

Maxing MT 871

Chapter 871:

When the agent team leader heard Li Yueming's deep voice on the radio, he subconsciously turned his head to look at the life form detector behind him. If there was life moving underground, this special instrument should not have no reaction.

But now, there was no abnormal information on the instrument.

There were only two possibilities for this situation-the first was that Li Yueming had made a mistake in his judgment.

There were no signs of life under his feet. Everything was just Li Yueming's paranoia.

The second possibility was that the object under his feet was not a living thing, but an object that was driven by other kinetic energy, so it could avoid detection.

Of these two possibilities, the team leader naturally leaned towards the first.

But for some reason, his keen intuition repeatedly reminded him that Li Yueming's judgment was not wrong. Although he had not seen the full appearance of the unknown creature under his feet, it was indeed real!!

"Everyone, enter high-level alert mode immediately!" he said solemnly." The members of the collection team, give up their work immediately. Take out your weapons and enter combat mode!"

Above I-544204, in the ice cave.

The group of students who received the order hesitated for a moment before immediately pulling out their weapons.

What they saw next was an extremely terrifying scene: A giant machine covered in grayish-brown spots appeared in front of everyone!

As it twitched and walked forward, the machine made a strange noise that sounded like garbled code."Save me, save me...Save...I... Alright... Alright, alright...

It hurts!"

The appearance of this machine was very messy. From its appearance alone, it was different from any mecha version that the world was familiar with.

Not only was its body covered with spots that looked like pollution sources, but it also had a pair of thin, lilac wings on its back. The sides of its mechanical arms made of steel were even covered with hideous and terrifying dried muscles!

The mechanical monster had four thick legs, and its walking posture was similar to that of a human. However, whether it was in terms of the number of limbs or the shape of its appearance, this monster was obviously different from a human.

Some smart students had already activated A0004's item scanning function, trying to use the huge database collected by A0004 to investigate the detailed information of this monster.

However, no matter how they tried, the result of A0004's scan was always 'matching failed, this item is not recorded in the data'!

This meant that the monster in front of them was very likely a new species that had yet to be discovered by the Alliance of Law!

When they thought of this result, everyone present, including the leader of the special agent team, could not help but gasp!

This was the early stages of the Fourth Epoch. It had been two to three epochs since the explosion of technology, and the Alliance of Order's exploration of the entire universe was already very complete. It was rare to find a few new items throughout the year, let alone such a huge monster.

The atmosphere paused for a moment, and the leader of the special agent team suddenly shouted, "Everyone, retreat immediately!"

Upon hearing his roar, the students all woke up from their daze and hurriedly got up to retreat to the surface.

However, it was already too late.

The mechanical monster was not very fast when it did not notice anyone, but the moment it saw a human, its mechanical and stiff body suddenly trembled. A fierce light suddenly shone from it as it growled, "Unknown creature invasion detected. Combat mode is forcefully activated. Kill... Kill! Die... Die!"

A series of ear-piercing mechanical sounds made one's eardrums feel intense pain.

The mechanical monster leaped up from below and arrived in the crowd almost instantly. It waved its huge and powerful arm fiercely, and a few students who were closer to it were sent flying by its slap. They crashed heavily on the blue ice wall and slowly slid down, immediately losing their combat ability.

Fortunately, because the protective suit had a strong buffer and was extremely resistant to blunt weapons, the mechanical monster's powerful punch did not cause fatal injuries to the students. It only made them faint and lose their combat ability.

Despite this, the punch still shocked all the students present.

After all, they were still Level Five martial artists!

Not only was he sent flying in the blink of an eye, he did not even have the time to move his feet...

So how fast was this monster?

In the radio call, the team leader of the Special Agent Group felt a chill in his heart when he saw this situation. He gave up on the detailed command of the entire team and specially accompanied the group of students to the surface of the planet. His goal was to ensure the safety of the Ultimate Martial Arts School's treasures as much as possible.

However, he did not expect that he would encounter such a serious situation when the mission had just begun.

He didn't know if he should call himself lucky or unlucky.

He glanced at the screen in the spaceship that showed the life signs of the exploration team. After confirming that the students who were sent flying had only fainted from the impact, the team leader's tensed heart finally relaxed.

As long as his life was not in danger, it was a blessing in disguise for him.

After regaining his senses, he immediately used his rich combat experience to judge the situation at the scene and decisively ordered, "This monster's combat strength is already close to level-7. The disorderly retreat team is likely to suffer a destructive blow...I'll send reinforcements over immediately. Before that, all members of the Gathering Team will hide on the spot. Members of the Combat Team, think of a way to stall for ten minutes and try not to clash with it head-on!"

Chapter 872:

After saying all this, the team leader disappeared from the command center before the students could reply.

The only thing he could do now was to give the correct orders and rush to the scene as fast as possible.

He hoped that this group of students from the Ultimate Martial Arts School was really as legendary as the legends said. Otherwise, before he could go to the rescue...This mission was probably going to be a disaster.

If they hadn't seen it with their own eyes, no one would have believed that a level-seven mechanical monster would suddenly pop out of a planet that had been extinct for so many eras.

..

Deep underground, in the frozen layer.

Without the reminder of the team leader, the students quickly calmed down after the initial panic. After all, the students present were the most outstanding elites in the entire Imperial Sun Galaxy. Naturally, they would not be scattered like scattered soldiers.

Every level after Level Six was a huge threshold.

Therefore, although the monster in front of him was only at level-7, the pressure it gave off after waking up was still extremely terrifying.

When the Level Five martial artists of the collection team faced it, they basically did not even dare to breathe loudly. Only the ten Level Six martial artists of the combat team performed slightly better. At this moment, they had already distanced themselves and were ready to enter the battle.

As the nominal leader of the team, Manda took the initiative to come to the front of the mechanical monster, preparing to use his nimble steps to restrain this damned monster. At the same time, he didn't forget to say, "All members below Level 6, leave this ice platform and find a place where you won't be affected. Hide and wait for reinforcements."

Before he could finish his sentence, the students in charge of collecting had already begun to take action.

Some people carried their injured comrades and climbed to the other side of the battlefield. Some people chose to pick up the flammable ice samples that had been collected on the ground and stuffed them into their bags.

In less than a minute, dozens of students had retreated to a safe area.

Of course, this so-called safety was only relative.

If the Level 6 warriors who were responsible for restraining the monsters could not withstand the attacks of the monsters, then the area they were in could become a battlefield at any time.

When the last few students also retreated from the center of the battlefield, Li Yueming's figure seemed to be more abrupt. Some students noticed that he was still in place and could not help but say anxiously, "What are you waiting for? Hurry up and come over!"

