why he had snatched it from the planet's will.

Furthermore, he had not finished injecting the perfect gene serum.

Li Yueming had spent more than 30 years of effort and endured a few life and death transformations before he achieved his current invincible special talent. After investigating all the items left behind by Constantine, he was finally done.

Li Yueming's eyes flickered for a moment.

Currently, the only unknown factor that troubled him was the Star-Moon Alliance Medal in the Rebellion Camp.

However, Li Yueming was not prepared to mention this problem for the time being.

Right now, the most important thing for him was to get enough reincarnation points.

After all, the higher the score, the more power and rewards Li Yueming could inherit.

Transcendence Calendar Year 383.

Later generations called it the ten years of the Resistance.

In the past ten years, Li Yueming had cleaned out many of the corporate executives and lost their core members.

The old forces in the world were basically a basin of loose sand.

The resistance army attacked the city and took over the land, and they were unstoppable.

Most of the old forces fled the moment they saw the Resistance Army approaching.

Even the old forces that dared to fight the Resistance were few and far between.

Nonsense.

Now, many of the remaining powers of the corporations had lost their top leaders.

He had also lost the support of the low-level soldiers.

Many of the Extraordinaire soldiers had already surrendered to the Resistance.

Under such circumstances, they went to the Resistance Resistance Resistance.

He could only say that he was tired of living.

Moreover, the many cities that had been captured did not require the Resistance to spend too much effort to govern.

The reason for this was all due to the role of the brochure.

The brochure was spread all over the world in various ways.

Therefore, most of the lower-class people had a certain understanding of the Resistance.

He knew that the slogan was 'Eliminate the tyranny of the corporate world, the world belongs to the resistance'.

He also knew that his political goal was to build a utopia society where hundreds of millions of people around the world could afford to live in, afford to go to school, and afford to go to school.

Many ordinary people did not know how to build such an idealistic country.

They didn't even know if the Resistance would really fulfill their promise after occupying the city.

However, this did not stop them from looking forward to it, and they were ecstatic.

After all, the order of this world was already like this. No matter how bad it was, it couldn't be worse than a world ruled by a tycoon, right?

That's why.

The Resistance Army had not encountered any decent resistance from the beginning.

The cities they conquered were also in order.

The Rebellion Army only needed to occupy the city and then assign some Extraordinaires to watch over it for a while to maintain the basic operation of the city.

The residents were very cooperative.

They even urged the Resistance to quickly occupy the next city.

There was no doubt that this scene was very unbelievable.

After all, in the past wars.

The ordinary people avoided it.

They were deeply afraid of being affected by the flames of war.

But now.

It was still the same group of people, but they took the initiative to provide all kinds of help and support to the Resistance.

This made countless Resistance soldiers proud and touched.

They were proud that they were idealistic warriors who were willing to sacrifice their lives for their ideals.

He was touched by the friendliness and simplicity of the ordinary citizens.

All they wanted was a bed that could accommodate their bodies. They didn't even ask for a place for their souls..

Chapter 274: A burning star, the establishment of a utopia!\_2

However, under the high-pressure control of the corporations in the past.

However, they often had to enter the factory to become consumables.

The elders of the Resistance who had fought alongside Li Yueming in the desert.

Now, most of them had already become the mainstay of the Resistance Army.

He vaguely remembered a few decades ago.

On that night, when the yellow sand filled the sky, they followed Li Yueming through tens of thousands of kilometers of guerrilla warfare.

The 30,000-strong team was once reduced to less than 10,000.

At that time, they were pursued by hundreds of thousands of Yunxiao Group's Northwest Coalition Army.

There were also many troops from the Cloud Sky Group blocking the road ahead.

There was not even a trace of hope left or right.

However, when they began to waver in their sense of existence...

It was that figure who stood up and told them that as long as they united the oppressed majority, a single spark could start a prairie fire. It was also that figure who told them that they had to live for their ideals and be prepared to sacrifice themselves for their ideals at any time.

At that time, they were still ignorant, but now they knew that Li Yueming had such a big plan.

He was so arrogant that he wanted to defeat all the corporations in the world and establish a country that seemed to only exist in dreams.

Actually, at that time.

None of them believed that Li Yueming could really do it.

However, at that time, other than forcing himself to believe it.

They had no other beliefs that could support the endless battle that was like a tidal wave.

But now, only a few decades had passed.

The scene described by the man back then appeared in front of them.

When the Resistance raised their flag.

Billions of oppressed people around the world stood up as well.

