

Merchant 1031

### **Chapter 1031: Sudden Transformation of the Sky Fragrance Beauty Butterflies**

But now that this happened, Cage of Brahma Insects could not bring themselves to visit Radiance Moon Mountain to ask the Moon Empress for the Golden Lotus Brocade Pearls.

Because of this fear, Cage of Brahma Insects knew how small they were in the presence of the Moon Empress despite being one of the top three factions for 30 years.

A guilty expression came over Fan Jianyi's face as she said, "Leave this matter to me. We won't be able to depend on our connection with the Moon Empress as Mystic Moon was ready to kill me at that moment. If the Moon Empress' disciple hadn't forgiven me, I would have sustained injuries that I wouldn't ever be able to recover from fully. Mystic Moon definitely told the Moon Empress about this matter."

Fan Linglong nodded and could not help but be curious about Lin Yuan.

He had seen how the Moon Empress treated Lin Yuan at the Guard Ye Banquet and how she had made a Moonbeam Coronation Costume without coronation patterns for him.

However, he was afraid that the Moon Empress would be even angrier that Cage of Brahma Insects had attacked Lin Yuan.

"During the incident, I gave the Moon Empress' disciple the Sky-Covering Weeping Willow's tree core and the Kill Food Worm and asked for his contact details. He did not say no. I will try to come up with a way to apologize to him personally and discuss the Golden Lotus Brocade Pearls."

Fan Jianyi stood up and bowed to everyone before saying, "I made a huge mistake, and I'll do my best to make up for it so that my mistake won't affect the Cage of Brahma Insects."

Fan Jianyi gently pushed open the meeting room door, and she thought about how the young man dressed in the Moonbeam Coronation Costume in the remote area had said that all who came to visit were guests.

As Lin Yuan held the Diamond fey storage box with the 12 Diamond X/Legend Sky Fragrance Beauty Butterflies, he felt slightly embarrassed.

The Moon Empress had given him the 12 Sky Fragrance Beauty Butterflies to pull his fey carriage.

Since he had been at the Guard Ye Banquet, he had not been able to find the Emperor Armored Martial God Insects. As such, he had not attended to the Sky Fragrance Beauty Butterflies and had kept them in the Diamond fey storage box.

Luckily, the Moon Empress had filled the fey storage box with a lot of food for the Sky Fragrance Beauty Butterflies.

Just as Lin Yuan was about to summon the 12 Sky Fragrance Beauty Butterflies from the fey storage box, Purple Afterglow returned to the Spirit Lock spatial zone through Klein Hub.

'When Purple Afterglow saw Lin Yuan, it immediately started to fly around him happily as it reported the situation in the marsh world.

Lin Yuan nodded when he heard Purple Afterglow's report.

Wendy had stolen the faith power in the Drugged Snake Eagle's totem and accepted the Marsh Ground Sphagna as its Favored Believer.

Hence, Wendy did not have to use any of its own faith power and even had some of Drugged Snake Eagle's faith power to add to its own faith power.

Thus, Wendy did not need to continually accept believers like Rising Lizard did to increase its power.

According to Purple Afterglow's report, Wendy had accepted another believer and had changed that believer into a Favored Believer.

Purple Afterglow could not say how strong Wendy's new Favored Believer was, and all it knew was that the Favored Believer was a carnivorous plant-type fey.

Lin Yuan did not have any opinions on Wendy accepting a new Favored Believer as it also increased Lin Yuan's power in the marsh world.

This would also increase Wendy's gathering of faith power.

Lin Yuan planned on going to the marsh world soon to use True Data to check on the carnivorous plant-type fey.

Lin Yuan shook his hand, and 12 palm-sized pink butterflies appeared before him.

The Sky Fragrance Beauty Butterflies were considered on the smaller side, and their golden scale powder glittered under sunlight.

This made the Sky Fragrance Beauty Butterflies appear elegant, and a charming scent accompanied their scale powder.

While Lin Yuan was engrossed in the fragrance, he suddenly realized that there was something odd about the 12 Diamond X/Legend Sky Fragrance Beauty Butterflies.

They were flying around Purple Afterglow as though they were trying to win its favor. They looked like servants greeting their king.

Although many feys required multiple feys, they were able to suppress their urges when they reached a high grade.

Many powerful feys stuck by their one mate.

Lin Yuan thought, My son! Your wife is helping me to guard the marsh world. The only thing that separates you two is Klein Hub. Is it really appropriate for you to fly around with the 12 Sky Fragrance Beauty Butterflies behind your wife's back? The Kill Food Sky Butterfly is so strong. If it discovers this, will it beat up its husband?

Soon, Lin Yuan realized that he was worried for nothing because Purple Afterglow did not seem to care about the 12 Sky Fragrance Beauty Butterflies at all.

