

Maxing MT 761

Chapter 761: Final Review, Combat Training!_1

The internal space of the Starry Sky Aristocrat Martial Academy was very spacious.

Li Yueming finally found his class in activity room 072 after he had changed to several different means of transportation.

On the incomparably huge plaza of the comprehensive activity room, there were already nearly a hundred students lined up neatly on both sides of the actual combat stage. From afar, they looked like a large group of ants.

After noticing Li Yueming approaching, a one-armed man who looked to be about 40 years old walked over silently. His sharp and cold eyes glanced at Li Yueming and said, "Why are you here again?"

The one-armed man in front of him was called Bu Wuya. He was the former teacher of Grade 12 Class 6. He heard that he was a member of the interstellar army when he was young and had personally gone to the frontlines.

After losing an arm, he was forced to retire from the army. He was given a disability allowance and a job as a martial arts school teacher by the military committee. Only then did he become a homeroom teacher of Grade 12 Class 6.

Because of his cold personality and lack of humor, Bu Wuya was also known as 'Bo Shitou' by his students and teachers behind his back.

Of course, jokes were jokes, but no one in the entire Starry Sky College dared to deny the quality of Bu Wuya's teaching. Every year, three to five students in the Military College's assessment would graduate from his hands.

Cold-faced Instructor, One-armed Soldier King...

Behind each of these titles was the respect, envy, jealousy, and hatred of the Starry Sky College and Bu Wuya.

The reason why his predecessor had gone crazy with his training, even at the cost of damaging his body, was because Bu Wuya had determined that he didn't have the aptitude and mentality to become a member of the interstellar army.

This was naturally a great contempt and denial for his predecessor, who had wanted to go to the starry sky of the universe since he was young.

Therefore, the relationship between teachers and students had never been very good.

Of course, those things were caused by his predecessor, so Li Yueming had no interest in continuing to be entangled.

He looked down at Bu Wuya, who had a cold expression on his face.

If it were any other fledgling student, they would probably have cramps in their legs and stomachs under his gaze.

After all, he had been in the army for many years. Even though he had been retired for more than ten years, Bu Wuya still had a murderous aura that made one's heart palpitate.

It was a strong sense of oppression that could only be produced by killing a lot of people. It was not something that underage children who lived in a peaceful society at the rear line of defense could face.

In fact, that was indeed the case.

Behind him, the neatly arranged students were all secretly watching the situation here. Their eyes were full of sympathy and a hint of schadenfreude when they looked at Li Yueming, but no one dared to make any movements.

Obviously, they enjoyed watching Li Yueming embarrass himself in front of Bu Wuya.

He just didn't dare to show it on this occasion.

However, Li Yueming acted as if nothing had happened. He looked straight into Bu Wuya's eyes and replied neither obsequiously nor arrogantly, "Teacher, I was on sick leave previously. Now that I've recovered, I'll naturally come back!"

Hearing his answer.

All of a sudden, the students on both sides of the training field looked at Li Yueming in surprise.

Why did this kid suddenly become so awesome after going back?

He actually dared to speak loudly under the death gaze of Stone Diviner?

Did he eat the guts of a bear or a leopard?

Bu Wuya was clearly surprised as well. He sized up Li Yueming before saying, "Didn't I tell you before? With your talent and mentality, you won't be able to get into the military academy."

"Even if you are lucky enough to get into a military academy, you won't even be able to be cannon fodder on the battlefield. You will only die in vain!"

At this point, Bu Wuya paused. He lowered his head and took out a white piece of paper from his undergarments before continuing, "I've already received the physical examination report from the hospital. Although I don't know how you convinced your family to let you leave the hospital, judging from the current burden on your body, continuing to exercise will only be asking for trouble..."

"Go back, you are not welcome here!"

As he spoke, Bu Wuya threw the report to Li Yueming and turned to leave.

Li Yueming silently took the report and glanced at it. It was sent to Bu Wuya by the hospital a few days ago.

The 'cold-faced instructor' in front of him must have taken the initiative to go to the hospital to get the information after knowing that Li Yueming was injured.

Although his words sounded cold and heartless, it was actually for Li Yueming's own good.

This is how humans are like.

Sometimes, those who said unpleasant words actually had good intentions.

His words were flowery, but in reality, he was hiding a knife behind honey and killing people invisibly.

Although Bu Wuya was indeed doing this for his own good.

However, Li Yueming obviously wouldn't let him leave just like that.

Stepping out of the portal, Li Yueming arrived in front of Bu Wuya in an instant. He said indifferently, "Teacher Bu, you seem to have misunderstood something. My body is very healthy right now. If you don't believe me, you can try!"

Bu Wuya felt his vision blur. When he came back to his senses, he realized that Li Yueming had already blocked his path.

Forcefully suppressing the shock in his heart, Bu Wuya took two steps back and cried out, "You've become a martial artist? What level?"

Li Yueming was very restrained. He didn't make any further moves after getting close to Bu Wuya.

In fact, as long as he wanted to, Bu Wuya, who had fallen from his peak state for many years, was no match for him.

Chapter 762: Final Review, Combat Training!_2

However, Li Yueming only wanted to not be looked down upon. He didn't want to become a freak.

Therefore, Li Yueming took two steps back and said, "I was lucky to break through last night. Naturally, I'm a Level One Martial Artist!"

Bu Wuya was momentarily dazed when he heard the words 'Level One Martial'.

Of course, his focus was not on these four words.

A Level One martial artist was indeed very good. It was the fundamental intersection between mortals and Beyonders.

However, there were already quite a number of Class One martial artists in Grade 12 Class 6.

If one wanted to get into the military academy, a Level One martial artist was the starting requirement.

What he was really concerned about was the speed that Li Yueming had just displayed. Such a terrifying speed, was it really something that a Level One martial artist could display?

His intuition told him that it was not that simple.

However, looking at Li Yueming's serious face, he didn't seem to be lying at all.

In the end, Bu Wuya chose to believe it.

