

## Maxing MT 851

Chapter 851: A Dog's Death!

Seeing his gaze, the artificial intelligence on the LCD screen automatically recognized his identity and said, "Student ID 304, identity verified. May I know what mission you wish to accept?!"

It was Li Yueming's first time here, so he didn't have an accurate concept of the so-called mission.

After thinking for a moment, he asked, "What's the mission?"

The artificial intelligence paused for a moment and replied, "The missions in the Mission Hall are divided into three categories: Campus missions, military missions, and organization missions were the three main categories!"

"Most of the campus mission creators are teachers of the academy, as well as a small number of students who need help. The difficulty of the mission is relatively low, and it is more suitable for newcomers to receive and complete it. The reward for the campus mission is based on the bounty of the creator."

"The military mission is issued by the Military Committee. The difficulty of the mission is relatively high, and there is a considerable risk. It is recommended for senior students who have entered the school for three years to receive it. The reward for the military mission is also based on the reward of the poster, but the school will reward the same amount of credits according to the corresponding situation!"

"The organization that issues these missions is the government office of the Imperial Sun Planet. The difficulty of the missions varies. There are simple assistance missions and investigation missions that are more difficult. The reward for the agency mission was the same as the military mission. On top of the reward for the agency unit, the school would also add credits according to the corresponding situation!"

"Since you have just entered the school for less than a year, you can choose to accept some campus missions to earn credits!"

The AI on the display screen was very comprehensive. It took less than ten minutes for the three categories of missions to be popularized.

The content was similar to what Li Yueming had learned before. The missions in the mission hall came from three sources, namely the school, the military committee, and the government agencies of the Imperial Sun Planet.

Other things aside, the Ultimate Martial Arts School was closely related to the Military Committee and the government.

Therefore, after hearing the artificial intelligence's suggestion, Li Yueming thought for a moment and nodded. "Then let's look at the Daily Mission. I'm just looking at it anyway!"

As soon as he finished speaking, the mission panel on the display screen suddenly changed.

A neat row of daily missions appeared in front of Li Yueming.

[Campus Mission: ]

“Help! I am a student of the Beast Taming Department. Yesterday, I lost an Interstellar Tornado Totoro on the field. It looks very cute. The picture is attached below. If you see it, please inform me. There is a reward of 500 credits!”

” P.S. Please don’t go up and pet it just because it’s cute. It has a bad temper and can transform. It’s super painful when it hits people!”

“The water pipe in the dormitory is broken. Is there a little brother who knows how to fix the water pipe? Requirement: height 180cm, eight-pack abs, masculine appearance with a good waist. Reward: 250 credits!”

“P.S. Remember to wear the repair tools and ask me for reimbursement!”

“Are there any archaeologists? A few days ago, I discovered a historical site while carrying out a mission for the Military Committee. I brought back a few stone slabs with strange patterns carved on them...If there are any students who can interpret the contents on it and gain anything in the future, I’m willing to split it 70 – 70!”

“PS: Reward: 10 points. Don’t bother me, scammers and beggars. Otherwise, the consequences will be very serious!”

“Teacher Li Jianfei from the 7th grade class 3 of the martial arts department has issued a reward: “If a student runs into a martial arts student named Wu Shangpin outside, remember to help me catch him. This kid skipped my professional class and snuck out to give a gift to the goddess. The reward is 600 credits!”

“P.S. Although it’s not good to say it here, I still want to give you a reminder: A bootlicker will die a horrible death!”

The missions on the screen came into view one by one.

Li Yueming was stunned for a moment.

What the f \* ck was this?

Were the teachers and students of the Ultimate Martial Arts Academy so lively?

He flipped from top to bottom and realized that the campus missions were basically trivial. Of course, this was not entirely accurate. Some of them were somewhat difficult, but most of them were not dangerous or difficult.

It was no wonder the artificial intelligence would recommend new students to do campus missions.

Li Yueming didn’t have much interest in these things, so he switched to the military commission missions and agency missions.

Compared to the messy school missions.

The missions of the military commission and the organs were much more formal.

[Military commission mission: ]

“Assist the Military Committee in investigating the resource issues on planet 6-43962. The risk factor is three stars!”

“We need ten people above level 6!”

“Bounty reward: 50 bottles of high-grade nutrient solution, one high-grade martial arts technique, 5000 credits!”

[Mission: ]

“Assist the Imperial Sun Education Bureau in supervising the third Martial Arts Academy assessment. The risk factor is one star!”

“We need twenty Level-5 martial artists!”

“Bounty reward: 30 million universe dollars, 1500 credits!”

After looking at the mission system from top to bottom, Li Yueming basically had a more comprehensive understanding of the Ultimate Martial Arts School’s mission system.

This mission hall should be the biggest reason why the Ultimate Martial Arts School was more than one head above other schools.

After all, while the other students were still studying hard in school, the students of the Ultimate Martial Arts School had already begun to solve problems for the military and the government.

Therefore, students who graduated from the Ultimate Martial Arts School were born with a higher starting point than students from other schools.

Chapter 852: A Licker Will Die a Bad Death!(2)

Some of the top students had even been appointed by the military committee or some special agencies on the Imperial Sun Planet before they graduated. As soon as they graduated, they could immediately be promoted to a high-ranking officer or a government official.

In addition, over the years, the students of the Ultimate Martial School had formed a huge political force in the government system of the entire Emperor Sun Star Field. The students who graduated from the Ultimate Martial School would naturally be taken care of by them, and their promotion speed would be much faster than the students of other schools.

This was one of the reasons why tens of millions of geniuses had tried their best to enter the Ultimate Martial Arts School.

Of course, these were not important to Li Yueming at the moment. After all, he was now a Mechanic student. As long as his level was high enough and his skills were good enough, he did not have to worry about resources and credits.

If the other departments still had to accept missions in the mission hall, then he didn’t even have to think about it. There would be people like Hans from the Military Committee’s logistics department who would come to him and beg him to help repair the damaged machinery.

He looked away from the mission hall.

Li Yueming turned his head and walked upstairs. His main purpose here was to assess and register his personal information. Then, he turned to the factory to study the military weapons of the Mechanic class.

The reason why he stopped at the mission hall was to figure out the logic of the Ultimate Martial Arts School.

After all, it was impossible for him to stay in school for several years and not even know what the mission hall looked like.

Due to the small number of students, the general department of the Mechanic Department was located on the top floor of the general administration building. Li Yueming finally found the place, but there were only a few dozen staff members at the counter.

It was a completely different scene from the other departments downstairs.

After handing over his identification and informing him of his purpose, the staff gave him a test question. Under the supervision of several teachers, Li Yueming spent about two hours to successfully answer it.

The teacher took it over to check it and then graded it on the spot.

After spending the entire afternoon, he finally managed to get his Intermediate Mechanic certificate.

Li Yueming didn't complain much about this.

After all, the assessment system was a part of the public system of Emperor Yang Star Field, so the speed was already quite fast. If it was an assessment outside, it would take at least ten days to half a month.

Li Yueming heaved a sigh of relief after receiving the certificate. He couldn't wait to return to the Mechanic class to start his new research.

