

## Maxing MT 36

Chapter 36

The Broken Ship of the New Era (3K)

This battle.

Many people lost everything.

Their homes were destroyed.

The farmland that they had worked so hard to cultivate had also been destroyed by the attack.

The child had lost his father.

The woman had lost her husband.

Parents lost their children.

All this pain would become a wound in everyone's hearts that would never heal.

Many years later.

They would probably not forget this day.

Still.

However, the Star Moon Alliance was still standing.

Because, to them...

As long as Li Yueming was still alive.

He was still guiding them forward.

So then.

Even if he was crushed to pieces.

They were not afraid at all.

But this time.

However, the miracle did not appear again.

That night.

Li Yueming, who was covered in blood, was carried into the simple infirmary.

All night.

Everyone in the Alliance who had some medical knowledge was summoned to the infirmary.

However, there was still no good news.

The next day.

Li Xiyue, who had cried all night, appeared in front of everyone with red eyes.

Instantly.

Everyone's heart skipped a beat.

Many people even started to sway on the spot.

Li Xiyue pursed her lips.

She tried her best to suppress the sadness on her face.

There was a long silence.

Finally, she gritted her teeth and choked, “My brother, he, died...”

Hearing these few words,

Whoosh!!!

The remaining 100,000 citizens of the Star Moon Alliance were in an uproar.

Everyone’s faces were filled with disbelief.

Even though they were prepared.

But when hearing this news,

However, it still made countless people dizzy.

Many people could not withstand the blow and fainted.

They withstood the destruction of their homes and the separation of their families.

And now, the news of Li Yueming’s death was like the last straw that broke the camel’s back.

Countless people wailed.

The entire city was filled with cries that made people cry.

The next day.

As Li Yueming’s sister.

As Princess Xiyue of the Star Moon Alliance.

Li Xiyue took the position of leader of the Alliance.

Wang Fei, who had just completed the rehabilitation training for his broken arm, was appointed as the deputy leader.

In response.

The Alliance did not cause any commotion.

After all, in the past,

Li Xiyue and Wang Fei already held leadership positions.

Now, they have only changed from private to public.

One day, twenty-three years ago.

Li Yueming came quietly.

Twenty years later.

Li Yueming left quietly again.

When he was around, no one could hide his brilliance.

His existence was like the sun in the sky.

It made everyone pale in comparison.

But after he left.

Only then did the crowd realize.

In fact, it didn't seem to affect the daily operations.

And so.

Only then did many people understand.

Perhaps Li Yueming had anticipated this a long time ago.

He had long prepared for his fated ending.

...

The transfer of rights went smoothly.

After Li Xiyue and Wang Fei went on stage.

The first order they gave together was to promote the new breathing technique.

Li Yueming had already sorted out all the information on the breathing technique and placed them in the safe in the laboratory.

Even if he died.

Li Xiyue could also open the safe and retrieve the documents.

There were a total of five safes.

Every time she opened one.

It was filled with various blueprints and information.

She looked at the stacks of handwritten manuscripts.

Li Xiyue couldn't help but tear up again.

Once upon a time.

She never understood why Li Yueming would lock himself in that small and enclosed house.

But now...

Looking at the stacks of manuscripts left behind.

Li Xiyue finally understood.

The brother who couldn't grow up with her.

He just wanted her to live in an environment that ordinary Humans should live in.

For this reason, he worked day and night.

He broke pencil after pencil under the dim yellow light.

...

However, it was too late to understand everything now.

What she could do.

Was to inherit Li Yueming's will.

It allowed all Humans and her to return to the environment that should have been theirs.

A world where there was no longer a tomorrow!

The new leader gave the order.

Naturally, everyone in the Star Alliance obeyed.

However, it was obvious.

It was impossible for them to learn the new breathing technique in a short period of time.

This battle.

The Alliance soldiers suffered heavy losses.

Almost all the elite warriors died in the wave of rats.

Only the Royal Court guards and hundreds of surviving veterans were left.

Fortunately, this time, it really hurt the Rat Clan, one of the eight mutant creatures.

For the time being, the Rats did not dare to organize another tidal wave of attack.

This gave the Alliance a chance to catch its breath.

Half a month later.

Under the efforts of Li Xiyue and Wang Fei,

The Star Moon Alliance, which was in ruins, had gradually resumed production.

Although everyone was still in extreme pain.

