Chapter 821: Could This Be Cultivated on a Small Planet?_3

It was no exaggeration to say that it was a race against time on the edge of the blade.

If there was a slight mistake, all his efforts might go to waste.

Li Yueming's speed was extremely fast and his attacks were extremely accurate. Unfortunately, the sledgehammer he had chosen back then had affected his performance.

When he was less than 120 meters away from the Bug Tribe Queen's container.

His invasion was finally discovered.

However, this distance was enough for Li Yueming. He no longer tiptoed, but rushed straight towards the container like a whirlwind.

The Black Beetle Guards who were responsible for guarding the surroundings were all the most elite Black Beetles.

There were two or even three patterns on the shell.

At this moment, seeing how daring Li Yueming was to attack their nest, they all spat out mouthfuls of venom without mercy. As long as they could hit Li Yueming, the strong corrosive properties would melt Li Yueming into a pool of liquid.

However, Li Yueming's speed was too fast.

Even if he encountered an attack that he could not dodge, he would only gently swing the hammer in his hand. It was as if he had eyes and accurately slapped away the poison that was about to hit him.

He did not even frown the entire time.

This emotionless machine-like operation stunned the audience.

Previously, when they saw Li Yueming killing the Zergs in the forest area, because every attack was repeated, the group of examinees did not feel Li Yueming's exquisite martial arts skills that were like art.

Then, at this moment, they had finally witnessed it.

Was that the same person?

It was clearly a precision machine that had been adjusted to the extreme.

As if he had practiced it in advance, every rise and fall, every swing, every turn, and every pause were appropriate. He moved through the poison attacks of the Black Beetle Guards with extreme agility.

After discovering that long-range attacks were ineffective, the two of them were stunned.

A few black beetles with three stripes on their bodies actually flew up.

This scene not only exceeded the expectations of the other audience members.

Even many examiners in the examination hall were shocked and exclaimed, "These are Level 3 black beetles, right? They even have the ability to fly. Why didn't you guys clear them out?"

The few people who were reprimanded were the staff in charge of the examination hall management.

At this moment, when they heard this, their faces looked like they wanted to say something but hesitated. Their gazes turned to the head examiner standing at the front.

The main examiner did not make things difficult for them. Instead, he said with a serious expression, "As you all know, the recent battles on the frontlines have become more and more difficult, and the requirements for the younger generation have also become higher and higher. Out of responsibility for the frontlines in the third universe, and also out of responsibility for the safety of the examinees, it is necessary to increase the difficulty of the assessment!"

Hearing this, the faces of the few accompanying teachers relaxed a little, but someone still said, "Shouldn't they send a notice? If they adjust the difficulty without saying anything, it will cause complaints!"

The head examiner smiled and comforted his colleagues, "Don't worry, as long as there are examinees who can overcome all difficulties to reach this stage, it will be difficult for them to die in the examination hall!"

Upon hearing this, the tense nerves of the few accompanying teachers were completely relieved. Looking at Li Yueming who was still struggling in the field, some teachers could not help but whisper, "Is this really a young man that a small planet can nurture? What a pervert..."

Chapter 822: Assessment Ended, Highest Score in History!_1

In the examination hall, Li Yueming was still trying his best to dash left and right.

However, outside the examination hall, the group of students preparing for the exam and the teachers of the Ultimate Martial Arts Academy were all sweating for him.

Especially after the appearance of the Level Three Black Beetle, the entire examination hall was in an uproar. Some students exclaimed, "What the hell? In the past assessments, there were only Level 2 black beetles, right? Where did this Level Three black beetle that could fly come from?"

"Level 1 Normal Black Beetle, Level 2 Elite Black Beetle...Level 3 was already the strongest form that a normal black beetle could grow to without any mutation. The appearance of this thing could already be considered an unexpected disaster, right?"

"Where are the teachers of the Ultimate Martial Academy? Why didn't he go and save that young man?"

"I don't know...Was the Ultimate Martial Arts Academy playing with the lives of the examinees?"

"Although the Ultimate Martial Arts Academy is famous for being cold-blooded and cruel, this kind of thing isn't necessary. I heard from the staff just now that this seems to be a test that the main examiner deliberately increased the difficulty of the test.

Regardless of whether he passes or fails, the Ultimate Martial Arts Academy will not let any accidents happen to his life!”

“Oh? Was this for real? That’s more like it...”

“But this Li Yueming is really ridiculous. A genius from a small planet can actually make the main examiner of the Ultimate Martial Arts Academy specially increase the difficulty of the assessment for him!”

“A monster of this level is quite rare even in the history of the Ultimate Martial Arts Academy, right?!”

“In a trance, I saw a rising star!”

After figuring out what was going on, the group of examinees who were watching could not help but heave a sigh of relief.

Then, they couldn’t help but feel envious and jealous.

It couldn’t be helped. Li Yueming’s performance was so outstanding that they even had doubts about their talent and strength for a moment.

Li Yueming was born on a small planet, so it was impossible for him to receive such a systematic education from a young age. However, the strength he displayed today was still far beyond their imagination.

In the incubation area, five or six Level Three black beetles flapped their wings and flew up!

Under normal circumstances, there would not be too many Level 3 black beetles in the black beetle nest. It was not because they could not continue to evolve, but because their flying ability would reduce their weight.

This was in conflict with their original mission.

Therefore, only a small number of black beetles that did not engage in labor and production could evolve into Level 3 black beetles. After growing wings, the black beetles’ carapace would become harder. At the same time, the wings could greatly improve their slow movement speed.

Therefore, they were able to get close to Li Yueming very quickly!

As the black beetles approached, puffs of stinky dark green mucus sprayed everywhere.

Li Yueming’s dodging space was further compressed, so that Li Yueming could only dodge the omnipresent attacks from extremely dangerous angles.

This sudden accident had undoubtedly disrupted Li Yueming’s initial plan.

Although a few Level 3 Black Beetles flying in the air could not catch up with his speed, its accurate and fast slime was always able to stop Li Yueming from advancing forward.

At this moment, Li Yueming could already see the nest of the Black Beetle Queen not far away.

However, the number of Black Beetle Guards who had discovered the abnormality and rushed over had also increased by several times.

It seemed that if he didn't show his true abilities today, he really wouldn't be able to complete this assessment.

It had to be said that to be able to force Li Yueming to this extent, as a top martial arts school that was slightly famous in the entire Third Cosmos, the assessment of the Ultimate Martial Arts Academy was still very valuable!

But that was all.

Under the siege of a group of black beetles, Li Yueming, who was still charging forward, suddenly stopped. He closed his eyes and took a deep breath. He spent countless reincarnation points and merged many top martial arts techniques. The Star and Moon Art, which was almost complete, began to circulate.

Li Yueming's entire body was covered in mist, and even his skin turned red.

Before the venom of the surrounding black beetles could get close to Li Yueming's body, they were evaporated by the invisible air wave.

At this scene, all the examinees candidates in the spectator area could not help but gasp.

