

Maxing MT 751

Chapter 751: Double Glow Gold Talent, Final Trial!_1

[Name: Li Yueming (Permanent Reincarnator)]

[Reincarnation Number: 7001611]

“Mark of Reincarnation Level: LV4 (20500/30000)”

[Reincarnation Points Balance: 2634105]

[Origin Power: 100 times talent enhancement!]

[Fixed Talents: Infinite Deduction (gold), Perfect Genetic Body (shiny gold)]

[Bound Unique Titles: God of Martial Arts (red), Starlight Preacher (red), Heart Spirit Reader (red), Star-Moon Emperor (gold)]

[Fixed Talent: 3]

” Fixed number of talents: 6 ”

[Additional reincarnations: 8]

[Due to the violent attack of unknown external energy, the energy of the Reincarnation Mark has been severely depleted. This is the final assessment of ‘us’. The Reincarnation Mark will forcefully recruit the reincarnators selected by the target in advance!]

[This reincarnation will be extremely dangerous, and the reincarnation mark may not be able to protect the reincarnator’s safety. Reincarnator, please take care of yourself!]

[Once again, this assessment was opened early due to the serious exhaustion of the Reincarnation Mark’s energy. It is accidental and mandatory. The Reincarnation Mark cannot guarantee safety!]

[If the reincarnator feels that he is not ready to go, there is only one chance to forcefully leave the reincarnation mark. Reincarnator, please consider carefully!]

[The explanation has ended. Reincarnators, please confirm whether to start the assessment!]

Time always slipped through his fingers unknowingly, and three months passed quietly.

This morning, the crisp sound of the Reincarnation Mark appeared in Li Yueming’s mind.

After reading it from beginning to end and understanding the meaning of the mark of rebirth.

The expression on Li Yueming’s face paused for a moment. He slowly opened his eyes and sighed.

Three months ago, when the Reincarnation Mark had just released the mandatory recruitment mission information, he had already felt that this reincarnation was not simple.

Now, it seemed that his guess was very accurate.

This reincarnation was indeed different from the previous ones. The mission had not even begun, but the reincarnation mark was already giving him a heads-up.

He did not know how high the level of the world he was going to was.

Even the Reincarnation Mark took the initiative to express that it could not protect his life.

In addition, he did not know what exactly caused this.

Decades ago, the Reincarnation Shield began to show signs of a shortage of energy.

It was also because of this that the so-called invasion of dark energy had occurred. All kinds of monsters had infiltrated the reincarnation world from an unpredictable space and time, seriously threatening the safety of reincarnators and ordinary people.

This matter was already enough for many reincarnators to suffer.

After all, the main material world was the foundation for reincarnators to transcend the outside world.

Without the protection of the Mark of Rebirth, the entire prime material plane would be corroded by endless Chaos.

No reincarnator could protect themselves in such a calamity.

Now, the chain reaction caused by the lack of energy in the mark of reincarnation was no longer just the collapse of the protective shield of the prime material plane.

It was reflected in many aspects.

Logically speaking, under normal circumstances, all the logic of the Reincarnation Mark should be based on Li Yueming.

After all, this thing was tailor-made for Li Yueming from a certain point of view. The purpose was to let Li Yueming improve as soon as possible and store power for the upcoming cosmic war.

Therefore, the Reincarnation Mark should be the most concerned about Li Yueming's personal safety.

But now, the Reincarnation Mark took the initiative to let Li Yueming try to take the risk.

If he wasn't wrong, this should be a problem in one of the parts of the plan to change the future from the past, which led to the extreme situation before him.

Just as the ten City Lords had said, the exhaustion of the Reincarnation Mark's energy was only one of the manifestations of the truth.

As for what exactly went wrong, the existence behind the Reincarnation Mark of 0 did not indicate it. Even Li Yueming had no idea for the time being.

After roughly understanding the cause and effect of the game, as well as some other related theories, Li Yueming couldn't help but reveal a bitter smile and said, "How cunning. He threw this difficult problem to me to make a choice..."

Wasn't the last 'us' assessment dangerous enough?

However, when he entered the world, the reincarnation mark did not remind him at all.

It was only after Li Yueming found some clues that the Reincarnation Mark stammered out to warn him.

But now, before Li Yueming even entered the reincarnation world, the reincarnation mark jumped out to remind him that it was full of danger.

What did this mean?

This meant that the world where Li Yueming's final assessment was located was likely to have many existences that exceeded conventional understanding. Once Li Yueming stepped into it, he would be in danger of being destroyed from the root.

To put it in simpler terms.

If anything happened, Li Yueming would not be able to return to the main material world through the reincarnation mark and would really die.

The danger involved could be seen from this.

Right now, although the Reincarnation Mark said that it was a forced entry, it gave Li Yueming a chance to refuse.

In other words, he had placed the chance to decide whether he would live or die in his own hands.

Although this inexplicable respect was surprisingly good, it was definitely a difficult choice for Li Yueming.

Of course, it wasn't that he was timid, but the more he understood, the heavier the burden on his shoulders became.

Chapter 752: Double Glow Gold Talent, Final Trial!_2

Going or not going was just a decision he could make with a single thought, but there was too much hidden behind this thought, and it also contained too much. The consequences might even engulf the entire universe.

Therefore, he needed to consider it carefully.

If he chose to protect himself now, his life might be safe.

But what would happen in the future?

If nothing unexpected happened, they would still be unable to escape the fate of the Zergs sweeping across the world.

Even if he lived for a while now, he would not end up well in the end.

Since that was the case, there were no two paths in front of him.

With his personality, rather than struggling to survive and avoid the edge of the battle, it was better to take a risk in the fire. Perhaps he could still kill a possible path out of the impossible.

After thinking about the cause and effect, Li Yueming no longer hesitated.

"Let's start the assessment!"

Hearing his answer.

The Reincarnation Mark paused for a moment before flashing with a blue light.

[Ding! Activating Reincarnation Tunnel!]

[World loaded]

[World loading successful. Planet serial number: **-***!]

[Planet Level: LV10 (Extremely Dangerous)]

[The reincarnator is in the midst of a mystery in the womb. After the initial introduction, you can enter the reincarnation world.]

[Third epoch, end of epoch, fourth epoch, beginning of epoch, the Zerg living at the edge of the universe invaded the central universe on a large scale. The major life races in the central universe could not resist the invasion of the Zerg tide and were defeated!]

