

Maxing MT 431

Chapter 431: A New Path, Northern Glacier Town!_2

Originally, all the soldiers were still curious.

They thought that Li Yueming would praise them verbally and then encourage them.

However, they did not expect Li Yueming to ask for more food and pay!

The soldiers were stunned for a moment.

Was there something wrong with the script?

However, Li Yueming didn't give them time to think and ask questions. He continued, ""This general has always pursued the principle of rewarding meritorious deeds and punishing those who have made mistakes. Now that you have performed well and made contributions, I will naturally fight for the most benefits for you!"

Hearing this, the soldiers who had regained their senses cheered.

"General Li is mighty!" ' General Li is mighty! "

' General Li is mighty! !

A group of people shouted in unison that they were still in the middle of the river.

The expression on his face was incomparably happy.

Most of the ordinary soldiers of the Northern Battlefront Army only had five They thought that Li Yueming would praise them verbally and then encourage them.

However, they did not expect Li Yueming to ask for more food and pay!

The soldiers were stunned for a moment.

Was there something wrong with the script?

However, Li Yueming didn't give them time to think and ask questions. He continued, ""This general has always pursued the principle of rewarding meritorious deeds and punishing those who have made mistakes. Now that you have performed well and made contributions, I will naturally fight for the most benefits for you!"

Hearing this, the soldiers who had regained their senses cheered.

"General Li is mighty!" General Li is mighty!"

' General Li is mighty! !!"

A group of people shouted in unison that they were still in the middle of the river.

The expression on his face was incomparably happy.

Most of the ordinary soldiers of the Northern Battlefront Army only had five taels of silver as their monthly salary.

As a high-ranking soldier, the salary of a scout was eight taels a month.

Let's not talk about the food standards first.

Just the salary of ten taels of silver was already twice as much as that of other ordinary soldiers.

In the past, they had heard all kinds of lies from their superiors.

After all, it was the basic operation of the high-ranking military officers and even the officials of the imperial court.

Under normal circumstances, it was already very impressive to be able to eat one or two of the ten pancakes.

However, Li Yueming's actions...

He directly fed the flatbread into everyone's mouths!

The three most urgent things in life were promotion, pay raise and reaching the peak of life.

He had only been with Li Yue Ming for more than two months, and his salary had already been increased

Would the other two be far away?

"Alright, everyone, quiet down!"

Li Yueming once again stretched out his hand and gestured for all the soldiers to be quiet.

After the boiling crowd quieted down, he continued, "The announcement of the reward is over. Next, we will announce the follow-up mission of our scout team!"

Hearing this.

All the soldiers in the scout camp held their breaths.

The temptation of a raise was enough to make people lose their rationality.

However, the follow-up mission arrangements were what he really needed to pay attention to.

After all, there was no free lunch in this world. Increasing the treatment meant taking on more danger.

Li Yueming's voice paused. After making sure that everyone's eyes were on him, he continued, ""From today onwards, you will be independent from the scout camp. As for the name of the team after you are independent, I have already decided on it."

"I will do my best to nurture a powerful army that can crush the Qin army in terms of speed and combat strength!"

"From now on, let that group of damned Qin people no longer dare to trample on the fields of our Great Zhou, no longer dare to raise their butcher knives to kill the residents of our Northern Lands, and no longer dare to arrogantly claim to annex the wilderness!"

“I want to make all existences who dare to oppose my army tremble in fear!” Li Yueming’s words were very long, but every word was very powerful.

The contents were even more shocking.

At this moment, the Qin army was at its peak, and everyone in the world feared the Qin army like a tiger. Even the six dynasties did not dare to fight against them. Li Yueming actually dared to announce in front of so many people that he wanted to create a new army that could completely crush the Qin army in terms of combat strength and speed.

If this was said by an ordinary person, they would probably laugh their heads off.

After all, the well-trained and fearless reputation of the Qin army had long been etched into the minds of the other five countries.

Sensing the threat, the six dynasties all strengthened their military control, but even so, they were still unable to stop the Qin army from expanding.

How could a random army be a match for them?

But now that it was said by Li Yueming, the meaning and extent of the words instantly became different.

After hearing this, the soldiers felt as if they had been injected with chicken blood.

They couldn’t help but shout in unison, ””Make all the existences who dare to be enemies with the general tremble in fear!”

“Make all the existences who dare to be enemies with the general tremble in fear!!”

Even the group of reincarnators looked at him with a strange gaze.

As a female reincarnator, the way Huang Li ‘er looked at Li Yueming was even more different. The way she looked at Li Yueming was like a fangirl looking at her idol!

At this moment, Li Yueming was like a natural commander.

As long as he stood on the stage and shouted, all the soldiers under his command would charge forward in the direction he pointed out.

This was the effect of the title ‘Starlight Preacher’ on Li Yueming’s interface.

[Starlight Preacher (red)]

[You are the preacher of the boundless universe.

[Unique special effect: All attributes increased by 30%, commander’s strength increased by 200, personal charm increased by 50!]

With the addition of this talent and his own charm, Li Yueming’s commanding ability and personal charm might be much higher than some guys who specialized in living off women.

At this moment, Li Yueming didn’t even need to do much.

It was almost as if he had completed the control of the army with just a move of his mouth.

After the basic training was completed, all they needed to do was to cultivate the sense of honor and cohesiveness of the army.

After a series of preparations, the soul of the army would be established. They should soon have enough combat power.

After he finished talking about the follow-up arrangements. The scout camp spent a few more days in the camp..

Chapter 432: A New Path, Northern Glacier Town!_3

Half a month later, the 5,000 spiritual horses that You Aotian had promised were delivered.

At the same time, the imperial court also sent a secret letter from the emperor. They were very curious about Li Yueming's method of training the new army and said that they should not make it public. The emperor would do his best to support him in secret.

This was both good and bad news for Li Yueming.

After all, the emperor was like a knife hanging over Li Yueming and the Li family.

It was fine if he didn't fall, but if he did, it was very likely that all of Li Yueming's plans would fail.

After receiving the secret order.

The 5,000 soldiers in Zhenbei City silently disappeared one night.

When he woke up the next day, You Aotian had already changed his army.

The news caused a huge discussion in the Northern Battlefront Army.

After all, this was a troop of more than 5,000 people. Wouldn't it be shocking if they disappeared so mysteriously under normal circumstances?

However, this discussion was quickly suppressed by the higher-ups.

Many generals and soldiers had sensed the unfathomable aura and stopped the idea of investigating.
.0.

Under such circumstances.

Li Yueming brought the five thousand scout battalion to a town in the north called the Northern Ice River.