The main examiner of the Ultimate Martial Arts Academy, who was on the special viewing platform, looked at Li Yueming at his feet and exclaimed as if he had seen a ghost, "Martial arts cultivation method, this kid only learned the 'Third Cultivation Method for Personal Magnificent Power Warriors' and actually comprehended martial arts cultivation method? Moreover, looking at the energy level, this cultivation technique was quite top-notch... Heavenly talent, simply heavenly talent!"

Towards the end.

The head examiner's voice was trembling.

What was a genius?

At the age of 18, he had comprehended a complete top-notch martial arts technique from the Third Cultivation Method for Personal Magnificent Power Warriors.

Even in the entire third universe, he was definitely worthy of being called a top-notch genius!

Seeing that the head examiner's face was flushed red from excitement, many of the accompanying teachers behind him looked at Li Yueming with shining eyes.

A white-haired, skinny teacher said, "I want this kid. No one is allowed to snatch him from me!"

Chapter 823: Assessment Ended, Highest Score in History!_2

As soon as he said this.

The entire special spectator area immediately exploded. "You old thing, you're already more than eight thousand years old this year. Your old bones definitely can't match the brainwaves of young people. This student still has to follow me to show his strongest form!"

"Who are you calling old bones? Do you want to spar?"

"Both of you, be quiet. Our class happens to have a few vacancies. This student has to go to our class!"

The group of teachers glared at each other and almost started fighting.

In the end, the head examiner roared angrily with a livid face. Only then did the group of people quieten down. However, their eyes were still filled with fervor when they looked at Li Yueming.

The exam was still in progress.

However, the result had already come to an end when Li Yueming used the Star-moon Art.

Many of the black beetles that had surrounded them were instantly blown into pieces by Li Yueming's sledgehammer. The dark green liquid was scattered all over the ground as if it was free.

The few Level Three black beetles became Li Yueming's main target.

After a few hits, the shell that they were so proud of seemed to be non-existent. In an instant, it was dented and fell to the ground with a crack. It turned into a pool of dark green liquid that was no different from the other black beetles.

At this moment, Li Yueming was like a god of death who had descended to the mortal world. He activated his Peerless skill in the nest of the black beetles. He carried a hammer and continued to move forward firmly and stubbornly under the encirclement of many black beetles.

The examinees who were also taking the test quickly discovered in shock that the black beetles chasing behind them suddenly retreated as if they had gone crazy.

There were a total of fifty examinees in the entire examination hall.

Now, other than Li Yueming who was fighting a bloody battle, the other 49 had lost their opponents.

This unfamiliar feeling made many examinees feel very uncomfortable for a moment.

So what the hell happened?

Why was it so strange?

After looking around blankly and confirming that it really wasn't a trap, the group of examinees finally mustered up their courage and headed in the direction where the Zergs had retreated.

Intuition told them that the reason why the black beetles were retreating in such a hurry was that something was wrong with the nest, and it was very likely to be a very big problem.

Perhaps they could take this opportunity to take advantage of it.

However, when they arrived at the border between the Hatchery District and the jungle area, they saw an unforgettable scene: On the ground that was covered in ruins and debris, nearly ten thousand black beetles gathered.

The entire ground was covered in black torrents, and in the middle of the black torrents, a young man holding a giant hammer was like a god of death walking in the human world, crazily killing.

One after another, the black beetles were trampled to death like ants in front of him.

In the waste gas container not far in front of the young man, a giant black beetle with an exquisite shell and a few gorgeous antennae was peeking out, watching everything with fear.

If he was not mistaken, it should be the Black Beetle Queen.

F * ck...

Someone had broken into the black beetle nest?

Moreover, he was able to do it while being surrounded by so many black beetles?

Were they insane, or was the world insane?

Was he hallucinating?

When the group of examinees saw this scene, they were all dumbfounded.

He froze on the spot and did not know how to face it.

He finally came back to his senses. While he kept inhaling cold air, he looked at the group of furious black beetles not far away. His heart could not help but become lively. He began to hunt down the lone beetles in twos and threes.

After all, no matter how strong the big boss was, it had nothing to do with them.

If they couldn't kill a hundred black beetles, they wouldn't even be able to pass the test.

Now that the boss had attracted the attention of most of the black beetles, they could take advantage of the opportunity to clear out some of the lone black beetles. Otherwise, when the black beetles in the entire area were all killed by the boss, they might not even have a place to cry.

Li Yueming had already reached the exhaust container where the Black Beetle Queen was.

However, he was not in a hurry to rush in and deal with this cunning bug. Instead, he was prepared to block the entrance and continue to farm points.

After all, Li Yueming had revealed all kinds of trump cards that were already scary enough. In any case, he would not be able to escape the result of being questioned in the end. He did not mind being even more scary and getting the highest score in history.

Or low-key pretending to be a pig.

Or a tiger roaring in the forest.

It would be stupid if he couldn't achieve high or low.

Li Yueming didn't know how many black beetles he had killed. He didn't wake up from the thrill of killing until the giant hammer in his hand was about to be smashed flat and the examination hall was about to end when the whistle sounded.

He turned around and smashed his hammer on the abandoned container behind him.

Following a loud bang.

The Zerg Queen, who was originally hiding in the middle of the hammer, was instantly turned into a pool of liquid by the terrifying vibration brought by the hammer.

The queen's mission in the race was to be responsible for production.

They did not have any combat strength.

Therefore, as long as Li Yueming could break through the defense line, it would be easy for him to kill it.

After killing the Black Beetle Queen.

All the black bugs in the arena were stunned for a while.

This was because a part of their neural network was connected to their race.

Now that the Queen of Black Beetles was dead, a large part of their network was empty, so they immediately stopped their fierce attacks and looked around blankly.

Li Yueming's body was already overheated, and his stamina had dropped drastically. He had already gotten enough points.

As such, he wasn't very interested in this motley crew. Instead, it benefited the other examinees who were drinking soup behind him. They had a good time at the last moment of the exam.

When the second whistle sounded, this soul-stirring assessment finally came to an end.

It was obvious that there was no need to deliberately exaggerate or publicize what Li Yueming had done in the examination hall today. In a very short period of time, the news would spread to the entire Emperor Sun Star Area.

It might even cause quite a stir in the third universe.

Of course, Li Yueming wasn't too clear about this. After the exam ended, like the other examinees, the first thing he did was to look up at the assessment points on the display screen not far away.

[Assessment result list:]

[1st place: Lin Ziyue]

“27741 credits, ranked first on the overall leaderboard!]

[2nd place: Ji Zhitao]

[1,540 credits, ranked fifth on the overall rankings!]

[Third place...]

One by one, the names of the examinees appeared.

The most dazzling one was undoubtedly Li Yueming.

More than 27,000 points raised the highest limit of the entire Ultimate Martial Arts Academy assessment by more than 10,000 points.

Not to mention anything else, just this achievement alone was enough for Li Yueming to become a legend that other examinees who participated in the Ultimate Martial Arts Academy's assessment in the future could not reach.