Li Yueming looked at the mechanical monster in front of him and then at the dozen students who were the main force to restrain him. He shook his head and said, "Don't worry about me. You guys should step back a little more!"

As he spoke, not only did he not leave, he even took two steps forward, getting closer to the center of the battlefield.

This behavior made many students' eyelids twitch.

However, the battle not far away had already begun. The monster waved its giant flesh mechanical arm and smashed into an ice wall. Countless pieces of ice mixed with flammable ice flew everywhere with amazing destructive power. Although they wanted to bring Li Yueming back to the safe area, they still had to prioritize their own safety. They could only anxiously watch Li Yueming getting closer and closer to danger.

It had to be said that the students from the Ultimate Martial Arts School were all freaks. Whether it was Manda or Donald, their combat strength was quite shocking.

The mechanical creature in front of them was much faster than them, but they were still able to rely on their extremely powerful martial arts movement techniques and battle instincts to avoid the damage caused by it.

Although each time was quite dangerous, they did not fail in a short period of time.

On the other side, Flay, who was one of the core members, was in charge of restraining the mechanical monsters from the side. She used various martial arts techniques and cultivation techniques to slow down the mechanical creatures' movement speed and gain more space for Donald and Manda to move.

The other seven Level Six martial artists were also performing their respective roles. Although it was the first time they cooperated with each other, they were very relaxed.

This was a powerful battle instinct.

It could drive them to make the most reasonable choice in battle.

The surrounding students could not help but sigh in relief when they saw the situation.

Although the sudden appearance of this mechanical monster caught them off guard, it was fortunate that the other party's strength was not so strong that it was invincible. The senior sisters and seniors could still restrain it.

However, the good times did not last long.

After less than two minutes of battle, the mechanical creature that had been following a certain rhythm suddenly punched a certain area, sending a student who was about to launch a sneak attack to restrain the mechanical creature's attack flying.

This was like a fuse. The mechanical creature punched a few times in a row, hitting several students who were responsible for restraining them.

Level Six martial artists had stronger resistance than Level Five martial artists. However, this time, the mechanical creature did not use its fists to launch a heavy blow like before. Instead, it revealed the sharp armor on its fists. Apart from a portion of blunt weapon attacks, there was also a considerable portion of sharp weapon attacks.

This small change caused extremely serious consequences.

The mechanical creature cut a big hole in the protective suits of the students. Not only did the students inside suffer from the shock, but they also suffered serious external injuries!

Level Six martial artists could withstand the extreme temperature of the outside world, but there were prerequisites for this.

In a place like this where the temperature was close to absolute zero, even a Level Six martial artist would be invaded by the cold air once his body was injured. If his consciousness was intact, it would be fine. He could resist it with the mysterious power in his body and his martial arts Qi and blood.

Chapter 873:

However, the few students who had been sent flying were already confused by the combination of sharp and blunt weapons. They could no longer resist the cold air.

This way, it wouldn't be long before the cold air invaded the students' bones.

In the end, it melted into the surrounding ice!

..

Everything happened so quickly that after a few people were killed, the surrounding students who were watching the battle did not have time to react.

Fortunately, Manda and Donald, who were in the middle of the battlefield, sensed danger at the last moment. They changed their direction halfway and were not hit by the mechanical monster's fist.

Even though they managed to escape, they still couldn't help but break out in cold sweat.

This monster was too strange. Judging from its combat strength, it was much stronger than an ordinary Level Seven martial artist. Coupled with its unpredictable attack methods, it made them feel extremely dangerous.

After launching a sudden attack, the mechanical creature said in a low voice, "Combat mode learned. Entering special combat mode!"

As soon as he finished speaking.

It suddenly changed its original fighting style. It no longer paid attention to Manda and Donald, who were attracting firepower from the front, but turned to attack Flay on the side. It seemed that it wanted to deal with the flies around it before turning back to look for Manda and Donald.

Upon seeing this scene, Manda grew anxious and rushed over, wanting to stop the mechanical monster from leaving.

“Bang!”

A loud voice sounded.

The mechanical monster’s fist landed on Manda, who had rushed over to help. The mechanical kinetic energy that seemed to have materialized slammed him into the extremely hard underground ice wall.

Manda coughed twice, and blood flowed out from the corners of his mouth and his seven orifices.

It was only at this moment that he realized that this freakish thing wasn’t going to kill Flay at all. It was just bluffing and pretending to attack. Its goal was to attract him or Donald to come and rescue it.

What kind of monster was this?

Feeling the rapid loss of energy in his body, an unprecedented coldness crawled into Manda’s heart.

He had been in the Ultimate Martial Arts School for so many years and had carried out countless missions. However, this was the first time he had seen a machine-like creature that was more agile and cunning than a machine.

Was he going to die here today?

Amidst his shock, Manda was somewhat unwilling.

Even in the Ultimate Martial Arts School, he was considered one of the most outstanding geniuses. According to the normal trajectory, he should have had an even more exciting life.

But now, he had fallen in an underground cave in this remote star field.

There was neither an insect tide nor an invincible battle record that shook the major star areas.

There was only endless coldness and unwillingness.

He coughed out two mouthfuls of blood and tried to stand up, but his body did not listen to him at all. He could only pant continuously in the wall, trying his best to widen his eyes to take a look at the battle situation on the battlefield.

After losing his control, the situation on the battlefield immediately became one-sided.

Donald was very strong, but he could only charge left and right. Fortunately, Flay stepped forward to fill the gap, so the battle situation did not fall into a completely irreversible state.

After the so-called learning, the monster’s combat skills were even more proficient than before. It even had many targeted moves. Under such circumstances, their defeat was already doomed.

Seeing that the situation was difficult, Donald, who had always been stern and cold, took the initiative to speak, “Everyone else, retreat immediately. Flay and I will buy you some time!”

Hearing his words, the surrounding students finally woke up from their daze.

Looking at the messy battlefield not far away and Manda, who had been slammed into the wall, none of the students could believe that the situation had turned so bad in the blink of an eye.

After coming back to their senses, many students were furious and said, "Senior brother, if you want to leave, you and senior sister have to leave first. We'll cover for you!"

In an instant, more students nodded and said, "There are no students in the Ultimate Martial Arts School who leave their companions behind and escape alone. If they want to die, then die together!"

Seeing that many of his classmates had not left, Donald opened his mouth, not knowing what to say.

In the end, Flay stood up and said coldly, "If I tell you to leave, then leave. It's really embarrassing for the students of the Ultimate Martial Arts School to die here. If you feel embarrassed, then go to the battlefield and kill a few more bugs to pay homage to us!"

These words made all the students present instantly fall silent.

They weren't afraid of death, but it was meaningless for them to be afraid of death. If they lost their lives here, not only would they be letting down their teachers and the school's training, but they would also be letting down their fate of going to the front line to kill the enemy.