However, just as he passed by the mission hall again, a puzzled voice suddenly came from not far away."Li Yueming?"

Hearing someone call his name, Li Yueming was a little confused. After all, he didn't know any other friends in this place except for Liang Run and Suraman.

However, he still stopped in his tracks and looked in the direction of the voice.

He saw Flay standing in front of the electronic display screen not far from the exit of the mission hall, looking at him in surprise.

So it was her...

That's right. Other than her, there shouldn't be any other students in the school who knew him.

Flay was wearing a black coat, which made her snow-white skin look even whiter. If Li Yueming didn't feel that her exaggerated measurements were eye-catching when he saw her last time, then today he finally saw what it meant to have a perfect figure.

Forcefully shifting his gaze away, Li Yueming revealed a smile and said,""So it's you. What a coincidence!"

Flay looked at him from head to toe and asked with some doubt, "Have you really become a Mechanic student?"

When Li Yueming first entered the school, it was Flay who took on missions to bring him around the school environment. At that time, Flay had already heard that Li Yueming wanted to go to the Mechanic Department.

It was just that she did not believe it at that time.

After all, Li Yueming scored more than 27,000 points when he entered the school. He could be considered the strongest freshman that the entire martial arts academy had taken over in so many years. Even before he arrived, there was already a wave of discussion within the martial arts academy.

With his talent in the martial arts department, how could a group of teachers who had been waiting for him for a long time let him go to the mechanic department?

However, what happened next was that many teachers of the martial arts department had waited for a long time, but in the end, this super freshman who was destined to be extraordinary did not come. A few anxious teachers had gone to the Education Department and the principal's office to ask, but they did not get anything.

Both the principal and the dean kept Li Yueming's information a secret.

Even though the group of teachers were already so anxious that they were blowing their mustaches and glaring at them, they did not reveal a single word.

This matter also caused a lot of discussion among the students of the martial arts department. In the end, many people suspected that Li Yueming might have been intercepted by martial arts schools in other universes.

Otherwise, the principal and the dean wouldn't have been so secretive and kept their mouths shut.

However, Flay knew that it wasn't that Li Yueming hadn't entered the Ultimate Martial Arts School. After all, she was the one who had received Li Yueming back then. Now that Li Yueming had clearly entered the Ultimate Martial Arts School, but hadn't come to the Martial Arts Department, there was only one possibility. He could only have gone to another department.

However, Liang Run had already called her to remind her not to reveal any information about Li Yueming.

Because of this, although she was a little curious, she didn't probe further and didn't reveal the news to the public.

Now that she saw Li Yueming again, Flay's face was filled with surprise.

Hearing her question, Li Yueming thought about it and didn't hide it. After all, there was nothing to hide from him. He nodded and said, "Yes, I joined the Mechanic class and am now an official Mechanic!"

Flay looked around. The hall was surrounded by students who had come to accept missions. There were also many people looking in her direction.

There were too many people in public, and there might be trouble. Therefore, she took the initiative to suggest, "Do you have time now? Find a quiet place to chat?"

Li Yueming was a little hesitant when he heard that. In fact, all he wanted to do now was to go back and study weapons.

However, the problem was that Mechanic was a very reclusive profession, and he didn't have much time to find out about the outside world. Flay, who was a friend he nodded at, was still quite precious to him.

After all, he didn't want to stay in school for a few years and end up becoming a shut-in who had no communication or information channels.

After some consideration, Li Yueming didn't refuse. He nodded and said, "Okay, but I don't have much time. Let's find a coffee shop nearby and chat."

Flay didn't have any objections. The two of them left the mission hall one after another.

After they left, a few students who were pretending to check the mission immediately turned their heads.

Although they were quite far away, they didn't hear what Flay and Li Yueming were saying, but the two of them kept glancing at Flay from the corner of their eyes.

At this moment, seeing Flay leave the mission hall with an unfamiliar man, one of the boys couldn't help but rub his teeth and say angrily, "Our martial arts department's campus belle actually left with a man? Who was that man? Which faculty was so bold! Send it to the campus network. I want all his information in five minutes!"

Beside him, another boy could not help but hold his forehead and say, "Aren't you afraid of being slapped to death by Flay? Why do you have to do this?"

The boy gritted his teeth and said, "You don't understand. If I can't obtain it, others can forget about obtaining it..."

As he spoke, for some reason, the boy's eyes couldn't help but moisten. He wiped his tears and said in a daze, "Sob, sob, sob, my goddess, tell me you didn't do it willingly..."

Seeing his heartbroken look, the other boy beside him was speechless.

Teacher Li Jianfei's words made sense. A bootlicker would indeed die a horrible death...

#### Chapter 853: Critical Situation

He left the government hall with Flay. Li Yueming didn't know if it was an illusion, but he felt that the attention he received along the way was a little too high.

Halfway through, he couldn't help but stop. He scratched his head and asked in confusion, "Is there something on my face?"

Flay didn't reply immediately. She glanced at the envious and jealous students around her and shook her head slightly. "There's nothing on your face, but I'm afraid there's something on my face..."

Li Yueming finally found the problem and said with a toothache, "The attention you receive from the student community... Is it very high?"

When Flay had brought him around the school, the two of them were mostly on the spaceship.

Thus, he had never considered the possibility of such a problem.

But now, Li Yueming finally realized that with Flay's perfect figure and exquisite appearance...It would probably attract a lot of attention from the student community!

And now that he was swaggering around with Flay, he reckoned that he was most likely targeted by other students as a love rival.

Flay didn't answer but changed the topic."It's fine. Let's change our route."

As she spoke, she took the initiative to lead the way and left through the small path beside the comprehensive teaching building.

Li Yueming scratched his head and could only follow.

Although he could still feel some strange gazes when he walked on the small road, he did not have the feeling of being watched all the time like before.

The two of them walked for about ten minutes before they finally stopped in front of the cafe where they first met.

This cafe was located in a remote area and its business was average. It was quite suitable for chatting.

After entering the cafe, Li Yueming couldn't help but heave a sigh of relief. He smiled and said,"Looks like I've become the public enemy of all the boys today. You're a martial arts student, right? I didn't expect her popularity to be so high..."

As he spoke, he felt that his words seemed to be a little ambiguous, so he hurriedly added,"But with your figure and appearance, it's very normal."

Fortunately, Flay didn't care. She sat down and ordered two cups of coffee. Then, she said apologetically,"I'm sorry, I didn't think that I would be noticed by so many people. If this matter affects you or troubles you in the future, you can inform me to deal with it."

Li Yueming shook his head.

He wasn't so narrow-minded. Moreover, Flay really didn't mean it, so he couldn't be calculative about this.

Not long after they sat down, the waiter served the coffee.

After the waiter left, Flay went straight to the point."Did you really join the Mechanic class and become an official Mechanic Trainee?"

Li Yueming took a sip of coffee, and the bitter and mellow taste spread on the tip of his tongue. He nodded and said,"That's right, I'm now an official Mechanic. Is there a problem?"

