

Maxing MT 771

Chapter 771: An unprecedented super genius!_3

Martial Dragon shook his head and hesitated for a moment before saying, "A teacher from the school sent me a video file. Since everyone is present, I'll just open it and take a look!"

Because they were in a meeting.

Almost all the higher-ups of the school were gathered in the meeting room. The principal, the vice-principal, the dean, the grade director... It was all here.

Martial Dragon had revealed this information in front of them because he didn't want to deal with the trouble alone.

After all, most of his energy was focused on practicing martial arts. He only hoped to break through to Level Seven martial artist in his lifetime and completely get rid of the planet's restrictions on people.

He didn't want to waste his time on some troublesome matters.

When they heard that someone had actually bypassed them to find the principal, the expressions on the three vice-principals' faces were obviously a little uncomfortable. Someone asked directly, "Which teacher is it? You don't know the rules!"

Martial Dragon didn't directly say who it was. Instead, he let A0001 open the video file and glanced at it himself. After making sure that there wasn't any sensitive content, he said, "You guys take a look first. I don't know why he sent me such a video file!"

As he spoke.

A0001 projected the video onto the large screen in the conference room.

As a result, the recording screen on the martial arts stage appeared again.

Looking at the young and immature posture of the students in the video, the senior leaders of the Starry Sky Martial School looked at each other. The dean frowned and said, "Isn't this the actual combat training video for students? Did the sender send the wrong file?"

As the video slowly progressed, everyone saw something interesting.

The main reason was that Bu Wuya had actually allowed Li Yueming to go 1v9, successfully whetting the appetite of the school leaders.

At the beginning, everyone looked relaxed.

After all, although the teachers present were also supernatural beings, they were all civil servants. They might not know more about martial arts than Bo Wuya. At least, they did not see any problems for the time being.

Only Martial Dragon, who was a high-level martial artist, was keenly aware of some clues. His eyes revealed a shocking light as he said sternly, "Wait a minute...Rewind the scene just now!"

Upon hearing his command, A0001 quickly froze the image and rewound it.

This time, Martial Dragon wasn't as distracted as before. Instead, he sat up straight and focused on Li Yueming's every move when he dealt with the two commoner martial artists.

After reading it three or four times, Martial Dragon finally let out a sigh of relief and asked in a muffled voice, "Who is this student?"

A0001 searched for a moment and replied, "This student is Grade 12 Class 6 student, Li Yueming. His facial recognition accuracy is 100%!"

Ignoring the shocked gazes of the other leaders in the classroom, Martial Dragon stood up and ordered, "Get me all the information on this student immediately. Also, inform Bu Wuya to bring that student to the meeting room to find me!"

After doing all this, Martial Dragon looked at the others present and slowly said, "Aren't you guys worried that the Starry Sky Martial Academy doesn't have enough geniuses to be nominated as 'special referees' this year?"

"There's a suitable candidate now!" As he spoke, his voice paused, and his gaze suddenly became very sharp. "And this person... He was probably ten times, or even a hundred times more monstrous than any genius in the Starry Sky Martial Academy!"

Chapter 772: Terrifying Inference, Universe Grade Genius?_1

Martial Dragon's words stunned all the school leaders present.

This young man in front of him... More monstrous than any genius in the Starry Sky Martial Academy by a hundred times?

Although he had fought against several students with his own strength, he was still able to win easily in the end. He could indeed be considered a genius that was rarely seen in decades.

However, no matter how he looked at it, he was still a step away from becoming a true monster, right?

He seemed to have sensed their doubts.

Martial Dragon didn't hide anything. He asked A0001 to pause the video and continued, "Didn't you see? First of all, this student did not use the strength of a martial artist. He did not even use Qi... In other words, the speed and strength that he had just unleashed did not rely on any martial arts power. It was all done by relying on his powerful physical fitness and perfect control of his body!"

Hearing this.

As if waking up from a dream, the school leaders looked up.

It was only then that he realized that it was indeed as Martial Dragon had said. Li Yueming's every move just now did not have any hint of martial arts fluctuations. He was fighting with exquisite techniques and consciousness.

What did this mean?

At the very least, it meant that Li Yueming's combat intuition was not ordinary. His understanding of martial arts and martial arts was not something that ordinary people could compare to!

To achieve this, one needed extremely high talent and hard work day after day, year after year.

He also needed a pure heart of martial arts.

Such a student was indeed beyond the scope of ordinary geniuses.

Even in the entire Star Field, there were very few people who could do these things.

The vice-principal's voice trembled. After sizing up Li Yueming in the video, he said in disbelief, "So... Did our school produce a Star Sector-level genius?"

A Star Sector-level genius...

If it could grow successfully, it would be an existence that could have a profound impact on the planet!

Let's not talk about anything else.

At the very least, it would give planet 7-20003 more bargaining power in the entire star field and enjoy more benefits from the Alliance of Order.

He would not be as secluded and unknown as he was now.

Therefore, after knowing that Li Yueming might be a Star Sector-level genius, he was shocked.

The vice-principal was so excited that he almost fainted.

Unexpectedly, Martial Dragon shook his head and said, "If I remember correctly, there was a Star Sector-level genius in the Starry Sky College more than 300 years ago, right? Although he had sacrificed himself at the front line before he could fully mature... But it still appeared!"

Hearing this.

The group of school leaders present were stunned again.

After a while, he understood Martial Dragon's meaning.

The vice-principal had completely doubted his life this time. He said with a somewhat uncertain tone, "So, Lord Long Wu, you... Your meaning is... This student's talent level was even higher than that Star Sector-level genius?"

When Martial Dragon heard the vice-principal's doubtful tone, his eyes immediately turned vertical. His voice became more serious as he repeated, "So my explanation wasn't clear enough? I'm saying that he's ten times more monstrous than any genius in the Starry Sky College. How many times do I have to repeat myself?"

Without a doubt.

Martial Dragon's words were like a clap of thunder to the school leaders present. At this moment, they were so shocked that they were both tender and tender.

One had to know that the limit of what they could imagine was a Star Sector-level genius. However, according to Martial Dragon's judgment, Li Yueming's talent was ten times or a hundred times more terrifying than that of a Star Sector-level genius...

Therefore, this young man in front of him who was still unknown for the time being...A universe level genius?

Was this really an existence that could be nurtured by a small planet like them?

To be honest.

All the school leaders, including the three vice-principals who were in charge of the Starry Sky Martial Arts School, were doubting their lives.

Compared to a universe level genius, he can't be a real genius.

They were more inclined to think that there was a mistake in the Dragon Martial's judgment.