As the name suggested, the reason why Northern Ice River Town was named was because of the river that flowed down from the extremely cold snow mountain.

Because the rapid flow of water was often mixed with many ice cubes, it was also called the Northern Ice River.

Since they were already close to the Hundred Thousand Mountains, it was naturally impossible for Northern Glacier Town to be that wealthy. The population of the town was less than 10,000, and most of them were floating people.

There were only about two to three thousand local people stationed here.

The reason why it was so extreme was that a large-scale beast tide would erupt in the Hundred Thousand Mountains every few years.

As one of the towns closest to the Ten Thousand Mountains, North Glacier Town was affected almost every time.

Under such circumstances, it was already considered a very prosperous place to have a few thousand permanent residents.

As for the other 8,000-plus floating population.

Except for a small number of criminals who had been sent by the Central Plains to the cold and bitter lands to be tortured, most of the others were hunters and herb gatherers who had come for money.

Although the Hundred Thousand Mountains was famous for being a forbidden zone for life.

However, the more dangerous the place, the more treasures there would be.

Countless spirit herbs and rare animals grew in the mountains.

Many of these plants and animals had special requirements for their growing environment and climate.

Herbalists only needed to pick some spirit herbs and sell them, and they could earn thousands of times the price difference.

Hunters were the same. If they hunted some uncommon animals and brought them to the Central Plains, they could make hundreds of times the profit.

It was enough for the family to eat and drink for a few years.

Originally, Northern Ice River Town did not have an administrative department. There were only about 300 soldiers in charge of managing taxes. And now, Li Yueming had led more than 5,000 scouts to such a remote town.

Naturally, it caused a huge commotion.

Seeing the black mass of armored soldiers, the first reaction of the residents was to hide in their houses.

He only left a crack in the door or window to secretly observe the situation outside.

In this desolate and remote land, it was already at the edge of the Great Zhou's administrative jurisdiction.

Naturally, this group of residents did not have much of a sense of identity with the Great Zhou.

Therefore, he was now looking at Li Yueming and the others with vigilance.

More than 300 Great Zhou soldiers stationed in North Ice River Town came out to welcome him.

Although he had already received the transfer order.

But now, they saw that Zhenbei City had really mobilized over 5,000 elite soldiers on spiritual horses and wearing armor.

The centurion leading the 300 soldiers of Northern Ice River Town couldn't help but rub his eyes.

Good fellow...

They actually sent troops to this godforsaken place?

It was as if the sun had risen from the west!

After confirming that he was not mistaken, the hundred households knelt down from afar.

When Li Yueming and the others approached, he kowtowed three times and said, “I am Cai Yue, the centurion of Dingfeng City in the northern army of my town. I have been ordered to guard North Ice River Town.”

Cai Yue was wearing tattered armor and looked to be in her fifties.

The 300 soldiers behind him were even more miserable.

Her cotton jacket was covered in patches, and her face and hands were covered in frostbite.

If they were not soldiers, they would probably be recognized as refugees.

Life was tough!

At this moment, Li Yueming was riding a tall horse, wearing a special general's armor with a layer of mink fur coat inside. He looked like a young master from a wealthy family.

Staring at the figure under his feet, Li Yueming swung his whip and said, “I can't stand to see anyone live a miserable life. Men, give Cai Tingchang two cotton coats!”

Chapter 433: Young people don't care about martial arts, what a trap!_1

At this moment, the warhorse under his feet snorted.

Li Yueming sat on the tall horse, looking like a person in a painting. He looked down at the figure beneath his feet and said casually, “Someone, change President Cai into a cotton robe. He's wearing tattered clothes...Wouldn't it be bad if others saw it? This general can't stand to see a human suffer!”

Hearing Li Yueming's teasing voice.

Especially when he heard the title 'President Cai'.

Cai Yue, who was kneeling at his feet, turned pale.

He lay on the ground trembling with fear and kowtowed desperately.”Shangguan, spare my life. This lowly one is really...I really didn't mean to deceive the Shangguan...”

He looked at Cai Yue, who had already kowtowed until her head was bleeding.

Li Yueming sat on the horse and smiled faintly.”Oh? Court Chief Cai is living such a difficult life, and the three hundred soldiers behind him are in tatters and miserable states. Why are you begging me to spare your life?” Hearing this, Cai Yue's face turned even paler.

Kneeling heavily on the ground, he kowtowed several times and said, “Shangguan, your subordinate is in the army. This subordinate deserves to die ten thousand times. Please spare my life!”

Court Chief Cai was his official position in the Central Plains.

A few years ago, he was a tyrant in his hometown. He relied on his distant relative to become an official in the court and got himself a position as a president.

However, because he was drunk, he robbed a good family.

This was a small matter to him.

However, he did not expect this good family to have a strong personality and commit suicide because he could not bear the humiliation.

Her husband came to the door with a kitchen knife in anger, but he was killed by his underlings.

In the end, he even went all out and directly went to kill his entire family of twelve.

In the end, because of this incident, he caused a huge mess in the local area.

Hundreds of villagers from the village had banded together to block his entrance and wanted to skin him alive.

Even his relatives couldn't protect him.

Cai Yue had no choice but to leave her hometown.

He used his connections to travel thousands of miles to the sparsely populated North and used his savings to buy a position in the Northern Army.

With this position.

He spent some time and effort to regroup a group of people.

He began to live a life of superiority.

Northern Ice River Town was a small town, but it was not even drawn on the map of the Great Zhou.

There was no Order at all.

Therefore, when Cai Yue learned that the Northern Battlefront Army was sending people to Northern Ice River Town, she was in disbelief.

This lousy place didn't have anything he wanted.

The higher-ups must be crazy to send troops here!

However, the contents of the letter were clearly written. Even the arrival time of the garrison was clearly written on it.

Cai Yue had no choice but to believe it.

In order to prevent any accidents, he had made some preparations a few days in advance.

Originally, he thought that the higher-ups would not care about a small fry like him.

Thus, he still had the mentality of getting lucky.

However, he had never expected that the general would know his identity so well.

They even knew that he used to be the president of the Central Plains.

From this, it could be seen that the other party had done an investigation and was already clear about what he had done all these years!

In fact, that was indeed the case.

Li Yueming swung his whip and struck Cai Yue's face.

His entire face was swollen.

This was a happy and happy voice." Get up, this general has a lot of people.

Take me to the camp and send someone to invite everyone in the town over!"

Although she had been whipped, Cai Yue did not dare to show any signs of surprise.

He had no choice. This army was too large in number, and each of them was well-equipped. It was far from what he could fight against.

