

Maxing MT 801

Chapter 801: An Linna, the Emperor Sun Star!_1

After lunch at the military council cafeteria, Andrea, who had helped them buy temporary residence permits, returned.

This temporary residence permit was only valid for three months. After three months, those students who did not enter the academy or join any official organization would lose the right to stay on the Imperial Sun Star.

If they couldn't pay enough, the Star Field's immigration management department would expel them back to their respective planets.

In other words, the students had to showcase themselves in the next three months and do their best to prove their worth to the Imperial Sun and the Military Committee.

Otherwise, once they were eliminated from the first echelon of the 'prodigy nurturing flow', they would be eliminated.

It would be difficult to climb up again.

After counting all the students in charge and distributing all the temporary residence permits, Andrica clapped his hands and said, "The temporary residence permit is valid for three months. You should know this better than me. So, you can contact the elders of your respective planets to take you to the major schools to register!"

"If there are any problems at the official level, you can try to contact me, but I can't guarantee that I can help you solve them!"

"Lastly, try not to cause any trouble on the Imperial Sun Planet. Once you break the law, even your identity as a 'genius' cannot guarantee that you will be able to stay on this planet!"

After announcing all the information, Andrica looked at all the students and paused for a moment before continuing, "Good luck, boys. I look forward to seeing you on the battlefield in the future!"

Andrica turned around and led the students to the entrance of the Military Committee.

This was the procedure that all the students who passed the special referee assessment had to go through: First, they entered the Military Committee's base on the Sun Empire. After they passed the identity verification, they would apply for a temporary residence permit.

After applying for temporary residence permits, the students could be led by the person-in-charge of the various planets to receive the geniuses of their respective planets to enter the Imperial Sun Planet for free activities.

7-20003 The person-in-charge of Planet No. 10 had already received Evelyn's message. At this moment, he was gathered at the exit of the Military Committee's Imperial Sun Base with the other person-in-charge of other planets, silently waiting for Li Yueming and the others to arrive.

Andrey brought a group of students from the Witch Star System to the gate and informed his colleagues before leaving. Along with them were many students who had just finished their meals and obtained their temporary residence permits.

Amidst the crowd, Li Yueming dialed the communicator of the person in charge of planet 7-20003. The communicator was quickly connected, and a cold female voice sounded, "You guys come out from aisle 3. I'll wait for you at the smoking area at the door!"

After hearing the other party's voice, Li Yueming and the others calmed down and walked in the direction of Passage No. 3.

In the chaotic crowd, Li Yueming bumped into Su Coco and the others.

The few of them exchanged a few simple greetings and agreed to contact each other after settling down. Then, they went their separate ways to look for their own guides.

After walking for about five minutes, the crowd finally cleared up.

In the corner of the smoking room, the three of them saw the person in charge of planet 7-20003. The other party was a long and beautiful woman with long hair. She was wearing a capable agent uniform and was smoking a slim lady's cigarette alone.

Sensing their gazes, the woman turned to look at them. After sizing them up, she revealed a charming smile and said, "I don't know how long it's been since I've come into contact with young people. After seeing you guys, I really feel like I've aged!"

As she spoke, she shook her fingers and stubbed out the cigarette butt before exhaling a mouthful of smoke. "Let me introduce myself. My name is Davies Anlina, and I'm from planet 7-20003 like you. I'm currently the leader of the high-level special agent team in the Military Council's main office on Imperial Sun!"

"I shouldn't be in charge of welcoming newcomers. The reason I'm here is because Evelyn called me and repeatedly told me to be in charge!"

"It has been more than thirty years since Evelyn last recommended a young man to the Imperial Sun Star, but she made an exception this time. Not only did she call me to tell me, but she also reminded me that there is a genius among the kids that I sent over that is worth nurturing!" At this point, An Linna's gaze slowly swept across the three of them before finally landing on Li Yueming. She licked her red lips and said, "If I'm not wrong...The person she was talking about should be you, right?"

Small planets were called small planets.

Other than the lack of resources and the fact that they were located in a remote area, the biggest pain was actually that they did not have a strong enough expert.

The lack of resources meant that they could not nurture outstanding young people. If they could not nurture outstanding young people, they would not be able to produce powerful and influential experts to free the planet from its geographical predicament.

And if they couldn't get rid of the geographical predicament, it would cause the planet to lack resources even more.

It had always been a vicious development.

For example, An Linna was the leader of the high-level special agent team in the Military Affairs Committee's main office on Planet Imperial Sun. According to the current rank of the Military Affairs Committee, she should be a major general.

However, An Linna was already considered one of the best geniuses on planet 7-20003.

However, because he did not have a strong background, even if he was promoted to major general, his authority was limited.

Chapter 802: An Linna, the Emperor Sun Star!_2

Compared to the major generals who were born on large and medium-sized planets, she could only mobilize a small portion of the resources that belonged to the major generals.

Under such circumstances, if the small planets wanted to develop, they had to unite. Apart from working hard to climb up, the most important thing was to change the vicious competition of the planets they belonged to.

The most effective way to get out of this awkward situation was naturally to use all the resources to nurture the most talented young man and send him to a higher position as much as possible.

This way, everyone would be able to get better and better, and climb higher and higher.

In fact, almost every small planet did this, but very few could successfully escape from their own situation.

Whether it was planet 7-20003 itself or the young people from planet 7-20003, they had been working hard for a long time.

The closest he had come to success so far was more than 300 years ago. At that time, that genius had already attracted the attention of the Ultimate Martial Arts Academy.

Originally, as long as he grew up, there was hope to improve the plight of planet 7-20003...

However, in the end, it was only because of a small negligence on his part that he revealed his whereabouts when he was fighting the Zergs at the front line, causing him to be targeted and killed by the Hunter Team.

Now, he had invited her over to be his guide.

It was obvious that Evelyn really valued Li Yueming.

Li Yueming, on the other hand, replied in a neither servile nor overbearing manner, "If you're referring to the special recommendation quota, Lady Evelyn did give it to me!"

Li Yueming admitted.

An Linna's beautiful eyes erupted with a powerful force as she looked down at Li Yueming. "Oh, kid, you seem to be very confident? Do you know what this place is?"

Although her attention was not on Lu Dali and Fan Li yet.

However, he was only being watched by her from the corner of her eye.

Lu Dali and Fan Li also felt a huge pressure.

It was as if a mountain was pressing down on him, and his entire body felt heavy. At the same time, there was an indescribable fear lingering in his heart.

And this was just a trace of pressure that leaked out from the corner of his eyes.

If An Linna were to look at any of them right now, they would probably have already turned pale with fright.

This was the natural sense of oppression from a high-level martial artist to a low-level martial artist. There was no need for any action at all. Just a glance was enough to press a low-level martial artist who was not firm enough to move to the ground.

However, Li Yueming's voice remained calm as he replied indifferently, "I don't need to know where this place is. I just need to know what I need to do, right?"

He was not affected much.

An Linna was clearly a little surprised, and she only retracted her gaze after a moment. "Very good, it seems like Evelyn didn't lie to me. There is indeed a very interesting little fellow here!"

"Come with me, I've already arranged accommodation for you. It's only about ten minutes away from the many martial arts schools on the Imperial Sun Planet!"

Seeing that An Linna had retracted her martial arts aura, he led the way with a cigarette in his hand.