But sorrow and pain could not be eaten.

The dead were already dead.

The living had to continue living.

Only alive.

Only then could they inherit the will of those who came before him!

The survivors picked up the human bones and broken limbs left on the battlefield.

A pit had been dug for them.

And a grand funeral was held.

Li Yueming's body was buried in the middle of the pile of broken limbs.

This was also a unanimous decision after everyone's discussion.

If Hell existed in this world.

With so many Star Moon Alliance members accompanying him...

Li Yueming would not be lonely along the way.

On the day of the burial.

The entire Star Moon Alliance cried.

Everyone felt as if something in their lives had been cut off.

This kind of heart-wrenching pain from the soul was often more painful and incurable than physical injuries.

After burying everything.

The people's pain finally closed as the coffin closed.

Time passed, day by day.

The Alliance quickly cleaned up the traces left behind by the war.

And build a new home on the ashes.

At the same time.

The new breathing technique left behind by Li Yueming was quickly promoted.

After many people got used to cultivating, they realized that other than some minor changes,

There was not much difference between the new breathing technique and the old breathing technique.

After discovering this,

The progress of the Alliance members in cultivating the breathing technique instantly increased by leaps and bounds.

The Alliance's strength had unknowingly become stronger.

...

Time flowed like water, never to return.

The second year.

With Li Xiyue's approval,

The new Hunter team and Exploration team were officially established.

They began to clean up the surrounding mutated creatures.

They were also equipped with the new breathing technique.

The soldiers were all extremely brave.

Soon, the mutated creatures around the Alliance were wiped out.

They went on to expand the territory.

After resolving the problem of food supplies.

The Alliance's development speed had risen to another level.

Li Xiyue took out the blueprint left behind by Li Yueming.

She began to collect minerals around the territory to develop technology.

Year after year passed.

Soon.

Ten years passed.

The Alliance was developing more and more rapidly.

On this day.

Under Li Xiyue's plan,

Exploration team, Hunter team.

The newly formed Scarlet Squad appeared outside Fallout Shelter 0911.

The mutated creatures also evolved very quickly.

The current Fallout Shelter 0911 was under their construction.

It was no different from a city ruled by Humans.

Of course.

They had to remove animal characteristics like Rat tails, Rabbit ears, and Cat claws.

It was obvious.

This group of mutated creatures had learned the operation of Human society very successfully.

However, the wild beasts had lost their wildness and chose to evolve into Humans.

Could they still be called wild beasts?

No one knew this result.

No one cared.

At this moment, everyone in the Star Moon Alliance, who had a blood feud, was more like a beast than a beast.

Soon.

Several teams attacked.

They attacked the mutated creatures living in Fallout Shelter 0911 at lightning speed.

Although this group of mutated creatures had good combat strength,

They also knew that there was a Human force growing not far from the shelter.

However, the long years of living as a 'Human' had made them lose their original wildness.

Therefore.

Under the absolute suppression of the Alliance's combat strength,  
The wild beasts quickly scattered in all directions.

Eventually.

It only took the Alliance half a day to reclaim Fallout Shelter 0911.

The first shot of the counterattack was officially fired.

...

Time continued to pass.

Two years after seizing Fallout Shelter 0911.

This was the first time the Alliance had seen refugees other than them.

This group of refugees had traveled a long way.

From the moment of seeing them, they trembled.

After interrogation, they found out that the eight mutated beast kings were constantly sweeping through Human forces.

It seemed to be preparing to wipe out the other Human forces.

Then, they would gather their forces and destroy Fallout Shelter 0911 in one fell swoop.

After receiving the news,

Li Xiyue was silent for a long time.

Ten years of experience had made her a mature politician.

Many times, she was already used to not showing her emotions on her face.

But now...

However, she also felt a rare trace of nervousness.

One had to know that

Ten years ago, the Star Moon Alliance led by Li Yueming only faced a few tribes under the Rat King.

But now...

What she had to face was the full attack of the eight royal families.

Even with the improved breathing technique,

It was an extremely difficult battle for the entire Star Moon Alliance.

In the dead of night.

Li Xiyue hugged the rapier that Li Yueming gave her and muttered, "Brother, please give me some strength..."

Then.

She couldn't help but tear up as drops of tears fell.

After a while, she wiped her tears.

Li Xiyue puffed up her cheeks and said, “This lousy ship of the new era is really not easy to sail at all!”

...