Now that he was beaten up, it was not a bad thing. As long as he could keep his life, there was still a chance.

Therefore, Cai Yue revealed a smile that was uglier than crying. She hurriedly stood up and said, "Yes, sir. Please wait a moment. I'll find someone immediately... Oh, no, I'll do it myself. Please go and rest first. I've prepared a welcoming banquet for you!"

Li Yueming didn't have much expression on his face.

After casually waving his hand to signal him to scam, he followed a group of ragged 'soldiers' to the garrison camp in Northern Ice River Town.

After Cai Yue stood up and left.

Huang Li 'er, who was riding on Li Yueming's right, said, "Your Highness, why don't you just capture this guy and behead him?"

Li Yueming smiled and replied coldly, "It's not worth it to chop off such a precious head. Later, he could get someone to prepare a pot of oil and heat it

Huang Li 'er suddenly understood.

Cai Yue was not as simple as she looked.

After all, he was a newbie gift bag that Li Yueming had personally picked out when he chose the base of the cavalry camp.

The Northern Glacier Town that this guy was stationed in was very remote.

Even the Great Zhou did not have much information about this mobile town.

Even Li Yueming had found it unintentionally when he was flipping through the old documents.

However, such a remote place was not as poor as it looked on the surface.

North Glacier Town was located at the northwest border.

Thirty miles to the north, they were already close to the edge of the extremely cold snow mountain.

They could enter the western frontier after traveling fifty miles to the west.

The geographical location was very unique.

Coupled with the nourishment of the spiritual water flowing out of the extremely cold snow mountain, even though the temperature in this area was low, both the spiritual energy and the land were very rich. There was a large amount of fish caught in the Northern Ice River..

Chapter 434: Young people don't care about martial arts, what a trap!_2

Following the river, he traced back to the edge of the Hundred Thousand Mountains and found a mine.

In addition to the drug dealers and hunters...

If not for the constant beast tides that caused the Great Zhou to not take it seriously.

Such a treasure land had probably been developed long ago.

Cai Yue spent a huge sum of money to buy a centurion position in the Northern Battlefront Army and sent him to Northern Ice River Town.

Now, he was pretending to be pitiful and even brought more than 300 'soldiers' in tattered clothes to walk in front of Li Yueming.

He was trying to fool Li Yueming.

In fact, these 300 people were all ordinary residents from various families. The real soldiers were all too rich and had not come out of the city.

All these years, Cai Yue had led a group of soldiers to lord it over Northern Ice River Town, which was a no-man's land.

His little life was going well!

Fortunately, Li Yueming liked to plan before acting.

They would only take action after they had made preparations in advance and investigated clearly.

Otherwise, he might really be fooled by this guy.

After all, who would have thought that a small town would have so many mysteries?

Of course, none of this mattered anymore.

The important thing was that Li Yueming had decided to place the new army here.

If anything went wrong, he could rely on the little fox's thigh in the north and his cheap father's thigh in the west.

No matter how one looked at it, it was a very cost-effective piece of land.

.0.

About two hours later.

After reading out the order, Cai Yue led nearly 10,000 people back to the Northern Ice River Town camp.

He wanted to run, but Li Yueming was riding a spirit horse.

Even if he had two more legs, he wouldn't be able to run.

At this moment, 95% of the people in Northern Glacier Town had come.

Everyone looked at Li Yueming with vigilance and fear.

After all, Cai Yue was the centurion of the Northern Battlefront Army, and he had not left a good impression on them all these years.

Even the reputation of the Northern Battlefront Army and the Great Zhou was ignored here.

Most of the people in this group were dirty people wearing cotton-padded jackets.

There were also hunters wearing animal fur and carrying hunting bows on their backs.

Because they were gathered together, there seemed to be quite a number of people present.

However, as a small town, 10,000 people were too insignificant.

It was worth mentioning that there were more than 300 exceptionally strong men in this group.

They were Cai Yue's true soldiers.

In order not to be seen through by Li Yueming, they took off their armor and replaced the 300 farmers.

Although they were nervous, they could only bite the bullet and blend into the crowd, hoping that Li Yueming did not notice them.

He glanced at the crowd in front of him.

Li Yueming pulled the spirit horse that was still snorting and said, "Everyone, my name is Li Yueming. I'm the general of the newly established 'Star Moon Army'. The purpose of coming here is to guard Northern Ice River Town and protect you from the attack of the Qin army and the beast tide!"

After saying that, Li Yueming paused, apparently waiting for the reaction of the residents.

As expected, the crowd of people below them burst into an uproar when they heard the sound.

Obviously, Li Yueming's words were unbelievable.

This Northern Ice River Town was only a little bit big. In the past, the largest number of soldiers stationed there was only 500.

There were actually 5,000 troops stationed here?

It was simply using a sledgehammer to kill a chicken!

However, whether they were willing to believe it or not, they had no choice in this matter.

Therefore, the crowd gradually calmed down after a while.

The crowd finished digesting the first wave of news.

"Since everyone already knows, then let me announce the Star Moon Army's code of conduct!"

"This is the Starmoon Troop's rule, and it will be the code of conduct for all of you in the future!"

When he heard Li Yueming's words.

The group of people instantly became nervous and could not help but hold their breaths.

In their ears, the code of conduct that Li Yueming mentioned was another meaning of collecting protection fees.

The Six Nations fought for hegemony every year.

In many cases, there was no difference between an army and a bandit.

It was just that bandits were not allowed to rob, while the army was just robbers in disguise.

There were simply too many people who wanted to take a breather halfway through the march.

To be able to live to their age, they were already used to this.

The soldiers under Li Yueming were all well-equipped.

They did not dare to resist.

They could only pray in their hearts that Li Yueming would not be too ruthless and leave them a way out.

In the silence.

Li Yueming's next words were like the first thunder that rang out on the flat ground.

“The first rule of the Starmoon Troop is to never take a needle or a thread from the masses!”

“The second rule of the Starmoon Troop is to ensure the safety of the people under their command!”

“The third principle of the Starmoon Troop is to restore the production of the people under their command and expand the area of land cultivated!”

These three rules came down.

Everyone present was stunned.

Not far away, a group of people did not say anything for the time being. After all, most of them could not even read the words. It was difficult for them to understand what Li Yueming meant without some time.

At this moment, apart from the cavalry battalion itself, the group of reincarnators who followed Li Yueming were also the most confused.

What was going on?

This military regulation seemed a little strange!

However, before they could ask or discuss...

Li Yueming spoke again.” Now, you can ask me if you have any questions. If you are dissatisfied, you can tell me!” From tomorrow onwards, the Star-Moon Army will carry out a comprehensive transformation of Northern Ice River

Town. We are not bandits, nor are we bandits. There is no need to be so afraid..”