[One after another, the starry sky was devoured by the endless insect tide, turning into a hotbed for the insect race to nurture the next generation!]

[In the middle of the fourth era, the major races in the central universe, who felt the danger of extinction, finally let go of their prejudices and vigilance against each other. They formed an alliance called the 'Order Alliance', and began a struggle against the chaotic and disorderly bugs that lasted for several eras!]

[During this period of time, countless supreme experts shed blood in the war, countless dynasties that were once prosperous were destroyed, and endless star fields were shattered one after another...]

[This is an inconspicuous human planet in the Alliance of Order. In the current universe environment where everyone is on tenterhooks, the only thing that the people should be glad about is that they are at the No. 26 defense line of the third universe's Order camp and not at the front line of the battle against the Zergs!]

[However, even though this is just an ordinary planet in the billions of starfields, the dark clouds of war that swept across the entire universe still shrouded over the heads of every galactic citizen.]

“Defend the planet and fight against the insectoids', this is the main theme recognized by 90% of the races in the entire Central Universe!]

[Initial background introduction completed. Randomly drawing talent!]

[Congratulations on obtaining talent: Great Mechanic Sage (red)]

[Great Sage of Machinery (red): You are born with an unparalleled affinity for machinery. Damage dealt by mechanical weapons increased by 300%, efficiency in developing and manufacturing machinery increased by 500%, Intelligence increased by 500%!]

[The 100-fold increase in the origin energy talent has been triggered. The effects of all your talents will be increased by 100 times!]

[Your talent 'Great Sage of Machinery' has been enhanced by 100 times by the origin energy and has been transformed into the green talent 'Machinery God'!]

[Machinery God (shiny gold): You are a natural-born Mechanical God. Damage of mechanical weapons increased by 3000%, efficiency of research and development and manufacturing increased by 5000%, Intelligence increased by 5000%]

[The only special effect of the shiny gold talent: Machinery God]

[You can control all the mechanical components around you to assemble a huge Mechanical Deity. The attributes of the Mechanical Deity are ten times that of your own attributes!]

Originally, Li Yueming was still a little nervous when he saw the background introduction of the world.

According to the information he had obtained from Han Bohan.

His reincarnation this time did not seem to be like the previous reincarnations where he entered an isolated information island world.

Instead, he had officially stepped onto the grand stage of the Stellaris Universe.

This also meant that this time, his growth would completely break away from the limitations of the world itself and reach the peak that the entire universe could tolerate.

Thinking of the risks and opportunities involved, even Li Yueming couldn't help but shudder.

It was also because of this that the World Level, which had been dawdling all this time, had soared from Level 5 under normal circumstances to Level 10!

In the face of such a universe-level world, Level 10 was probably only the upper limit of the reincarnation world that could be set by the Reincarnation Mark. It was not that the universe-level world really only had a Level 10 danger level.

Fortunately, his luck was heaven-defying this time. He actually drew a red talent at once. After a hundred-fold amplification, it evolved into an invincible shiny gold talent.

Otherwise, with just two golden talents, Li Yueming really couldn't guarantee that he could make a name for himself in this world where big shots were everywhere.

Of course, according to the information that Han Bufan had revealed, this so-called shiny gold talent should not be fabricated by the reincarnation mark.

Instead, it was a talent that he would obtain in the future. The reincarnation mark only gave him what he should have obtained in advance in a special form.

But here came the problem.

He was a reincarnator who specialized in personal strength. Would he really be able to use a talent from the Mechanic class?

Just as Li Yueming was doubting his life, the speed of refreshing information in the Reincarnation Mark did not slow down at all.

[Detected that you have advanced administrator authority!]

Chapter 753: Double Glow Gold Talent, Final Trial!_3

[This reincarnation has an additional talent lottery chance and a fixed talent chance!]

[The second talent is being drawn...]

[Talent extraction successful!]

[Congratulations on obtaining talent: Martial Dao Master (red)]

[Martial Dao Master: You are a well-deserved top-notch master in the field of personal power! Whether it was physical techniques or martial arts, whether it was hot weapons or cold weapons, you could use your unique understanding of personal strength to maximize its effects!]

[All attributes increased by 500%, personal strength cultivation technique and secret manual cultivation efficiency increased by 500%, personal martial damage increased by 1000%.]

[The 100-fold increase in the origin energy talent has been triggered. The effects of all your talents will be increased by 100 times!]

[Your talent 'Eminent Master' has been transformed into the green talent 'All-rounded Martial Saint' after being amplified by 100 times the original power!]

[Omnipotent Martial Saint (shiny gold): Your attainments in martial arts can be said to be omniscient and omnipotent. All the power that can be used will be used by you and become the source of your personal power!]

[All attributes increased by 5000%, personal strength cultivation technique and secret manual cultivation efficiency increased by 5000%, personal martial damage increased by 50000%.]

[The rules of this reincarnation world are level 10. Reincarnators can bring five talents into the reincarnation world!]

[Will you bind talents: Machinery God (shiny gold), Almighty Martial Saint (shiny gold), Perfect Genetic Body (shiny gold), Infinite Deduction (gold)?]

The series of messages released by the Reincarnation Mark stunned Li Yueming.

Good heavens, the Reincarnation Mark actually gave him two more brilliant gold talents? It seemed that this world was really dangerous!

Level 10 worlds were supposed to have 5 talents.

If his guess was correct, Li Yueming should have obtained five brilliant gold talents in the final assessment if he followed the guidance of the reincarnation world and took it step by step.

This was not difficult to understand.

After all, the Reincarnation Mark itself was the path that Li Xiyue and the others had specially paved for Li Yueming. From the moment it was created, the program should have been set up.

The Reincarnation Mark would execute the established procedures step by step until a certain time was ripe and the approach point set by Li Xiyue and the others was triggered. Only then would this so-called ultimate assessment begin.

However, there was a problem with the Reincarnation Mark.

The direct result was that Li Yueming's original five talents were not all maxed out.

One of them was even empty.

Thinking of this, Li Yueming didn't know whether to laugh or cry.

Therefore, did Li Xiyue and the others think that so many shiny gold-level talents could not help him develop rapidly and complete a certain goal they wanted to achieve?