After all, this result was too unbearable.

Looking at the incredulous gazes of the school leaders, how could Martial Dragon not doubt life?

However, after witnessing Li Yueming's various martial arts techniques and body control in battle, who could understand the shock in his heart?

As a Level Six Martial Artist, he was a powerful martial artist.

He believed that he had already reached a high level in the path of martial arts.

But even so.

Even he couldn't fully understand some of the techniques that Li Yueming had just displayed.

He could only understand part of the logic by analyzing it separately and repeatedly.

In such a short period of time, he even had some doubts about his martial arts.

One could imagine how much shock Li Yueming had given him!

After coughing a few times, Martial Dragon weighed the pros and cons in his heart for a moment before speaking again,"It's not as exaggerated as you think. It shouldn't be a universe-level genius, but this student's talent shouldn't be something that ordinary star sector-level geniuses can compare to!"

Hearing this explanation.

Only then did the suspicion in the school leaders' eyes lessen a little.

Fortunately, he was only a Star Domain-level genius. My ass!

It was already terrifying enough for a player to have talent that was even more terrifying than the average Star Sector-level genius!

After picking up such a precious piece of trash, as long as the Starry Sky Martial Academy sent him to the stage where he should go, it might even become a school that was slightly famous in the entire Star Field in a few hundred years!

At the thought of this, a ball of fire burned in the hearts of all the school leaders. They wished they could immediately run over to verify the authenticity of the matter.

Chapter 773: Terrifying Inference, Universe Grade Genius?_2

She finally suppressed the thought of not being too elegant.

After all, Martial Dragon had already asked A0001 to inform Bu Wuya and Li Yueming. If everything went as planned, the two of them should be on their way to the office by now.

What they needed to do now was to calm down.

He couldn't let other schools get too much information about this.

Otherwise, he would be shooting himself in the foot if he came to poach her.

He pondered.

The few of them looked up at the virtual screen again.

Previously, because they didn't quite understand why Bu Wuya had suddenly sent such a video, the Starry Sky Martial School's higher-ups and Martial Dragon himself hadn't paid much attention to the content of the video.

Now that they realized the significance of this video, the group of people focused on observing.

The video, which was less than ten minutes long, had been flipped over and over several times.

The more he looked, the more shocked he became.

On the other side, Li Yueming and Bu Wuya had already received a message from the school leader.

He was indeed on his way to the meeting room.

Bu Wuya hadn't said anything before.

After all, there were too many students present at that time, and some things were not suitable to be made public in front of so many people.

Now that there was no one around, it was more suitable.

He glanced at Li Yueming and asked, "How did you comprehend it? Such a peak martial art technique, it's simply... This is unbelievable!"

Li Yueming had already guessed that he would ask this question.

However, this was not a taboo topic.

Therefore, he naturally replied, "I've comprehended it from the 'Third Martial Artist Cultivation Plan'. If I have to say what's special about it, it's probably because I like to think more. I'll always deduce some battle scenes in my mind..."

He said it very casually.

However, Bu Wuya didn't sound so relaxed.

The third set of martial artist cultivation plan was as deep as the sea. This was publicly acknowledged in the martial artist world.

The general principles of this plan were finalized by the current World God of the martial arts side of the third universe.

The branches of martial arts were supplemented by Supreme Martial Artists.

If such a comprehensive martial arts cultivation plan was really as simple as it seemed on the surface, it would be too challenging for one's intelligence.

The problem was that this plan was easy to learn. Anyone could learn a little.

However, it was even more difficult to truly learn.

How many martial artists could comprehend one percent of the details in their lifetime? It was already enough to make a name for themselves. Those who could truly understand this plan were not yet born, but at least they were not existences that ordinary martial artists could come into contact with.

And now, Li Yueming was able to understand this plan in such detail just by thinking and deducing. There was no doubt that it was a very terrifying talent.

Bo Wuya had taught for so many years and had seen many geniuses.

However, someone like Li Yueming, who could comprehend martial arts so thoroughly at the age of seventeen or eighteen, was really unheard of and unheard of.

He wondered how many freaks with such talent could exist on the top ten planets of the Central Star Field of the Alliance of Order.

I'm afraid there aren't many of them!

Bu Wuya didn't know, but it didn't affect him at all.

The Starry Sky College was neither small nor big.

Under the guidance of A0001, the two of them took the campus express train and arrived at the office building in 20 minutes.

As they got closer and closer to the meeting room, Bu Wuya finally came back to his senses.

He turned to look at Li Yueming, who was standing beside him with an indifferent expression. Bu Wuya said with a rare look of seriousness, "Remember, after you go to the Star Domain, try not to go to the frontlines as much as possible. Even if you really want to go, you must be very careful!"

"The Zergs are very scary. They can keenly sense the difference in energy levels between geniuses and ordinary people. There are even Zergs called 'Hunters' who are responsible for hunting down the elites of the Alliance of Order who have yet to mature!"

"The Starry Sky College had a super genius more than 300 years ago. In the end, because of his arrogance, he revealed his whereabouts on the frontline battlefield and was eventually intercepted and killed by the Insect Hunter Team!"

Obviously.

Bu Wuya had also noticed the talent that Li Yueming had displayed.

In order to prevent Li Yueming from getting carried away by the various flowers that he might face next and becoming conceited and arrogant, he deliberately told Li Yueming about the miserable outcome of the super genius more than 300 years ago.

Good medicine is bitter to the mouth, but good advice is unpleasant to the ear.

There was no doubt that as a teacher, Bu Wuya lived up to his status.

“Don’t worry, I’ll take this as a warning!” Li Yueming nodded solemnly.”

Li Yueming’s attitude towards this world and the ultimate test of the Reincarnation Mark was extremely cautious.

The reason why he revealed a part of his talent was because he had made a decision after careful consideration.

After all, this world was different from the previous worlds.

Because of the Zergs, the external enemy, the Alliance of Order was generally considered united. They were very tolerant of geniuses. As long as they showed enough talent, the Alliance of Order would shield them from most of the open and hidden attacks on their growth path.

Moreover, practicing martial arts also required a huge investment of resources. Other than joining the Alliance of Law and Order, there was no other way to obtain a large amount of resources.

After considering everything.

Chapter 774: Terrifying Inference, Universe Grade Genius?_3

Li Yueming naturally wouldn’t be stupid enough to work alone.

Of course, everything came with a price.

Just like what he had said when he first entered this world, everything was to stop the Zergs from invading the central universe. As long as they were united on this point, other problems could be put aside.

The danger of being an enemy of the Insect race could be imagined.

