

Maxing MT 541

Chapter 541: Lightning Battle, Shocking the World!_2

Even if 300,000 Starmoon Troops were to come out in full strength a few years ago, the defending troops of Wing City should be more than enough to hold them off for a period of time.

As long as they were not immediately breached, they could wait for the troops of the other cities to react and immediately send reinforcements.

No matter how one looked at it, this arrangement was very reasonable.

However, despite all their calculations and considerations, they had missed out on one point, which was that they did not have a clear idea of the expansion speed of the Starmoon Troop.

The Great Zhou Empire was still comparing the difference in strength between the two sides with the strength of the Star Moon Army 20 years ago. They did not expect that 20 years had already been enough to tilt the balance of strength between the two sides!

The Starmoon Troop moved like lightning.

After a few days of rapid marching, they immediately surrounded Wing City as quickly as possible.

Before the soldiers in Wing City could come back to their senses, they immediately activated the horn to launch a general attack.

He looked at the Star Moon Army soldiers outside the city.

Countless Great Zhou soldiers in Wing City were dumbfounded.

Although the Great Zhou Imperial Court had sent them to be stationed in Wing City, Wing City had always been one of the Great Zhou's hinterland in the northeast. No large-scale war had broken out for thousands of years.

It wasn't until decades ago when the two regions in the northwest became independent that Wing City, an inconspicuous city in the hinterland, became an important military town and began to send heavy troops to guard it.

However, no matter if it was the generals or soldiers stationed in Wing City, they had never thought that the Star Moon Army in Northern Ice River Town would really go down the river to attack the northeast!

Therefore, after seeing the dense crowd below the city, countless people in Wing City could not believe their eyes.

"The Qi army is still fighting against the 12th Company in the north. This is Wing City, why would so many troops suddenly appear?"

"From the flag, this troop seems to be the rebel army of Northern Glacier Town!"

"Did the Star Moon Army of Northern Ice River Town eat the guts of a bear or a leopard? Do you really want to start an all-out war with our Great Zhou?"

“According to Wang Ji’s information, isn’t there only 300,000 Starmoon Troops? Even if it has been more than twenty years, they should have just recovered from the last battle in the north. Why do I see so many soldiers of the Star Moon Army below the city?”

“Judging from the density of the formation, the number of soldiers is far more than 300,000!”

“Something bad, something bad...”

Looking at the orderly formation of the Star Moon Army, the soldiers of the Eastern Garrison Army stationed in Wing City were thrown into chaos. For a moment, they almost forgot their duties.

Fortunately, there were still some elite troops sent by Prince Yu in Wing City.

After discovering that the Star Moon Army had appeared outside the city, these elite soldiers reacted quickly and began to take over the commanding power in Wing City. They mobilized the logistics soldiers of the East Army to pile up all kinds of war equipment on the city wall.

But it was too late.

The dense Star Moon Army soldiers took on wave after wave. Their formation was neat, so they did not have to worry about trampling on each other. They marched at an extremely fast speed. Even though they were bombarded by arrows and catapults, they still charged forward like a precise machine. They were well-equipped, and many of their soldiers were equipped with iron armor. Their combat strength far exceeded that of the defenders of Wing City.

Even though the soldiers in the city had come to their senses and were putting up a strong resistance, they still felt powerless against the vast sea of Star Moon Troops.

In less than half a day, Wing City was easily taken down by the Star Moon Army.

The most important reason for the successful occupation of this central city was not only the advantage in numbers, but also the sudden appearance of the Starmoon Troop, which caused the defenders of Wing City to not have time to think clearly when they were attacked by the soldiers.

Before they could even take out all of the city defense equipment in the warehouse, the powerful and fearless special forces of the Star Moon Army seized control of the city gate.

The gates of Wing City opened, and the main force of the Starmoon Troops entered the city without any obstruction.

Most of the defenders of Wing City who realized that they had lost the battle immediately raised their hands and surrendered. A few who resisted violently were killed on the spot.

After taking over Wing City, the Starmoon Army assigned 100,000 soldiers to guard the city. As a backup, they firmly controlled the entrance of the

Starmoon Army from the North Ice River. The remaining 400,000 soldiers carried enough food and grass and continued to rush toward Jincheng, which was further east.

In Ding Yi’s battle plan, the most important thing to execute was the lightning tactic.

They were prepared to use the fastest speed to cause the greatest damage to the defenders of the Great Zhou's northeast region. Only by stirring up the entire northeast could the Star Moon Army gain a firm foothold here.

Otherwise, whether it was the Great Zhou turning around to attack the Star Moon Army or the Great Qi taking this opportunity to further annex the land of the Great Zhou, it would not be a good thing for the Star Moon Army.

In the following period of time, the Star Moon Army launched a blitzkrieg.

The first to break through was the target of this trip: Jincheng.

Jincheng's situation was similar to Wing City's. In terms of military strength, it was even inferior to Wing City. After all, Wing City was heavily guarded by the imperial court, and the target of defense was the Star Moon Army.

Thus, the soldiers of Wing City were still able to put up some defenses.

Jincheng was the last town in the northeast. Under normal circumstances, it would not be exposed to the flames of war.

Even if they were prepared, it would be against Da Qi in the east..

Chapter 542: Lightning Battle, Shocking the World!_3

The sudden appearance of the Star Moon Army had caused all the officials and soldiers in Jincheng to collapse.

After taking down Jincheng, the Star Moon Army had a second base. The army's vanguard became more and more unstoppable. In just half a month, they had taken down eight cities in a row. Seven of them were medium-sized cities, and only one was slightly larger.

The Star Moon Troop didn't stay in these cities, nor did they station troops in these cities. They just swept away the provisions and weapons in the barracks and left without stopping.

After all, for such a small city, it was fine if the city walls were not high, but they had been in disrepair for a long time.

There was no way to defend at all.

Only big cities like Wing City and Jincheng, which had a certain military strength, could allow the Star Moon Army to station there.

With these two cities, the Star-Moon Army would have the initiative in the war in the east.

They could occupy Jincheng and encroach on the entire northeast.

You can return to Wing City and return to North Ice River Town by boat.

He had truly achieved the ability to attack and defend.

When Jincheng was breached.

Prince Yu, who was still at the front line fighting against the Great Qi, finally realized the abnormality.

The Starmoon Troop would block the retreat route of the city before attacking, and all the courier soldiers who wanted to escape the city to send messages were basically intercepted.

Therefore, the news of the rear being attacked had not been exposed until now.

The reason why he had attracted Prince Yu's attention was because he had discovered that two of the grain transportation routes within the pass had been inexplicably cut off. It was fine if he had not seen the grain, but he had not

even sent a word over.

Prince Yu, who discovered the abnormality, immediately sent people to the two roads to investigate.

It would be fine if they did not investigate. Once they did, news that shocked the entire Great Zhou would inevitably spread!!!

The Star-Moon Army rode their warships down the North Ice River and conquered Wing City. A few days later, they swiftly conquered Jincheng. When this news spread, all the citizens of Great Zhou were shocked.

His eyes widened and he was speechless for a moment.

Even the other countries that had their brains beaten up had turned their attention from their own domestic wars to this matter.