Chapter 435: Young people don't care about martial arts, what a trap!_3

As soon as he finished speaking, the crowd was still in a state of confusion.

After a long time, no one said anything.

Even if Li Yueming had extremely high charisma and commanding ability.

However, he still did not have much influence in front of this group of people.

This was normal.

After all, this was the first time they had met.

Before that, Cai Yue, as the black sheep of the group, had already destroyed everyone's trust in the Great Zhou Dynasty and the Northern Battlefront Army.

Even You Aotian himself probably didn't know.

He thought that he was the guardian of all the people in the Northern
Borderline.

But in reality, the people under his protection were so indifferent to the troops under his command.

Of course, You Aotian could not be blamed for this.

The nature of the problem was not something that a general like You Aotian could decide.

Not far below his feet.

Cai Yue should be the first to come back to her senses.

Li Yueming had taken such a big turn. It turned out that he was planning to use him to establish his dominance!

However, he was not worried that someone would tell on him.

After all, there were still three hundred warriors following him in the crowd!

If this group of two-legged sheep dared to talk, he would cut off their tongues overnight!

Seeing that no one said anything, Li Yueming was not surprised.

After some thought, he pointed at a piece of wood not far away and said, ””Since everyone doesn't trust me, then I'll put out a reward. There are close to ten thousand people here. If anyone can pick up this piece of wood, I'll reward the person who picks it up with a thousand taels of silver in the name of the Star-Moon Army! ”

The piece of wood he was pointing at was only as thick as an arm.

An adult could pick it up easily.

But now, the group of people looked at each other, but no one dared to stand out.

Li Yueming knew that a verbal promise was not sincere enough.

He asked Ding Yi to take out 1,000 taels of silver from the military supply box and placed it on a broken table in the camp.

Instantly.

The sound of people swallowing their saliva could be heard around them.

If it wasn't for Li Yueming who was still pressing down on him.

It was estimated that tens of thousands of people would probably fight to snatch it.

Nowadays, three taels of silver was enough for an ordinary person to live for a month.

A thousand silver taels was an astronomical figure.

There must be a brave man under the heavy reward.

While everyone was still staring at the silver on the table.

A sixteen or seventeen-year-old youth had already iocced all the way to Dick up the wood when no one was paying attention.

He then looked at Li Yueming and said, "General, I've already picked up the piece of wood you specified!"

The young man had a delicate and pretty face. Although the cloth on his body was tattered and old, it had been washed until it was spotless.

Li Yueming nodded.

He immediately gestured to Ding Yi behind him.

After placing the thousand taels of silver at the youth's feet, he said, "Very good, this one thousand taels is yours!"

The youth glanced at the silver beneath his feet.

He did not reveal too much greed.

Instead, he took over the topic and said, "Everyone, this army looks very disciplined. It should be the official army of the imperial court. It won't harm anyone! I'm still young, and I only have a sister and mother at home. I can't use up so much silver, so I'll only take 50 taels. I'll split the remaining 900 taels on behalf of the general!"

As he spoke, the youth picked up a silver ingot from the pile of silver.

Then, he placed the wooden stick in his hand on the ground again and said, "As long as you pick up this wooden stick, you can get a share of the silver that the general has given you!"

Hearing this.

The group of people present glanced at the silver ingot in the youth's hand.

He then looked at the few hundred taels of silver left on the ground.

All eyes turned red

They began to swarm up and pick up the wooden sticks on the ground.

Li Yueming looked at the young man with interest.

He didn't expect to meet such an interesting talent in the Horn Gada.

Not only was he able to judge the situation, but he also knew how to borrow strength.

The most important thing was that he could still resist his greed in the face of profit.

Unfortunately, she was still too young compared to him!

Li Yueming gave him a look, and Tian Liang flew off the horse's back. He squeezed through the crowd that was fighting for the wood and took out the wooden stick from inside.

He directly threw the wooden stick back into the youth's hand.

"Silence!" Li Yueming said lazily.

His voice wasn't loud, but it was powerful.

All the people who were fighting for the wood stopped.

They all shivered.

She couldn't help but raise her head to look at him.

After a final blow.

Li Yueming smiled and looked at the pale-faced youth. "This little brother was the first to pick up the wood that this general had designated. This one thousand taels of silver is his. Without this general's permission, no one is allowed to touch it!"

At this moment, the young man who was being roasted on the fire was already drenched in sweat.

He originally wanted to give this general who didn't know his limits a good impression.

In the future, he might even be able to benefit greatly from this operation.

However, he did not expect that this general would not be so easy to deal with.

Not only did he not let him act obedient, but he even put him on the fire pit.

Obviously, she had noticed his little thoughts.

The young man's face was pale as he pursed his lips. However, there was no turning back after drawing the bow this time. He could only bite the bullet and say, "This lowly one is called Xue Wang, the descendant of the offending minister Xue Zhiqian."

This young man was actually the descendant of a criminal who had been sent to the northern borders.

It was normal.

Obviously, a youth with such a scholar and courage could not have come from a commoner's family.

Li Yueming was expressionless.

He wasn't familiar with Xue Zhiqian and had no interest in caring about him.

There was still a long way to go. The most important thing today was to establish the most basic trust with the people of Northern Ice River Town. After all, he had gone through a lot of trouble to get the opportunity to create a

new army.

What they were plotting was not just a little bit of something.

He wanted to take over the entire Northern Region and Western Region of the Great Zhou.

This would require a long struggle.

After sorting out his thoughts, Li Yueming looked up again and said, "Alright, this general will offer one last reward. As long as everyone is willing to participate, there will be a reward of 1,000 taels of silver!"

This time, the crowd below the stage became excited.

The way he looked at Li Yueming was completely different from his previous apathetic expression.

It was filled with all kinds of colors.

Li Yueming knew that his plan had already succeeded. He smiled and said calmly, "You guys live in this small town. Have you encountered any unfair things that Tang Zang has done? Tell this general, this general can make decisions for you!"

Before he could finish his sentence...

Not far away, Cai Yue, who had thought that she had temporarily escaped and was thinking about how to escape, suddenly felt a chill.

When Li Yueming first raised this question, the residents of Northern Glacier Town would definitely not dare to say anything because of his prestige.

But now, after establishing a certain level of credibility through the bounty.

Everything would change!

In just a short while, he had already seen several residents' expressions flickering with eagerness.

If the things he had done in the past were exposed...

No matter which country's law it was, dying a hundred times was probably not enough!