It was as though it could not see the 12 Sky Fragrance Beauty Butterflies at all.

However, the 12 Sky Fragrance Beauty Butterflies did not seem discouraged at all. They spun around and displayed their wings.

Purple Afterglow seemed annoyed by the 12 Sky Fragrance Beauty Butterflies that were flying around it and trying their best to earn his affection.

After bidding goodbye to Lin Yuan, Purple Afterglow flew back to the marsh world.

Once Purple Afterglow left, the 12 Sky Fragrance Beauty Butterflies returned to normal.

Shortly after, they found a new target and started to fly around Lin Yuan.

### **Chapter 1032: Opportunity From Infatuation**

Lin Yuan did not know what the 12 Sky Fragrance Beauty Butterflies were trying to do. He wondered if they were under the Moon Empress' orders or if they knew that Purple Afterglow had formed a contract with him.

Were they trying to become closer with him to get to Purple Afterglow?

Lin Yuan used Morbius to check on the 12 Sky Fragrance Beauty Butterflies and realized that besides their ability to control insect-species fey, all their other abilities were meant to increase spiritual energy so as to increase their attraction to insect-species feys.

It could be said that their only means of combat was to rely on the insect-species feys they had contracted.

The insect-species feys would become mere playthings of the Sky Fragrance Beauty Butterflies.

Just as Lin Yuan was about to let the 12 Sky Fragrance Beauty Butterflies out of the Spirit Lock spatial zone so that they could fly freely in the Return from Faraway Mansion, he felt the power of a willpower.

One of the Sky Fragrance Beauty Butterflies lit up with a pink glow, and a purple Willpower Rune in the shape of a butterfly appeared on the Sky Fragrance Beauty Butterfly.

Lin Yuan's eyes grew wide.

The purple Willpower Rune was in the shape of Purple Afterglow!

This Sky Fragrance Beauty Butterfly sure was a genius. It had managed to gain such an opportunity through its infatuation.

Lin Yuan was unexpectedly delighted by this Diamond X/Fantasy I Sky Fragrance Beauty Butterfly.

The Sky Fragrance Beauty Butterfly that had comprehended a Willpower Rune was a wild fey, and it would soon be able to use self-comprehension to evolve to Diamond X/Fantasy V.

At that point, it would be able to experience the World Cleansing and evolve to Myth Breed.

The Sky Fragrance Beauty Butterfly was the fey that would have the easiest World Cleansing as its ridiculously strong spiritual power allowed it to keep an insect-species fey with a higher grade by its side to protect it.

As the Sky Fragrance Beauty Butterfly's power continued to increase, the weakening of the insect-species feys under its control would not be cause for concern. The insect-species feys could just be discarded once they were no longer of any use.

The Sky Fragrance Beauty Butterfly would continuously discard old insect-species feys and control new ones.

The Diamond X Sky Fragrance Beauty Butterfly could control Class 8 alien insects, which meant that it could control the Suzerain/Myth II Emperor Armored Martial God Insect.

Now that the Sky Fragrance Beauty Butterfly had evolved to Diamond X/Fantasy I, it could control Fantasy III insect-species feys or Class 9 alien insects.

This greatly increased Sky City's combat power.

This Sky Fragrance Beauty Butterfly that had comprehended a Willpower Rune also gave Lin Yuan more ideas for his fey carriage.

From the Fey Observer information that Master Lan Qin had given him, Lin Yuan knew that the Class 8 Emperor Armored Martial God Insect was a mutant that could reach Class 9 or even higher.

The Emperor Armored Martial God Insect could also transform to the Thearch Armored Martial God Insect when it reached Class 10.

However, it was not easy to find the Thearch Armored Martial God Insect as the Emperor Armored Martial God Insect was controlled by the Class 4 dimensional rift and was not seen often.

A chance encounter was required.

Lin Yuan could not place all hope on the Coiling Dragon's Valley, and he needed to source for more opportunities.

If he depended solely on Coiling Dragon's Valley, it would take forever before his fey carriage was completed.

After setting the 12 Sky Fragrance Beauty Butterflies free in the Return from Faraway Mansion, Lin Yuan took out another Diamond fey storage box and checked the 12 balls of water-element energy.

'When he took out the 12 balls of water, the Sacred Sword Wielding Queen's hungry voice sounded in his head. "Master, I don't want to eat the Law Source Crystals anymore. I want to eat these 12 balls of water! Once I eat them, I'll reach the adolescent stage and gain a second ability!"

Lin Yuan asked curiously, "Aren't you absorbing Law Source Crystals now? Why don't you want them anymore?"

Lin Yuan had felt the Sacred Sword Wielding Queen's craving for the 12 balls of water in the Radiant Moon Palace, and he knew that they would be able to evolve it.

