

Maxing MT 791

Chapter 791: Heading to the Imperial Sun Star

Time flew by.

It had been a week since the ‘special referees’ assessment. During this period, Li Yueming had participated in the comprehensive examination organized by the Military Committee and passed it with excellent results.

Next, they only needed to wait for the Imperial Sun Starfield to send an interstellar spaceship to take them to the Imperial Sun Star.

Only those who had passed the ‘special referees’ assessment would receive this special treatment. The other ordinary students who had passed the unified assessment would have to wait for another half a month to board a large spaceship with the other students to head to the Witch Star System.

Today was the day of departure.

His uncle and aunt repeatedly reminded him to be careful.

Li Linglong also looked at her cousin, who was both familiar and unfamiliar, with a complicated expression. She pursed her lips and hesitated for a long time before saying, “If you have time... Don’t forget to call back from the galaxy. The military committee has already said that you can get through three times a month!”

Li Yueming nodded, indicating that he already knew.

Looking at his departing figure, Li Linglong called out to him again. She took out a pink box from behind her back and said, “Open it after you get on the spaceship. Don’t forget about me and Dad and Mom!”

Looking at the pink gift box in front of him, Li Yueming was stunned.

A moment later, he came back to his senses and smiled.”

Li Linglong rolled her eyes and said unhappily, “If I wasn’t worried about you, I wouldn’t care so much!”

Li Yueming was still smiling.

Seeing that the military committee’s car had arrived at the door of the house, he rubbed Li Linglong’s head and felt the soft hair on her head. “Take good care of Uncle and Auntie. Don’t let a third person see what I give you, understand?”

Li Linglong’s eyes were a little red. In order not to let Li Yueming see her sorry state, she quickly broke free and turned around. After a long while, she nodded to indicate that she already knew.

Li Yueming then looked at his uncle and aunt and waved his hand, “Goodbye, if there’s a chance in the future, I’ll take you guys to play in the Emperor Yang Star Field!”

Uncle and aunt’s eyes were also red. They nodded and did not say anything.

So many reincarnations.

Li Yueming had gone through many farewells.

However, no matter how many times he experienced it, it was still unforgettable.

Perhaps the weakness of humans was their emotions.

As an emotional animal, it was always inevitable to fall into it.

However, Li Yueming was glad that he still had feelings.

After all, compared to having a fragile emotional system, he was more afraid that he would be like other reincarnators. Because he had traveled through too many worlds and seen too many deaths, his heart would eventually become numb and he would no longer be able to invest emotions into anyone.

“Weng weng weng...”

The military truck behind him urged.

Li Yueming turned around and waved at his uncle and aunt before climbing into the back seat of the truck.

As the engine trembled slightly, Li Yueming quickly left the Montenegro City area.

When Li Yueming got out of the truck.

The surrounding environment had become a flat and vast desert area.

Looking up, he saw a small spaceship that was tens of meters long parked above the desert. The surface of the spaceship was very smooth, reflecting the sunlight like a mirror. From afar, it looked very technological.

According to Li Yueming’s understanding, the spaceship that was sent to welcome them was the Military Express of the Emperor Sun Star Field.

The Military Express wasn’t very big compared to the battleships, but it was also equipped with the sixth generation Star Sector-level engine of the Alliance of Order. It could easily surpass the speed of light and was much faster than the fighter aircraft on the side.

It could be considered a small military combat spaceship without any firepower.

The lighter and smaller size of the spaceship allowed it to move freely between star fields, galaxies, and planets.

At this moment, Fan Li and Lu Dali had already arrived before him. Beside them, Evelyn, Leon, and the white-haired elder, Goldenleaf, also came to the scene in person.

After seeing Li Yueming arrive.

Standing below the spaceship, Evelyn said solemnly, “The Imperial Sun Galaxy isn’t a small planet like ours. It’s the most prosperous planet in the entire galaxy, and it’s one of the core defense areas of the Alliance of Law’s third defense line. Although you’ve obtained the ‘special recommendation’ quota, don’t think that this is the end!”

” On the contrary, obtaining a ‘special recommendation’ slot is only your starting point. Strictly speaking, it can’t even be considered a starting point. It can only be

considered a stepping stone...To be able to take root on that planet and not be chased away by others is already something to be proud of."

At this point.

She looked at Li Yueming and suddenly said,""Li Yueming, do you know why I haven't written a recommendation letter for more than 50 years?"

Under her gaze, Li Yueming had a bad feeling.

"Please tell me, Commander-in-chief!"

Evelyn stared at him for a long time before replying,"You should also know that you are different from other geniuses. This is naturally the biggest reason why I chose you!"

Li Yueming knew about this.

After all, during the assessment, he had not used his full strength from the beginning to the end.

At Evelyn and the others' level, as long as Li Yueming didn't deliberately hide, it was impossible to hide from their eyes.

Of course, Li Yueming had never thought of hiding it from them. After all, under the condition of ensuring his own safety, the stronger the talent he revealed to the outside world, the better.

Chapter 792: Heading to the Imperial Sun Star

Only with enough talent could one obtain more resources and a better springboard.

And now, he had successfully obtained Evelyn's personal recommendation letter.

Although Evelyn had previously announced to the outside world that her recommendation letter was not much different from Leon and the others, Li Yueming definitely did not believe it.

If there was no difference, what was the difference between the authority of the commander-in-chief and the deputy commander-in-chief?

Li Yueming remained silent.

Evelyn didn't dwell on this topic and continued,""With this recommendation letter of mine, you can go to the Imperial Sun Star Ultimate Martial Arts Academy to participate in an assessment. This is the highest privilege I can give you..."

Li Yueming remained expressionless.

Fan Li and Lu Dali, who were standing on both sides, were shocked. Their faces were filled with disbelief.

Imperial Sun Star's Ultimate Martial Arts Academy...

This was a place that every warrior in the entire Emperor Yang Star Area dreamed of going to.

If the other academies on the Imperial Sun Star were considered the top in the entire Imperial Sun Star Field, then they would be considered the top.