Just as the group of students were in a dilemma, they did not know what to do.

The mechanical monster that was attacking Flay and Donald suddenly stopped.

He turned around as if he was facing a great enemy.

A figure had unknowingly entered the attack range of the mechanical monster. At this moment, it was sizing it up with interest!

The group of students looked over and realized that it was the Intermediate Mechanic who had been assigned to the logistics department!

In the arena, Li Yueming felt the hostility from the monster and could not help but chuckle, "A mechanical creature with flesh and blood? What an interesting design. I wonder if its combat power is stronger than a purely mechanical design or a purely biological design?"

As soon as he finished speaking.

Under the incredulous gazes of the students, Li Yueming slowly took out a set of fiery red mecha from the space capsule.

With a gentle wave of his arm, the fiery red giant mecha knelt down as if it had seen a servant of God. It respectfully opened the cockpit to welcome Li Yueming's arrival.

Li Yueming glanced at Flay and Donald, who were in a sorry state, and then at Manda, who was stuck on the ice wall. She slowly said, "Leave this to me. You guys go and rescue Senior Brother Manda first!"

Without waiting for their response, he stepped into the mecha.

The cockpit closed.

Li Yueming controlled his mecha to slowly stand up from the ground. Strictly speaking, this was his first time piloting a proper mecha. Although he was not very familiar with piloting it, the Machinery God's talent could make up for everything!

To him, who had the Machinery God's talent, machinery was a part of his body.

Now, when he drove, it was almost like his body was extending, as if he was controlling his arm!

After a simple adaptation, Li Yueming's spirit could not help but become excited. He looked at the mechanical monster not far away and slowly said, "Today, let's have a showdown between mecha masters!"

Chapter 874:

Looking at the mechanical monster not far away, Li Yueming's face was filled with excitement.

This was the first time he was wearing a mech in battle. Only when he was wearing the armor could he truly feel the terror of the shiny gold grade talent of the Machinery God!

[Machinery God (shiny gold): You are a natural-born Mechanical God. Damage of mechanical weapons increased by 3000%, efficiency of research and development and manufacturing increased by 5000%, Intelligence increased by 5000%]

[The only special effect of the shiny gold talent: Machinery God]

[You can control all the mechanical components around you to assemble a huge Mechanical Deity. The attributes of the Mechanical Deity are ten times that of your own attributes!]

It was impossible to feel comfortable without experiencing such a huge increase.

Right now, Li Yueming really wanted a chance to be a punching bag to test his combat strength.

The mechanical monster not far away was undoubtedly the best opponent.

Of course, Li Yueming himself didn't feel the excitement in his voice, but the surrounding students heard it clearly.

As the only Mechanic in the team, plus Flay's extra care.

Although Li Yueming's position in the team wasn't too high, he still left a deep impression on everyone.

Especially Manda, who was on the verge of fainting. He thought that everything he was seeing was an illusion before he died.

What was this?

An Intermediate Mechanic stepping out to save the world?

No matter how he thought about it, it was impossible!

Even a group of martial artists who specialized in fighting for a living could not face such a terrifying monster. What could a logistician Mechanic do?

Actually, Manda wasn't the only one who thought this way.

The other students had the same thought.

After all, in the Emperor Sun Star Field, most warriors had never experienced the glory of a battle mechanic, which was why they had the misconception that a mechanic was weak.

Of course, in reality, before becoming a War Mechanic, Mechanic students were indeed very weak. They were considered to be in a weak position where they were infinitely equal to ordinary people without mechanical equipment.

However, Li Yueming was naturally not included in this range.

Putting aside the fact that he was a very powerful fighter, the only special effect that the shining gold talent, the Machinery God, gave him was a terrifying bonus.

Controlling mechanical components to form a Mechanical Deity was enough to make up for the lack of combat power in the early stages of the Mechanic class.

..

Not far away, Flay, who was called by Li Yueming, was stunned.

Looking at the huge mecha that had suddenly appeared in front of him, he could not help but be in a daze.

Fortunately, the attention of the mechanical monster was completely attracted by Li Yueming. Otherwise, if it had been in a daze during the battle, Flay would not have ended up better than Manda.

Due to Li Yueming's reason, Flay had previously learned about the Mechanic class through various channels.

Therefore, compared to the other students, she was very clear about the strengths and weaknesses of Mechanics.

And now, Li Yueming actually took out a mech from the space capsule. Wasn't this a strategic resource that only Battle Mechanics could have?

Why did he have one?

Of course, at this critical moment, it didn't seem to matter where the mecha came from. What was important was that even if he had a mecha, could Li Yueming block this mechanical monster?

Only by personally fighting with this mechanical monster could one deeply feel how terrifying this monster was.

Not only did he have an almost tireless driving force, but he also had a reaction speed that was so sensitive that it did not seem like a machine. He also had an insanely powerful learning technique.

In all aspects, the strength of this mechanical monster definitely far exceeded the strength of an ordinary level-seven martial artist.

Furthermore, Flay had taken some time to observe the mechanical monster when she was attacking from the side. It seemed that the mechanical monster was not complete yet. Its chest and back were covered in dents and scratches. The grayish-brown spots were more like signs of serious corrosion.

Judging from the various traces, this mechanical monster should have been far more powerful than it had displayed so far under normal circumstances. The reason why they could resist until now was that the damage to the other party had reached a point where it was difficult to continue.

Otherwise, the other party might only need a few slaps to turn them into meat paste.

Such a monster from who knows how long ago, how could a freshman like Li Yueming Ming, who had only been in school for less than a year, defeat it?

Frice had no doubt about Li Yueming's talent. After all, she was probably one of the few people in the school who knew about Li Yueming's background. The current battle was too difficult, far beyond the limits of a rookie.

She opened her mouth, wanting Li Yueming to calm down.

However, it was already too late to remind him now. Not far away, two guys that could be considered behemoths compared to ordinary people were already fighting.

The mechanical monster's body was covered in all kinds of marks. Its dried muscles were like bulging rocks. When it moved, it looked like it was facing an indescribable monster.

In comparison, Li Yueming's fiery red mecha was much more handsome. The red outer shell was angular, and from afar, it looked like a ball of dancing flames that was eye-catching and dazzling.

The two figures collided with each other, and a series of metallic sounds erupted. The entire underground cave shook because of this huge force. Ice cubes fell off one after another, as if it was raining a huge hail.

Chapter 875:

Then, a scene that left all the Ultimate Martial Arts School students, including Flay, dumbstruck appeared.

Li Yueming's mech only took three to five steps back after colliding with the mechanical monster. In terms of strength, he was not clearly at a disadvantage!!!