The young man's attacks were really dark. He simply did not care about martial ethics!

Chapter 436: The Great Era Is Rising, The Stars Are Brilliant! 1

After obtaining the initial recognition of the residents of Northern Ice River

Town through Jian Lixin, he was finally able to obtain the necessary information.

Li Yueming then threw out the second bombshell.

In the end, he successfully obtained the information he wanted.

Cai Yue had been a centurion in Northern Ice River Town for many years.

Together with more than three hundred soldiers, they bought the items that the people of Northern Ice River Town hunted and gathered from the mountains at a low price.

Who knew how much silver he had embezzled.

Not only that, but they also used all kinds of methods to recruit able-bodied men and young women from all over the world.

Now, the 300 soldiers had almost expanded to 2,000.

After discovering that his past had been exposed.

Cai Yue knew that she was doomed, so she gritted her teeth and prepared to fight back.

But this was obviously the stupidest choice.

The soldiers behind Li Yueming were not ordinary people.

All of them have a certain level of cultivation, elite regular army.

In their eyes, the so-called counterattack was just two or three kittens and puppies.

Li Yueming had already asked Tian Liang and the others to heat up a pot of oil.

After catching a black sheep and getting the people to identify them, they would be thrown into the frying pan to wash away their sins.

Three whole days.

Li Yueming uprooted all of Cai Yue's forces.

Those who should be put into the frying pan should be put into the frying pan, and those who should be beheaded should be beheaded.

Most of the less guilty ones were captured and kept to build a new world in the beautiful North Glacier Town.

After cleaning up all the remnants.

Li Yueming quickly ordered the 5,000 new soldiers to start construction.

There was no rush for training.

Such a Tidal City with only a few thousand permanent residents, if they didn't expand to guard against the chaotic beast tide in the north...

It was very likely that the army would be wiped out by the beast tide before they could train for long.

Therefore, after settling down, the Star Moon Army's first major event was to expand the camp.

However, this was not something too difficult.

Thousands of well-trained soldiers spent less than a week to build more than ten military camps made of mud and pine wood.

While digging, he also tidied up a large, flat field for future training.

Li Yueming was not idle either.

When the main force was still building in the camp.

He himself led more than five hundred elites to patrol Northern Ice River Town and found that this place was really dirty and chaotic.

The roads in the village were covered in mud, and all kinds of animal and human feces were everywhere.

If it wasn't for the cold weather here, it wouldn't be so easy to breed bacteria.

He could probably smell the stench on the road from afar.

Moreover, because this place was close to the Hundred Thousand Mountains, there was a river not far from the village.

Therefore, every household in the village picked up a lot of things that were hunted down upstream during the rainy seasons of spring and summer.

They were all piled up at the entrance.

The so-called reform, the best and gentlest aspect was to start with small areas.

Gradually, step by step.

It was only after the reform plan had imperceptibly affected all aspects of the people that they would be heavily reorganized.

Therefore, Li Yueming's first order after taking office was to clean up the house.

If you don't clean up a family, how can you clean up the world?

After discovering the problem, they immediately ordered a group of people to rectify it.

The regulations were simple, even trivial.

For example, there must be no mud or domestic garbage in front of the door.

For example, all kinds of messy sundries could not be piled up at will. They had to be piled up together or stored in a separate storage room.

For example, they could not urinate and defecate anywhere, and the feces and urine at home had to be collected and stored uniformly, etc.

If it was someone else who was so lenient, the villagers would probably have splashed their faces with manure.

But who was Li Yueming?

He was a god who could throw people into a pot of oil without any expression.

Therefore, despite their reluctance, the group of residents could only pinch their noses and do as they were told.

Li Yueming, the new general, was an outsider who had never been to North Glacier Town.

However, after eliminating Cai Yue and the other bullies with lightning speed, they had already gained enough power in the hearts of the people.

After all, no one could be sure that if they accidentally angered this old man, they would not be thrown into the boiling oil with an expressionless face.

Compared to the torture of being thrown into a pot of oil.

After cleaning up the messy yard and his own excrement, it didn't seem so unacceptable.

.0.

Li Yueming gave them three days to make changes.

He also released a message to the public that there would be a regulation on the cleanliness of the streets in the future.

Those who had advanced public and private hygiene on the streets and in front of their homes could receive an additional public hygiene bonus.

Initially, Li Yueming thought that there would be some resistance to the initial reform.

Therefore, he had even prepared the methods to capture the typical example.

He was just waiting for someone to stand up against him or refuse to carry out his orders.

However, he never expected that in just two days, the entire road hygiene and courtyard hygiene of Northern Glacier Town would be completely renewed.

Every household tidied up their courtyards and sent people to level the roads in front of their doors.

This made Li Yueming feel as if his fist had hit nothing.

After all, he had even prepared a slap and a sweet date.

In the end, this group of people was too tactful and did not even let him shout anymore.

Of course, when he heard Li Yueming talk about this matter, he was shocked.

Whether it was Tian Liang, Huang Li 'er, or Ding Yi, they couldn't help but twitch their lips..

Chapter 437: The Great Era Is Rising, The Stars Brilliant! 2

Forget it!

A few days ago, he had just thrown Cai Yue's hundreds of subordinates into the frying pan!

Who would still dare to provoke him now?

He had cleaned up the village.

Li Yueming checked around and confirmed that there was no problem.

Coincidentally, the new barracks built by the army had also been completed.

At this moment, Li Yueming and his newly established Star Moon Army finally had their own base in this remote and uninhabited land.

Of course, this was only the beginning.

After the army finished trimming the new barracks, the second thing they did was to widen and extend the streets of North Glacier Town.

Northern Ice River Town had a total of over 5,000 households and over 10,000 people.

It was neither big nor small.

Compared to the cities and towns in the Central Plains.

Northern Ice River Town was at most a slightly larger village.

However, outside of the snowy mountains that could be in danger at any time, it was already very good for Northern Glacier Town to have such a large population.

The reason why Li Yueming wanted to expand the road was to prepare for long-term development in the future.

After all, he had connections in the snowy mountains.

Even if there was a Beast Tide in the future, he could use the little fox to carry out some reasonable evasion.

Therefore, if nothing unexpected happened.

Northern Ice River Town would become a long-term town in the future. It would no longer be like before, when they heard that a beast tide was coming, they would flee with their families.

Hence...

The residents of Northern Glacier Town had witnessed the third unbelievable thing in just a month.

They saw that the newly arrived 5,000 soldiers were actually digging stones to pave the way in the middle of winter!!!

The five thousand soldiers had widened the muddy path that had not changed for decades in Northern Ice River Town by several meters.

