

Maxing MT 781

Chapter 781: A Single Punch Shocked Everyone!_1

The huge sandbag attracted the attention of the audience.

Every year, there would occasionally be some geniuses who would appear in the 'special referees' examination. Therefore, the audience was very curious as to whether this year would bring them some surprises like in the past.

“Bang!”

A heavy blow sounded.

A young man with a tender face but a firm gaze suddenly waved his fist and hit the sandbag. The electronic display in the middle flashed quickly and finally jumped out with the number ” 302kg.”

Because he was the first student to step out and start the official examination, almost everyone's eyes instantly gathered on him.

The young man did not care about the gazes around him. He punched three more times in a row, and the numbers '288kg' and '311kg' popped up respectively.

The surrounding audience instantly boiled over, especially the graduates who were about to take part in the Military Committee assessment this year. They were all stunned.

“Three punches with a total of 900 kilograms under the condition that my physical fitness is limited. F * ck...My three punches added up to barely 900 kg without any physical limitations!”

“Is this what a genius is? This is f * cking ridiculous!”

“If we look at age, he is about the same age as me. This is the first time I feel that I am so useless...”

“How did he manage to become a man of the name? According to the rules, they have already restricted their martial arts physique. Their current physical fitness should be no different from that of an ordinary person!”

“I don't know. Maybe it's because his technique is different from ours...”

A group of students chattered and discussed.

Her small eyes were filled with shock.

Only those of the same age as them could feel the greatness of these 900 kilograms.

There were many students who couldn't do it even if their physical fitness wasn't restricted. However, he was able to do it casually under the condition that his physical fitness was restricted.

What if there were no restrictions?

Of course, there were also many old foxes who scoffed at this.

“What do you guys know? This is the ‘Special Referrer’ assessment. Three punches weighing 900 kilograms can only be considered average. I’m afraid you guys haven’t seen a real genius yet!”

“That’s right, 900 kilograms isn’t considered the worst among the ‘special referees’ in the past, but it’s definitely not considered powerful either!”

“If I remember correctly, among the students from the previous batch, there were a few who broke a thousand with three punches!”

“According to historical records, three years ago, there was a genius whose three punches were close to 1,500 kilograms!”

“Let me remind you, this place is a stage for geniuses. Everyone who can stand on it is a monster. We ordinary people should not compare ourselves with others. It is easy to break our Dao hearts!”

After the young man finished his three punches, he was obviously not very satisfied.

If he hadn’t been distracted by the sudden attention of the audience, the explosive force of the second punch should have been able to reach more than 300 kilograms.

It wasn’t just 288 kilograms.

However, an assessment was an assessment. There were no ifs. His results had already been set the moment he threw three consecutive punches.

After he finished the assessment, the other students who were still preparing began to punch one after another.

For a time, the sound of ‘bang bang bang’ rang out continuously.

The display screen on the sandbag kept popping up with numbers, ‘256kg’, ‘355kg’, ‘404kg’...

It was just as those old foxes had said.

In front of this group of geniuses, three punches weighing 900 kilograms could only be considered average.

Not to mention the others, after such a short while, there were already a few students who could break more than 400 kilograms with a single punch.

A moment later, most of the students had finished their assessment.

Currently, the person with the highest strength in the three punches was a burly man. His total score was 1,466 kilograms, nearly 200 kilograms more than the second place. He could be considered to be the best among the others.

After all, it was more difficult to increase the limit of one’s strength.

After exceeding 1,200 kilograms, which was the limit of an ordinary person’s body, it was not easy to increase it by more than 100 kilograms.

Another few minutes passed, and most of the students had already completed the first round of assessment.

However, it was a pity that the highest among this batch of students had barely reached 1,350 kilograms. For the time being, there were no students who could exceed the limit of 1,466 kilograms.

The muscular student waved his arms and declared to the audience that he was the undisputed overlord in terms of strength.

The surrounding audience was also very respectful.

There was a burst of enthusiastic cheers, which was considered as an exclusive reward for the winner.

Not far away, the teacher who blew the whistle looked at his watch and said to Li Yueming, who was still not moving, "Kid, there are only three minutes left until the end of the assessment. Are you sure you don't want to warm up?"

Other than Li Yueming, there were two or three other students who had yet to start the assessment.

However, most of the students were warming up on the spot. It was obvious that they were prepared to stimulate all the activity in their bodies before going all out to fight.

This was allowed by the exam rules. After all, warming up to stimulate the body's activity was also considered a part of martial arts skills. As long as it was completed within the stipulated time limit, it would be fine.

Li Yueming was the only one who stood rooted to the ground, neither warming up nor taking the test.

Naturally, it attracted the attention of the examiners.

Chapter 782: A Single Punch Shocked Everyone!_2

Li Yueming smiled. "Wait a little longer. The more pressure I'm under, the more power I'll unleash. I'm just trying to stimulate you!"

The examiner was speechless. "Alright, it's good that you're happy!"

After saying that, he ignored Li Yueming and turned his gaze to the other students.

Meanwhile, Li Yueming stood at the same spot and waited calmly. He silently watched the assessment time pass by on the display screen.

On the spectator stand, most of the students had already finished their assessment, but Li Yueming was still standing there as if nothing had happened.

Uncle, Auntie, and Li Linglong were a little anxious.

After all, under normal circumstances, it would take some time for him to throw three punches in a row.

Only by stopping and taking a breath after every punch could he ensure that every punch was above the standard line.

In other words, it would take at least a minute to throw three punches.

Now, Li Yueming only had less than two minutes left in the assessment. Even the other warm-up contestants had already made their first punch, but he had not made any moves.

Could it be that he had given up because he saw that the difficulty was too high?

This wasn't Li Yueming's style!

Uncle and aunt were puzzled. Li Linglong could not help but say loudly, "Hey, hey, hey, even if it doesn't work, at least try! I've bragged about it in school. Many students are watching now. If you don't punch me and get eliminated from the bottom, I'll be so embarrassed!"

The surrounding audience also noticed Li Yueming.

There was nothing he could do. Among the anxious students, he was considered an anomaly.

At first, it was fine if he was not noticed because there were too many people.