This mechanical monster could easily send Manda flying with a single slap. Its strength was obviously quite terrifying. Now, Li Yueming could actually compare to it in terms of strength.

Simply... Unbelievable!

To be able to do all this, other than the mecha's own power and driving system being rather outstanding, Li Yueming himself was definitely not as harmless as he had previously appeared!

After all, no matter how ignorant these Ultimate Martial Arts School students were, they still knew some common sense.

In addition to the necessary dynamic attributes and the balance of various functions, the most important thing to measure whether a mech was outstanding was the synchronization rate between the mech and the operator.

The kinetic energy of the mecha was naturally needless to say.

This was the most basic standard to measure whether a mecha was outstanding or not.

The synchronization rate between the operator and the mech was a test of the pilot's talent, understanding of machinery, and physical strength.

Under normal circumstances, the stronger the attributes of the mecha, the higher the synchronization rate required of the pilot. A small mecha might be barely able to be controlled by an ordinary person, but those medium or even large mecha had very high physical requirements.

Many of the operators of military mecha in the army were martial artists with relatively strong physical fitness.

Only their physiques could bear the weight of a mecha that could easily reach tens of thousands of kilograms.

Of course, mecha did not have a high bonus to martial artists.

Powerful martial artists were often weapons that walked in the human world. Not only did a layer of iron shell not increase their strength, but it would also restrict their hands and feet.

On the other hand, Mechanics had a deeper understanding of machinery, so they had additional bonuses in piloting mecha.

As for the Battle Mechanic, there was no need to mention it. The Battle Mechanic was beyond the concept of a normal Mechanic.

Due to the analysis of the mysterious energy in machinery, not only could a Battle Mechanic control a mecha, but they could also unleash terrifying supernatural powers through the mecha.

Using this power, they could even fight against the Bug Tribe army alone.

Now that Li Yueming was able to fight a Level 7 mechanical monster head-on without losing, it meant that Li Yueming's physical fitness must be ridiculously strong.

This was the only way to withstand the immense pressure within the mecha.

After thinking about this, many students looked at Li Yueming with a different expression.

The battle not far away did not stop because of their surprise.

After taking a head-on blow with the mechanical monster, Li Yueming felt the violent vibration in his chest, as well as the strength of the other party that was like a bull. He was a little surprised.

After all, he was already a Level Five martial artist. After wearing the mecha, there was a huge increase in his attributes. Under the combination of the two, even he himself could not accurately estimate the strength of his current body.

Even so, he was still nearly sent flying when he clashed with the mechanical monster.

It seemed that this guy was more difficult to deal with than he had imagined.

However, this was also good. After all, if the whetstone was too weak, there was no way for him to fully display his strength!

Thinking of this, Li Yueming let out a long breath. He circulated the Star Moon Art and shouted, "Again!"

As he spoke, the mech spewed out a stream of steam-like energy.

Although he was not a Battle Mechanic, the Mechanical Deity's talent granted him a portion of the authority of a Battle Mechanic. Normal creatures could only unleash the power of the mecha itself when piloting it.

Li Yueming could not only wear a mech to increase his attributes.

He could also sync his attributes and cultivation techniques with the mecha.

The two combined. Although it was still not as effective as a battle mechanic who could treat the mech as a part of his flesh and blood, it was enough to unleash unimaginable destructive power.

After activating the Star Moon Art, the entire Windshadow mech seemed to come alive. The fiery red brand on its body was vivid and lifelike.

If there were an Advanced Mechanic or Battle Mechanic present, they would be able to observe that the attributes of all parts of the mech were rising rapidly.

Li Yueming didn't intend to be polite with the mechanical monster.

After raising his body attributes, he picked it up and slammed it on the mechanical monster's head.

The speed of this punch was extremely fast. Many students present could only see Li Yueming raise his hand, and then his fist had already landed on the mechanical monster's head.

At first, the mechanical monster seemed to want to raise its hand to block.

But in an instant, he realized that his speed could not keep up, so he could only punch Li Yueming's mecha head.

Li Yueming did not dodge and took the punch head-on. His entire mech was sent flying back dozens of meters. This time, it directly smashed a big hole in the ice cave. After the dust dissipated, Li Yueming only shook his head and did not suffer a serious blow.

After all, he wasn't really sent flying.

The reason why he retreated so far was to better deflect the force.

In comparison, the mechanical monster looked much more miserable. As a martial artist, Li Yueming's punch was very skillful. It was very solid and directly sent a piece of the surface armor on the mechanical monster's head flying, revealing the mechanical bones that were connected to various mechanical pipes and flesh.

Seeing this scene, Li Yueming was even more certain of his guess.

He had felt that the form of this monster was very strange.

It didn't look like a living thing, nor did it look like a machine.

Between living creatures and machines, there was no life but flesh and blood.

Now, he was even more certain.

This thing was a mechanical armor made from living things. It had some biological characteristics, but it added more mechanical attributes to its appearance.

In this way, the machine could have the powerful attributes of mechanical ascension while possessing biological agility. Moreover, the monsters created in this way would also have the ability to fight independently without the program, possessing various combat experience and physical intuition that the program did not have!

Although Li Yueming was a Mechanic himself, he still felt his scalp tingle when he saw the results of this research.

He couldn't imagine what kind of cold heart the existence that created such a thing had to be able to implant so many mechanical armors into a living being and turn it into a mechanical puppet that had no thoughts and only followed the stimulation of electric waves.

However, after thinking about it carefully, it seemed that only such an existence that existed between machinery and life could survive in such an extreme environment for so many years and still be able to move, right?

Of course, even though he was thinking about this, Li Yueming would not show mercy.

This kind of inhumane research method did not seem to be something that modern mechanics could do. It was probably an ancient existence left behind from the destruction of this planet.

The blood in his entire body boiled. Li Yueming operated his mecha to leave the wall and pounced towards the mecha monster not far away like a gust of wind. This time, he did not just punch, but also pulled out the hard titanium alloy long knife that Suraman had prepared for him from behind.

The long saber was nearly ten meters long, and the blade was extremely sharp. It flickered with a metallic luster unique to hard titanium.

Li Yueming held it in his hand and waved a full moon. With just one slash, it split open the metal monster's rusted armor and cut open a wound that was a few meters long.

"It hurts...It hurts... It hurts!"

After being injured, the monster became even crazier.

As he shouted in an ancient language that the students did not understand, he forcefully broke out a rib from his back and used it as a weapon as he charged at Li Yueming.

Seeing this scene, not to mention the other students.

Even Li Yueming felt his teeth ache.

If you want to fight, then fight. Don't take things too hard and hurt yourself!

Chapter 876:

When the team leader rushed to the scene as fast as he could, he saw a completely different scene from what he had expected!