As they chatted, Li Yueming suddenly thought of something.

After hesitating for a moment, he finally said, ”Teacher Bu, I want to ask you for a favor!”

” What is it?” Bu Wuya was surprised.” What is it?”

“If I get into the military college, I’m afraid I won’t be able to stay on this planet for too long. I hope you can help me take care of my uncle, aunt, and cousin...”

As Li Yueming spoke, he paused for a moment and sorted out his thoughts before continuing, ”Not long after my parents gave birth to me, they went to the battlefield, so I’ve troubled uncle and aunt a lot since I was young.

If I go to the depths of the starry sky, I probably won’t be able to be filial to them in the future. Moreover, I don’t have anyone I can trust here...After thinking about it, only you are worthy of my trust.”

Hearing Li Yueming’s words, Bu Wuya was a little surprised. After a moment, he burst out laughing, ”I wonder if you think too highly of me or look down on yourself...With the talent

you've shown now, how can I take care of your family? The entire 7-20003 planet will have a lot of people in power who will fight to give you the best resources!"

Of course, Li Yueming knew that what he said was the truth. But because it was the truth, he needed more protection and defense, right?

Therefore, he ignored Bu Wuya's teasing and continued to look at the man in front of him with a serious expression.

Only then did Bu Wuya realize that Li Yueming wasn't joking. He really wanted him to take care of his family.

Therefore, he put on a stiff face and said solemnly, "Although I don't think I can provide much help, since you took the initiative to mention it to me, I can naturally agree... However, I have a condition that you have to agree to!"

"What?" Li Yueming was puzzled.

Bu Wuya was lost in thought. After a while, he replied, "I was born on a remote planet that had already been conquered by the Zerg. I was lucky enough to be saved by a passing interstellar army.

I've spent most of my life shuttling between the various battlefields on the front lines. It wasn't until I was injured and retired to the Starry Sky Martial Academy to become a teacher that I truly found the meaning of life. I was determined to shine with my limited talent and make the greatest contribution to the Central Universe.

If nothing unexpected happens, you should be the highest peak that I can reach in my teaching career. Before the Zergs are completely repelled and destroyed, remember to cherish your life. Don't die!"

Li Yueming also nodded solemnly. The guy who was called the cold-faced instructor in front of him didn't seem to be as cold as he remembered.

It was just that he was used to the simple and efficient way of doing things and was not so good at expressing his feelings.

As they conversed, the advanced conference room in the deepest part of the Starry Sky College's office building was already in front of them.

Li Yueming and Bu Wuya also restrained their excess emotions and tidied up their appearance.

The two of them stood at the door. After A0001 mechanically detected their faces, it quickly said, "Student Li Yueming, Teacher Bu Wuya, the principal and vice principal have been waiting for you for a long time. Please go in!"

Chapter 775: Ten Million Scholarship

As a smart assistant, A0001 was spread throughout the galactic society. After receiving its feedback, Bu Wuya walked in front and knocked on the door of the meeting room.

After a moment of silence, Martial Dragon's voice rang out in the meeting room, "Please come in!"

Bu Wuya pushed open the door, and Li Yueming followed him into the meeting room.

Bu Wuya was stunned when he saw the scene in the meeting room. He had not expected so many high-level leaders of the Starry Sky Martial School to be sitting neatly in this unassuming meeting room.

The moment he entered the meeting room, Li Yueming immediately felt a pair of scorching eyes looking at him.

The most enthusiastic ones were the three vice-principals on the left. After all, they were the actual managers and benefactors of the Starry Sky College. Martial Dragon was only in name.

The Starry Sky College's appearance of a suspected Star Sector-level genius like Li Yueming was also the most beneficial for them.

Therefore, the three vice-principals looked at Li Yueming passionately.

Next was the principal, Martial Dragon, who was sitting at the head of the table. As a pure martial artist who was obsessed with martial arts, Martial Dragon was naturally very interested in a super genius like Li Yueming.

A group of school leaders stared at Li Yueming and sized him up.

A moment later, Wu Yue, the vice-principal who was sitting next to Martial Dragon and actually managing the Starry Sky Martial Academy, asked, "You're a student from Grade 12 Class 6. Your name is Li Yueming, right?"

Li Yueming nodded and said in a neither servile nor overbearing manner, "May I ask why the principal called me here?"

Vice-Principal Wu stroked his beard. His eyes were very sharp. He didn't say anything and just gestured to A0001 beside him. Immediately, the big screen showed the video of Li Yueming's 1v9 on the martial arts stage.

In the picture, Li Yueming was strolling leisurely in the courtyard, easily knocking down a group of students who usually boasted of being from noble families.

No one could even touch the corner of his clothes.

Looking at the video behind him and then at Li Yueming, Vice Principal Wu slowly opened his mouth to confirm, "Do you know what the talent you showed just now means?"

As a reincarnator, Li Yueming knew what his talent meant.

There would be a difference between individual power and world level.

However, there was no difference in terms of combat skills and experience.

Although Li Yueming was only a Level One Martial Artist, he had countless battle experiences that he had honed on the edge of life and death. In addition, he had analyzed many martial arts techniques in the "Third Practice Plan for Personal Mighty Power Martial Artists" during this period of time.

Even if he had only displayed one-tenth of his experience and skills, he could be considered a peerless genius at this age.

But now was not the time to be so honest.

Therefore, he shook his head and said, "I don't know. Please tell me, Principal!"

Wu Yue's voice was a little shaky. It was obvious that he was trying very hard to control his emotions, but he still lost his composure and said, "This means that you are likely to be listed as a key training target by the Military Committee. Among the 'special referees' of planet 7-20003 this year... There will be a name for you!"

Li Yueming's heart was as clear as a mirror, but he still had to put on an act.

He hurriedly revealed a dazed expression and said, "This... Really?"

Wu Yue didn't even have time to speak.

Martial Dragon took over the conversation and said, "If the martial arts skills you showed during the actual combat training are real, I can even find a way to send you to the Imperial Sun Star and enter the best martial arts academy of the Alliance of Law in the Imperial Sun Star Field to cultivate!"

Li Yueming appeared a little fearful and quickly said, "Thank you for taking care of me, Principal. However, my martial arts skills are very clumsy. I'm afraid I can't go up to such a big stage!"

After a few questions, the group of school leaders had a good impression of Li Yueming.

After all, they had already obtained Li Yueming's personal information.

According to the information, Li Ming did not have a family background and was very clean. He was a normal commoner genius.

To them, it was definitely a huge potential stock worth investing in.