In that case, the Imperial Sun Star Ultimate Martial Arts Academy was considered a top martial arts school in the entire third universe!

Ordinary students did not even have the qualifications to take the entrance exam.

But now, Evelyn had given Li Yueming a chance. This stimulation was enough to cause their blood pressure to soar, and their eyes turned red.

Under such enticing stimulation, Lu Dali, who was already rough, stood up and said, "Lady Evelyn... You... Can you give us a chance?"

Evelyn looked at Lu Dali in surprise, then at Fan Li, who was beside Lu Dali with the same look of desire. She thought for a moment and replied, "If there are extra spots, it doesn't matter if I give each of you one... Unfortunately, I only have one recommendation every ten years for a rank-10 martial artist, the commander-in-chief stationed on the planet."

Seeing that Evelyn didn't lose her temper or reject him directly, Lu Dali and Fan Li were slightly relieved.

But since there was room for bargaining.

Whether it was Lu Dali or Fan Li, they obviously didn't want to let go of this opportunity.

Therefore, Lu Dali took the lead and stood out. "Lady Evelyn, of course we don't want to make things difficult for you... However, such a crucial spot could be a life-changing opportunity for us."

"So..." Lu Dali looked at Li Yueming and said solemnly, "So, please give us a chance!"

"Oh?" Evelyn asked with interest. Tell me!"

Taking a deep breath, Lu Dali braced himself. "The results of the assessment cannot explain everything. The true fate of a martial artist is the battlefield. It is a desperate battle between life and death... "Therefore, I want Sir to give us a fair chance to fight. After all, only by truly fighting will we know who is more qualified to obtain this quota!"

"What you said makes sense!" Evelyn raised her eyebrows, obviously happy to see the students fighting amongst themselves. She turned to Li Yueming and said, "In that case, Li Yueming, what do you think?"

Li Yueming didn't expect such a farce to happen when they were about to board the spaceship. However, it was obviously Evelyn's doing. He didn't seem to have any reason to refuse, so he nodded. "Naturally, I have no objections. It's very fair for the fist to decide the quota!"

Lu Dali and Fan Li were shocked when they saw that he had agreed.

Although Li Yueming's score was indeed much higher than theirs.

However, just like what Lu Dali said, actual combat was not a test, and theoretical strength could never represent actual strength.

For example, Lu Dali was tall and strong. Just his weight and physical fitness were much stronger than ordinary people of the same age. Moreover, because of his hot temper, he often went to the underground arena to fight since he was twelve.

It could be said that his copper skin and iron bones were honed through actual combat.

It was also because of this that he was very confident that he could beat up Li Yueming, who was a flower in a greenhouse.

As for Fan Li, he knew his own limits. Whether it was Li Yueming or Lu Dali, they were not people he could provoke under normal circumstances. However, there was no reason for him not to give it a try!

Seeing that the few of them had no objections.

Evelynn swallowed the words she wanted to say and happily took two steps back. "Since it's a real battle, then there's no restriction on anything. I'll be the judge, and you guys can do whatever you want!"

With her watching on the field, both sides were naturally at ease.

Lu Dali couldn't wait to step forward and say, "Let me be your opponent in the first round!"

Li Yueming glanced at Lu Dali, who looked anxious, and then at Fan Li, who was also eager to try. He shook his head and said, "In order to save time, the two of you should come together!"

Lu Dali and Fan Li were stunned.

They looked at each other and saw the disbelief in each other's eyes.

Was Li Yueming crazy? Such an important opportunity, yet he still dared to be careless?

Evelyn and Leon, who were watching the show, also raised their eyebrows. They didn't expect Li Yueming to be so confident in his combat ability.

Lu Dali finally came back to his senses. He felt that he had been greatly despised and could not help but fly into a rage. "Don't be too arrogant, kid. I can deal with you alone!"

Chapter 793: Heading to the Imperial Sun Star

As he spoke, he strode forward and rushed toward Li Yueming with a body full of oppression. On the way, he raised two palms that were bigger than palm-leaf fans and clenched them into fists, wanting to send Li Yueming flying with one punch.

Seeing this, Li Yueming remained motionless.

He waited until the sandbag-sized fist was only an inch away from his face.

Only then did he suddenly sway his body.

However, it was just a slight shake. Lu Dali, who was originally determined to win this punch, only felt his vision blur. He saw Li Yueming, who was like a puppet earlier, suddenly disappear from his sight.

When he came back to his senses, he realized that Li Yueming had already appeared on his left side.

What was going on?

How could he be so fast?

Before Lu Dali could figure out what had happened, he felt his body suddenly rise into the air. He felt a great pain in his waist and abdomen, as if he had been torn apart by a blunt object.

“Boom!”

The heavy and huge body fell to the ground, raising a thick cloud of dust.

After Lu Dali fell to the ground, he immediately clutched his abdomen tightly. The corners of his eyes kept twitching, and his teeth were about to shatter, but he could not stand up.

Li Yueming did not look at him.

His gaze continued to sweep toward Fan Li, who was not far away, and he asked, “Do you want to try it too?”

A few seconds ago, Fan Li was still eager to try.

He was fantasizing that if Li Yueming and Lu Dali could fight to the death, he might still have a chance to pick up the big mistake.

However, he did not expect that Lu Dali would have already fallen to the ground and lost his ability to fight...

Just now, Lu Dali was unable to see the entire battlefield due to his limited vision.

As a bystander, he had seen everything clearly.

When Lu Dali rushed over, Li Yueming only took a step to the left.

However, the speed of this step was unimaginably fast.

Lu Dali’s fist was about to hit his face, but Li Yueming relied on his terrifying footwork and even more terrifying speed to arrive first. He did not give Lu Dali any time to react and easily dodged the fist. He turned around and kicked Lu Dali into the air.

Fan Li couldn’t accurately estimate how much power was contained in this kick.

After all, in his line of sight, although Li Yueming’s angle of force was very tricky, he still lacked the space to accumulate power and exert force. Logically speaking, the power of this kick should be very limited.