However, when he thought of the existence he might face.

The smile on Li Yueming's face faded.

This kind of luxurious talent configuration was enough to dominate the world in any world.

However, Li Yueming was facing the Zerg race, which was known as the 'Cosmic Calamity'.

Who knew how terrifying the other party was? The more top-notch talent, the better!

He threw away all kinds of messy thoughts in his mind.

Li Yueming took two deep breaths and focused his thoughts again.

Out of the four talents, three of them were shining gold grade. The Infinite Deduction talent had become the lowest grade talent.

However, this talent was still unique to Li Yueming.

Now, it was time for this talent to take effect.

It was just that he did not know if this talent could still be accurate in describing the unknown things in the entire universe.

Chapter 754: An Unattainable Dream, Interstellar Martial Arts!_1

According to the general process of entering the world, Li Yueming silently activated the Infinite Deduction talent.

[The mystery of this world's fetus has been solved. Life is being deduced!]

[18 years old: You woke up in the hospital and found out that you are a student of Montenegro City's aristocratic martial arts school. When you reach adulthood at the age of 18, you will graduate from the martial arts school and pass the strict examination to enter the military academy!]

[The graduation date is approaching, but you feel that you don't have enough talent and strength to pass the military academy's assessment...]

[In order to stand out and become a respected Black Star Troop soldier, you began to train hard before the official assessment. This is to pray to the God of Stars to give you a hint of care due to your pious faith!]

[However, I don't know if it's because your thoughts are still not pious enough or because the star field you're in is too remote, but the God of Stars Guardian did not respond to your expectations...]

[A month before the assessment officially began, you even fainted in the training ground due to physical and mental exhaustion. As expected, you missed the assessment of the military academy and lost the opportunity to join the interstellar army.]

[19 years old: You are very dispirited since you did not become a soldier of the interstellar army. Especially after seeing that many of your classmates have successfully passed the assessment and left this remote small planet, you feel an unprecedented unwillingness!]

[20 years old: After drinking for a whole year, you spent all the pension your parents left you after their death and lost your main source of income. You had no choice but to go out and look for a job!]

[Planet Sequence 7-20003 is as remote as ever. Montenegro City can only be considered a tiny speck of dust in the vast universe...But even so, even the dust-like Montenegro City still looks incomparably majestic in front of you!]

[You took your resume and searched around Montenegro City. Although you're not considered a powerful physical martial artist, you're quite familiar with all kinds of martial arts moves and techniques because you've been cultivating in an aristocratic martial arts school since you were young!]

[In the end, you found a job as a private dojo instructor and began your career of teaching martial arts!]

[25 years old: After working day after day over the years, you realize that the fire in your heart seems to have been extinguished at some point... You no longer yearned for the boundless universe, nor did you hate the unknown and terrifying Zerg monsters. You even lost the determination to go to the battlefield where your parents died to pay homage to them!]

[You know that this is because you have become an adult unknowingly. You have lost your curiosity, your courage to disregard everything, and the youthful spirit that surged in your chest. You have become mediocre and boring, like a walking dead machine.]

[32 years old: You have completely forgotten your childhood dream. Even if you occasionally think about it, you will only treat it as a joke. While working in Montenegro City, you took a fancy to a pretty good girl and married her. She gave birth to a lively and cute child. Although your current life is not considered rich, it is peaceful and happy!]

[You seem to be very satisfied with everything, but occasionally, when you look at the stars, you feel a little sad and nostalgic. If you had seized the opportunity to become a member of the interstellar army, would you have taken a different path?

[Of course, you're just thinking about it. Now... Everything doesn't seem too bad!]

[35 years old: You are already a middle-aged man, and your life has gradually returned to a pool of stagnant water. There are not many waves. However, just when you thought that your life was going to end like this, the Order Legion's interstellar warships that covered the sky suddenly entered the star field around planet 7-20003 and stationed themselves there.]

[After asking around, you found out that the number of Zergs on the front line has increased again. This army is coming from the central universe region and is preparing to go to the first front line to support the Interstellar Alliance Army!]

[Although no one said it out loud, you could still feel the seriousness of the situation from their words. The Zerg race is too huge, so much so that even such a vast universe combined is still not their match.]

[You are worried about this, but that is an ultimate problem that even universe supreme beings can't solve. You, an ordinary person, naturally can't do anything about it!]

[In the vast tide of the times, you and your planet are nothing more than a tiny speck of dust.]

[It is worth mentioning that during the period when the interstellar warship stopped near the star field, the students who cultivated martial arts in the martial arts academy like you also took this opportunity to return.]

[Their return home was received with a grand reception by the head of planet 7-20003. It was said that in order to welcome their arrival, the entire planet's gunships fired hundreds of fireworks in a row that day. Their arrival brought unprecedented vitality to this unremarkable planet!]

[You are also among the welcoming crowd. From afar, you can see those glamorous classmates walking past. You only feel that everything is familiar and unfamiliar!]]

[They were still as young and confident as they were decades ago. They looked around with a refreshing aura. Countless young men and women screamed in shock among the welcoming crowd.]

[But you've been under the pressure of life and family all these years. Your figure has long gone out of shape. You even have a beer belly...]

Chapter 755: An Unattainable Dream, Interstellar Martial Arts!_2

“This glory should belong to me too,'you thought, but you couldn't say a word.]

[Your fifteen-year-old child looked at the members of the Black Star Army who were in the limelight not far away. His face was filled with longing as he told you that he also wanted to become a glorious Black Star Army soldier and destroy all those damn Zergs...]

[When you came back to your senses, you did not agree with his ideals. You even reprimanded him loudly. This is the first time you and he have had such a fierce argument!]

” You felt that the Interstellar Army was too dangerous and hoped that he could live a peaceful life, but he told you that you didn't understand the youth's ideals at all. You also didn't know the vastness of the universe. You were just a pitiful loser..”

[You look at him, at the flesh of your heart that you have raised with all your heart and soul. For the first time, you feel extremely ridiculous.]

[But in the end, even though your face was pale and your lips were trembling, you still didn't say anything. You just sighed slightly and turned around to leave the welcoming ceremony alone.]

[38 years old: The interstellar army has been on the road for many years after a short period of rest, and the planet you are on has finally returned to the right track. It seems that nothing has happened in the past few years, but a lot has happened.]

