

Maxing MT 811

Chapter 811: Shocking Everyone!_1

Under the gazes of the three people, Li Yueming was moving at an extremely fast speed.

In the beginning, his actions did not attract the attention of the spectators.

After all, there were many examinees moving at the same time as him. Basically, 99% of the examinees would immediately occupy the surrounding favorable terrain after they realized that they had entered the examination hall.

A favorable terrain could resist the insect tide's attack well, but a bad terrain was not only disadvantageous to their performance.

It might even put the examinee's life in danger.

Thus, they had no choice but to react quickly.

But a few minutes later, Li Yueming's figure became more eye-catching.

Not only did he try to seize the advantageous terrain like the other students who were born in the jungle, but he was also rushing forward, as if he wanted to leave the jungle and head to the swamp area where no players wanted to stay!

Moreover, he was extremely fast. Every time he jumped, his speed would exceed the limit of a normal player.

Such a unique figure naturally attracted the attention of many students and teachers of the Ultimate Martial Arts Academy not long after the examination began.

"That examinee's starting point was clearly in the forest, so why did he run outside?"

"According to the official statistics, the jungle is undoubtedly the best. Not only is it more suitable for pulling the defense line when surrounded, but the trees and complex terrain will also hinder the Zerg's speed when they retreat. It's already the most suitable choice among the few starting terrains..."

"If I was as lucky as him, I would definitely choose to hide in a nearby tree instead of wasting my time in the forest..."

"Am I the only one who thinks that this player's speed is abnormal? And the direction he chose to move in was also very strange!"

"Could it be that this fellow is going to abandon the forest and head to the swamp? The swamp is a smooth road. There will occasionally be mud restricting his movements. Are you crazy?"

He looked at the maverick Li Yueming at his feet.

Almost everyone who was observing him was confused as to what he was trying to do.

Of course, this question did not bother them for too long.

Two minutes later, Li Yueming had completely left the jungle and stepped into the swamp area.

At this moment, the entire examination hall was filled with a strange calm before the arrival of a storm. Occasionally, a few examinees' figures could be seen shuttling through various areas, but they would soon disappear.

After arriving at the wide and flat swamp area, Li Yueming slowly heaved a sigh of relief.

This place basically had nothing to hide except for mud and some weeds. Under normal circumstances, it was definitely not suitable for defending or pulling, but it was very suitable for a battle of annihilation on flat ground.

Li Yueming had already set his sights on this place when he was watching the battle.

As he stood alone in the swamp area, the gazes of everyone around the examination hall instantly gathered on him.

There was no helping it. At this moment, he was too conspicuous.

The other examinees were frantically looking for a hiding spot to resist the incoming Zergs. Only he was alone, standing on a flat swamp.

Even if he wanted to, it would be difficult to not attract attention.

"This guy is crazy. He really stopped in the swamp. What is he trying to do?"

"The swamp basically doesn't have any geographical advantage, right? Has this guy really gone through systematic learning?"

"I heard that this candidate's name is Li Yueming. He comes from a remote planet in the Witch Star System with the number 7-20003. He seems to be a Level 1 martial artist until now!"

"F * ck...A Level One Warrior? Really?"

"Where did a Rank-1 martial artist get a place to apply for the examination? That's not right. Under normal circumstances, shouldn't the enrollment of small planets only begin two months later?"

"Who knows what's going on? Maybe this guy doesn't even understand the difficulty of the Ultimate Martial Arts School's assessment?"

"No matter what, this matter sounds quite ridiculous. Didn't he have an elder who was familiar with the rules tell him not to do this?"

This was because Li Yueming's performance was too abnormal.

Soon, his personal information was pulled out by many examinees.

An Linna and the others didn't know whether to laugh or cry upon hearing their discussion.

Perhaps they never dreamed that planet 7-20003 would be noticed by the geniuses of the high-level planets in such a way.

If Li Yue Ming were to lose miserably in this assessment, planet 7-20003 would probably become the laughing stock of the examinees for a long time to come.

However, there was nothing they could do at the moment.

He could only silently pray that Li Yueming wasn't bragging before and that he really had a certain degree of confidence in this assessment.

Otherwise, losing face was a small matter.

He was afraid that he would lose his life in the examination hall if he was not careful.

Under the gazes of many examinees, with the sound of a whistle, the Ultimate Martial Arts Academy's assessment was finally about to begin.

In the examination hall, airdrop supply boxes that were several meters long descended from the sky. Inside were some high-level weapons and defensive equipment forged by the Military Industry Committee.

After the supplies landed, the students had one minute to search for them and fight for them.

After a minute, the Zergs would awaken from their forced hibernation and tear apart all humans in their sight!

Chapter 812: Shocking Everyone!_2

If the candidate did not manage to snatch the weapon within this one minute, then the exam would basically be over. If they did not want to die, it was best to surrender immediately and let the examiner pick them up.

Otherwise, they would definitely be very passive in the next insect tide.

It was because even martial artists would find it difficult to break the Zerg's carapace defense with their bare hands. They had to have a weapon that could break the Zerg's defense.

Li Yueming was not anxious.

This was because the airdrop supply boxes in other regions might be more popular resources.

However, the swamp was a place where even dogs wouldn't stay. No one would fight with him for the dropped airdrop crate.

As expected.

About ten seconds later, a two-meter-long heavy box landed on the swamp not far from Li Yueming.

Li Yueming walked over slowly and kicked the box away. There were knives, guns, sticks, tridents, hammers... There are more than ten kinds of utensils.

Li Yueming casually glanced inside.

If he was fighting against a strong opponent, Li Yueming would undoubtedly choose the long saber.

However, what he needed to do now was to cause as much damage as possible. The sledgehammer was naturally Li Yueming's most suitable super weapon.

In terms of destructive power, Hammer was the top guest.

After a quick glance, Li Yueming immediately chose the sturdy hammer from the airdrop box as his weapon.

As soon as the heavy sledgehammer was in his hand, Li Yueming's mouth revealed an impatient smile.

A few more airdrop crates landed in front of them.

However, he did not care. His eyes were fixed on the Zerg's frozen cabin that had quietly appeared not far away!

When the spectators saw Li Yueming not move after taking a weapon, they all gasped.

"This guy is really a hothead, right? Putting aside the heavy hammer, why didn't he go to the other boxes to find a set of defensive equipment? Was he really tired of living and rushing here to reincarnate?"

"If there is any advantage in the swamp area, the only advantage should be that there are no other examinees fighting for the airdrop crate, right? In the end, there were several airdrop boxes in front of this guy, but he was completely indifferent to them...Then what is he doing in the swamp?"

"The Ultimate Martial Arts Academy will have a few top-notch students appear in the assessment every year. The top-notch students in this examination are probably the examinees from this small planet, right? I can already imagine the scene of him being surrounded and eaten by the Zergs later!"

"If you want to commit suicide, wouldn't it be nice to find a rope at home and hang him? He insisted on coming to experience the extreme pain of being bitten to death by the Zerg...You're really unreasonable!"

At this moment, almost all the examinees who were watching the battle gave Li Yueming a thumbs up.