At this moment, only the homeroom teacher, Bu Wuya, had a strange expression on his face. After all, the current Li Yueming was completely different from the Li Yueming he knew.

This harmless attitude seemed to have dug a pit for the school leaders, waiting for them to line up and jump into it!

Bo Wuya opened his mouth, wanting to say something.

However, thinking about it carefully, there seemed to be nothing wrong with this.

After all, one was willing to fight while the other was willing to suffer.

Li Yueming needed the school's investment, and the school also needed Li Yueming to make some achievements to increase his voice.

There was simply no more suitable partner than this.

About two hours later.

Li Yueming finally walked out of the meeting room.

The risk this time was clearly worth it. Vice-Principal Wu had agreed to apply for a personal special fund of 10 million Universe Credits for him to subsidize his martial arts training and other needs.

Moreover, this money was not a one-time payment. As long as Li Yueming still had this need, the school would transfer 10 million yuan to his card every year.

The money was given by the school.

Next, as long as Li Yueming could successfully pass the military academy's assessment and be selected as a 'special referer', the 7-20003 planet security committee would also give him an additional highest-level planet talent training program 'special fund.

Chapter 776: Ten Million Scholarship (2)

These two sums of money alone were enough for Li Yueming to cultivate martial arts in the early stages.

Apart from that, Principal Long Wu also promised to write to his old friend on the Imperial Sun Star to apply for a place for Li Yueming to enter the Imperial Sun Star Military Martial Arts Academy.

This was only the tip of the iceberg for the treatment of a genius.

Whether it was planet 7-20003, the Emperor Sun Star Area, or the entire Alliance of Law, the resources for the truly talented young people could basically satisfy all the needs of cultivation.

Of course, all of this was on the premise that he could display enough talent and strength to make the Alliance of Order take him seriously.

The universe was too big. Just a small planet like planet 7-20003 alone had a population of hundreds of millions. The number of prodigies born from it was naturally countless.

To stand out among such a huge number of people and step on other people of the same age, it was definitely not something that could be done with the word 'genius'.

Luck, opportunity, hard work...None of them could be missing.

Of course, all of this had nothing to do with Li Ming.

Because he wasn't a genius at all, he was just a cheat player.

Cheats were never reasonable or logical.

Don't ask, asking is cheating.

After that, she came out of the meeting room.

Today's class was almost over.

Li Yueming didn't stay for too long and took the public transport home.

Vice President Wu wanted him to live on campus. After all, not only could he concentrate more on his studies, but he could also get good protection. However, Li Yueming obviously did not agree.

Not to mention that if he really exposed his matter, the school would not be able to protect him.

He said that he could not explain it to his uncle and aunt at home.

Li Linglong's school was closer to her home than Li Yueming's.

Therefore, by the time Li Yueming slowly walked home, Li Linglong had already returned for a while. At this moment, she was undergoing toughness stretching and internal training.

Li Linglong rarely talked about her dreams to outsiders. She put them into action more quietly.

Boarding students would occasionally be dragged to the school for additional training by the teachers.

In order to keep up with the progress of his studies.

Li Linglong would train for an extra hour or two every day after she went home.

Even boys might not be able to endure such high-intensity training. It was hard to imagine how a girl like Li Linglong could endure it without enough nutrition.

After hearing Li Yueming's return, he was shocked.

Li Linglong turned her head and glanced at him. "My mom has to work overtime today. The food has been prepared at noon and is in the fridge. If you want to eat, go heat it up yourself!"

Hearing the girl's cold voice.

Li Yueming Ming replied: "What about you?" "You're not eating dinner today?"

Li Linglong pursed her lips and said without turning her head, "I've been controlling my body fat percentage during this period of time."

Looking at the girl's slightly thin back, Li Yueming sighed and didn't say anything. He took out all the food from the refrigerator and heated it in the microwave.

About three minutes later.

The microwave made a crisp 'ding' sound.

Li Yueming took out the hot food and placed it on the dining table. He then said, "Come over and eat some. I won a scholarship today. It will be distributed in a day or two. By then, our family won't be short of money!"

The girl's daily living expenses were even less than his.

Although she was young, she did need less nutrition and energy.

But in the end, he could only barely guarantee that he would not go hungry.

Now, the reason why Li Linglong said that she would not eat at night was that the so-called 'control of body fat percentage' was naturally a lie that could not be faked.

The truth was that Li Yueming was about to take the military college examination. Li Linglong didn't want her parents to bear more pressure, but she also wanted him to eat more.

That was why he lied and said he wasn't hungry.

She had always been like this. Although she said she was fierce, she was actually kinder than anyone else.

Hearing Li Yueming's words.

Li Linglong rolled her eyes and said unhappily, "How much scholarship can a Rank-1 martial artist like you get? It might not even be enough to buy two nutrient fluids, so how could he not be short of money? Let's finish the exam first. If we don't pass, we might be able to find a job..."

Becoming a Level One Martial Artist naturally came with subsidies.

However, compared to the huge expenses required on the martial arts path, this subsidy could only be considered a drop in the bucket.

However, compared to ordinary people, Level One martial artists were still popular.

As long as Li Ming was willing, he could find a job on planet 7-20003 with a monthly salary of tens of thousands without any pressure.

However, Li Yueming was still a student, and he had not completed the Military Academy assessment. It was basically impossible to change his family's financial situation through the identity of a Level One Martial Artist in a short period of time.

Li Linglong still had no intention of coming over for dinner.

Li Yueming had no choice but to take the initiative and say, "Ah, it's indeed not much. It's about 10 million Universe Credits..."

Li Linglong, who was leaning against the wall and stretching her legs, stiffened when she heard this. After a moment, she turned around and sized up Li Yueming. She said in disbelief, "How much did you say?"

Obviously, she thought that there was something wrong with her hearing just now.

"10 million Universe Credits per year!" Li Yueming's voice was very soft, and his tone was as if he was asking, 'Have you eaten?'

After hearing the amount again and confirming that she had not heard wrongly, Li Linglong's eyes instantly widened. Her thin and fair face puffed up like a bun. "Ten million universe dollars? Really? What did you do?"

Li Yueming spread his hands and smiled. "I didn't do anything. It's just that the school thinks that I'm talented and will definitely become a figure in the future, so they applied for this scholarship for me!"

"Also, it's not a total of 10 million, but 10 million a year. When this money arrives, I'll buy a big house for Uncle and Auntie and find them an easy job!"

"Nutrient fluids, nutrient solutions, and so on...None of them will be a problem!"

Li Linglong was stunned. She still couldn't believe it.

However, looking at Li Yueming's serious face, he didn't seem to be joking with her.

So...