Flay's gaze was a little complicated. After a long while, she shook her head and said,"Of course, no problem...I'm just a little surprised. You're clearly so talented in martial arts, so why did you have to join the Mechanic class?"

She was obviously very confused about this.

Of course, she might not be the only one who had doubts about this. If this news were to spread, the entire Ultimate Martial Arts Academy would probably be discussing it.

After all, Li Yueming's martial dao talent was too good. It could be said that it was rare to see one in thousands of years.

With such talent, it was a pity that he didn't work hard to shine and instead changed to another class that was completely unrelated.

Li Yueming didn't know how to explain her doubts.

He couldn't say that he was a cheat player and didn't care about his so-called talent!

Therefore, after thinking for a long time, he could only make up an excuse. "If there must be a reason, love might be the most important factor? After all, I've liked machinery since I was young, and I don't like fighting and killing!"

Hearing his explanation, Flay fell silent, her expression complicated.

After a long while, he forced a smile. I see. I've been presumptuous."

She paused for a moment before she suddenly continued, "I believe that there were teachers from the martial arts department who advised you before me, right? However, even so, I still want to say a few more words..."

"The current situation of the war is really not optimistic. The Zerg race has already occupied an all-round advantage in the first, second, and third universes...Although the Alliance of Law and Order would not be defeated in the short term, it would only become more and more difficult in the long run."

"In such a disaster that engulfs the entire universe, talented and capable warriors are needed to bravely advance, and you... He should be one of the most talented martial arts geniuses I've heard of so far. Isn't it a little too sloppy to give up on the path of martial arts like this?"

"Even the Mechanic class is also a good class...But have you ever thought about it? One day, the Zerg army would descend on the universe you lived in and destroy the planet you were familiar with...But you can only watch from afar. You can't protect yourself or anyone else."

"It's too late for me to regret it again. I might be a little emotional when I say this, but you should understand what I mean!"

Flay said a lot in one breath. She seemed to have lost her composure.

If it was under normal circumstances, she would definitely not say this.

However, part of Li Yueming's experience was too similar to hers. It was like looking at Li Yueming now was like looking at her past self.

Chapter 854: Critical Situation (2)

If reality was a mirror, then the current her was the person in the mirror. Her heart was filled with broken cracks, and blood was still oozing out of her wounds.

Her name was Surna and Rei. She was born in the distant first universe. The planet she was on was the outpost area of the war between the Order Alliance and the Zerg.

As early as 20 years ago, she was still living a carefree life on her mother planet, enjoying the love of her parents and clansmen.

Under normal circumstances, she would have lived like a princess for the rest of her life.

However, all of this changed one day. She was still underage and was tested to have extremely powerful martial arts talent.

Discovering that she has talent, later, for the sake of being able to make her grow up as soon as possible, in the past, she dotes on her incomparably, parents and clansmen start to recruit many martial artists for her to act as teachers, and no longer like in the past, she is obedient and obedient, doting on her incomparably.

She was used to living a luxurious life and living a life of holding precious jade in her hands. Naturally, she was not used to this sudden change.

After learning the technique for a period of time, he decided to give up on himself.

The more her parents asked her to study hard, the more she would neglect her proper work and waste all her talent and talent on things that had nothing to do with martial arts.

At that time, she was full of disgust for martial arts. Whenever she heard someone mention the word "martial arts" in front of her, she would show disdain and vomit.

Later on, her parents and clansmen realized that she really hated martial arts so much, and they gradually gave up on the idea of continuing to nurture her.

At that time, she was filled with pride and pride. He thought that he had won the final victory in this silent war.

Little did she know that it was this incident that had caused her a wound that she would never forget for the rest of her life.

A few years later, the planet she lived on was destroyed by the Zerg, and at the last moment, she was sent away from her mother planet by her grandparents and parents through special means.

She had witnessed the death of her parents and relatives, as well as the destruction of that familiar yet unfamiliar planet.

Her deep-rooted hatred drove her to kill the culprit who destroyed all her good things, but the powerless reality slapped her hard.

She did not have the power to take revenge...

It was only at this moment that she finally understood why her parents and clansmen had suddenly changed their attitudes when they heard that she had martial arts talent.

Fate was left for the strong to grasp. The weak who had nothing could only watch everything happen helplessly.

And she clearly had the potential to become a powerhouse, and had the opportunity to control the fate of herself and her people.

However, she did not catch it. Not only did she not catch it, but she even threw it away like a pair of worn-out shoes.

This was the pain she had hidden in her heart for the rest of her life, filled with regret and unwillingness. It was only after she had wandered around and arrived at the Ultimate Martial Arts School that she slowly walked out of the pain and began to grab everything she could to take revenge on those people who had destroyed all the good things in her life.

The past couldn't be changed, but there was still a chance to prevent this from happening in the future.

This was also the biggest reason why she lost her composure after Li Yueming gave up on the Pugilist class and chose the Mechanic class.

She didn't want Li Yueming to experience this kind of unforgettable pain one day in the future.

Li Yueming didn't know why Flay was so agitated. After all, he just didn't want to reveal his true feelings and made up an excuse.

However, at this moment, her slightly red eyes revealed a deep sorrow.

Perhaps it was because he had triggered some unbearable memories...

After thinking for a while, Li Yueming comforted her, "I understand what you mean, so I haven't completely given up on martial arts. I just want to try the Mechanic class. If it doesn't work, I'll still come back!"

Of course, even though he said that, it didn't make much of a difference for him to stay in the Mechanic class or return to the Pugilist class. It was just that the focus was slightly different.

The reason why he replied like that was to calm Flay down.

Hearing his comforting words, Flay was still very depressed. After a moment, she replied, "I'm sorry, I lost my composure... I just hope that you can grasp what you can grasp. Don't be like me in the past, helplessly watching regret happen!"

Li Yueming was a little curious about what happened to her, but after thinking about it, he didn't ask.

After all, some things were only suitable to be buried deep in the heart. Every time they were mentioned, it was necessary for the person involved to tear open the healed scars and show their bloodiest side.

Although Li Yueming was curious, he didn't want to touch Flay's wound.

Flay didn't elaborate on this and took the initiative to change the topic. "You are currently in the Mechanic class. Are you here to accept a mission? If it's a mission, I might be able to provide you with a few more suitable ones!"

Li Yueming did not hide anything and replied, "I'm mainly here to handle the Mechanic Level Certificate. I just happened to pass by the government hall and took a look at the missions inside!"

Flay was not surprised.

After all, Li Yueming had just entered the school and had already obtained more than 20,000 credits, close to 30,000 credits. He didn't need to worry about whether he could gather the credits

needed for the first semester of this year like other new students. Therefore, it was normal for him to not be in a hurry to accept the mission.

However, she still kindly reminded him, "If you have time, you should take a look around. Even if you don't come to the government hall, you can still go to the student forum. If there are suitable missions, you can consider doing a few more. This way, you won't have to cram at the last minute in the next few semesters!"

"The school is very strict with the management of points. Even if you are a one-in-a-million genius, if you don't have enough credits, you will still face a very serious outcome. Moreover, credits can also be exchanged for resources in the school, which is even more useful than Universe Credits!"