It couldn't be helped. He was really too good. He didn't look like he was here for the assessment at all. Instead, he looked more like he was in a hurry to commit suicide!

The assessment had yet to officially begin, but there were already many examinees who could not help but close their eyes. They did not want to see the bloody and terrifying scene when Li Yueming was torn apart.

No matter how many times one looked at that kind of thing, it would make one feel both mentally and physically uncomfortable.

A minute passed quickly.

The Zergs that were forcefully contained and imprisoned in the assessment ground had already been awakened by special potions.

They were crawling out of their hibernation chambers. Looking at the familiar environment around them, they let out an angry neigh that made people's eardrums tremble.

After being imprisoned by humans for so many years, the anger and resentment in their hearts were almost dense to the point of materialization.

Under such circumstances, the Zergs did not have much rationality.

They only wanted to tear and destroy everything, especially the humans who imprisoned them as research subjects.

The dense swarm of bugs quickly formed up from the various hibernation chambers. Under the command of the Bug Tribe Queen, they began to move towards the direction where the examinees were gathered.

Thousands of half-meter-long bugs looked like a black torrent from afar.

This was only the first batch of awakened Zergs. More Zergs would be awakened in the future until they killed all the hateful humans or were imprisoned by humans again.

There was no doubt that a team of Zergs had arrived at Li Yueming's location.

These bugs could identify the location of their prey by the smell in the air and the heat of the creatures.

Because Li Yueming was alone in the swamp, there were less than a hundred Zergs sent to attack him!

It seemed like he was being treated as a weak link!

However, this wasn't a bad thing. After all, if too many Zergs came at once, it would be a big problem even for Li Yueming.

A hundred was just the right number.

At this moment, the other examinees were still hiding in the dark and praying that the Zerg would not attack them first.

Li Yueming had already grabbed the hammer with one hand and charged straight at the Zergs.

This scene naturally couldn't escape the attention of the surrounding students and teachers. At this moment, they couldn't help but exclaim, "It's over, it's over. This guy is really going to die!"

"No wonder he dared to stand alone in the swamp area. Previously, I thought he had some kind of strategy. I didn't expect him to directly charge towards the swarm of insects...Did he think that he was very handsome like this?"

"This is only the first wave of the Zerg horde. Although there aren't too many of them, once they are entangled by the Zerg in front, when the Zerg in the future wake up, they won't even be able to escape!"

“Boorish man, it’s fine if you don’t take your own life seriously, but you don’t take the Zergs seriously? It’s not that I want to say this, but you deserve to die!”

Li Yueming’s action of pouncing towards the Zerg was undoubtedly unreasonable to the surrounding examinees.

The reason why the Zergs were so powerful was not because of their individual combat strength, but because of their unique way of survival and reproduction. To the Universe of Order, the overwhelming Zerg horde was the source of fear that was truly difficult to face.

But now, Li Yueming clearly didn’t understand this point thoroughly enough.

Otherwise, it was absolutely impossible to perform such a cerebral hemorrhage operation.

An Linna, who had been trying to persuade herself not to get angry, finally couldn’t take it anymore. Veins were popping out on her fair face, and she turned to Fan Li and Lu Dali, who were standing beside her, and bellowed, “”Didn’t you learn how to face the Zergs on planet 7-20003?”

Fan Li and Lu Dali broke out in cold sweat.

No matter how unhappy An Linna was, she didn’t show her scary side.

And now, her defense was clearly broken by Li Yueming.

After all this time, she was jumping up and down like a clown. She even specially applied for a week of precious leave from the higher-ups. In the end, the student she had high hopes for was not a so-called genius, but a complete idiot.

Anyone would feel their blood pressure rise.

Wiping the sweat off his forehead, Fan Li said with a bit of confidence, “”Of course we have...”

Before he could finish his sentence.

An Linna’s furious roar and questioning voice came again. “”You’ve learned it before, so why is he fighting the Zergs now? Did poop enter your brain?”

An Linna was so emotional that she couldn’t care less about her ladylike image anymore.

Lu Dali and Fan Li lowered their heads at the same time.

He was afraid that if he said another word, An Linna would be unhappy and drive all three of them back to planet 7 – 20003 to farm.

However, just as An Linna was about to lose her mind...

However, a shocking scene suddenly appeared on the battlefield.

Li Ming was carrying a heavy hammer. Like a nimble swallow, he appeared beside the black mealworm in a few leaps. He raised the hammer in his hand gently and smashed it in a beautiful parabola as if it was alive.

This hammer strike looked rather gorgeous.

However, the explosive power was just right. It smashed onto the shell of the black-scaled mealworm without any more or less.

“Pa ji!”

A dull and crisp sound rang out. The Black-scaled Mealworm that was hit by Li Yueming’s hammer really exploded like a sandwich, and countless stinky green liquid splattered.

Seeing this situation.

With a whoosh, the entire examination hall fell silent in an instant.

Chapter 813: Shocked Everyone, Black Beetle Queen!_1

Seeing the sudden scene in the exam hall, the entire spectator area fell silent.

They didn’t expect Li Yueming to take the initiative to rush over and fight the Zergs.

They didn’t expect Li Yueming’s attack to be so much fiercer than they had imagined.

When they finally came back to their senses, many of the audience members were shocked.

“Didn’t you say that this guy is only a Class 1 Martial Artist? How could a Level One Warrior kill an Insect with a single strike?”

“The source of the information must be wrong. It’s impossible for a Level 1 martial artist to break through the shell defense of the black-shelled mealworm. Although that guy’s brain is not very good, his strength might be stronger than we thought!”

“Interesting. That guy is quite bold, but can he deal with so many Zergs?”

“Once he is entangled by the Zergs and loses his agility, when the reinforcements of the Zergs arrive, it will be a certain death. I hope this guy doesn’t die so miserably!”

In the spectator stands, many examinees initially thought that Li Yueming was tired of living and was courting death.

Everyone was waiting to watch a good show.

Now that they realized that Li Yueming’s attack power was extraordinary, they finally became a little more serious. They wanted to see what Li Yueming was up to.

Not far away, Fan Li and Lu Dali also perked up.””See, Li Yueming shouldn’t be courting death. He has the ability to kill the Zergs!”

Hearing this, An Linna’s furious expression eased a little.

However, he still had some anger left in him.”So what? He’s carrying such a heavy hammer. He might be able to gain an advantage at the beginning, but as time goes on, his stamina and agility will definitely decrease. Once he’s surrounded by the Zergs, even a few more lives won’t be enough to kill him!”

As a high-level martial artist who had a full understanding of the Zerg race.

An Linna was obviously much more knowledgeable than Fan Li and Lu Dali.

” A real battlefield is not a place where one’s courage is displayed. Not only do you have to pay attention to tactics, but you also have to grasp the timing and the psychological state of both the enemy and yourself. Any slight deviation will lead to eternal damnation!” It was also because of this that she was so angry with Li Yueming’s behavior. “Judging from the strength he has displayed now, if it was the second round of the assessment, he would most likely pass it. However, he insisted on putting on a brave front. How could the first round of the assessment be so easy?”