Was it really a scholarship of ten million yuan? And ten million a year?

After being stunned for a while, Li Linglong's eyes suddenly turned red. She said with a trembling voice, "You're saying that you're a Is that true?"

"Of course!" Li Yueming nodded.

His uncle and auntie treated him well. Although his cousin was unforgiving with her words, she still treated him as a family member in her heart.

His predecessor could not repay this kindness in time, but he was different.

Although this sum of money was not much, it was definitely a terrifying windfall for this working family that was not well-off.

Li Linglong had been holding back her tears.

However, she could no longer hold it in, and countless crystal clear tears rolled down her face.

Seeing this situation, Li Yueming's expression softened a lot. He said, "Alright, don't cry. I won't let you suffer anymore in the future. Come and eat. You're almost starving like a sick cat, yet you're still trying to be brave!"

Li Linglong wiped her tears. As she wiped, her snot was still bubbling. At this moment, she was really no different from a crying cat.

She finally suppressed the grievance in her heart.

Li Linglong turned her face away and said, "Hmph, I hope you're not lying to me. Otherwise... You know the consequences!"

As she spoke, she gestured with her small fists and said fiercely, "I'm almost a Level One Warrior. If you dare to lie to me, I'll beat you up!"

Although Li Linglong's expression was not much different from usual.

However, coupled with this multicolored cat face, the deterrence was undoubtedly reduced by several levels.

Li Yueming couldn't help but laugh. "Tsk, you're just a little girl. You won't be able to touch me even if you train for the rest of your life!"

"Who are you calling a young girl!" Li Linglong was flustered and exasperated. She bared her fangs and brandished her claws as she rushed over.

The siblings played around.

They were all in a much better mood.

Chapter 777: Special Referrer Assessment!_1

The world was lonely, the mountains and rivers were vast.

There were so many living beings living in the universe, but they were still unable to fill the boundless starry sky.

Looking at the curtain of stars hanging high above his head, Li Yueming sighed in his heart.

Uncle and aunt had already returned from work.

Li Yueming and Li Linglong did not tell them about the scholarship.

He wanted to give them a surprise after the money was transferred to his account.

After closing his eyes to enjoy his leisure time, Li Yueming once again focused on studying the two plans.

To him, the third cultivation plan of the Mighty Power Practitioner was an absolute gift to him.

Whether it was to enhance one's martial arts experience or to advance to a higher level of martial artists, one could not avoid a deep understanding of this plan.

Li Yueming was naturally unwilling to let go of any time to study such an important foundation.

There were only 13 days left before the Military College assessment. Although Li Yueming was only a Level One Martial Artist, with his current combat strength, passing the basic assessment would not be a problem.

Therefore, compared to the almost guaranteed Military Academy assessment, what Li Yueming needed to pay more attention to was actually the implementation of the special recommendation quota.

This afternoon, many leaders of the Starry Sky Martial Arts School had already decided to report Li Yueming's name to the Military Affairs Committee.

However, there were close to a million outstanding students among the 30-plus famous schools on planet 7-20003. Even these famous schools could only submit one 'special recommendation' quota.

In total, there were only dozens of referees.

There were at most five spots for special referees, and a few of the five spots on planet 7-20003 were often cut...

In other words, it was already very good for three out of more than 30 students to be selected.

In order to stand out from this group of carefully selected geniuses, each person who obtained a special recommendation had to have an absolute advantage over the other ordinary geniuses!

Only by doing so would he be recognized.

For the sake of fairness, in order to not let a genius go and not choose a wrong person, the Military Committee would set up a special assessment for the 'special referees' every year before the start of the military academy assessment.

The goal was to select the best students from the outstanding students of the various academies.

He also provided them with the best cultivation conditions.

During this process, the garrison commander and deputy commander of the military committee of planet 7-20003 who had the authority of 'special referees' would take time to personally arrive at the scene.

According to the performance of the students, they would consider whether they needed to use their authority to open an internal passage for the geniuses.

It could be said that compared to the military college exam, where the passing rate was as high as one-third, the 'special referees' exam was the high-end exam that attracted the most attention from the younger generation of planet 7-20003.

Even during the final revision period, when time was the most pressing, the major martial arts schools would still organize students to watch the battle during the start of the 'special referees' assessment.

Especially the graduates from the same batch.

It was also a chance to watch the battle from the closest distance.

It was to let the students know that there was always someone better than them.

It was also to allow the students to accumulate more combat experience.

After all, the focus of martial arts was always actual combat, and the end point of actual combat was the insect tide that threatened the entire universe of order.

The Starry Sky Martial Academy didn't have any young geniuses who could shoulder the banner this year. The school leaders had already argued about this many times during this period of time.

This was also the reason why Li Yueming was able to easily obtain a recommendation spot when he had just displayed his powerful combat strength.

But even so, the school leaders still reminded him repeatedly that he had to be extremely cautious during the assessment.

After all, most of the geniuses of the same age who stood at the top of the other academies had already become Level Two Martial Artists. Li Yueming was only a Level One Martial Artist now, so he might not be able to gain much advantage in the assessment.

Therefore, for safety's sake, my fellow countrymen,

Li Yueming was ready to break through as soon as possible and become a Level Two Warrior.

In the following period of time, Li Yueming continued to absorb and consolidate his martial arts cultivation.

The Star and Moon Arts that he had spent on reincarnating points to replenish were also showing great effects.

If the "Third Cultivation Method for Personal Mighty Power Practitioners" was a top-notch martial arts cultivation method, then the "Star Moon Art" that Li Yueming had painstakingly developed and improved was the most common top-notch cultivation method.

The effect of the combination of the two was far greater than the increase brought by cultivating one of them alone. The Martial Dao Qi in his body, which reflected the strength of a martial artist, was also increasing at an extremely rapid speed.

It seemed to change every day.

A week passed in the blink of an eye.

On the third day after the discussion with the school leaders, the ten million scholarship promised to Li Yueming was announced.

It had to be said that the Starry Sky Martial Academy was very generous in this aspect.

After all, this was actually an extremely cost-effective investment for the school. The only thing that troubled the school was not the large amount of money invested, but the lack of students worthy of their money.

If Li Yueming could successfully display his talents, these investments would return to the school thousands of times in the future.

That night, Li Yueming went to the Federal Bank to withdraw five million yuan.

Chapter 778: Special Referrer Assessment!_2

When the money was placed on the dining table, the uncle and aunt's brains turned off.

Looking at the white banknotes on the table, she didn't know what to say.

For working-class families like them, a scholarship of 10 million yuan was basically an unimaginable amount in their lifetime.