Now that the assessment was almost over, he was the only one who did not warm up or punch. He was simply trying to buy time.

How could it not be eye-catching?

For a time, many people in the spectator area started whispering.

"Is this guy really scared and doesn't dare to punch?"

"Who knows? There had been many unexpected situations in the past, but this student was so strange...This is the first time I've seen it!"

"Which school recommended this student?"

"Look at the school uniform...He seems to be from the Starry Sky Martial Arts School!"

"He doesn't even have the courage to try. How can he be considered a genius? The Starry Sky Martial Arts Academy was considered a well-known school and had achieved quite a few results in the past. Why did they choose such a weak student this time?"

"I heard that the Starry Sky Martial Academy is lacking in talent this year. I didn't expect it to be so lacking. Even such a poor student was sent over as a genius. I don't know if it's a slap to the face of the Military Committee or the face of our own school!"

"I originally planned to send my child to the Starry Sky Martial Arts Academy to study, but looking at it now, I think I'll forget about it..."

The assessment time ticked by.

There was less than thirty seconds left before the end.

The people who had high hopes for Li Yueming shook their heads.

If they had thought that Li Yueming was deliberately keeping them in suspense and wanted to fight hard to earn enough attention, then they were all completely disappointed now.

There were less than 30 seconds left before the end of the assessment. Even if Li Yueming really woke up, it was already too late. The remaining time was not enough for him to throw three punches.

Without a result, no matter how outstanding Li Yueming's performance was, it was destined to be difficult to catch up with the gap.

On the spectator stand at the top of the martial arts hall, which was specially built for the senior members of the Military Committee, the white-haired old man looked at Li Yueming at his feet and suddenly said, "Leon, do we still keep our bet?"

Lai Ang glanced at Li Yueming at his feet and said, "What do you want to bet?"

The white-haired old man tilted his head and thought for a moment, then smiled and said, "Let's bet on whether he can punch in this round of assessment and whether his total score can exceed 1000 kilograms!"

Both of them were experienced in martial arts, so they could see Li Yueming's uniqueness with just a glance.

It was because of this that the white-haired old man felt bored when Leon said that he was optimistic about Li Yueming.

After all, everyone knew the result. What was the point of blocking it?

However, there were only fifteen seconds left before the end of the game, but Li Yueming still did not move. Now that the white-haired old man brought up the old matter again, it obviously added a lot of uncertainty to the game.

For people at their level, uncertainty meant interest!

Leon pondered for a moment and nodded. "Sure, I bet that he can pass 1,000 kilograms, but I don't have much money..."

Before he could finish his sentence, the white-haired elder interrupted, "It doesn't matter what the bet is. The old man has lived to this age and likes to look for excitement, so... I bet he can't!"

As the two of them conversed.

A few seconds had already passed. The other students in the entire examination hall had already finished the assessment, leaving only Li Yueming who had not punched.

Other than Uncle, Auntie, Li Linglong, and a small number of students from Grade 12 Class 6 of the Starry Sky Martial Academy, the surrounding audience had already shifted their gazes to the student with the best results in this assessment.

The cheers and applause belonged to the winner.

For a coward like Li Yueming who didn't even dare to try, it would be disrespectful to the other students if his gaze lingered for another second.

"Attention everyone, the strength assessment has ended!"

Ten seconds passed in the blink of an eye. The head examiner finally blew the whistle.

His gaze swept across Li Yueming, who was still in the examination hall, with a trace of sympathy in his eyes.

Although he did not know what was going on with this student, what awaited him next was probably the scolding and humiliation from his teachers, classmates, and relatives.

After all, this was the ultimate assessment for the entire world.

The students did not only represent themselves.

And the school, teachers, and family behind him...

After being eliminated with such a dejected face, it would probably be difficult for him to raise his head in the future.

However, just as he was about to announce the results of the competition one by one, he realized that the display screen in front of Li Yueming's sandbag had an extremely bright number-1522kg!

What the hell?

Was there a problem with the display?

That's not right. The structure of this thing couldn't be any simpler. How could there be such an outrageous problem?

So what exactly happened just now?

In the beginning, the audience did not notice the abnormality.

It was not until he realized that the referee was standing on the high platform without saying anything for a long time, his eyes staring straight at a certain place.

This aroused everyone's curiosity. They followed his line of sight and looked towards the examination hall...

When their eyes met the number on the screen in front of Li Yueming, the entire exam hall fell silent!

1522 "was more than a hundred points higher than the strongest student.

They just didn't pay attention for a moment. What the hell happened just now?

The audience looked at the head examiner.

However, what they didn't know was that at this moment, the head examiner was even more confused than they were. It wasn't easy for him to come back to his senses, and he hurriedly asked A0001 to check the surveillance video footage a few seconds before the end of the competition.

On the high platform, the white-haired old man, who had thought that he had already won, immediately sat up from his chair.

His eyes widened when he saw the numbers that suddenly appeared on the screen.

After a long while, he lay back on the chair and muttered,""He is indeed an interesting young man. Not only did he drag it out until the last second to throw a punch, but he actually managed to exceed 1,500 kilograms...A monster?"

Leon raised his eyebrows.

The others might not have seen it clearly, but the two of them, as Level Eight martial artists who had transcended the planet's restraints, naturally knew everything that had happened.

Li Yueming, who had been silent, threw a punch at the end of the assessment.

In just an instant, his unremarkable fists collided with the sandbag and sent it flying dozens of meters away silently. The terrifying number of 1522KG appeared on the interface!

With the Physical Chain on, he could unleash more than 1,500 kilograms of power with a single punch. He could be considered a monster among monsters in the entire Imperial Sun Star Field, right?

A piece of unpolished jade of such quality could be born on such a remote planet.

It was simply unbelievable!

Chapter 783: 319, Evelyn, The Cruel Truth!_1

He looked at Li Yueming, who had exerted more than 1,500 kilograms of force with a single punch.

Even Leon Leon and the white-haired elder were speechless, not to mention the audience below them.

Li Linglong's eyes lit up as she stared at Li Yueming from head to toe and said to her uncle and aunt, "More than 1,500 kilograms. It's almost breaking the record for the 'special referees' assessment in the past few decades. Dad, Mom, look!"