His face was gloomy and he did not say anything. He silently walked forward and carefully checked the strength of Li Yueming's bones and muscles. After confirming that there were no problems, he said, "Since that's the case, then join the team. There are three physical fitness assessments in the morning and actual combat training in the afternoon!"

The student had become a Level One Warrior.

If it were any other teacher, they would probably be happy for a while.

However, Bu Wuya clearly didn't have such unnecessary emotions. He just didn't refuse Li Yueming to continue training.

But fortunately, Li Yueming didn't care.

Under the gazes of the students who were looking at the monster, he walked to the back of the line alone and stood still.

The physical training in the martial arts school was quite simple.

They trained their endurance by running with weights, trained their mobility by moving quickly, trained their reaction speed by dodging quickly, and trained their weapon control by comprehensive training.

All of the training was based on the A0001. The difficulty of each segment would be adjusted according to the student's physical data and previous results.

As long as they completed the training standards set by A0001 and the teachers of each class every day, basically every student's physical fitness could be improved to the greatest extent.

After a morning of training.

Even Li Yueming, who didn't think much of it at first, felt that he had gained something.

It could be seen that although this training method looked simple on the surface, the various paths inside were actually profound to a certain extent. Otherwise, it would definitely not be able to move Li Yueming.

In a sense, this was also the benefit of the interstellar universe.

Ordinary individual Mighty Power Masters didn't have a universe supreme level master as their father, so it was impossible for them to obtain such a refined and efficient training plan at the initial stage.

Not only was it perfectly compatible with the human race.

In some aspects, it had even reached the peak.

After a set of training.

Li Yueming finally understood why his predecessor's body collapsed and ended up in the hospital after just a few more rounds of training.

This training method was not just for show.

Playing a few more times could really squeeze people dry!

The morning's physical training ended.

The combat training that was going to take place in the afternoon also piqued Li Yueming's interest. He really wanted to know what a group of young people who had gathered the power of the entire Alliance of Law and Order could do in actual combat.

During lunch, a few students came over and asked, "Hey, hey, hey, don't tell me you think you can be arrogant in front of Bu Shitou just because you've broken through to Level One Martial Artist?"

Another student then winked and said, "Didn't you notice? Bu Shitou had been staring at you with a deadpan face the entire morning. If it were me, I would probably be scared out of my wits!"

Li Yueming didn't pay attention to their teasing and continued to eat his lunch.

The school fees weren't expensive, and the Alliance of Law and Order had subsidies, so it didn't cost much.

What was really expensive was the food in the martial arts school.

Under high-intensity training, a martial artist's need for food was very terrifying. Meat, eggs, milk, and various brands of nutrient fluids with various effects could not be lacking.

Li Yueming spent most of his money on this.

Seeing that he was eating slowly and had no intention of paying attention to them, the students felt bored and left. As they walked, they said unhappily, "Tsk, looks like he's really arrogant. He thinks he's so great just because he broke through to Level One Martial Artist? Why don't you take a piss and look at yourself in the mirror!"

Another person sneered. "Hmph, you'll know during the actual combat training in the afternoon. A day student can only be a day student forever. They can't even afford nutrient fluids. So what if they become a Level One martial artist? We'll still beat you up!"

After hearing their angry conversation, Li Yueming suddenly thought of something and glanced at the students who had walked away.

If there was nothing wrong with the memory fragment of the predecessor, these people were the children of high officials on Planet 7-20003. They had always looked down on day students like Li Yueming who couldn't even afford boarding school.

After all, in their opinion, they should have been the top rulers of this planet. But now, because of his interstellar transformation, he was assigned to the same class as Li Yueming, a commoner.

It greatly lowered their value.

There were many conflicts between the two sides, but it always ended with the predecessor being defeated.

From the looks of it, they were the perfect candidates for tonight's actual combat training.

However, there was one thing that those rich kids had said.

It was difficult to satisfy the daily training needs of the martial arts school just by relying on the nutrition in the food. In order to keep up with the nutrition, he had to prepare various nutrient solutions.

Chapter 763: Final Review, Combat Training!_3

Because his realm wasn't too high, Li Yueming could still use his perfect genetic body to regulate the nutrients in his body and maintain a balance.

If he continued walking, he would have to think of a way to get more nutritious items.

However, this shouldn't be a problem.

After all, at this critical juncture, a 'genius' was still quite valuable.

Regardless of whether it was the people at the bottom or the children of dignitaries, as long as they showed enough potential and talent, the Military Committee of the Alliance of Order would naturally find ways to meet all their needs.

After eating the nutritious lunch.

Li Yueming wiped his mouth and found a shady spot to sit down.

He began to use his Infinite Deduction talent to analyze the "Third Cultivation Plan for Personal Mighty Power Warriors" and the "Fourth Martial Artist Training Plan Outlines" that he had practiced this morning.

The above was the cultivation plan.

The other was a training plan.

It covered all the growth needs of a martial artist who specialized in personal strength.

Don't think that these two plans are not good just because their names are not eye-catching and they are all over the street.

In fact, this should be the collection of the most powerful martial arts experts in the entire Alliance of Law.

As long as one had talent and was willing to cultivate diligently, they could grow into a very powerful martial arts expert with these two methods.

Even if the analysis of the two programs of the creator of the door is a loss of effort.

To Li Yueming, it was a very luxurious experience pack.

In addition to the meal, all the time, all the time, all the time, all the time, all the time.

As he continued to deduce, the lunch break soon passed.

Because the military assessment was going to start in a few days, the team combat training in the afternoon had been changed to individual combat training. In addition, in order to be closer to the various accidents that might happen during the assessment.

The individual training with A0001 as the sparring partner was no longer going there, but became a real battle between the students.

It was still the same training ground in the morning, and it was still the same martial arts practice arena.

More than 80 students from Grade 12 Class 6 lined up neatly in two rows. Each group consisted of five groups of ten people. They entered the martial arts stage in pairs in order to prepare for the actual combat PK.

The remaining people stood on both sides of the martial arts stage to watch the battle.

Bu Wuya, who was the homeroom teacher and had rich combat experience, acted as the lecturer, explaining the details and essentials of the battle to the students. He also corrected the students' mistakes in the demonstration on the martial arts stage at any time.