Surrounded by their flags, they turned into a flood of steel that swallowed everything! ! !

The corporations that once controlled the world's order could only tremble in front of this power.

The original idea of "eliminating the tyranny of the tycoons, the world belongs to the resistance" was not far from being realized.

Then, was the equal country that Li Yueming had promised them still far away?

Thinking of this...

All the elders of the Resistance Army couldn't help but tremble.

This was because under Li Yueming's leadership, they had created an unbelievable miracle! ! !

It took ten years.

The Resistance had planted a bright red flag on the entire world.

Ninety-nine percent of the land in the Eastern Continent, Western Continent, and Northern Continent had been occupied by the Resistance Army.

Currently, the Rebellion Army ruled over more than 3,000 large cities, tens of thousands of small cities, and tens of billions of residents.

They became a super force that ruled the planet.

At the same time, Li Yueming also began to walk up the stage again.

Ever since he killed Constantine and single-handedly wiped out the remnants of many financial groups around the world.

Li Yueming had long been recognized as the strongest supernatural being on the entire planet.

Until today.

No one knew how powerful Li Yueming Ming was.

However, his iron-blooded methods over the years had been deeply reflected in the genes of all those who did not obey.

Submit or die.

Li Yueming had deeply interpreted this into the bones of all the old forces.

They were truly afraid.

They were afraid of Li Yueming, this lunatic who killed without batting an eyelid.

It was also because of his existence that he deterred all the villains.

That was why the Rebellion Army was able to take over the order of the entire world so naturally without causing much trouble.

Now, after occupying three continents.

Under Li Yueming's instructions, the Resistance began to implement various policies around the world.

The first policy was to count the world's population and issue a Resistance identity card to everyone in the territory.

Then, he compiled all the statistics into a book and entered them into the world's public database.

In the beginning, no one knew why.

However, when it was discovered that many cities had committed crimes and the people who led the destruction of order were quickly found and captured by the Resistance Army.

Only then did everyone understand why the first thing the Resistance did was to count the world's population.

So it was to reduce the crime rate.

This was the three methods of the Resistance that had worked every time.

The first was to cut down the city's crime rate.

All those who disobeyed the management of the Resistance Army and took the lead in causing trouble and causing chaos in public order.

If the security team caught them, they would be sent to labor reform.

The second move was to hack the black organizations in the city.

The order of the cities under the control of the corporations was very chaotic, and everything could be bought with money.

Whether it was a beautiful slave of unknown origin or some healthy human organs.

As long as they could afford it.

There would be people who would use all kinds of methods to get it.

And the ones who usually helped these rich people do the dirty work were the so-called underground forces.

All kinds of gangs, human traffickers...

Under the second axe of the Resistance, those who should receive peanuts received peanuts, and those who should be sent to labor reform were sent to labor reform.

As for the third axe...

It was to take all the resources that originally belonged to the financial groups and the rich in the city into the public's possession.

This axe had the greatest resistance.

It was not worth the effort of many old factions to resist.

It caused a lot of trouble for the Resistance.

But no matter what, the Resistance still took it down in the end.

After all, in the face of absolute power.

No matter how stubborn an individual was, it was difficult to compare with the general trend..

Chapter 275: A burning star, the establishment of a utopia!—3

As for the many bloody massacres that were set off during this process...

Li Yueming was the only one who took the responsibility.

He didn't know how people would comment on all this hundreds of thousands of years later.

Fortunately, he didn't care.

Transcendence Calendar Year 400.

It had been nearly 30 years since the Resistance took over the world.

It was also during this year.

The leader of the Resistance, the Transcendent Emperor, Li Yueming, announced the end of the era of the Extraordinaires.

3-15741 They had officially entered the era of the Resistance.

Moreover, the name of the Rebellion Army was "Ideals" and it was called the Utopia.

After 30 years of Li Yueming's hard work, the old forces in the world had been completely wiped out.

The few remaining forces could no longer cause any trouble.

Now.

All cities around the world had implemented the new policies of the Resistance.

All the residents who joined the Resistance Army only needed to work normally every month to enjoy all the livelihood tools under the assets of the Utopia's government.

In the past, he had lived under the rule of a financial magnate.

All ordinary people needed money for their basic necessities.

Therefore, if ordinary people wanted to survive, they had to work hard to earn money.

But even so, after giving it his all, it was still just a screw in the factory.

Inexhaustible, can't stop

Once they could no longer serve, they would immediately be ruthlessly eliminated.