But now, such a huge amount of wealth that they did not even dare to dream of was right in front of them...

This kind of direct shock was something that no one could describe unless they experienced it personally.

When he finally came back to his senses, the uncle immediately got up and locked the door. He turned to look at Li Yueming and said with a serious expression, "Where did this money come from? You didn't do anything illegal, right?"

Li Yueming smiled.

But before he could say anything, Li Linglong wrinkled her nose and said, "Dad, what are you talking about? We are all outstanding young men with a bright future. Who would be stupid enough to make money by breaking the law?"

He saw that his father's expression was still a little suspicious.

It was obvious that he didn't believe it.

After all, both Li Linglong and Li Yueming were just a group of students who had just come of age.

Now that he had suddenly taken out so much money, he could not think of any other plan other than breaking the law.

Li Linglong kept him in suspense for a while.

Seeing that his father, who had always been good-tempered, was really anxious, he hurriedly said, "Don't, don't, don't. I've already inquired about Brother Shi's scholarship. He was awarded a 'special recommendation' spot by the Starry Sky Aristocrat Martial Arts School because of his excellent combat results. This 10 million scholarship is just a bonus!"

Hearing Li Linglong's answer.

This time, not to mention the uncle, even the aunt fell into a daze.

Didn't they know about Li Yueming's results?

Although he was not at the bottom of the class.

However, he had only been able to barely keep up with the school's progress.

He was about to take the military academy exam and barely broke through to Level One Martial Artist.

How could he have received so many huge scholarship awards?

Everyone's eyes were on him.

"Don't look at me. I'm not too sure myself." Li Yueming smiled.

At this point, he scratched his head and continued to play dumb. "Maybe it's because I have a thorough understanding of martial arts techniques? During this actual combat training, one person defeated nine other students who were level one martial artists practitioners. Then, the principal and the vice principal held my hand and told me that I was a martial arts genius."

Afraid that his uncle and aunt wouldn't believe him, Li Yueming was about to pass the video file in his pocket to them.

After all, Uncle and Auntie had been down-to-earth for their entire lives and had never hoped for anything beyond their abilities. If they did not explain the origin of the money in front of them, with Uncle and Auntie's personalities, they might not even be able to sleep soundly.

However, he did not expect his uncle to accept it faster than he had imagined.

He held Li Yueming's hand and said in relief, "As expected of the son of our Li family. He's even more outstanding than your father when he was young..."

At this point, the uncle's voice suddenly paused as if he had recalled some bad memories. After a moment, he sighed heavily and said, "Sigh... 'Let's not talk about this. This money is sponsored by the school. Uncle and Auntie can't take it. It just so happens that you're going to take the exam too. Go buy more nutrient fluids and supplements to nourish your body! Uncle is useless. It's been hard on you all these years!'"

Beside him, Li Linglong obviously liked to hear these words, but she pursed her lips and did not say anything, which was rare.

Li Yueming had already guessed that his uncle would decline.

However, it was obvious that Li Yueming could not monopolize the money, so he said directly, "Uncle, the school's scholarship is 10 million yuan. I only took out 5 million yuan here to buy nutrient fluids and supplements. The remaining 5 million yuan is more than enough! Besides, I'm a genius now. The scholarship will only increase year by year in the future. Don't worry!"

As she spoke, Li Yue did not give them a chance to refuse.

After giving Li Linglong a look, he decided, "Alright, it's settled then. Uncle, Auntie, even if you don't think for yourself, you have to think for Linglong!"

"Her talent has always been much better than mine, but she lacks some resources. Now that she had this sum of money, she might be able to become one of the best in the academy!"

Seeing this, Li Linglong also raised her head and said, "Humph! Dad, Mom, you guys are thin-skinned, but I'm thick-skinned. If you don't want it, I'll take it myself!"

The two of them echoed each other.

After thinking about it, Uncle and Aunt did not act pretentious anymore. They nodded and said, "We are one family, so let's not talk nonsense. Since Yueming has made such an arrangement, your uncle and I naturally have no reason to object..."

“We’re already old. It’s indeed time for us to change our mindset and keep up with the pace of you young people!”

The uncle was even happier. He patted Li Yueming’s shoulder and said happily, “It just so happens that Uncle has also received his salary today. In order to celebrate the birth of a martial arts genius in our family, let’s go. I’ll bring you guys to a restaurant outside to eat and drink!”

The usually thrifty auntie also smiled at this moment. “Don’t just think about that lousy wine of yours. You have to buy some supplements for our two precious babies!”

Hearing this, the arrogant uncle scratched his head awkwardly. In an instant, he was beaten back to his original state.

The few of them looked at each other and smiled. They were all in a very happy mood.

He had endured so many days without money.

Although he was living in poverty, he was still quite happy.

Although they had earned a huge sum of money now, the uncle and aunt only wanted to go out and cook a good meal to celebrate!

After eating and drinking, he bought nearly 500,000 yuan worth of nutrient fluids and nutrient cream for Li Yueming and Li Linglong.

The few of them then returned the way they came.

To be honest, Li Yueming really liked this kind of family atmosphere.

If it was possible, it would not be bad to just get married and have children and live an ordinary life.

Unfortunately, this was beyond Li Yueming’s reach.

Not to mention the fact that Li Yueming himself shouldered a responsibility that would not allow him to be half-hearted, just the initial deduction of the invasion war that would suddenly appear more than 40 years later, if Li Yueming did not improve himself and prepare well, all life and material energy, including planet 7-20003 and the Imperial Sun Galaxy, would become nutrients for the Zerg.

The happiness in front of him was naturally like a bubble under the sun, shattering at the touch.

Nothing in the world could be perfect, and precious things were precious precisely because they could not be owned for a long time.

The only way Li Yueming Ming could do it was to cherish every single day that she could stay with her uncle, aunt, and cousin.

As for what happened after that, he would only be qualified to consider it after he had enough power and strength.

A week later, the Military Affairs Committee organized a special recommendation assessment. Li Yueming had already touched the threshold of a Level Two Warrior.

If he wanted to, he could become a Level Two Warrior anytime.

However, Li Yueming did not do so.

After all, he had just become a Class One Martial Artist a while ago. It had only been a short while, and he had already advanced to Class Two City Martial Artist. Such a terrifying advancement speed was not something that could be explained by the heavens.

If martial arts techniques could be explained by terms like 'intuition' and 'innate', then the level of martial arts could only be improved through years of training and accumulation.

Only a very small number of geniuses could have a flash of inspiration in the process of life-and-death combat or painstaking study, but this still could not be separated from the daily accumulation of polishing.