[More and more young people on planet 7-20003 want to become a soldier in the Black Star Army. Even the business of your own small dojo is booming. Each and every one of them is filled with hope and ambition, and they are constantly challenging the military academy's assessment!]

[Regarding this, you are somewhat nostalgic and emotional.]

[Since you're destined not to realize your dreams, then pour your dreams on these children... Think about it this way.]

[40 years old: Through these years of education, you have become a famous martial arts instructor in Montenegro City. There are countless young people who want to ask you for special training every day. You are always very tolerant of them and have also helped many poor students from poor families!]

[A middle-aged person should have gradually lost hope for life, but you have found the value of your existence in this group of energetic young people. Even the martial arts bottleneck that has been stagnant for many years in your body shows signs of loosening.]

[You thought that everything would be peaceful until that day...The endless bug horde swarmed in from the other side of the star field. The warships that were urgently mobilized for defense were destroyed before they could fully deploy. The entire defense line No. 26 of the third universe was in chaos!]

[In the public channel broadcast, you heard words like 'Zergs' and 'surprise attack'. You also saw batches after batches of fully-armed interstellar warriors rushing to the battlefield on the television station's Star Domain Channel.]

[But those soldiers who were once as dazzling as the morning sun, the soldiers of the Galactic Army that you had always dreamed of becoming, shattered like paper under the endless Zerg Tide. Other than blood and fire, everything on the battlefield was so blurry...]

[This is your first time witnessing the war between the Alliance of Order and the Zergs, and also your first time coming into contact with the terrifying power that could easily destroy the world. You suddenly understand why you didn't get into the military academy back then. It's because the opponents you faced weren't existences that could be fought with just numbers. Instead, you needed incomparably powerful elites.]

[Defense lines were breached one after another, and battleships were destroyed one after another. The 34557 trillion people of the 382 planets on the 26th defense line witnessed everything together, but they could only watch everything with their eyes wide open.]

[41 years old: The planet you are on has been devoured by an incomparably huge Zerg Queen Mother. You are dead!]

The deduction this time was exceptionally long, and the content was rather trivial.

Li Yueming was not used to it.

He had thought that he would die as quickly in this life as he had in his previous lives. He did not expect that he would live for more than 40 years, which was a rare occurrence. He should be considered the one with the longest lifespan among the natives he had possessed.

Even though this 'longevity' came at the price of 'mediocre'.

But it still seems to be quite difficult

After all, there were still many ordinary people in this world. How could there be so many geniuses?

He shook his head.

Li Yueming secretly memorized the contents of the infinite deduction.

Although most of them were just the ordinary life of a middle-aged man, there were still a few pieces of information that were very important, such as ‘martial arts,’ ‘military assessment,’ and ‘when I was 40, the Zerg attacked,’ and so on.

After engraving all the useful information in his mind, he was shocked.

Without hesitation, Li Yueming chose to enter the reincarnation world.

7-20003 Planet, Montenegro City Public Hospital.

Li Yueming slowly opened his eyes and scanned his surroundings. The pale sheets, the slightly crowded metal bed, and the lingering smell of disinfectant...

This should be the hospital where he woke up during the deduction.

Just as Li Yueming was scanning his surroundings to confirm his situation, some information that belonged to his previous owner also surged into his mind along with his messy thoughts.

This was the first time that Li Yueming had transmigrated into an adult’s body without experiencing the mystery of the womb.

Therefore, the feeling of information surging into his mind was very novel to him.

The original owner of this body was also called Li Yueming. His parents had died on a distant interstellar battlefield. Because the Zerg had the characteristic of devouring corpses, they did not even leave a skeleton behind, only a cenotaph.

The Alliance of Law and Order gave Li Yueming a rather generous pension.

It was also because of this pension and a little bit of talent that Li Yueming was able to attend a noble martial arts school and learn the ” Third Cultivation Plan for Personal Mighty Power Warriors ” promoted by the Alliance of Law in the Third Cosmos.

Under normal circumstances, ordinary people could only attend public martial arts schools to learn the Second Reversion of the Cultivation Plan for Personal Magnificent Power Warriors. Only students with rich family backgrounds and talent could enter elite schools to learn the Third Cultivation Plan, which was more efficient and powerful.

Of course, it wasn’t that the Alliance of Law and Order was being selfish and treating nobles and civilians differently. It was just that the third set of cultivation plans had to be combined with a certain amount of talent and basic resources to achieve the expected cultivation effect.

Not to mention the ordinary aptitude of the children from civilian families, even if they sold everything, they would not be able to gather the resources needed for the third set of cultivation plan. It was already very good to be able to learn the second set of cultivation plan.

After sorting out all the messy information.

Li Yueming finally adapted to his current body.

He slowly stretched his body.

Li Yueming felt a stabbing pain in his chest and abdomen.

If he was not mistaken, this should be the aftereffect of his predecessor’s crazy cultivation.

After all, a martial artist's cultivation was about seeking and progressing gradually. Not only would his last-minute practice not increase his strength, but it might also cause his blood and qi to flow backward and hurt his body.

After sensing for a while.

Li Yueming slowly closed his eyes.

This level of injury was impossible for his predecessor to recover without recuperating for a year and a half.

However, to Li Yueming, it was just a small injury.

It was not even considered an injury.

After figuring out the various meridians in his body and the operating principle of this so-called 'Third Cultivation Method for Personal Magnificent Power Cultivators', Li Yueming used his unlimited genetic body to unblock the acupoints in several key locations.

After a few breaths, a faint mist rose from his body.

His body, which had been damaged by excessive cultivation and exhaustion, recovered in an instant.

At the same time, his originally weak body had also been strengthened by an unknown amount during this simple blood circulation. This was because his body was too weak and could not withstand the powerful strength and evolution brought about by the unlimited genetic body.

Feeling the blood in his body that was like a surging river, Li Yueming opened his eyes and muttered to himself, "Do you want to become a Black Star Trooper? Interesting dream, perhaps I can help you realize it!"

Chapter 756: A Level 1 Martial Artist, Shocking!_1

His predecessor's greatest dream was to become a soldier of the Interstellar Army, to go to the distant battlefield where his parents died and burn an incense stick for them.

If things went according to the normal course of events, this dream of his predecessor would eventually become a lifelong regret.