Fan Li quickened his pace and approached Li Yueming. He exclaimed, "F * ck, I've heard about Miss An Linna in school. She graduated fifteen years ago with a special recommendation, and she was already a level-six martial artist eight years ago. She might have already broken through or approached the threshold of a level-seven martial artist by now... You can actually remain calm under the pressure of her martial aura?"

At this point, Fan Li was speechless, as if he was racking his brains to find a more suitable adjective. After a long while, he continued, "I have to say, you're really a monster!"

Lu Dali silently followed behind him without saying anything. However, he looked at Li Yueming with confusion.

From the outside, Li Yueming did not look like a proud son of heaven, but the more they interacted, the more they could feel his unfathomable talent and strength.

When he first met Li Yueming, Lu Dali thought that Li Yueming's actual combat strength would be inferior to his. After all, he had grown up through actual combat since he was young. Whether it was height, weight, or physical strength, he should have an advantage.

Even when he was beaten up by Li Yueming for Evelyn's recommendation before he boarded the spaceship, Lu Dali was still not completely convinced.

But now, he realized how wrong he was.

If Li Yueming really wanted to deal with him, why would he need two hands?

The two sides were on completely different levels in terms of combat experience and actual combat strength. If they fought, it would probably be a one-sided suppression.

However, it was also after discovering this fact that Lu Dali found it increasingly difficult to understand.

They were clearly people with one head on each shoulder. Why was there such a huge gap?

He believed that he had worked hard enough. He had achieved the best results in all kinds of physical training and actual combat training at his age.

It was fine if they could not compare to the geniuses of those large planets. After all, there was a fundamental gap between the two sides.

Li Yueming's family background was similar to his, and his growth path was not as magnificent as his, but his actual combat ability was enough to hang him and beat him up. This made him doubt that life was hard to accept.

So this was a genius?

Looking at Li Yueming's back, Lu Dali felt discouraged and clenched his fists.

Although he might not be able to catch up even if he tried, if he did not even have the courage to work hard, then why did he come to the Imperial Sun Planet?

Thinking of this, Lu Dali quickly followed and said in a low voice, "You are indeed very strong, but I will definitely catch up to you!"

Li Yueming didn't have any reaction.

Only Fan Li secretly rolled his eyes. Lu Dali was tall and strong, but he didn't expect his brain to be so bad. How hard was it to chase after a perverted genius with a mortal body for no reason?

Only after being beaten up by reality would one know that there was really a barrier between ordinary people and geniuses that could not be crossed.

Only a truly smart person like him would act according to his ability and not go against him!

The three of them followed behind An Lin, but each of them had their own thoughts.

After leaving the headquarters of the Military Committee, they looked at the prosperous and lively planet in front of them. They were awakened from their dreams and could not help but widen their eyes.

It turned out that they hadn't landed on the surface yet. They were in the dissipation layer where the interstellar dock was located. They looked down at the glass cover of the closed loop of the interstellar space capsule, and a magnificent and huge fiery red planet appeared in their retinas.

This planet was so huge.

In front of it, planet 7-20003, where the three of them used to live, was as small as a grain of sand.

This planet was so prosperous.

Below the space station, a super floating fortress made of steel machinery was taking off.

The endless steel walls in the sky were the main melody of this planet.

Complicated, exquisite, and magnificent!

These were the feelings that surfaced in their minds when they saw the Imperial Sun Star, which was known as the 'Eternal Sun' by the surrounding Star Fields.

Even Li Yueming, who had always thought that he was knowledgeable, could not help but narrow his eyes when he saw this planet. His heart was even more shocked.

An Linna lit another lady's cigarette for herself. After waiting outside the space station for a while, she couldn't help but tease, "So, this is the central planet of the Imperial Sun Star Area. Is the stage big enough?"

Hearing this, Li Yueming could still maintain his rationality.

However, Fan Li and Lu Dali nodded in unison.

How could this stage not be big enough?

It was simply too big!

It even made them feel an impulse to be ashamed. After all, natives of small planets like them were as humble as ants in front of the huge elephants of the Imperial Sun Star. How could ants show off their might in front of elephants?

Chapter 803: Hard Titanium Alloy, Ultimate Martial Arts School!_1

Looking at the vast planet under their feet, the three of them, including Li Yueming, were all amazed.

The Imperial Sun Star was the economic, political, and cultural center of the entire Imperial Sun Star Field. In the entire third universe, it could be considered one of the most technologically advanced planets.

The interstellar spacecraft that circled the planet was already a beautiful sight.

On the giant red planet, the metal track carried the vehicle at high speed, drawing long tails through the clouds...

For people like them who were born on a small planet, this was definitely a dream scene that they could never imagine in their entire lives.

The reason why they could enjoy it now was, to a certain extent, thanks to the invasion of the Zerg. Otherwise, no matter how talented the three of them were, they would not have been able to cross the sea of stars to come here.

Standing on the platform at the dock's exit, An Linna remained silent for a moment before she finished a cigarette and said, "Are you surprised? When I first came here, I was even more surprised than you. What you see now is only one-tenth of the true appearance of the Imperial Sun Star. The real shocking scene is still to come!"

An Linna tossed the cigarette into the trash can before continuing, "Are you done?" Come with me after you're done!"

The three of them finally woke up.

What they had just seen was already shocking enough, but they didn't expect An Linna to say that this was only one-tenth of the entire Imperial Sun Planet.

How majestic was the real Imperial Sun Star?

The three of them tried to imagine it, but in the end, their imagination was limited. They could only smack their lips a few times with lingering fear and nod. "I'm done. I'll be right there!"

Seeing that the three of them were finally willing to look away, An Lin flicked her wrist a few times, and a few seconds later, a small floating spaceship appeared in front of them.

An Linna pointed at the small spaceship. "This is the H7 small civilian spaceship produced by the Hank Military Mining Group. I spent quite a bit of universe dollars to buy it. How about it?" "Isn't it cool?"

Looking at this small and exquisite spaceship that was full of technology and metal texture, although the facilities were not as advanced as those large military spaceships, Hank Military had done a lot of work on the design and materials.

Therefore, the flying ship's design was very domineering. Its entire body was filled with smooth and beautiful lines.

The three of them nodded sincerely.

A smug smile appeared on An Linna's face, and she was obviously pleased with their reaction. She opened the hatch and said, "Come in, I'll take you to the Interstellar Hotel to put your luggage!"

This was not the first time the three of them had taken a spaceship.

However, the military spaceships had restrictions. They could only stay in the cabin and could not enter the other areas that were not open to them. They could not enter the interior of the spaceship and look around.

The spaceship looked very small from the outside.

However, after entering the interior, he realized that it was much larger than he had imagined, and the decorations were also much more luxurious than he had imagined. The only difference was that the color was a little pink, and it was likely that An Linna had made some modifications to the interior.

After setting the destination, the spaceship sailed steadily.

Fan Li sat on the pink seat of the flying ship, his eyes shining. He said with a slightly perturbed expression, "Miss An Linna, how much is this spaceship? I also want to own my own spaceship. Tell me the price and let me give up!"

Hearing this, An Linna crossed her arms and smiled. "Haha, it's only one billion Universe Credits. It's not too much, haha..."

Even though he was mentally prepared, Fan Li still couldn't help but suck in a breath of cold air when he heard the number of one billion.

Good heavens, is the outer shell of this spaceship made of gold or is the interior made of gold? How can it be sold at such a high price?