Compared to the other classes, which had all kinds of fancy operations, the final review arranged by Bo Wuya was also extremely simple.

However, because he had actual combat experience that other teachers could not match, his class was more practical than other teachers' classes.

After all, the battlefield was ever-changing.

There would be no standard artificial intelligence like A0001 to guide them, and there would be no sandbag like opponents to stand on the spot and take a beating. There was only endless uncertainty...

As for the other teachers, because they were in the rear and did not have much actual combat experience, they were unable to teach the students to adapt to the situation.

Therefore, the final combat training of Grade 12 Class 6 had always been the target of many classes in the Starry Sky College. When the students were ready to fight on the stage, the other teachers would also bring their students here to learn.

The number of people watching the battle instantly soared from 60 to more than 200.

Although it still seemed small compared to the huge martial arts stage, it still made the scene quite noisy.

Bu Wuya was quite generous with regards to this. He would never hide anything just because there were other teachers who framed him behind his back. However, the group of students were not so relaxed. They could not help but become nervous under the watchful eyes of everyone.

Li Yueming was the last batch to go up.

Compared to the other restless students, he was much calmer. He was sitting alone on the field with his eyes closed, deducing two sets of plans for his personal power.

When the few rich kids who were having lunch saw this, they couldn't help but smile."Still pretending to be calm? I don't know where you'll put your face when we teach you a lesson in front of so many people later."

This time, their luck was very good.

Coincidentally, he was in the same group as Li Yueming.

Chapter 764: Special Referrer

There were a total of 96 students in Grade 12 Class 6. The actual combat training consisted of 10 students in a group. The students in front of the line fought for an average of 10 to 15 minutes.

Therefore, it was only Li Yueming's turn after about two hours.

During this process, he had also carefully observed the battles of his classmates.

It was as he had expected.

This group of students actually had very average combat experience.

After all, planet 7-20003 was located behind the Alliance of Law's cosmic defense line. Both students and teachers rarely had the chance to engage in actual combat.

Although he had the A001 Universal Artificial Intelligence, which could simulate the actual situation of the battlefield with a 100% accuracy, he was still able to use the A001 Universal Artificial Intelligence.

However, in the entire Starry Sky Aristocrat Martial Arts School and even Planet 7-20003, there were no students or teachers who could pass the '100% real difficulty' assessment. How could they take the initiative to start such hellish training for no reason?

Of course, the main reason was that planet 7-20003 was located behind the defense line.

Whether it was the teachers or the students, none of them had truly experienced the tension and pressure of the Zerg invasion.

There was also no huge pressure on the edge of life and death like some planets in the front line.

The main reason why they yearned to become a member of the Black Star Army was because of the good treatment and high social status of the Black Star Army. It also allowed them to leave the side planet 7-20003 and head to the endless prosperous countries in the universe.

Under such circumstances, how could he expect them to treat the war with such a serious attitude?

It was estimated that he would only be able to wake up from his half-baked attitude after he truly experienced the horror of life and death.

However, they only realized it at that time. Would the heavens give them another chance?

Li Yueming didn't know and couldn't care less.

The Universe of Order was vast, and 7-20003 was just a remote planet that was not valued. No one really cared about their life and death. Only by showing enough value could they be valued.

He thought about it.

The second-to-last batch of students had already come down from the field.

All of them were excitedly discussing the cool moves with their classmates.

The other students were also very happy. It was obvious that they had gained a lot from the actual combat training just now.

The form teacher of Grade 12 Class 5 even took the initiative to walk over and say to Bu Wuya, "Old Bo, the quality of your students is quite good. I feel that this year's outstanding class will be awarded to you again!"

Bu Wuya glanced at him. His face was still as cold as ever. There wasn't even a hint of a smile on his face. He said in a flat and cold tone, "This kind of performance is only cannon fodder on the battlefield. It can't even be considered cannon fodder... So what if he got into the military academy?"

Hearing his emotionless words, as if he was stating a fact.

The homeroom teacher of Grade 12 Class 5's face twitched, but he did not dare to say anything because of Bu Wuya's murderous aura. He simply turned around and left.

A moment later, the form teachers of the other classes quickly gathered around. The form teacher of Grade 12 Class 5 said in a low voice, "I've lost again! Old Bo is really a stone in the latrine pit, smelly and hard!"

The form teacher of Grade 12 Class 2 also nodded and echoed, "Although the frontline battlefield is indeed not optimistic, the Alliance of Law represents the entire Central Universe. The situation shouldn't be that bad, right?!"

The form teacher of Grade 12 Class 4 also joined in the discussion. "That's right, that's right. There are countless experts on hundreds of millions of high-grade planets. I even heard that the Second Cosmos and the First Cosmos have Immortal Cultivators and Psionics whose fundamental powers are completely different from ours in the Third Cosmos... With so many mighty figures supporting us, even if the sky falls, it won't be able to hit us!"

The form teacher of Grade 12 Class 1 had the deepest prejudice against Bu Wuya. Before Bu Wuya had come, he was the most outstanding teacher in the Starry Sky Martial Academy. Now that this glory had been taken away so easily, it was naturally impossible for him to have a good impression of Bu Wuya.

At this moment, he sneered. "He's just deliberately trying to scare the public. Otherwise, wouldn't there be no reasonable excuse for him to lose an arm on the battlefield and be carried back like a dead dog?"

Although the other teachers agreed with this humiliating statement, no one refuted it.

After all, compared to offending the narrow-minded form teacher of Grade 12 Class 1, it was wiser to offend Bu Wuya, who did not care about these rumors at all.

While the few form teachers were discussing, Bu Wuya had already reprimanded the students who had been laughing and laughing earlier. He had also corrected all their shortcomings.

Li Yueming and a few other students were also ready to enter the actual combat training ground.

Bu Wuya put down the other students who had already completed the assessment.

Under everyone's gaze, he took the initiative to walk towards the last batch of students.

This action immediately attracted everyone's attention.

This wasn't the normal process of actual combat training. By right, Bu Wuya should have announced the start of the assessment and let the students enter the martial arts stage!