Now, Li Yueming had the ability to help him realize this dream.

Perhaps it was not that the God of Stars did not respond, but that he used such a strange method to realize his predecessor's dream...

Shaking his head and waking up from his chaotic thoughts, Li Yueming tried to stretch his tired body. After making sure that the stinging feeling in his body due to excessive exercise had completely disappeared, he slowly heaved a sigh of relief.

The ward was very crowded, and the smell of disinfectant was also very pungent. Li Yueming obviously did not like such an environment.

He pulled off the messy equipment on his body and walked down from the bed.

At this moment, the door of the ward was pushed open from the outside. A young girl of seventeen or eighteen years old walked in with a basin of hot water.

Seeing Li Yueming struggling to get up, the girl stopped and suppressed her anger, "Hey, you annoying fellow. You're so seriously injured, why aren't you lying down? Don't you think it's not enough to cause trouble for my parents and me?"

Hearing the girl's voice.

Li Yueming was stunned. He looked at the door and saw the girl's angry face.

After pausing for a moment, he immediately recognized the girl in front of him.

The girl was called Li Linglong, sixteen years old this year, and was his uncle's daughter.

In other words, she was his cousin.

Ever since his parents had died on the battlefield, he had been staying at his uncle and aunt's house because he was not an adult. Now that he was sent to the hospital because of an injury from overworking, he naturally had to trouble his uncle and aunt, who were his guardians, to take care of him.

His uncle was a worker in a military factory, while his aunt was the front desk supervisor of a restaurant in Montenegro City. Both of them were ordinary wage earners. They did not have enough leave to take care of Li Yueming, so they could only ask their cousin, Li Linglong, to take leave to take care of him.

That's why.

His cousin was full of resentment towards him.

After all, before Li Yueming took over their family, she was the only little princess in the family. Although she didn't have the best food and clothing, she never had to worry about it. Ever since Li Yueming came, she had to give Li Yueming a share of everything.

Li Yueming was still thinking about his connections.

However, Li Linglong was obviously not willing to let him off so easily. After she walked into the ward and placed the basin on the table, she picked up the towel that was still steaming and handed it to Li Yueming while complaining, "Really...I'm obviously going to take part in the military assessment the year after next. Why should I take care of a piece of trash like you at this critical moment?"

"If you don't have talent, you still have to force yourself. If you continue to train like this, you'll become a cripple. It's best if you go to a rehabilitation center for the disabled yourself."

Seeing that he was still in a daze, she did not take the towel.

The expression on Li Linglong's face turned even uglier. She said angrily, "Hey, wash your face yourself!"

Hearing this, Li Yueming finally woke up from his dream.

He raised his head and glanced at Li Linglong, who was still a little immature, and then at the towel that was emitting hot air in her hand.

Li Yueming did not show any anger or other unnecessary emotions. He calmly took the towel from her hand and wiped his face before asking, "What day is it today?"

His seemingly indifferent calm attitude made Li Linglong, who was originally a little aggressive, freeze. She felt as if her fist had hit cotton.

If it was any other day, Li Linglong would have exploded immediately.

But this time, for some reason, although Li Yueming did not show any remorse for his actions, Li Linglong felt as if she was suffocating when she saw his deep and quiet eyes.

Li Linglong took a few steps back in shock. She barely managed to calm herself down. "You... Why are you asking this? The most important thing now is to take care of my body. I haven't found a boyfriend yet. I don't want to serve a disabled person like you every day!"

Although the young lady's tone was as stern as ever, the slightly weak expression on her face completely revealed her stern appearance and inner turmoil.

What was going on?

In the past, she had despised and insulted Li Yueming many times.

Although Li Yueming would occasionally talk back, most of the time, he just kept silent.

However, no matter what, he had never spoken a single sentence or looked at her like he did today!

Li Yueming didn't answer her question. Although this reincarnation was no longer as difficult as the previous reincarnations, it didn't mean that this reincarnation was more difficult than the previous ones.

The most important thing was that the previous reincarnations had a clear goal, and the main mission was mostly to be safe.

This reincarnation was completely different.

With the Zergs attacking the Alliance of Order, it was useless to just stay safe. The main mission naturally couldn't focus on ensuring one's own safety like in the past.

Instead, he should try his best to play his role to the greatest extent and rewrite or reverse the situation of the entire universe war!

Therefore, Li Yueming's time was limited, and he had no time to waste. He had to leave this small planet as soon as possible and head to the central universe where there was more information.

Seeing that Li Linglong did not answer directly, Li Yueming asked again, "I asked you what day it is today!"

Chapter 757: A Level 1 Martial Artist, Shocking!_2

This time, he emphasized his tone.

Although there was no actual movement.

But who was Li Yueming?

He had been a king-level figure who had unified the world for several generations.

Even though he hadn't recovered his strength yet, facing a young girl was still a blow to him. He didn't even need to leak his aura. Just a simple question was already something that ordinary people couldn't bear.

He stared at her with his abyss-like eyes.

Li Linglong finally didn't dare to continue nagging. She timidly took a few steps back and replied in a low voice, "Today is the 29th of July, year 2088 of the Montenegro Empire's Planet Calendar..."

July 29th?

There was only half a month left before the military college assessment.

Although he couldn't prepare fully, this amount of time was definitely enough for him to get into the military academy.

After confirming this, Li Yueming heaved a sigh of relief.

Li Linglong heaved a sigh of relief almost at the same time when she saw the terrifying aura on his body suddenly dissipate.

When Li Yueming wasn't paying attention, she secretly looked at him with a sympathetic look on her face. When she saw Li Yueming's gaze, she quickly looked away and pretended to rub the towel in the basin.

After a while, she restrained her usual sharp and mean attitude and said in a low voice, "Hey, I know you're upset, but the doctor has already said that with your current condition... There was really no way for him to continue participating in the Military Academy's assessment!"

"Don't force yourself. For Uncle and Auntie, and for our family, okay?"

Although the girl hated Li Yueming for snatching what should have belonged to her, she often ridiculed Li Yueming... However, Li Yueming was still her cousin, and blood was still thicker than water.

Even if Li Yueming didn't tell anyone.

However, whether it was Li Linglong or her uncle and aunt, they could all feel the obsession in his heart.