As for the group of examinees behind Li Yueming, although they were not even considered fireflies under Li Yueming's bright moon, they could only be considered as insignificant little sparks.

Relying on Li Yueming attracting the attention at the front, they also picked up a lot of leftovers at the back. The second place even directly became the fifth place among all the examinees in this examination. It was considered to be extremely lucky.

Many young geniuses in the exam area who had yet to start the exam were so envious that their eyes turned red. They wished that they were in the same exam hall as Li Yueming just now, so that they could easily pass the exam.

After the assessment ended, all the examinees were teleported out of the examination hall.

Under normal circumstances, the examinees would be sent to the same place after the exam and wait for the rest of the process.

However, what appeared in front of Li Yueming was a sealed space without any other examinees.

This space was rather secretive and filled with a metallic texture.

If nothing unexpected happened, it should be that his actions in the examination hall had attracted special attention. At the moment, the Ultimate Martial Arts Academy no longer treated him as an ordinary genius.

He just didn't know what would be waiting for him next.

Li Yueming couldn't help but look forward to it.

Chapter 824: Supreme Martial Artist, the Strongest in Emperor Sun Galaxy!_1

In the metal space, Li Yueming was a little nervous.

Now that his talent had been displayed, he did not know if he had gone too far.

The only thing he was worried about now was that he had gone overboard during the assessment just now and caused an accident.

Fortunately, his thoughts were unnecessary.

This universe was too big, so big that ordinary humans could not even imagine it.

The number of creatures living in it was as many as the number of sand grains.

In front of such a huge unit of measurement, there was no absolute genius.

Li Yueming's current talent might attract a lot of attention in the Emperor Sun Star Area and even the entire Third Universe, but what could it be outside of the Third Universe?

There would always be someone better than him.

No matter how talented Li Yueming was, it was far from arousing suspicion and taboo.

Unless he revealed his perfect geno body, it might cause some trouble.

Therefore, Li Yueming waited for less than two minutes before the main examiner brought a few examiners into the metal space.

Looking at the young man in front of him who was still calm and composed, the head examiner nodded with some praise and said, "The strength that you displayed just now was not bad. It can be said that you have refreshed our inherent impression of the disciples of the 'small planets'!"

Hearing his praise, Li Yueming didn't get carried away. He smiled humbly and said, "Thank you for your praise, Head Examiner. So, am I considered to have passed the test?"

"Of course. Not only have you passed the assessment, but you will also enjoy the top resources of the Ultimate Martial Arts Academy. I can't guarantee anything else, but I can guarantee that everything you use in the Ultimate Martial Academy will be the best!"

After making sure that the head examiner's voice and posture were normal, Li Yueming heaved a sigh of relief and replied, "In that case, that's great. I hope I can make more contributions to the Ultimate Martial Academy!"

After sizing up Li Yueming, the head examiner corrected him with a serious expression and said, "You don't need to make any contributions to the Ultimate Martial Academy, because it's not the Ultimate Martial Academy that's nurturing you. It's the entire third universe's tax collectors!"

"When you join the Ultimate Martial Academy and enjoy the top resources, don't forget all the people in the third universe!"

Hearing these words, Li Ming was startled. He immediately reacted and nodded, "It's only natural that you don't forget the people who dug the well when you drink water!"

The examiner nodded his head.

He was already very satisfied with Li Yueming's performance.

Now that he had personally met Li Yueming, he was even more satisfied.

The young man in front of him was neither arrogant nor impatient. He looked very humble and polite. At a glance, it was obvious that he was not the kind of person who was arrogant and had no fear.

This world did not lack geniuses, nor did it lack young people who could shock the world.

However, a young genius like Li Yueming who could still keep his heart and was neither arrogant nor impatient was quite rare.

Only such young people were truly worthy of investing resources to nurture.

The two of them had a simple contact and eliminated the initial unfamiliar estrangement.

The head examiner asked the real question he had come here for. "How did you learn the martial arts technique that you used just now?"

Li Yueming was naturally prepared for this, so after blinking a few times, he quickly replied without blushing: "Isn't there a path of learning related to martial arts techniques in the 'Third Cultivation Plan for Personal Mighty Power Adept'? I studied it for a few years, and then concluded that this technique is more suitable for me!"

Hearing Li Yueming's answer.

Even though he was mentally prepared, the head examiner still felt his teeth ache.

As a level level 14 Star Field warrior, he was very confident.

He naturally had his own martial arts techniques that he was good at.

However, when he comprehended this set of martial arts cultivation method, he was already close to a thousand years old.

Just this alone could be considered one of the best among the martial artists of his generation back then.

However, the student in front of him was only 18 years old. In the long path of martial arts, he could only be considered a child. However, he had already comprehended his own martial arts cultivation method in the third cultivation plan.

Moreover, this cultivation technique was so powerful. It was really infuriating to compare people! He panted a few times.

After finally calming down, the head examiner smiled and said, "It seems that you are really a genius born for martial arts. May I take the liberty to ask the name of the cultivation method you comprehended?"

Li Yueming thought for a moment and replied, "The Star Moon Art is not presentable!"

How could this not be presentable?

Even if it's not presentable now, it will be continuously improved by you in the future and become presentable!

The head examiner was roaring in his heart, but there was not much expression on his face. He forced a smile and said, "It's good for young people to keep a low profile, but there's no need to be too humble. A genius is a genius, an upright genius!"

Speaking of this.

He basically had no more doubts.

"There should be companions and friends waiting for your triumphant return outside, right?" "You can go back first. I'll send someone to follow and protect you. Don't leave the Imperial Sun Star during this period of time. We'll meet again after the Ultimate Martial Arts Academy's assessment officially ends!"

After saying that, the main examiner and the few exam partners disappeared into the metal space.

Chapter 825: Supreme Martial Artist, the Strongest in Emperor Sun Galaxy!_2

Li Yueming felt his vision blur, and soon found himself back in the waiting hall.

At this moment, the other examinees who had finished their assessment had already left.

Only An Linna, Lu Dali, and the others were waiting anxiously in the waiting hall.

Seeing him appear, the three of them were obviously relieved.

Fan Li ran over and said with a charming expression, "Big Brother Li, Big Brother Li, you're my brother from now on. Don't forget to take care of me when you're rich!"

"I'll take you to the Third Universe Center for a foot massage." Li Yueming teased. "I'll see if the massage service at the center is more special."

Originally, he had only said it casually, but he didn't expect Fan Li to actually listen. He tilted his head and fantasized for a while before saying seriously, "Then let's make a deal. I want the service of technician number eighty-three!"

"You're really thinking about it!" Li Yueming couldn't help but laugh.

The two of them joked a little, and the atmosphere became much livelier.

An Linna examined Li Yueming from head to toe before clicking her tongue in wonder. "Not bad, kid. I didn't know you were so powerful. No wonder Evelyn dared to send you here this year!"

Li Yueming smiled. "Isn't that so? We have to make Planet 7-20003 a better planet!"