"What's going on? Hadn't the Star-Moon Army been licking their wounds in Northern Ice River Town?"

"Heavens, why do they dare to attack the northeast of the Great Zhou? Did they not know that the northeast was the exclusive territory of the Great Zhou?"

"I feel that Northern Ice River Town has really lost their minds this time. Are they using the power of the northwest to stir up trouble between the Great Zhou and Great Qi?"

"He is indeed bold enough to say what he should say. I just hope that Li Yueming won't regret this decision!"

After the news spread.

The whole world is discussing about the news of the news.

Most of the onlookers could not understand the Starmoon Army's behavior.

After all, from their point of view, it was already good enough that the Great Zhou did not find trouble with Li Yueming. Northern Glacier Town had not had enough time to secretly develop, so how could they take the initiative to send troops to invade the northeast?

Could it be that Northern Ice River Town had already expanded to the point where they wanted to use the northwest to resist the power of the entire Great Zhou?

Of course, there were also people who had keenly captured a deeper level of information in this war.

The Star Moon Army had actually conquered so many cities in the northeast in just a month and a half. Were they even stronger than they were a few years ago?"

"Northern Ice River Town hasn't revealed any news for many years. Now that they've suddenly sent out an army, they definitely can't have lost their minds."

"Now, not only is the Great Zhou at war with the Great Qi, but it also has to support the Great Tang in the south to resist Great Qin. It is currently at its weakest. Back then, the Great Zhou was unable to break through Northern Ice River Town, so wouldn't it be even more difficult to resist now?"

"If Northern Glacier Town can resist the counterattack of the Great Zhou and firmly hold on to the current foundation, I can already see the rise of a seventh country other than the six countries!"

Outside, the wind and rain were ethereal, and countless countries were looking at the Great Zhou.

The capital of the Great Zhou Dynasty.

In the imperial palace, the furious Zhou Tianzi smashed a precious vase that he liked very much. He roared at the eunuch below,""Find people and mobilize all the soldiers that can be mobilized from Dragon Subdue Pass, Tiger Subdue Pass, and Futian Pass. Reorganize the army and attack Northern Ice River

Town as quickly as possible!"

"In addition, bring all the Dragon Tiger Army soldiers that can be mobilized in the northwest! "

"This group of traitors dares to touch the land of the northeast. I will make them completely alone!"

He roared and gave the order.

The emperor finally managed to calm down.

He glanced at the bamboo forest not far behind him. His expression changed for a long time before he finally braced himself and walked in.

This time, he had already made up his mind. Not only would he kill Li Yueming, but he would also bury the entire Li family with him!

Chapter 543: Li Yueming's Bloody, Furious Li Ruxing!_1

Northern Ice River Town, Star Moon Army Headquarters.

Looking at the Great Zhou soldiers who were constantly gathering at the front lines of Dragon Subdue Pass, Tiger Subdue Pass, and Futian Pass, the entire Star Moon Army smelled the scent of a storm.

However, after the news reached the main tent, Li Yueming was still very calm.

Perhaps the Great Zhou had countless opportunities to defeat the Star Moon Army in the past.

But at that time, they had missed so many opportunities.

Now that Northern Ice River Town had grown, unless the guardians of the Great Zhou Dynasty who were above the Nirvana Realm appeared, the chances of the army destroying the Star Moon Army and Li Yueming on the battlefield were very slim.

Therefore, when he heard that the Great Zhou was mobilizing their forces to clear out North Glacier Town, Li Yueming did not show any signs of anxiety. He did not even leave his tent.

Currently, the command of the entire Star Moon Army in Northern Ice River Town was basically in the hands of a few reincarnators.

Under normal circumstances, if there was nothing wrong with Li Yueming's brain, he would not give such great power to a reincarnator who liked to be a traitor.

However, the situation was clearly different now. The group of reincarnators behind him saw the hope of the Star Moon Army unifying the world.

He became extremely loyal.

The northwestern region was famous for being barren, but the land was quite vast. In the past, due to the extreme cold, the bitter cold land was not valued. However, under the joint research of several beast tamers, the variety of food that could be grown in Northern Ice River Town was increasing.

As long as he planted food in a scientific manner.

Occupying two places in the northwest, North Glacier Town could support a large population.

With a large population and more armed soldiers, the Star Moon Army might be able to defeat the other countries and claim the world.

Therefore, at this moment, many reincarnators wanted to immediately defeat the Great Zhou and let the Star Moon Army occupy more fertile land. They wanted to do their best to complete the most difficult ultimate mission.

Under the encouragement of this premise, the reincarnators naturally could not drop the ball at such a critical moment.

Therefore, Li Yueming had already understood a long time ago that the reincarnators could become the sharpest knives in the hands of the 'chosen ones'. As long as they were used well, they could help Li Yueming settle everything inside and outside his ability.

.0.

Less than ten days passed.

Other than the necessary forces to guard the pass, all the other military forces of Dragon Subdue Pass, Tiger Subdue Pass, and Futian Pass were mobilized. The military forces of the entire Great Zhou's northwest region gathered together and formed an army of more than 500,000 soldiers that rushed towards Northern Ice River Town.

The Great Zhou was not doing well either.

The south would have to spend a great deal of money and food to support the besieged Great Tang. In the north, they still had to face the covetous Da Qi. The entire country was preparing for war, and countless soldiers were lined up on the border.

However, in this situation where many parties were fighting, the northwest frontline was still able to mobilize 500,000 troops despite going crazy.

It had to be said that the Great Zhou's foundation was still very rich.

Under normal circumstances, it would be wishful thinking to use 500,000 troops to attack Northern Ice River Town.

However, the main force of North Glacier Town had already entered the northeast region along the river. In order to organize the most elite soldiers, even a lot of the Western Garrison Army from the Western Garrison Pass had been taken away.

Thus, the headquarters of North Glacier Town should be very weak.

The emperor ordered the entire northwest army to gather in the shortest time possible. His goal was to take advantage of the fact that the main forces of Northern Glacier Town were out to uproot the town that had lost its main forces.

Even if they couldn't take down Northern Glacier Town, they would still be able to do so.

Suppressing the main forces of the Star Moon Troops from Wing City and Jincheng, leaving the northeast and returning to Northern Ice River Town to provide support was also a good thing.

After all, these two cities were too important to the northeast.

Wing City was the best place to stop the Star Moon Army from attacking the northeast of the Great Zhou Dynasty. Now, it had been broken through by the Star Moon Army before they could even build a checkpoint. If they could not take it back, the entire northeast of the Great Zhou Dynasty would be like a sieve, allowing the Star Moon Army to come and go as they pleased.

Jincheng's location was even more crucial. Jincheng was located in the heart of the northeast.

The surrounding area was not only one of the grain-producing areas of the Great Zhou, but it was also the supply line for the army fighting against the Great Qi in the northeast.

The Star Moon Army controlled this city. Not only could they attack and defend, but they could also cause irreparable damage to the Great Zhou Dynasty at any time.

At present, the northeast army was fighting with the Qi army, and they could not spare many people to put out the fire.

Moreover, the Star Moon Troop had plundered a large amount of food and grass from all over the place, so it would not be easy to defeat them.