Uncle and aunt naturally did not take their eyes off him the entire time. When they heard this, they said happily, "I'm watching, I'm watching, what did I say? Our Li family's child is indeed extraordinary. It should be so powerful!"

The uncle laughed with his arms crossed in front of his chest. The corners of his mouth were almost reaching his ears. It was as if the person standing under the spotlight at this moment was not Li Yueming but himself.

Aunt and Li Linglong couldn't help but roll their eyes.

The head examiner finally managed to get the surveillance footage of Li Yueming's entire assessment.

Through the video replay, it was discovered that Li Yueming had suddenly punched at the last second before the end. At that time, no one was paying attention to him, and the speed of the punch was too fast.

That was why no one understood what had happened after the exam ended.

So this young... He only used one punch to unleash a force that was beyond the reach of three punches?

After realizing this possibility, everyone in the audience, including the head examiner, could not help but gasp.

“Test...The assessment is over!” The head examiner swallowed his saliva and finally came back to his senses. He looked at Li Yueming and asked, “Why did you only punch when it was almost over? It’s very dangerous!”

At this moment, Li Yueming also left the examination hall. He smiled and said, “You don’t know this, but this move of mine is called ‘Deliberate Punch’. The longer the time it takes to accumulate power, the stronger the attack. So, it’s very necessary for me to drag it out until the last moment of the exam!”

“Don’t look at me just because I only threw one punch. In fact, by accumulating power, this punch of mine can unleash a power that others can’t even unleash after several punches!”

After hearing Li Yueming’s explanation.

Many people were stunned for a moment before they recovered.

So that punch just now was a martial arts technique similar to a move?

By accumulating the power in his body, he could instantly unleash destructive power that far exceeded the imagination of ordinary people... Although it sounded quite ridiculous, it did not seem like there was no room for maneuver.

Then the question was, could this kind of method of exerting force, which was similar to rubbing the edge, be counted as a real result?

There was no doubt about the answer.

Definitely!

Li Yueming’s punch was not a deliberate punch. It was just a simple and powerful straight punch. The reason why he could burst out such a terrifying power was that his body was close to perfection.

In other words, as long as he wanted to, he could punch out 4,500 kilograms of force with three punches. It would not be a problem for him to break the record of planet 7- 200,003.

However, that would be too ostentatious.

Not only would they not be able to get much benefits, but they would also cause a lot of unnecessary trouble.

After all, even if the Alliance of Law and Order could tolerate a freak, other people with ulterior motives might not be able to tolerate it.

When the time came, he would be in the open, and those with ulterior motives would hide in the dark. It would be easy to dodge an open spear, but difficult to defend against an arrow in the dark.

If he was not careful, he might fall into their trap.

And this kind of statement was obviously much easier to accept. It not only showed his talent and strength, but also did not attract the attention of some people with ulterior motives.

Of course, this statement could not fool the top group of people.

After all, as high-level martial artists who had witnessed it with their own eyes, they naturally knew better than Li Yueming whether Li Yueming was charging up his strength and whether he could really only punch once.

However, Li Yueming believed that the other party would smooth things over for him.

Sure enough, before the crowd could finish their discussion, the Military Committee had already made a decision. Furthermore, it was Evelyn, the Commander-in-Chief of the Military Committee on Planet 7-20003, who had personally promised that the results would be effective.

He also told all the examinees that as long as they could use the so-called "deliberate punch" similar to Li Yueming's in this round of strength assessment, their results could be retested.

The crowd was in a short uproar. When they saw that the commander-in-chief had come down personally, the debate was finally suppressed.

Of course, even so, the attention on Li Yueming was still very high. It was ten times or a hundred times higher than any other examinee present.

After all, this was a super genius who had attracted the attention of the military council's commander-in-chief in the first round of the assessment. It was very likely that after this round of assessment, he would spread his wings and completely escape the attention of the ordinary people. How could he not attract attention?

After this small episode.

The assessment had to continue.

Li Yueming's existence brought immense pressure to all the other examinees, especially those geniuses who had high aspirations and were determined to get the 'special recommendation' slot.

After all, according to the usual practice in the past, there were only three special recommendations.

Now, Li Yueming had already received the attention of the Commander-in-chief. As long as the results of the next two rounds of assessment were not too far apart, he would most likely have a spot in the assessment.

In other words, even if they fought to the death, they could only snatch one of the other two spots.

It was even more difficult than crossing a single-log bridge with thousands of troops.

Chapter 784: 319, Evelyn, The Cruel Truth!_2

On the spectator stand at the top of the dojo, which was specially built for the judges, a 25-year-old woman in military uniform with an extremely hot figure quietly appeared.

Looking at the white-haired old man lying on the stage with his arms spread out and Leon who was deep in thought, Evelyn frowned and said unhappily, "Didn't I tell you to watch over here? Why do I have to clean up after such a big thing?"

Upon hearing this, Leon was the first to wake up from his thoughts. He looked left and right, and when he saw the angry Evelyn, he quickly stood up and bowed. "Commander-in-chief, may I know what instructions you have?"

The white-haired old man smacked his lips. Although he was holding it in, he still accidentally burped and said, "Commander, this old man is about to retire at this age. His reaction speed has decreased."

Leon immediately glared at him.

This damned old man was lying through his teeth. When he said that he wanted to start the bet, his reaction speed was very fast!

Evelyn glanced at the two of them. After a while, she covered her head and said, "Who did I offend? Get all of you weirdos to be my subordinates!"

Sighing, Evelyn didn't pursue the two slackers anymore. She walked to the edge of the spectator stand and looked down. She found that the students had already begun the second round of speed tests.

This time, Li Yueming was calm and steady. He didn't make any shocking moves, and his final score was only at the top.

"This kid is interesting." Evelyn stroked her chin. "He's even playing dirty?" "Could it be that such a big universe couldn't accommodate a young genius like him?"

Leon pursed his lips. "If I really hit 4500kg with three punches, how big of a commotion do you think it will cause, Commander?"

Evelyn thought for a moment and said uncertainly, "The Witch Galaxy is shaking? It didn't seem right either... If it gets bigger, will the Emperor Yang Star Field shake?"