An Linna couldn't help but chuckle upon hearing this. "How is this a proper name? It's clearly to make our mother planet a big hit in the entire Emperor Yang Star Field and even the third universe!"

The four of them laughed.

They were obviously in a good mood.

When Li Yueming had insisted on participating in the first round of the assessment, An Lin had been furious. After all, she had watched as an outstanding junior from the same mother planet embarked on a path of no return, and she had been utterly disappointed.

However, she never expected Li Yueming to give her such a big surprise.

From another perspective, it could even be considered a shock.

If he hadn't been mentally prepared just now...

At this moment, she might not have completely recovered from her shock and did not know how to face Li Yueming.

Fortunately, Li Yueming didn't dwell on what happened before, so she didn't feel too embarrassed.

After chatting for a while in the exam hall, the four of them prepared to leave.

However, when they walked out of the gate of the Ultimate Martial Arts Academy, they realized that a group of reporters from the Imperial Sun Planet had gathered outside.

Good heavens, this group of people really had the noses of dogs!

The four of them had just left.

A group of reporters rushed forward.

"May I ask who is Mr. Li Yueming?" someone asked. "We are from the Imperial Sun Military Radio Station. Can we have a few minutes of your time for an interview?"

Before Li Yueming could reply.

Another group of reporters interrupted. "Hello, Mr. Li Yueming. We are the resident reporters of the Third Cosmos. We would like to open an exclusive column for you. We hope to ask you some questions about the assessment and cultivation!"

Under normal circumstances, Li Yueming might be willing to answer a few questions.

But now, a large group of reporters had gathered around, and the microphone was almost stuffed into Li Yueming's mouth.

They were still introducing themselves, and the names of the TV stations behind them were getting louder and louder. They were all famous existences in the Emperor Sun Starfield and even the entire third universe.

After a few actions, Li Yueming was instantly indifferent. He rejected expressionlessly, "I'm sorry, I'm not feeling well right now. I can't accept the interview!"

With that, he turned around and prepared to leave.

This action didn't scare the others, but it did scare An Linna.

After all, she had been in the Imperial Sun Star Field for many years, and she knew the power behind these TV stations. No matter which one of them was placed in normal times, even she could only look up to them.

Now that Li Yueming had rejected so many of them, he was afraid that he had offended a reinforced company.

However, before she could whisper a reminder, she heard a deep voice from behind her. "Where did so many flies come from? Get lost!"

As soon as he said this.

Even Li Yueming was shocked, let alone An Linna.

It was normal for Li Yueming to refuse the interview.

That voice just now was clearly offending someone.

There were at least dozens of reporters present. After hearing that they had been described as flies, several of their faces darkened on the spot.

However, when they saw who said this, they immediately shut their mouths as if someone had pressed the pause button. After a short silence, they came back to their senses and scattered with their tails between their legs in fear.

Li Yueming and the others also turned their heads to look behind them.

A middle-aged man who looked to be in his thirties with a two-inch long scar on his face walked over and patted Li Yueming's shoulder. "Young man, I saw your performance just now. Do your best in the future, I have high hopes for you!"

The man gave Li Yueming a thumbs up and continued, "If you encounter any problems that you can't solve, you can come to the Governor's Office of the Military Council of Imperial Sun to find me. I'll help you settle them!"

Hearing this, Li Yueming, Fan Li, and the others didn't react.

However, An Linna couldn't help but tremble as she looked at the domineering figure in front of her. "You... Are you Commander Wu?"

He heard her exclamation.

The man addressed as Commander Wu raised his eyebrows in surprise. "Oh? What a beautiful little girl... Looking at your attire, are you from the Secret Service?"

He was sure that he had addressed her correctly and that she was indeed the descendant of Commander Wu.

An Linna immediately tensed up visibly.

He stood where he was and saluted, saying respectfully, "An Linna, the leader of the high-level special agent team in the main office of Planet Diyang, greets you. May Commander Wu's martial arts be eternal!"

The man was shocked by her extremely solemn posture and hurriedly waved his hand. "This is not a battlefield, and we are not on duty. Young lady, don't be so serious!"

However, even though he said so.

An Linna's entire body was clearly still stiff, and she couldn't relax at all.

Fortunately, the man did not care about these details. He said happily, "It's a blessing for the Martial Arts and Order Alliance to have you young people. I still have some things to do, so I'll be leaving first!"

After saying that, the man walked away.

He waved at them and disappeared.

It came suddenly and left even more suddenly.

As a result, Li Yueming, Fan Li, and the others were still dumbfounded.

There was no doubt that one sentence was enough to scare the reporters away with their tails between their legs. This man's background was definitely not ordinary, but neither Li Yueming nor Fan Li knew what his background was.

After the man completely disappeared.

They then turned to An Linna and asked curiously, "Miss An Linna, who is this Commander Wu? Could he be the Commander-in-Chief of the Military Committee of the Imperial Sun Galaxy?"

He heard a few questions.

An Linna finally came back to her senses, but her eyes were still fixed on the direction Commander Wu had disappeared in before she reluctantly retracted her gaze. "Haven't you already guessed it? Why are you still asking me why I'm doing a damn!"

Hearing her answer.

Suddenly, the three of them, including Li Yueming, fell silent as if they had been cast a magical silence spell.

The Supreme Commander of the Imperial Sun Military Committee was also the Honorary Principal of the Ultimate Martial School, and he was the only universe level supreme warrior in the entire Imperial Sun Star Field.

In other words, the person who had just appeared in front of them... Was he a Martial Dao Supreme who could dominate the universe?

Thinking of this, not to mention Fan Li and Lu Dali, even Li Yueming felt cold sweat all over his body.

One had to know that he had used all sorts of methods to investigate the other party just now, but no matter how he investigated, the other party was like an ordinary person without anything special. He could not even feel a hint of killing intent.

But now, An Linna was telling him that he was the most powerful being in the entire Imperial Sun System.

This conclusion was undoubtedly terrifying.

Chapter 826: Shocked Evelyn!_1

Commander Wu's sudden appearance shocked the three of them.

No wonder there were so many reporters at the door just now. However, the moment they saw Commander Wu, they immediately shut their mouths and ran away as if something had caught their tails.

With Commander Wu's strength and status, he could not just reprimand the reporters.

Even if they were to be exterminated on the spot, they and the forces behind them would not dare to say anything.

After coming back to her senses, An Linna looked at the dazed Li Yueming with a complicated expression."Commander Wu actually admires you so much. He even told you to look for him at the Governor's Office of the Imperial Sun Military Committee if you have any trouble... This is unbelievable!"

At this moment, Li Yueming had already regained his senses. He couldn't help but smile when he heard this."Perhaps Commander Wu just happened to pass by and was being polite. Unless it's absolutely necessary, I don't dare to disturb him!"

An Linna remained silent.

However, there was still some shock in his mind.

Commander Wu's full name was Hai Wu. It was a legendary name in the entire Third Universe.

Five thousand years ago, he was already one of the most famous masters in the Imperial Sun Star Area. However, at that time, he hadn't officially become a Martial Dao Supreme, so his fame was limited to the Imperial Sun Star Area.