Flay was a student of the martial arts department, so she didn't know much about the mechanics department.

He thought that the Mechanic class was the same as the Pugilist class, and that they also needed to complete missions to obtain points.

Of course, her understanding was not wrong. After all, the school would not specially open a backdoor for the Mechanic Department. It was just that the Mechanic Department had an additional way to earn credits than ordinary students, which was through logistics, maintenance, and research.

Li Yueming didn't say anything and nodded. "Thank you for your reminder, Senior Sister, but I don't have time for the time being. I'll arrange and allocate my time properly when I'm free in the future!"

Flay nodded and looked at the time. She stood up and said, "If that's the case, then I have nothing to say. I've accepted an investigation mission and have to go out for a period of time. If you have any questions that you need to answer, you can send me a private email."

The two of them had already added their contact information last time, but because they were not too familiar with each other at that time, they did not have much contact.

Now that they had met for the second time, they seemed to be much more familiar with each other.

Naturally, Li Yueming did not refuse.

After waving goodbye to him, Flay stood up and left the cafe.

Li Yueming didn't leave, he felt that the coffee in this cafe tasted pretty good, he was ready to savor it before leaving.

However, not long after, he heard the sound of fighting coming from outside.

He stood up and walked out of the shop. He saw that Flay had already knocked a few boys to the ground. She said coldly, "Where are you guys planning to follow me? Get lost immediately!"

Her voice wasn't loud, but it sounded very murderous. Even the group of boys didn't dare to make a sound in front of her.

When she saw Li Yueming come out, Flay took the initiative to say, "You go first. I'll deal with the funeral!"

Looking at the few boys from the martial arts department who were lying on the ground with their faces covered in dust, Li Yueming couldn't help but break out in a cold sweat for them. He didn't want to drink his coffee anymore and hurriedly ran away.

It could only be said that Flay was really loyal. She suppressed the trouble she caused herself and didn't want to implicate and affect Li Yueming.

However, Li Yueming's action of turning around and running away was very underhanded in the eyes of the other martial arts students.

He even dared to go on a date with Flay. Wasn't he a little manly? He dared to do it, but he didn't dare to!

Chapter 855: Weapons Factory, Famous

After parting ways with Flay in the cafe, Li Yueming did not waste any time and returned to the Mechanic factory without stopping. Now that he had obtained the Intermediate Mechanic certificate, he was qualified to go to the weapons factory alone to conduct experiments.

Of course, with his current level, he could only enter the most basic weapons factory. The weapons that he could research would not be too powerful.

If he wanted to get permission to study those behemoths that could easily destroy planets, he had to officially become a battle mechanic.

The Military Committee was very strict in this regard.

If it was outside, an ordinary Intermediate Mechanic would not even think about touching a weapon's parts. At most, they could only repair some messy low-level machinery to accumulate experience.

Only the Ultimate Martial Arts School could enjoy some special treatment.

If there was an instructor leading the way, Li Yueming could even follow them to the weapons factory for a tour.

Of course, that was the extent of the privilege.

If one really wanted to study it, the requirements in all aspects were quite strict.

After all, a problem in weapon research was not as simple as an accident in the maintenance of a spaceship. If something went wrong with this thing, it would really cause huge consequences.

When Li Yueming took out his ID and handed it to the soldier standing guard at the weapons factory, the soldier looked at the young and immature Li Yueming and then looked at the Intermediate Mechanic ID in his hand. He checked it several times at the inspection area and only let him go after making sure that there were no mistakes.

In the entire Imperial Sun Martial Arts Academy, the Mechanic Department should be considered a very special major.

Most of the students from other majors were attending classes in the teaching building, and the surroundings of the teaching building were also very lively.

Only the Mechanic class was different. The teaching block was cold and empty. There were not many people in the building.

When Li Yueming went to the weapons factory to take a look, he realized that a group of students were all working in this place.

It was no wonder that the Mechanic class was becoming more and more unpopular.

After all, which young man didn't dream of becoming an omnipotent hero who could tear apart the Zergs with his bare hands?

It was not cool at all to go to the factory to fix screws.

Therefore, whenever the Pugilist, Esper, and Psychic classes shone during the mid-term exams, the Mechanic class seemed even more indifferent.

To become a powerful and mature Battle Mechanic, one needed not only talent and comprehension, but also a heart that could endure loneliness.

The number of students in the weapons factory was relative.

In fact, there were only a few dozen people in the huge factory.

Of course, it could also be because the level requirement for Mechanics here was relatively high, and other students who were not qualified could not enter.

When Li Yueming stepped into the factory, many students stopped their work and looked in his direction.

There was nothing he could do. There were only a few students in the Mechanic Department.

The number of students who could enter the weapons factory was even fewer. At most, there were no more than 150 of them.

In such a small circle, they would see each other every day, so they were already familiar with each other. Now that a new face like Li Yueming suddenly appeared, it naturally attracted the attention of the students.

Li Yueming didn't care about this.

He looked around and came to a huge cannon. He knocked on the steel pipe with his hand and listened to the dull sound coming from inside.

Ever since he obtained the shiny gold talent from the Machinery God, Li Yueming felt that his taste had changed.

In the past, although he was interested in machinery, he would never treat it as his main profession.

After all, his foundation was still on martial arts.

The reason why he had poured all his effort and resources into the development of the Starmoon Art was because he wanted to push his personal power to the extreme.

However, ever since he had the Machinery God's talent, the way he looked at mechanical parts was completely different from before. The shiny metal parts always gave him the feeling that they were part of his body.

It was as if the mechanical parts would listen to his instructions and change into any shape he wanted, adding any function he needed.

This was a very strange feeling.

It was as if his body had extended for no reason, like invisible tentacles that enveloped the entire direction of his senses.

Therefore, when he told Flay that he had chosen to join the Mechanic class because of his love for machinery, it was only a crude excuse, but it was not completely false.

Seeing that no one greeted him after he entered, two students from the Mechanic Department walked over.

One of them, a tall and skinny young man with slightly curly hair, asked, "I've never seen you before. You must be the new junior, right? My name is Flender, Star Sea Calendar year 7413 senior."

Hearing the sound, Li Yueming turned around.

When he realized that it was a senior who took the initiative to greet him, he smiled and said politely, "Hello, senior. My name is Li Yue. I'm indeed a new student. This is my first time coming to a weapons factory!"

The reason why he changed his name to Li Yueming was because Sulaman had specially called to remind him.

The military committee had already destroyed all his information and would check all information related to him on the entire network. Any sensitive information would be clear.

Of course, it was to facilitate his daily activities.

Chapter 856: Weapons Factory, Famous Outside (2)

The Military Committee had also forged a file for him, and his identity in the forged file was Li Yue.

It was also because of this that Li Yueming introduced himself.

Next to Flender stood a round face slightly plump youth, at this moment looking at Li Yueming with a face full of suspicion for some reason.

This made Li Yueming's heart thump.

Previously, Suraman had promised him that he would block all information about him outside.

In the end, it had only been a few days. Would he be recognized as soon as he reported his alias? Then what the f \* ck was that!