At this point, Evelyn felt that it was a little ridiculous and said in disbelief, "Is this really a genius from a small starfield like ours?"

The white-haired old man spread his hands and said, "This kind of thing is not something we need to care about, right?" "In any case, this kid was quite smart, wasn't he?"

Evelynn nodded.

Other things might be controversial, but this point was unquestionable.

They had seen countless geniuses in their lives, but very few of them could reach their current level.

Could it be that their talent was not high enough?

Naturally not!

At the very least, there were countless people who were more talented than them.

However, on the path of martial arts, although talent occupied a very important part, it was never absolute.

Heaven was never fair, but from another perspective, it was also fair.

Geniuses obtained talents far beyond ordinary people, but most of them thought highly of themselves and were arrogant. They did not know that a moment of carelessness could cost their lives.

Often, it was their batch of talents that could not be considered top-notch that were able to grow up in the end.

But now, while Li Yueming displayed his super talent, he also showed his cautious side.

This was a truly intelligent person, and a genius that the Alliance of Law truly needed.

As long as he could keep his mind steady, his future achievements would be limitless!

“I’ve already gotten A0002 to block the video of this assessment. Since this kid is so cautious, he should not cause any more trouble in the future...She wanted to know how far he could go!” Evelyn looked at Li Yueming with interest.

At this time, Li Yueming had also completed the second assessment. His results were not particularly outrageous, but because of the foundation of the previous strength assessment, his current results were still worthy of being the top.

In fact, this event was basically child’s play for Li Yueming.

Even if he was rather restrained and didn’t display any ridiculous moves, he could still pass easily.

Out of 100 points, he got ninety-two points, just one more than the second place.

The second round of assessment was to test the students ‘familiarity with martial arts moves.

Li Yueming was still able to defeat the enemy with one move, and he directly used a ” deliberate punch ” to end the battle.

His barbaric and violent methods left the audience dumbfounded.

The Military Committee had promoted the ‘special referees’ assessment for hundreds of years, and there had been many changes in the assessment for various reasons.

This assessment plan was already the simplest and most efficient method after hundreds of years of experience.

However, he didn’t expect that an anomaly would appear today. He forcefully turned this test that caused countless geniuses a headache into his own personal show.

The assessment ended with Li Yueming in first place.

The second place was four points behind him.

After the three rounds of assessment, the competition for the final spots would begin in the afternoon.

Li Yueming and the other students returned to the resting area prepared by the organizers to wait for the final assessment in the afternoon.

During this period, the examinees were not allowed to leave the examination venue.

Similarly, only a few core family members could enter the examination hall to investigate the situation of the examinees.

Under the guidance of the teacher, Li Yueming came to a small room in the lounge of the martial arts club. About five minutes later, his uncle, aunt, and Li Linglong also arrived.

When he saw Li Yueming, his uncle said excitedly, "Kid, good job. Uncle is proud of you. Big brother will be very happy to see your current achievements in heaven!"

Li Yueming smiled but didn't say anything.

Even the original owner did not have much of an impression of her cheap parents in this life, let alone him, an 'outsider' who only occupied a shell. Naturally, her feelings for him were even weaker.

Li Linglong's face revealed some envy, but her mouth was still unforgiving. She also said, "Tsk, I didn't expect that I would really be fooled by you. Just wait, when the time comes, I will also participate in this assessment. I won't be left behind by you too much!"

As she spoke, she shook her fist to show her determination.

Li Yueming only smiled at this.

Was Li Linglong talented? There was definitely something.

However, it was really not much.

Otherwise, he wouldn't have stayed in the commoner academy.

With her talent, it was definitely more than enough for her to participate in the Military Academy's assessment. However, it was obviously difficult for her to enter the list of special referees.

It wasn't that Li Yueming was trying to hurt her.

It was the cold and cruel truth.

Evelyn's previous description was very accurate. Geniuses often fell more easily, and their achievements were often inferior to ordinary warriors.

However, there was one thing that she did not mention.

To the natives of remote planets like them, if they weren't shockingly talented geniuses, they wouldn't even have the chance to step onto the interstellar stage, let alone 'advancement'!

Evelynn, Leon, and the others were from large planets, and they enjoyed the best resources and treatment in the central universe. That was why they could come to the conclusion that even if they had average talent, they could still become powerhouses.

But in fact, for the vast majority of people on remote planets, if they didn't risk their lives and fight their way up into the Alliance of Law's resource circle, they would only be trapped on their own planet and unable to escape the heavy reality.

For example, if Li Linglong had been born in the Central Universe, with her mediocre talent, she could have become a level-10 warrior like Evelyn in the future.

However, because she was born on Planet 7-20003, which was a remote place at the edge of the universe, and because of her talent, she could not participate in the 'special candidate' assessment. She had to go through the internal passage to the Imperial Sun Star, so she could only go to the military academy to study according to the normal procedures.

She would need to do her best to become a Level-6 martial artist.

When the time came, if he had the strength, he would see if he could help this little girl...After all, although Li Linglong was always badmouthing him, blood was still thicker than water.

It was good to let her see the vastness of the universe.

Chapter 785: Rising Star, Hot!_1

Li Yueming's results in the first two rounds of the assessment were not bad. Now, he was fully deserving of the first place in the total score.

If the other geniuses wanted to catch up from behind, they had to ensure that they performed exceptionally in the last and most critical combat segment, or they could only pray that Li Yueming made a mistake.

However, this was obviously impossible.

Li Yueming's performance was still very stable, firmly occupying a special recommendation spot.

The other students could only turn to fight for the other two.

The so-called actual combat segment.

It was controlled by the Military Committee's special artificial intelligence A0002 to fight against the students.

A0002 was an upgraded version of A0001.

Its computing power was several versions ahead of A0001.

Dealing with such a small situation was naturally not a problem.

Basically, it could guarantee that there was no difference in the difficulty of the students.

The specific rules of the assessment were that every time the students hit the robot puppet controlled by A0002, they would receive ten points, and every time they were hit by the robot puppet, ten points would be deducted.

The entire assessment process lasted ten minutes.