The surrounding villagers were also moved away, and the soldiers even built a brand new residential building for them.

This discovery stunned countless residents of Northern Glacier Town.

What did they see?

The officers and soldiers were actually taking the initiative to help them build roads?

Did the sun rise from the west or did they sleep too late last night, causing them to hallucinate today?

But no matter what they think,

The road in Northern Ice River Town was still spreading at an astonishing speed.

In just two months, the entire Northern Ice River Town had been renewed under the efforts of Li Yueming and the soldiers.

If it weren't for the fact that those short and shabby houses looked unsightly.

It was estimated that the current Northern Glacier Town could compete with the old society.

While doing all of this.

The entire Stormoon Troop was undergoing a baptism from the inside out.

After all, in the past, the scouts lived in Zhenbei City.

Although most of them were from poor families, they had never been so close to the people.

But now, under the leadership of Li Yueming, they not only built their own military camp, but also paved a stone road for the town.

The sense of accomplishment was immediately filled.

Of course, the reason why they could work so hard was not just because of their trust and admiration for Li Yueming.

It was more because they had gained some benefits from following Li Yueming.

Not only did he double his monthly salary every year.

Li Yueming had never deducted their rations.

Moreover, they had been eating and drinking well every day for the past two months.

With a full stomach, he was naturally full of energy.

Under normal circumstances, it was impossible for the other generals to conjure so much grain out of thin air for the army.

But Li Yueming was different!

After the secret letter was sent to the emperor.

The emperor was very concerned about this new army that was said to be able to rival the Qin army in the future.

The secret letter sent to You Aotian had already emphasized that all of Li Yueming's requests had to be prioritized.

Li Yueming was the one who brought out the rations with the secret letter.

Every three months, You Aotian would send a supply troop to transport grain and fodder here.

Of course, it was definitely not enough to just sit and eat.

The army had to be able to train in this place, and at the very least, they had to be self-sufficient.

Therefore, after completing the road reconstruction.

The third decree issued by Li Yueming was to reclaim land.

Although the weather in Northern Ice River Town was cold, the land was fertile.

During spring plowing, cold-resistant crops such as wheat and millet could generally mature.

However, farming was not popular here.

After all, as long as the spirit beasts came, the entire town would be severely damaged. The fields that had been painstakingly cultivated for several years would also suffer a major blow.

Over time, places like Northern Ice River Town were abandoned.

It had become an uninhabitable place in everyone's mind!

The population had all moved south to the city.

Now, Li Yueming was obviously going to do the opposite.

The biggest reason why the emperor was able to let the rest of the people stay here and was so magnanimous to let Li Yueming train the new army was because he had made up his mind that Li Yueming would not be able to escape his control in a short period of time.

After all, Northern Ice River Town did not produce any grain, so the army had to rely on the imperial court for food and drink.

As long as the emperor wanted to, he could starve the army at any time.

Without food, the army naturally couldn't cause any trouble and could be controlled by the emperor.

Li Yueming also knew this.

Therefore, he had already taken the lead in clearing the wasteland before the winter had passed and the snow had completely melted.

He led a group of people to reclaim wasteland on the plains downstream of the Northern Ice River.

They also sowed food inside.

He did not have to worry about not being able to harvest.. After all, there were capable people among the masses!

Chapter 438: The Great Era Is Rising, The Stars Are Brilliant!_3

Huang Li 'er was not only skilled in medicine, but also in farming.

He could be considered an expert in agriculture.

Under her technical guidance, even many soldiers who had never farmed before were able to get started quickly.

It could be said that in just a year.

Li Yueming had completed a workload that many people could not complete in a few years.

The residents of Northern Glacier Town witnessed everything from the beginning to the end.

They could understand farming.

Many people wanted to farm in Northern Ice River Town.

However, the final result was often a piece of farmland that was cultivated with great difficulty.

In the end, before they could welcome the harvest, they were razed to the ground by the countless spirit beasts in the vast mountains.

He would return after the tide passed.

The crops planted on the land had already been eaten up by the spirit beasts.

Even the land that had been reclaimed was trampled back to its original state by the spirit beasts.

Several years of hard work went up in smoke overnight.

However, what was the reason for the Star Moon Troop to farm with such fanfare?

Was it really as General Li Yueming had said, that the Star Moon Army would be stationed here permanently in the future?

But this can't be done!

Facing the millions of spirit beasts at the foot of the Shiwan Mountain, humans did not even have a place to stand.

Wouldn't it be useless to cultivate?

On account of the group of soldiers and Li Yueming's help in repairing the road. There were also many kind-hearted local residents who wanted to remind him.

But the result was obvious.

Whether it was Li Yueming or the group of soldiers, they still did as they were told.

Seeing this situation, the group of people could only sigh and let them be.

.0.

After the spring sowing.

The training of the cavalry unit was on track again.

No matter what, the essence of a soldier was still to ride on the battlefield with a knife.

Nowadays, farming during busy times was only a temporary measure.

After the cavalry unit had received the basic commands of standing at attention and standing at ease, the soldiers had already been trained to their bones.

Li Yueming began to teach them riding archery, as well as some flexible combat methods while riding archery.

Of course, Li Yueming was only responsible for issuing orders and correcting mistakes.

The specific implementation still depended on the tools under his command...No, it should be the senior reincarnators under him!

Now, according to the direction that each person was good at.

Li Yueming had arranged corresponding positions for the Twelve Generals under him.

For example, Huang Li 'er was good at medicine and farming.

Li Yueming gave her a position in the medical department and an agricultural guidance specialist.

Tian Liang preferred to be in charge of cooking.

It was said that this guy had worked as a full-time chef in a restaurant in a war world and a xianxia world for a period of time.

He had learned a rather good craft.

If it wasn't for the fact that the materials in this world didn't allow it.

He could even cook some immortal dishes.

In fact, Li Yueming was very interested in this, but in order not to expose his identity as a reincarnator, he could only endure it.

With this, Li Yueming arranged for him to be the logistics manager.

He was mainly in charge of the granary and food.

Even though this guy always complained about the things he did that were not presentable.

However, whether it was Li Yueming, the other reincarnators, or the group of soldiers under his command, they could all see that this guy was only shouting, but he was actually very happy.

He would often say, 'Here comes the chicken soup'.

As for Ding Yi, he was a Heaven's Chosen General.

This fellow had been shuttling back and forth between worlds where dynasties were fighting for hegemony, leading his soldiers on the battlefield and dominating the world

Therefore, he didn't need to worry about Li Yueming's military affairs.

As long as the mission was set and sent to Ding Yi, it would be fine.