For someone like Li Yueming who broke through a few days after becoming a Level 1 martial artist, it was not unprecedented in the entire universe, but it also went against the common sense of the ordinary people on the path of martial arts.

Under such circumstances, Li Yueming's rash breakthrough to Level Two Martial Artist might attract unnecessary attention.

Of course, this was not the main reason.

After all, Li Yueming had already made up his mind to create a 'genius' persona.

So what if it was against common sense?

Genius itself was a term that defied common sense.

Even if it caused the outside world to be shocked and spy on him, Li Yueming was confident that he could resolve it one by one.

The main reason was that Li Yueming felt that his understanding of Level 1 martial artists was not comprehensive enough. Although the advancement did not affect him much, it was still a little uncomfortable.

This was obviously unacceptable to Li Yueming, who pursued perfection and couldn't tolerate sand in his eyes.

Therefore, after considering both aspects, Li Yueming gave up on breaking through immediately. Instead, he chose to continue training for a while and consider it after his body was perfect.

Even if something unexpected happened during the 'special recommendation' assessment, the worst that could happen was to perform a scene similar to a 'breakthrough' in front of everyone.

Chapter 779: Test, Terrifying Martial Arts Techniques!_1

The Alliance of Order, Year 7433 of the Fourth Era, August 28th.

This was originally an ordinary day in the universe, but the Alliance of Order gave it a unique meaning.

For many young people in the martial arts world of the third universe, today was the final warm-up before the start of the military college assessment.

And for the few geniuses who were recommended by the martial arts school, today was a stage specially built for them to shine.

That's right, today was the day of the selection of the "special referees" within the Military Committee.

The young geniuses who could stand out in this grand examination had a high probability of obtaining the favor of the military committee's planetary-level higher-ups. From then on, they would lead a life completely different from ordinary geniuses.

Whether it was resources or treatment, there would be a huge difference between geniuses who were recommended by special referees and those who were not.

It was precisely because of the huge gap between the two that the various academies and countless geniuses were even more determined to obtain this spot.

If it wasn't for the military committee, the Alliance of Order, which strictly prohibited candidates from taking the interplanetary exams, all the geniuses in the universe would probably go to a remote planet like 7-20003 just to get a spot.

Of course, none of this had much to do with Li Yueming. Anyway, no matter how difficult it was, he was determined to get this spot.

7-20003 There weren't many schools on this planet that were qualified to recommend geniuses.

In addition, they were selected from other channels.

There were a total of 36 students participating in the "special referees" assessment.

Compared to previous years, this number was actually on the high side.

More than 30 people were competing for three spots, and each of them had to surpass the other 12.

The number 12 to 1 didn't sound that scary.

But don't forget that the young man who could stand here was already one in ten thousand.

The current assessment was equivalent to cutting off another one-in-12 probability among the one-in-ten-thousand.

The pressure and the value of the gold could be seen from this.

This time, the venue for the assessment of the "special referees" quota was set up in the Montenegro City Martial Arts Gym next to the Starry Sky Martial Arts School.

In order to welcome the arrival of the Commander-in-Chief and the two Deputy Commanders-in-Chief of the Military Affairs Committee, as well as the area to accommodate the spectators from other martial arts schools, the interior of the huge martial arts dojo had basically been emptied. Despite this, there were still many people who did not have seats. They could only stand far away from the stadium and watch, judging the results by listening to the sounds inside.

Even those who had made reservations in advance were unable to squeeze into the core area. One could imagine how many spectators there were.

It couldn't be helped. The "special referees" assessment over the years was already a rare embellishment in the boring lives of the people under military management.

This was especially true on planet 7-20003, which had no other pillar industries to drive economic development other than the military manufacturing industry.

When Li Yueming and the other opponents came to the stage one after another, they couldn't help but be speechless when they saw the black crowd in the stadium.

He knew that participating in this assessment would definitely attract attention, but he did not expect it to be so eye-catching.

As Li Yueming's family members, his uncle, aunt, and Li Linglong were naturally invited over. Moreover, they were sitting in the core area at the front of the stands. Therefore, even among so many spectators, Li Yueming could see the three of them at a glance.

"Brother, you can do it!" This voice belonged to Li Linglong. This little girl who had a sharp tongue actually called him brother for the first time today. It was really as if the sun had risen from the west.

"Xiaoyue, you can do it!!"

"Yueming, the Li family is proud of you!" This was Uncle and Auntie's. It was hard for Uncle to be so loud at such an old age. Even the surrounding group of martial artists could not compare to his voice.

Li Yueming couldn't help but smile.

Life was really wonderful. Before he started this reincarnation, he never thought that he could have such a happy family in this life.

It was precisely because of this that the responsibility on his shoulders felt heavier!

After a moment of absent-mindedness, Li Yueming finally came to his senses. He focused his mind and extracted the rules of the 'special referees' assessment from the memory fragments.

According to the annual practice, if nothing went wrong, the 'Special Referrer' assessment would be divided into three rounds.

The first round was a demonstration of basic martial arts techniques.

Its purpose was to test the physical condition of the examinees.

All the qualified young people entered the training platform specially set up by the examinees. They wore physical shackles specially made by the Military Committee to limit their physical fitness to the same level.

What the examinees needed to do was to complete the three tests of strength, speed, and reaction ability through the martial arts techniques they had learned and mastered while limiting their physical fitness.

This assessment had a total of 100 points. The passing score was 80 points.

Under normal circumstances, if a candidate could get more than 80 points, they would be considered outstanding.

The second test was a demonstration of martial arts moves, testing the talents and standards of these so-called geniuses.

The examiners would set up a few mechanical puppets controlled by AI. As long as the examinee could use any weapon and the corresponding move to defeat them, they could pass the test.

The total score for this assessment was also 100 points, and the passing score was also 60 points.

Chapter 780: Test, Terrifying Martial Arts Techniques!_2

As for the final test, it was undoubtedly a practical test between students.

Only candidates with a total score of more than 150 points in the first two assessments would be qualified to participate in the final assessment. These candidates would be banished to the Great Forest Combat Practice Grounds.

Each candidate was worth 20 points.

What the examinees needed to do was to eliminate others to obtain points while ensuring that they were not eliminated.

Until all the competitors were eliminated.

Contestant will obtain a maximum of 200 points based on the number of points.

After the completion of the above three assessments, the special candidate quota would be given to the top five students.

In other words, in order to be qualified for internal recommendation, the students who were referred to had to be extremely competent in every subject.

Even if he wasn't particularly outstanding, he definitely couldn't pull him down too much. Otherwise, he might not even be qualified to participate in the final round of the assessment.