Therefore, the emperor's first reaction was to surround Wei and save Zhao. He would use North Glacier Town to force the Star Moon Army in the northeast to retreat.

From all angles, there was nothing wrong with this plan.

After all, the current Northern Ice River Town was indeed very weak. The original 800,000 troops stationed in the northwest had been mostly taken away by Ding Yi, leaving only 300,000 soldiers guarding the city.

Among these 300,000 troops, there were still many new recruits. They were more watery and did not have high combat strength.

The Great Zhou's 500,000 troops were all elite border troops stationed in the three passes in the northwest. Although their numbers did not exceed twice the number of soldiers in Northern Ice River Town, the difference in combat strength between the two sides was still not small.

But the problem was that although the quality of the 300,000 troops was not good, they had the geographical advantage of defending the city.. How could they be so easily broken through?

Chapter 544: Li Yueming l s Bloody, Furious Li Ruxing!_2

This time, the person in charge of leading the entire Northwest Great Zhou alliance army was a reincarnator named Liu Fei.

This was the second batch of reincarnators who dared to challenge Li Yueming after the reincarnators who attacked Northern Ice River Town more than ten years ago and were killed by Li Yueming. He was also the current leader of the Great Zhou reincarnators.

The emperor had handed the army over to him to lead. Clearly, he had taken a fancy to Liu Fei's talent and talent in commanding. Otherwise, based on his qualifications and official positions, it would be difficult for the current reincarnators to undertake such an important mission.

After assembling the army, Liu Fei arranged the many reincarnators under his command into a few elite troops so that they could be coordinated when they fought.

After the previous defeat, the entire Great Zhou seemed to be much more cautious this time.

Along the east of the Hidden Dragon Valley, several grain routes were added at the first moment to prevent the tragedy of the Star Moon Army cutting off the grain routes from happening again.

Although the increase in the number of roads for transporting grain would lead to an increase in the loss of grain on the road.

But at the very least, Northern Glacier Town would not be able to cut off the army's rations as easily as last time.

For many reincarnators to be so cautious, one could imagine how serious the blow Li Yueming had given them last time was.

Now, Li Yueming had become a popular figure in the entire circle of reincarnators.

He was affectionately known as the ruthless Reincarnator Killer.

After all, in this day and age, it was rare for natives of the same age to kill reincarnators. However, Li Yueming had personally killed several of them. He was simply too monstrous to be measured by common sense.

Very soon, the two sides erupted into a violent conflict in the first city. The Great Zhou knew that the number of soldiers in the Star Moon Army should have exceeded 500,000.

However, no one knew exactly how many there were, except for a few core higher-ups.

Now, a large-scale Starmoon Army had appeared in the cities in the northeast.

According to the initial report, the number of Starmoon Troops in the northeast seemed to be approaching 500,000.

Under normal circumstances, the military power of the North Glacier Town should be very weak.

However, when the Zhou Dynasty army collided with the Star Moon Army guards on the river, the group of reincarnators realized how wrong they were.

The Starmoon Troop not only had more soldiers than they had expected, but their combat strength and fighting spirit were also much stronger than they had expected.

In the first battle, both sides fought for a day and a night. The endless sounds of killing rang out until the next morning.

The reincarnators led by Wang Biao held the city tightly and did not let the Great Zhou alliance army advance.

The news of this battle was quickly spread.

The whole world was in an uproar

As everyone knew, the main force of the Star-Moon Army of North Ice River Town had already taken over Wing City and Jincheng.

This source of information should have been verified repeatedly without any problems.

In that case, Northern Ice River Town should be empty of troops. Why was it able to display such powerful combat strength when faced with the Great Zhou's Dragon Crouching Pass?

At this moment, all the countries in the world felt that something was wrong.

It was clear that Northern Glacier Town was much stronger than they had expected.

If the Star-Moon Army's garrison could really resist the attack of the Great Zhou's Northwest Army without the need for the main force of the Northeast to return to help, then they would have to look at the Star-Moon Army in a new light.

In the future, he would definitely treat the Star Moon Army as an enemy on the chessboard, not a chess piece that could be easily trampled to death.

At least not before using some underhanded methods.

All the countries had to face North Glacier Town.

Under the gaze of the entire world.

The second round of the war between the Great Zhou and the Star Moon Army sounded again.

Unfortunately, after more than ten days, the Great Zhou Army could not even advance an inch into Northern Ice River Town, let alone break through the city. They were firmly blocked by the fearless Star Moon Army at the first city.

This performance made many onlookers extremely disappointed.

To them, the best outcome was that both the Star Moon Army and the Great Zhou would suffer heavy losses.

It would be even better if the Great Zhou could eliminate the Star Moon Troop in advance.

Just as everyone thought that they were going to return disappointed, a shocking piece of news finally appeared on the northwest battlefield.

The Star Moon Army's Commander Li Yueming was cultivating in the tent when he was suddenly attacked by a powerful cultivator. He fled 3,000 miles in one day and escaped into the Hundred Thousand Mountains with heavy injuries. His current status was unknown.

When this news spread, everyone's reactions were different.

Some people exclaimed, some felt pity, and some sneered.

Of course, there were even more people who cheered upon hearing this. They were just short of setting off a few fireworks to celebrate.

After all, to the various countries.

If the Great Zhou Dynasty, which had lasted for tens of thousands of years, was a mature and steady old man with a deep foundation, then the newly developed Star Moon Army and North Glacier Town were just a young boy who had just arrived.

If he had to choose one side to be his enemy.

The various countries would rather choose their old rival, the Great Zhou, than face the energetic Star Moon Army that did not care about martial ethics.

And now, even though it was not clear who had killed the Star Moon Troop's leader, no one was stupid, especially the upper echelons of the Six Nations. Many of them knew a lot about such unspeakable things.

Although the Star Moon Army was powerful on the surface, they were still too young in front of the unfathomable Great Zhou..

Chapter 545: Li Yueming's Bloody, Furious Li Ruxmg!

Once Li Yueming died, the Star Moon Army would probably collapse.

In the Great Zhou Imperial Palace.

When the emperor heard the news, the gloominess on his face dissipated quite a bit. He forced a smile and said, "What bullsh * t life and death unknown? With that person's help, even Li Tianyou of the Li family would not be able to escape death, let alone a little unfilial son of the Li family!"

Although the current emperor was not very smart, he was not completely muddle-headed.

Therefore, after discovering that the Star Moon Army had completely lost control, he gritted his teeth and chose to find the shadows behind the Great Zhou Dynasty to attack.

He was a feudal lord who had his own fief since the era of the Human Emperor of the Tiandu Clan.

The Great Zhou's national strength had declined over the years.

However, as a country that had lasted for tens of thousands of years, it was naturally impossible for it not to have some real methods.

The reason why he had not used it in the past was because Li Yueming was not worthy.

The emperor paced around the palace. Although his expression was still a little gloomy, he suppressed the fear in his eyes and waved his hand.””Send more secret guards from the Six Guards of the Emperor to the northwest. Also, let the army in the northwest speed up the attack!”

