

## Maxing MT 37

Chapter 37

The Finale of all Finale (4K, End of Volume 1)

Time flowed like water, never to return.

In a blink of an eye.

Ten years passed quietly again.

During this period of time.

The mutated creatures finally launched an all-out attack on the Star Alliance.

At the same time.

The news of the Star Moon Alliance's counterattack and victory finally spread throughout the world.

The Human survivors who were struggling finally saw the light of victory against the mutated creatures.

Then.

All the surviving Humans that were on the verge of extinction began to advance towards the Star Moon Alliance.

Fallout Shelter 0911, where the Alliance was located, was collectively known as the "Holy Land" by all Humans in the world!

Entering the Holy Land to make a pilgrimage.

It became the highest aspiration of survivors on all 3-024 planets.

In ten years.

The population of the Alliance had expanded by dozens of times.

There were millions of them.

More and more survivors came to the pilgrimage.

The number was still rising.

The increasing population helped Li Xiyue share a lot of the pressure.

It allowed her to withstand the attacks of the mutated creatures.

Still.

The increase in population poses more problems.

There were also many flaws that had not been discovered before.

There was no choice.

Li Xiyue and Wang Fei still needed to continuously push for the internal innovation of the Star Moon Alliance.

All in all.

This was the most difficult ten years.

Even though Li Xiyue had learned the breathing technique since she was young, her current physique was not ordinary.

She almost couldn't withstand such high-intensity work.

After ten years.

They finally turned a corner.

They began to gain an advantage from the battle of the mutated creatures.

In the blink of an eye.

Another five years passed.

The rise of the Alliance was unstoppable.

The battle with the mutated creatures was not over yet.

But at this moment.

All Humans can already see a bright future.

And yet.

This year.

Li Xiyue was almost 40 years old.

Her body and appearance were still young.

The vicissitudes in her eyes could not be concealed.

Many members were worried about her condition.

This was because they discovered that Li Xiyue often sat alone on a watchtower not far from the city wall.

She looked at the stars in the sky barefooted.

According to the news spread by the big shots of the Royal Court's guards,

This seemed to be the first leader of the Star Alliance.

It was also the place where Li Xiyue's brother died in battle.

And so.

Many people guessed.

Perhaps Li Xiyue had not recovered from the trauma of her brother's death.

For a dead man.

Was it worth it?

Under the publicity of Li Xiyue and Wang Fei, Li Yueming's image had already spread widely.

However, many people were outsiders after all. They scoffed at those godly words.

But no one dared to say it.

This was because as long as the locals heard this, they would immediately be expelled from the city.

...

Two years later.

Li Xiyue could no longer hold back the longing in her heart.

Most of the time.

She would feel that what she was experiencing now was a dream.

Perhaps one day.

After waking up from her sleep.

Her brother would suddenly appear at her bedside.

He would greet her with a smile, but so many years had passed.

No matter how unwilling Li Xiyue was to believe it.

It was time for her to face reality.

She returned to Li Yueming's former research lab.

She opened the last safe that Li Yueming had left for her.

The other four boxes had been opened a long time ago.

It contained all kinds of technological information that Li Yueming had painstakingly researched.

It was because he had these blueprints and information.

She was able to build such a colossal country in just 30 years.

Only this safe.

Li Xiyue tried all the passwords but could not open it.

She didn't know what was inside.

But after a few moments of hesitation.

In the end, she did not choose to open it forcefully.

Let it be.

She had one last thought.

But now...

She was almost out of ideas.

Therefore.

She had returned here after so many years and was prepared to open the box to see what was going on.

The patterns on the surface of the box were frosted.

It was simple and crude.

Li Xiyue recognized it.

This was the storage box that Li Yueming had personally chiseled out for her when she was very young.

She exerted a little force.

The storage box was easily opened.

Li Xiyue held her breath and looked into the box.

—There was a letter in the box.

Opening the envelope.

There was a special breathing technique written on it.

Li Xiyue's gaze swept across it.

She did not stay for long.

Because she found a dried seed in the middle of the letter.

After so many years of weathering,

The outside of the seed was already very shriveled.

She wondered if it could grow up smoothly with some fertilizer and water.

Li Xiyue found a basin of soil.

She planted the seed into the soil basin.

Fertilizer and water.

It was done in one go.

After doing all this,

She found herself a chair and began to carefully study Li Yueming's special breathing technique.

...

In a blink of an eye.

Half a year passed in a flash.

Under Li Xiyue's meticulous care,

The originally shriveled seed miraculously grew branches and leaves.

Unexpectedly,

What grew out of this seed was actually a blood-red flower!

“This... Is this the spider lily that Brother told me about that can allow people to meet in the next life?”

Li Xiyue’s pupils constricted.

She looked at the blood-red flower in front of her.

Her expression was filled with excitement.

When she was young, Li Yueming had told her the story of the spider lily.