This guy was even able to create some new ideas based on Li Yueming's foundation. Li Yueming couldn't help but sigh at his talent.

Of course, Li Yueming was not the one who was most shocked.

Instead, it was the dozen or so reincarnators who followed him.

Li Yueming's erudition and scheming methods really made them feel what it meant to be the chosen one.

Let's not talk about anything else.

Just the training method that Li Yueming had developed in his spare time was enough for a group of reincarnators to be amazed.

One had to know that they had traveled through more than one world.

It was the first time he had heard of a training method like Li Yueming's that could completely transform an army in just a year.

Even Ding Yi, who had been in the military for many years, clicked his tongue in wonder.

The more he studied, the more he felt that Li Yueming's method was amazing.

.0.

Just as Li Yueming was still busy developing in Thule.

In the outside world, the reincarnators from various countries had officially begun to show their talents in the past two years.

In the Great Zhou Cultivator Academy, there was a youth who had broken through to the True Form Realm at the age of eighteen. His name instantly spread throughout the world and he was regarded as a rare genius by the entire Great Zhou.

After all, in the past, those eighteen-year-old youths who were also called geniuses might have just touched the threshold of the Origin Sea Realm.

Now, they were both eighteen years old.

The youth from the Great Zhou Cultivator Academy was an entire realm higher than those geniuses from the past!

To many cultivators in the world, this was an existence that broke a new record!

But it had only been a few days.

At the same time, another seventeen-year-old youth broke through to the True Form Realm in the Great Zhou Cultivator Academy.

The moment he heard the news.

Everyone was numb.

For a moment, he didn't even know if he should believe it.

Almost at the same time.

The other six dynasties also had news of all sorts of geniuses appearing, and each one was younger than the last.

For a moment, the earth was filled with young and powerful Saint Children.

The entire Six Nations were in an uproar.

The Saint Children revealed a majestic posture that could swallow the world.

It greatly boosted the morale of the various countries.

However, it also caused countless problems.

After all, it would be understandable if there were only one or two geniuses appearing in various places, but now, geniuses were like bamboo shoots after the rain.

If there was no explanation, it would probably cause a ruckus.

Amidst the endless quarrels and discussions, the related topics swept through the circle of cultivators in the entire Heavenly Capital Continent.

In the midst of all kinds of discussions, many bold guesses appeared.

In the end, a famous astrologer stood up and predicted that the era of the six states was coming to an end. This group of young people who were comparable to the reincarnation of the stars in the sky would become the terminator of the era of the six states.

Whoever could obtain the full support of this group of young people would be the winner of this ten-thousand-year long run.

He would become the second legendary figure to unify the six countries and ascend to the outside world after the Human Emperor Tiandu Clan ascended.

As soon as he said this.

The entire world was shaken by this.

Unknowingly, they realized that the pages of the past era were about to turn, and what would replace it would be an era of stars and flowers.

Chapter 439: Starmoon Army's First Battle Shocks the World! 1

Year 7283 of the Great Zhou Dynasty.

In the blink of an eye, the scout battalion had already stayed in Northern Ice River Town for two years.

At the same time, Li Yueming had grown to eighteen years old.

After more than two years of construction and training, the Star Moon Cavalry Battalion had undergone a lot of changes.

Day after day, year after year, the high-intensity training had allowed all the soldiers in the cavalry battalion to grow strong muscles.

After all, this was a training method tailored by Li Yueming according to the physical conditions and cultivation environment of the soldiers.

He had spent a lot of effort.

The effect was many times more terrifying than the soldiers had expected.

The strengthening of the physical condition was still put aside.

The most terrifying thing was actually the progress in cultivation.

Two years ago, when the cavalry unit had over 5,000 soldiers in Zhenbei City, most of them were still cultivators who had yet to enter the qi transforming realm.

And in the short two years of training in Northern Glacier Town, most of them had actually broken through an entire major realm!

The qi transforming realm cultivators who had yet to enter the threshold had already officially entered the threshold.

A small number of qi transforming stage cultivators had already touched the threshold of the foundation stage.

Don't underestimate this improvement.

It might not be worth mentioning for an individual, but it would be a qualitative change for an army of thousands.

One had to know that even the most elite Dragon Tiger Army under the emperor's command had ordinary soldiers who were only at the Foundation Establishment realm.

Only a very small number of elite soldiers or generals could break through to the Spirit Pool Realm and the Source Sea Realm.

The reason why he could progress so quickly was naturally because of the cultivation and training methods provided by Li Yueming.

In the past, the efficiency of the soldiers absorbing the spiritual energy of heaven and earth through their own exploration was only ten percent.

After learning Li Yueming's technique, the efficiency of absorbing spiritual energy from heaven and earth jumped to 100!

It was a tenfold increase!

What kind of concept was this?

One had to know that powerful cultivation methods were not rare.

However, there had never been a cultivation method that could be used by so many ordinary soldiers!

Li Yueming sorted out this set of cultivation methods. In a sense, it could be called a miracle in the world!

The soldiers could use this opportunity to absorb the spiritual energy of heaven and earth every morning when they stood in their military stance. Therefore, the speed of his improvement was extremely shocking!

Of course...To be able to obtain such a good effect.

Other than cultivation methods, the Northern Ice River Town was also a place with good Feng Shui.

In the past, when soldiers stayed in human towns, the spiritual energy was very thin.

However, Northern Ice River Town was close to the Hundred Thousand Mountains, and there was even a Northern Ice River that flowed out from the core of the extremely cold snow mountain.

Therefore, the spiritual energy here was extremely abundant.

In addition, there were few people around, and there were no other cultivators to snatch the spiritual energy, so every soldier was able to eat their fill.

Although the spirit of the army had yet to be condensed.

However, after two years of high-intensity training, at least this army had a basic sense of collective honor.

They only needed to be put on the battlefield to be tempered by blood and fire.

Li Yueming's newly created Star Moon Cavalry might be able to display a powerful combat strength in the future.

Of course, the situation of the army was not the most important to Li Yueming.

The most important thing was that after two years of reorganization, Northern Glacier Town had already begun to show a new atmosphere.

The first was the number of houses and population in Northern Glacier Town.

A brand-new earthen kiln was built in the north of the village.

The biggest use of the brick was to make bricks for construction.

The old thatched cottages that the residents of Northern Glacier Town lived in had been demolished one after another in the past two years.

The Starmoon Troop helped the local people build brand-new brick houses after training.

Li Yueming Ming personally planned the construction, straightening the roads in the residential areas and villages, making the entire village look more standardized.

The villagers didn't know what Li Yueming's purpose was.