One billion Universe Credits was almost equivalent to half a year's production capacity of some small corporations on planet 7-20003, yet they could only afford a small spaceship like this?

Sensing the confusion in his eyes, An Linna retracted her smile and explained, "Actually, this kind of small civilian interstellar spaceship can only be bought for three to five hundred million yuan at most... But wasn't the war on the front line tense these years? In addition, the resources in the Imperial Sun Starfield are also very scarce. The price of a spaceship that requires some hard titanium alloy will naturally rise. Even if I bid one billion, I would have to queue for more than half a year to buy it!"

Hearing her explanation, the doubts in their hearts were immediately resolved.

The so-called hard titanium alloy was a super precious metal that only existed in the core of abandoned planets. Whether it was building spaceships or developing various high-performance weapons and equipment, it could not be separated from it.

From all angles, this could be considered a currency that was even harder than the Universe Credits issued by the Alliance of Law.

Originally, the universe did not lack hard titanium alloy. However, ever since the Zerg invasion a few eras ago, the hard titanium alloy in the entire universe had been consumed at a rapid rate.

After the establishment of the Alliance of Order, the various universes tried to find a lot of substitutes for hard titanium alloy, but they still could not change the tense situation of hard titanium alloy in short supply. Now, the hard titanium alloy in the seven universes of the Alliance of Order was basically firmly controlled by the military committee. The hard titanium alloy produced every year was basically all made into various high-precision weapons and shipped to the frontline battlefield.

Chapter 804: Hard Titanium Alloy, Ultimate Martial Arts School!_2

Privately, they could only mine on planets with very low production and storage.

Building a spaceship, even a civilian spaceship, required some hard titanium alloy.

This was also the biggest reason why the price of spaceships had doubled.

The speed of the ship was very fast.

In about ten minutes, they landed in the residential area near the surface.

Li Yueming and the others also realized that the human towns on the Imperial Sun Star were not built on the surface, but were built a thousand meters above the ground, where the environment was not as harsh.

On the surface even further away, Li Yueming and the others could actually see a green color that was very pleasing to the music!

An Linna could be considered a responsible tour guide, and upon seeing the surprised expressions on their faces, she couldn't help but explain, "The surface of the Imperial Sun Star is a primitive forest without any pollution. You didn't expect this, did you?"

They all shook their heads.

When they looked down from the space dock, they did not see any greenery on the planet. They could only see endless steel barriers.

And now, after passing through the steel space on the surface, the surface of the Imperial Sun Star was actually a primitive forest that had not been polluted at all?

No wonder An Linna said that they had only seen one-tenth of Emperor Sun Star Field.

An Linna knew what they were thinking, and she continued, "When technology evolves to a certain extent, humans and nature can coexist peacefully, right?"

Fan Li and Lu Dali's eyes were filled with clear stupidity.

Only Li Yueming remained calm.

An Linna leaned against the glass window and stared at Li Yueming with interest. "You have a different opinion?"

Li Yueming nodded and then shook his head, "It's just that the people on the Imperial Sun Star can coexist peacefully with nature!"

"What do you mean?"

"There are so many technological facilities on the Imperial Sun Star, it can't be that they appeared out of thin air, right? Since the people on Planet Diyang were living in harmony with nature, there must be other places where people and nature could not live in harmony!"

An Linna was stunned for a moment before she smiled. "You're right. The so-called peaceful coexistence between man and nature is just a lie!"

An Linna seemed to be in a daze, and after a long while, she said with a self-deprecating expression, "I really don't know how we can see the light of victory in this war."

At this point, the atmosphere in the entire spaceship became a little heavy.

The war between the Zergs and the Alliance of Order was like a distant dream.

Although this dream seemed out of reach, it had unknowingly touched every aspect of their lives.

The group ended their short journey in silence. After An Lin's spaceship docked at the dock in the residential area, they finally officially set foot on the Imperial Sun Planet.

There were all kinds of cosmic humans from countless star fields on the Emperor Yang Star. There were yellow, black, green, and even blue skin...

Six ears and eight nostrils weren't anything surprising.

Although they were all collectively referred to as 'humans', some of the human-shaped creatures that were born in the harsh conditions of the starfields were really difficult to describe in a few words.

An Linna had arranged for Li Yueming and the others to stay in a hotel called 'Mr. Universe'.

According to An Linna, the owner of this restaurant was also a fellow villager from Planet 7-20003 who had come here to seek development, so she could naturally save some unnecessary accommodation expenses.

After all, she still owed a spaceship loan, and her financial situation was not particularly good. Naturally, she would save as much as she could.

After leading the group into the room, An Linna finally put away her indifferent expression and said in a serious tone, "Although theoretically, you can go for the assessment after touring the Imperial Sun Star for a period of time, if you don't want to be eliminated by other students before taking the assessment, it's better for you to quickly find a school that matches your ability!"

"I'm the team leader of the special agent team. I'm very busy with work on weekdays. In order to receive you, I've already asked my superior for a week's leave! Although my superior has agreed, I don't want to ask for leave from my superior again after a week. Therefore, I hope that you can settle the matter of applying for school within a week. Later on, when I have time, I can bring you to visit the surface park and underground entertainment city of the Imperial Sun Planet!"

An Linna paused for a moment.

He looked at the three people present and asked, "Do you have any other opinions on this arrangement?!"

Although she was asking a question, her tone clearly did not leave any room for the three students to refuse. Fortunately, the three of them did not have any other opinions. Only Fan Li said somewhat unconfidently, "Uh... Miss An Linna, what if I don't get into the martial arts school within a week?"

Hearing this, An Linna's delicate nose wrinkled as she swept her gaze over Fan Li with an unfriendly expression. After a long while, she said helplessly, "I will arrange for others to bring you to continue trying. However, if you still can't get into the academy in the first few weeks, you'd better think of a way out as soon as possible!"

There were many martial arts schools on the Imperial Sun Planet, but the number of outstanding students who came to the Imperial Sun Planet to participate in the assessment was even greater.

Most martial arts schools had almost filled up their student quota in the first few weeks. The students who came to apply later might have already been snatched up by the outstanding students in front of them before the examination had even started.

Under such circumstances, if one wanted to get in again, the only way was to display a talent that was truly stunning, such that the school would be willing to squeeze out a spot for someone else.

Fan Li was a little uneasy, but he knew that this was the limit of An Lin's abilities, so he hurriedly nodded. "Thank you, Miss An Linna. I'll do my best!"

An Linna nodded before turning to Li Yueming. "Have you thought about applying for the school?"

In the end, the biggest reason why she came here personally was to receive Li Yueming. Although Fan Li and Lu Dali were also geniuses, they didn't have the face to make her make such a big fuss.

It was just a bonus on the way.

Fan Li and Lu Dali obviously knew about this as well, so they didn't say anything.

Seeing that everyone was looking at him, Li Yueming scratched his head and said, "Of course I want to apply for the Ultimate Martial Arts School on the Imperial Sun Planet. Is there any other school for me to choose from?"

Li Yueming didn't think there was anything wrong with what he said.

After all, he really wanted to know if there was still a chance to join other advanced martial arts schools.

However, An Linna, Fan Li, and Lu Dali couldn't help but twitch their lips.

What did he mean by 'of course I'll apply for the Ultimate Martial Arts School on the Imperial Sun Planet'?