In the deep underground cave, a fiery red Mech was pressing the monster against the wall. Its sandbag-sized fists kept swinging and smashing down, smashing the monster's head like cannonballs.

At first, the monster was still struggling and trying to fight back.

However, as the red Mech continued to attack, its resistance quickly weakened.

So what the hell was going on?

The team leader closed his eyes and sensed the aura of the monster. It was indeed close to a level-seven or even a level-eight martial artist. Why was it pressed against the wall and beaten up?

Although this result was perfect, it was far beyond the expectations of the team leader.

F * ck...This didn't make sense!

Although he did not understand the situation, the team leader still rushed over, wanting to personally solve this problem.

However, just as he was about to take action, a familiar voice suddenly came from the radio communication channel. It said indifferently,"Don't interfere in this matter. Everything you saw today must be kept a secret. If any information is leaked, you won't be able to escape!"

Hearing this voice, the leader of the special agent team was stunned. Clearly, he did not come back to his senses for a moment.

After a long while, the information in his mind shook like an explosion. His mouth was wide open as he said in a trembling voice, "You... You're Wu... Commander Wu?"

After a moment of silence, the radio replied, "Do you understand what I said earlier?"

Under any other circumstances, the team leader would definitely suspect that he had received a scamming call from an interstellar scammer group. However, although he was shocked, he had to believe that the other party was really Commander Wu.

There was no other reason than the fact that the radio channel he was using now was the highest level military channel in the Imperial Sun Galaxy.

If the Interstellar Fraud Syndicate dared to try to get their hands on this channel, they would be torn apart by the Military Committee as long as they showed any intention of spying, let alone cracking it.

Other than Commander Wu, it was hard to imagine anyone else who could transmit such private information through the military channel.

Therefore, after the initial shock and disbelief, the team leader immediately smelled something unusual. He stopped and said solemnly, "Please rest assured, Commander Wu. I will definitely bury what I saw today in my heart forever and not reveal a single thing to the outside world!"

At this point, the team leader looked at the students present and said hesitantly, "But Commander Wu, these students..."

On the other end of the radio, Commander Wu said indifferently, "As long as you promise to be loyal to your duty, you don't have to worry about anything else!"

The team leader heaved a sigh of relief. There were no other doubts.

On the battlefield, the battle between Li Yueming and the monster finally came to an end.

In just a short while, Li Yueming had swung his fist countless times. Every punch accurately hit the same place on the monster's head.

The surface armor on the monster's head had long been smashed into pieces. The mechanical bones in its body were very strong, but after taking so many punches, it could no longer protect the delicate and fragile metal parts in its body.

As the last punch landed, the mechanical skeleton on the mechanical monster's head finally could not take it anymore. It was shattered by Li Yueming's punch. All kinds of mechanical parts scattered on the ground, and there was a lot of black-red liquid with a fishy smell.

The huge body of the mechanical monster had completely lost its power and stopped struggling. Its four limbs were powerless and hung down, no longer moving.

After confirming that the other party had no signs of life, Li Yueming took a few deep breaths and casually threw the monster's corpse onto the ice platform not far away. He then jumped out of the overloaded mech.

He landed on the ground with a pale face.

Although the mech could increase various physical attributes and amplify Li Yueming's combat strength by ten times, Li Yueming himself was still only a Level Five martial artist. After experiencing a battle between real men, he was also exhausted.

This was because the monster only had the body of a powerhouse of the seventh rank, and did not have the techniques and techniques of a powerhouse of the seventh rank.

If he was facing a true expert of the seventh rank, even if his attributes were inferior to this mechanical monster, he would definitely be able to beat him up while he was piloting a mecha.

This was the difference between the levels of life and death, and it was definitely not something that could be easily surpassed.

Fortunately, this mechanical monster did not have similar means. From the beginning to the end, it relied on brute force and some relatively shallow martial arts moves to fight with him. This allowed Li Yueming to take advantage of it.

Although Li Yueming himself was not very satisfied with this battle.

However, the students present looked at the mechanical monster lying on the ground and then looked at Li Yueming who walked out of the mecha. At this moment, they were all stunned.

After all, even if the monster before him did not have as many cultivation techniques and moves as a rank 7 powerhouse, its physical fitness and the pressure it gave off could only be possessed by a rank 7 powerhouse.

But now, he had fallen into the hands of an overly young junior.

If they hadn't seen it with their own eyes, they really wouldn't have imagined that such a thing would really happen in front of them.

Chapter 877:

One had to know that the order given to them by the higher-ups was to stall for time and wait for reinforcements!

At this moment, the reinforcements from above had yet to arrive, and the main character had already been killed by a junior piloting a mech in a few moves...Who would believe this?

It was simply ridiculous!

Even the team leader of the special agent team who was hiding in the dark not far away was shocked. He looked at Li Yueming with even more shock.

It was obvious that Commander Wu had specially come out for this young man.

The Ultimate Martial Arts School was indeed full of crouching tigers and hidden dragons!

This previously unremarkable Mechanic student was actually so powerful!

Wait a minute...

Thinking of this, the team leader finally realized the problem.

If he remembered correctly, the information given to him by the logistics department showed that Li Yueming had just entered the Ultimate Martial Arts School this year. He was a first-year freshman.

In that case, Li Yueming should not be nineteen years old under normal circumstances?

A nineteen-year-old Intermediate Mechanic was able to pilot a mecha and defeat a monster whose physical attributes were even stronger than an ordinary Level Seven martial artist...For a moment, the leader of the Sixth Special Agent Group couldn't even tell who the real monster was.

After confirming that the battle was over.

The team leader took a few deep breaths to calm down the surging emotions in his heart. He slowly walked out of the darkness and pretended to be late. He said, "How's your situation?"

He heard his voice.

The group of students finally woke up from their deep shock.

After a long while, a parched student replied, "Sir, our situation...The situation was alright, but... However, eight of his companions had suffered varying degrees of internal and external injuries! In addition, Senior Manda's protective suit was broken and he was on the verge of fainting. He needed to be immediately transferred to a safe area for treatment!"

The student's voice was a little dry, and his words were a little stuttering.

However, it was not because he was frightened by the battle just now, but because he really did not know how to describe the current situation.

Fortunately, the team leader already had an idea of the situation at the scene.

Therefore, he did not need to explain too much and immediately said, "The medics are already in position on the surface. Find a few people to take the injured and retreat to the transfer station immediately."

Even though he said that, the team leader's eyes still couldn't help but glance at Li Yueming.

This young man was simply a monster to a certain extent!

..

.0.

With the personal intervention of the special agent team leader, the situation finally returned to the right track.

The injured students who were injured in the battle were carried by the other students who were not injured. They walked along the spiral ice path in the cave and quickly returned to the surface of the planet.