It wasn't until more than 3,000 years ago that six Supreme Bug Tribe mother hives appeared at the edge of the third universe. The overwhelming bug tide finally swept through this originally peaceful world.

The military committee immediately used the vast resources of the third universe to establish a unified defense line as quickly as possible.

At this point, the war between the third universe and the insect race was about to break out.

Hai Wu was one of the first batch of individuals who volunteered to go to the battlefield. Along with him were close to ten thousand supreme beings from other star fields in the third universe, as well as countless interstellar warships and soldiers.

After fighting against the Zergs for more than a thousand years, this batch of warships and soldiers had almost all withered away. The group of utmost powerful beings had also suffered heavy losses.

Fortunately, the Zerg's attack was also temporarily stopped by them, giving the Third Universe time to build a defense line and engage in a tug-of-war.

After Hai Wu had made great contributions in the frontline, the Alliance of Law had taken into consideration that he was still young and that he might have a chance of breaking through to the Supreme Martial Artist if he focused on his cultivation. Therefore, they had forcibly transferred him back from the frontline to the Imperial Sun Star Field where he was born. From then on, Hai Wu had become the Commander Wu that they were familiar with.

Even though his martial arts level had improved and he had broken through to the Supreme level, Hai Wu had yet to be transferred back to the front line behind the Alliance of Law. He was still guarding the Emperor Sun Star Area, and no one knew if he had other unknown missions.

It wasn't an exaggeration to say that Hai Wu's life experiences had made him the spiritual idol of countless up-and-coming talents like An Lin Na.

This was also the main reason why An Lina was so excited when she saw her in person.

Seeing the spiritual idol that she had yearned for for decades suddenly appear in front of her, it was already quite impressive that An Linna was able to maintain her basic composure.

Not to mention other things.

He took a deep breath and forcefully threw out the messy thoughts in his mind.

An Linna finally regained her usual composure, and she sighed. "Let's not talk about anything else first. Hurry back to your residence. It'll be troublesome if other reporters run over later!"

The three of them nodded.

It was not easy to get rid of the reporters' questions, but she did not want to be surrounded again later.

Five minutes later, the three of them boarded the Ultimate Martial Arts Academy's private car. They had to leave the military-controlled area before they could fly the private spaceship.

However, they had just escaped the reporters' pursuit.

He thought that he would be able to breathe a sigh of relief after getting into the car.

However, now that he had really boarded the Ultimate Martial Arts Academy's car, he realized that everything did not seem to be that simple.

At this moment, most of the people sitting in the car were teachers or reference students from other schools. Without a doubt, they all knew and witnessed Li Yueming's amazing performance in the examination hall.

Now that they saw Li Yueming on the same train as them, all kinds of eyes were on him.

Whether it was Li Yueming, An Linna, Lu Dali, or Fan Li, all of them could feel the gazes of the other students on the train, as if they were watching a gorilla in a zoo.

And in the center of his line of sight, Li Yueming couldn't help but look at himself.

Damn, he didn't grow three heads and six arms either. Was there a need to look at him like he was a monster?

Fan Li's expression was tense as he muttered softly, "Big Brother, looks like you've really become a celebrity this time. They're all watching you!"

Li Yueming was speechless. "I know. I'm not nervous yet. Why are you so nervous?"

Hearing this, Fan Li smiled somewhat embarrassedly and said, "That's because I'm feeling nervous for you..."

He was indeed a little nervous.

At this moment, his palms were covered in cold sweat.

Nonsense, how could he not be nervous?

Other than him and Lu Dali, the rest of the people in this carriage were all young geniuses who could travel anywhere on a large planet!

Now that they were looking at him so brazenly, even if he was not the center of the conversation, just the corner of their eyes was enough to scare him.

Chapter 827: Shocked Evelyn!_2

If it weren't for Lu Dali and An Linna, Fan Li would probably have crawled behind Li Yueming to avoid fainting.

The time taken for the return train was many times longer than the time taken for the return train.

Even An Linna couldn't help but heave a sigh of relief when she finally stopped the car. She turned to Li Yueming and said with a proud yet helpless expression, "You've really gone overboard this time. I probably can't even take you in here. After arranging things, prepare to go to the Ultimate Martial Arts Academy in advance!"

Under normal circumstances, the candidates would have to wait for the acceptance letter after the assessment, and during this period of time, Li Yueming would be provided with food and lodging by An Lin.

However, what Li Yueming was facing now was obviously not a normal situation.

One had to know that the news of Li Yueming breaking the historical record in the Ultimate Martial Arts Academy's assessment score had not even spread completely, but it had already caused such a huge commotion.

An Linna didn't even dare to imagine what would happen after the news spread.

It would probably cause a huge commotion in the entire Imperial Sun Star Field!

Thinking about the possible consequences of this information spreading, An Lin felt that she was no longer qualified to arrange for Li Yueming to join the Ultimate Martial Arts School. In order to prevent a similar situation from happening, it would be best to enter the Ultimate Martial Arts School as soon as possible.

Hearing her slightly disdainful tone, Li Yueming covered his head and said with a headache, "Ah... Miss An Linna, I'll have to wait for the arrangements at the martial arts academy before I can go through the admission procedures. You can't abandon me at this critical moment!"

Hearing this, An Linna couldn't help but laugh. "Then wear a mask for the next few days. I don't want to be watched as a monkey in the zoo!"

Although he was somewhat helpless, he could only do so now.

Li Yueming nodded.

Beside them, Lu Dali witnessed everything and could not help but feel that reality was indeed filled with absurdity... This was the first time he had heard of someone being troubled by being too outstanding and too famous!

If this could be considered a problem, then it should all be directed at him!

After all, even in his dreams, he wanted to bring glory to his ancestors and restore the name of his mother planet.

They got off the maglev train.

The four of them carefully arrived at the cabin of the private spaceship.

The four of them only heaved a sigh of relief when they opened the cabin and entered.

The following process was relatively simple.

The spaceship flew straight toward the residence An Linna had arranged for them.

After another ten minutes, the spaceship finally returned to their residence.

"I talked to Evelyn about today's schedule before I left. She's probably still waiting for my reply!" After returning to her residence, An Linna glanced at her watch and dialed a number. "The food is in the fridge. Take whatever you like and heat it up if you don't like it cold. I'll call Evelyn back and let her experience what a surprise is!"

Li Yueming was recommended by Evelyn.

Even the application quota for the Ultimate Martial Arts Academy was given by Evelyn.

However, An Linna didn't believe that Evelyn would be able to predict what Li Yueming would achieve in the examination.

The expensive Star Sector-level broadcast phone was quickly dialed.

Evelyn's cold voice was urgent as she said, "Nana, how was it?"

An Linna glanced at Li Yueming, who was sitting not far away and eating slowly. "That's it... What else do you think?"

Evelyn couldn't help but say in exasperation, "Nana, you've gone bad. I'll teach you a lesson the next time I come to the Imperial Sun for a meeting!"