Only students who could hit the target 20 times in a row without being hit once by the robot puppet plant would be able to obtain a full score of 200 points.

This kind of indiscriminately fought Nandu's students, who had average combat skills, was simply a nightmare. Most of the students were beaten up one-sidedly from the beginning to the end of the assessment, without any chance to fight back.

Not to mention the full score of 200 points, if they really had to calculate, they would still owe A0002 dozens or hundreds of points.

Only a very small number of geniuses were able to perform well in this assessment, but it was also very difficult.

Under such circumstances.

Li Yueming was still hiding his strength.

However, his every move and his score were still extremely exaggerated.

With a full score of 200 points, it was already very good for a student to get a passing score of 120 points. Even in the past few decades, those geniuses who passed the 'special referees' test did not get more than 150 points.

Li Yueming, on the other hand, did not even blush or gasp for breath as he obtained a high score of 165 points.

Once again, he used his powerful strength to ignite the atmosphere of the entire venue.

Countless onlookers cheered. This was respect and encouragement for outstanding people.

In such a universe where the entire population was fighting, only when more geniuses appeared and fought against the Zergs without regard for their own safety could ordinary people live peacefully on their own planets and not be affected by the disaster.

He looked at the jubilant people below his feet.

Evelyn also smiled, which was a rare sight. She turned to Leon and the white-haired old man."An outstanding young man. I want this person. I'll write a recommendation letter myself!"

Hearing this, the white-haired old man curled his lips in dissatisfaction and said,"You're the senior officer. Our subordinates only need to listen to orders and don't dare to say anything!"

"Is that so?" Evelyn asked, still smiling. However, the meaning behind your words doesn't seem to be respectful at all..."

Seeing the dangerous expression on her face, the white-haired old man immediately admitted defeat and did not speak.

Leon had warned him that Evelyn was petty.

However, he only realized that she was not only narrow-minded, but also undemocratic and liberal after interacting with her a few times.

If not for her strength and beauty, she would not be likable at all.

"If I remember correctly, you haven't written a recommendation letter to the Federation for more than 30 years, right?" Leon interrupted."It's not easy for this kid to get your favor!"

Evelyn smiled."I don't write recommendation letters because there are people I don't like at the headquarters. Rather than embarrassing myself by sending them over, I might as well let you send them.""

Leon tilted his head.

This was the first time he had heard Evelyn mention it.

He didn't expect such a difficult woman like Evelyn to have an opponent that he disliked but couldn't do anything about. He couldn't help but feel curious.

"It seems that you have high hopes for him this time!" Leon laughed."

Evelyn did not answer.

However, the eagerness on her face betrayed her inner thoughts.

All three assessments had ended.

With his excellent performance, Li Yueming had become the star of the future in this year's 'special referees' assessment.

Next, they only needed to check the scores twice to confirm that there were no problems before they entered the final announcement of the names.

During the intermission segment this time.

Before Li Yueming could return to the rest area, he was already surrounded by reporters and major interest groups on planet 7-20003. Everyone looked at him eagerly.

"Student Li," a reporter asked, "I'm a reporter from the Witch Galaxy's Heng Guang Universal Radio Group. May I ask how you trained your body to be so strong?" Can you give us an answer?"

Li Yueming couldn't refuse.

Although he had never heard of this so-called Heng Guang Universe Infinite Broadcasting Group, the television stations that could rush in front of the contestants on such an occasion all had deep backgrounds. Moreover, their prefixing was the Witch Galaxy, which meant that they were at least a Galaxy-level television station.

Therefore, Li Yueming didn't want to offend him, so he replied, "I'm best at push-ups. I do hundreds of push-ups every day before and after school. I didn't go bald, but I did become stronger!"

Li Yueming continued to walk forward after replying to the message.

At this moment, a business elite in a suit rushed up. When he saw him approaching, the other guys who wanted to join in the fun obviously stopped in their tracks. They waited for him to approach Li Yueming first before continuing to line up behind him. From this, it could be seen that his background was more solid than that of the television reporter just now.

Chapter 786: Rising Star, Hot!_2

"Mr. Li," the middle-aged man said eagerly, "I'm Francois, the general manager of Hank Mining Group on Planet 7-20003. Our group admires outstanding young people like you very much. Is there anything we can help you with?" Please feel free to ask. Our Hank Mining Group is very happy to provide you with help!"

Hank Mining Group was a super large company that spanned across the Imperial Sun Star Field.

It was one of the largest companies in the Star Field apart from the Alliance of Law. It controlled the mining, metal smelting, military weapons research and development, and other businesses. Together with a few other military giants, it monopolized almost all the arms trading markets in the Imperial Sun Star Field.

They also had some mining operations on planet 7-20003.

He did not expect that the person in charge of such a huge company would actually take the initiative to come to him and offer him help...

Not to mention Li Yueming himself, even the reporters and business group leaders who wanted to interview were shocked.

His attitude toward Li Yueming became more cautious.

To be able to obtain the recognition of such a cross-Star Sector-level corporation, Li Yueming was definitely not that simple!

Not every 'genius' who passed the special recommendation test was worthy of being personally sent by Francois, a high-ranking person in charge of the planet. Most of the time, just sending an assistant to ask was already considered very important.

In response, Li Yueming replied enthusiastically, "Hello, Mr. Francois. I don't need any help for the time being, but we can exchange contact information."

Francois nodded and was very satisfied with Li Yueming's attitude.

Some young people would suddenly become arrogant once they became famous. They thought that they were invincible and had powerful talents that far exceeded ordinary people. They would not even look at the opportunities that came to their doorstep. Some people would even coldly reject them.

Although most of the people present wanted to get enough returns from their investments.

But where did free lunch come from?

It was a good thing to be paid attention to and invested resources, but there were always some young people who did not understand.

After exchanging contact information with Li Yueming, Francois left with satisfaction.

After Li Yueming exchanged contact information with a few other Star Sector-level big shots, it was finally the turn of the local business group on Planet 7-20003.

But at this time, Li Yueming had already entered the rest area. The soldiers of the Military Committee were armed and guarded outside. Even the big shots of the Star Sector-level business groups did not dare to come forward, let alone the little Karami who were only famous in the local area.