Hearing her analysis, both Lu Dali and Fan Li fell silent.

As a fake theorist, the two of them were actually lacking in actual combat training.

Even Lu Dali, who had experienced the most intense and exciting battles, had only fought with other challengers in the ring for a moment.

However, this was the first time that he had truly gambled his life on a battlefield like today.

Therefore, when they saw that Li Yueming had the upper hand, they thought that the situation had been reversed.

However, this was not the case. Before the assessment ended, danger would still exist at all times!

Beneath his feet, Li Yueming smashed a black beetle with his hammer. After smashing its juice, he had a rough idea of the defense and mobility of this group of beetles.

In a few flashes, he was pushed back dozens of meters.

After realizing that one of their comrades had been killed in the blink of an eye, the rest of the bugs that were attacked in front of them were all extremely angry. The elite black beetle with two special patterns on its shell let out a shrill screech.

The surrounding Zergs seemed to have received an order. They began to divide into three teams and surrounded Li Yueming Ming from three directions.

Over a hundred bugs were split into three teams.

Each team had over 30 Zergs.

Obviously, this elite black beetle didn’t realize how terrifying this human was.

Otherwise, it would be impossible for them to divide their forces and fight on the basis of insufficient strength.

After discovering that the Zergs had separated, Li Yueming’s eyes flashed.

If he was still somewhat apprehensive when more than a hundred Zergs gathered together, now that they were separated into three teams, they completely lost their threat and intimidation.

He looked around.

After making sure that there were no other threats to the battlefield, he charged straight towards the team led by the elite black beetle.

Obviously, he didn’t want to make a move.

If he wanted to make a move, he had to deal the most damage to these damn fellows.

As long as he could kill this Elite Black Beetle, the remaining dozens of black beetles would definitely panic for a short period of time.

At that time, it would be easier for Li Yueming to defeat them one by one.

The Elite Black Beetle didn't expect Li Yueming to retreat instead of advancing. He actually dared to charge at him. In the past, when the weak humans saw them organize an army, without exception, they would wish they had two more legs.

There was definitely no one like him who would rush into the encirclement when he clearly felt that he was about to be surrounded.

The distance of tens of meters was gone in the blink of an eye. Although Li Yueming was holding a hammerhead that was about the same weight as himself, his speed was not as slow as people thought.

He was only two to three meters away from the Elite Black Beetle.

Li Yueming smashed his hammer down heavily, just like how he smashed a black beetle.

The black beetle felt a certain threat. It opened its mouth, which was filled with dense teeth, and spat out a stinky and terrifying corrosive liquid.

Chapter 814: Shocked Everyone, Black Beetle Queen!_2

Obviously, it was not as easy to kill as the previous one.

However, what happened next made everyone think that they were hallucinating. They saw Li Yueming, who had already leaped into the air, suddenly disappear. Then, he appeared behind the Elite Black Beetle as if he had teleported. His huge hammer was like a falling mountain, smashing the Elite Black Beetle's shell!

“Boom!”

A sonic boom shook the entire examination hall.

Almost all the examinees who were in the middle of the assessment heard this strange sound. Even if they were facing the incomparably terrifying insect tide, they all looked towards the swamp area in shock and bewilderment.

Even they felt the tremors.

Not to mention the spectating students and teachers who had witnessed everything.

Looking at the smoke-filled battlefield below their feet, many people were so shocked that they sat up from their seats.

“F * ck, what's this? It went over with a 'swoosh' sound. Who can tell me what just happened?”

“I don't know...It was as if Li Yueming had suddenly teleported in mid-air and smashed into the Elite Black Beetle in an unimaginable way!”

“I didn't blink just now, but I still didn't see what happened clearly!”

“It’s f * cking ridiculous!”

“Although that guy’s speed is very fast, that last move of suddenly teleporting from the air is already not a martial arts technique that a low-level martial artist can master, right?”

“That’s right. Normal people can’t adjust their direction in mid-air. Although martial artists can do it, they definitely can’t do such an incredible operation. Therefore, there’s only one explanation, and that is that Li Yueming has comprehended one or more martial arts moves!”

“If I remember correctly, only Level Five martial artists are qualified to come into contact with martial arts techniques. Could it be that he has the strength of a Level Five martial artist?”

“Even if he’s a monster, it’s impossible for him to break through to Level Five before he’s twenty!”

Because the scene just now had happened too suddenly

Only some of the higher level teachers could see Li Yueming’s slow motion clearly.

“It’s fine if his speed is so ridiculous, but just how much physical strength did he unleash with that hammer just now? I was f * cking dumbfounded!”

“The terrain in the examination hall has been specially cultivated, right? An ordinary Level Two or Level Three martial artist wouldn’t even be able to create a crater, but Li Yueming had directly caused the effect of a Level Three earthquake?”

“This ridiculously strong physique, even the top geniuses of the Imperial Sun Star wouldn’t be this terrifying, right? Who told me that guy came from a small planet?”

“Oh my god, maybe there will be a huge upset in the Ultimate Martial Arts School Assessment this time!”

The crowd of examinees in the spectator stands were all shocked silly by the commotion just now. At this moment, many of them were cursing in their hearts.

When the smoke and dust dissipated, Li Yueming, who was still dealing with the Zergs, had long disappeared from the battlefield. When the group of people’s hearts suddenly thumped, someone exclaimed, “F * ck, that guy went to find trouble with another group of Zergs. Could it be that in just a short while, that elite black beetle and over 30 Zergs were wiped out by him?”

The isolation glass in the examination hall was protected.

The examinees and the spectators could only see the situation inside with their naked eyes, but they could not use other methods beyond the naked eye to observe.

After all, students who could participate in the martial arts academy assessment might be big shots in the future. Some of the things they had at the back of their minds must not be spread to the outside world.

That's why.

When Li Yueming's hammer smashed down, the mud on the periphery of the swamp was sent flying. When their line of sight was blocked, the teachers and students in the spectator stands could not see what was happening under the cover.

The only thing they could see was Li Yueming's figure quietly disappearing like a ghost. In a few ups and downs, he had already appeared in front of another of the three scattered groups of Zergs.

The sledgehammer continued to dance in the air like a mountain in the netherworld. When it smashed onto the ground, it caused the entire ground of the examination hall to tremble again.

“Bang!”

Hearing the sound, the surrounding examinees who were still playing hide-and-seek with the Zergs turned their gazes towards the swamp area.

Because of the obstruction of their vision, no one could see what was happening over there.

Therefore, they were all filled with doubts.

This thunderous sound had indeed stepped on their cognitive blind spots.

Did something happen in the swamp?

That didn't seem right either. If an accident had really happened, the surrounding group of Ultimate Martial Arts Academy teachers would have taken action long ago. How could there be no movement at all?

At this moment, the other examinees were all stunned.

If it weren't for the bugs surrounding them, they would definitely find a better spot to see what was going on.

At the edge of the swamp area, Li Yueming smashed the black beetle directly below into a ball of blurry meat paste with a hammer. Even the surrounding black beetles were sent flying into the air.