The fact that he was unable to participate in the Military Academy's assessment due to his physical condition was definitely a huge blow to Li Yueming's spirit and soul. Therefore, after noticing that Li Yueming's emotions were not right, the girl changed her usual unruly attitude and comforted Li Yueming.

He could feel the tenderness in Li Linglong's words.

Li Yueming also restrained his aura and said as truthfully as possible, "I'm not forcing myself, and I won't force myself. However, I really feel that my body's condition isn't as bad as I imagined!"

As he spoke, he pushed himself up with both hands and stood up from the bed like a carp.

Although she was still wearing a blue and white hospital gown.

But Li Yueming still gently stretched his body. Suddenly, all the muscles in his body swelled up. There was even a visible 'Qi' that was swimming in the meridians of his body like a flood dragon.

Seeing this, Li Linglong widened her eyes and covered her mouth. She took a few steps back and said in disbelief, "You, you, you... Is this the aura of a warrior?"

Because she was so shocked, she even knocked over the basin.

The so-called warrior's aura she mentioned was the phenomenon that appeared when the martial arts cultivation method cultivated on this planet broke through the first level.

From Li Yueming's point of view, it was actually a powerful aura condensed from the various apertures in the body after the physique was tempered to a certain extent.

The principle was similar to the martial arts world back then.

The only difference was that although this universal martial arts cultivation method did not sound too eye-catching, it might even make people who did not understand it mistakenly think that it was just a basic ordinary cultivation method.

However, this was actually a super cultivation technique that gathered the blood and sweat of countless martial arts experts in the entire Central Universe!!!

The aura that was cultivated was much more terrifying than the Nameless Divine Art in the small world. Just a small wisp could easily destroy a mountain.

If it wasn't for the Zerg, this great enemy...

It was impossible for such a cultivation technique to be promoted to the entire universe for free.

Therefore, it was no wonder that Li Linglong had lost her composure.

The aura lingering around Li Yueming's body was clearly no different from the 'warrior aura' that he had cultivated after he had entered the third set of cultivation methods for individual mighty strength martial artists!

The sudden commotion in the ward attracted the attention of the outside world. Soon, a few doctors wearing stethoscopes barged in.

After seeing Li Yueming's aura, everyone was dumbfounded.

The male doctor who diagnosed Li Yueming looked as if he had seen a ghost. He repeatedly stared at Li Yueming's body and confirmed that he was not hallucinating. He said with a face full of doubt, "What's going on? When I checked you previously, I clearly found that your ligaments and meridians were severely strained. You might have to sit in a wheelchair for the rest of your life... In the end, not only could he move freely now, but he even possessed the aura of a martial artist?"

The news spread like wildfire.

The entire hospital was in an uproar.

Some doctors who didn't believe him dragged Li Yueming for a full body checkup. In the end, it was confirmed that Li Yueming's body had completely recovered and he had even broken through to Level One Martial Artist.

A group of white-haired old doctors looked at Li Yueming. Their eyes were like a thirsty man who had just met a young girl who had just finished bathing. It was not an exaggeration to describe them as ferocious.

A doctor even held Li Yueming and Li Linglong's hands and said, "This is really unbelievable. Can the patient and his family provide some blood for our hospital to do a more in-depth examination?!"

As if afraid of being rejected, the doctor hurriedly said, "As compensation for providing the blood, we can reimburse the patient's hospitalization fees. In addition, we will pay you 30,000 Universe Credits!"

"If we can figure out how you healed your injuries and broke through, the reward will be more negotiable!"

Li Yueming didn't say anything.

Li Linglong rolled her eyes and said, "Tsk, who cares about your stinking money? My brother is now a Level One Martial Artist and has a high chance of being accepted by the military academy. You want to use him as an experimental subject? Sure, go to the Military Committee and declare!"

Hearing this.

The doctor immediately cowered and quickly laughed. "No, no, no...I didn't mean that!"

Li Linglong only snorted coldly.

Did he mean that...Who knew?

Li Yueming didn't say anything. He knew it would cause a commotion.

However, there was no way for him to be discharged from the hospital and participate in the military assessment in half a month.

Thus, he could only resort to this method.

Anyway, according to the plan, he would not stay on this planet for too long. Even if he caused some trouble, it should not matter.

The disturbance did not last long.

About half an hour later, the group of doctors who were watching the show were ordered to return to their departments.

Only Li Yueming and Li Linglong were left in the ward, as well as his uncle and aunt who had just received the news and rushed over.

Looking at Li Yueming who was already moving freely, the uncle heaved a sigh of relief and smiled, "Brat, you almost scared your aunt and I to death. It's good that your body is fine. I'll make some soup for you when we go back tonight. As for the assessment in half a month..."

The middle-aged bald man glanced at Li Yueming and confirmed that the latter's expression did not change much. Then, he said word by word, "Why don't you not participate?"

“After all, you’re the only seedling in my family. I’m still counting on you to spread your branches and leaves...Even if you want to join the army, you have to get married and have two children first, right?”

Li Yueming looked at his uncle and sighed after a long silence.

The world was good.

His family was also very harmonious.

How good would it be if it wasn’t just a dream but a reality?

Perhaps, probably...The people he was destined to meet were still waiting for him in the unpredictable future, right?

After completing this final examination, would he be able to meet in the ‘reality’, as he wished?

Li Yueming didn’t know, but it didn’t stop him from looking forward to it.

He did not reply.

The uncle’s voice became softer and he scratched his head awkwardly.”Ahaha... It’s fine if you’re unwilling. Uncle is just a little worried about your safety. Back then, your parents...”

Before his uncle could finish, Li Linglong and his aunt glared at him fiercely.

He really brought up a sore spot!

Chapter 758: Starry Sky Aristocrat Martial Arts School

The topic of his deceased parents was always the scar on Li Yueming’s chest, and he was not willing to be mentioned easily. The uncle also realized that he had said something wrong. Under the angry gazes of his aunt and Li Linglong, he smiled embarrassedly and shut his mouth obediently.

The aunt smiled and changed the topic.” Since you’ve recovered, let’s go through the discharge procedures now. The hospital is not a good place. If you can, don’t stay!”

Li Linglong also nodded in agreement and said,”I still have to go back to class. I’m not in the mood to be a nanny here!”

Li Yueming naturally had no objection to this.

In fact, he had used his perfect genetic body to heal his injuries, so he could be discharged as soon as possible.