As expected, the medical team had been waiting on the surface for a long time. The moment they saw them, they rushed over to receive the injured.

Although Manda's face was a little pale, he was still saved in time.

After handing over the injured to the medical team, the other students returned to the surface transfer station on planet I-544204.

Until he took off his protective suit.

The tensed nerves of the group of students finally relaxed. They let out a sigh of relief. Many students looked at Li Yueming with gratitude.

Flay walked straight over and sized up Li Yueming from head to toe, as if she had gotten to know him again. After a while, she said, "I didn't expect you to be even stronger than I imagined!"

As one of the few students who knew about Li Yueming's background, Flay was clear about Li Yueming's strength and talent.

However, she only knew that Li Yueming's talent in martial arts was very abnormal. She never thought that Li Yueming's talent in the Mechanic class was also so heaven-defying.

No matter how one looked at it...They all felt that it was terrifying!

After a simple rest, the group of students who were still in shock finally recovered.

It was different from his previous indifference.

When the students looked at Li Yueming, their eyes revealed a fan-shaped emotion. 30% respect, 30% fear, and the remaining 30% curiosity.

Feeling the attention of the students around him, Li Yueming couldn't help but rub his nose.

Before he left, Suraman had told him to keep a low profile when he went out. He did not expect that he would be the center of attention just as he was approaching the first stop.

After a while, the team leader of the special agent team who was responsible for the aftermath returned to the transit station. He first went to the medical room to inquire about the condition of the injured soldiers. After confirming that the injured students were not in danger, he completely put the heart back into his stomach.

When he arrived at the lounge, he coughed twice and said, "Everyone, I've just sent someone to bring the body of the mechanical monster back for research and appraisal. The preliminary conclusion is that this mechanical monster is a mechanical creation before the destruction of planet I-544204. I don't know why it can survive in the extremely cold underground for so long..."

"You guys have handled this accident very well. I will report to the higher-ups and ask for your merits. The specific rewards will be sent to you guys by email!"

Hearing that there was an additional reward, the students who were originally worried finally regained some of their spirits.

Although the Military Committee's missions often had unexpected emergencies, as long as they could be properly resolved, the rewards they gave were still very generous.

The students were very assured about this.

After calming the students down, the team leader thought for a moment and finally said, "I've already seen what happened at the scene through the video, so I won't continue asking here."

At this point, his voice paused and became a little more serious. "All of you are destined to be the pillars of our Alliance of Order. Therefore, you should know what should be announced and what should not be announced. You have signed the confidentiality agreement in advance, including the schedule of this mission that cannot be announced to the outside world... You should understand what I mean, right?"

He didn't say that he was keeping Li Yueming a secret.

However, the students present were not stupid.

With just a little thought, he understood the ins and outs of it.

Therefore, some students took the initiative to stand up and look at Li Yueming, then looked at the team leader of the Special Agent Team and replied solemnly, "Sir, you can rest assured about this. The students of the Ultimate Martial Arts School are part of the confidential files. We have also signed the confidentiality regulations in advance."

Then, he turned his head to look at Li Yueming and said with some excitement, "Junior Brother Li Yue, you can rest assured!"

Li Yueming didn't have much of a reaction to this. He smiled and said, "Of course I don't have to worry, Shixiong, you don't have to do this."

Whether he was assured or not, his identity would be known by the Insect race sooner or later. However, he had not grown up yet, so it was best not to expose himself.

After that, the team leader comforted them for a while before rushing back to deal with many matters.

After this episode, the team leader did not dare to let them continue their mission. The group of students stayed in the transfer station to recuperate for more than ten days.

During this period, the medical team took care of the majority of the injured students. After all, their injuries were not serious, and they were only slightly shaken, causing their blood and Qi to become chaotic.

Only a few unlucky ones had not fully recovered.

This included Manda. As the main force, he was the most seriously injured. Although he had woken up long ago, he had not been able to get out of bed.

After a few days, the team was basically done recuperating.

The special agent team assigned them a new mission, but compared to the previous mission, this mission was much safer. They only needed to collect some soil and rock samples on the planet's surface.

This kind of mission was a little boring for Li Yueming.

However, he could understand. It was probably because the last mission had frightened the special agent team, causing the team leader to not dare to send them to those dangerous places again.

Compared to picking up stones and digging up soil here.

Li Yueming wanted to go to the other planets to find out more about what happened in this star field.

After all, the sudden invasion of the Zergs thirty years later had always been a thorn in his heart.

If he couldn't find the reason, he wouldn't even be able to sleep well.

However, it was a beautiful idea, but it was difficult for him to realize it with his current strength and status. After all, the battle plan of Nilra Star Ruins involved things that were highly confidential. It was not at a level where he could understand the whole picture.

Chapter 878: Go Home!

Witch Galaxy, planet 7-20003.

As a planet located in the most remote corner of the Imperial Sun Star Field, Planet 7-20003 was mostly unknown. It didn't even have much of a presence in the Witch Star System, let alone the entire Imperial Sun Star Field.

One of the reasons for this was because he was in the corner.

Nilra Planet Ruins, which was not accessible to interstellar spaceships, was another reason.

With these two factors stacked together, under normal circumstances, this planet would probably not be able to develop for another two eras.

However, there were always exceptions to everything.

Due to the birth of a super genius who had entered the Ultimate Martial Arts School with unprecedented results, Planet 7-20003 had been in the limelight in the entire Emperor Sun Galaxy.

The Interstellar Dock, which was originally not used for ten days or half a month, had been frequently visited by spaceships from other planets. Even the Witch Galaxy's Governor's Office had taken the initiative to send envoys to planet 7-20003 to congratulate them.

Even the previously neglected funding application was quickly approved.

As the saying goes, when a person attains enlightenment, chickens and dogs will soar. Although the current situation on planet 7-20003 was not that exaggerated, it was only because Li Yueming had not fully grown up.

If Li Yueming could graduate from the Ultimate Martial Arts School with excellent results, even if he did nothing after graduation, his influence would be terrifying.

That was why the other planets took the initiative to show goodwill to planet 7-20003.

This also made Planet 7-20003 a little proud. Recently, it had been hosting the leaders of other planets from the surrounding galaxies who wanted to build a relationship with them.

All kinds of interstellar social activities were in full swing.

If Planet 7-20003 was just a remote planet in the past, it was now showing signs of becoming the Witch Star System's star of tomorrow.

The surrounding circles all opened their doors to him.

..

In this raging atmosphere.

7-20003 An inconspicuous civilian spacecraft appeared in the outer space radiation circle of planet No. 1.

The spaceship slowly sailed over the territory of planet No. 3, sending a request to land. After, the military committee's serial number was verified, and the spaceship slowly headed towards the galactic dock indicated by the navigation system.