His hands didn't stop at all, and he continued to spin the sledgehammer.

As a result, the few Zergs that were sent flying in the air were hit by the watermelon-sized hammer heads. In an instant, they were like pimples that had been squeezed open, leaving only a puddle of stinky mucus and shattered pieces of meat flying in all directions.

After losing the command of the elite black beetles, the remaining two bug squads were clearly not as coordinated.

This made Li Yueming's one-sided massacre even more convenient.

At this moment, he seemed to have transformed into a walking tornado that swept through everything.

In less than ten minutes, more than a hundred Zergs who were sent to surround Li Yueming were smashed into a pile of meat paste by Li Yueming's hammer. Because of the shocking destructive

power, even the entire swamp area was like it had been plowed by a cannon, covered in muddy and turbid water stains.

Li Yueming had already broken through to Level Two Martial Artist.

Although he had yet to break through to Level Three Martial Artist, it was only because he was unwilling to soar on a rocket.

Therefore, the strength he could unleash now was definitely far beyond the limits of an ordinary Level Three martial artist. Even an ordinary Level Four martial artist would not be able to fight him head-on.

If he added in all kinds of random enhancements and a deep foundation in various martial arts moves.

Li Yueming's current combat strength should be infinitely close to a Level Five martial artist.

Of course, this wasn't something worth showing off in Li Yueming's opinion. After all, he was a reincarnator of the personal power side. Before coming to this main plane, he had also trained in many personal power worlds.

Whether it was experience or skill, they were far from what ordinary young people could compare to.

If this was still not enough to surpass his peers, then he could only say that he had lived for so many years.

Moreover, before a martial artist reached the threshold of level six, the difference in strength was actually not that ridiculous. The difference between a level one martial artist and a level four martial artist was only the understanding of martial arts and the tempering of the body.

Other than that, it could not even completely represent their combat strength.

Only Level Five martial artists would start to try to learn the various martial arts moves developed by the martial arts academy. Only Level Six martial artists above that could barely be considered as Planet-Level martial artists who could dominate a small planet.

In other words, level six was the starting point for a true martial artist.

Level One to Level Five were actually just novices, which was why Li Yueming was able to kill so many martial arts levels.

He had just finished off more than a hundred black beetles that had surrounded him.

The Black Beetle Queen had already noticed the abnormality near the hibernation pod.

Its scarlet eyes revealed a rare trace of fear. The Black Beetle Queen Zhang Ka let out a sharp roar. After a few breaths, thousands of black beetles quickly crawled out of the hibernation chambers behind it!

A mighty torrent of steel rushed towards Li Yueming's direction under the Black Beetle Queen's signal!

Obviously, compared to playing those boring games with those weak humans, the Black Beetle Queen wanted to kill a few more humans with potential in the assessment.

This was the only way to relieve the pain of being imprisoned as a breeding machine.

Thinking of this, the blood-red compound eyes of the Black Beetle Queen were filled with ruthlessness. She roared a few more times and mobilized more than 1,000 subordinates to surround them in another direction.

It wanted to make these damned humans feel pain that was engraved in their bones. The Zergs would devour everything!

Chapter 815: 323, Killing for half an hour?_1

Obviously, Li Yueming's sudden killing of more than a hundred black beetles not only attracted the attention of the surrounding examinees, but at the same time, it also attracted the attention of the Black Beetle Queen who was filled with hatred not far away.

After all, so many of his disciples had been killed by the same person in a very short period of time. It was difficult not to attract attention.

After discovering that Li Yueming was very likely to be the most powerful human genius in this assessment, he was shocked.

The Black Beetle Queen, who was eager for revenge, sent out almost all of the Black Mealeaf Beetles that could be mobilized under her command to attack Li Yueming. In order to not leave Li Yueming with any retreat, she even personally gave the order to mobilize an elite Zerg team to detour from the side, preparing for a surprise attack.

There was a black mass of Zergs under his feet. There were probably more than a thousand of them.

Almost all the examinees watching the battle held their breaths at the same time.

Some young people who had not seen much of the world could not help but exclaim, "With so many Zergs pouncing at Li Yueming alone, won't the examiners of the Ultimate Martial Arts Academy come forward to stop them?"

Hearing their words, someone in the surroundings asked in puzzlement, "Stop? If Li Yueming had no indication to give up the assessment, why did the examiner stop him?"

This answer obviously stunned those young people.

After thinking for a moment, he said in astonishment, "The other students in the examination hall are only facing hundreds of Zergs now, but the Zerg Queen has sent thousands of black beetles to kill Li Yueming. Isn't this targeting the outstanding candidates? It's not fair at all!"

The other examinees, who had been following the rules, were currently facing less than a hundred Zergs. In the end, Li Yueming, who had the highest score, was about to face such a large number of Zergs...

In their eyes, this scene was ridiculous.

However, their opinion caused many people to laugh. "Do you still not understand? Although this was an examination hall, it was also a battlefield. Li Yueming had just completed a beautiful ambush, so he naturally had to bear the risk of being chased by the Zergs who had suffered heavy losses. Do you still want to talk about fairness with the enemy on the battlefield?"

Hearing this answer, the group of young people who raised the question were obviously shocked.

He finally came back to his senses, and his voice was much softer, but he was still a little surprised and uncertain.”But we shouldn’t just watch him get killed by the Zergs, right?”

Some people shook their heads.” The world has never lacked geniuses. What is truly lacking is a genius who is confident in his life and the battlefield!””

“Li Yueming should have known the consequences of doing so when he attacked the Zerg team and made sufficient preparations for it, right? Taking a step back, if we were to launch an attack without making preparations, then it would be very fair for us to take the risk. There shouldn’t be any problem with me saying this, right?”

The Ultimate Martial Arts Academy was really too famous. The students who came here to take part in the assessment every year were simply like carps crossing the river.

They were all geniuses in their respective territories.

However, the vast majority of the geniuses among them began to become ordinary and mediocre after coming to the stage of the Ultimate Martial Arts Academy and standing with thousands of geniuses with similar talent.

However, the radiance of those truly insufferably arrogant geniuses would not be concealed. Instead, they would appear even more dazzling because of the contrast of other geniuses.

Therefore, during the Ultimate Martial Arts Academy’s annual assessment process, sudden unexpected situations like Li Yueming’s did happen from time to time.

However, Li Yueming’s birth was too ordinary.

It was just that no one had thought of it in the beginning.

However, just now, Li Yueming had taken care of a small team of hundreds of Zergs in a few minutes with a hammer. He had already attracted the attention of almost all the examinees and teachers around him.

Now that everyone knew that Li Yueming was a dark horse who suddenly appeared in the assessment, they were all very curious about whether he could continue to turn the tables and kill a bloody path out of the impossible.

In a special invigilator’s seat far away from the spectator seats, the examiner of the Ultimate Martial Arts Academy was staring at Li Yueming’s every move. After a long time, he nodded and said,”Not bad, a good seedling!”

Behind him, the other invigilators also nodded and said,”It’s been a long time since I’ve seen a student with such a solid foundation in martial arts skills. I wonder how long he can last after attracting attention!”