Just as Li Yueming was muttering to himself, the chubby young man with a round face stared at him for a while and suddenly said, "You can't be that person, right?"

Li Yueming's expression was a little ugly. He had almost pulled Suraman out to greet him several times in his heart. Was this wretched old man reliable? It would be awkward if he was caught lying.

The corners of his mouth twitched. He took a deep breath and said, "You must have found the wrong person. I'm not the person you know!"

Seeing him deny it.

The round-faced fatty was even more certain. He said loudly, "I'm not mistaken. You're the pretty boy who went on a date with the martial arts department's school belle this morning! F \* ck... I didn't expect it to be our Mechanic class warrior. He's the one who got the melon. As expected, heroes come from young people!"

Li Yueming, [Concealment.]

What a waste of my expression!

He thought that his identity had been recognized.

He didn't expect the trouble to be caused by drinking coffee with Flay in the morning.

However, thinking about it carefully, there was no problem.

After all, even though he had obtained unprecedented results in the entrance examination, the students of the Ultimate Martial Arts School had never seen him personally. Although the name "Li Yueming" was often mentioned in the past, no one had actually seen his photo.

Most of the students just followed the trend and sighed.

In the beginning, they might have been very interested in this upcoming junior, but after so long, there was no news from Li Yueming. Even the teachers of various majors were silent about this.

The students had long thought that Li Yueming had been poached by another school.

The discussions about him naturally plummeted.

As long as Li Yue Ming didn't announce her name in public, she wouldn't attract any attention.

Just as Li Yueming was deep in thought, the Mechanic students who were busy with their research suddenly quieted down.

A moment later, a Mechanic student who was closer suddenly said, "F \* ck, is that true? The Xiaobai who hooked up with the martial arts department's belle... No, the warrior is a freshman of our Mechanic class?"

His exclamation woke up all the students in the factory.

Immediately, a group of students gathered together and surrounded Li Yueming.

A student asked curiously, "Junior, tell me how you managed to woo her. The girls in the martial arts department are all hot-tempered, especially that department belle. I heard that many of her pursuers had their legs broken by her!"

Another student exclaimed, "Brother, you're too brave. You dare to step on the Thunder Martial Arts Department with your small arms and legs. You're really not afraid of death. However, I support you. If there are guys from the Martial Arts Department who find trouble with you in the future, just tell them my name!"

A student rolled his eyes. "Come on, junior, don't be fooled. If you say your name, the martial arts students might just beat you up. If you say this guy's name, it'll be bad. I'm afraid everyone will hate you!"

The astonished student said angrily, "What are you talking about? What do you mean by being hated by everyone? Go and ask around. Who in the martial arts department doesn't know my name?"

Hearing this, the students rolled their eyes even more.”Come on, Wu Shangpin, the reputation of our Mechanic class is ruined by a guy like you. It’s your fault that we can’t find a girlfriend!”

Seeing that the few of them were talking one after another, there was actually a trend of internal strife in the end.

Li Yueming couldn’t help but feel his scalp tingle. He smiled awkwardly and said, ”Uh... I appreciate everyone’s kindness, but Flay and I really aren’t in the kind of relationship that you think we are, so can we stop this topic?”

The boy named Wu Shangpin walked over and patted Li Yueming’s shoulder. He said with an ” I understand ” expression, ”It’s okay. Isn’t it just love but can’t get it? I understand you, but our Mechanic class is full of potential. Let’s let their Pugilist class barbarians run for a while first. When we become Battle Mechanics, we’ll hang them up and hammer them!”

It wasn’t... What do you know?

What did it mean to love but not get it?

Where did you get the f \* cking idea that I can’t have someone I love?

But why did the name Wu Shangpin sound so familiar? He seemed to be the dead bootlicker who had been captured by the Mechanic teacher in the Mission Hall.

You’re a bootlicker, but I’m not!

Li Yueming Ming’s shoulder slipped, and he was determined not to put his arms around this guy’s shoulder and call him brother.

In the end it was Flender who helped him out, saying: “Ignore these guys who have never dated before. Our Mechanic class is dirty and tired, so there aren’t many girls. Many of them are single dogs who hug steel plates and mechanical parts to sleep. It’s normal for them to have some perverted hobbies!”

Li Yueming,[Concealment.]

Was it really okay to even curse at her?

Sure enough, Flender’s words aroused public outrage.

Fortunately, Li Yueming had already predicted this outcome in advance. He slid out of the crowd like a loach.

He turned around and saw that these guys were still holding all kinds of parts and tools and cursing. It seemed like they were going to start fighting mode if they didn’t agree. He couldn’t help but quickly run away.

He could be considered a professional fighter, so he had no interest in participating in a fight between a group of Mechanics.

After getting rid of the crowd.

Li Yueming looked up at the machinery factory that specialized in the development and manufacture of low-end weapons. There were all kinds of firearms, bullets, armored vehicles, and other armed facilities.

Most of these were weapons on the surface of the planet. Strictly speaking, they had been eliminated by the increasingly developed interstellar society.

However, this group of students who were not even Advanced Mechanics could only come into contact with this type of weapon.

It couldn't be helped. The destructive power of higher-level weapons was too powerful.

If there was any accident in the experiment, the entire Ultimate Martial Arts School would be in trouble.

Only the weapons on the surface of these planets had simple structures and were easy to control. Even if there were any experimental accidents, it would not cause too much of a negative impact.

Although his level was low, this was still new to Li Yueming.

After all, in his previous reincarnations, the highest level of civilization he had come into contact with was limited to the planet's surface civilization.

However, compared to the ordinary firearms he was familiar with, the weapons developed by the interstellar society were many times more powerful.

It was not only about power and range, but also the intelligence of the weapon.

The two sides were not in the same concept.

Without much hesitation, Li Yueming walked forward and picked up a gun that was full of technology. The moment he picked up the weapon, the independent artificial intelligence checked his qualifications. After confirming that there were no problems, he took the initiative to introduce it, "The gun you are holding is called Death God Tom Version 3.0!"

"This is a large-caliber sniper rifle with a maximum range of more than 5 kilometers. The bullets are equipped with an automatic adjustment function. It can be equipped with metal, solid titanium, visible light, and other ammunition. Its destructive power is extremely shocking. Even at the limit of 5 kilometers, it can easily kill level 2-3 non-defensive Zergs!"

The maximum range was over five thousand meters, and the bullets were equipped with automatic calibration-mode, which was extremely powerful.

Most importantly, it was very light.

This was Li Yueming's first impression of the sniper rifle called Death God Tom.

Chapter 857: Advanced Training, Advanced Mechanic (1)

Although this type of surface weapon was not very practical in large-scale interstellar battles, it was very powerful in small-scale local battles on the surface.

This was also the reason why it could appear here.

After all, no matter how unpopular the Ultimate Martial Arts School's Mechanic Department was, the students there were still geniuses that the outside world fought for. The resources allocated to them by the school were naturally of the highest quality.

In an ordinary school, only a few students would be qualified to come into close contact with such a gun. However, in the workshop of the Ultimate Martial Arts School's Mechanic class, it was as common as cabbage.