“If I want to see the allied army appear in North Glacier Town within three months, I must force the main force of the Star Moon Army in the northeast back!”

In the northeast wing city, Huang ‘er and Ding Yi received the news from Northern Ice River Town. The expression on each person’s face was so heavy that it seemed like water was about to drip out.

They had already witnessed Li Yueming’s strength.

To be able to throw a reincarnator of the same age by a large margin, his strength was self-evident.

However, in this sudden assassination, Li Yueming did not have the slightest strength to fight back. In just a few breaths, he was already seriously injured by the assassin who secretly attacked. What followed was a one-sided suppression.

Fortunately, Li Yueming’s physical strength was not bad, so he did not die on the spot. He was seriously injured and retreated while fighting, flying all the way in the direction of the Hundred Thousand Mountains.

This was a huge blow to the Star-Moon Army.

Especially at this critical juncture, North Glacier Town was still under attack by the Great Zhou Army, and the main force was out on an expedition. Without Li Yueming in North Glacier Town, the Star-Moon Army was equivalent to losing a spiritual flag.

After a moment of panic.

Huang Li ‘er, who was the deputy general of the army, said,””What should we do? Should he return to Northern Glacier Town or stay here?”

Ding Yi tore up the document and lit it on the oil lamp. After a long silence, he turned his head and said, “There’s no rush. Let’s ask about the situation in Northern Ice River Town first!”

Now that the situation in the northeast was great, Ding Yi was unwilling to give up this hard-earned opportunity.

After all, they had caught the Great Zhou army in the northeast by surprise this time, so they could easily take down two target towns.

However, if they retreated this time, they would undoubtedly have to pay the price of blood the second time.

Huang Li ‘er thought for a moment, hesitated for a moment, then nodded and said, “”I’ll get someone to ask immediately. You should prepare yourself. If they really can’t hold on, we’ll put aside the battle results in the northeast for now. After all, as long as there’s life, there’s hope!”

Ding Yi's expression was extremely ugly. As long as there was a way, he would not be willing to give up this excellent opportunity.

He gritted his teeth.

Unable to take it anymore, he could only smash the table with a heavy punch.

In the end, he nodded helplessly and said, "Alright! ""

North Glacier Town.

A few hours ago, the entire North Glacier Town witnessed the bloody scene of Li Yueming.

A huge black hand appeared in the sky.

With just one palm strike, Li Yueming was sent flying thousands of meters in the air.

The citizens of Northern Ice River Town who witnessed all of this shivered. Only after the main battlefield was far away did everyone realize what had happened.

Suddenly, the entire North Glacier and even the northwest region fell into a deathly silence. No one knew how heavy Li Yueming was in the hearts of these people.

Now, he was watching Li Yueming bleed all the way.

However, they could only stand by and watch, unable to stop him. Countless people were so angry that they scratched their fingers.

At this moment, the Star Moon Army headquarters was also silent.

All the soldiers of the Star Moon Army gripped their weapons tightly. Many of them even had tears in their eyes.

They were the closest to Li Yueming.

It was also the most powerless.

When the black hand suddenly fell from the sky, the soldiers of the Star Moon Army were still patrolling.

No one noticed this sudden phenomenon.

By the time they came back to their senses, Li Yueming had already escaped.

There were nearly 100,000 soldiers present, but they could only watch Li Yueming retreat under the attack of the black hand. They could only watch as the wounds on his body increased and his injuries became more and more serious.

What kind of powerlessness was this?

The soldiers of the Star Moon Army did not know.

They only felt a ball of fire burning in their hearts, incomparable anger burning in their chests.

However, looking around, there was not even an enemy to vent on.

After regaining their senses, the entire Northern Ice River Town was stunned.

Even the Star Moon Army was in an uproar.

If he did not control it, it would not be long before the entire northwest region would be in chaos.

Almost all of the higher-ups in the Star Moon Army were not in the headquarters. Ding Yi and the others led the army to the northeast, while Wang Biao and the others fought with the Zhou army at the southern pass.

Thus, the Star Moon Army, which was originally filled with talents and stars, was now in a state of chaos.

But now, they couldn't even find a backbone who could take charge of the overall situation.

It couldn't be helped. After such a long time, the sense of security that Li Yueming had brought to the Star Moon Army was too much.

No matter when, no matter what happened.

As long as Li Yueming stood there, everyone was confident that they would win.

But now, Li Yueming had suddenly been assassinated, and it was unknown whether he was dead or alive. This had left the entire Star Moon Army and Northern Ice River Town in a daze, and they did not know what to do.

Just as the chiliarchs were looking around anxiously.

In the tent of the central army.

Li Ruxing woke up from her cross-legged position and opened her cold eyes.

He silently put on his armor and helmet.

When he opened the tent, he bumped into a few anxious chiliarchs.

The moment they saw her, the anxious expressions on the chiliarchs' faces immediately eased a lot. In this kind of situation where the building was about to collapse, the most taboo was to become a headless fly without a mind of its own.

Now, they had finally found a person in the Star-Moon Army who could take charge of the overall situation.

Although Li Ruxing was a woman, she was still Li Yueming's biological sister. In addition, she had also led an army to battle, so she was quite prestigious in the army.

A few chiliarchs went up to him and prepared to report the current situation to Li Ruxing.

Li Ruxing waved her hand and interrupted their son-in-law. She took the lead and said, "General Li has already made arrangements for this matter. He will be fine, so please calm down!"

Seeing her indifferent face, as if what had just happened was not a big deal.

The chiliarchs were stunned for a moment before they immediately felt relieved.

They couldn't understand how Li Yueming knew and arranged this series of things in advance.

However, compared to the worse outcome.

They were obviously more willing to believe everything Li Ruxing said.

After all, Li Yueming was a god-like existence in their hearts. It was entirely possible for him to predict the opportunity ahead of time.

Li Ruxing glanced at them. After seeing that the panic on their faces had dissipated, she continued expressionlessly, "Pass down my order. Immediately organize the three armies and prepare the warhorses. Before nightfall, all the soldiers of Northern Ice River Town must follow me to the expedition!"

"The strategic targets are Dragon Subdue Pass, Tiger Subdue Pass, and Futian Pass!!!"

"We must make the Great Zhou pay the price in blood. We must let all the people with ulterior motives in the world see the consequences of bullying my, Li Ruxing's, younger brother!"

Chapter 546: The reaction of all parties, bloody revenge!_1

Li Yueming had shed blood in North Ice River Town, and he had fled thousands of miles away.

After this news spread, the whole world was in an uproar.

According to the battle situation that had been spread previously, under normal circumstances, it seemed impossible for the Great Zhou to break through Northern Ice River Town with the forces of Dragon Subdue Pass and Tiger Subdue Pass.

Therefore, at the beginning, almost everyone thought that this war would eventually develop into a long tug-of-war. Northern Glacier Town and the Star-Moon Army might even become famous because of this war.

Even in the Six Nations, they would occupy a place.

He did not expect that at this critical moment, news of the assassination of the general would spread.

Therefore, after hearing this news, almost everyone's reaction was that Northern Glacier Town was probably completely finished this time.

After all, the Star Moon Army was fighting on two sides. The Great Zhou Army was attacking day and night in the south, and the elite troops of the headquarters, North Glacier Town, had already been sent out.