However, the Star-Moon Army basically built roads and houses for free.

The owner of the house only needed to pay a portion of food or materials to receive military assistance.

If there was an advantage, he would take it.

Therefore, the group of residents had no reason to object.

Through this batch of soldiers and civilians, they were united.

It had removed the vigilance of many residents of Northern Glacier Town towards the Starmoon Troop.

After all, the Starmoon Troop did not bully the people or commit crimes.

They were even willing to build houses for the residents for free.

At this moment, it was likely that in the entire world, one might not be able to find such a good thing.

Moreover, what made the residents' favorability skyrocket the most was...

Ever since Li Yueming moved into North Glacier Town two years ago, the town's 50% tax on Cai Yue's bandits had been reduced by more than half.

The annual taxes, grain, and taxes of the Star Moon Army were only one-third of what they had been under Cai Yue's rule.

Don't underestimate this tax.

To the residents of Northern Glacier Town, this was a huge sum of money.

After obtaining a better living environment and a better living environment.

The people of Northern Ice River Town began to smile, and the number of newborns increased from less than a hundred to more than a hundred.

After hearing the news, people from other small villages and towns like Northern Ice River Town began to come over to scout the way.

It was true that the Hundred Thousand Mountains in the northern part of the Great Zhou was a forbidden zone for humans.

However, no matter which world it was, the rarer something was, the more people would covet it.

The Central Plains had a huge demand for spirit beasts and spirit herbs..

Chapter 440: Starmoon Army's First Battle Shocks the World! 2

Under such circumstances, a large number of herb gatherers and hunters were born to rely on this business to make a living.

After all, if only one or two ordinary humans entered the outer area of the Hundred Thousand Mountains.

No spirit beasts paid any attention to him.

The Dingyuan City that Li Yueming had burned down was the stronghold of these herb gatherers and hunters in the north.

And now.

It was said that there was an elite garrison in North Glacier Town.

Moreover, there was no dragon or tyrant who maliciously collected protection fees.

The surrounding herb gatherers and hunters naturally gathered here.

Li Yueming was very tolerant towards this group of people.

As long as they paid a small entrance fee, they would be recognized and protected.

If one wanted to settle down here, it would be even easier. As long as one joined the Starmoon Army, they could even get a house for free.

There was nothing he could do about it. This lousy place was good at everything.

They just lacked people!

There were just over 10,000 people.

If they wanted to rely on the natural reproduction of humans to transform into a large town, they would have to rely on the natural reproduction of humans.

Wouldn't Li Yueming's hair turn white?!

Naturally, they had to think of ways to swindle human resources everywhere.

Of course, even though the conditions were so good.

However, the herb gatherers and hunters who came here were still uninterested.

After all, no matter how lenient the policy was, it couldn't change the fact that Northern Glacier Town was a Tidal Town.

No matter how prosperous the town was, it was still a small town.

As long as they could not resist the spirit beast tide at the extreme cold snow mountain.

The so-called settlement was out of the question.

Of course.

There were still a small number of people who chose to settle down.

After all, it would be a waste not to take the house.

As for settling down...

They could retreat when the spirit beast tide was about to arrive.

He couldn't possibly let them stay here and wait for death, right?

Under such circumstances, Northern Glacier Town had a relatively stable development period of two years.

The small town that was originally closed and dirty now had a new atmosphere.

There were many pedestrians on the deserted road.

There were even some hawkers who came from thousands of miles away to sell candy.

As for the above.

Li Yueming still felt that the development of North Glacier Town was relatively slow.

However, there was no other way.

After all, Northern Ice River Town only had such a big stall. After dinner, they could just take a stroll from the south of the city to the north.

The population of the entire town did not exceed 15,000.

In addition, it was a Tidal Town, so there was no tradition of settling down. In the early stages, wanting to develop was simply harder than ascending to the heavens.

After all, the walls erected between people's hearts were difficult to remove.

It must be proven over a long period of time.

On the plains downstream of the Northern Ice River, the farmlands that had been reclaimed two years ago could now produce some food.

After the first year of sowing.

The next year, before they could harvest anything, they were already surrounded by him.

Not only did he not make a sound.

At the same time, the entire Starmoon Troop was forbidden from discussing it.

It was so that no one would discover the astonishing yield of the grain that was sown!!!

Ordinary wheat and corn could only produce 500 to 600 catties per mu.

However, in the fertile land downstream of the Northern Ice River, the yield could be increased to about 1,000 catties...

If the weather wasn't too cold, it was estimated that the production could have increased even more.

It was simply too terrifying!

What did this mean?

It was the best if it was not developed by others!

Of course, this was also due to the credit of the agricultural expert Huang Li 'er.

Although Li Yueming's infinite deduction had also played a considerable role in the planting process.

However, it was safer to leave Professional matters to Professionals.

As the commander of the entire military camp.

Li Yueming only needed to control the direction.

The land planted downstream of the Northern Ice River was surrounded by thick walls.

Only Huang Li 'er and a few core members of the Star Moon Army knew about this.

Li Yueming didn't tell anyone.

Every season, he still asked for grain from the imperial court.

After all, even though the emperor was slightly overwhelmed by the Qin army's attack, the attention he paid to him did not decrease much.

What if Li Yueming suddenly doesn't want food?

There was no doubt that the emperor would hang his head on a flagpole soon. At the same time, the emperor also asked Li Yueming about the training of the new army.

In the past two years, Li Yueming's attitude was to delay.

When the emperor wrote a letter asking about it, Li Yueming said that the new army was already under construction and had not yet reached the effect of being able to fight.

Because it had only been two years.

The emperor did not suspect anything and only instructed Li Yueming to do his job well.

Once the new army's regulations were out, he would be the new army's general.

Great General... This can be a first-grade official.

A great general in his twenties...

If word got out, it would probably shock the world.

After all, there had never been such a young man in the entire Six Nations. Even Li Yueming's ancestor had never seen such a terrifying promotion efficiency.

If it was an ordinary person, hearing the emperor promise such a generous reward, they would not be able to do anything.

At this moment, he was probably so excited that he couldn't find the north. Wouldn't he die for the emperor?

However, as a young man who had been influenced by good values.

Li Yueming naturally scoffed at this.

His cheap father had fought for decades, and now he was still fighting for the country in the western border.

But in terms of official position, he was only a second-grade general.

As a son, how could he possibly pass his father's test?

Going against the heavens and becoming a First Rank Great General?

It could only be said that the emperor's flattery skills were a little lacking.

Compared to the unscrupulous bosses of those black-hearted companies in the future, their skills were simply a hundred thousand miles apart..