Li Yueming took the gun. After unlocking the usage rights, he took it to the specialized shooting center.

It's better to try than to hear a hundred times.

To become a Battle Mechanic, not only did one have to design and assemble their own weapons, but they also had to have a sufficient and deep understanding of the performance of various weapons.

Now, Li Yueming had to familiarize himself with the assembly.

Before Sulaman returned, he wouldn't be able to improve his Mechanic class quickly. He might as well use this time to study weapons and prepare for future battles.

In the following period of time.

Li Yueming lived in the martial arts department's factory every day, studying all kinds of firearms and weapons day and night.

In the beginning, a few seniors would tease him.

After all, it wasn't easy to get a new face, and he was even entangled with the beauty of the martial arts department. Li Yueming could be considered a famous person in the Mechanic department.

However, when they realized that Li Yueming was really focused on researching all kinds of firearms and weapons, the surrounding seniors did not disturb him anymore. However, they would still pay attention to him occasionally every day.

As time passed, the world went by.

The seniors from the Mechanic Department were stunned.

This new junior was like a ghost. He got up early in the morning and worked until late at night. When they went back to the dormitory to sleep, he was still dismantling various weapons to study their internal structure.

The key was that Li Yueming was already busy when they came back the next day.

This gave them the illusion that Li Yueming had been working 24 hours a day without rest.

Was he still human?

Twenty-four hours a day, even if he was just sitting on the spot and fixing the screws, he would be exhausted. Not to mention that Li Yueming was still dismantling and assembling all kinds of high-precision weapons, which required a high level of mental strength.

Under normal circumstances, the human mind could not withstand such a high-load and high-intensity work, right?

A few seniors from the Mechanic Department who often worked overnight like Li Yueming were even more dumbfounded.

They thought that they were already curly enough.

Every day, he would stay up all night to study until 12 o'clock in order to enter the next stage faster.

In the end, they did not expect that there would be someone even more curly than them.

Did Li Yueming have a 24-hour wheel rotation?

Of course not!

After all, he was still a human, and he had his limits. But even if he didn't have 24 hours, he definitely had 18 to 20 hours of work.

Many Mechanic students could not understand how he could be so focused and energetic.

At the same time, what was even more unbelievable was the speed of Li Yueming's improvement in weapons. From the beginning, he obviously knew nothing, but after a few days, he became more and more proficient.

After a few days, he became more and more skilled, and after a week, he could disassemble and assemble himself.

In less than ten days, he had completed the structural knowledge that many Mechanic students would not be able to learn in a month or even half a year. Without any instructors teaching him, his progress was unbelievable.

On the 10th day, Suraman finally came back from his business trip on Planet Diyang. He looked for Li Yueming in the dormitory and factory, but he couldn't find him.

Suraman checked Li Yueming's recent activity records and found out that he had gone to the weapons factory.

When Suraman arrived, Li Yueming was assembling and adjusting a portable automatic rifle.

Looking at Li Yueming, who was already very familiar with the structure of the gun, Suraman couldn't help but feel a sense of defeat.

After all, he was the teacher, and Li Yueming could learn all kinds of Mechanic knowledge without him teaching him at all. How could he, as a teacher, put his face down?

Fortunately, Sulaman was already mentally prepared, so he took a deep breath and said, "Your identity file has been completely destroyed, and even your communication signal has been encrypted to the highest level of security. In the future, other than not revealing your real name, you basically don't have to worry about anyone finding out your real information!"

Hearing his voice, Li Yueming turned around, put down his gun, and smiled. "Thank you for your guidance, Teacher!"

Hiding his personal information didn't really matter to him. After all, from the moment he came to this world, he was already mentally prepared to face all enemies.

However, hiding his personal information was a huge guarantee for the safety of his uncle, aunt, and Li Linglong.

After all, no one could guarantee that the lackeys and traitors would not attack Li Yueming's family when they could not do anything to him.

Hearing his answer, Suraman sighed and said sincerely, "Not really. I just hope that I can do something for you. Besides, even without me, your information will still be top secret."

#### Chapter 858: Advanced Training, Advanced Mechanic (2)

He didn't reveal that Commander Wu had received a higher-level order. He didn't want to take credit for it, but he simply didn't want Li Yueming to be under too much pressure.

After chatting for a while, Sulaman took the initiative to say, "Come back to the factory with me. I will personally teach you all the knowledge I am proud of!"

Now, Sulaman had completely accepted Li Yueming and regarded him as the last disciple who could inherit his legacy.

Li Yueming didn't delay. He put down the weapon in his hand and followed Suraman.

Looking at the backs of the two of them leaving, the surrounding students could not help but surround them and say in shock, "Is this Teacher Sulaman? That Li Yue is his disciple?"

"F \* ck, no wonder this guy is so abnormal. His master is awesome, and so is his disciple!"

"I heard that Mr. Suraman has been in the school for more than 30 years and has never made a mistake in repairing all kinds of weapons and spaceships for the military. Is this true?"

"It can't be any more real. Teacher Suraman is definitely the most knowledgeable Battle Mechanic in the Ultimate Martial Arts Academy. Unfortunately, I don't think I've ever seen him pilot his own exclusive mech..."

The group of students looked at the departing figures of the two, their eyes filled with envy and amazement.

After all, advanced Battle Mechanics like Suraman were usually very busy and would not recruit students under normal circumstances.

Only a very small number of talented newcomers had the opportunity to become his disciples, and such geniuses were often ten or a hundred times stronger than them at the start. How could they not be envious?

For the next half a year, Li Yueming spent his time in the factory learning all kinds of advanced mechanic knowledge from Sulaman.

The content was more complicated and profound than Li Yueming had imagined.

If advancing to Intermediate Mechanic was like a child who had just learned to walk, then Advanced Mechanic had to learn to run independently.

An Intermediate Mechanic only needed to learn how to disassemble and assemble, but an Advanced Mechanic needed to learn how to understand the working principle and develop various practical machines that could work independently.

The Alliance of Law had a variety of high-end technologies and a wide range of design theories. Even Li Yueming, who had unlimited deductions, found it difficult to digest them in a short period of time.

As a result, after spending half a year, he still could not advance from an Intermediate Mechanic to an Advanced Mechanic.

Of course, Li Yueming felt that his progress was a little slow. He had wasted too much time on the Advanced Mechanic threshold, but he did not know that Sulaman's entire body was already numb.

In half a year, Li Yueming was like a sponge that could never be filled.

Fortunately, he had some skills and was very knowledgeable, so he wasn't taken advantage of by Li Yueming.

However, in the second half of the year, looking at Li Yueming who was still full of fighting spirit, Suraman finally couldn't hold on any longer. He said with a painful expression, "You've been in school for so long, but you've never even left the school. I'll give you a break. You should rest well for a period of time!"

Li Yueming said reluctantly, "But teacher, I feel that I can still persist for a period of time..."

A few black lines visible to the naked eye appeared on Sulaman's face. He could not bear it anymore and said, "I told you to rest, so you should rest. Have you gathered enough credits this year? Have you contacted your family? Do you have a girlfriend? There are many beautiful things in life. Don't be obsessed with one moment!"