However, he would not allow the Sacred Sword Wielding Queen to absorb the 12 balls of water as they were more useful than helping it to increase its Stars and because they were an important gift from the Moon Empress.

The Sacred Sword Wielding Queen replied without hesitation, "Master, if you allow me to eat the 12 balls of water, I'll be fine even if I don't eat the World Source Crystal!"

Lin Yuan was shocked. He did not expect the balls of water to be even more appealing to the Sacred Sword Wielding Queen than the World Source Crystal.

In spite of the Sacred Sword Wielding Queen's yearning, Lin Yuan immediately replied, "There are an unlimited number of Law Source Crystals for you to eat to increase your Stars. I have another use for the 12 balls of water. There'll be more World Source Crystals in the future. You won't go hungry."

The Sacred Sword Wielding Queen nodded sadly and returned to the depths of Lin Yuan's soul to absorb the Law Source Crystals.

Lin Yuan's eyebrow twitched at the way the Sacred Sword Wielding Queen was concentrated on absorbing the Law Source Crystals.

'Was it so focused because it did not want to think about its craving for the 12 balls of water?

When the Sacred Sword Wielding Queen paused for a moment, Lin Yuan turned his attention back to the 12 balls of water.

He clearly remembered the Moon Empress saying that the 12 balls of water had come from the laws and abilities of the dead 9 Stars Moving Source Water.

It was clear how precious these 12 balls of water were.

Lin Yuan was already having a hard enough time evolving his young sacred source lifeform from 1 Star to 3 Stars, and he could not imagine how difficult it would be to evolve his sacred source lifeform once it reached 4 Stars..

### **Chapter 1033: Flowing**

Moreover, the Moving Source Water was already in its mature stage and had reached pinnacle 9 Stars. It was right on the precipice of reaching its complete stage.

Lin Yuan had to treasure this item that came from a 9 Stars sacred source lifeform.

He had already used True Data to check on the 12 balls of water in the Radiant Moon Palace and had been surprised to learn that the 12 balls of water were greatly beneficial to the Floating Island Whale.

Lin Yuan used True Data to check on the 12 balls of water again.

[Fey Name]: Moving Source Water

comment

[Eey Species]: Source genus/Sacred Source Species

[Fey Grade]: Normal (1/10)

[Fey Type]: Water

[Fey Quality]: Normal

Abilities:

[Flowing]: The water will rush rapidly, and the energy from the water can allow the water to flow in any location.

Lin Yuan had decided to nurture the Moving Source Water because of the Flowing ability.

After the Floating Island Whale reached the skies, it could only use its body to defend itself.

In the sea, the Island Whale was beloved by all sea feys. However, avian-type feys that encountered the Floating Island Whale in the sky would definitely attack it.

Lin Yuan had also heard the Moon Empress say that there were feys that lived in the atmosphere.

‘They flew much higher than avian-type feys and could spend their entire lives in the atmosphere. Those were the true children of the sky.

The Moving Source Water’s ability did not seem strong because it was just 12 balls of water.

If they were thrown at someone, they would be regarded as a mere prank that only made them wet.

1

It was simple to evolve the Moving Source Water as only a large amount of water-elemental energy was needed.

Lin Yuan had an abundance of water-elemental energy from the Aquamarine Elemental Shellfish and could evolve the Moving Source Water endlessly.

When the 12 balls of water evolved into 12 streams, the force of the water would even be able to damage a Gold fey seriously.

But what would happen when it became 12 great rivers or even seas?2

Nonetheless, Lin Yuan would be happy if the Moving Source Water could evolve into rivers. At that time, Flowing would have disastrous effects.

The Moving Source Water could consume heavy water’s water-elemental energy and characteristics.

After the Moving Source Water absorbed heavy water, it would have even greater power than 12 great rivers.

‘The water-element characteristics included the undercurrents of rivers and aquatic plants that were ready to drown a person at any moment.

Flowing would be able to create energy from the rate of water flow in the Moving Source Water.

This would allow the Moving Source Water to fly to the sky.

'When the Moving Source Water evolved to rivers, it would be able to surround the Floating Island Whale in the sky and form an endlessly moving net of water to protect the Floating Island Whale.

The air currents caused by the flowing water would also be able to increase the rate at which the Floating Island Whale moved.

'The Moving Source Water and the Floating Island Whale were perfectly compatible because of the Flowing ability.

Along with Gray's presence, the 12 rivers in the sky would also be shrouded in fog.

This would make it difficult to spot the Floating Island Whale.

As Lin Yuan looked at the Moving Source Water, he said to the Sacred Source Wielding Queen, "Circulate your soul power with me so that we can form a contract with the Moving Source Water."

The Sacred Source Wielding Queen pouted, and its hair stood on end. It looked like the little match girl looking at the table full of food.