Under everyone's gaze.

Bu Wuya slowly walked to Li Yueming and stood in front of him.

Looking at the composed student before him, Bu Wuya said, "In this practical training, I want you to fight against the other nine students. What do you think?"

Bu Wuya's sudden appearance on the side of the "

Now that they heard what he said to Li Yueming, the hundreds of people present were all dumbfounded.

Chapter 765: Special Refermenter 2

What the hell?

Let that student have a 1v9?

Was Bo Wuya's brain damaged because of his muscle spasms?

Li Yueming glanced at Bu Wuya, then at the nine students beside him. He guessed that the trick he had shown in the morning had worked.

The more Bu Wuya thought about it, the stranger he felt.

That was why he had deliberately used this training to test if he was really hiding his strength.

Of course, the reason why he specifically came to ask Li Yueming instead of making a decision on his own was also to test the waters.

If Li Yueming was not strong enough, he would not have agreed to the 1v9 test.

On the contrary, if Li Yue Ming really hid his power and was willing to show his talent and potential to the outside world...Then, there was a high chance that he would not let go of this excellent opportunity!

At this moment, everyone's eyes were focused on Li Yueming.

Clearly, they all wanted to know what kind of expression this student would have when he heard Bu Wuya's ridiculous request.

However, a situation that made them even more incomprehensible appeared.

Li Yueming didn't reject him immediately. Instead, he started to weigh the pros and cons.

No way, could it be that this student's brain was also filled with water?

There was no doubt that there was a difference in strength between students. Otherwise, there would not be a difference between geniuses and mediocre people, between hardworking people and those who did not work hard.

However, they were all taught by the same teacher, and they were also learning the "Third Cultivation Plan for Personal Magnificent Power Warriors" and the "Fourth Martial Artist Training Plan."

Even if there was a gap between students, it was very limited.

Except for a few cases where ordinary students who had not become Level One Martial Artists and top students who had become Level One Martial Artists were one-sided crushing duels, there was basically no difference in combat strength.

The ten students before him had clearly been carefully arranged by Bu Wuya. They had gathered a small portion of Grade 12 Class 6's Class 1 martial artists.

There were no ordinary people at all.

Under such circumstances, the top students' actual combat training of 1v1 was still a little strenuous, and 1v9 was purely a fantasy. They would only be beaten up one-sidedly!

So what was this student thinking about?

Did he really think that a 1v9 was something that could be done?

Not only were the students stunned by this scene, even the teachers in charge of the classes were stunned.

However...What made them even more incredulous was yet to come.

Li Yueming touched his chin and thought for a moment... He actually nodded and agreed!

Not only that, but he also looked relaxed. Those who didn't know better would think that he didn't agree to a 1v9 on the martial arts stage, but to a topic like "let's have supper together".

What the hell? This was simply nonsense!

When everyone came back to their senses, that was the first thought that came to their minds, including the form teachers of the various classes.

There was less than half a month left until the Military College's examination. The students were already pressed for time, and now, Bu Wuya had actually caused such a ridiculous scene at this critical moment, wasting everyone's time.

There was simply something wrong with his brain!

However, thinking about it carefully...Compared to the cliché 1v1 combat training, this farce was quite interesting. He only hoped that the student would not suffer too badly later.

After all, although the martial arts stage would not put the user's life in danger, physical pain was inevitable.

Seeing that Li Yueming had really agreed to the 1v9 combat training he proposed, not to mention the other teachers and the surrounding students, even Bu Wuya himself was shocked.

Originally, he only felt that Li Yueming's sudden movement at noon was not something that a Level One martial artist who had just broken through could show. Therefore, he specially came to see if Li Yueming was really hiding his strength.

Actually, he didn't know in his heart.

As the homeroom teacher, Bu Wuya was quite attentive to the students of Grade 12 Class 6.

Therefore, he had a relatively complete set of information on the students' families and personal personalities.

Some of them were collected by the school, and most of them were collected by him out of professionalism.

After all, only by deeply understanding each student's personality and family situation could he fundamentally understand the students' psychological state and formulate corresponding training strategies.

Li Yueming's family background was clearly recorded in his information.

His parents were members of the interstellar expeditionary force. They had died on planet 1-33472 12 years ago and were currently living with his uncle and aunt.

The working class did not have a strong background, and they could not even afford nutrient fluids. In order to enter the Starry Sky Aristocrat Martial Arts School, they even used the pension of their deceased parents.

This kind of family situation didn't seem like a good place to support the growth of a genius...

However, he never expected that Li Yueming would actually agree!

In other words, if Li Yueming's brain wasn't damaged, then he really hid a part of his strength... So what she did in the morning was probably revealed to him on purpose?

Was he trying to make him suspicious so that he could gain more attention or resources?

Right, the military assessment was about to begin in half a month. If there was any hidden power that had not been revealed, now was indeed the best time to take it out and get the attention of the school and the military committee stationed on planet 7-20003.

After all, even though the results of the military assessment couldn't be changed with or without special referees, they could change the results of the internal operations such as the division of troops and the assignment of planets after passing the assessment!

The so-called 'special referees' system was a special channel for high-level talents within the Military Committee.

The Alliance of Order's military committee would station three to five planet commanders on most planets.

As long as the talent and strength of the recommended person were recognized by any of the above big shots, they could enter the special talent training process through the internal channel after passing the assessment of the Military Committee.

In other words, this was a backdoor that the Order Alliance Committee had opened for some talented geniuses. The only requirement was to obtain recognition before the assessment officially began.

Of course, that was what he said.

In fact, if one thought about it carefully, one would know how precious the quota of this system was.

The entire planet had a population of hundreds of millions, and hundreds of thousands of examinees were gathered together, but there were only three commander-level big shots like the military committee of planet 7-20003.

Tens of millions of people competed for three spots, and these three spots could not be filled every year.

Normally, it was already good enough for one or two people to be chosen in a year.

The terrifying level of competition could be seen from this.

Those who were not considered geniuses in the entire star field could not even think about walking through.