With Lu Dali’s tough body, it shouldn’t be a problem for him to take the kick head-on.

However, the problem was that Lu Dali was lying on the ground after enduring the kick. He struggled for a long time, but he couldn’t even fart.

This peer in front of him was dangerous!

And it was extremely dangerous!

Fan Li swallowed his saliva, the alarm in his heart was about to explode. He hurriedly shook his head and revealed a very sincere smile. “That... I don’t need it... I think this spot is very suitable for you!”

Li Yueming nodded and turned to Evelyn. “Commander-in-chief, what else do you have to say? Let’s make it clear!”

Evelyn came back to her senses and coughed awkwardly.

The reason why she agreed to let Fan Li and Lu Dali spar was naturally because she wanted to see how much Li Yueming had yet to show.

Now that Li Yueming had seen through him, he lost his composure.”Since you have already proven your strength, I only have one thing to remind you!”

” I’m an old enemy stationed on Planet Ziwei. More than fifty years ago, I recommended a few students who went to Planet Diyang. They were all chased back by the student recommended by that petty old woman. She even specially wrote a letter to mock me, saying that the students I recommended were all trash...”

“I can’t take it anymore, but you also know that planet No. 7-20003 is extremely remote. There aren’t many geniuses who are worthy of being seen all year round...In order not to humiliate myself, I didn’t continue to write letters to recommend him. Instead, I gave the spot to Leon and the others!”

“Now that I’ve given you this spot, you should know what this means, right?”

Chapter 794: Interstellar Fleet, Deep Space!_1

In the distant universe.

A quiet and beautiful color was emitted.

The military express, which was dozens of meters long, was traveling around a star ruin that was full of gravel, carefully avoiding the huge debris of the planet and passing through it slowly.

According to the star chart, this area was called Nilra Star Ruins.

Many years ago, there was a super-large planet that was almost as large as the Imperial Sun Star. However, because the natives of the planet were courting death, they discovered that technology could not break through the space barrier and turned to the underground of the planet to mine and excavate.

In the end, some unknown problem caused the entire planet to collapse and shatter. The debris of the exploded planet scattered in all directions, giving birth to this massive planet ruins.

According to the investigation of the reconnaissance team of the Imperial Sun Galaxy, there was still a medium-sized black hole in the deepest part of the Nilra Star Ruins, which was constantly devouring the shattered planet fragments around it.

If Li Yueming and the others wanted to go to the Imperial Sun Star from Star Field 7-20003, this planet ruin was one of the paths they had to pass through.

This was also the biggest reason why planet 7-20003 was so remote. Spaceships from the Imperial Sun Planet would not pass through such a dangerous and difficult road unless it was necessary.

And the resources invested in cleaning up this star ruin were less than one-tenth of the output.

Over time, the planets that lived further away from the Nilra Star Ruins were abandoned by the galactic society and could only enjoy some simple and inclusive products.

Li Yueming and the others were currently passing through this area.

As the holders of the special recommendation quota, the Military Committee had the obligation to send them to the Imperial Sun Star.

In addition to Li Yueming, Lu Dali, and Fan Li, there were more than ten young people on the spaceship. They were all young geniuses from other planets who had received special recommendations. At this moment, most of them were sitting quietly in the cabin, watching the scene outside through the thick space glass. Their faces revealed a strong shock.

Looking at the scene outside the window, a few young people from small planets clicked their tongues and exclaimed, "Is this the universe? It was simply too dreamy and unbelievable!"

One wouldn't know how big the universe was without seeing it with their own eyes.

Even the Nilra Star Ruins before him was nothing more than a speck of dust compared to the boundless universe.

But even so, in the eyes of these young people who had been living on the planet's surface, it was already huge enough to make people dumbfounded.

Hearing their cries, three young men in bright clothes in the cabin revealed a disdainful expression. "Humph... What a bunch of ignorant country bumpkins!"

Their voices were not loud, but they were still very ear-piercing in the relatively quiet cabin.

The few young men who were mocked turned around with anger on their faces. However, when they saw the clothes on the other party, they seemed to have thought of something and revealed a hint of fear on their faces. In the end, they chose to pretend that nothing had happened.

They came from a small planet.

And the luxurious clothing that the other party was wearing was obviously from a large planet.

If there was a conflict between the two sides, it was very likely that they would be the ones who would suffer in the end.

Li Yueming was also looking at the planet and the universe outside through the glass window.

However, this was not the first time he had seen such a scene. In the past, he had even tried to cross the starry sky with his own body. Although it ended in failure, he was not a country bumpkin who had never seen the world.

The spaceship was traveling very slowly in this area. It took half a month to completely pass through the Nilra Star Ruins that was filled with planet fragments.

The students heaved a sigh of relief when they realized that the distorted and broken planet fragments around them were decreasing.

Although Nilra Starmarket was able to see the planet fragments at close range, it was still a safe distance.

However, this meant that their spaceship was also very close to these fragments.

Even though the Military Express was equipped with the A0003 military interstellar artificial intelligence system that could clearly record the path of the spacecraft, the journey across the star field was still quite risky.

This was especially true in a star field that was constantly moving at a high speed. It was an area with high accident rates.

Now that they had crossed the most dangerous area, it was no wonder that everyone heaved a sigh of relief.

After leaving Nilra Star Ruins, the group of students looked back and were surprised to see a huge interstellar fleet slowly sailing on the other side of the deep universe!

In the beginning, the students thought that they were hallucinating. However, after repeatedly confirming that there was nothing wrong with their eyes, almost all the students became excited.

“That’s a military-grade super interstellar warship, right?”

“I’ve only heard of it in the Universe Infinite Radio before. I didn’t expect to see it with my own eyes today!”

“This level of military warship isn’t going to the battlefield to fight against the bug clan mother nest, why would it come to our 26th defense line, a place where birds don’t even shit?”

“Who knows? Maybe he’s just passing by?”

“No matter what, it feels a little strange...After all, interstellar battleships are all long-distance voyages across the sea of stars. The galaxies are only units of measurement in the middle of the journey. How could they be seen here?”