Under such a social order, the lives of ordinary people could be imagined how depressing and boring it was.

And now.

Under the continuous reform of the Resistance Army, the army was able to survive.

Ordinary people finally no longer needed to worry about earning endless money every day.

Because they lived in the city ruled by the Resistance, ordinary people did not need money for food, clothing, housing, and transportation.

The Resistance Army had provided all the residents with comprehensive medical facilities.

Moreover, none of these medical facilities were for profit.

Other than some extreme illnesses, most illnesses could be treated for free. Under this set of rules.

Doctors could no longer go against their conscience and prescribe expensive drugs to patients in order to earn more commissions.

Thp nntipntc did nnt hnvp tn tllrn nnlp nt tho eight mf thp hncnitnl dnr

It was just medical treatment.

When it was first released, it was praised by many residents, and many of them were in tears.

One had to know that in the past, the pharmacy was no different from another Yan Luo Dian to ordinary residents.

Go, go, go.

If he didn't go, he would die.

However, most of the time, it was both money and life. Now, the Resistance had solved the problem at its root.

In addition.

The resistance had opened a large number of public schools in every city.

As long as the parents were working normally, the children did not need to pay school fees.

The teachers were not bound by money.

He didn't have to squeeze money out of the students to help the school or himself make money.

Moreover, the Resistance had even implemented a so-called national pension plan.

As long as he worked and lived normally.

The Rebellion Army would provide free nursing homes for the elderly and retired citizens, as well as various survival guarantees.

All in all.

There were many problems in the implementation of these policies.

The Resistance had undergone constant adjustments and changes.

In the end, it took them decades to fulfill their promise.

The era where everyone could get sick, buy a house, and study had arrived.

Under the planning of the Resistance.

Every city would have new projects launched every year.

Construction of schools and hospitals, construction of railway and airport, construction of urban roads, construction of residential buildings.

One had to know that these things were not paid.

The Resistance only cared about food and accommodation.

But even so, it still couldn't extinguish the enthusiasm of many residents.

This was because the residents all knew that as long as these public facilities were built, everyone could enjoy them for free.

In a sense.

They were not working for the Resistance, but for themselves.

Work for their children and grandchildren.

Therefore, every time this happened, there would be many young and willing ordinary people who would not go to work.

They were proud of the blood and sweat they shed for the city.

Under such circumstances.

As the current commander of the Resistance, he was the leader of the utopia.

Li Yueming, who was known as the Extraordinary Emperor, had an unparalleled reputation among the people.

Many residents called him the Fire Bearer of the Morning Stars, the Holy King of the Rebellion.

Under his rule.

Now that the world was under the rule of the Rebellion Army, the cohesiveness was simply terrifying.

Public security was excellent, and the residents lived and worked in peace and contentment.

The development speed of each city did not decline compared to the past-

On the contrary, it had sped up by who knew how many times.

The flourishing era ushered in the first crazy increase in population in hundreds of years.

One had to know that under the rule of the corporations.

The world's population had been declining and regressing for the past few hundred years.

But now.

After the residents gained a sense of security and happiness, the large-scale birth tide and the speed of urban development were on par.

Li Yueming had only accepted it for a few decades, but the number of newborns had increased by nearly a hundred times.

Everything he had done over the years...

Li Yueming was quite satisfied.

In the past thirty years, he had spent almost all his energy on managing this huge country.

At the same time.

He had also established Extraordinaire Management Associations and Extraordinaire Schools in more than 3,000 large cities.

As the name implied..

Chapter 276: A burning star, the establishment of a utopia!\_4

The Extraordinaire Management Association was an organization that managed Extraordinaires.

Extraordinaires could still enjoy superior privileges in this world.

Li Yueming couldn't change this.

He wasn't prepared to change.

However, Li Yueming had also set up stricter rules for the Extraordinaires, which were different from those of ordinary people.

Extraordinaires would fight against each other as long as they did not harm civilians or destroy infrastructure.

As long as they submitted an application to the Association of Extraordinaires, they could resolve the dispute on their own.

Moreover, through the extraordinary school, they would regularly instill the concept of people-oriented into the extraordinary.

He wanted them to know what the responsibility and mission of an Extraordinary was.

He cut off his thoughts of being aloof.

In addition.

Every year, the Extraordinaire School would nurture some new Extraordinaires.

Under such circumstances, it could be considered as leaving a certain amount of freedom for the supernatural beings.

A few sets of combination punches came down.

The Extraordinaires had been relatively obedient over the years.