Li Yueming's sudden appearance at this time was very obvious. It was most likely because of the 'special referees' mechanism, but... Did he really have the ability to do so?

Bu Wuya was skeptical.

However, it seemed that there was no need to think so much at the moment. He just needed to wait for Li Yueming's performance after the actual combat training began.

He thought about it.

Bu Wuya nodded at Li Yueming and said, "Since you have no objections, let's begin!"

Li Yueming nodded and looked at his opponents, who were the other nine classmates. There were a total of six boys and three girls. Eight of them were noble children, and only two of them came from civilian families like Li Yueming.

At this moment, he felt Li Yueming's gaze on him.

The eight noble children all had angry expressions on their faces.

Obviously, Li Yueming agreeing to a 1v9 in front of everyone was a huge insult to them.

They didn't dare to complain about Bu Wuya, who had arranged this 1v9 training, so their anger could only be focused on Li Yueming.

The remaining two commoner children were fine, but they looked at Li Yueming with sympathy.

Being targeted by so many arrogant and despotic noble children, Li Yueming would undoubtedly not end up well. Later, they would try their best to slack off.

Anyway, the few of them were the same. It was just a one-sided slaughter.

Under everyone's gazes, this special combat training officially began.

Ten students lined up and stepped into the martial arts stage of the training ground.

After everyone entered, the martial arts stage flashed with white light. Dense runes crawled out of the array below like earthworms, completely isolating the interior of the martial arts stage from the outside.

The martial arts stage in the training ground was the most common beginner martial arts stage. Ordinary Level Three martial artists could not easily break through it. It could very well protect the students who were watching the battle outside from being affected by the battle in the martial arts stage.

He looked at the ten students who were as small as ants in the wide field.

All the students and teachers present were curious about what was going to happen next.

Chapter 766: The Ultimate Martial Skill Shocked Everyone!_1

On the Martial Arts Stage.

The white light barrier formed by the rune barrier cut off all connections between the inside and outside.

The nine students stood on the right side of the stage, while Li Yueming stood alone on the left.

Looking at the indifferent Li Yueming not far away, a few noble children grinned and said, "I really don't know if I should call you a damned commoner who is bold or if you have a hole in your head. What's so great about breaking through to a Level One Martial Artist? We're both Level 1 Martial Artists!"

"So many people against you...Don't tell me you think you have a chance of winning?"

Li Yueming glanced at them and slowly walked forward. "You dare to call yourselves martial artists? Enjoying the best resources in the entire universe, yet not having a single heart of martial arts. To deal with a half-baked person, one did not even need to use the true strength of a martial artist!"

After discovering that the "Third Training Plan for Individual Mighty Power Warriors" and "Fourth Training Plan for Warriors" contained the blood and sweat of the Supreme Martial Artist of the Alliance of Law and Order.

Li Yueming had always been curious whether the strength of the young man who had practiced these two top-notch martial arts techniques since he was young was far beyond his knowledge.

However, he did not expect that none of them could understand these two plans in the battle just now.

This made Li Yueming disappointed.

Because the promotion was too wide, there were too many cultivators.

The young people did not seem to notice that there was anything special about these two basic plans.

He even thought that this was the worst thing on the streets and was not willing to study it in peace.

Thus, most of them only learned the surface, and did not taste the essence at all.

Thinking about it carefully, this seemed to be a kind of helplessness.

Even if the best cultivation technique in the world was presented to everyone, if the person who obtained the cultivation technique was not willing to study it diligently, how could he become a true martial arts expert?

His voice was not loud, and his tone was rather flat.

There was an unquestionable domineering aura in it.

Although the students on the other side all wanted to retort, no one dared to take the lead to talk back. They were all frightened by Li Yueming's courage at this moment.

Who was Li Yueming?

Although he looked like a teenager of seventeen or eighteen years old on the surface, the soul inside was actually a chaotic demon god who had killed thousands of people.

In front of him, even Bu Wuya could only stand far away.

Feeling the invisible pressure from Li Yueming, the nine students subconsciously took a few steps back.

It was not easy for him to suppress the strange emotions in his heart.

The few of them looked at each other and saw the horror in each other's eyes.

At this moment, the battle had already begun.

However, they were so frightened by Li Yueming's gaze that they were rooted to the ground. For a moment, they did not even know what to do.

Obviously, this was Ming Li's target!

The terrifying speed of teleportation.

All the students present could only see a blurry afterimage.

In the next second, everyone realized that Li Yueming had already passed by the other seven noble students and went straight to the two civilian martial artists.

A few seconds ago, the Pingwu martial artist who was being stared at was still thinking about whether he should go easy on her and how much water he should go easy on her. However, he did not realize that Li Yueming had already disappeared from the previous battlefield and came to him along his blind spot.

Now that he suddenly discovered Li Yueming's figure, his eyes were filled with disbelief.

He and his other companion had been walking at the back of the team, so how could Li Yueming suddenly jump over the students in front of him and attack him?

However, he was destined to never have the chance to think about this topic again.

Li Yueming's left fist struck out and smashed into his chest at lightning speed.

Seeing this, the warrior was delighted.

If Li Yueming attacked other parts of his body, he might suffer a huge loss.

However, he was wearing a piece of training armor on his chest. It could withstand a force of 1,000 kilograms.

Although it might not be able to block all of Li Yueming's attack damage, it was still not enough.

However, it was already a rare surprise for him to be able to offset more than half of it.

As long as he did not lose too much of his combat power, he could immediately mobilize the power in his body to counter Li Yueming.

However, he soon realized that he was wrong.

And it was ridiculously wrong!

The moment Li Yueming's fist came into contact with the heart-protecting armor on his chest...

He could clearly feel a strong force that was like a wild bull spreading from his chest to his entire body.

Instantly, he was sent flying like a cannonball.

He flew dozens of meters before falling.

Although he didn't feel any substantial damage from Li Yueming's punch, he couldn't get up no matter what.

There was no doubt that he had lost his ability to fight in this state.

Sure enough, in the next second, a white light flashed and A0001's voice sounded almost at the same time, ""Number 10, eliminated. Nine people remaining!"