Could it be that the Imperial Sun Star's Ultimate Martial Arts School was that easy to get into?

Fan Li and Lu Dali were still fine. After all, the three of them had already gotten to know each other well on the road. They had long known that Li Yueming had extraordinary potential. Now, they were only amazed by Li Yueming's bravery.

However, An Linna was different. She had only met Li Yueming once, so her emotions were clearly more complicated than before. After a long silence, she took a deep breath and said, "Are you serious? Under normal circumstances, there was only one chance to apply for the Imperial Sun Star's Ultimate Martial School. If you tried now, you would not have the chance to apply again in the future!"

The number of students in the Imperial Sun Star's Ultimate Martial School was not fixed. It was said that there was a very strict elimination system.

Even if they passed the assessment and entered the school, those students who did not have enough credits at the end of the year would even be expelled from the school.

It was also because of this that some students who were not so confident in their own strength would specially wait for the first round of the assessment to end before signing up to participate.

This was also widely acknowledged as the easiest way to get into the Ultimate Martial Arts School.

A hundred to thirty percent of the students were admitted to the ultimate martial arts school through this method.

The reason why An Linna reminded Li Yueming not to sign up so quickly was obviously because she wanted Li Yueming to take this route more safely.

Chapter 805: Ultimate Martial Arts Academy, Assessment 1

There was no need to say how intense the competition in the Ultimate Martial Arts School of the Imperial Sun Star was. The geniuses of the small planets could only be used as a foil in the assessment. The students who were really ranked first on the admission list were all young geniuses from the big planets around the Imperial Sun Star Field.

Even the youngsters from the medium-sized planets would basically take the safer route of the second batch of students. Otherwise, it would be asking for trouble to compete with the students from the big planets.

Although everyone had learned the "Third Cultivation Plan for Personal Mighty Power Warriors", they had received individual tutelage from Level-8 and Level-10 martial artists since they were young. They had also received all kinds of precious martial arts resources.

How could their strength be easily matched by the geniuses of a small planet who had to save on their nutrient fluids?

Therefore, even though Evelyn had already mentioned in her letter that Li Yueming was extremely talented, An Lin still believed that no matter how talented Li Yueming was, there was no way a genius from a small planet could compete with a genius from a large planet.

This was not a difference in people, but a difference in their foundations.

7-20003 The young geniuses from Planet No. 10 could enter the Ultimate Martial Arts School in the second batch of assessments. They could already be considered peerless geniuses that were hard to come by in hundreds of years.

An Linna sorted out her thoughts and advised, "From my point of view, it's best for you to go to another academy to take the assessment. With your talent, it shouldn't be a problem for you to get into a first-rate martial arts school on Planet Diyang. After you're accepted by the other first-rate martial arts schools, you should wait for a while. The assessment for the ultimate martial arts school will end next month, and those who don't have enough credits will be eliminated in the third month."

Her expression was very serious as she looked at Li Yueming and said seriously, "As a person, I can tell you that this is the safest way! The strength of the young people from our small planets is not on the same level as those from the big planets. In a sense, the second round of the assessment is specially prepared for the young people from the small and medium-sized planets. After you get in, you will enjoy the same treatment as others, so you don't have to feel embarrassed!"

Obviously, An Linna thought that Yue Ming Ming was not willing to participate in the second round of assessment because he was afraid of losing face.

After all, for young people, especially those with pride in their hearts, it was unacceptable for them to admit that they were inferior to others.

An Linna had also participated in the academy's assessment in the past.

Therefore, he could understand Li Yueming's seemingly meaningless persistence.

After all, if it wasn't for the lack of resources, their achievements in the same age group might not be worse than others. They didn't do anything wrong, so why should they pick up the second batch of spots that others had left empty?

Of course, as her mental state matured, the resentment in An Linna's heart slowly dissipated.

There were too many people in the world who were unfair. There were also too many people who enjoyed the privilege of being high above. Being able to leave a path for the geniuses of small

planets to leap over the dragon gate was already the biggest concession made by those who had already gained benefits.

If it wasn't for the fact that the Zergs were invading the universe and needed to unite all life in the universe, it would already be good enough if they didn't plunder the various mineral resources on the small planet, not to mention leaving a path for the young people on the small planet to complete the transition of life level.

However, Li Yueming obviously wouldn't wait for the first batch of geniuses to be eliminated before picking up the empty spots.

He wasn't a genius, but a wall hanging on the wall.

He didn't have that much effort, nor did he need to care about so many twists and turns.

Therefore, he still said with a determined expression, "Ms. An Linna, please help me make some arrangements. I still want to apply for the Imperial Sun Ultimate Martial Arts School first!"

At this point, he paused.

In order not to reject An Linna's good intentions, Li Yueming thought for a moment before adding, "However, your suggestion is indeed very reasonable... Therefore, I will act according to my ability. If the young geniuses of those large planets are really too powerful and exceed the scope of my ability to deal with them, I will consider whether or not to participate in the second assessment!"

He looked at the serious Li Yue Ming in front of him.

An Linna sighed.

Actually, when she tried to persuade him, she knew that Li Yueming would not listen to her.

After all, he was a young man who would never turn back until he hit a brick wall.

He could only mumble and say with a tired heart, "Alright, I'll bring you to the assessment venue first. When you realize the gap between yourself and others, you'll know that I'm actually doing this for your own good..."

An Linna was indeed doing this for the good of Li Yueming and the others.

After all, from a certain perspective, their fates on this planet were bound together.

An Linna needed more outstanding young people to be her stepping stones.

On the other hand, the young people needed pioneers like An Linna to protect them from the wind and rain. There were no fundamental conflicts between the two sides, so there were naturally no more scheming.

Seeing that her persuasion had failed, An Linna decided to bring Li Yueming to the Ultimate Martial Arts School tomorrow morning to take a look.

Fan Li and Lu Dali's eyes lit up upon hearing this. Fan Li, who was even more thick-skinned, looked at An Linna with a pleading expression on his face. "Miss An Linna, can we go with you? Although we are not qualified to participate, just a glance from afar is enough to satisfy our fantasies about the ultimate martial arts school!"

Chapter 806: Ultimate Martial Arts Academy, Assessment 2

An awkward expression appeared on An Linna's face.

This made Fan Li and Lu Dali's hearts sink instantly. Fan Li hurriedly said, "If it's not convenient, then forget it. Forgive us for being presumptuous, hahaha..."

Although they really wanted to go to the Ultimate Martial Arts School to watch the show, they didn't want to put An Linna in a difficult position.

An Linna pretended to pull out a vintage leather wallet from her pocket and unzipped it, only to find two coins inside. She said dejectedly, "Li Yueming has Evelyn's recommendation letter, so he can enter the Imperial Sun Star's Ultimate Martial Arts School without any other procedures. As his guardian, I can also skip the fees... But you two can't do it. I'll have to spend a lot of money!"

As she spoke, she narrowed her eyes and looked at Fan Li and Lu Dali. With a slightly threatening expression, she said, "I can buy tickets for you first, but no matter who gets rich first in the future, you have to remember to bring me along."

Lu Dali and Fan Li were both stunned.

A moment later, he blinked and teased, "Then you have to be prepared for your investment to go down the drain. After all, we're not some big black horse. It's already good enough that you don't have to take us flying in the future!"

"I understand." An Linna smiled. "The black horse is warming up!"