The few of them walked around Li Yueming. After confirming that he was not feeling unwell, the aunt sent her uncle to go through the discharge procedures.

Although the hospital was very interested in why Li Yueming had suddenly recovered, Li Yueming was now a martial artist. Even if he was only a Level One martial artist, his social status was different from that of ordinary people. He was not someone they could provoke.

Therefore, he could only go through the discharge procedures for Li Yueming.

The afternoon sky was slightly yellow.

The four of them walked out of the hospital together and left in the second-hand pickup truck that their uncle had bought.

That night, in order to welcome Li Yueming's safe return, the family gathered together and held a simple dinner.

This was because the war on the frontlines was getting more and more intense.

The mineral resources and labor output of many starfields behind the Alliance of Order were mainly contributed to the military industry.

7-20003 It was the same on the planet. About 50 years ago, the third line of defense of the Alliance of Order was broken through by the Zergs. Since then, the civilian factories and labor force on Planet 7-20003 were recruited by the Military Council to become part of the military industry to support the front line.

It was also from then on that the daily food, water, and entertainment resources provided to the residents of planet 7-20003 were greatly reduced. Even holding a banquet for an ordinary family was considered a luxury.

They ate and drank well. Uncle and Auntie still had to go to work tomorrow, so they went to bed early.

On the other hand, Li Linglong didn't sleep with her classmates. However, taking leave to take care of Li Yueming Ming had delayed her studies. Now that she finally had a moment of leisure time, she had to make good use of it.

Compared to Li Yueming's predecessor, who liked to be incompetent and furious, she was quite talented. The teachers in the academy had praised her many times in front of her uncle and aunt that she had the opportunity to enter the military academy and become an officer.

Li Linglong also cherished this hard-earned hope.

In school, regardless of whether it was cultural studies or martial arts training, he gritted his teeth and persevered, never falling behind.

At this moment, the sky of planet 7-20003 had completely darkened.

The night shrouded the slightly lonely planet, and through the smooth glass, one could see the bustling lights on the opposite side of the street.

Everything in sight seemed so dull.

It was as if he was far away from the hustle and bustle, giving Li Yueming the illusion that he had never transmigrated.

He closed his eyes and carefully sensed for a moment.

Li Yueming sighed and opened his eyes again, staring at his reflection on the glass window.

So, would such a medium-sized planet turn into a bubble after a few decades because of the Zerg's surprise attack?

It seemed that the Zergs were really doomed.

All along, the reincarnators, including Li Yueming, did not have much sense of the so-called 'Zerg' invasion.

After all, in the past, they had seen everything with the vision of a reincarnator. Even the world they entered could not give them a sense of reality, let alone the ordinary people who had nothing to do with them.

If the reincarnators encountered danger, they could just clap their hands and give up the reward to return to the reincarnation world.

However, very few people thought about the outcome of the people in the world they went to.

Li Yueming also understood that the prime material world was just an untraceable space in the crack of time. The world he was reincarnated in was the real world. Only then did he truly feel the coldness and terror of the Zerg.

They were endless and had extremely strong evolutionary and reproductive abilities.

Wherever it passed, life, minerals, and even the planet itself would be mercilessly devoured, turning into nutrients for the expansion of their race. This unreasonable expansion could be called a disaster.

A planet could be destroyed in the blink of an eye.

However, behind this planet, how many lives lived on this planet were destroyed?

There were many families like Uncle and Auntie, many young men and women like Li Linglong who were full of shock for the future, and many touching hopes and miracles...Just like that, they were all erased from the source.

The sin behind it.

Bamboo is hard to write!

Thinking of this, Li Yueming clenched his fists.

In the beginning, he completed this mission purely to protect himself and to protect his 'friends and family' that might appear in the future.

But now, he could already feel the heavy responsibility on his shoulders.

Trillions of lives, countless planets...All of them were connected to him through the Universe Grade Time and Space Treasure!

A lot of information flashed through his mind.

Li Yueming stopped thinking.

He sat cross-legged silently and began to use Infinite Deduction to analyze the "Third Cultivation Plan for Personal Magnificent Power Cultivators".

Although Li Yueming quickly broke through the boundary between mortals and martial artists with the experience of reincarnation in many worlds, this did not mean that Li Yueming completely understood this cultivation plan.

Chapter 759: Starry Sky Martial Arts School!

One had to know that this was a cultivation method jointly formulated by the peak martial artists of all the major planets in the universe.

The more he deduced, the deeper he went.

Even Li Yueming couldn't help but be intoxicated.

If the Star Moon Art that he created himself was the most suitable cultivation method for him.

Then, the "Third Cultivation Plan for Individual Mighty Power Warriors" was the most suitable plan for all intelligent life forms in the universe to cultivate martial arts.

In order to gather the power of the entire universe to defend against the foreign forces, the Alliance of Law did not hide anything in this regard.

Of course, even if they had kept their thoughts to themselves at the beginning, after so many years of war, the higher-ups of the Alliance of Law and Order had long been awakened. If they couldn't abandon internal strife and unite against the outside world, the Alliance of Law would have been defeated long ago.

It was impossible to barely hold the current line of defense.

There was no doubt that this was a bottomless treasure for Li Yueming.

Through the Third Cultivation Method of Personal Power and the Star and Moon Arts, he was confident that he could cultivate the path of martial arts to an extremely terrifying level in a very short period of time.

Time always passed very quickly after activating the Infinite Deduction talent.

The next morning, Li Yueming opened his eyes, and his eyes revealed a hint of surprise.

Infinite Deduction was a golden talent.

It was the foundation of Li Yueming's existence.

However, as he faced more and more unknown over the years, the unpredictable and unpredictable experts became more and more terrifying. The efficiency of the Infinite Deduction talent became lower and lower, and the accuracy was also greatly reduced.

In fact, he was already somewhat unable to keep up with Li Yueming's version.

However, he did not expect that after binding the shiny gold talent, the Machinery God, the efficiency of the Infinite Deduction talent would be greatly improved.

The most obvious increase in deduction efficiency was that the speed of digesting and absorbing secret manuals had increased by dozens of times!

After thinking for a while, Li Yueming understood the reason. It should be because the Machinery God's talent increased intelligence, and the brain's intelligence was the most basic hardware that supported infinite deduction.