They were in an awkward situation.

If something happened to the commander, Li Yueming, the entire Star Moon Army would collapse.

Without the commander, the central government would not be able to give accurate orders.

The various forces within the Star-Moon Troop would also be swayed. If things went wrong, there might even be a fierce internal political struggle for power.

Not to mention the soldiers at the bottom.

When they heard the news, they would probably be even more anxious.

Under such circumstances, most armies would scatter in a hubbub. Even if the Star-Moon Troop was an elite, they could still maintain their combat effectiveness under such circumstances. They could already be considered the elites among the elites.

Therefore, when the news of Li Yueming being hunted down came, the morale of the entire Great Zhou army was high.

The attacks that had slowed down began to become even more intense. Many Great Zhou soldiers scrambled to attack the first defense line built by the Star Moon Army, wanting to be the first to break through the city.

On the other hand, Wang Biao and the others who were defending the city had ugly expressions on their faces.

Looking at the letter in his hand, Wang Biao's face was as black as the bottom of a pot.

Wang Biao and the others did not care about the hundreds of thousands of Great Zhou soldiers under their feet, but this mysterious assassination had truly made them tense up.

He suddenly remembered that this was still a world of individual power.

Although the army was important, it was nothing compared to the Qi Refiners who were at the top of the pyramid.

They were fighting for territory and expanding their military, but in the eyes of a real Qi Practitioner, they were just a bunch of ants the size of sesame seeds fighting for territory.

When the ants did not bite the giant's thigh, no giant would care about the ants searching under their feet.

And now.

The Star Moon Army had already grown to the point where it could pose a threat to the giant Great Zhou.

When they were unable to do anything to the Star Moon Troop in a head-on battle, the Great Zhou Dynasty decisively used a shameless move to attack the Star Moon Troop's weakness of not having a powerful Ki Refiner.

After all, the Great Zhou was just a ruling machine.

The real service was not the machine itself or the people under its command.

Instead, it was to create this machine to exist.

Those people were the true rulers of this world.

The appearance of the Starmoon Troop had challenged the existence of order.

It was normal for them to be targeted and killed.

And this move was indeed very useful. As the strongest cultivator in the camp, Li Yueming was only at the Void Refinement Realm at most. He was still very far away from Nirvana and Ascension.

As long as a powerful Qi Practitioner was dispatched, it would be as easy as flipping his hand to kill him.

He saw the great scene that he had painstakingly built for decades destroyed because of inhuman factors.

It would be a lie to say that the reincarnators were not angry.

However, this wasn't due to human strength. It was purely due to the difference in foundation.

Just like Ding Yi.

While he was angry that he wasn't strong enough, Wang Biao also had doubts about the path of establishing his own dynasty to sweep through the six dynasties and unify the world for the first time.

There were six countries in this world. Suppose that there was a ruler of order behind each of these six countries.

If he wanted to conquer the six dynasties and unify the world, wouldn't he be going against the six rulers of order?

The other party was an old monster who had existed for countless years. No one knew how powerful they were.

However, even if the reincarnators were as monstrous as Li Yueming, they still could not escape the outcome of being killed.

How could he conquer the six countries and unify the world?

This meant that the final quest was no longer a Hell Mode quest. There was no way out!

At least at this moment, whether it was Wang Biao or Qi Fan.

Ding Yi, who was far away in the northeast wing city, had deep doubts about everything he had done.

Should he not have challenged this mission from the start?

Of course, at this stage, it was absolutely impossible for everyone to retreat.

If it was destined that one's efforts would not yield results, then one might as well treat oneself as a shooting star. Even if it was only to illuminate the darkness for a moment, one would try their best to burn everything to bloom with their own light.

Wang Biao did not know what the others were thinking.

But at this moment, he was holding back his anger.

It was for himself, for North Glacier Town, and for Li Yueming, who he had been friends with for a long time.

He was determined to protect Northern Ice River Town behind him, even if he had to drain the last drop of blood in his body..

Chapter 547: The reaction of all parties, bloody revenge!_2

After thinking about the cause and effect, he wrote a letter to Northern Ice River Town, wanting Northern Ice River Town to organize an orderly evacuation of a portion of the people. He also hoped that he could find someone to contact the Little Fox in the North as soon as possible to inquire about Li Yueming's situation. At the same time, he wanted to preserve a portion of the fire for Northern Ice River Town and the Star Moon Army.

However, when he finished writing and was about to send the letter, Wang Biao realized a very important problem.

That was, he didn't even know who to explain his thoughts to.

All the core higher-ups with sufficient means and prestige were not in Northern Ice River Town.

Looking at the entire Northern Glacier Town, it was obvious that they were in a big box.

There wasn't even a core character who could oversee the four directions and control everything.

Wang Biao could already imagine Northern Ice River Town being in a mess, having no place to use its strength.

His hands and feet instantly turned cold, and the coldness in his heart seemed to drip out.

At this time, if Wang Biao was a politician who coveted power.

Now, the most urgent thing was naturally to return to Northern Ice River Town and seize the power vacuum that was temporarily vacant after Li Yueming left.

However, Wang Biao did not even want his life anymore. He was naturally not interested in power at all.

Now, the first line of defense could not be separated from him. After all, the soldiers were able to hold the line of defense because he was here. He patrolled the city walls every day, telling everyone that the Star Moon Army and Northern Ice River Town had not fallen.

Therefore, after thinking for a moment.

His first reaction was to prepare to send back the reincarnators who had the ability and prestige under him. Even if he could not accept all the power, he could at least let Northern Ice River Town find a backbone.

However, just as he was about to give the order.

However, one of his subordinates hurriedly ran over.

Wang Biao suppressed the chaos in his heart and said with a cold face, "What is

The soldier's face was covered in sweat. After taking a few breaths, he hurriedly said, "King... General Wang, Bei Binghe has ordered our army to hold their ground and delay the Great Zhou soldiers as much as possible!" Hearing this order, Wang Biao was stunned for a moment.

It was good to have orders.

But where did this order come from?

If it was in the past, there was naturally no need to doubt it.

But now, Wang Biao had to be cautious.

Before he could ask, the soldier had already said, "Before General Li left the tent, he had made arrangements. Now, the power of Northern Ice River Town has been taken over by General Li's sister, Li Ruxing. This order was passed down by General Li Ruxing... She also said, "Please hold back the Great Zhou soldiers under the city. She wants the world to see the anger of Northern Ice River Town and the Star Moon Army. This is the specific letter. Please take a look! ""

Hearing this, the suspicion on Wang Biao's face did not dissipate. Instead, it became even more serious.

The assassination was so sudden.

It was impossible for the Great Zhou to reveal any news in advance.

Moreover, since he had sent someone to assassinate Li Yueming, it was impossible for him to fail under normal circumstances.

Li Yueming was a Void Refinement Realm Qi Refiner.

To be on the safe side, the Qi Practitioners sent by the Great Zhou would probably have at least divine apertures and above.

Under such circumstances.

Li Yueming basically had a narrow escape.

How could he have arranged everything in advance?