The interstellar warship in the distance was even larger than an ordinary planet.

The battleships shone with a white metallic titanium glow. The dozens of fleets that were connected together were like Leviathan in the deep sea, filled with a suffocating pressure.

Chapter 795: Interstellar Fleet, Deep Space!_2

This was the first time the students had witnessed such a scene. At this moment, their eyes were wide open as they shouted.

Li Yueming didn’t feel excited at all.

He felt a chill run down his spine.

If the conclusion of using infinite deduction at the beginning was not wrong.

The 26th defense line would be attacked by the Zergs in 40 years and destroyed.

However, the problem was that this place could already be considered the rear of the Alliance of Law.

Logically speaking, it should be impossible for the Zergs to bypass the 20-odd defense lines in front of them and arrive here quietly.

But the result was that the bug clan came. The bug clan’s mother nest attacked the Emperor Yang Star Field, and the bug clan destroyed everything. Planet 7-20003 didn’t survive this disaster.

He hadn't considered this aspect before.

After all, at that time, his main focus was on how to display his strength to gain attention and obtain various resources to become stronger.

But now that he saw these interstellar warships heading towards the Nilra Star Sector, Li Yueming realized that the Zerg's inexplicable attack was probably not an accident.

It was something that attracted it, or rather, attracted the Alliance of Law, at the 26th defense line.

The battleship before them was the best proof.

The Interstellar Battleships built by the Alliance of Law were targeted at the mother nest of the Insect race. Each of them was priceless. Even if the resources of dozens of small planets were emptied, it would not be enough to build an Interstellar Battleship.

Although these battleships were relatively lightweight among interstellar battleships and could only target level three mother nests, they were still the main force of the Alliance of Order in the war against the Zergs.

Such a fleet of gold-devouring beasts might not be enough even if they emptied the entire wallet of the Imperial Sun Galaxy.

Therefore, their appearance here could only be an order from the Third Universe Military Committee.

Then, the problem came.

Why did the Third Universe Military Committee send them to the 26th defense line?

Li Yueming didn't know.

However, he knew that it was definitely not a good thing for the 26th defense line and himself.

The interstellar warship did not stay in everyone's sight for too long.

In just a few breaths, he started the engine and flew far away.

The students lay on the glass of the Military Express for a long time before reluctantly withdrawing their gazes.

After leaving Nilra Star, the Military Express began to accelerate.

The long journey lasted for about a month. When the group of students began to feel anxious, Li Yueming finally saw the outline of the Imperial Sun Planet.

The Imperial Sun Star was known as the 'Eternal Sun'. It was the largest and most prosperous planet in the entire Imperial Sun Star Area. It was also the economic and political core of the entire Imperial Sun Star Area.

From afar, the space station surrounded by steel and machinery came into view.

Some of the more technologically advanced planets didn't have as much trouble to travel to the Imperial Sun Star Area as they did to small places like this. It would take one to two months just to get there.

There were teleportation facilities between the big planets and the Imperial Sun Star.

They only needed to pay a fee to use the teleportation facilities to arrive at the Imperial Sun Star.

The Military Express didn't need to go through the complicated security checks like the merchants and civilians. They only needed to go through the internal passage of the Military Committee to enter the Imperial Sun Planet.

Therefore, Li Yueming and the others did not wait long before they boarded the spaceship and entered the surface of the Imperial Sun Star.

After traveling for another minute or two, the spaceship stopped in the huge dock.

A group of students untied the restraints on their bodies and opened the spaceship under A0003's guidance. Outside the door, there was already a strange man with blue-purple skin and gray eyes waiting for a long time.

Seeing the few of them land safely, the strange person spoke in fluent universe language, "Welcome to the Imperial Sun Star, rookies... My name is Andrey Elenov, you can call me Colonel Andrey Elenov!"

This was the typical characteristic of an alien, and it seemed to have some mixed blood.

Although the group of students were curious about his appearance, they did not dare to show it on their faces. They bowed respectfully and said, "Colonel Andrea!!"

"Very good, you're all very energetic!" Andrica nodded, his gaze slowly sweeping across the group of people. After a long while, he said, "The Military Committee has arranged accommodation for you. Now, there are three paths in front of you!"

"First, join the Military Committee directly!"

"If you choose this option, you will receive the rank of a Corporal. You will also receive a salary of 100,000 Universe Credits every month, as well as all kinds of benefits exclusive to the members of the Military Council!"

It seemed that their luck was better.

Although Andrica wasn't very pretty, his personality was unexpectedly good. He even introduced the three options to the students.

If they were unlucky and met those bad-tempered instructors, they would just throw the students out of the dock and leave them alone.

His first choice was actually the last choice for the students.

After all, they had worked so hard to get a 'special recommendation' slot, not to directly join the military committee.

Although joining the military committee here would grant one a military rank, and the promotion would be faster than other soldiers without military ranks, other than that, the treatment was no different from planet 7-200003.

At most, they would be able to come from a small planet to a big planet, and the salary and treatment would be slightly better than the original planet.

Therefore, as long as there was a choice, the students present would definitely not choose to join the Military Committee.

Andrea obviously knew what they were thinking. In fact, the military council did not want them to go to the battlefield at such a young age, so the latter two options were the most important.

After a brief explanation, he skipped the first one and continued, "Secondly, you still have about three months. The various martial arts schools on the Imperial Sun Planet will be recruiting students in these three months. You can enter a martial arts school to continue your studies!"

"You can receive a subsidy from the Military Committee for advanced studies in the martial arts school. It's about 50,000 Universe Credits per month, and there are a lot of nutrient fluids and supplements. If you can become a third-episode martial artist, this subsidy will double!"

"If you can become a Level 5 martial artist before graduation, you will be able to obtain the same colonel rank as me when you leave the school gate, and your subsequent promotion will be faster than mine!"

At this point.

Andrey paused for a moment, and his face revealed a hint of envy.

In order to obtain the rank of colonel, he had risked his life on the battlefield countless times and paid a great price.