The most noteworthy one was the final combat assessment. Apart from the total score of 200, it was also the best stage to gain the attention of the military council's commander-in-chief and deputy commander-in-chief.

After all, the commander-in-chief and deputy commander-in-chief were very busy and had limited time.

Unless there were a few special circumstances, the annual 'special referees' assessment would only be held at the beginning of the final combat assessment.

They basically wouldn't pay special attention to the first two assessments.

Therefore, even if the examinees' scores for the first few tests were flawed, as long as they could display superior strength in the final battle, they could rely on this to obtain a counterattack.

After all, the ultimate goal of cultivating martial arts was unparalleled combat strength.

Of course, the actual combat assessment was the most valuable part of the martial arts assessment process.

After repeatedly clearing the messy memory fragments in his mind and making sure that he didn't miss anything, Li Yueming's eyes became clear.

At this moment, the 36 genius students recommended by the famous universities on planet 7-20003 had been assembled.

Except for Li Yueming, almost all the students were nervous.

After all, this was a life and death trial for them.

If they made it through and obtained the qualification to recommend the candidates, they would have a bright future ahead of them. In the future, they might even be able to glorify their ancestors and become the legends of the universe.

If they couldn't, they were still geniuses even though they were on the remote planet 7-20003.

However, once they passed the Military Committee's assessment and left planet 7-20003 for the Emperor Yang Star Field, they would only be considered mediocre in the vast universe where geniuses were everywhere.

This was the cruel reality that every young man in a remote starfield had to face.

If he wanted to get rid of his own small place and become a Star Domain level or even Universe level warrior, he would have to grit his teeth and work hard. Even if he had to squeeze out all the potential in his body, he would have to rush forward without caring about anything else.

He rushed as far as he could.

Falling halfway meant that he had fallen from the top echelon and was likely to never recover.

As more and more higher-ups arrived, the atmosphere in Montenegro City's Martial Arts Gym became more and more lively.

However, most of the genius students on the stage were not excited. Instead, they were all tense. Even from afar, one could feel the nervous aura on their bodies.

Only a few students like Li Yueming who had full confidence in themselves were more natural.

At the very least, he did not cower in front of everyone.

On the management platform at the top of the martial arts hall, a white-haired old man took a sip of amber wine and said to another middle-aged man in his fifties with interest, "Who do you think will win? I'm done!"

The middle-aged man in his fifties was muscular, and his arms were much thicker than an average person's calves. He truly lived up to the old proverb from an unknown planet, 'a horse can ride on his arms'.

At this moment, when he heard the old man's question, the middle-aged man's eyes swept across the students below the stage without leaving a trace. His gaze finally landed on Li Yueming. After staring at him for a long time, he said, "I don't gamble, I advise you to bet less." Also, I forgot to tell you that Evelyn is a very narrow-minded woman. She hates two kinds of people the most in her life. One is a gambler, and the other is an alcoholic... And you seem to have both. If you don't want to be targeted by her, I advise you to restrain yourself!"

The white-haired old man was originally very satisfied with his wine cup, but when he heard this, he was stunned. After a moment, he smiled and said, "Leon, don't be so nervous. You know, there's

nothing fun on this broken little planet. I'm old and can't indulge in women. If I don't drink or gamble, do I have to lie down and sleep every day?"

The middle-aged man called Leon snorted coldly and looked at Li Yueming again. After a moment of silence, he suddenly said, "I think that young man will win. What do you want to bet on?"

Looking at the honest Leon in front of him, the white-haired old man was completely stunned. After a long time, he became angry and said, "You're even more despicable than a gambler. I'm not betting with you anymore."

Leon did not speak. He just closed his eyes in silence.

The old man suddenly felt a little bored. After hesitating for a moment, he put away all the wine glasses and playing cards on the table.

The two people in front of him were the two deputy commanders of the Alliance of Law stationed on planet 7-20003. As they sat down, the first round of assessment for the students under their feet finally began.

The first test was a demonstration of basic martial arts techniques.

The head examiner distributed and put on the physical shackles for the thirty-six examinees. This thing was similar to the shackles of imprisonment. Even a Level Four martial artist would find it difficult to break free after wearing it.

Li Yueming didn't believe it and tried to break free.

He realized that even he couldn't break free from this chain without using his full strength. It was more than enough to restrict a group of students whose average level was less than two levels.

After wearing the Physical Chain, all examinees' physical fitness would be restricted to the same level.

Under such circumstances, the students who had the most thorough understanding of martial arts techniques were naturally able to unleash a lot more physical strength than those students who had not thoroughly studied martial arts techniques.

Moreover, this kind of display was very intuitive and would not be disturbed by other factors.

The so-called martial arts technique was the degree of control a martial artist had over every inch of their body.

For example, if the same students threw punches, their postures would be more perfect, and their strength control would be more abundant. Another example was that students who had a better understanding of their body structure would naturally be able to run faster after running a lap.

This was the martial arts technique and had nothing to do with anything else.

Perhaps to the other examinees, this could be considered the fairest of the few exams.

After all, all the physical conditions and martial arts levels of the students who wore the physical shackles were the same. It was purely their understanding of martial arts, and there was no other difference.

However, to Li Yueming, this exam was a bit too much of a bully.

After all, although he was only a teenage student on the surface, as a reincarnator, he had actually transmigrated to several worlds of the personal power side and spent hundreds and thousands of years in them. His martial arts skills had basically been honed to the extreme.

In order to pursue perfection, he had even given up on being a human. Through the Perfect Genetic Body, he had deduced all kinds of 'final battle forms'.

Under such circumstances, letting a group of seventeen or eighteen-year-old students stand on the same starting line as him was no different from an egg hitting a rock.

Even if Li Yueming released 1,000 tons of water, it would be enough to drown all the students participating in the assessment.

Just as Li Yueming was at a loss whether to laugh or cry, the referee had already finished reading the rules of the exam and officially blew the whistle to start the competition.

The first round of the basic exam had officially begun!

A sandbag that was taller than a person appeared in front of Li Yueming and the other examinees. There was a metal display screen at the top of the sandbag with the words '0KG' written on it.

The students had three chances to use all their strength to shake the sandbag. The metal display screen would record the weight of the three hits, which would become part of the students' assessment results.

The noisy audience quieted down and stared at the examination hall. To be precise, they were staring at the metal display screen in front of the examinees.

Even though this was only the appetizer of the 'special referees' exam.

However, according to the usual practice of the past years.

Whether or not there was a true genius among this group of students could be seen with just one punch!