A teacher couldn’t help but laugh and teased,””Maybe we can last until the end!”

The other teachers were also interested. They stared at Li Yueming for a long time before saying,””We’ve seen this kid’s information, he probably won’t be able to last until the end. However, for a young man from a remote area like 7-20003 to be able to train up such solid abilities, this kid’s talent and perseverance aren’t inferior to the top geniuses of the universe, his future is promising, his future is promising!”

Obviously, the teachers were very optimistic about Li Yueming's performance.

However, most of them thought that Li Yueming would not be able to complete all the assessments.

This wasn't embarrassing. After all, Li Yueming was born on a small planet and was naturally lacking. To be able to reach this point with his hard work, he was definitely considered a top figure.

Chapter 816: 323, Killing for half an hour?_2

As long as he entered the Ultimate Martial Arts Academy and made up for some of his shortcomings, he believed that he would be able to shine in a few years.

A teacher looked at the head examiner and asked, "Teacher Liang, if this student can't hold on later, can we use the emergency rescue authority?"

The head examiner looked at Li Yueming and was silent for a moment before saying, "Wait a minute, I want to see how far this guy can go. It's better not to use the emergency rescue authority. I'll allow you to warn that damn bug to take it easy. If it really goes too far, we have ten thousand ways to make it wish it was dead!"

The teachers nodded.

In principle, they would not interfere with the assessment, but principles existed to be broken.

If the examinee could amaze everyone with a single brilliant feat, even if they were in danger due to exhaustion or other reasons, the main examiner had a certain probability of launching an emergency rescue.

Of course, this authority had not been used much since the start of the assessment.

It would only be used in rare situations.

Because this kind of preferential treatment would undoubtedly make others feel that it was unfair. A long time ago, it even caused a large-scale discussion.

The Ultimate Martial Arts Academy's response to this was very simple. It was to remain silent and not reply.

The fact that geniuses received preferential treatment was actually an unfair thing in itself. The current structure of society actually made this matter less unfair.

After all, the Alliance of Law did everything they could to save and nurture geniuses, not to nurture a class of rent-avers, but to nurture soldiers who would go to the battlefield to protect their country.

In the examination hall under his feet, Li Yueming had already moved from the swamp area to the junction of the jungle area and the swamp area.

Although his vision had not seen everything, his intuition had already told him the enemy's location and direction.

At this moment, he was standing on a big tree, looking at the surrounding area from afar, observing the movements of the Bug Tribe reinforcements.

About ten breaths later, Li Yueming keenly sensed the flood of insects in the distance. He looked over and saw thousands of insects crawling towards him at an extremely fast speed.

Li Yueming narrowed his eyes.

He held the war hammer and hid on the treetops silently. At this moment, his breathing became so faint that it could not be smelled. All the pores on his body were closed.

This was a kind of extreme control over the body.

Under normal circumstances, it was definitely not something that a martial artist of his realm could comprehend.

However, Li Yueming was obviously not a normal person. As early as in the previous world, he had already grasped a considerable part of the secrets of the body.

Otherwise, he wouldn't have the ability to open up the treasures and acupoints in his body.

After merging his entire body with the tree, Li Yueming's figure silently appeared on another big tree like a withered leaf.

The Zergs that were charging at Li Yueming with an aggressive aura could not help but freeze at this moment. They looked around in confusion.

The examinees on the surrounding viewing platforms could not understand why the originally aggressive Zergs had suddenly become so cautious. Someone who knew the truth answered with a solemn expression, "Li Yueming must have used a special method to seal off his opportunity. The low-level Zergs like the black beetles are very backward in locking down their enemies."

The black-shelled mealworms were the name that the Alliance of Order had given them.

In fact, they were just a nameless low-level transport bug among the Zergs.

Therefore, many parts of their bodies were not actually evolved for combat. For example, the biggest function of their wide and huge back armor was not defense, but to carry weight.

Its thick legs were not good at moving or running quickly. It was better at carrying weight and moving forward steadily.

In addition to these two obvious characteristics, the other parts of the black beetle's body were the same.

Therefore, their way of observing life forms in the outside world was very primitive and backward compared to other combat units. Other than their normal 'visual', they could only react to the aura and infrared temperature of the outside world.

Now, not only had Li Yueming concealed his aura, but his body temperature had also fused with the surrounding environment.

This made the black-beetle bugs a little confused.

They could clearly sense that the damned human was standing on a tree crown, but now, it was as if he had never existed.

Sensing that the target had disappeared, the black-scaled mealworm immediately reported this information to the queen of its race.

The Queen's order was soon given-seal off the surrounding area, destroy all the trees, and find Li Yueming at all costs!

After receiving the order.

The black beetle quickly began to execute the plan.

The two teams of black beetles added up to about 1,500. At this moment, they formed an oval formation and blocked Li Yueming's front and back respectively. They began to shrink their formation, trying to force Li Yueming out from hiding in the dark.

However, they had clearly underestimated Li Yueming's courage.

Just as they were still exchanging commands and preparing to gather together, Li Yueming had already made his move. He gently jumped down from a big tree and quietly appeared in the middle of hundreds of black beetles. His hammer swept through everything like a whirlwind.

“Pa ji!”

Before the dozen or so unprepared black mealworms could even react, they were sent flying by the oncoming giant hammer.

For a moment, the forest was filled with a disgusting dark green liquid.

The group of students in the spectating area above them were all stunned at this moment. Some of them even couldn't help but widen their eyes and exclaim, “D * mn, I actually landed directly in the middle of the Zergs? Has he always been this brave?!”

“The hammer can provide a very powerful attack power, but the weakness of this thing is also very obvious. It is too heavy and requires a lot of physical strength to use. Li Yueming doesn't care about the physical consumption at all. Can he really last until the end of the assessment?”

” This ambush was really satisfying. As long as he doesn't get killed by the crazy Zergs, he should be able to pass the assessment. The only unknown now is how many points he can get, and whether he can surpass Li Shengao, the first place in the assessment!”

” Li Sheng 'ao is a super genius that only appears once in a hundred years on the first planet of G5. His assessment score is close to 4,000. Li Yueming, a genius from a small planet, shouldn't be so ridiculous...”

“Who knows? If he were to continue killing like this, everything would be unknown!”

It could be said that Li Yueming's sneak attack this time made many people's hearts skip a beat.

However, it brought a strong sense of shock to the hearts of all the examinees in the examination hall.

So the Ultimate Martial Academy's assessment could be passed like this?

They didn't play any extra twists and turns at all and directly took the initiative to attack. In less than half an hour, they had already completed the score index of the other people's entire assessment. They didn't even need to obtain any more points to pass the assessment safely.

At this moment.

However, they were not the ones who were even more shocked.

It was An Linna, Lu Dali, and the others who came from the same planet as Li Yueming.

Fan Li's eyes were already as wide as his mouth. After a long while, he stuttered, "Ann... Miss An Linna, Li... Li Yueming had already passed the assessment with his current points?"

At this moment, An Linna was ten times more shocked than him.