However, this group of students only needed to study hard in school and finally get the same or even better treatment as him when they went out.

However, he was not jealous.

As an ordinary player, he had already given his all to reach this position.

However, this group of students was different. They stood on the shoulders of giants, and the responsibilities and dangers they faced were destined to be beyond his reach.

Although it was a little unfair.

However, in this kind of environment where there were no intact eggs, enjoying more resources also meant that they had to bear more risks, so everything was quite fair.

"The third option is only open to special geniuses with special talents. You can try your luck at the major commander schools and technological research institutes under the Military Committee. If it is proved that you have the talent in this field, you can choose to join the unit with the corresponding talent. You can discuss the details with the corresponding person in charge!"

After reading all three options in one breath, Andrica looked at the time and said, "You have half an hour for lunch now. You can slowly consider your next plan during this time..."

"Follow me to visit the military committee's canteen!"

Chapter 796: The Only Path (1)

The group of students did not say anything and followed behind Andrea quietly.

The Interstellar Committee had arranged three paths for them.

However, in reality, all the students knew that there was only one path that truly belonged to them.

That was to enter the Imperial Sun Academy and undergo five years of in-depth study.

Only in this way could he quickly rise to the top of the military committee. Not only did he enjoy a high social status, but he also had a higher social status compared to the ordinary soldiers who died on the battlefield.

They would have more choices.

As for the other two paths, only those students who had no way out and had not been accepted by the academy for three months would consider them.

In other words, there was no other way.

Therefore, the students would definitely not consider it now.

Following Andrea out of the cabin, Li Yueming and the others soon saw more students of their age. They were all young geniuses recommended from the planets around the Imperial Sun Galaxy.

Of course, the backgrounds of these young geniuses were not much different from theirs.

After all, those geniuses from the first-rate planets had already taken the Star Field Teleportation Gate to the Imperial Sun Star more than half a month ago. By now, they might have already passed the assessment and entered the academy.

The young people were separated by a glass walkway.

Although the paths were different, it did not affect them from sizing each other up.

All the young people knew very well that they would be rivals in the next three months.

After all, there was a limited number of places for martial arts high schools in the Emperor Sun Galaxy. Every year, there were about a million young geniuses who were selected through the 'special referees' assessment in various star fields, and the number of students who could really be selected to enter the campus did not exceed two-thirds.

In other words, a third of the students would not be able to enter the academy and would be ruthlessly eliminated.

Most of the students who were eliminated would choose to join the Imperial Sun Military Committee and become a basic officer of the Interstellar Army that guarded the capital.

There were also a small number of people who had their Dao-hearts shattered during the assessment and chose to return home.

Each of them would be the most outstanding young people of their generation in their respective planets, but in the current Emperor Yang Star Field, they were like carps crossing the river. A casual hit could cause hundreds of 'geniuses'.

They were already geniuses that were hard to come by in decades or even centuries on their own planets. In the end, they suddenly became ordinary people in the Emperor Sun Star Area.

The huge difference was naturally hard to accept.

The competition had yet to begin. Just by looking at the students on the other spaceships, the group of students from the Witch Star System, like Li Yueming, already felt a huge pressure.

Li Yueming, Lu Dali, and Fan Li walked together.

They came from planet 7-200003 together. Although the three of them had fought before boarding the ship, it was still necessary to support each other now that they were in this unfamiliar place.

Moreover, the battle before boarding the ship had also confirmed Li Yueming's dominance in this small group.

Lu Dali and Fan Li were also very self-aware of him as their leader.

This could be considered a tacit understanding among the students who had passed the 'special referees' assessment.

They could fight however they wanted on their own planet, but after coming to the Imperial Sun Star Field, as long as it wasn't for the death of their father, they would put it aside. The most important thing was to take revenge and prevent themselves from being bullied by the geniuses of other planets.

They walked through the high-tech corridor for about five minutes. During this time, they also went through three full-body checkups to prevent certain cosmic infectious diseases and Zerg spies from sneaking in.

After everything was over, the cafeteria of the Imperial Sun Military Committee finally appeared in front of Li Yueming and the others.

How should he put it?

In Li Yueming's previous impression, the canteen was a place where a few aunties waved a ladle and scooped out a spoonful of fat meat while tossing away a few pieces of lean meat.

Li Yueming felt that the canteen was more like a huge buffet restaurant!

In the middle of the cafeteria was the food area. Students only needed to choose the food they wanted in advance and then they could let the artificial intelligent mechanical maid in the chef's uniform bring the food to the table.

All the steps, including cutting, cleaning, and cooking, were fully automated. The food was also categorized in detail according to the tastes of different races and planets.

More than 90% of the human race in the universe and 80% of the planet's members could find their favorite 'hometown dishes' in this restaurant.

The level of technology behind these details alone was enough for 7-20003 to study for a lifetime.

This was the technological barrier.

Even if planet 7-20003 had joined the star-class society, even if the military council had made all the technology available to the public in the interstellar network, it was still a matter of time.

The backward planets would still find it difficult to catch up with the high-level planets.

This was not only because of the backward technology, but also because of all kinds of hidden problems...For example, the scarcity of minerals, the unsuitable climate of the Star Field, and even the different brain circuits of living creatures.

These insurmountable barriers were like mountains that pressed down on the technological tree of the backward planets, preventing them from advancing bravely. This was also the reason why the developed planets were particularly developed and the backward planets were particularly backward.

Chapter 797: The Only Path (2)

Even if the Alliance of Law had announced all the secrets of science and technology.

What those low-intelligence lifeforms couldn't understand was still impossible to understand. Even if they could understand, they might not be able to obtain results due to a lack of materials or various accidents.

After arriving at the cafeteria, Andrica stopped in his tracks and turned his head to look at the group of students who were slightly nervous. He slowly said, "This is the sixth canteen of the Military Committee. The food inside can be taken according to your needs! I still have to go back and report my work. During this period of time, you can do whatever you want!"

"Remember, you can't waste food in the canteen, you can't make a scene, and you can't fight!"