Although she was older than Fan Li and Lu Dali, she could be considered young in the martial arts profession, so she didn't have any restrictions when chatting.

Seeing the few of them chatting and laughing, only Li Yueming, who was a middle-aged man whose actual mental age far exceeded his appearance, felt a little at a loss for a moment.

Early the next morning, An Linna arrived on time to pick up Li Yueming and bring him to the Ultimate Martial Arts School's assessment ground on the Imperial Sun Planet.

Because of the spaceship and the special flight route, it took less than twenty minutes to get to the Ultimate Martial Arts School from his residence.

The three of them were already mentally prepared to be shocked by the Ultimate Martial Arts School's size and luxury.

However, when the spaceship stopped at the designated parking area and An Linna pointed at the inconspicuous signboard not far away, they began to doubt their lives because of the huge psychological gap...

Not far away, there was a quaint and old courtyard. Outside the courtyard, there were already many young people with nervous and expectant expressions.

At the top of the courtyard, there were a few wooden signboards with an even more ancient texture. On them were written the words "Imperial Sun Star Ultimate Martial Arts Academy".

This was the Imperial Sun Planet. The entire planet was a product of the high-tech era. The metal houses and high-rise buildings around the wooden signboard were all high-end and classy.

Under such circumstances, the signboard of the Ultimate Martial Arts Academy of the Imperial Sun Planet seemed too inconspicuous.

Sensing their confusion, An Linna also stepped forward and answered, "Do you think that the Ultimate Martial Arts School is different from what you imagined? The difference is a little big?"

The few of them nodded. It was not just different from what they had imagined. The difference was simply too big. Their alma mater on planet 7-20003 was not so simple!

If An Linna hadn't told them everything, and if they hadn't been surrounded by luxuriously dressed young people, they wouldn't have believed that this was the ultimate goal of countless young martial artists in the entire Imperial Sun Galaxy-the Ultimate Martial Arts Academy.

An Linna naturally guessed what they were thinking, and she couldn't help but smile. "Isn't it good to have a bigger gap? The ultimate martial arts academy of the Imperial Sun Star was established when the Imperial Sun Star was first developed. It has lasted for two eras until now, and now you are seeing what it looked like two eras ago. You should feel honored!"

Hearing this, Fan Li and Lu Dali felt a little better, but their expressions were still bitter. They nodded reluctantly and said, "Alright, no matter what, this is the ultimate martial arts school on the Imperial Sun Planet. Even if we were to take a look at it from afar, it would be enough for us to make this trip!"

Both of them were visitors, so although they felt that it was a little unreasonable, they did not say much.

Li Yueming, on the other hand, was sensitive enough to notice the problem and asked, "Such a small campus, even the few of us can tear it down. How can it accommodate so many geniuses from the entire universe?"

Seeing that they were all doubting their own lives, An Linna stuck out her tongue and said honestly, "Hahaha... Alright, I'll stop teasing you guys. The Ultimate Martial School of the Imperial Sun Planet couldn't possibly be so shabby. The reason why it was so shabby was because this place was an old campus from the first era. It was a first-class protected cultural relic of the Imperial Sun Planet. It was only open for enrollment now!"

"The real Imperial Sun Planet Ultimate Martial Arts Academy's third era campus is actually not on the Imperial Sun Planet at all. It's on the Martial Guard 43 planet outside the Imperial Sun Planet!"

At this point, she paused and waited for the three of them to come to their senses before saying, "That's right, the current campus of the Ultimate Martial Arts Academy is made up of an entire satellite!"

Lu Dali and Fan Li's eyes widened. Their initial disappointment was finally replaced by anticipation.

"Let's go. We'll go and verify our identities first. Soon, a special car will send us to the assessment site. Our spaceship can't go to that kind of high-security venue!"

With that, An Linna led the three of them into the old corridor. Due to the high threshold, there weren't many students lining up at the school.

Li Yueming and An Linna had special recommendation slots, so they could enter and leave the campus freely. Lu Dali and Fan Li didn't, and each of them had to pay 30 million Universe Credits.

Hearing this amount, not only Lu Dali and Fan Li, even Li Yueming was shocked.

The ten million yuan scholarship he had received at the Starry Sky Martial Academy sounded like a lot, but he couldn't even afford a ticket to the Ultimate Martial Academy after he went to the Imperial Sun Planet.

After buying the tickets, the three of them followed the staff's guidance to the door to wait for the car.

Looking at the group of students around him, although they had not actually fought, he could still feel their high-spirited looks.

There was no doubt that the young people who had the confidence to set foot in this area were all the top geniuses in the entire universe.

Just by standing with them, Fan Li and Lu Dali, who were also young people, already felt a huge pressure.

An Linna glanced at Li Yueming with a half-smile. "The Imperial Sun Star's Ultimate Martial Arts School is the best school even in the Third Cosmos, so the students standing around you are not only from the Imperial Sun Star Field, but also the top geniuses from other star fields who came here from afar..."

"How is it? Would he still be able to show his previous imposing manner here?"

She had spent so much effort to do so, and her ultimate goal was to dispel Li Yueming's arrogant thoughts.

After all, being down-to-earth was a virtue. Being immersed in fantasy and not knowing the immensity of heaven and earth would unknowingly destroy oneself.

She was really optimistic about Li Yueming's future. She didn't want Li Yueming to regret it for the rest of his life because of her reckless actions. That was why she was so concerned.

Even Lu Dali and Fan Li could feel her painstaking efforts. At this moment, they couldn't help but persuade her, "Brother, you only have one chance to apply for the Imperial Sun Ultimate Martial Arts Academy. Don't take things too hard and sign up now!"

"We come from a small planet, and our resources are far inferior to those geniuses from the big planets. It's not embarrassing to apply for the second round!"

"As long as you can get in, there are many examples of geniuses from small planets turning against geniuses from big planets after obtaining the same resources. It won't be too late for you to exert your strength at that time, right?"

Looking at the worried faces of the few people who were deeply afraid of him, Li Yueming smiled and said, "I'm not stupid. If I really feel like it's not going to work, I'll take a step back..." But

they hadn't even reached the assessment location yet. Whether or not it would work, they still had to see it on the spot before they could make a decision, right?!"

Chapter 807: A Life and Death Battle, the Test Scene!_1

Li Yueming knew what An Linna, Lu Dali, and the others were worried about.

There were tens of thousands of martial arts schools in the Emperor Yang Star Field, and many of them were well-known in the Emperor Yang Star. However, the Ultimate Martial Arts Academy was unique, and only it was slightly famous in the entire third universe.

Therefore, the difference between getting into the Ultimate Martial Arts Academy and not getting into the Ultimate Martial Arts Academy would be quite large.

With the potential he had shown, as long as he did not participate in the first round of the Ultimate Martial Arts Academy's assessment like a hothead and obediently waited for the first batch of students to be eliminated before participating in the second round of the assessment that was specifically aimed at the geniuses of small planets, it was completely possible for him to enter...

What did this mean?

This not only meant a turning point in Li Yueming's own fate, but it might even be a turning point for the fate of the entire planet 7-20003 and its billions of people.

After graduating from the Imperial Sun Star's Ultimate Martial Arts Academy, he would be directly assigned to the core position of the Military Committee. In the future, he would have the opportunity to step onto the super stage of the universe.

A powerhouse of this level had the ability to change the fate of a planet or even a star field!