However, he did not blindly inject all the residents with the supernatural potion, nor did he force the Extraordinaires into the era of Extraordinaires on a

large scale.

The reason for this was because Li Yueming didn't think that becoming a supernatural being was the only way out for the residents of this planet.

Perhaps they can walk out of a more majestic road.

However, this was not within Li Yueming's consideration.

He only considered the things that could be considered at the moment.

It took more than thirty years.

Li Yueming finally stabilized the rule of the Resistance.

Now that the Extraordinaires had also taken control of it.

There were only two things that Li Yueming needed to solve.

The first was to arrange for Sun Ruo to transcend this small world.

Regarding this point, Li Yueming had already made preparations when he was researching the perfect gene serum decades ago.

Now, he only needed to carry out the final deduction and test to confirm that there were no problems before he could officially operate it.

As for the second matter...

That was to figure out the origin of the Star and Moon Medal in the Resistance camp.

He wanted to know the ins and outs of all this.

He would have to ask the original mayor of N City, the original leader of the Resistance... Han Long flew away.

When Li Yueming came knocking on the door.

Han Longfei was sitting on the roof of the tallest building in Kandor, smoking a cigarette.

After hearing Li Yueming's footsteps, Han Longfei was not surprised. He just took a puff of his cigarette and slowly said, "You're here?"

Li Yueming nodded.

Han Longfei silently handed him a cigarette.

Li Yueming didn't take it.

"You're a freak! You can do so many things without smoking!" Han Longfei laughed."

Li Yueming stared at him for a long time.

"Do you know why I'm here?" Hearing this.

Han Longfei touched his bald head.

"Why? You can't be here to reminisce about the past, right?" Seeing this, Li Yueming's expression was complicated.

A long time passed.

The relationship between the two was complicated.

If he had to say it.

Perhaps Han Longfei was Li Yueming's only friend in this world that he could get along with.

It was after joining the Resistance Army that Li Yueming had his own base.

And in the later development.

Han Longfei had also been silently helping Li Yueming behind his back.

In the end, Li Yueming's wings had hardened.

He already had the strength to swallow the world like a tiger.

However, the friendship between the two of them was still rare and precious.

Therefore, he had no choice.

Now, when it came to exposing certain things.

He was particularly speechless.

The wind on the roof was very strong.

As the headquarters of the Rebellion Army, Candor City was especially brightly lit.

After a long time.

Li Yueming finally broke the silence,""Where did Dr. Cheng go? I've sent people to search the entire world but they can't find any traces of him. Don't tell me that he disappeared into thin air?"

Han Longfei did not say anything.

At this moment, the bald man's temperament was a little profound.

After a moment of silence, Han Longfei exhaled and said,"Ke ke, I really cannot hide anything from you..."

Chapter 277: Ye Tianzi l s True Identity, His Journey Is the Sea of Stars

On the tall building, the lights were dim.

Candor City was the headquarters of the Rebellion Army and was one of the largest cities in the world.

Standing on the roof and looking down, every house was lit up by thousands of lights.

Hearing Li Yueming's question.

Han Longfei took a puff of his cigarette and threw it on the ground to extinguish it. Then, he slowly stood up and said, "You should have known my identity long ago, right?"

Li Yueming didn't deny it and nodded."From the moment you arranged for me to join the Resistance Army, I sensed that something was wrong..."

Han Longfei smiled.

Obviously, he was not surprised. He asked with interest,"So, you deliberately handed the Resistance to me to test me, right?" This time, Li Yueming did not answer.

Fortunately, Han Longfei did not need him to answer.

Li Yueming had returned the position of the leader of the Resistance to him at that critical juncture.

It was a very strange thing in itself.

In the past, he might have only had a slight guess about this, but now, he could confirm it.

Obviously, Li Yueming had already noticed his abnormality.

After confirming this.

Han Longfei sighed and smiled bitterly. "I SO what did you find?"

Li Yueming stared at him for a long time.

In the end, he slowly shook his head.

If there were still people in this world that Li Yueming couldn't understand.

Without a doubt, Han Longfei was the first to bear the brunt.

Li Yueming could sense the other party's motives.

For example, Constantine.

As the strongest Extraordinary in the world, Constantine's goal was to find ways to make himself stronger.

For example, many corporations.

Their goal was to expand their territory and exploit more surplus value.

However, Li Yueming did not sense any intention from Han Longfei.

If he was pursuing power, he would willingly give up the position of the leader of the Resistance Army to Li Yueming.