It was similar to the CPU in computers.

The combination of the two talents was equivalent to replacing the infinite deduction talent with a more powerful CPU. It was only natural that the efficiency would increase greatly.

Without a doubt, this was good news for Li Yueming.

After all, "The Third Cultivation Plan for Personal Mighty Power Cultivators" was the result of the joint construction of countless top martial arts experts. The information contained in it was simply too terrifying.

According to the original operating efficiency of the infinite deduction.

Li Yueming might not be able to fully comprehend the Third Cultivation Method for Personal Magnificent Power Cultivators even if he spent hundreds or even thousands of years on it.

Now that his computing power had increased by dozens of times, it still took a long time.

But no matter what, he could still see the end.

He suppressed the joy in his heart and the urge to continue deducing.

He glanced at the alarm clock on the bedside table. After confirming that it was about time, Li Yueming got up and went to the wardrobe to find the school uniform that his predecessor often wore.

In a few decades, this planet would be crushed by the Zergs, and if he wanted to fully comprehend the "Third Cultivation Plan for Personal Mighty Power Cultivators", he would need a long time, starting from thousands of years.

Sitting here studying the cultivation technique was not trying to hide his strength, but waiting for death.

The most important thing now was to pass the military academy's assessment and become a member of the interstellar army.

After spending some time putting on his school uniform, Li Yueming looked at himself in the mirror and tidied up his image. Only then did he realize that no matter which world he reincarnated into, his appearance was still quite good.

As expected, the Reincarnation Mark understood him!

When he pushed open the door, he saw Li Linglong also dressed up and preparing to go to school. The two of them bumped into each other. Li Linglong looked at Li Yueming from head to toe and snorted coldly. She did not say anything and went straight to the living room.

Li Yueming was already used to this.

His uncle and aunt had already gone to work, and breakfast was placed on the table.

Three eggs and two bacon sandwiches were Li Yueming's entire breakfast.

It sounded like a lot, but for martial arts students who needed to engage in physical training, it was just the basics.

Some wealthy families would even prepare special nutrition paste for their children for breakfast in order to supplement their children's physical consumption. The nutrition paste was specially made

by the interstellar military factory of the martial arts side of the third universe and was quite expensive.

With his uncle and aunt's wealth, they naturally could not afford it.

Li Linglong didn't look tall, but her physical fitness was surprisingly good. She ate a similar breakfast as Li Yueming.

After a simple bite, Li Yueming took the lead and finished eating. He took the food and rushed to the academy without looking back.

Montenegro City's Starry Sky Aristocrat Martial Arts School, Grade 12 Class 6. This was the school that Li Yueming was studying at.

Li Linglong was walking in the same direction as him. However, she was studying at a commoner's college, so they were only walking in the same general direction. Their destination was naturally far away.

Montenegro City was the second largest city on planet 7-20003, and the Starry Sky Aristocrat Martial Academy was considered famous in the entire Black Mountain City.

This was also the biggest reason why his predecessor was willing to endure Li Linglong's rolling eyes and spend a lot of money to enter.

After all, his predecessor was not stupid at all. He could even be said to be quite clear-headed.

He had long known that his aptitude was not good.

If one's aptitude wasn't good, if one couldn't enter a well-known martial arts school to study, it was probably impossible for one to pass the military academy's assessment.

Chapter 760: Starry Sky Aristocrat Martial Arts School

Right now, he was looking at the huge school gate that towered into the clouds.

Li Yueming was also secretly surprised.

After all, he had entered many reincarnation worlds. However, this so-called Starry Sky Aristocrat Martial Arts School was truly unique to the school gates that could be built in such a grand manner.

There were not many students at the entrance.

After all, most of the students who studied here stayed in school to board. Only students like Li Yueming who couldn't afford the expensive boarding fees would choose to go to school.

He took out his campus card and swiped it through the access control machine. A clear mechanical voice sounded, "Li Yueming, Grade 12 Class 6, identity verified! Student Li Yueming, it is said that you have taken seven days off due to health reasons. Is your body alright now that you have returned to school?"

This was the Universal AI A001, which was not something that could be developed with the technology of planet 7-20003. The reason why they were able to meet here today was undoubtedly because they had joined the Alliance of Law.

Li Yueming nodded and replied, "As you can see, my body has already recovered!"

The artificial intelligence paused for a moment before saying, "Alright, I've already submitted your application information to Grade 12 Class 6's form teacher, Bu Wuya. A smart assistant will inform you of today's training venue later. I hope you will always be healthy!"

Although it was only a universal AI, it was obvious that the program named A001 was already quite mature.

He didn't leave but stared at A001 for a moment. He didn't expect A001 to take the initiative to reply, "Li Yueming, is there anything else I can help you with?"

Li Yueming felt that this thing was really interesting. He was now considered half an expert in machinery and technology. If he could take it down and study it, he might be able to make a copy.

However, it seemed a little dangerous to have such thoughts in public.

There would be plenty of opportunities to become stronger in the future. There was no need to take such a big risk now.

After shaking his head, Li Yueming walked into the academy.

Looking at Li Yueming's back, A001 revealed a confused look.

Obviously, it noticed that Li Yueming's gaze was a little strange, but unfortunately, its limited intelligence made it unable to understand the meaning.

If it was A002 or A003, they should be able to analyze a part of it, right?

The Starry Sky Aristocrat Martial School occupied an extremely vast area.

Just the gate alone was already towering into the clouds, and the various activities and facilities inside were naturally even more spacious.

It couldn't be helped. Martial artists, even if they were only Level One martial artists, would cause a lot of noise when they moved.

If the school's facilities weren't solid enough and the land wasn't vast enough, it would probably be completely demolished by the students and teachers in less than three to five years.

According to the fragmented memories of his predecessor.

Li Yueming managed to find the way to Grade 12 Class 6.

However, the teacher was probably already doing physical training with the boarding students. As a day student, he would not be able to find anyone in the class. He had to wait for A001 to confirm the teacher's movements before sending an assistant to bring him to the location to meet up with his classmates.

A001 didn't let Li Yueming wait.

About ten minutes later, Li Yueming received the location information from A001 on his personal terminal.

According to the guidance of the navigation terminal, Li Yueming transferred to a few other means of transportation in the huge college before finally finding his class on the field.