After all, although Fan Li and Lu Dali had heard that the Ultimate Martial Arts Academy assessment was very difficult, they had never seen it with their own eyes.

However, she often came here to watch.

She had even seen countless famous geniuses fall here. Therefore, she knew better than Lu Dali and Fan Li how ridiculous Li Yueming's current operation was.

On the surface, Li Yueming's every choice and operation after the assessment began seemed very simple.

However, what was revealed was Li Yueming's unparalleled judgment of timing.

Hearing Fan Li's question, An Linna replied in a daze, "Yes, even if Li Yueming doesn't want a single point, as long as he can persist until the end of the assessment, he can enter the Ultimate Martial Arts Academy..."

Chapter 817: An Unrivaled Stance!_1

It had only been half an hour since the exam started...

Li Yueming had actually completed a kill that the other examinees might not have been able to complete.

And in such an unscrupulous manner.

Even An Linna, Lu Dali, and the other two were shocked, let alone the spectators.

They came from planet 7-20003 together with Li Yueming, so they knew Li Yueming better than others. However, it was precisely because of this that they found it even more difficult to understand.

They were clearly from the same planet as Li Yueming, and the education and resources on planet 7-20003 were not much different. How could they be able to suppress the geniuses of other big planets in the examination hall of the Ultimate Martial Arts Academy? In less than half an hour, they obtained results that many examinees could not even hope to achieve in their lifetime, but they did not even have the qualifications to stand on this stage?

As expected, there were times when geniuses were really unreasonable.

If they hadn't witnessed all of this with their own eyes, Lu Dali, Fan Li, and An Linna probably wouldn't have believed that there was such a despairing gap in the world.

It had nothing to do with the individual or the hard work.

They were born at the same starting line, but their talent and aptitude lagged behind others from the beginning.

The three of them were stunned for a moment.

In the examiner's special spectator area.

The head examiner Liang Run's eyes were glowing as he said ecstatically, "Without a doubt, this is a person born for martial arts. This is what our Ultimate Martial Arts Academy is tirelessly pursuing... The final genius!"

The few accompanying teachers around him wanted to find a reason to refute.

However, looking at Li Yueming, who was still moving around the examination hall like a god of death, he did not know how to speak.

It was too beautiful.

It was simply too beautiful!

Every turn, every rise and fall, every smooth body movement when exerting force, all the details were like art, filled with solid basic skills that had been tempered thousands of times.

There was no doubt that the student under his feet had an extremely deep understanding of martial arts.

As the saying went, outsiders looked at the door, while professionals looked at the technique.

Most of the people could only see Li Yueming killing people.

However, there were very few people who could understand how Li Yueming exerted his strength and control his muscles when he moved.

And this group of spectating teachers could understand it without a doubt. It was precisely because of this that they could not say a word for a long time.

After all, no matter how picky they were, it was difficult to find any flaws in Li Yueming's artistic performance.

In the examination hall, Li Yueming's battle continued.

However, because the enemy was in the open and he was in the dark, this so-called battle was actually a one-sided massacre.

He hid in the forest like a ghost, frantically appearing from every corner, hitting the target with one strike and then immediately pushing away.

In the past, the black beetles that were called walking catastrophes by countless examinees in the examination hall did not have any strength to retaliate in front of him. They were really like bugs that could be easily trampled to death.

In the beginning, the Black Beetle Queen did not take it to heart.

After all, it was normal for humans to be lighter than heavy-duty beetles when they were at full speed. However, running at full speed and suddenly attacking required physical support. The two black beetle teams that she sent out had more than 1,500. Even if they lined up for Li Yueming to kill, Li Yueming would not have that much strength to kill them all.

However, the Black Beetle Queen soon realized that she had underestimated that damn cunning human.

Half an hour had passed. Under normal circumstances, even a Level Four martial artist should not be able to maintain their peak condition in such a high-intensity battle.

However, Li Yueming was like a killing machine that did not know fatigue. He was still waving his sledgehammer in the forest and attacking crazily.

Moreover, according to the information reported by the Black Beetle Team, Li Yueming's physical fitness and killing efficiency did not decrease. Instead, because of practice, he became more efficient.

They would usually appear silently on top of a big tree and jump down when a black beetle approached. The sledgehammer in their hands was like a precise guided bomb. Every hammer could hit the more fragile head of the black beetle, causing shocking damage to the surrounding black beetles.

In order to prevent Li Yueming from launching a sudden attack at any time.

The Black Beetle Queen ordered the two teams to tirelessly push down all the trees in the forest that could hide creatures.

At this moment, the tall trees and shrubs at the edge of the forest had been completely toppled by them. Only by doing so could they stop the death god that could come at any time.

The insect swarm was in a sorry state.

The original 1,500-strong army was now reduced to 1,200-strong.

Even now, they were still taking turns to push down the trees in the forest.

In the examination hall, the examinees who were originally fighting with the Zergs were already in a mess. Even though they were still fighting, their attention was constantly looking at the edge of the forest not far away.

Hundreds of trees had fallen.

Not only did this speed not slow down, but it also continued to accumulate and increase.

The group of examinees 'minds were filled with vigilance and doubt.

What were these Zergs doing?

Chapter 818: An Unrivaled Stance!_2

Was he trying to expel all the examinees from the forest by crazily pushing down the trees?

However, the problem was that even if the examinees were driven out of the forest, the examinees still had other areas to hide in. At most, it would be more cramped.

What was the point of spending so much effort on such a thing?

The examinees were all a little confused.

However, it did not stop them from keeping an eye on the situation over there.

After all, the Zergs were famous for being sinister and cunning. They didn't seem like a group that would do useless things.

He directly told them that there must be some conspiracy hidden in this.

However, as time passed, they finally felt that something was wrong.

After the assessment began, shouldn't the Zergs send wave after wave of reinforcements to surround them and give them even more pressure?

But now, almost an hour had passed.

The Bug Tribe reinforcements that surrounded them did not show any signs of stopping.

Could it be that something unexpected had really happened in the examination hall?

Many of the examinees were itching for it.

The curiosity hidden in their genes told them that they could go over and take a look. However, the remaining rationality in their minds constantly reminded them that it was fine as long as they could survive this situation. If he was not careful, he might get into trouble.

However, the next scene that they witnessed made all the examinees who were paying attention to the abnormality at the edge of the forest involuntarily widen their eyes!

At the edge of the dark swarm of beetles in front of the forest, there was a human figure shuttling through. Wherever he passed, it was as if a death whirlwind had been set off. Countless black beetles were sent flying, and dark green stinky mucus splashed everywhere.

Sensing his appearance, the surrounding insectoids seemed to have become angry in an instant.

Black beetles rushed towards him from all directions, as if they wanted to trap the figure in the fallen forest, unwilling to let him return to the treetops.

However, their efforts were clearly in vain.

That was because after the figure landed on the ground and killed more than a dozen black beetles, he easily broke free from their encirclement.

Many examinees 'minds went blank when they saw this scene. When they finally came back to their senses, they all sucked in a breath of cold air in unison."F * ck...Don't tell me that so many of them are gathered together just to encircle a single candidate!"