Therefore, they told Li Yueming not to be impulsive and to take the safest path to get in.

Li Yueming also knew that this matter was of great importance. It was related to his development trajectory in the next ten or even twenty years.

Therefore, he didn't try to be brave or take a huge risk. He just said that he would take a look at the situation first. If he really found that it was beyond his ability, he would choose a safer plan.

Of course, even though he had explained it this way.

However, An Linna, Fan Li, and the others clearly didn't believe him.

After all, they had already determined that Li Yueming insisted on being the first batch to participate in the assessment because he did not want to lose to others. How could he give up so easily?

Perhaps he would only lower his head and recognize reality after witnessing the terrifying battle at the assessment site...

He thought about it.

The Ultimate Martial Arts Academy's express train to welcome the freshmen to the examination hall had already arrived. The students waiting in the waiting room in a long queue began to slowly rush into the train.

Li Yueming and the others took out their temporary residence permits.

The thin LCD card was both their identification card and proof of residence. As long as they had tickets to enter the examination hall or a quota, they could hold the card and get on the car. The smart system would automatically detect it.

The hover train had a special track. Unlike other public transportation tracks, there were only a few trains passing by. There were hundreds of armed robots patrolling around.

Judging from the specifications of the track and the androids, they should all be military-grade.

Only the Ultimate Martial Arts School in the entire Imperial Sun Galaxy would be able to use a military-grade military track to transport new weapons.

The train was traveling at a very fast speed, much faster than An Lin's spaceship. About ten minutes later, the train plunged into the ground, and after passing through a long, dark tunnel, a vast underground space appeared before them.

There was no natural sun in the underground city, but there were several artificial suns that consumed a lot of power.

When he looked up at the virtual sky, other than feeling that the light was a little dazzling, there was basically no difference from the surface in other aspects.

The few of them could not help but marvel at the powerful technology of the Imperial Sun Star again.

If they hadn't seen it with their own eyes, they wouldn't even dare to think about such superb technology under normal circumstances.

After entering the underground, the train slowed down.

About two minutes later, the train finally arrived at the destination.

After the hover train stopped, the group of students also got off the train and looked around curiously.

Li Yueming and the other two were at the back of the group, while An Linna introduced them as she walked." "This is the second old campus of the Ultimate Martial Arts School from the last era. In the past, the level of secrecy was quite high. Although it's not completely idle now, it's already on the verge of being idle..."

"Because it was moved out of the Interstellar Committee's most confidential unit more than 300 years ago, the Ultimate Martial Arts School's examination venue has been set up here for more than 100 years!"

At this point, the few of them had already walked out of the hover train.

An Linna stopped in her tracks and took a deep breath before warning with a stern expression," "However, don't think that you can walk around freely just because the lockdown of the highest level of security has been lifted. If you don't follow the rules and step into the restricted area, it's not a big deal to be expelled from the Ultimate Martial Arts School. In serious cases, your entire family may be locked up in prison for the rest of your life!"

The three of them were flabbergasted.

However, when he thought about it carefully, there were countless young geniuses and powerful teachers in the Ultimate Martial Arts Academy. There were also many scientific research projects related to the defense of the Zergs. It was no longer a simple school.

They could be considered the first line of defense against the Zergs in the Imperial Sun Starfield.

Therefore, it was right to have a high level of military blockade. Normally, the outside world would not be able to get close to this area.

After the students got out of the car, there were specialized bio-robots leading the way. There were even more guards along the way, as well as areas that were strictly prohibited from entering. Although the students looked around curiously, they all followed closely behind the main group, not daring to take a single step.

Chapter 808: A Life and Death Battle, the Test Scene!_2

From afar, Li Yueming and the others heard a whistle coming from the second underground campus.

Although they had not seen it for themselves, everyone could already feel the smoke of gunpowder in the upcoming assessment.

They did not walk too far. After passing through a long metal corridor, everyone's eyes suddenly opened up. They saw an almost pure white space in front of them.

The space was very vast, and there were already hundreds of Union Gods gathered above to look at the young students below.

From afar, this scene seemed a little strange.

However, when they got closer, they realized that there was a huge piece of flawless glass under their feet!!!

Through the glass, they could see the vast land hundreds of meters away that looked like an alternate dimension. There were potholes, swamps, jagged boulders, and hills covered in yellow sand...

And in the center of it was a majestic mountain!

At this moment, there were a few figures in ragged clothes fighting on the mountain peak, stirring up waves of sand and dust.

An Linna was obviously no stranger to this place. Due to the special nature of her job, she had visited the Imperial Sun Academy many times before, and she was very much aware of her role as a guide. "The area we are currently in is the viewing area. The complex terrain simulation field below us is the assessment area. Those students who fought on the peak top should be the winners of this assessment."

Li Yueming and the others finally understood what was going on.

There were no problems with watching the battle and taking the assessment. The only thing that made them feel a little uncomfortable was standing on such a glass and looking at the examination hall.

Fan Li looked around and saw that no one was paying attention to him. He then asked in a low voice, "Ms. An Linna, what about the protective measures for this assessment? Why don't I see them wearing protective gear?"

An Linna had a strange expression on her face. "Where do you think this is?"

Fan Li felt his hair stand on end from her stare and couldn't help but say guiltily, "The examination room of the Ultimate Martial Arts Academy... Is there a problem?"

An Linna rolled her eyes. "The Ultimate Martial Arts Academy is the cradle of war machines in the Imperial Sun System. What makes you think that you can get something as childish as protective gear for your exams here?"

"The examination hall is the battlefield, and this is the cultivation philosophy of the Ultimate Martial Arts Academy. Therefore, during the examination, no protective measures will be given to the examinees. If they feel that their condition is not good, the only way to survive is to raise their hands and surrender and wait for rescue!"

"Of course, if the teachers of the Ultimate Martial Arts Academy don't have time to rush over to save you, then I'm sorry, you might become food for the captive Zergs in the examination hall!"

"The death rate of the Ultimate Martial Arts Academy's assessment has never been low. Of course, it doesn't mean that you're safe after you're admitted. The death rate might even be higher!"

Hearing her words.

Fan Li couldn't help but shiver.

To be honest, it was not that he had never fantasized about entering the Ultimate Martial Arts Academy to bring glory to his ancestors.

However, he did not expect that he would have to gamble his life to participate in just one assessment. The danger and cruelty in it made his heart involuntarily turn cold.

Even Lu Dali's expression changed.

One could imagine how terrifying the word 'death' was to young people.

Li Yueming didn't have much of a reaction.

After all, life and death had long been a common occurrence for him. This kind of assessment concept ignited the blood that had been dormant for a long time since he came to this world.

Compared to a real life and death battle, the 'special referees' assessment on planet 7-20003 was more like a child's play to him.

Just as they were still chatting.

The battle on the peak below had come to an end. A tall and thin student was punched in the chest by another short and fat student, almost falling off the cliff. He raised his hand unwillingly to admit defeat.

In the next second, a line of names appeared on the electronic screen not far away.

[Assessment result list:]

[1st place: Lin Ziyue]

” 1322 credits, ranked 10th on the overall leaderboard!]

[2nd place: Su Ran]

[11247 credits, ranked 37th on the overall ranking!]

[Third place...]

After the results were out, the entire spectator stand was in an uproar.

” The students who landed in the forest were almost wiped out by the Zergs. The students from Giant Rock Peak got a great bargain!”