He had been tormented by Li Yueming to the point of doubting his life. Otherwise, he would not have said such delirious words.

It couldn't be helped. This kid acted as if he didn't know what difficulties were. No matter what problems he faced, no matter what knowledge he taught, this kid could understand and apply them in an extremely short period of time. He could even infer from one example and ask other questions. Sometimes, he was speechless.

That feeling was really indescribable. It was so painful that he could not breathe...

Seeing Sulaman's hopeless expression, Li Yueming nodded reluctantly, "Alright then!"

Speaking of which, it had indeed been a long time since he had come into contact with the outside world. The Mechanic class was like that. Once he invested his energy into research, it was easy for him to become a loner with no information.

The Ultimate Martial Arts School had one semester each year, and the school's standard for him was that he had to have more than 30,000 credits each semester in order to enjoy the various treatments he deserved.

Li Yueming only had 27,000 points, which was 3,000 points away from 30,000 points. Therefore, he had to find a way to get 3,000 points before the end of the year to enter the next semester.

In fact, when he helped the Military Committee repair the spaceship, he should have already saved 30,000 points. However, at that time, Li Yueming had not obtained the intermediate mechanic certificate, so the spaceship was still nominally under the name of Suraman. Li Yueming only

received the resource reward from the Military Committee and did not receive the school's credit reward.

Besides, she had been in school for more than half a year, so it was time for her to go out for a walk.

Thinking of this, he finally stopped stopping Sulaman from torturing him. He nodded and said, "Alright then... But teacher, shouldn't you help me apply for some research funding? The scholarship I had was used up some time ago!"

Suraman was speechless.

This rascal still had to ask him for money to spend when he went out.

Was there still justice? Was there still law?

He looked at Li Yueming and took a deep breath before saying, "I'll personally allocate some funds for you first. When you have any research projects, you can return them to me!"

Hearing this, Li Yueming smiled and said, "Thank you, teacher. Goodbye, teacher. I'll come back to consult you after I rest for a while!"

Suraman's face, which was already dark, turned even darker when he heard that. He gritted his teeth and said, "I'll give you additional funds, but you don't have to pay me back. Just relax. If it really doesn't work... If he really couldn't do it, studying martial arts was also a good direction. After all, the balance between work and rest blossomed!"

During this period of time, he had been tormented by Li Yueming.

Now, whenever he heard Li Yueming mention the word "consult", he would feel a headache coming on.

After bidding farewell to Suraman, Li Yueming returned to the dormitory after a long time. After changing his clothes, he took out his communicator and took a look. Today was May 26th, year 7434 of the Galaxy Calendar.

It had been nearly half a year since he entered the martial arts academy.

During this period of time, Li Yueming was mostly immersed in the sea of machinery, so he basically did not care about everything that happened outside.

Now that he had finally opened his communicator, he realized that he had received a lot of messages.

At the top of the list was a message from home planet 7-20003. Evelyn asked him how he was doing at the Ultimate Martial Arts School and if he needed help from home planet.

In second place were messages from his uncle, aunt, and Li Linglong. They were basically all asking about how he was doing. Only Li Linglong's message was about her college entrance examination in the second half of this year.

After a long period of psychological struggle, she finally chose to learn the secret manual left by Li Yueming. Now, she felt that her strength in martial arts was quite good. She had the hope of replacing Li Yueming as the holder of the special candidate quota for planet 7-20003.

Li Yueming naturally expressed his concern.

If Li Linglong managed to get into an academy on the Imperial Sun Star, then he would have to arrange for his uncle and aunt to stay on the Imperial Sun Star.

After all, a family couldn't be separated by thousands of miles.

40 years later, the Zerg would attack the third universe.

And the planet 7-20003 where he was located would be destroyed.

Although Li Yueming would try his best to rewrite the possible outcome, the initiative of this matter was not in his hands, so he was not 100% sure.

If he could find a chance to bring his aunties to the most well-equipped Imperial Sun Star, it would undoubtedly be safer.

After replying to their messages one by one, Li Yueming's gaze continued to look down.

The next message was from Flay, telling Li Yueming that she had completed her mission and returned to school. At the end, she asked him about his recent situation.

Li Yueming glanced at the date of the message, which was just half a month ago, so he replied, "Recently, I was chased out by my mentor. I'm going to find a mission to earn some points!"

This was because they were in the same Star Field.

The speed of this message was much faster than the previous messages sent to planet 7-20003. In just a few seconds, Li Yueming received a reply from Flay. "You want to accept the mission?" I'm looking for a team. If you're interested, you can come and take a look!"

Chapter 859: Exploration Missions, Extravagant Resources!\_1

Seeing Flay's reply, Li Yueming was a little puzzled. "You just finished your mission half a month ago, right? It hasn't even been half a month. Why are you accepting missions again?"

According to Li Yueming's understanding, under normal circumstances, the gap between the senior students' missions was relatively long.

It was normal for one or two months to pass between the previous mission and the next mission.

After all, many of the missions provided by the Military Committee and the government of the Imperial Sun Planet would take months to complete. Even if there was no danger, it would still consume a lot of energy.

Therefore, after returning to school, the students not only had to digest the rewards from the settlement mission, but they also had to go to the teaching building to make up for a period of time.

There were very few students like Flay who were either on missions or on the road every day.

Upon hearing his question, she didn't hide anything and replied directly, "I want to graduate early and go to the battlefield. Now that I've passed the cultural and practical requirements, I'm only left with credits, so I've been carrying out missions everywhere!"

Hearing this, Li Yueming was stunned and couldn't react for a moment.

Ordinary students would think of ways to stay in school!

After all, he could enjoy all kinds of high-quality resources and treatment in school, and he did not have to take great risks like on the battlefield.

Why was there a fool who was in a hurry to graduate early?

After thinking for a moment, Li Yueming suddenly realized that Flay's reputation in the martial arts department was obviously very popular. As a result, she had only walked with her for a short distance before she was noticed by many martial arts students.

And in a place like the Ultimate Martial Arts School, where beauties were everywhere, even if there were a certain number of suitors, it was absolutely impossible for them to reach the level of being pursued by tens of thousands of people like Flay.

From this, it could be seen that Flay's talent in the martial arts department was absolutely extraordinary.

Otherwise, he wouldn't have been able to convince so many girls in the martial arts department and stand out among them.

Although he did not know why she was in such a hurry to graduate early and go to the battlefield.

However, since they were both geniuses, it was normal for them to have different thoughts from ordinary people.

Seeing that he did not answer, Flay thought that he was worried about something. She could not help but say, "I accepted an exploration mission this time. The mission details are to assist the military committee's senior agent team to collect mineral resource samples from an uninhabited planet on the outskirts of the Turing Star Sector!"

"This kind of mission basically doesn't have much risk, so the level requirement for the students isn't too high. It's just that the time span will be relatively long. It might take two months before they can return!"

"Currently, there are already twelve students who have signed up. Most of them are from the martial arts department. There are still eight empty seats."

Only then did Li Yueming come back to his senses.