However, if he had other plans behind the scenes...

Over the years, Li Yueming had given him many chances, but he had never made any moves.

However, if he had no ulterior motives...

Then how could he have so many identities?

On the surface, he was the City Lord, but in fact, he was the leader of the supernatural forces.

However, if they thought that this was all, they would be underestimating Han Longfei.

According to Li Yueming's many years of observation.

As well as in the database marked with the word 'top secret' within the Cloud Sky Corporation.

Li Yueming realized that Yunxiao Group's growth and rise were not coincidental.

Instead, there was a hand secretly manipulating everything from behind.

Rumors.

The mysterious boss was called Ye Tianzi, and he was the most mysterious existence in the entire Cloud Sky Corporation.

According to Li Yueming's investigation.

Ye Tianzi was the supporter behind the 'Perfect Gene' drug back then, and also the boss behind Professor Cheng.

This way...

Li Yueming immediately noticed it-

Why did he feel like someone was watching him in the dark?

It was likely that he was the most mysterious Ye Tianzi of the Cloud Sky Corporation.

As for the reason...

It was very simple.

Only Ye Tianzi could watch and observe him from beginning to end.

The rest, including Professor Cheng.

He was probably just a medium-sized chess piece under Ye Tianzi.

This way...

Li Yueming's arrangement was very clear.

It was first born from the gene petri dish and then moved into the special observation room.

As for Sun Ruo and the subsequent escape.

Li Yueming felt that it was very likely that Ye Tianzi had arranged it behind the scenes.

This could also be found in the documents.

After the head of the security room was used, he was directly killed by Ye Tianzi.

And now.

Li Yueming even sent tens of millions of supernatural beings to secretly search for Professor Cheng.

But after searching for so many years.

However, she couldn't even find Dr. Cheng.

If Professor Cheng did not escape to another planet, then the only possibility was that he was secretly killed.

Those who had the ability to easily manipulate Dr. Cheng.

Only Ye Tianzi.

As for who Ye Tianzi was, it was not difficult to guess.

Because Han Longfei gave him an ancient medal.

According to the information that Li Yueming had gotten from Constantine.

There were seven medals for ancient warriors, and six of them were in Constantine's hands.

Only the last one, he had exhausted all his efforts, but in the end, he still could not find it.

According to Constantine's guess.

It was very likely that this medal had fallen into the hands of a supernatural being called the Dark Night Diviner.

This Dark Night Diviner was also one of the two Extraordinaires who had been hailed as the closest to SSS-class.

Li Yueming compared the medal Han Longfei gave him with the other six medals Constantine had collected.

He instantly knew that the medal that Han Longfei had given him was the real deal.

In this way.

Han Longfei's identity was more confusing.

No one knew how many identities he had, and no one knew what he was doing with so many identities.

At the very least.

Li Yueming didn't know what Ye Tianzi, or the so-called 'Dark Night Diviner' was doing behind the scenes.

In the past few years.

Because the rating was not high enough.

Therefore, Li Yueming did not expose everything to Han Longfei.

Until now.

Li Yueming already had the courage to not fear anything..

Chapter 278: Ye Tianzi 's True Identity, His Journey Is the Sea of Stars (2)

Only then did he come to the door.

He looked at the confusion in Li Yueming's eyes.

Han Longfei smiled and said, "Aren't you very surprised now?" But to be honest... You've also surprised me a lot!"

He was smiling.

However, his expression was deep and profound.

Li Yueming nodded." So, should I call you Ye Tianzi or Dark Night Diviner?"

Han Longfei shrugged and said,""A name is just an unimportant thing. You can call it whatever you want... You must have a lot of questions now, right? Ask and see how much I can answer for you!"

Li Yueming didn't stand on ceremony.

After thinking about it, he asked the first question, which was also the most important question."You've been planning for so many years, what's your purpose?"

Han Longfei smiled and said,""You sure know how to ask questions. However, I can indeed answer this question...First of all, I'm not plotting anything. I'm active in this world only because I'm waiting for a ray of hope!"

"Hope?" Li Yueming was puzzled.

Han Longfei nodded and said in a serious tone,""Right now, many universes are being attacked by the Zerg. The frontline where the Alliance of Order is retreating. And our galaxy is also in the range of being abandoned by the Alliance of Law!"

"If we can't give birth to a stronger civilization, it won't be long before the endless interstellar Zerg will mercilessly devour everything on all planets!"

What he said did not seem like something a native should say.

However, as a reincarnator.