"However, as long as it doesn't involve life or death, the military committee won't care about what happens after we leave the canteen...Don't blame me for not reminding you beforehand. In the past, there were many students who were sent back because of fighting outside the cafeteria!"

Andrica's grayish-brown eyes swept across everyone, revealing a rare murderous look. After making sure that all the students behind him had heard him clearly, he continued, "So if you don't want to suffer, don't run around. I don't want to send you back just after I've settled your temporary residence permit!"

After coming out of the dock, they had been walking along the glass corridor. After three rounds of inspection, a group of students from various planets from all over the world gathered in the cafeteria.

The military committee's cafeteria was definitely very big.

However, it seemed a little crowded as more and more students gathered.

There were so many students gathered together, and every one of them was the pride of their respective planets. They were used to watching from the sky. Even if they knew that this was the Emperor Sun Galaxy, it was easy for them to do anything.

After hearing Andrea's reminder, the group of students all nodded.

The look in their eyes was much more cautious.

There was no other way. This was not their small place. Each of the hidden dragons and crouching tigers was not simple.

Who knew who was provoking them?

He had only been on the Imperial Sun Star for a few hours, and he was already beaten black and blue.

It would be difficult for him to go out and meet people for the next period of time.

At this moment, Fan Li was very obedient. He followed behind Li Yueming like a lackey. After Andrica left, he whispered, "This place is so high-class. I've never been to such a high-class place in my life!"

Li Yueming rolled his eyes at him.

Although he had never been to such a high-class place before, it was difficult for people to not tear it apart. Could you not say it out loud?

It's very embarrassing, please!

Lu Dali humphed and looked around with his bell-like eyes, as if he was considering who could be his opponent.

Seeing him looking around, Fan Li was scared out of his wits. He quickly whispered, "Hey, Dali, don't take things too hard here. Ptui, it's fine if you take things too hard alone, but don't drag us down with you!"

Lu Dali retracted his gaze.

He looked down obediently and thought, "I've never been to such a place before..."

Hearing this, it was Fan Li's turn to roll his eyes.

Alright then... The three of them did not come from very wealthy families. They could be considered to be brothers in distress.

Without this special recommendation, they probably wouldn't even be able to afford a restaurant that cost two to three thousand yuan in their entire lives. Who would have thought that one day, they would be able to appear in the military committee's cafeteria in the capital of the Imperial Sun Star Area and have a meal with so many top experts of the younger generation?

Alright, let's have a meal together.

In fact, they were all eating their own food. Their eyes were filled with curiosity and vigilance.

Passing through the crowd, Li Yueming and the other two ordered what they wanted to eat under the guidance of the A0001 mobile terminal they carried with them. Then, they wanted to find a seat.

However, after walking around, they realized that the seats in the canteen were all full. Even if there were one or two empty seats, it was not enough for the three of them.

This made the three of them a little depressed for a moment. They could only go to the edge and wait for a position.

Just as they were about to leave the dining area to line up, they realized that someone was waving at them from a table not far away. Li Yueming and the others were stunned. They looked over and realized that it was their 'fellow countryman' who was on the same speedboat as them!

Of course, they were only in the same galaxy.

There were three people, two men and one woman. One of the two men was called Xiong Jia, and the other was called Sun Yusong. They were both tall and strong, and they looked very simple and honest.

The last girl was called Su Keke. She had short, exquisite hair and two cute dimples at the corner of her mouth. She sounded fresh and cute when she spoke.

The planet they were born on was numbered 7-22413, which was even more backward than planet 7-20003, which was also at the edge of the Witch Star System. It was a peripheral planet other than the peripheral planets.

Because they were bored during the long distance flight, they started chatting.

The atmosphere of the conversation was quite pleasant, and fortunately, they made a friend halfway.

Seeing that Li Yueming and the others had not found a seat to eat, the three of them took the initiative to wave for them to come over.

After seeing that they were friends, Li Yueming waved his hand and walked through the crowd.

Fan Li chuckled, "As expected, you still have to rely on your friends when you're outside..." At least we don't have to wait outside like idiots!"

Chapter 798: The Only Path (3)

Lu Dali and Li Yueming did not say anything, but they agreed.

She was unfamiliar with outsiders, so she had to be kind to them.

As long as it was not a matter of principle, he would endure it as long as he could. After all, taking a step back would open up the world.

However, before Li Yueming and the others could get close.

7-22413 Behind the three people from Planet No. 10, five other young people were also looking for a place to eat.

The five young men were all dressed fashionably. They glanced at the petite Su Keke, who was sitting in her seat, and then glanced at Xiong Jia and Sun Yusong, who were dressed in ordinary clothes. After they had a rough idea, they said, "Can we trouble the three of you to give us a seat?"

Hearing their request, the three of them were stunned.

There was only one empty seat here. They had originally planned to squeeze out one seat for Li Yueming and the other two so that they could sit down and eat first.

But now, there were five uninvited guests in front of him.

Su Coco was the first to recover from her shock. She asked with some doubt, "We only have one empty seat here. The five of you can't sit, right?"

Hearing this, the leader of the five suddenly grinned and pointed at the other four behind him. "Can't you just vacate your seats? Of course, this beautiful lady could still sit here and eat!"

Seeing their fearless faces, he could not help but sigh.

Only then did the three of them snap back to their senses. It turned out that this group of people was not here to give up their seats politely, but to snatch their seats!

Coco's expression changed and she said angrily, "We haven't even eaten yet. Why should we give up our seats to you?"

As if he had expected that they would not cooperate so easily, the young man in the lead smiled cheekily and said, "Since you are unwilling... Of course, there's no problem!"

He waved his hand, and the five young men behind him immediately walked over. The three of them surrounded him from five directions.

After doing all this, the young man said calmly, "Here, you guys eat first. We'll surround you and 'reserve' your seats in advance!"

7-22413 The three young people on the planet had never been bullied like this before. Their faces turned green when they heard this.

Sun Yusong stood up and said, "What do you want?"

They were not prisoners in prison.

What did they think they were?