However, even though he had lost the opportunity to interact with Li Yueming, he still had a lot of time left.

However, they obviously would not give up on such a potential stock that could become a big shot in the future.

Since they couldn't get in touch with Li Yueming today, they could only fight the next day. Anyway, as long as Li Yueming hadn't left planet 7-20003, they still had the chance to say hello.

This was the charm of the 'special referees' examination.

A genius, a talented genius. As long as one was recognized by the Military Committee on this stage, they would become a hot new star. In the past, you couldn't even enter a place that you couldn't afford to climb, but today, you would be like a dog that smelled a business opportunity.

It was to train talents to resist the Zergs.

It was also for their own little plans.

In short, this world was tolerant of geniuses. The only prerequisite for everything was that one had enough potential.

It was not easy to get rid of the harassment of the enthusiastic masses outside.

Li Yueming heaved a sigh of relief.

In the resting area, Li Linglong and her uncle and aunt had already arrived.

Now that he saw him, his uncle said happily, "Well done. Your exam today is absolutely brilliant. You've won glory for the three generations of the Li family!"

The aunt's expression also carried some pride as she added, "Just now, there were reporters from the local television station chasing after your uncle to ask him about the secret to educating his children. Your uncle almost spouted nonsense. It was only because I pulled him back that he didn't embarrass you!"

Li Yueming couldn't help but laugh. "Why are you pulling Uncle? If he likes to talk, then let him talk. Anyway, when the time comes, it won't be embarrassing for me if he boasted to the heavens!"

The aunt covered her mouth and laughed, not saying a word.

However, there were crystal clear tears falling from the corners of her eyes.

Although he was very happy at the moment.

Although no one mentioned it, everyone knew that Li Yueming would leave planet 7-20003 soon after he passed the "special recommendation" hurdle.

There was a vast sea of stars between the few of them. Who knew when they would meet again... They might even be like Li Yueming's parents who went to recruit soldiers.

If he went, he would never be able to come back.

However, they couldn't stop him. After all, they weren't Li Yueming's biological parents. Moreover, it was a rule that the human race had evolved since they grew up.

Most importantly, his destination was to fight the Zergs and protect all the suffering planets of the Alliance of Order.

If everyone was afraid of death, how could the so-called 'universal united front' continue?

All they could do was try their best not to cause trouble for Li Yueming.

After all, they were just ordinary people, and they could only give their children an ordinary life.

Now that the child had created a bright future through his own talent and hard work, what they should do was to silently bless him and not stop him from running towards a better and greater future.

Chapter 787: Rising Star, Hot!_3

That was all.

Li Yueming felt the subtle atmosphere and guessed the reason after thinking about it for a while. The smile on his lips also lessened a little.

He also wanted to live a peaceful life here.

However, reality did not allow him to stop.

Perhaps one day in the future, after everything was over, he would be able to stop running for a long time and spend his life slowly and fully.

Now, he could only tell himself that everything in front of him was fake.

Just like those illusory memories of his past, they were all roads with no return.

Thinking of this, Li Yueming put away the laughable fragility in his heart. He looked at Li Linglong and said, "How is it?"

"What do you mean?" Li Linglong asked with some doubt. Are you talking about the exam just now? I admit... You're a little handsome, but that's all. I'll definitely catch up and surpass you!"

Li Yueming smiled.

This girl was stubborn.

He gestured with his fist and said, "Oh? In that case, as a future competitor, I shouldn't tell you how I did all of this!"

Hearing this, Li Linglong was stunned.

Her cute little face was filled with struggle. In the end, she lowered her head and said weakly, "Alright, I admit that you are stronger than me. So can you really tell me the secret manual to become stronger?"

Li Yueming didn't say anything. He looked at his uncle and aunt. Seeing that the two of them didn't have any strange expressions, he said solemnly, "Then, the first thing I want to tell you is that there is no secret manual for 'becoming strong'!"

"Everything given by the heavens is fair. If he gave you a pair of wings, he will give others a knife to cut off your wings. So don't rely on anything you can rely on. All you can rely on is a heart that respects everything...And that illusory fate!"

Li Linglong was stunned again.

It was obvious that Li Yueming's words were too serious and heavy for a girl who was not even eighteen years old.

It took her a long time to recover.

Looking at Li Yueming, who was filled with killing intent, as if he had just walked through an Asura Arena, he felt as if a bucket of cold water had been poured on his body, filling him with a bone-chilling chill.

However, Li Yueming was obviously not going to let her off easily. He continued, "So, are you really ready to become stronger? Or do you still think that the path to becoming stronger is just a show in school?"

Li Linglong opened her mouth, wanting to answer.

However, under Li Yueming's gaze, he could not say anything for a long time.

She did not understand how this cousin who was usually harmless and would not get angry no matter how smelly her mouth was could suddenly release a terrifying aura that was like a mountain of corpses and a sea of blood.

However, Li Yueming was obviously not prepared to explain to her. He still said coldly, "The final destination of becoming stronger is the battlefield, and the final destination of the battlefield is death. When you are mentally prepared to die, think about whether you want to follow me or not!"

As he said that, there was already a knock on the door from the Military Affairs Committee. Li Yueming raised his wrist to look at the time. It should be the final review of the assessment results.

According to the procedure, after announcing the results of the assessment, he had to go to the stage to be reviewed by the Commander-in-Chief and Deputy Commander-in-Chief of the Military Council. He had to personally receive the important letter of special recommendation from them.

Li Yueming stood up and took out a yellowed booklet from his pocket. "This is what you want. Before you open it, please think about what I said just now. Make sure that you have prepared yourself mentally before you start learning. Consider it the last thing that my cousin can do for you..."

After saying this, he stood up and walked out without hesitation.

Only Li Linglong, who was staring blankly at the book, and her uncle and aunt, who were worried, were left behind.

Chapter 788: Breaking the Record, Getting the Entry!_1

After leaving Li Linglong with a detailed explanation of the Third Cultivation Plan for Personal Magnificent Power Warriors, he was very excited.

Li Yueming left without looking back.

As long as he was still alive, even if he had to wander in the depths of the universe, his uncle and aunt would not have to worry about the economy. The major corporations and official forces on planet 7-20003 would fight to help his uncle and aunt's family.