It took about half an hour to take the power.

This civilian spaceship was docked in a small interstellar dock on planet 7-20003.

Li Yueming walked out of the small spacecraft and looked back at the construction workers who were busy repairing and expanding the dock. He couldn't help but feel a little emotional.

It had only been less than a year since he graduated and went to the Imperial Sun Star.

However, compared to the steps he had taken in the past year, 7-20003, a planet that he was once familiar with, was so far away that it was a little out of place just by stepping on it.

Behind him, Flay walked out from the other side of the cabin. She also looked left and right and said with a hint of surprise, "Is this your hometown? Well... It's even more backward than I thought!"

Compared to the huge dock on the Imperial Sun Planet, which was like a palace.

7-20003 The dock on Planet No. 10 could only be considered a small deck.

This was after some initial repairs.

One could imagine how shabby it was before it was renovated.

Li Yueming nodded and couldn't help but smile, "It should be a little more stylish when it's repaired!"

The last time he left planet 7-20003, he had taken a military cabin specially opened by Evelyn. This was his first time coming to a civilian cabin.

However, no matter what, this space dock was a little too much. If Li Yueming didn't fly a small civilian spaceship today, but a slightly larger medium-sized spaceship, it would be a big problem to land.

Of course, Li Yueming could understand. Planet 7-20003 itself was not a big planet, and its influence was limited to the surface. There would probably not be many people engaged in interstellar travel all year round, so it would be a waste to repair the interstellar dock. It would also waste a lot of resources to maintain it.

On the contrary, it was a little strange that the dock had been rebuilt and expanded.

That's right, after completing the task assigned by the Military Committee, Li Yueming found that his location was not far from planet 7-20003. In addition, his sister Li Linglong was about to take the martial arts college entrance examination, so he decided to come back at the last minute.

If Li Linglong did well in the college entrance examination this time and was qualified to enter the school on the Imperial Sun Planet, then he could move to the Imperial Sun Planet with his uncle and aunt. It would be a relief.

This was the reason why he was here today.

Of course, in order to avoid unnecessary trouble, he did not tell anyone about his return. Otherwise, he would not be able to wrap up for a long time.

..

As the two of them chatted, they had already walked to the registration area.

There were five or six staff members in the uniform of the government office guarding the entrance of the warehouse registration office. At a glance, they were all fully armed Level Four martial artists.

Since when did the level-four martial artists of planet 7- 200003 come to watch the door?

Li Yueming muttered in his heart.

When the staff saw the two young and handsome men and women, they were all stunned. After a moment, they said, "Are you students here to participate in this Martial Arts Conference? This isn't the student passage!"

Martial Arts Conference?

This keyword puzzled Li Yueming.

Chapter 879: Go Home!(2)

Before he graduated, he had never heard of any Martial Arts Conference.

Although he was thinking about it, Li Yueming did not hesitate on the surface. He shook his head and said, "No, I'm here to visit my relatives and friends!"

Hearing his answer, the doubts on the faces of the staff members dissipated a little. There were no unnecessary expressions on their faces. They asked in a formal manner, "I see. Do you have an interstellar pass?"

Li Yueming nodded and took out his and Flay's interstellar pass from his pocket. While the other party was checking their passes, he asked, "Excuse me, what kind of event is the Martial Arts Conference? Why haven't I heard of it before?"

Several staff members took their IDs and checked them on the machine.

Li Yue Ming was using the identity of 'Li Yue'. Although it was fake, it was more real than the real thing to some extent, so the staff did not find any problems.

After returning the documents to them, a gentle-looking woman replied proudly, "The Martial Arts Convention is a grand martial arts event organized and organized by the Witch Galaxy's Governor's Office. It's a super stage for the young geniuses of the entire Witch Galaxy!"

"Our planet wasn't qualified to participate, but who asked us to produce a super genius that shocked the universe last year? Even if we don't want to participate this year, the government will have to beg us to participate!"

At this point, the woman could not help but raise her head, appearing very excited. "In order to show how important planet 7-20003 is to us, the Witch Galaxy has given us the right to host the martial arts conference. All the young geniuses from the planets near the 26th defense line have to come here to participate in the martial arts conference!"

7-20003 It wasn't just a year or two that Planet No. 10 had been neglected.

In the past, those Star System level events did not give them any plans at all. Now that a super genius had finally emerged to sing, even the staff felt honored.

Hearing this, Li Yueming turned his head around.

No wonder he had never participated before. It turned out that he had only obtained the qualifications to participate this year.

The woman glanced at the two of them and continued, "You guys don't look very old. The Martial Arts Conference will begin in a week. You can go to Montenegro City to broaden your horizons!"

Li Yueming nodded and thanked her before leaving the checkpoint.

For a woman, this was just a small interlude in her work.

After Li Yueming and the others left, the woman suddenly came back to her senses. She elbowed her colleague next to her and frowned. "Eh... Do you think that the young man who just passed by... Does he look familiar?"

Several colleagues scratched their heads when they heard that.

To be honest, ever since they heard that Li Yueming was not the prodigy student they were waiting for, their attention had already been diverted. Now that they heard the woman mention it again, they thought for a while and said in surprise, "In that case, it does seem a little familiar!"

..

.0.

Li Yueming heaved a sigh of relief as he quickly left the checkpoint.

Seeing that there was no one around, Flay whispered teasingly, "The super genius that shocked the universe didn't even have anyone to welcome him back to his home planet."

Li Yueming rolled his eyes and ignored her teasing.

Previously, when he was in the Imperial Sun Galaxy, he had always used long-distance wide-area radio communication. This thing was only available to the military committee on planet 7-20003, so every time he contacted his family, he had to go through the military committee before he could inform his uncle and aunt.

It was also because of this that he did not even inform his uncle and aunt.

After all, informing his uncle and aunt was equivalent to informing the military committee. After informing the military committee, coming back was basically no different from taking a loudspeaker to announce it everywhere.

Now that he had returned to the same planet, he could take out his phone from the capsule and call his uncle.

The phone rang twice before it was picked up. After a moment of silence, the other party asked, "Who are you? Why do you have my Xiaoyue's number?"

Listening to the familiar voice on the other end of the phone, Li Yueming had mixed feelings for a moment. He smiled and said, "Uncle, where are you now? Come and pick me up!"

The uncle was stunned when he heard that. He immediately hung up the phone without saying a word.

Before Li Yueming could come back to his senses, the screen in his hand lit up again. However, unlike before, his uncle's profile picture appeared on the top right corner of the phone app.

Li Yueming took a glance and realized that it was his uncle who had video called him. He pursed his lips and smiled at Flay, "See, my uncle is guarding against fraud!"