"Who exactly is that guy? He actually dared to engage in a head-on confrontation with so many Zergs?!"

"No wonder we haven't seen any Zerg reinforcements. In the end, it's because those Zergs that should have come to support were all attracted by that guy?!"

"Crazy, this is crazy. Am I crazy or is this world crazy?"

When they realized that the strange situation at the edge of the forest seemed to be caused by an examinee, the other examinees could not believe their eyes at first. However, considering the current situation, they had no choice but to believe that what they saw was not an illusion. There was really an examinee fighting with the black beetle tribe.

Then, the problem came.

They still needed to concentrate to deal with the pursuit of hundreds of Zergs.

How did that mysterious examinee manage to withstand the attacks of thousands of black beetles so easily?

The other examinees were all dumbfounded. For a moment, they could not help but doubt their lives.

After killing more than 300 Black Beetle Tribe members.

The swarm of insects in the forest that tried to find Li Yueming and tear him into pieces finally wavered.

They weren't combat troops, and their combat power was actually only enough to bully this group of students who hadn't really become martial artists.

However, the strength of this young man in front of him was really a little too strong.

It was not something that their race could compete with at all.

Therefore, after a few struggles, the Zerg army that had surrounded Li Yueming began to slowly retreat.

Seeing this, Li Yueming could not help but sneer.

This group of people was quite smart. They knew that they had to maintain their strength when they saw that things were going to be hopeless. Moreover, although they retreated in a mess, they could still see some order.

In this day and age, even such a low-level Zerg had such high intelligence?

Li Yueming exclaimed.

It was no wonder the Zergs could pose such a strong threat to the universe of order.

The production efficiency and evolution speed of this thing were both insane. It was indeed not something that a single civilization could resist.

Seeing that the group of bugs wanted to retreat.

Would Li Yueming agree?

Naturally not.

He could come and go as he pleased. How could there be such a good thing!

However, Li Yueming did not leave the jungle area, nor did he come down from the treetop to chase after him. Instead, he grinned and disappeared at the edge of the jungle area in a few leaps. He rushed deeper into the hibernation chamber area that he had seen earlier.

With his concealment techniques, even the black beetles would not be able to sense him after he hid in the forest, let alone the other examinees and the spectators who were hundreds of meters away.

Therefore, in the eyes of the others, Li Yueming seemed to have suddenly disappeared, directly vanishing from the face of the earth.

Only the examiners and accompanying examiners in the special spectator stands could observe the entire trajectory.

At this moment, Liang Run, who was the head examiner, had calmed down. However, his eyes were still filled with eagerness when he looked at Li Yueming. It couldn't be helped. Li Yueming's performance just now was too amazing.

Not only did it exceed the expectations of the other exam partners, but it also far exceeded his expectations.

Whether it was for the Ultimate Martial Arts Academy or for himself, the appearance of such a super genius was a great blessing.

No wonder he was so excited.

Seeing Li Yueming suddenly abandon the Zergs who were preparing to retreat and rush deeper into the forest, Liang Run rubbed his eyes and thought for a moment. He couldn't help but laugh, "How dare you! You're preparing to wipe out this group of damn bugs!"

The other examiners had not reacted at first, but now that they heard Liang Run's words, they roughly understood Li Yueming's intentions.

The Zerg army at the edge of the forest was still in formation and ready to retreat. The Zerg base camp at the hatching chamber was at its emptiest. Li Yueming suddenly disappeared from the forest at this critical moment and rushed in the direction of the hatching chamber.

Without a doubt, he was going for the Black Beetle Queen that had harmed many geniuses!

Such a decisive judgment and such decisive execution, even they could only give him a thumbs up.

This young man was simply too perfect. He was like a flawless hexagonal warrior, outstanding in all aspects.

Who knew how far he could go in the future?

Would he be able to become one of the pillars of the entire Alliance of Law?

Of course, it was still too early to see all of this, but it did not stop them from speculating and fantasizing.

If nothing unexpected happened, this young man should be the strongest dark horse in this year's Ultimate Martial Arts Academy assessment.

Li Yueming's speed was extremely fast.

As an experienced warrior, he was very sensitive to the enemy's movements.

If it was before and he suddenly went to kill the Black Beetle Queen, the 1,000 black beetles at the edge of the forest would undoubtedly come to support him at an extremely fast speed.

At that time, even if he was lucky enough to succeed, it was very likely that he would fall into an awkward situation of being attacked from both sides.

However, it was different now.

Due to Li Yueming's continuous attacks, the black beetles withdrew their formation and wanted to retreat.

This created a very good gap for Li Yueming.

After all, the gathered Zergs were completely different when they were separated.

After the formation was closed, the black bugs had to disperse again to move quickly.

However, it would obviously take time for them to split up again.

According to Li Yueming's estimation, he would be given at least three minutes of free time.

Don't underestimate these three minutes.

In a life-and-death battle, three minutes was enough to change everything.

The opportunity was fleeting.

Li Yueming had basically revealed all his trump cards to the public. What he needed to do was to show his most invincible posture here!

Chapter 819: Could This Be Cultivated on a Small Planet?_1

In the examination hall, Li Yueming quickly crossed the forest. His speed was as fast as the wind.

The other examinees in the surroundings also noticed his appearance and disappearance. All of them seemed to have seen a ghost. They even repeatedly wiped their eyes to make sure that what they saw was not an illusion!

"F * ck...What had swooshed past just now?"

"It looks like a person? Wang Defa, are you serious?"

"The previous few assessments were clearly very normal. Why are there so many accidents when it's our turn?"

"How ridiculous. This world is simply crazy..."

At this moment, Li Yueming felt that his body and bones were heating up. His entire body was like a high-speed machine that carried unparalleled energy and rushed towards the direction of the incubation chamber.

In the distance, the hatchery area that was specially used to awaken and restrict the Zergs appeared in front of Li Yueming.

This was usually the area that examinees avoided the most because it was the closest to the Black Beetle Queen. It was very easy for more Zergs to block the assessment path.

But now, Li Yueming had taken the initiative to come here.

Such an arrogant attitude.

However, not a single examinee or teacher in the entire examination hall could complain!!!

It couldn't be helped. The strength that Li Yueming had just shown was too strong, far exceeding the limits of what ordinary geniuses could do.

If it were any other examinee, they would be courting death by launching a sneak attack on the Zerg nest.

But if it was Li Yue Ming, he could only make a group of people sweat for him!

“Do you think he can kill the Black Beetle Queen?”

“How the f * ck do we know about this? However, since he dared to take such a big risk to come to the incubation area, it at least meant that he had a certain degree of confidence!”

“This Black Beetle Queen has been in the examination hall for many years. I don't know how many geniuses have attacked her. I hope Li Yueming doesn't fail miserably!”

“To think that a small planet's genius could do such a thing. It's simply making us, trash from a big planet, feel ashamed!”

Many examinees sighed.

Obviously, he was quite amazed by Li Yueming's performance.

Under their gazes.

Li Yueming finally stopped moving.