Li Yueming understood everything very well.

He thought about it.

"So you're an ancient warrior?" Li Yueming asked."

Hearing this.

Han Longfei was stunned.

She subconsciously glanced at Ming Li and said in you curious about what the universe bug clan is?"

Li Yueming was well aware of this, so he wasn't curious at all.

However, he still said a few perfunctory words, "What does this have to do with me? I'm just a native of an ordinary planet. It's useless for me to know so much."

Han Longfei was stunned again.

Obviously, Li Yueming's reaction was beyond his expectations.

A moment later, he laughed and said, "That's true. It's not necessarily a good thing to know too much..."

He did not answer if he was an ancient martial arts practitioner.

Li Yueming thought about it.

The other party was probably not an ancient martial arts practitioner.

After all, as the ancestor of ancient martial art practitioners, Li Yueming was very familiar with the aura of ancient martial art practitioners.

Li Yueming didn't ask anything else.

Han Longfei lit another cigarette and took a few puffs.

He seemed to have been silent for too long, so he was particularly talkative today." You killed Constantine so easily. This is beyond my expectations... There are probably not many things in this world that can be hidden from you now, so you should know what happened when the ancient martial arts practitioners landed in this world, right?"

Li Yueming nodded.

Seeing this, Han Longfei continued, "' The ancient warriors were not forced to descend into this world. In fact, they were sent to the rear to seek help and sow seeds because the planet was surrounded by the Zergs. However, this team was discovered by the Zergs during their escape. They had no choice but to land on this planet after being seriously injured..."

"Even though they are on the verge of death, the news of the Insect race invasion still continues to spread. It was also because of this that Constantine was born!"

"The ancient warriors who descended here felt that Constantine was the next son of destiny of this planet, so they handed over a portion of the ancient warrior's flesh and blood as well as many top-notch technological blueprints to Constantine."

"But Constantine isn't a qualified Child of Destiny!"

If the ancient warriors want to sow seeds and nurture more powerful civilizations to aid their home planet, Constantine alone is far from enough."

"After confirming this, the ancient martial arts practitioner came to me. They gave me the ability to be almost immortal, and they also gave me an ability known as divination. They asked me to help them find the other Children of Destiny behind Constantine."

' And after I used divination, I realized that I couldn't calculate anything. I could only calculate a vague outline."

"Then, I followed this blurry outline and looked around. In the end, I found you..." "

"A freak who can't even read the Ancient Warrior Divination!"

His words were different from what Li Yueming had learned from Constantine's diary.

However, Constantine didn't lie in his diary.

After all, Constantine could lie to others.

However, he would not be so crazy as to write a diary to lie to himself.

It was because the ancient martial arts practitioner did not place much of his bet on that damned old man at all.

He sent Constantine away.

The ancient martial arts practitioner secretly arranged for Han Longfei. It allowed him to consciously speed up the growth of this world behind the scenes.

As for the goal, it was naturally to nurture more powerful civilizations and then work together to resist the Zerg's attack.

However, after figuring out the ins and outs of everything.

Li Yueming didn't feel much relaxed. Instead, he felt that the situation was getting more and more serious.

He did not know how serious the Zerg invasion was.

However, if even planet 6-07312 was forced to use this method to find external help.

Then, it should have reached a certain level..

Chapter 279: Ye Tianzi 's True Identity, His Journey Is the Sea of Stars (3)

He was deep in thought.

"So we are not enemies. All the preparations I made were just to speed up your growth..." Han Bufan continued.

At this point, he glanced at Li Yueming and couldn't help but complain,"However, it seems that my existence is unnecessary now. Your growth speed is already so fast that it scares me."

Li Yueming didn't say anything.

After a moment of silence, he got up and left the building.

Only Han Bufan was left standing silently behind him.

His expression was extremely complicated.

The Rebellion Era, the seventh year of the Utopia Calendar.

Li Yueming looked at Sun Ruo who was sleeping quietly in the petri dish and injected a part of his cells into her body.

Sun Ruo also began to evolve towards perfect genes.

Although she had only injected half of the drug like Li Yueming, because she had a part of Li Yueming's genes, it was enough to support her to evolve into a pseudo-perfect genetic body.

Although he couldn't obtain a true perfect genetic body, it should be enough for Sun Ruo to transcend this universe.

After confirming that Sun Ruo had begun to evolve in the petri dish, he was shocked.

Li Yueming began to return to the supernatural laboratory.

To conduct further research.