A smile appeared on An Linna's face as she whispered, "Tsk, who's afraid of who? You're only higher than me in one position now. In fact, your official rank is only a few stars higher than mine!"

In terms of age, Evelyn was clearly a senior.

However, as a rising star, An Linna's current achievements were slowly catching up.

The relationship between Evelyn and An Linna was more like that of best friends than seniors and superiors.

After keeping them in suspense for a while.

An Linna finally stopped teasing Evelyn.

He told Evelyn everything that had happened in the afternoon.

When she heard that Li Yueming had taken first place in the total points of the assessment and had even broken the record for the highest score since the establishment of the Ultimate Martial Arts Academy, Evelyn did not say a word.

Before An Linna could explain...

With a beep, the phone in his hand was hung up.

A moment later, Li Yueming found the communicator on his waist vibrating.

He opened it and realized that it was Evelyn. He quickly answered the call. "Commander Evelyn!"

On the other side, Evelyn didn't make any small talk and went straight to the point. "Did you take the test today?"

Li Yueming stopped chewing and turned to An Linna with a curious expression. "I did. Didn't Ms. An Linna say she was going to call you to report? Didn't you receive her call?"

Evelyn gritted her teeth and said, "That wretched girl is making fun of me. She told me that you directly participated in the first assessment of the Ultimate Martial Arts Academy. Not only did you pass the first place of the year, but you also set a new record for the highest score in the Ultimate Martial Arts Academy's assessment history... Does she think that I can't understand the value of the Ultimate Martial Arts Academy's assessment just because I'm staying in a remote place like 7-20003?"

Li Yueming was stunned for a moment.

No wonder Evelyn had called him. It turned out that she had mistakenly thought that she was being scammed by An Linna.

After a moment of silence, he felt the need to clarify, so he said, "Uh... Commander Evelyn, I know this is hard to accept, but what Miss Anlina said is true!"

Evelyn was speechless. Are you guys seriously playing with me? Let me be clear, this joke is not funny at all!"

Towards the end of her sentence, her voice was already a little cold.

If An Linna was teasing her, she could still accept it, but now that Li Yueming was lying to her, she couldn't help but be enraged.

After all, An Linna was at least on the same level as her.

The relationship between the two of them was also relatively good.

It was fine if he was just joking.

However, Li Yueming was a junior whom she had personally sent out with a lot of authority and resources. Even if others did not respect her, Li Yueming had to maintain sufficient respect for her.

And now, Li Yueming was actually teaming up with An Linna to make fun of her.

Evelyn even began to regret giving Li Yueming the authority to apply for the martial arts academy.

This was purely an ungrateful wolf!

However, before she could get angry, Fan Li and Lu Dali, who were beside her, also felt that the atmosphere was not right. They hurriedly stood up and said, "Colonel Evelyn, although this is indeed a little hard to believe, what Miss An Lin and Big Brother Li Yueming said is true!"

Li Yueming added, "If you still don't believe me, you can wait for two days to check the interstellar news. There should be relevant information on it!"

They all answered in unison.

On the other end of the phone, Evelyn, who was already burning with anger, felt as if cold water had been poured down her body.

What the hell was going on?

If An Linna and Li Yueming were teasing her, then Fan Li and Lu Dali wouldn't have the guts to do the same, right?

But now, they had stood up for Li Yueming and An Linna...

Could it be that Li Yueming had really obtained first place in this year's assessment and even refreshed the upper limit of the Ultimate Martial Arts Academy's historical assessment results?

No, this was impossible!

Evelyn would rather believe that a pig could climb a tree than believe that Li Yueming could do such an unbelievable thing.

This was not because she was targeting Li Yueming. After all, in a sense, she was actually the most optimistic about Li Yueming. Otherwise, she would not have given him the precious opportunity to apply for the Ultimate Martial Arts Academy.

Evelyn simply felt that the young people from the remote planets could not do something like this!

Chapter 828: Letter of admission, Ultimate Martial Arts Academy!_1

Evelyn fell silent after hearing Li Yueming and the others' replies.

Her rationality told her that this was almost impossible, but now that the four of them had spoken in unison, it was impossible that they had discussed it together to fool her.

In other words, what they said might be true?

Thinking of this, Evelyn felt a little dizzy.

After taking two deep breaths, he said, "I hope that you are not joking with me. If it is true, Li Yueming will receive full funding from me and planet 7-20003. He may become the greatest pride of the mother planet!"

Hearing this.

Li Yueming didn't feel much about it.

However, Fan Li and Lu Dali couldn't help but reveal looks of envy.

The Glorious Mother Planet was a topic that they could only dream about, but now, it had been realized by Li Yueming.

Moreover, it was such an epic piece of news...

An Linna snatched the phone from Li Yueming's hand and said, "I believe this news will spread out soon. Just wait to watch the live broadcast on the interstellar radio channel!"

Evelyn didn't say anything else and hung up the phone. Clearly, she hadn't calmed down yet.

The third universe, the broken moon.

The head examiner in charge of the Ultimate Martial Arts Academy's assessment was standing behind a skinny, white-haired old man.

In front of him was a huge auditorium. On top of the auditorium was a huge statue of an angel with holy wings. The angel with elegant hair and exquisite face scanned the entire auditorium with love and pity in her eyes.

The old man bent down and prayed to the angel statue for a moment before saying, "Have you found the destined person?!"

Looking at the old man in front of him, the head examiner's face was full of respect. He carefully said, "Headmaster, I had some gains when I was invigilating in the Emperor Sun Star Field, but I can't be sure if the other party is the destined person you described!"

As he spoke, he took out the video of Li Yueming's assessment at the Ultimate Martial Arts Academy and respectfully handed it over with both hands. "Sir Chief, please verify it yourself!"

Upon hearing this, the old man who was addressed as the Head of Church's turbid eyes suddenly erupted with a terrifying light.

Wei Wei stood up shakily and took the video from the head examiner's hands. He stretched out one hand and closed his eyes to carefully feel it for a long time. After that, the old man said with a slightly absent-minded expression, "After searching for a lifetime, I thought that the fated child was just a joke played by the heavens... Now that I'm about to die of old age, I didn't expect to witness a miracle one day."

Hearing this.

The head examiner's entire body shook.

He hadn't been walking around for the old man all these years, and the amount of data he had brought back was even more massive.

Basically, none of the owners of the data could be recognized by the old man.

The long period of searching for a needle in a haystack had long made him somewhat numb, just like how the old man himself was not confident in his own prophecy. Although he did not have any complaints, he had long lost hope in the so-called 'fated child'.

He had thought that he would only be happy for nothing when he brought back Li Yueming's data.

However, he didn't expect that he would actually receive the old man's acknowledgment and affirmation.

So the saying 'fated son' was not just a rumor, but it really did exist?

The head examiner could not help but widen his eyes. His eyes were filled with shock and disbelief.

The skinny white-haired old man coughed twice. His pair of turbid eyes looked at the head examiner and said, "Tell my old friends about this discovery. Tell them to pay attention to this young man's movements at all times!"