The young man spread his hands and said, "What, you guys aren't willing? If you're not willing, you can also choose to give up your seats to us. That way, it won't be difficult!"

The other students who were eating around also noticed the abnormality.

However, not only did they not try to stop it, but they all looked like they were watching a good show. If it wasn't for the fact that the cafeteria prohibited noise and fighting, someone would probably be booing.

The troublemaker was dressed luxuriously and could even take up five slots for special recommendations. It was obvious that he came from a medium-sized planet with a deeper foundation. The one being bullied was obviously a small native from the side courtyard.

There was a huge gap between the two sides, be it in terms of foundation or strength.

It was a pity that they couldn't both suffer.

After all, the students present were all competitors. If a few of them could be sent back because of fighting, it would definitely be a good thing for those who stayed.

Chapter 799: Conflict 1

In the cafeteria of the Military Committee, a group of students were waiting for a good show.

The staff who maintained order around them were also not used to this. Anyway, students from all over the world came here every year and had conflicts. As long as they did not violate the rules of the canteen, they could not be bothered.

Su Keke and Sun Yusong's expressions turned ugly under the watchful eyes of the crowd.

At the beginning, they were too angry to react. But now, looking at the other party's unrestrained appearance, their clothes, and the number of people on them, they had already guessed that the other party was very likely a young genius from a medium-sized planet.

Under normal circumstances, a small planet like planet 7-20003 would claim to have five special recommendations, but in reality, it was impossible for a small planet to recommend all five. At least two of the recommendations would be rejected by the military committee during the review process.

When it was better, it was already good enough for a small planet to send three people. For example, Su Keke and Sun Yusong's original planets could only send two people most of the time.

To be able to send three this year was already an extraordinary performance.

However, this group of fearless young people was different. Not only were they able to occupy the five special recommendation slots, but they also had the guts to cause trouble in the cafeteria. It was obvious that both their planet of origin and their own strength were not simple.

If a conflict really occurred, the strength of the two sides would not be on the same level at all.

The young man and his four companions stared at Su Keke and the other two with half-smiles. Obviously, they weren't random bullies. They knew that Su Keke and the other two came from a small planet and weren't strong enough. No one could support them, so they could only suffer losses.

Rubbing his chin, the young man smiled. "How is it? Have you considered it? Should he give up his seat or quickly sit down and eat? If you're not convinced, then there's no problem. Let's go to the canteen and practice alone to see whose fist is stronger!"

Su Keke and the other two's faces turned even uglier.

On the planet where they were born, they could be considered as famous geniuses. Usually, who wouldn't be polite to them?

Now that he had arrived at the Imperial Sun Star, he finally understood what it meant to feel aggrieved.

It was because the planet they were on was quite remote and the resources were very poor. There were not many seniors who could take root in the Imperial Sun Star. Now that they had arrived in the Imperial Sun Star, it was difficult to even find a senior to receive them, let alone a big shot to support them.

Moreover, due to the geographical limitations, their own strength was not comparable to the disciples of the noble families. The combination of these two factors directly caused the other party to be unrestrained and not put their dignity in their eyes at all.

Under the gazes of the surrounding students who were watching a good show.

Coco blushed and said, "We found a seat first. We should sit here. Anyway, we won't let you. If you have the guts, chase us away."

Hearing her answer, the smile on the young man's face disappeared.

They just wanted to find a table to eat. After looking around, they felt that Su Coco's table was easier to bully. However, they didn't expect this girl to be so ignorant.

Of course, they did not dare to chase them away.

After all, they were not arrogant enough to go against the Military Committee of the Imperial Sun Planet.

Only the young masters of some planets would have the guts to do so.

Although he couldn't chase them away, he still had many ways to disgust them.

Seeing that they weren't willing to give up their seats, the young man wasn't in a hurry. He brought a few of his companions and stood nearby, guarding Su Keke and the other two as if they were criminals.

Although Su Keke and the other two were furious, they could only swallow their anger and accept the outcome.

This made the surrounding students who were watching the show a little disappointed.

As expected, the students on the small planet did not dare to confront them head-on, causing the conflict to not continue to escalate. If they could be sent back because of the fight, it would be a real family reunion for them.

Just as the students were feeling sorry for Su Keke, Li Yueming, who came from the other side, brought Lu Dali and Fan Li to Su Keke's table.

At this moment, Su Coco, who had already returned to her seat, also saw their footsteps. She quickly gave them a look, wanting them not to get involved in this farce.

However, Li Yueming didn't seem to see it. He walked over and greeted, "We meet again. There's still an empty seat here. Can I sit down?"

There were three people in Su Keke's group, but there were four seats. One of them was empty. Su Keke had asked Li Yueming to sit in this empty seat. They would give up another seat so that the four of them could squeeze together and eat.

However, the situation was different now. Su Coco and the others could barely keep their three spots, let alone leave a spot for Li Yueming.

Ben felt that the young man who had lost some face obviously couldn't let Li Yueming come up again.

Just as Li Yueming walked through the crowd to an empty chair and was about to sit down, the young man reached out and stopped him. He frowned and said, "Are you deaf or blind? Didn't you hear that these seats have been 'reserved' by us brothers?"

Chapter 800: Conflict 2

The expressions of the four young men around him were also very bad.

Su Coco and the other two had rejected him.

After all, they were the ones in the wrong.

But now, these three were obviously trash natives from a small planet.

Therefore, the few of them looked at Li Yueming Ming with anger. They were obviously angered by his blind behavior.

Li Yueming did not panic at all. He smiled and said, "I only know that the seat belongs to the person whose butt is sitting on the stool. If the butt is not sitting on the stool, it can still be reserved. Is there such a rule in the military committee's canteen?"

Lu Dali had been chatting with Sun Yusong and the Xiong family on the spaceship. Now that he saw the young geniuses from the big planet bullying them, he said with a ruthless expression, "You ignorant fellows, get lost!"

He was tall and strong, and he was the kind that exuded a domineering aura.

At this moment, he stood in the crowd like a lump of iron. His temperament was definitely not to be trifled with.