However, this time, he was not researching the Extraordinary Potion.

Instead, he began to study the various blueprints he had received from Constantine's computer.

Through this, he could at least get a glimpse of the current technological situation of 6-07312.

The first time he went to Constantine's laboratory to search, he was shocked.

Li Yueming did not find this item.

In the end, it was found in a folder in Andre's computer.

Now.

With the help of Infinite Deduction, Li Yueming might be able to get a portion of it.

During this process.

Han Bufan disappeared after the long talk that night.

After all, his mission was to find and help each generation of Destiny's Child grow, correct and help this planet improve its technological level. And now, he had told Li Yueming everything he could.

Therefore, he had no choice.

It was time for him to return to his original mission and become a lonely watchman in the river of time.

Li Yueming did not stop him.

After all, although the two sides had never been honest with each other.

But no matter what, they were not enemies.

Li Yueming had no reason to stop Han Bufan from leaving.

During the Rebellion Era, it was the 12th year of the ideal calendar.

After more than 50 years of development.

Now, the world had completely walked out of the era of tycoons.

Under Li Yueming's leadership, the Resistance had become more and more prosperous.

The cities, population, and infrastructure that had been damaged by the war had been restored after decades of recuperation.

The entire world was thriving.

In this case, the new wind

Li Yueming, who had been silent for many years, stood up once again and announced to the world the plans of the Republic for the next 50 years.

On the Internet..

All the television stations in the world...

All the official and private media outlets read out Li Yueming's order.

'The surface cannot restrict and bind humans. Therefore, we should look further into the universe.'

"Let the light of the Rebellion Army and the United States shine wherever the members see!"

"Our journey must be the sea of stars!"

Li Yueming's words were short and concise.

However, the firm power contained in it was enough to move everyone.

After hearing Li Yueming's voice.

In an instant, the entire planet was in an uproar.

All the Resistance Army and the civilians under their rule were cheering excitedly.

"The country ruler is invincible!" "The Resistance Army is invincible!!"

"The Republic is invincible!!!"

Let the light of the Resistance and the Republic illuminate the universe, our journey...It's the sea of stars!" At this moment.

Everyone was celebrating excitedly.

There was no other reason.

It was because Li Yueming was the one who said those words.

It was the existence that led the world to a better life.

He was the ideal supporter of all the residents!

Decades ago.

Li Yueming had also given the citizens of the Utopia the goal of building their own development.

Now, not only did he not give any discounts, but he had even exceeded his expectations.

Therefore, he had no choice.

At this moment, Li Yueming had only formulated a plan to walk into the sea of stars.

Even if they were to charge onto the execution ground, the members of the Republic would not be afraid.

This was their faith in a person.

This was also their greatest trust in a person.

After Li Yueming gave the order.

The world's top scientists in related fields were all preparing intensely.

They also began to gather at Kandor at their fastest speed.

According to Li Yueming's instructions.

Next, they would work with Li Yueming to develop a warship that could travel to and from the galaxy.

In the current scientific world.

There was a widespread rumor.

If there was anything more confusing than science and truth, it would be to study science and truth under the leadership of Li Yueming.

The origin of this sentence came from the largest super laboratory today.

It was the Kandor Extraordinary Laboratory.

Although he did not know if this rumor was true or false.

However, no matter what, she was facing the strongest man in the world.

Therefore, many scientists were inevitably nervous and attached great importance to this journey.

After all the scientists had arrived.

Li Yueming walked out of a huge tower.

This tower was newly built by him.

The current Kandor Super Laboratory was already too huge.

Genes, supernatural potions, hot and cold weapons, reproductive equipment, mechas...

There were all kinds of messy research departments.

The Candor Super Laboratory took up more space than ever.

Therefore, he had no choice.

This time, Li Yueming did not continue to work on the new project in the Kandor laboratory.

Instead, he separated it.

This huge building that looked like a tower that reached the sky was called the

Star-Moon Heavenly Sword.

It was Li Yueming's newly established research department.

If nothing unexpected happened.

This place would become the starting point for the Resistance to explore planets, galaxies, and star fields in the future.

Chapter 280: Return to the Reincarnation Space, Immense Reward! 1

The Rebellion Era, the 20th year of the ideal calendar.

As time passed, the utopia entered a period of rapid development.

And because of Li Yueming's flag, the entire utopia was bound together.

He began to gather all his strength and explore the boundless universe.

In the 15th year of the ideal calendar.

The first near-moon interstellar warship set off for the two giant moons of 3-15741.