The old man paused for a moment before continuing, "However, don't interfere with his growth. The Destined Child is the hope that fate has given us to fight against the Zergs. I believe that fate will guide him towards a bright future... What we have to do is to prevent him from being discovered by the Zergs too early, or to get close to all our forces to protect his life at the moment of life and death!"

Hearing the old man's instructions.

The shock in the head examiner's heart increased by tenfold or a hundredfold.

One had to know that those who could stand on equal footing with the old man were all legendary existences...

Now, it was just for a young man, and the old man actually instructed them to pay close attention to him?

Was Li Yueming really that important?

When he was talking to him previously, although he did think that the other party was a dragon among men, he did not feel that there was anything unusual about him!

However, since the old man had spoken, the head examiner would definitely not dare to disobey. Moreover, if Li Yueming was really the fated child... In the future, it would affect the existence of the war between the Order Alliance and the Zergs.

Therefore, he hurriedly nodded and said, "I understand, Lord Headmaster, you must take care of yourself!"

The white-haired old man softly nodded to indicate that he understood. Then, he sat down cross-legged again. When he looked at the statue in the church, his eyes flickered with a complicated and melodious light.

The Alliance of Order and the entire universe were in a terrible situation.

He hoped that this so-called hope would not become the last despair that would crush the balance...

In the next few days, Li Yueming accompanied Lu Dali and Fan Li to the Imperial Sun Martial Arts School to participate in several assessments.

Chapter 829: Letter of admission, Ultimate Martial Arts Academy!_2

Of course, every time he showed up, he would wrap himself up tightly.

But even so, he could not help but hear many students discussing him.

There was no doubt that the current Li Yue Ming could definitely be considered a hot new star!

Lu Dali's strength was relatively strong, so it did not take long for him to pass the assessment of a martial arts school. Fan Li was slightly weaker, but his strength was above average. Thus, he also successfully passed the enrollment score of a martial arts school a week later.

This time, the geniuses from planet 7-20003 were much stronger than before.

Thus, everything was much simpler than An Linna had imagined.

A week later, An Linna's work was finally over, and she immediately returned to the office on Imperial Sun.

Li Yueming, Lu Dali and the other two invited Coco Su and the others from 7-22413 for a meal.

Compared to Li Yueming and the other two, Su Keke and the others had obviously encountered some difficulties. Until now, they had not found a school that was willing to take them in. This made the three of them very distressed.

Xiong Jia and Sun Yushong looked at Li Yueming and the other two with envy. After a while, they sighed and said, "If we don't get into the school, then Yu Song and I will just join the interstellar army. We will be going to the battlefield anyway, so it doesn't matter whether we get into it earlier or later, right?"

At this point, the two of them revealed a bitter smile. "Keke's talent is stronger than the two of us. I hope she can successfully enter an advanced martial arts school. It can be considered as a dream come true for us!"

Regarding this, Li Yueming and the other two couldn't do anything either.

He could only raise his wine glass to indicate that everything was said without a word.

They were all from the same small planet in the Witch Star System, but their fates were completely different.

After the not-so-pleasant dinner, Fan Li and Lu Dali brought the three of them to the Imperial Sun Star to see the world.

Li Yueming said that he had something to do, so he didn't go.

For the next few days, he stayed alone in his residence and began to focus on his cultivation.

About half a month later, the Ultimate Martial Arts Academy's admission notice finally appeared in Li Yueming's hands.

The head examiner told him to pack up and prepare to register at any time.

Under normal circumstances, it was definitely impossible for the Ultimate Martial Arts Academy to issue an admission notice at this time. After all, there were still many examinees who had not come to participate in the assessment. No one knew if there would be any geniuses who were missed until the last moment.

The reason why Li Yueming could get it so quickly was that he was not afraid of it.

Without a doubt, he went through the backdoor.

However, with his results, no student would dare to say anything even if he went through the back door.

One had to know that after the news about Li Yueming's assessment spread, it caused a huge commotion.

Even a few other academies in the Third Cosmos that were as famous as the Ultimate Martial Arts Academy extended an olive branch to Li Yueming when they knew that it was unlikely for Li Yueming to abandon the Emperor Sun Star Field and go to other star fields.

The top martial arts schools were fighting for it. What kind of treatment and glory was this?

It was too normal for the Ultimate Martial Arts Academy to open a back door for him. Not opening a back door was really disrespectful!

After receiving the admission notice.

Li Yueming didn't hurry to pack his things. Instead, he picked up his communicator and called his hometown.

"Beep, beep, beep..." The phone rang again.

A moment later, his uncle's voice sounded. As soon as he opened his mouth, he asked impatiently, "Kid, how is it?"

Li Yueming smiled. "I've already received the admission notice from the Ultimate Martial Arts Academy. Moreover, it's through the special recruitment channel. It can be considered the highest standard of treatment!"

Hearing his answer.

The uncle was obviously very happy. He laughed and said, "Good boy, I heard that you're famous in the entire third universe now. My Li family's ancestral grave is smoking!"

Li Yueming touched his nose and said, "It's not that bad. At most, it's just a rise in fame. It's still far from being famous!"

Uncle was even happier when he heard that.

Even through the phone, Li Yueming could guess his current appearance. He must be holding his head high with his hands on his waist and saliva flying everywhere.

Before his uncle could answer, Li Linglong's dissatisfied voice came from the other end of the phone. "Dad, how much are you going to say? Mom and I are still waiting in line!"

After being reprimanded by his daughter, the uncle said embarrassedly, "How many sentences did I say in total? Forget it... Give you, give you!"

After a moment of silence on the phone, Li Linglong's voice came through with a hint of excitement. "Brother, how's the Ultimate Martial Arts Academy? Isn't the Imperial Sun Star very prosperous?"

Li Yueming thought for a moment and replied, "Yes, compared to this place, Montenegro City and Planet 7-20003 are really just countryside!"

Li Linglong was obviously very excited when she heard that. She couldn't wait to say, "Then when will we have the chance to come and take a look? You have to work hard and become a strong person. This way, even if I don't get in, I can still leave those hateful classmates behind by ten streets through Brother Pin!"

Young girls were always simple.

After realizing that he couldn't compete with his father, he began to think about how to compete with his brother.

Li Yueming nodded in agreement.

Now, Uncle, Aunt, and Li Linglong's lives were very good, especially after hearing that Li Yueming had become a special enrollment student of the Ultimate Martial Arts School and became famous in the third universe.

Sensing Li Yueming's terrifying potential, Planet 7-20003 used almost all means available to pave the way for Li Yueming's growth.

This included a special scholarship of one billion Universe Credits per year, as well as logistical support on call.

Although these were not very attractive to Li Yueming now, Planet 7-20003 only had such a big ability, so his attitude was still down-to-earth.

Among them, Li Yueming was most satisfied with their arrangements for his uncle, aunt, and Li Linglong.