After all, in a sense, Uncle and Auntie were Li Yueming's roots on planet 7-20003. As long as his roots were still here, Li Yueming was still a part of this planet.

Therefore, the various factions would try their best to make Uncle and Auntie feel happy no matter what.

Therefore, the only person that Li Yueming needed to worry about was his cousin Li Linglong.

Both Uncle and Aunt were already in their forties, and there would be no accidents if they stayed on Planet 7-200003. However, Li Linglong was different. She was still young and had a certain amount of martial arts talent. Her future was full of unknown and uncertainties.

However, in such a tragic world, Li Yueming didn't know if giving Li Linglong the secret to improving her martial arts was a good thing or a bad thing.

Perhaps the illusory path of martial arts he had given her would make her face endless pain.

Or perhaps she could have lived a happy life in the back.

Because of this, Li Yueming hesitated for a long time before finally deciding to leave this difficult choice to Li Linglong. What he needed to do was to state the pros and cons of the two paths as clearly as possible.

After all, one had to choose and work hard on one's own life path. The path chosen by others would always be others'.

Only then would he have enough reason to grit his teeth and persevere.

At this moment, the scores of the three rounds of assessment for the 'special referees' had already begun to be announced.

The crowd in the dojo was so excited that all the people on planet 7-20003 were nervously watching the information announced on the holographic electronic display screen at the top of the dojo.

On this screen, the names of the reference students, the school they graduated from, and the most important test scores would be announced in order from low to high.

Most of the geniuses in the top three were the winners of the special recommendation quota test.

And this recommendation could allow students to go directly to the core of the Imperial Sun Star Field, the Imperial Sun Star, to study and study.

Among them, the ones with the best results even had the hope of entering the Imperial Sun Star's Ultimate Martial Arts Academy.

The Imperial Sun Star was the core region of the entire Imperial Sun Star Field. No other planet could compare to it in terms of resources and technology.

Putting aside the fact that these recruited students were already geniuses, even if they were mediocre, as long as they could enter the school for further study, they would be able to shine far beyond their peers on other planets.

Especially the Imperial Sun Star's Ultimate Martial Academy, which was a martial paradise that countless young students in the entire Imperial Sun Star Field could reach.

The only Supreme class expert in the Imperial Sun Star Field was the nominal principal of the Ultimate Martial Arts Academy. One could imagine how deep the background and achievements of this academy were.

It was a well-deserved cradle of new stars in the entire universe.

Of course, it was obviously very difficult to be ranked in the top three in this assessment. Many students did not come here to participate in the assessment just to obtain a 'special referement'.

Those geniuses who ranked in the top ten in the assessment would actually receive a lot of financial support from the financial groups and the official level. The school would also be able to show their face and earn the next year's recruitment gimmick.

This was what those 'mediocre' geniuses paid the most attention to. As for the 'special recommendation' spot, if they could win it, they would naturally win the first prize. It didn't matter if they didn't.

These trivial matters had nothing to do with Li Yueming.

Under the guidance of the staff, he came to an elevator on the right side of the previous examination hall. Here, he met two other young people who were about the same age as him. At this moment, the two of them looked at him with some doubt and vigilance.

Li Yueming also recognized the two students. The tall and thin student on the left was called Fan Li. He had obtained about 320 points in the previous three assessments. The burly student on the right was called Lu Dali. He had obtained about 330 points in the three assessments. He was the genius student with the best performance in the previous assessments.

At this moment, the two of them looked at Li Yueming with different meanings.

Fan Li looked at Li Yueming with a gaze filled with doubt and vigilance. It was obvious that he was extremely curious and doubtful about Li Yueming, a peer who performed far better than him in the assessment.

No distractions were allowed in the examination hall.

Therefore, most of them only knew that Li Yueming's results were very high, but they didn't know how he obtained such results.

Thus, it was normal for Fan Li to have this expression.

After all, Li Yueming's score was too high, so high that Fan Li couldn't imagine how he had managed to get through all the obstacles.

On the other hand, Lu Dali's gaze towards Li Yueming was much simpler and cruder...

This burly young man was staring at Li Yueming at the moment. His face was filled with an itching desire to fight. If it wasn't for the dissuasion of the surrounding staff, he would have rushed up to fight Li Yueming.

Chapter 789: Breaking the Record, Getting the Entry!_2

His thoughts were very simple.

Li Yueming was very strong. If he could defeat Li Yueming, it would prove that he was stronger than Li Yueming.

As for the gap between them...

This would only be known after they fought.

Before they had exchanged blows, he would never admit that he had lost to Li Yueming in the assessment.

Of course, Li Yueming wasn't interested in their thoughts.

The reason why he sized up the two of them was because the three of them would be together for a long time.

Not far away from the martial arts hall, the virtual display on the score leaderboard had also revealed the most critical moment.

Li Yueming, Fan Li, and Lu Dali heard the noise outside. They all looked at the electronic display screen at the same time and saw a few lines of words on the huge virtual display screen.

Third place in the assessment: Fan Li, from Overlord Martial School, total score of 321!

Second place in the assessment: Lu Dali, from Harlan International Martial Arts School, total score of 338!

First place of the assessment: Yue Ming, from the Starry Sky Martial Arts School, total score of 362!

As soon as the three names appeared, the entire dojo fell silent.

A moment later, there was a sudden burst of cheers.

There was no other reason. It was because Li Yueming, who had the highest score in this assessment, had done too well. He had broken the curse that had been stuck on planet 7-20003 for the past 50 years, where the three assessments of 'special referees' could not exceed 350 points.

And he had successfully raised the record by 12 points!!!

This was an honor for the people of planet 7-20003.

It was very normal for the crowd to cheer.

Seeing the names of the three people appear in the venue, the soldiers of the Military Committee who were originally waiting in front of the elevator took the initiative to speak, "Congratulations, please enter the elevator. Commander-in-chief Evelyn and the two deputy commanders-in-chief are waiting for you upstairs!"

When they heard the words "Commander-in-chief Evelyn," the two young men, except for Li Yueming, held their breaths.