A student nodded and echoed, ”The casualties are too tragic. These are all famous geniuses. Who knows how many schools would fight for them outside, but now they can only turn into dust in such a place...”

Some students were even indignant. ” The Ultimate Martial Arts Academy’s assessment is too bloody. Is such a life and death battle really worth it?”

Li Yueming, Lu Dali, and the others looked down the list.

There were a total of 50 students in this exam. However, other than the five students who were ranked at the front, the other 45 students were all marked as ” failed.”

And the most glaring thing was at the very end of the rankings.

There were a total of eight students ‘avatars on it with the word’ Death ‘written in bright red.

This was the assessment of the Ultimate Martial Arts Academy.

There was no reason or rules to enter the arena to fight and then survive.

It was all the rules of the entire exam.

Students killed each other, and the captive Zergs attacked crazily...Even if he wanted to end it, he might not be able to save his life.

It could be said that other than the special factor of the ‘examination’.

Beneath his feet was a battlefield!

Under the students ‘pointing and gossiping, they could even see the bones of the students who had died on the battlefield through the glass windows.

Their bodies were in tatters, and their limbs were in unnatural postures. Their skin and flesh had been gnawed on by something. It was hard to imagine what they had experienced before they died.

Not to mention Lu Dali and the others, even the geniuses from the big planets were so scared that their faces turned pale and their bodies trembled.

Very soon, a staff member came out to clean up the area.

After finding all the corpses that could be found, the second round of the assessment soon began.

Similarly, 50 students entered the examination ground. Their primary goal was not to pass the examination, but to survive in the examination hall. Then, they would consider how to kill a few more Zergs to obtain the final victory.

A familiar whistle sounded.

The students under their feet walked out from the teleportation points in each area and began to rush towards the high ground in their respective directions.

An Linna stared at the battlefield beneath her feet, and a terrifying killing intent emanated from her body. Everyone followed her gaze, only to see that after the students left, the ground beneath their feet and the hidden buildings were crawling out one bug after another.

Looking at the ferocious bugs that were as huge as washbasins, all the students who had never seen bugs before felt their calves cramping.

Looking at the dense horde beneath her feet, An Linna's killing intent subsided a little, and she turned to Li Yueming again." "This is a first-class unit of the Zerg's shell. The soldiers at the front line jokingly call it the 'Exploding Bread Worm'. It belongs to the lowest species of the Zerg and can only do some transportation and logistics work. What the examinees have to do is to kill as many of them as possible. Every bug killed counts as 10 points. Among them, there is a Queen of the Bread Worm. If you are lucky enough to find and kill it, you can directly get 300 points!"

"There will be about ten minutes of free time after the Zerg trial ends. You can choose to leave the examination hall directly or continue to participate in the battle. If you are not satisfied with your score, or if you have not reached the basic assessment score of 1,000 points and want to get more points, you can choose to climb up that peak to fight."

Chapter 809: The Assessment Begins, Get Ready to Kill!_1

"Therefore, if you don't have absolute confidence, don't easily try to register for the first round. Otherwise, putting aside the other powerful opponents for the time being, just the Zergs released from the assessment ground may require the examinees to pay the price in blood!"

An Linna felt a little more at ease when she saw Li Yueming's solemn expression.

Li Yueming was confident that he could stand out in the first round of the assessment.

Now that she had seen the tragic state of the students under her feet, she believed that as long as Li Yueming's brain was not completely destroyed, he should know when to give up.

The first round of assessment was too bloody, and the competition was far beyond the limits that the geniuses of small planets could withstand.

Only a very small number of geniuses who were born on large planets and had fought with the Zergs before could stand out in this life and death battle.

An Linna's expression softened a little at this thought, and she said in a more relaxed tone, "This time, just treat it as me bringing you guys here to see the world. If you want to apply, it's best to follow my plan!"

Lu Dali and Fan Li nodded and echoed, "That's right, that's right. Let's just treat it as having gained some knowledge today. As for the assessment, let's wait a few months!"

If they were to say that they had persuaded Li Yueming to be safe, then now, after witnessing the cruelty and horror of the first round of assessment, they were sincerely persuading Li Yueming not to participate.

After all, although the three of them were competitors on planet 7-20003, they were fellow countrymen who supported each other after coming to the Imperial Sun Galaxy.

Persuading Li Yueming was not only for Li Yueming, but also for themselves.

Seeing the three of them talking at once to persuade him to give up on the idea of participating in the first round of the assessment.

Li Yueming couldn't help but feel a headache. If it was something else, he might have been able to compromise, but this was something that concerned the development trajectory of the next ten or twenty years.

After thinking about it, he insisted, "Miss An Linna, Dali, Fan Li, you might not know my strength yet. This assessment is really not a difficult thing for me!"

Hearing his answer.

The three of them couldn't help but widen their eyes.

What?

We don't know your strength? Isn't it difficult to pass this test?

Before Lu Dali and Fan Li could say anything, An Linna cursed in a low voice, "Are you crazy? He actually did not take his future and life seriously!"

"Don't we know your strength? Ivelina has shown me your entire resume since you were a child. You only broke through to become a Class 1 martial artist two months ago, and the weakest among the students taking the test below you is a Class 3 martial artist."

"In addition, although the Zergs hidden in the examination hall below us are the lowest level, only a Level Two martial artist can pose a threat to them. Do you think you can do it?"

An Linna's voice was filled with anger, and she was clearly very dissatisfied with Li Yueming's behavior. She had clearly tried her best to reason with him, but Li Yueming was still as stubborn as a bull.

Fan Li and Lu Dali also opened their mouths, apparently wanting to say something.

However, Li Yueming slowly shook his head at them, indicating that there was no need to say anything more. He ignored all the dissuasive voices and said with a firm gaze, "I've made up my mind. You don't have to persuade me anymore!"

As he spoke, he paused and comforted, "Don't worry, I'll give you a big surprise!"

An Linna rolled her eyes, clearly infuriated. "I hope you're not crazy. Otherwise, you'll really become a fool if you die for nothing!"

She hoped that Li Yueming would follow her plan, but she wasn't Li Yueming's mother or anything.

Now that Li Yueming didn't listen to her advice, she could only give up.

Shaking his head, he made way and said, "Turn left from this side of the registration area. There are teachers from the Ultimate Martial Arts Academy there. Hand over your identity card ticket to them. After your identity is verified, you can officially participate!"

Li Yueming nodded.

Without any hesitation, he made his way toward the direction An Linna had pointed at.

An Linna could only shake her head with a sigh as she watched him leave.

She had always had a good impression of Li Yueming, but she didn't expect him to treat her like a donkey's liver and lungs even though she had tried so hard to dissuade him.

This made her sad and disappointed.

Beside him, Fan Li and Lu Dali couldn't help but comfort him. "Ms. An Linna, don't be too angry. Li Yueming might really have the guts to do this. After all, he wasn't the kind of person who didn't care about the consequences!"

An Linna remained silent.

A moment later, he laughed at himself and said, "I hope so!"

Following the direction An Linna was pointing at, Li Yueming soon arrived at the registration location for the Ultimate Martial Arts School.

Other than him, there were also many students lining up to register.

When Li Yueming came over, almost all the students in the queue looked at him coldly.

His gaze contained scrutiny, vigilance, and a faint hostility.

The young people present might be classmates or comrades who needed to stand shoulder to shoulder in the future.