Fast, too fast!

Silence, deathly silence!

Whether it was above or below the martial arts stage, at this moment, one could hear a pin drop.

The eliminated commoner warrior touched his chest. Until now, he still did not understand what had happened.

Let's not talk about how Li Yueming managed to get past seven or eight people and get close to him in an instant.

Chapter 767: The Ultimate Martial Skill Shocked Everyone!_2

Li Yueming's punch had clearly hit the Heart Protection Mirror on his chest, and it did not cause any substantial damage to his body. How did he eliminate him directly?

His mind was filled with question marks.

He turned around and saw...The massacre continued!

After finishing off the first commoner, Li Yueming's speed did not slow down at all.

After a few ups and downs, he arrived in front of another commoner martial artist. Because of the lesson learned from the previous incident, that commoner martial artist's reaction speed was slightly faster.

However, it was only a little.

He was still at an absolute disadvantage under Li Yueming's attack. After three to five punches, he was sent flying by Li Yueming's punch and fell to the ground, turning into a ball of white light and dissipating.

In just a blink of an eye.

A0001's voice sounded again, "" Number 9, eliminated the remaining eight!"

When the other commoner martial artist appeared in the outside world, he was also dumbfounded.

When he faced Li Yueming, he did not feel any terrifying and suffocating pressure.

It was as if they were just casually exchanging blows.

However, he was sent flying in just two or three moves. He did not even understand how he was eliminated.

Crushing...

It wasn't just the suppression of consciousness.

It was still a crushing defeat in terms of technique.

In front of Li Yueming's martial arts techniques, they were like three-year-old children who were powerless to resist.

In the spectator stands outside the martial arts stage.

Hundreds of pairs of eyes were staring at everything on the screen through the surveillance camera.

After seeing Li Yueming turn around and eliminate two people, a teacher could not help but exclaim, "D * mn, what the hell is this?"

The teachers beside him were even more surprised than him. "What about the energy level that represents a martial artist's power? Why didn't A0001 record it and explain it? How could he defeat these two Level One Martial Artist students without Energy Levels?"

The teachers were all Level Three or even Level Four martial artists.

However, he still felt that this strange scene was a little unbelievable.

After all, the Martial Arts Practice Platform was isolated from the sight of all Transcendents.

They could only use their naked eyes to observe what was happening on the surveillance screen.

Obviously, it was difficult for them, who were used to supernatural spying, to see everything that had happened in that instant.

As the person with the most combat experience on the scene.

Perhaps only Bu Wuya could roughly guess what had just happened.

It was precisely because of this that he was even more shocked. Even the icy face of death that was said to not melt for ten thousand years was twitching unconsciously at this moment!!!

If his guess was correct.

He was afraid that this unremarkable student in his class would quickly attract the attention of the higher-ups in the next ten days and become a rising star on planet 7-20003!!!

After inviting the two innocent passersby out.

Li Yueming didn't continue his cold hunting journey.

Instead, he stood in front of the remaining seven noble children and waved at them. "Come on, show me whatever you have. Don't say that I didn't give you a chance!"

For him, this was no longer considered actual combat training.

Instead, it was more like kicking a kindergarten.

Although the students were all learning top-notch martial arts techniques, reality had proven that the truth was only in the hands of a few people. Even if they were given the same starting line, there would always be people willing to admit defeat.

All the techniques and movements he was using now were analyzed from the "Third Cultivation Plan for Personal Mighty Power Warriors".

For the sake of fairness.

Li Yueming didn't even use his martial arts power.

With just pure techniques and strong physical fitness, it was enough to press this group of unskilled students to the ground.

The remaining seven noble children finally came back to their senses.

Although they didn't know what method Li Yueming used to eliminate the two lowlifes, the terrifying strength that Li Yueming displayed in this instant still shocked them.

At this moment, their eyelids were twitching, and they were not in the mood to continue arguing with Li Yueming's provocative words.

Seeing that the situation was not good, a young man named Yin Qi among the seven noble children took the lead to stand up. He was also the son of the high official who mocked Li Yueming during lunch in the morning.

His entire body suddenly swelled up, and his muscles bulged, emitting a strange and surging aura.

After the transformation of his body ended.

The noble stared at Li Yueming and said, "I admit that your armed ability is very strong. You were actually able to sneak past us and even finish off the two of us in an instant..."

"But that's all. Those two lowlifes aren't good at learning and can't even eat enough. The seven of us aren't that bad. We get nutrient fluids and nutrient paste every day, and we enjoy the best resources!"

"Now that you've activated your armed powers, I don't believe you can still turn the world upside down!"

The armed ability was a method to obtain extraordinary power by squeezing the mysterious factors in the body's cells.

According to the different conditions of each person's body, the armed forces would take on many different postures.

Some increased his physical fitness, while others increased the activity of his cells.

The strength of an individual's armed ability would also differ greatly according to their characteristics.

This method had a strong side effect at the beginning, and it was a method that would harm the enemy and oneself when one was at a dead end.

The reason why it could be widely used and become one of the most powerful martial arts secret techniques recognized by the entire martial arts world was because there was a combination of the breathing method, the circulation of mysterious power, and the nourishing of the body with nutrient fluids. The side effects of activating the armed ability and squeezing the body were controlled within an acceptable range.

Chapter 768: The Ultimate Martial Skill Shocked Everyone!_3

This was why the ability to equip weapons had gradually become one of the secret techniques that martial artists had to learn.

At present, five of the seven noble disciples had already used their armed abilities. Although the remaining two were still watching, it was obvious that if Li Yueming still showed his powerful posture, they would also use their trump cards.

Li Yueming stood still.

There was no doubt that the martial artists of this world cultivated the top-notch techniques.

The way to use the armed ability was attached to the "Third Cultivation Plan for Personal Mighty Power Warriors". It was also the trump card of a Supreme Martial Artist.

Now that it was used by the students, it was quite invincible.

If they had more combat experience, perhaps Li Yueming would have to face them seriously.

However, he was still far from reaching this standard.

Li Yueming felt like a child holding a dagger.