Did he have any requirements for the mission?

It seemed like he really didn't have much of a request.

As long as the time span was not a year and a half, there was nothing special to pay attention to.

Now, this exploration mission just happened to satisfy his need to go out and take a look.

Therefore, he did not refuse. Instead, he thought for a moment and said, "Do you have time now? Let's meet at the usual place. I'll make a decision after we talk about the details!"

Flay pondered for a moment and nodded. "Alright then!"

"Thank you," Li Yueming said with a smile. "When I become a Battle Mechanic, I'll make you a Valkyrie armor!"

Regardless of whether she succeeded or not, her heart was still good.

One more friend and one more path was not just for show.

If Li Yueming were to choose a mission himself, he might need to spend ten days to half a month in the mission hall to find a suitable one.

And now, Flay had taken the initiative to share it with him. If it was appropriate, it could save him at least ten days of time.

Flay didn't take his promise of the Valkyrie's mecha to heart. After all, becoming a Battle Mechanic was already a ridiculous thing, let alone helping her make a warframe.

Even if Li Yueming was really willing, it would take decades or centuries.

At that time, it was a big question mark whether she was still alive or not. She smiled and said, "Hurry up. If it's confirmed, I'll have to give you a few days to prepare!"

Li Yueming nodded and went straight to the coffee shop where they first met.

20 minutes later, Li Yueming saw Flay, who was wearing a special agent uniform.

When they first met, Flay had revealed her bust size of 102, and Li Yueming's evaluation was that he couldn't tell.

Then, after putting on this tight-fitting agent uniform, Li Yueming could intuitively feel what it meant to be exaggerated. There was no lack of meat in the parts that should be there, and there was not much fat in the parts that should not be.

This was the most direct comment that Li Yueming could make.

Thinking back to how Flay was a martial arts student, controlling the amount of muscle and fat was a compulsory course. Therefore, if the lack of fat in areas that shouldn't be fat could be attributed to the perfect figure that was cultivated after training, then the impressive bust could only be said to be gifted.

Seeing him staring at her chest in a daze, Flay could not help but say with a cold face, "What are you looking at?"

"Nothing..." Li Yueming replied subconsciously.

Flay didn't say anything more. She just took a sip of coffee and asked after a while, "Have you seen enough?"

Feeling the murderous aura in the air, Li Yueming finally came back to his senses. He scratched his head awkwardly and said, "Hahaha... I'm sorry, I was distracted just now!"

Chapter 860: Exploration Missions, Extravagant Resources!\_2

Flay sneered, but she did not expose him.

Li Yueming didn't continue this awkward topic. Instead, he asked Flay about the details of the mission, as well as the credits and resource rewards after completing the mission.

In the absence of any special danger, the basic rewards given to the students for the exploration missions were about the same. Generally, they would give about 50 bottles of high-grade nutrient fluids, a high-grade martial arts technique, and about 5000 academic credits.

In order to obtain more rewards, the students had to make some special contributions during the mission, such as: Exploring the Star Field to discover special events, collecting new mineral resource samples, avoiding casualties, avoiding the waste of resources of the Military Committee, and so on.

Of course, under normal circumstances, it was already very good to be able to get a guaranteed resource reward.

The special reward depended on luck.

The mission that Flay had accepted was relatively long, requiring two months. Therefore, the basic resource reward was relatively high. There were 55 bottles of high-grade nutrient fluids, a high-grade martial arts technique or a high-grade plant component, and 6000 credits.

Among the normal exploration missions, it was considered a pretty good one.

Even if he wanted to take on those exploration missions with extremely high danger levels and extremely rich rewards, he had to hang them in the mission hall.

This kind of mission was extremely popular under normal circumstances. It was very likely that it would be snatched away by the seniors as soon as it was posted. There was no chance for ordinary students to see it.

Unless he did nothing but wait in the mission hall all year round, high-risk and high-reward missions could only depend on luck.

After confirming that the reward and the time required were within his expectations, Li Yueming agreed to join the team without hesitation and prepared to go to the Turing Star Field to assist in the exploration.

In the next few days, Li Yueming returned to the dormitory to make some preparations.

Firstly, it was in terms of strength.

Li Yueming had basically reached the threshold of a Level Five martial artist. Because of his own martial arts moves, his combat strength was even stronger than that of an ordinary Level Five martial artist.

However, judging from the two official levels of measuring martial artists, the condensation and storage of the mysterious energy of the human body, his strength was actually inferior to a Level Five martial artist.

Therefore, Li Yueming had spent some time in the past few days to improve his flaws.

After all, martial arts was like his backyard to him.

As long as there was enough mysterious energy stored in his body, he could break through without thinking.

During this period of time, although he had been focusing on studying the Mechanic class, the Star Moon Art had never stopped working. The mysterious energy stored in his body had been continuously increasing.

Now that he was free, he only needed to put in a little effort. Breaking through was completely a matter of course.

After breaking through to Level Five, Yue Ming closed his eyes and felt for one or two hours. He was completely familiar with this power that was enough to destroy most buildings on the planet's surface.

If it was in the low-level martial arts world of the past, this power was likely to be the ceiling that martial artists could reach.

However, in this vast and boundless Starry Sea, Level Five martial artists were just starting out in the Martial Arts. Only Level Six martial artists could run amuck in the Starry Sea and barely stand firm on the path of Martial Arts.

After breaking through the martial arts level, Li Yueming went to the Mechanic factory and took a batch of external resources that Suraman had applied for.

In the early stages of the Mechanic class, their combat power was all based on their various firearms.

Suraman asked him to go out, so he naturally had to come with some life-saving measures in addition to cash.

Even though Suraman was a little unwilling to give Universe Credits, he wasn't lacking in life-saving methods.

Not only did he prepare a set of super military mechanical plant equipment called Wind Shadow for Li Yueming, he also prepared a super titanium alloy Tang sword that he personally made and a near-distance anti-material firearm called Death Phantom.

Close combat, medium distance combat, and long distance combat. Li Yueming had all three of them.

Li Yueming was flattered by his outfit.

Let's not talk about anything else, just the super military mechanical plant suit called 'Wind Shadow'. This thing came with tens of thousands of tons of kinetic energy, and many people called it the youthful version of the Mechanic.

One set was worth at least one billion!

Moreover, this one billion yuan was only enough to buy the weakened version that could be circulated in the outside world. The complete version was worth at least two to three billion yuan.

In other words, just this Wind Shadow mechanical plant suit could buy several of Su Linna's private spaceships, not to mention the super-titanium Tang sword and Death Phantom that Sulaman personally designed. Although it was impossible to measure the value of these two items, Li Yueming knew that they were all good things just by glancing at them.

It might even be better than mechanical plants.

Thinking about it, the Windshade Military Mechanical Plant Armor was probably the least valuable item in this set.

Li Yueming almost kowtowed twice to Suraman.

Other than his eccentric personality, the old man was simply a perfect master!

How could an ordinary teacher be able to produce such a gift?

Of course, what he didn't know was that Suraman had already treated him as his last disciple. The last disciple had to go out and train himself, so he naturally had all kinds of resources.