It had to be said that this middle-aged man, who usually looked simple-minded, was really witty at the critical moment.

Flay didn't understand what was meant by 'teleportation', but she could understand what was meant by 'scam'.

Therefore, he also revealed a smile.

After the call was connected and he saw Li Yueming's face, the uncle was sure that he was not fooled. He immediately said in surprise, "Xiaoyue, where are you? Could it be... Could it be that he's back?"

Li Yueming saw that there was no one else around his uncle, not even his aunt. He nodded and said, "I was on a mission, and I happened to have some time after that. I came to see you and Auntie, and also to see how Linglong's martial arts college entrance examination results are this year!"

Hearing him admit that he had returned to planet 7-20003, his uncle immediately became excited and laughed. "Good, it's good that you're back. Send me your location. Uncle has recently changed to a flashy car. Because your aunt scolded him for being too expensive, he hasn't driven it many times. This time, he can drive you home in a grand manner!"

Chapter 880: Going Home

Li Yueming smiled, but he still said, "Don't tell anyone that I'm back!"

The uncle naturally knew that he could not reveal Li Yueming's whereabouts. Otherwise, he would attract a group of ambitious people who wanted to get close to him. He hurriedly nodded and said, "Don't worry, your aunt and Linglong haven't come back yet. I'll be the only one picking you up!"

With that, the uncle hung up the phone and ran off to get his car.

Li Yueming and Flay found an inconspicuous place and stood there casually, waiting for their uncle to come and pick them up.

There weren't many residents around the space dock, but the traffic was quite convenient, so there were quite a few cars on the road.

Li Yueming and Flay stood alone by the roadside, looking a little out of place.

..

After waiting for a while, the uncle drove a large military green SUV and parked it by the side of the road. He opened the door and looked around. When he saw Li Yueming, his eyes lit up.

However, when he looked back and saw Flay following behind Li Yueming, the smile on his uncle's face froze.

She quickly returned to the car and hurriedly took out hair oil from the front passenger compartment to apply it on her head. She tried her best to make herself look as casual as possible before she got out of the car again. She said shyly, "Xiaoyue, you're back. Is this your girlfriend? Nice to meet you. I'm Li Yueming's uncle..."

He still wanted to praise her, but he didn't know how to say it.

Li Yueming's return was too sudden, and he didn't reveal any information in advance. In addition, Flay was extremely beautiful. Under the combination of several reasons, Uncle's mind was completely empty at this moment. He had no experience in dealing with related situations.

Fortunately, Li Yueming didn't want to see his uncle embarrass himself, so he took the initiative to introduce him, "Uncle, you've misunderstood. This is my senior from the Ultimate Martial Arts School. Her name is Flay!"

He was very natural and did not feel that there was anything wrong with him.

On the contrary, Flay, who was following behind, blushed. After a while, she became a little nervous. "Hello uncle, I'm Li Yueming's senior. I just happened to come along the way!"

After giving him a way out, his uncle was finally not put on the fire pit.

At this moment, he looked at Li Yueming, who was acting as if there was no one else around, and then looked at Flay, who was blushing behind him. He revealed an 'I understand' expression and nodded. "I see. On behalf of the Li family and planet 7-20003, I warmly welcome Student Flay. Let's get in the car. I'll immediately ask your aunt to buy some delicious food!"

At this point, the uncle sighed and said, "It's a pity that Linglong is still undergoing intensive training in school in order to participate in the Martial Arts Conference and the college entrance examination. Otherwise, we could have a family reunion dinner today!"

When he said the words 'reunion dinner'.

No matter how well his uncle concealed it, Li Yueming could still feel traces of reluctance and longing from it.

Last year, before Li Yueming took the martial arts college entrance examination, the family's life was very warm and lively even though they were poor.

After the martial arts college entrance exam, Li Ming's name was called Carp Leaping Over the Dragon Gate and soared into the sky.

Although they also looked proud, they still lost a member of the family.

And the small fraction had gone to the depths of the universe, to a place they did not even dare to think about, crossing countless galaxies, time, and space.

Now, it was the annual martial arts college entrance examination.

If Li Linglong could also get good grades, she would probably leave this desolate and dilapidated planet. At that time, only the two of them would be left at home.

On the one hand, they hoped that their child would have a bright future.

On the other hand, they were afraid that the children would be too promising, so much so that they would be separated by endless starlight and mountains and seas.

The old city, the flashing neon lights of the

His uncle's off-road vehicle drove across the narrow road, attracting the attention of many pedestrians around him.

Looking at the increasingly familiar environment, Li Yueming asked, "Didn't you say that you moved into the villa of the Hank Military Mining Group last time? Why did you go back to your hometown?"

The uncle took off his sunglasses and smiled. "Hai, that house is too big. It can't even be cleaned. It's too far from where I work. I stayed there for a few days, but your aunt found it troublesome and moved back!"

Hearing his answer, Li Yueming was speechless.

Although his uncle said so, Li Yueming knew that it was because they were more accustomed to the living conditions of ordinary people.

What Uncle and Auntie really cared about was not living in the big house or driving a luxury car.

Instead, it was a family that was safe and reunited.

As for wealth, there was no limit to it. It could not be brought with him when he was alive or taken away when he died.

Only greedy people would place their hopes on endless wealth.

It was precisely because of this that not only could a rich life not make his uncle and aunt happy, but it would also make them feel at a loss in an unfamiliar environment.

No matter how others looked at it, Uncle and Aunt knew that some things did not belong to them.

..

The three of them walked upstairs along the narrow corridor.

Flay, who was following behind, was very curious about everything in front of her. After all, the planet she lived on wasn't even in the third universe. The difference in civilization and technology between the third universe and the third universe was even more exaggerated.

The old civilian district was no different from an alien world to her. However, when she entered the door, her uncle poured her water and cut her fruit with enthusiasm, which made her feel a little flattered.

If a martial arts student were to see their goddess acting like a little girl in a boy's house, they would probably be so angry that their blood pressure would explode.

While his uncle and aunt were on the phone, Flay carefully took a bite of the apple that was forcefully stuffed into her hand and asked in a low voice, "Why do I keep feeling that the way your uncle looks at me...It's a little strange."

Regarding this, Li Yueming said sympathetically, "I reminded you before, but you insisted on coming over to see the planet I was born on. Now you know the trouble!?"

Hearing this, Flay felt a little wronged. She frowned and said, "I just wanted to see if the planet where you were born had three heads and six arms. How would I know that your uncle would be so enthusiastic?"

Li Yueming's eyes became even more pitiful as he said, "My uncle isn't considered enthusiastic. Don't be afraid when you see my aunt later..."

He looked at Li Yueming's half-smile.

For some reason, Flay suddenly had a very bad feeling.