After a short silence, Li Ruxing's appearance appeared in Wang Biao's mind.

There was not much interaction between the two of them.

After all, Wang Biao was the leader of the reincarnators from the foreign faction. He had his own small group.

Naturally, he had no intention of interacting with a native like Li Ruxing, who was also Li Ruyue's family.

However, Li Ruxing had left a deep impression on him when he went into battle.

At that time, almost all the reincarnators had the same evaluation of Li Ruxing.

This was a very special woman.

Not only did he possess extremely strong individual strength, but he also had extraordinary courage and battlefield acumen.

It was as if she was born to be a valkyrie on the battlefield.

If other reincarnators had seized the rights of Northern Ice River Town, Wang Biao might still have some misgivings.

After all, reincarnators were all snitches among snitches.

It wasn't uncommon for them to seize the opportunity to kill their own kind.

Although the many years of harmonious co-existence in Northern Ice River Town had allowed the reincarnators of the Star Moon Army to have a certain level of trust, Wang Biao really did not dare to place all his hopes on the fact that the other reincarnators who had power could behave themselves.

And now, Li Ruxing controlled Northern Ice River Town.

Although he was a little stunned at first, this was not completely unacceptable to Wang Biao. At least Li Ruxing was Li Yueming's biological sister. The blood relationship between the two was enough to bind the common interests of both parties.

Therefore, after a long silence, Wang Biao temporarily acknowledged Li Ruxing's current status.

After taking out the tightly wrapped letter from the soldier's hand, Wang Biao said solemnly, "I understand. Immediately arrange for someone to send a message. In addition, I also have a letter here. Give it to General Li Ruxing!" After the herald went down to report.

Wang Biao opened the secret letter that Li Ruxing had given him. After a rough glance, even though Wang Biao was knowledgeable, he was shocked by the contents. He could not help but mutter in amazement, "As expected of General Li's sister... Just this courage alone was not something an ordinary person could have!"

He sighed in amazement for a moment.

Wang Biao carefully read Li Ruxing's letter.

After reading through each line, his eyes gradually lit up.

If this plan could be carried out smoothly, then the Great Zhou might really pay a bloody price for their actions a few days ago!

Chapter 548: The reaction of all parties, bloody revenge!—3

West Garrison City.

After receiving the relevant news, the entire Western Garrison Army fell into a dead silence.

Li Ruyue's eyes were already red.

Li Nanfeng's face remained as dark as water.

After a long while, Li Nanfeng crushed the letter into ashes and said through gritted teeth, "Great Zhou, I, Li Nanfeng, have spent most of my life protecting my family and country. Now, you're

using such lowly methods to deal with my son. Are you bullying my Li family because we don't have anyone?"

On the surface, the rise of the Li family seemed to have originated from the efforts of several generations of family heads.

But in reality, the family's hard work was important.

But how many people in the world worked hard?

Why didn't he see the favor of power and status fall on them?

The fundamental reason was that the Li family had a powerful ancestor.

In the world of individual power, because it could produce the soul of the army, the army was also very important.

However, for those extremely powerful 00 Refiners, weren't the armies just chess pieces that they could manipulate at will?

Putting aside the fact that there had never been a Qi Refiner who could threaten the Nirvana and Ascension realms in this world, such a thing only existed in the ancient books with the longest history.

So what if this kind of army really existed?

They still couldn't escape the control of powerful Qi Practitioners.

Therefore, the lowest level of logic in this world was still that individual strength was greater than the heavens.

Only if one's individual strength was strong enough to enter the circle that set the rules.

Only then could they possess the qualifications to divide the world.

Otherwise, the weak would climb up the stage through the rules set by the strong, but in front of the strong who set the rules, they would never be able to escape the embarrassing situation of a clown.

After so many years, the world had almost forgotten the existence of this group of hidden experts who had set the rules.

Until today.

Because of the appearance of Li Yueming, an ant who dared to shake the authority of the ruler, they suddenly revealed their fangs.

However, don't forget.

The reason why the Li family could have its current status was because of an ancestor who could barely enter the core circle!

Now that the emperor dared to bully the Li family, he would definitely suffer the Li family's crazy revenge.

Just as Wang Biao, Li Nanfeng, and the others were making their own moves, the bold Li Ruxing had already led the army to detour more than a thousand miles away from Northern Glacier Town.

This time, she had mobilized all the troops in Northern Ice River Town that had combat power.

In order to speed up the march, Li Ruxing only allowed the army to bring enough food for three days, except for weapons and armor. The rest of the food could be transported to other towns to be replenished.

At this moment, the results of Northern Ice River Town's Great Blessing King's Path in governing the two northwestern regions were showing their effects.

When the Starmoon Troop passed by towns and villages, faced with the sudden appearance of this huge army, not only were the people not afraid after seeing the flag, they even took the initiative to take out the surplus food in their homes and give it to Li Ruxing.

Li Ruxing did not stand on ceremony. After getting someone to write the IOU, he continued to march without stopping.

Just like that, the Star-Moon Army borrowed food and fodder from all over the place. The one-month journey from North Glacier Town to Tiger Subdue Pass was shortened to fifteen days.

On the 15th day, the Star Moon Troop had already sneaked to a hundred miles away from Dragon Conqueror Pass.

At this moment, the people inside and outside the Great Zhou Imperial Court thought that the Star Moon Army was in chaos.

The entire northwest region was about to be taken in by them again!

Who would have thought that before North Ice River Town could become chaotic, Li Ruxing had already suppressed it with his own strength. Now, he had decisively dispatched more than 100,000 troops to touch under their feet.

Dragon Crouching Pass was a pass that could be blocked by ten thousand people.

It was the most stable line of defense against the outside world in the Great Zhou Dynasty for tens of thousands of years.

More than 20 years ago, Great Qin had also left 100,000 or so corpses here, but they had not been able to take down Dragon Crouching Pass. In the end, they had still managed to take down Futian Pass by surprise, and in the end, they had changed their path and entered the Central Plains.

But now, Li Ruxing had brought the Star Moon Army here.

Furthermore, they were prepared to use an army of over 100,000 to take down this super impregnable pass that even a million soldiers could not do anything about.

The soldiers of the Star Moon Army came from afar.

On the way, he did not dare to stop for a moment under Li Ruxing's spurring.

Now that they had arrived at the city, Li Ruxing did not urge them anymore. He told the soldiers to take time to rest and eat and drink. They were not even afraid of eating all the food on them.

To be able to follow Li Ruxing here.

To be honest, this group of Star Moon Army soldiers had come with the intention of dying.

The Great Zhou sent powerful cultivators to assassinate Li Yueming. They could only watch helplessly but could not stop it. Now, they followed Li Ruxing here to avenge Li Yueming.

Even if they had to be smashed into pieces, they would let the world see the wrath of the Star Moon Army!!!

After everyone had eaten and drunk their fill, looking at the towering city wall, Li Ruxing conveyed her first strict order since she took over as the commander of the Star Moon Army. She said, “The dog emperor of the Great Zhou has sent more than half of the soldiers from Dragon Subdue Pass, Tiger Subdue Pass, and Futian Pass to attack North Ice River Town. Now, the strength of these three passes is unprecedentedly weak. If we can take these three passes in one go, the entire Great Zhou will lose at least one-third of its territory. This is the price they have to pay for assassinating my brother!”