Now that he had reached the edge of the jungle, he would step into the incubation area if he walked any further. The only place in the incubation area that could be hidden was the ruins of a collapsed building.

If nothing went wrong, the Black Beetle Queen should be hiding in one of the buildings.

Li Yueming was not in a hurry to get close.

After all, it was easy to alert the Black Beetle Queen if they approached the nest without full confidence. In the end, it might cause the Black Beetle Queen to escape when she saw that the situation was not good.

Therefore, he hid in the bushes and carefully observed the position of the Zerg patrol soldiers in the ruins. He tried to determine the exact location of the Black Beetle Queen from the location of their branches and other clues.

After spending a minute or two, Li Yueming roughly confirmed that the Black Beetle Queen should be in the abandoned container in the ruins.

That was because the black beetles were the most concentrated there. Not only that, but there were also many patrolling sentries in the corners of the surrounding ruins. All kinds of signs indicated that they were protecting their queen.

Seeing these details, Li Yueming couldn't help but sigh at the intelligence level of the Zerg.

From various perspectives, this group of black beetles should be one of the lowest races among the Insect race, but even so, they still possessed intelligence that was not inferior to humans.

Not only did he know how to set up formations, but he also knew how to set up patrols in the open and in the dark.

One in the light and the other in the dark, guarding the entire nest.

If it was someone else who didn't understand the situation, they might really be fooled.

However, with Li Yueming's experience, he obviously wouldn't step into such a trap.

After carefully observing for a moment to make sure that there was no problem with his judgment, he was shocked.

Li Yueming finally moved. He quietly descended from the treetops to the ground. With only a few bushes and some inconspicuous stones, he successfully lurked near the incubation area.

The previous operations were not difficult.

After all, most of the Zerg soldiers were focused on the ruins and not in the forest. The next step was to test Li Yueming's proficiency in Stealth.

On the viewing platform, the group of examinees couldn't help but break out in a cold sweat for him.

Because they had God's Perspective, they could now clearly see that the two Zerg armies behind Li Yueming were already on their way back to the nest.

At this moment, Li Yue Ming was still trapped in the ruins.

The guards patrolling outside the Black Beetle Queen's nest were much larger than ordinary black beetles. Be it in terms of strength, speed, or combat experience, they were much stronger than ordinary black beetles.

Judging from the combat power that Li Yueming had displayed previously, he estimated that he would only be able to succeed if he got close to the Black Beetle Queen by about 50 to 100 meters.

Beyond this extreme distance, every bit of distance was a bit of hope.

If he was not careful, he might even be surrounded by the surrounding Bug Tribe guards and end up dying of exhaustion from being attacked from both sides.

Li Yueming avoided the outermost patrol line of the Black Beetle Guards with extreme movement. He was about to face the more heavily guarded inner line.

Chapter 820: Could This Be Cultivated on a Small Planet?_2

The surrounding audience could not help but twitch their eyelids.

"This second line of defense is basically guarded by black beetles from every angle. There are also hidden sentries behind the open sentries."

"Could it be that we can only try to kill our way out?"

"Upstairs, we're still more than 150 meters away from the container where the Black Beetle Queen is. I'm afraid we'll be surrounded by the surrounding Black Beetle Guards halfway!"

"This is too difficult. Li Yueming shouldn't be in such a hurry. If we wait a little longer, the Black Beetle Queen will send more Zergs. That should be the best time!"

“Previous poster, your thoughts and actions are only suitable for the normal assessment process. The assessment is about to be stirred up by Li Yueming.”

“Sigh... It would be too difficult to barge in like this. The Black Beetle Queen did not leave any chance at all!”

In the spectator stands, the group of examinees were nervous but also disappointed.

After all, if Li Yueming could really kill the Black Beetle Queen, it would be a rare scene that could not be seen for decades.

They might even witness a new history and a new legend.

However, the defense of the Black Beetle Queen’s Guards was too tight. There was no chance for Li Yueming to sneak in.

This was too unfair.

Beneath his feet, Li Yueming had also noticed this.

The Black Beetle Queen’s defense mechanism was arranged perfectly. Even Li Yueming would not be able to sneak in without using some ‘extra’ methods.

However, just as the other examinees thought that he would retreat, Li Yueming suddenly moved towards the location of a black beetle. He was soon exposed to the sight of the black beetle.

This scene stunned all the spectators present. Someone could not help but exclaim, “What are you trying to do by revealing your location?”

“Is Li Yueming really crazy? This is the Black Beetle nest. Once it is attacked, the Zergs in other areas will quickly come over.”

“I thought that he would use all sorts of methods to deal with it, but I never thought that he would actually rush up directly. Let’s not talk about anything else, I’ll give this courage a thumbs up first!”

“I wonder if the examiners will initiate an emergency rescue? It would be a pity if such a rare genius died in the assessment!”

The spectator stand was in a short clamor.

The only ones who remained silent were An Linna and the other two.

At this moment, when they saw Li Yueming rushing forward without dodging, the three of them felt as if their hearts were being gripped by an invisible hand. They could not even breathe.

There was nothing he could do. He was really worried.

If Li Yueming could enter the Ultimate Martial Arts Academy with perfect results, then not only himself, but also his fellow countrymen and his mother planet 7-20003 would usher in an unprecedented big turning point.

An expert who could roam freely in the universe meant that he had a thigh that could not be any thicker.

Even if he could only gain a little bit of light, it was enough to change too many things.

However, if Li Yueming failed, it might be fine if it was just a simple failure. After all, with his current points, even if he did not do anything, it was enough to enter the Ultimate Martial Arts Academy.

There might be a difference, but it would definitely not be too big. Li Yueming could still receive additional training from the Ultimate Martial Arts Academy.

The only thing that made them nervous was whether Li Yueming could survive the next crisis. After all, this was the nest of the Zergs. It might not take five minutes after the location was exposed, and all the surrounding Zergs would realize that they had been stolen and rush back.

At that time, it wouldn't be a matter of how many points he scored.

It was whether Li Yueming could survive this assessment.

Under the gazes of a group of people with different thoughts.

Li Yueming, who was in the examination hall, was already moving quickly like a coiled spring.

After he was discovered by the patrolling black beetle, he arrived in front of it in just a breath's time. He swung his sledgehammer like a cannonball and smashed the black beetle's head into pieces.

After doing all this, Li Yueming did not stop at all.

With a turn of his body, he appeared at the hidden sentry behind the Zerg. He raised his hammer and ended its life with a swing.

The Black Beetle Queen's sentry post was almost flawless. The only flaw was that the positions between the open and hidden sentries were too close. If the enemy was fast enough, it was entirely possible to launch an attack before the two black beetles sent out a message.

In other words, the ultimate secret of Stealth was to kill all creatures that saw you.

This way, no one would ever see it again.

After killing the two Black Beetle Guards at an extremely fast speed, Li Yueming's figure did not stop at all. He headed towards the next target position that he had already decided on beforehand.

Although he had not been discovered by the patrolling Zergs, he estimated that in less than 30 seconds, the sudden disappearance of the sentry post would be discovered by the other black beetles.

Thus, this infiltration was undoubtedly an act of survival.