For these young people with no background, the meeting with the commander-in-chief and deputy commander-in-chief of the Military Council was something they would never dare to dream of.

However, now that everything was about to become a reality, it was inevitable that a strange sense of absurdity arose in his heart...

It was not easy for them to adjust themselves before they entered the elevator under the signal of the soldiers.

Due to his nervousness, even his muscles were stiff when he walked.

The elevator slowly rose, and the two of them didn't even have a place to look.

Seeing that Li Yueming was acting as if nothing had happened, Fan Li couldn't help but ask, "I heard that Commander-in-Chief Evelyn is a Level 10 martial artist and a beauty. Don't you feel nervous?"

Li Yueming Ming was observing the mechanical devices in the elevator at the moment. He resisted the urge to dismantle some parts to study them and replied casually, "She's not a man-eating tiger. What's there to be nervous about?"

Fan Li's expression was slightly frightened when he heard this. He immediately looked around, afraid that someone would notice him. After a moment, he said in a low voice, "What did you say?" "Don't worry, this elevator has a very strong soundproofing function!" Li Yueming said with a smile.

Even though Li Yueming said so confidently.

However, Fan Li was obviously still a little mutter. He didn't dare to talk to Li Yueming anymore, afraid that he would say something shocking.

However, before Fan Li's nervous little heart could recover.

Lu Dali, who was standing opposite him, clenched his fist and knocked on the glass of the elevator cubicle, making loud banging sounds. As he knocked, he muttered, "I wonder if this thing can take a punch..."

Seeing that he was eager to give it a try, it seemed that he was really prepared to punch out to see how strong the elevator was.

Fan Li was so frightened that his hair almost stood on end. He hurriedly stopped him, "What are you doing? Can't you stop?"

Lu Dali pursed his lips.

After waving his sandbag-sized fist a few times, he did not really smash it down.

After looking around, his gaze landed on Li Yueming again. He said in a low and muffled voice, "Hey, how did you manage to punch out 1,500 kilograms with one punch? Are you interested in fighting me?"

Li Yueming didn't say anything.

This time, Lu Dali couldn't take it anymore. He walked a few steps closer and said in a muffled voice, "Hey, didn't you hear me talking to you? Are you deaf?"

Li Yueming still didn't say anything. He seemed to be in a daze.

In the end, Fan Li saw that the situation was not right and rushed forward to separate Lu Dali and Li Yueming.

This time, Fan Li finally realized that there was no normal person among the three people present except for him.

Li Yueming was arrogant.

Lu Dali, on the other hand, was a super boorish man. He would do anything he wanted.

Although they had passed the actual combat assessment, they had yet to pass the interview with the three referees!

If he caused trouble now and lost the 'special recommendation' spot that he had already obtained, he would probably have nowhere to cry.

The elevator soon arrived at the designated location.

Ding! After a crisp sound, the elevator doors made of unknown materials opened from both sides.

Lu Dali took the lead and walked at the front. Fan Li patted Li Yueming's shoulder and walked in the middle. Li Yueming opened his eyes and walked at the end.

There was a huge platform outside the elevator. It was located in the center of the entire martial arts club and was also the best place to see.

Chapter 790: Breaking the Record, Getting the Entry!_3

The three of them arrived outside the platform.

As expected, he saw Evelyn and the other two sitting in the middle of the platform.

As the main character entered the venue, the reporters and high-ranking officials from all walks of life who were originally blocked by the soldiers also rushed in.

Soon, the entire high platform was covered by the crowd. The people in the martial arts hall below the stage could not get up to this position. They could only watch the situation in the arena through A0001's live broadcast video.

Evelyn and the others glanced at the three students and sized up Li Yueming.

A moment later, Evelyn smiled and said, "I'm very happy that three more outstanding geniuses have appeared on our planet. I hope that you can contribute to the Alliance of Order in the future!"

Fan Li was very excited, and his face was flushed red as he said, "I'll definitely die!"

Lu Dali glanced at Evelyn, and for some reason, his originally lawless personality was restrained. He lowered his head like a mountain cat meeting a tiger. "Me too!"

Li Yueming was the only one who wasn't too affected. He sized up Evelyn and replied, "I'm willing to serve you, Commander!"

A Level Ten martial artist was actually no different from an ordinary person just by looking at their appearance.

It was just that Evelyn looked more beautiful and elegant.

In fact, Li Yueming could feel the terrifying power in Evelyn's body that was like a wild beast. He didn't even doubt that Evelyn's full power could easily destroy a small planet!

One had to know that even the remnant soul of the Supreme Being of the Bug Tribe in the previous world could only display the combat power of destroying the surface of the planet because it was limited by the will of heaven and earth and the laws of the universe.

But now, in the vast universe, the commander-in-chief of a small planet in the side courtyard had the power to destroy the planet with a wave of his hand.

Was this the charm of the big stage in the big world?

As he pondered, Li Yueming's heart was filled with anticipation and fighting spirit.

The bigger the stage, the greater the danger, but the corresponding upper limit of personal strength growth was also higher. As long as there were no accidents in this life, his upper limit of growth might be ten times or a hundred times wider than the previous lives combined.

Looking at the docile students in front of her, Evelyn nodded in satisfaction.

She didn't say much and said directly, "This time, Student Li Yueming's results are very outstanding, breaking the record of the past 50 years. Therefore, I am prepared to make an exception and write a recommendation letter to Student Li Yueming, recommending him to study on the Imperial Sun Planet!"

At this point, she paused and looked at Fan Li and Lu Dali. "Of course, the two of you are also very outstanding. Deputy Commander Leon and Senior Golden Leaf will write you a recommendation letter. You will also be going to the Imperial Sun Star, so there is not much difference in terms of treatment... If you don't have any objections, I'll write it immediately!"

The three of them nodded in agreement.

Even Lu Dali, who had always been unyielding, did not dare to overstep his boundaries in this situation.

After all, although he was rough and liked to be reckless, it did not mean that he was stupid and had no intelligence.

Even if they were really dissatisfied with Li Yueming, they could settle it in private. A real man's battle was enough to solve all the problems.

If he played tricks on such an occasion, he might be in the limelight for a short period of time, but the days ahead would be difficult.