The young people from the five medium-sized planets on the opposite side clearly felt that the three of them were not to be trifled with. However, with so many people watching, if they admitted defeat like this, they would probably become the laughing stock of the students for a long time.

Therefore, he could only refuse to be outdone. We're from the third transit planet of Turing. If you really have the ability to make a fuss, then go out and fight!"

The third transit planet was considered a relatively well-known medium-sized planet. It was one of the important transit planets in the Turing Star Field.

Every day, countless interstellar spaceships would pass by the planet, bringing a huge tax and sufficient resources to the planet.

To be able to stand out from such a rich medium-sized planet, the strength of these young people in front of him was definitely not to be underestimated.

Although Lu Dali was a little hesitant, he couldn't lose face.

Seeing that the two of them were about to go out of the cafeteria to have an intense PK, the students who had been prepared to give up on watching could not help but have their eyes light up again.

However, Li Yueming obviously didn't want them to disturb his appetite.

Moreover, the opponents were not simple. If Lu Dali really accepted the challenge, he might suffer.

Therefore, he directly sat down on the originally empty chair and said slowly, "I've already sat down. If you still don't give up, you can try to chase me away!"

This move of his was very crafty.

The key was that the speed just now was simply unbelievable.

The young man's attention had always been on Li Yueming. Even when Lu Dali had a conflict with his companions, his gaze never left Li Yueming.

He had no choice because his intuition was like an alarm that could explode at any time. Every inch of his muscles was telling him that he could not leave Li Yueming. Once he left, a huge crisis might happen in an instant.

Even so, he did not even see Li Yueming's shadow at that moment. He only felt a blur in front of him, and then Li Yueming's figure had already appeared on the stool behind him.

If it was on the battlefield, wouldn't this instant be enough for Li Yueming to easily circle behind him and stab him?

The young man couldn't be 100% sure.

However, the cold sweat on his back had unknowingly drenched his clothes.

The other four students were also stunned.

They looked at Li Yueming, who was still in a good mood, and then at the young man with a pale face. They asked curiously, "What happened?"

The young man swallowed a mouthful of saliva. After a while, he said, "Let's go!"

The other companions were a little confused.

However, looking at the young man's pale face, he could only nod his head gloomily. Before he left, he did not forget to say some harsh words, "Hmph, you guys are lucky today. Pray that we won't see you again..."

Originally, it was just a habit of uttering harsh words.

Li Yueming and the others didn't say anything.

The young man almost staggered and fell to the ground.

He hurriedly pulled his companions and fled.

Because the reversal was too sudden, the surrounding students were all stunned.

Even Coco and the others couldn't help but open their mouths wide. They looked at Li Yueming in disbelief.

It should be known that because of the vision, they had all witnessed it with their own eyes. Li Yueming was almost blurred into a bolt of lightning at that moment.

In an instant, he bypassed the young man and sat down in the cafeteria's seat in an 'elegant' manner.

The entire process was done in one go, without the slightest bit of water.

It was as beautiful as art.

After a long while, Coco came back to her senses. Her eyes lit up as she said, "I couldn't tell. You're too amazing!"

Li Yueming smiled but didn't say anything.

The reason why he was so ostentatious in front of everyone was that he did not hide his strength at all.

Other than helping Su Coco and the others out of their predicament, the main reason was that he wanted to declare his fist to everyone.

After all, if the adults of this world were respected by strength, then the young people were respected by talent and potential.

Now that he had arrived at the Imperial Sun Star, there were as many geniuses as dogs and experts everywhere.

In this place, there was no need to keep a low profile. No one would investigate whether you had enough inner qualities to pretend to be a pig to eat a tiger. Instead, they would directly treat you as a pig.

If he was a genius, he would display it wantonly.

I'm not afraid that your talent is not high enough, but I'm afraid that your skills are not good enough and you can only be sent home.

Su Coco's big eyes were about to shine. She stared at Li Yueming and kept hitting him. It was as if she had gotten to know him all over again.

After all, although the few of them had a good time chatting on the spaceship, they were still very happy.

However, they did not fully understand each other's strength.

They thought that Li Yueming was just like them, coming to the Imperial Sun Star to try his luck!

He didn't expect Li Yueming to be so strong.

He was actually able to scare a few geniuses from medium-sized planets into not daring to even fart with just a look and a movement. Under the watchful eyes of everyone, they even lost their face and could only run away dejectedly.

Fan Li, who was following at the back, also felt honored at this moment. He happily replied: "Of course, my big brother's strength is not just for show. The score of the special recommendation assessment this time directly broke the record of our planet 7-20003 for hundreds of years!"

Hearing his words, even Xiong Jia and Sun Yusong, two honest people, were curious.

"So, how many points did Big Brother Li get this time?" Sun Yusong asked with his eyes wide open. 350 points?"

The military committee of the entire third universe had a fixed assessment for special referees, so the score could be used as a standard for the entire universe.

At this moment, Sun Yusong had increased the score to 350 points. This was already the highest score for the special recommendation assessment on their planet in the past.

However, Fan Li shook his head." Even Dali has more than 330 points. How can Li Yueming only have more than 350 points?"

Sun Yusong and Xiong Jia both gasped when they heard the answer.

It was more than 350 points.

That's 360 to 370 points?

This score could be considered outstanding on some large planets, right?

Indeed, one could not judge a book by its cover, and the sea could not be measured.

He did not expect that the harmless Li Yueming was the most hidden genius of the Witch Star Field!

The few of them chatted.

The bio-intelligent robot had already delivered their lunch.

Because there were only four seats, it was impossible for all six of them to have seats.

However, it was not a big problem to squeeze together and eat together.

While eating, Coco said gratefully, "I really have to thank you for this. Those guys on the third transit planet of Turing don't even put us in their eyes."

Lu Dali waved his hand and smiled. Besides, if you didn't give up a seat, we would still be waiting for others to finish eating before we can find a seat!"

The few of them chatted happily.

However, what they did not know was that an invisible camera not far from them had recorded the conflict just now and sent this information to the core area of the Imperial Sun Military Committee.