Chapter 810: The Assessment Begins, Get Ready to Kill!_2

But now, they all had the same identity

Naturally, no one would be kind to their competitors.

Li Yueming turned a blind eye to it and went straight to the end of the line to line up.

About five minutes later, the students in front of him had already registered, and it was finally his turn.

Li Yueming handed over his temporary residence card.

The person in charge of registration was a white-haired old man. After receiving the temporary residence card, he skillfully swiped it on the machine.

Li Yueming's personal information appeared on the LCD screen.

The old man glanced at Li Yueming's personal information on the LCD screen, then glanced at Li Yueming. After a moment of silence, he adjusted his glasses and said, "Are you sure you want to apply for the first round?"

"Yes!" Li Yueming Li nodded.

The old man took his identity card and said, "I have to tell you first that the Ultimate Martial Arts Academy will not give you a single cent of compensation if you die in the examination hall. This requires a signed contract, so have you really thought it through?"

"I'm sure." Li Yueming nodded.

The old man sized up Li Yueming as if he was looking at a lunatic. After a while, he turned to the computer terminal and went through the procedures for Li Yueming. "Go over there and sign the death responsibility form. Then, someone will lead you to the preparation room. It will be your turn after the last batch of students finish their exams!"

Li Yueming nodded and was about to take the temporary residence card from the old man.

However, the old man did not hand it over to him directly. Instead, he said, "You still have a chance to regret it before the exam officially begins. Young man, don't blame me for not reminding you to do less stupid things!"

Li Yueming knew that the other party had good intentions, but such good intentions were undoubtedly a burden to him.

If he had known that it would be so troublesome, he would have filled in the rank of Level Two Martial Artist.

Rank-1 martial artists could be considered the best among the young people on planet 7-20003.

However, after coming to the Imperial Sun Star, even dogs were probably one level higher than him.

After receiving the card, he smiled politely and said, "Thank you for your reminder, sir!"

Then, he left quickly.

Although the small episode that happened just now wasn't very long, it still attracted the attention of many students who were applying for the exam.

After all, under normal circumstances, the teachers of the Ultimate Martial Arts School wouldn't talk so much.

But now, Li Yueming had spoken a lot about it alone. Naturally, it was not normal.

With so many people present, there were naturally some sharp-eyed people. When they swiped Li Yueming's identity card, someone had vaguely glanced at it. At this moment, he was a little dumbfounded and said to his companions around him, "This guy seems to be a Level One Warrior!"

Once this news spread.

Instantly, all the examinees in the exam room widened their eyes.

"What is a Level One martial artist doing here? Doesn't he know that we are at least Level Three martial artists?"

"I don't know. He seems to be a disciple from a remote small planet. Where did he get a place to apply for the Ultimate Martial Arts School? Didn't the elder who gave him the place tell him about the danger here?"

"It's f * cking ridiculous. He really doesn't want to live!"

The group of students who had successfully applied for the exam whispered among themselves. Even the teacher who signed the disclaimer contract for Li Yueming looked up repeatedly when he heard this, causing Li Yueming to be a little confused for a moment.

Damn it, all of you are geniuses. Do you have to be so gossipy?

Besides, isn't it good for you to have a weak competitor? Can you leave me some face?

Fortunately, the students only discussed it for a while before they shut up.

After all, compared to meddling in other people's business, it was more important for them to take care of their own affairs and adjust their mentality to prepare for the upcoming assessment.

There was also a viewing platform in the preparation area.

Moreover, the field of vision was clearer than the spectator stands outside.

At this moment, the previous batch of students were struggling to hold on under the siege of thousands of Zergs.

Let alone killing a few more Zergs.

He was already proud enough to be able to ensure that he was not injured.

Under normal circumstances, the best time for the examinees to score was before the Zergs had completely gathered to form an army, and when the Zerg army retreated. Only these two periods of time would allow them to catch a few lone Zergs and kill them.

Now, when the Zerg swarms gathered to form an army, it was very difficult for the examinees to accurately kill a single Zerg.

It was not Li Yueming's first time seeing Zergs.

However, what he had encountered in the past was too terrifying.

This was the first time he had come into close contact with such a low-level Zerg.

About ten minutes later, the assessment time was basically over.

The bug tide began to retreat slowly.

The exhausted examinees who had been besieged were all invigorated and started to blow the horn to fight back.

Of course, even though it was called a counterattack, it was actually just blocking the retreat route of a few Zergs, and then separating them from the main force so that they could be killed easily.

The assessment had basically come to an end here.

The next step was to see who could obtain a higher score and pass the assessment.

At this moment, more than ten Ultimate Martial Arts Academy teachers appeared in the preparation area. All of them had serious expressions and emitted the aura of powerful martial artists.

The strongest fighter Li Yueming had seen so far was probably the Commander-in-Chief of the Military Committee on Planet 7-20003, Evelyn. He could feel the destructive aura from her.

However, even Evelyn was nothing in front of the teachers from the Ultimate Martial Arts School.

If he was not wrong, the other party was at least a martial artist above level ten!

After all the teachers had arrived, a teacher wearing the 'Head Examiner' badge on his chest stood out. He swept his gaze across the examinees present and slowly said, "The ultimate goal of the Ultimate Martial Arts Academy's training is to go to the battlefield. The battlefield is where blood is shed and sacrifices are made, so we don't welcome cowards here!"

"No matter what your purpose of joining the Ultimate Martial Academy is, whether it's for the sake of all mankind or the entire universe, or simply to enjoy glory and wealth when you go out... But today, you all have the courage to participate in the assessment, which is worthy of praise!"

"So let me confirm once again, are you all ready to die?"

The group of students at his feet was very quiet.

However, their determined gazes had already expressed their intentions.

The head examiner nodded in satisfaction. The assessment has officially begun. I hope that you will become the pillars of our human race in the future!"

As soon as he finished speaking, the surrounding teachers waved their arms.

Instantly, the fifty plus students present all blacked out.

There was a strange feeling in his body.

After the strange feeling faded, the students opened their eyes again and realized that they had already arrived in the examination hall!

Li Yueming also experienced this magical method.

Although he didn't know how the teachers did it, Li Yueming was keenly aware that the strange energy just now had the same origin as the Reincarnation Mark.

It was probably a complicated method of space exchange.

He could not understand it for the time being, nor did he need to understand it, because there was a more important matter at hand, which was to enter the Ultimate Martial Arts Academy and completely establish his identity as a genius!

Thinking of this, he stood up straight and looked around. He realized that he should be in the 'forest' area of the examination hall.

There were many trees in this area as a shelter. It was suitable to avoid the pursuit of the Zergs, but it was not suitable for Li Yueming to kill.

Therefore, he jumped straight to the top of the jungle. After identifying his position, he rushed to the edge of the swamp area, which was more open and flat.

Meanwhile, Fan Li, Lu Dali, and An Linna were looking for him among the students on the special single-sided glass. After looking around, the sharp-eyed Fan Li pointed at a figure that was moving rapidly through the forest and said, "Is that Big Brother Li?"

An Linna's vision was clearly ten times better than his.

Hearing this, she looked at the place where he was pointing and nodded. "Yes, his starting zone is the 'Jungle'. As long as he isn't trapped, it's a good hiding place!"

Lu Dali, who reacted the slowest, scratched his head and said, "But why do I feel like he's running out of the forest?"