Hearing this, the soldiers all revealed a trace of confusion.

The importance of Futian Pass, Dragon Subdue Pass, and Tiger Subdue Pass to the Great Zhou was self-evident.

However, the problem was that none of these three passes were easy to deal with. In the long river of time in the past tens of thousands of years, who knew how many bloody storms they had experienced, they still stood firm.

With just a hundred thousand of them, it was already very difficult for them to even climb the pass.

How could they possibly seize three passes?

However, just as the soldiers did not know what expression they should use to face this, the thick and sturdy city of Dragon Crouching Pass not far away suddenly opened up from the inside.

Chapter 549: The Spirit of the Army (1)

The soldiers below the Dragon Crouching Pass looked at the majestic pass that was as tall as a natural moat not far away, and their expressions revealed some doubt.

Since ancient times.

Dragon Subdue Pass, Tiger Subdue Pass, and Futian Pass were known as the strongest defense lines in the northwest of the Great Zhou Dynasty.

It guarded the peace of the entire northwest region of the Great Zhou Dynasty.

Ever since these three impregnable passes were built, countless kings, generals, and armored soldiers had been buried here. Their blood stained the entire land, and even the soil below the passes was red.

But now, under Li Ruxing’s leadership, they were prepared to attack such a world civilization pass with only a hundred thousand soldiers.

If word got out, it would be more ridiculous than an ant trying to bite an elephant to death.

If Li Ruxing wasn’t Li Yueming’s sister, and they were already prepared to sacrifice themselves.

By now, the soldiers would have already mutiny.

Just as the soldiers were about to raise their questions, a group of people suddenly appeared.

Not far away, there was an incomparably tall city wall...It suddenly opened without any warning.

Along with the rumbling of spiritual energy, the thick chains slowly lifted the huge gate that was more than ten meters wide and weighed hundreds of tons, revealing a broad road into the city.

When the soldiers saw this scene, their first reaction was to think that they were hallucinating.

However, no matter how much they told him that this was not true, the thick city gate not far away was just exposed there, without the slightest movement.

Li Ruxing seemed to have expected all of this.

The moment the city wall opened, she immediately rushed out. Seeing that the soldiers were still in a daze, she couldn't help but shout,"Break the city with me!"

Her voice was clear and loud.

It was like a clear spring or a bell that struck the hearts of all the soldiers of the Star Moon Army.

Only then did the soldiers of the army come to their senses. Looking at the Dragon Crouching Pass, which was not far away, with its gates wide open, everyone's eyes lit up.

More than ten days ago, a mysterious Qi Refiner appeared in Great Zhou to assassinate Li Yueming.

When the entire Starmoon Troop heard this news, they didn't know how they felt.

However, no matter how the others felt, the Star Moon Troops who were willing to follow Li Ruxing here had the same thoughts.

Since ancient times, blood debts could only be repaid with blood.

The Great Zhou sent powerful cultivators to assassinate Li Yueming.

Thus, these soldiers would have to use their own methods to repay this debt of blood.

Previously, they had failed to find their target, causing them to have nowhere to vent their anger.

Now, they were following Li Ruxing, but they had witnessed with their own eyes that the solid pass that they had never been able to break into had opened its door to them.,

"Creak, creak, creak..."

The chains were thick and ancient, and they looked rusty. At this moment, they were pulling the city gate open inch by inch.

The rumbling cavalry was rapidly approaching.

In order to rush into the city at the fastest speed, Li Ruxing had brought all the warhorses in the entire Northern Ice River Town this time. He had also given up almost everything on the horses except weapons.

Now, her decisions played a crucial role.

The horses of the Starmoon Troop were like sharp arrows.

He tore through everything and moved forward rapidly.

The opening and closing of the city gates would not take too long. They had to seize this fleeting opportunity to charge into the city at all costs.

One kilometer...

Five hundred meters...

Fifty meters...

The soldiers of Dragon Crouching Pass heard a sudden movement beneath their feet.

They immediately blew the war horn and entered the highest level of battle preparations.

However, the first reaction of the soldiers was to defend the city, but they never thought that the gate of Crouching Dragon Pass would be opened from the inside without warning.

No one was prepared for this.

He could only watch as the morale of the army that had appeared out of nowhere was high. They charged into the city of Dragon Crouching Pass with an indomitable attitude.

Of course, the Dragon Crouching Pass had stood tall for so many years, so it was naturally impossible for it to be broken through so easily.

In terms of the most important city gate, there were three elite troops stationed at the Dragon Conqueror Pass. Each soldier was at least a True Form Realm cultivator.

These three troops were in shifts 365 days a year to guard the safety of the city gates.

Under normal circumstances, each elite troop in charge of the city gate would have about eight people.

Eight Qi Refinement Realm cultivators at the True Form Realm and above could even resist a Void Refinement Realm Qi Refinement Realm cultivator.

Of course, if one thought that only these three troops were guarding the main military route of the Dragon Conqueror Pass, they would be gravely mistaken.

There was only one Guiyuan realm cultivator above the three elite divisions who was responsible for the safety of the city wall.

However, it was naturally impossible for this Guiyuan realm cultivator to really guard the city gate every day. He spent most of his time stationed on the cultivation platform specially set up for them in the city.

They would only attack when they encountered Qi Practitioners of the Returning Origin Stage who wanted to open the city gates.

Under normal circumstances, according to the mutual understanding between cultivators, the two of them would be able to form a connection.

Qi Practitioners who were above the Returning Origin Stage would not attack in such a place.

After all, when a Ki Refiner's strength reached a certain level, even if the army had a military soul, they could still cause a great deal of damage. At the extreme, they could even resist the charge of tens of thousands or even hundreds of thousands of troops by themselves..

Chapter 550: The Spirit of the Army (2)

It was like a meat grinder on the battlefield.

These Ki Refiners would usually be invited to set the rules and not personally break the rules.

But now, the gate of Dragon Crouching Pass had suddenly lost control. Naturally, one of the three elite troops had encountered a problem.

To be able to kill all eight Qi Practitioners at the True Form Realm without a sound, without even letting out a sound, it was obviously impossible for the opponent to be at the Void Refinement Realm.

In other words, the enemy had dispatched at least one cultivator of the Returning Origin Stage.

After sensing the sudden movement, the Guiyuan realm cultivators guarding the Dragon Crouching Pass also approached the city gate as quickly as possible. They wanted to close the inner gate of the city wall before the unknown army outside broke into the city wall.

However, he had just left the house.

He saw a figure covered in a black robe.

The cultivator guarding the Dragon Crouching Pass sensed a powerful aura from the other party and could not help but narrow his eyes. "Who are you? Why did he attack for no reason? Aren't you afraid of the endless pursuit of our Great Zhou?"

The black-robed figure did not speak.

He only showed the weapon in his hand.

On the other side.

After the thick city wall was opened, it was not long before it was closed by the guards who regained control of the gate.

However, in just a few minutes, more than half of the Star Moon Army had already rushed into the Dragon Crouching Pass.