More than 1,000 Cosmology scientists were involved.

There were also more than 5,000 top-notch A-class Extraordinaires and 15 S-class Extraordinaires.

In the past.

The Federation Government had also left footprints on the giant moons and even named them.

There were even countries that had proposed to exploit the resources on it during the government era.

However, due to various reasons, they could not be implemented.

Now.

The Republic had also expanded its footprint to the moon.

After more than a month of assessment, the probe ship confirmed that the two planets had many scarce resources that were not available on the surface.

There were also several materials that had never been found on the surface.

With the help of a group of Extraordinaires.

The scientists obtained a considerable number of experimental samples and brought them back to the Star-moon Heavenly Sword for more systematic research.

The ideal lasted twenty-five years.

Under Li Yueming's leadership, the world had initially solved the energy problem that supported the interstellar spacecraft. With the current scientific and technological foundation and supporting industrial level of planet 3-15741, the controllable nuclear fusion energy source could be put into use in the shortest time.

In the twenty-third year of the ideal calendar.

The Star-Moon Heavenly Sword had created a generation of interstellar spaceships. With controllable nuclear fusion as fuel, they could already achieve basic space travel.

Of course, it was still far from the standard of truly traveling the universe.

However, it gave everyone a clearer direction and successfully ignited the world's enthusiasm for outer planets.

From then on.

The Republic announced that the space colonization era had arrived.

As the current leader of the Republic.

Li Yueming stood in the deepest part of the Extraordinary Research Institute.

Sun Ruo had been in the petri dish for decades and had already gone through the fifth transformation. Although there were still some dangers in the subsequent transformation, there were not many problems in general.

After confirming this, Li Yueming heaved a sigh of relief.

Now, he was almost a hundred years old.

Li Yueming's life had just begun with the unlimited evolution of perfect genes.

But in fact, there was no point for Li Yueming to continue staying on this planet.

He overthrew the tycoons and ruled the world, ushering in the interstellar era.

The scores that needed to be refreshed had basically been refreshed.

As for helping the world's will raise its dimension... There was no way to force it.

Moreover, not every planet needed to be upgraded.

The specific situation has to be treated in a specific way.

After all, all roads lead to Rome.

There was no way to tell who was better between the top Xianxia world and the top technological world.

In addition.

Li Yueming had already investigated the secrets of ancient martial arts practitioners decades ago.

All kinds of messy matters had been resolved.

Therefore, the only person in the world who cared about Li Yueming was Sun Ruo, who was in the petri dish.

He stared at Sun Ruo in the petri dish for a long time.

In the end, Li Yueming sighed.

He left a note for Sun Ruo, then resolutely got up and walked out.

From then on, Li Yueming put most of his energy into researching technology.

Since Li Yueming had already done what he needed to do on this planet.

Next, he would have to search for the warrior planet in the distant galaxy where they had once crossed paths.

In order to leave this world more reasonably.

In the years to come, we'll be able to see the difference between the two. Li Yueming began to show a sickly look intentionally or unintentionally.

Year 103 of the Ideals Calendar.

Li Yueming, the world's most respected master and the king of the Utopian Nation, announced the success of the fourth-generation interstellar spaceship.

The newly developed fourth-generation interstellar spaceship already had the initial ability to travel long distances. It was expected that the Republic would officially start the era of interstellar travel.

But before the whole world could cheer.

The Star-moon Heavenly Sword Research Group urgently announced the second piece of news.

The general idea was:

In the past, Li Yueming's body had suffered irreversible damage during his battles with corporations and supernatural beings.

After nearly a hundred years of treatment, he still could not get rid of the effects of his injuries.

Now, because he had spent the entire night researching interstellar warships, his injuries had worsened.

Therefore, Li Yueming did not have much time left.

As the initiator of the Interstellar Era, Li Yueming didn't want to die quietly on the planet.

After some consideration, he decided to board the fourth-generation interstellar spaceship alone and head to the boundless universe.

While he was looking for a way to treat his body.

He would do his best to contribute to the exploration of the starry sky.

That's right.

Li Yueming was ready to leave this planet and board the spaceship to the distant depths of the starry sky!!!

This is a new message, a new one

All the citizens of the Utopia were stunned.

Li Yueming had already started laying the foundation decades ago.

But now when I heard this news, I still couldn't believe it.

The ideal king they believed in, the man they yearned for...How could he leave them so easily?

Countless citizens of the Utopia found it hard to accept. After confirming the authenticity of the source of the news..