He was still a child, holding a sharp weapon.

Besides, he had this weapon, but he was afraid of scaring the others.

After adjusting his posture, Yin Qi, who had the deepest conflict with Li Yueming, took the lead and rushed out.

At this moment, he had already fully activated his armed ability. His clothes were torn, and he turned into a three-meter-tall giant. He waved his fists and rushed towards Li Yueming.

Although his body looked heavy.

However, his speed was not slow at all.

In just a few breaths, he arrived in front of Li Yueming and punched out fiercely, aiming for Li Yueming's face.

Li Yueming's response was simple.

She took a step back and leaned her upper body back slightly.

With just two simple actions, Yi Qi's attack, which he thought was almost certain to succeed, immediately missed.

After dodging the attack, Li Yueming quickly went up to the other side and said indifferently, "Too slow!"

As he spoke, he used his fingers as a knife and hit Yin Qi's neck quickly and accurately. After the pain in his upper body, Yin Qi's lower body immediately became unstable. After Li Yueming keenly noticed this, he followed up with a powerful sweeping kick. He easily knocked Yin Qi's three-meter-tall body to the ground, raising a cloud of dust. He held his extremely painful neck and rolled on the ground.

Obviously, compared to the previous two who had lightly punched the two commoner children, this time Li Yueming was more particular about his attacks.

This chop wouldn't eliminate Yi Qi immediately, but it would make him suffer. It could be considered a small lesson for his rudeness.

He only used two moves.

A noble who had activated his armed ability fell to the ground in an instant.

Although he had not been eliminated yet, looking at the way he was rolling on the ground, it seemed that he was in more pain than being eliminated directly.

All the teachers and students who were watching the battle from the outside were dumbfounded.

Li Yueming's combat strength was far beyond their imagination.

Simply... Like a monster!

The two commoners who had been eliminated by Li Yueming previously thought that Li Yueming was cold and heartless.

After all, they were still thinking of letting Li Yueming off!

In the end, Li Yueming did not give them any face and eliminated them first.

But now, looking at Yin Qi who was rolling on the ground and crying in front of everyone, they knew that Li Yueming had held back when he fought with them. At least he gave them some face.

This was too f * cking awesome!

It was simply unimaginable how terrifying and superb his martial arts techniques were!

Looking at Li Yueming who was leisurely pacing on the martial arts stage, the two of them could not help but have such a feeling in their minds.

Chapter 769: An unprecedented super genius!_1

Looking at Li Yueming, who seemed to have entered a completely uninhabited place, all the teachers and students below the martial arts practice field were dumbfounded.

One had to know that these were all Level One martial artists who had activated their armed abilities!

In front of Li Yueming, she was as weak as a child.

If they hadn't seen it with their own eyes, no one would have imagined that such a thing could happen.

Indeed, there were all kinds of strange things in the world.

The remaining seven noble children were much stronger than ordinary civilian martial artists. This should be a good foundation laid by long-term consumption of nutrient solutions, nutrient cream, and other supplements.

It was also the greatest source of superiority for this group of noble children.

As for actual combat experience, their performance was not even as good as the civilian martial artists.

After all, the two commoner martial artists were also killed in an instant.

However, there was still a corresponding countermeasure against Li Yueming's attack.

Even if their so-called counter-measures were ineffective, it could be seen that they actually had a certain amount of combat experience. It was just that they were facing a typical hexagonal warrior and cheat player like Li Yueming.

As for these seven noble children, even if they used all their skills, they could not last one or two moves in front of Li Yueming. They were basically insta-killed.

He couldn't even touch the corner of Li Yueming's clothes.

A few minutes later, Li Yueming shook his head and said, "What a bunch of good-for-nothings. They fed the things they learned in school to the dogs..."

He said this without any emotion.

However, it was precisely because of this attitude that made the group of noble children on the ground even more embarrassed.

If Li Yueming dared to talk to them like this on any other day, they would probably be furious and think of ways to take revenge.

But now.

Li Yueming had single-handedly fought against the seven of them and the two commoner children.

The nine of them were tied together and tried their best, but they could not get close to Li Yueming...

This was already a great insult to them.

Now, even if they were mocked by Li Yueming, they could only lower their heads and acquiesce.

A0001 also stood out at the right time. Although the few of them had not been eliminated, they could not continue fighting with their rolling posture. "No. 8, 7, 6, 5, 4, 3, and 2 have lost their will to fight. They are automatically considered to have given up on the battle and eliminated!"

"Number 1, name Li Yueming Ming, obtained the final victory of this combat training!"

After the mechanical voice came, Li Yueming keenly felt that the white rune restriction that originally enveloped the martial arts stage had been removed.

The sound of the wind and human voices from the outside world once again passed through the protective barrier.

He looked around.

Only then did Li Yueming realize that the teachers and students around him were all staring at him.

It was as if Li Yueming was no longer a human, but the incarnation of a monster.

Li Yueming could only smile bitterly.

Ever since he chose to expose his strength and show off, he was already mentally prepared to be the center of attention.

He could only hope that his actions would allow him to enter the attention of the higher-ups of the interstellar universe as a 'genius'. Otherwise, he would really be looking for trouble for himself.

Even though the actual combat training had already ended.

However, the seven noble children were still lying on the martial arts stage in a sorry state.

Especially that high-ranking official's son named Yin Yi, the tears at the corner of his eyes were still wet!

When he fought with him, Li Yueming had obviously given him a lot of information.

Even among the seven noble children, he was the most embarrassed one. The psychological shadow caused by him was even more unforgettable. He was afraid that from now on, he would have to walk around Li Yueming.

Li Yueming ignored them and left the martial arts stage. You can read short, touching, and romantic stories about couples, as well as children's stories for free on [sites0rys\(.\)com](#)

Seeing him return to the queue unhurriedly.

Bu Wuya had a complicated expression.

He originally only wanted to test if Li Yueming was hiding his strength.

He didn't expect Li Yueming to prepare such a big surprise for him.

This time, not only did the pressure not fall on Li Yueming, but it also added a huge psychological pressure to him.