Instantly, the entire Dragon Conqueror Pass was in an uproar.

The panicked soldiers raised their weapons, but they did not dare to go down and fight the Star Moon Army.

Normally, this would not have happened.

After all, regardless of whether it was Dragon Subdue Pass, Tiger Subdue Pass, or Futian Pass, the troops stationed there were all the most elite troops from various places.

But now, under the Emperor's order, all the elite soldiers in the front lines of Dragon Subdue Pass, Tiger Subdue Pass, and Futian Pass had been transferred out. Those who stayed were either new recruits who had just passed the conscription order, or the old, weak, sick, and disabled who did not have much combat strength.

Furthermore, 80% of the troops stationed in these three cities had followed the army to the east to attack North Ice River Town. The remaining three cities only had 300,000 soldiers.

In fact, these three passes were so powerful that one man could block ten thousand men.

Even if each city only had an average of 100,000 men left, without an army of 400,000 to 500,000 men, it would be impossible for them to reach the city walls.

Now, in the entire northwest, without the help of the Qin army, other than the Star Moon Army, there was no one who could break through the defense of the Great Zhou.

However, the main force of the Starmoon Troop was still in the Northeast Wing City. Moreover, the commander's life and death were unknown. How could they possibly gather hundreds of thousands of troops?

Therefore, this arrangement was very reasonable.

However, he did not expect that the Star-Moon Army would not care about martial ethics either. They actually directly brought out a powerful Qi Refiner of the Returning to the Origin realm to pull the rug out of Futian Pass.

Li Ruxing had just turned one year old and was still crying for milk. One night, the nanny who was feeding her suddenly found a mysterious token in her hand.

The nanny did not dare to delay and told Li Nanfeng the news.

Everyone in the Li family was alarmed.

However, when they saw the design of the token, everyone was shocked.

That was because the token was left behind by Li Tianyou, the ancestor of the Li family, to control the Seven Kill Token of the hidden guards.

With the Seven Kill Token, one could mobilize the most mysterious and powerful secret guards of the Li family.

Such an important thing had appeared in Li Ruxing's hands.

The Li family was both happy and worried about this.

He was happy that the old ancestor had not passed away. This Seven Kill Order had disappeared for hundreds of years. Now that it could appear in Li Ruxing's hands, it was the best proof.

What was worrying was that this token was of great importance to the Li family, but it had appeared in the hands of a child who was crying pitifully.

However, this was the will of their ancestor after all. The Li family did not dare to disobey. They could only choose to accept it and secretly strengthen the cultivation of Li Ruxing.

Later on, as Li Ruxing grew up.

She began to show all kinds of extraordinary talents.

Ordinary people might have to read it dozens of times to remember the general ancient books, but she only needed to read it once to remember them completely. She could also understand the meaning and make answers or modifications.

Ever since she realized that her talent was different from ordinary people, she began to hide it in front of everyone.

Especially after Li Yueming grew up, he became more and more sharp.

She became even more lazy and low-key.

The Great Zhou might allow the Li family to have a disciple who showed off his abilities, but they would definitely not allow the Li family to have two all-rounder geniuses with heaven-defying talent.

As the heir of the Li family, Li Yueming had too many eyes on him. He definitely couldn't keep a low profile.

Therefore, Li Ruxing took the initiative to hide his sharp side.

He only relied on his own judgment of the situation and secretly used the power of the secret guards to set up a backup plan.

Ever since he heard that Li Yueming had gone to the Northern Lands to become a general, he had been very excited.

Li Ruxing quickly guessed Li Yueming's next intention and immediately set up many backup plans in the northwest.

The Great Zhou would probably never have imagined that the Li family's secret guards would sneak into the key troops of the Dragon Subdue Pass and Tiger Subdue Pass, which would even have their ancestral graves dug up and investigated.

Decades ago, Li Ruxing had planted many seeds.

Now, these seeds had germinated and grown into a big tree.

Under the situation where the natural barrier city was broken.

A group of new recruits and the old, weak, and sick were fighting against the furious Star Moon Army.

One could imagine the outcome of the battle.

After Li Ruxing entered the city, he did not lead his troops to attack the Great Zhou soldiers on the city wall. After all, although the Great Zhou soldiers on the city wall were old, weak, sick, and disabled, even rabbits would bite when they were cornered, not to mention that the Star Moon Army did not have an absolute advantage.

Therefore, Li Ruxing sent people to pile up tall haystacks under the city wall, preparing to burn the city wall and the entire city.

Thick smoke filled the northwest. The Great Zhou soldiers guarding the city walls were devoured by the poisonous smoke and flames, and hundreds of thousands of soldiers were killed.

Li Ruxing was the only one who didn't feel satisfied.

He ordered his men to move out all the gunpowder and siege equipment in the city. After smashing a huge hole dozens of meters wide in Dragon Crouching

Pass, he left with the Stars and Moon Troop who had eaten and drunk their fill.

Dragon Crouching Pass was flanked by tall mountains, so even if the entire city was set on fire, it would not spread far.

Some people in other towns in the southeast might have noticed the abnormality here, but it took time to transmit information. Under the leadership of Li Ruxing, the Star Moon Army was like a bird with wings.

No matter what kind of mountains and rivers they encountered, Li Ruxing could identify them in the shortest time possible.

Since she was young, she had liked to read all kinds of provincial and county annals. Combining the records of mountains and rivers on them, she compared them with the corresponding geomancy maps to determine the geographical situation of the Great Zhou and several other countries.

At this moment, her photographic memory was like a cheat.

No matter where she went, she would never get lost and would always be on the best route.

Under normal circumstances, it would take at least a month for a cavalry to rush from Futian Pass to Tiger Subdue Pass.

However, under the leadership of Li Ruxing, the Star Moon Troop only took thirteen days to arrive.

By the time the Star-Moon Troop arrived at Tiger Subdue Pass, only two-thirds of the scouts who had delivered the news of the fall of Dragon Subdue Pass had left.

After resting on the spot for a day, he ate his fill and slept soundly.

Under the incredulous gazes of all the soldiers of the Star Moon Army...Li Ruxing waved his hand, and the sturdy gate that could withstand the onslaught of a million soldiers for dozens of days was opened with a loud bang!!!

Li Ruxing's hair was casually scattered on his shoulders. His originally handsome face was now filled with a murderous aura. The armor forged from refined iron was covered in specks of blood.

She clamped the horse's belly with her legs, and the scarlet spiritual horse took the lead and headed towards the city gate like a bolt of lightning.

Behind her.

The Starmoon Troop dived toward the city wall in silence as usual.

No one spoke.

One had to know that this was an army of hundreds of thousands of people!!!

Now, other than the sound of breathing and the rapid galloping of horses, there was actually no extra sound!

At this moment.

The killing intent of the soldiers of the Star Moon Army was mixed with incomparable anger, so dense that it was almost tangible!

He looked at the wolf-like and tiger-like troops under his feet.

All the soldiers in the Tiger Subdue Pass were shocked!!!

The general who had just received the news and had yet to react exclaimed, "How is that possible? Where did nearly 100,000 soldiers with military souls come from in this bitterly cold land of the northwest?"