Not only did he transfer Li Linglong to the best school, but he also arranged a high-paying and easy job for his uncle and aunt. However, he was smart enough not to interfere in their lives.

Li Yueming's stage was destined to be huge. It was impossible for him to be limited to a small planet.

Therefore, it could be foreseen that the distance between the two sides would only get further and further.

After confirming that his uncle and aunt were doing well, he could rest assured and continue to move forward steadily.

He hung up the phone.

Li Yueming looked at the place where he had stayed for more than ten days, and for some reason, he felt a little emotional.

This world was too big, so big that it made people feel small all the time.

Could there be a place for his soul in the vast sea of stars?

Li Yue Ming doesn't know, maybe this also doesn't matter.

His path was destined to be full of obstacles and thorns. Rather than placing his heart and soul in those illusory places, it was better not to have any expectations from the beginning.

At this moment, Lu Dali and Fan Li had already arrived. They had received the news and were here to help Li Yueming move.

Li Yueming didn't continue to be lost in thought. He opened the door and signaled for them to come in.

After the three of them finished packing their luggage, the car sent by the Ultimate Martial Arts Academy had already stopped on the street outside.

The wide and shiny T1 military armed spacecraft was not only the most advanced armed spacecraft in the universe, but also one of the most popular carriers. It was simply dazzling on the streets.

Li Yueming stopped in front of the spaceship with his luggage. He turned to Lu Dali and Fan Li, who had complicated expressions on their faces, and waved his hand. "Goodbye!"

Lu Dali spoke before Fan Li, which was rare. "Have a safe journey!"

Fan Li forced a smile and said, "See you on the battlefield!"

The three of them knew that they might not be able to meet again for a long time.

After all, they didn't know how far away they were from each other.

This was especially true for the Ultimate Martial Arts Academy. Due to the extremely high level of confidentiality, the campus would even restrict students from communicating with the outside world.

The so-called camaraderie could only support their intermittent contact. Who knew what their fates would be in the future?

Li Yueming nodded and looked at the two of them one last time. He said casually, "Remember to help me thank Ms. Anlina for taking me in during this period of time. If there's a chance in the future, I will repay her!"

With that, he turned around and walked toward the spaceship. Soon, he disappeared in front of them.

Chapter 830: Mechanic, Transcendent Talent!_1

Li Yueming took the T1 military armed spacecraft sent by the Ultimate Martial Arts Academy and quickly left the Imperial Sun Star Field from the exclusive dock.

This was the second time Li Yueming Ming had experienced this kind of interplanetary travel. Fortunately, the level of the spaceship was higher than the previous one, so he did not feel any discomfort.

The current main campus of the Ultimate Martial Arts Academy had long moved out of the Imperial Yang Star and was replaced by more than a hundred subsidiary planets around the Imperial Yang Star. As for which planet it was exactly, even a military officer like An Linna wasn't sure, let alone a small fry like Li Yueming.

After all, if the Imperial Sun Martial Arts Academy was just a well-known public school in the beginning, then ever since the Zerg invaded the third universe, it was no longer as simple as it seemed.

The current Ultimate Martial Arts School not only nurtured young military talents sent to the front line, but also integrated military weapons research, war theory research, Zerg gene analysis, and other highly confidential military projects.

As such, this kind of national treasure was no longer suitable to stay on the Imperial Sun Planet, which was full of spies.

Moving it to an independent asteroid would be more convenient and safer.

The speed of the spaceship was very fast. After about 20 to 30 minutes, Li Yueming found an inconspicuous small planet in front of him.

The surface of the small planet was gray, desolate, and cold. There was no trace of civilization at all.

This made Li Yueming feel a little strange.

Did the spaceship deviate from its course or did something unexpected happen?

After all, this military speedboat was heading to the Ultimate Martial Arts School, not to take him to this desolate and barren planet for a vacation.

Just as Li Yueming had doubts in his heart, the speed of the T1 military armed spacecraft had completely decreased. After circling the planet a few times, Li Yueming finally felt the difference in this planet.

A shadow on the back of the planet suddenly collapsed, revealing a black metal corridor that looked like a Taotie's mouth.

After the huge mouth was completely opened, the T1 military armed spaceship slowly slowed down to the lowest speed according to the guidance of the interstellar coordinates and flew toward the metal corridor.

What was going on?

Could it be that the new location of the Ultimate Martial Arts School was also under the surface of the planet?

Thinking of this most likely guess, Li Yueming couldn't help but widen his eyes." How much manpower and resources would it take to develop a large-scale underground building on such a desolate planet?

For a moment, Li Yueming felt even more fortunate for his decision.

In such a vast and boundless super world, blindly developing would only be counterproductive.

After all, no matter how much a small planet developed, there would always be a limit. In the end, you would find that not only did you not gain any benefits, you might even waste the peak of your physical fitness.

At that time, it would be too late for regrets.

There are so many young geniuses in the world. Why should I believe you?

Using his advantage to gain attention step by step in exchange for more resources was the most correct choice.

After entering the cold and exquisite metal corridor, the entire spacecraft's vision completely darkened. After waiting for about three minutes, Li Yueming's vision returned to light after a series of inspections and inspections.

The cabin of the spacecraft automatically opened, and what appeared in front of Li Yueming was a world that stretched as far as the eye could see. The blue sky, white clouds, and green grass were everywhere. If it wasn't for the fact that the artificial sun hanging in the sky was different from the structure of a normal sun, perhaps not many people would realize that they were now underground.

The cold-blooded voice of the highest level military AI in the third universe, A0004, rang out. "We have arrived at the Ultimate Martial Arts School's teaching building on the Imperial Sun Planet. The teachers responsible for receiving you are ready. Please leave the spacecraft cabin within three minutes!"

Upon hearing A0004's reminder, Li Yueming, who was still immersed in his thoughts, came to his senses. He casually picked up his two luggage bags and left.

After getting off the spaceship, Li Yueming realized that it was the head examiner who came to welcome him personally. He couldn't help but be a little surprised, "Are you here to welcome me?"

"Geniuses always deserve special treatment, right?" The head examiner smiled and extended his hand. "Oh right, I don't think I've introduced myself..." "My name is Liang Run, and I'm now the dean of the Ultimate Martial Arts Academy. In the coming days, I'll be responsible for helping you settle down in the Ultimate Martial Arts Academy and answering some questions about the academy..."

"You can ask me anything you don't understand. As long as it doesn't involve confidential information, I can answer it for you!"

At this point, Liang Run's voice paused for a moment. He took the suitcase that Li Yueming was carrying and continued, "Don't be in a hurry to ask. After you put down your luggage, find a beverage shop and have a good chat!"

Li Yueming opened his mouth several times, but he couldn't get a word in.

He did not know if it was his imagination, but he felt that Liang Run's attitude towards him was a little too much... Passion?

Although Liang Run admired him very much when he met him in the examination hall, his attitude could not be compared to his current attitude.

Li Yueming Ming didn't really understand this.

After thinking for a moment, he could only attribute the reason to the other party's other demands and thoughts.