What was going on? Shooting oneself in the foot?

Thinking of this, Bu Wuya could not help but shake his head. A smile actually appeared on his ice-cold face. He walked to Li Yueming Ming and nodded. "This training... Well done, A0001 will report the actual combat training video to the school leaders truthfully and strive to get you a 'special talent recommendation name'!"

He was curious about how Li Yueming, a commoner, managed to do all this.

However, he didn't really throw this question out.

After all, everyone had their own secrets. What he wanted to do was to train talents for the front line, not to investigate why talents were talents, and there was no need to pry into other people's privacy.

However, he did not have to ask how Li Yueming had obtained his martial arts skills and experience.

However, he had to comment and respond to other students.

Then the problem was...

Due to the protective shield blocking prying eyes, the various moves and techniques that Li Yueming used when he fought could only be observed with the naked eye. However, the problem was that even he could only understand a portion of it.

Even he could not see through some of the extremely exquisite hands.

How should he comment on this?

He couldn't just say that he didn't see it clearly and ask Li Yueming to demonstrate it again, right?

Chapter 770: An unprecedented super genius!_2

The surrounding teachers and students had already gathered around, and pairs of passionate eyes were looking back and forth between him and Li Yueming.

It was obvious that many people did not understand the battle just now. Now, they were waiting for him to review it!

It was rare for Bu Wuya to feel a heavy pressure in the academy, and the source of this pressure was actually from a student in his class...

His professional career was facing an unprecedented challenge!

As if he could feel the awkwardness, Li Yueming took the initiative to speak, "A0001, review the battle just now. I think I made a few mistakes!"

Hearing Li Yueming's words.

A0001 was silent for a moment before replying, "Request received. We are now starting to review!"

Soon, a projection of a virtual screen appeared in the sky above the training center. Li Yueming and the nine Level One martial artists appeared on the screen again.

This was the recording of the previous battle, which recorded every move of both sides.

It was simply too convenient to use it for analysis.

When Li Yueming began to move, the A0001 artificial intelligence took the initiative to adjust the video to 0.5 times the speed.

But even so.

The group of people could only see a black shadow flash across the screen.

Even if he was mentally prepared.

When they saw this scene, the group of people couldn't help but feel their hearts skip a beat.

It should be known that this was a scene that had been slowed down by twice, but it was still impossible to clearly capture Li Yueming's figure.

How fast was this speed?

No wonder the two commoner martial artists from before didn't even have time to react before they were sent out by Li Yueming. With such a fast speed, it would be difficult for any Level One martial artist to keep up, right?

A0001 slowed down again, especially when Li Yueming started to move. He played it frame by frame and said in a mechanical voice, "Detected that Li Yueming's initial movement speed is 32 meters per second, and his fastest speed is 46 meters per second. His physical fitness has reached the limit of a Level 1 martial artist, and he has used extremely agile footwork!"

“It is speculated that he is extremely sensitive to ‘Martial Dao movement techniques’ and ‘body control’. He is able to contract his muscles and unleash terrifying strength and speed in a short period of time!”

A0001’s analysis speed was very slow.

However, the logic behind his words was extremely clear.

He actually managed to calculate Li Yueming’s body’s operating method and efficiency.

It was a shocking amount of computing power!

The rest of the people were focused on the two numerical units of 32 meters and 64 meters per second. They were not too surprised by the terrifying computing power displayed by A0001.

Only Li Yueming was staring at A0001 in the air like a country bumpkin, and his eyes burst with a strange light.

A0001 was only a universal artificial intelligence, but its computing power was already so terrifying.

How ridiculous would the higher level A0002 and A0003 be?

It seemed that there was no future in this world if one only walked the path of martial arts. It was only right to supplement it with technology.

Previously, he had not figured out how to use the shiny gold talent of the Machinery God.

Now, he had a rough theoretical prototype in his mind.

A0001 was still analyzing.

The surrounding students were already deeply shocked.

If they only looked at the battle just now.

Without a doubt, it was a one-sided abuse of noobs.

As the main character, Li Yueming didn’t seem to have anything special except for his speed and strength.

However, as A0001 reviewed and analyzed frame by frame, everyone finally understood the extremely complicated martial arts logic behind minimalism.

“This palm strike sent two students, Fu Hong and Su Yunfei, flying. It is estimated that the explosive strength of the body is not less than 1500KG!”

“The reason why he was able to break through the defense of the Heart-protecting Armor without causing any substantial damage to Hong and Su Yunfei is that Li Yueming used Tremor Punch from the Third Martial Artist Cultivation Method!”

If ‘defeating the enemy’ was the ultimate goal of a martial artist...

Then, what Li Yueming displayed in the process of ‘beating the enemy’ was the most beautiful and ultimate art that martial artists pursued!!!

It was simple and efficient, without any sloppiness.

At the same time, the students and teachers below the martial arts stage were reviewing the game.

In the meeting room deep inside the Starry Sky Martial Arts School, the vice-principal had just finished talking about the recent work arrangements for Starry Sky.

Just as Principal Martial Dragon was about to announce the end of the meeting, A0001's voice suddenly rang out, "Mr. Principal, Grade 12 Class 6's form teacher, Bu Wuya, has sent you a video file!"

Martial Dragon frowned and asked, "What about the video's content and accompanying explanation?"

A0001 replied, "He said that this is a video of the students 'actual combat training on the stage in the comprehensive activity room ten minutes ago!"

Martial Dragon was even more confused.

A video of a few students 'actual combat training...Wasn't it just noobs pecking at each other?

What was there to see?

He was one of the few native Level Six martial artists on Planet 7-20003.

Although he was indeed the principal of the Starry Sky Martial Arts School, he was not actually in charge of the daily management of the school. He was only pulled over to be the enrollment mascot and the golden plaque.

The three vice-principals were in charge of the daily affairs of the school.

Therefore, even if Bu Wuya really had something to do, he should have gone to the vice-principal. There was no reason for him to report directly to him.

The vice-principal noticed the change in his expression and could not help but ask, "Lord Martial Dragon, is there a problem?"