But as much as the Sacred Sword Wielding Queen wanted to eat the Moving Source Water, it still obediently followed Lin Yuan's instruction to circulate its soul power.

Soon, Lin Yuan's soul engulfed the Moving Source Water, and he imprinted his soul onto the Moving Source Water.

At that moment, he became the Moving Source Water's owner.

He realized that it was still intelligent despite being a ball of water-elemental energy.

The Normal I/Normal Moving Source Water was already more intelligent than the Gold X/Fantasy II Source Sand.

Lin Yuan guessed that this was due to the Moving Source Water previously being a sacred source lifeform.

After Lin Yuan became the Moving Source Water's owner, he ordered it to use the full power of Flowing.

He sensed the 12 balls of water start to pulse violently.

Lin Yuan reached out to touch one of the balls of water and immediately sensed overwhelming resistance coming from below the water's surface.

The rapidly moving water was like a shield that kept everything out.

But no matter how quickly the water moved, it could not keep Lin Yuan's hand out.

When Lin Yuan pushed his hand into the water, he felt the flowing water tread around his fingers as though there was a vortex in the middle of the ball of water that was trying to suck his hand in.

Lin Yuan gained a basic understanding of the Moving Source Water's defensive and attacking powers.

He crushed one water-element heavenly-maiden-grade elemental pearl and split the powdered elemental pearl into 12 portions that he fed to the 12 balls of water.

After the 12 balls of water absorbed the water elements in the heavenly-maiden-grade elemental pearl powder, they soon made the water elements as part of their own, and the Moving Source Water evolved to Elite/Epic.

The balls of water also grew from the size of a fist to being able to contain a grown adult.

Luckily, the Spirit Lock spatial zone had expanded after it evolved. Otherwise, the 12 large balls of water would cause the Spirit Lock spatial zone to become cramped.

### **Chapter 1034: Ancestor of Water**

Lin Yuan was not surprised by the Moving Source Water's evolution as it did not need spirit qi to evolve but only water-elemental energy.

Elite grade feys would only reach Epic quality at most.

If the Moving Source Water could reach Bronze grade, absorbing one heavenly-maiden-grade elemental pearl would allow it to evolve to Legend quality.

Although using water-elemental energy to evolve the Moving Source Water seemed simple, it was also a form of abuse because the purity of the water-elemental energy in the Moving Source Water had to be maintained in order to guarantee its quality.

If the purity of the water-elemental energy fell, the quality of the Moving Source Water would also drop.

Clearly, the Moving Source Water required a large mountain of resources.

However, Lin Yuan felt that the Moving Source Water was the easiest fey for him to cultivate.

The heavenly-maiden-grade elemental pearls, which were extremely precious to others, were nothing but resources that were produced by the pile every minute.

Lin Yuan also saw the Moving Source Water's new ability.

[Halted Flow]: It can separate from the main body and turn all the water-elemental energy in the body into raging energy that shoots toward the target.

Lin Yuan raised an eyebrow.

Halted Flow was extremely rough and did not have multiple uses like Flowing did.

All it did was attack a target with water.

This made Lin Yuan think of a crashing waterfall.

For example, the Chi Dragon Cliff Waterfall in the Radiance Federation was 3,000 meters tall.

Water was extremely soft, but the 10,000 tons of water that fell from such a high point would be enough to cause a large hole tens of meters deep.

Once the Moving Source Water became rivers and used Halted Flow, Lin Yuan would be able to send rivers crashing down from the sky.

As he looked at the Moving Source Water, Lin Yuan planned on testing the power of its abilities.

However, he would not use himself as part of the test.

He shook his sleeve, and the amber-button-shaped Source Sand immediately turned into a pile of sand.

Lin Yuan used Close Guard Sand to wrap around his right hand and created a layer of ferromanganese.

He ordered the Moving Source Water to use Flowing and reached his hand wrapped in Source Sand into the Moving Source Water.

After Lin Yuan broke through the powerful resistance, he immediately felt the pull from the center of the Moving Source Water. It was as though it wanted to suck his entire body into the water.

Lin Yuan hurriedly instructed Source Sand to grab onto his leg to steady his body.

The Elite Moving Source Water could probably pull a weight of 100 kilograms.

Since Lin Yuan's hand was covered in the layer of ferromanganese, he did not feel any difference while inside the Moving Source Water.

However, Lin Yuan could tell that many small and sharp currents were cutting into the ferromanganese.

Apparently, the body of water not only grew larger but also had a new attacking feature.

After this test, Lin Yuan was very clear about the Halted Flow's power.

Soon, Lin Yuan instructed the Source Sand to form a large area of quicksand before ordering the Moving Source Water to use Halted Flow and direct the water into the quicksand.

'The water exploded upon contact with Source Sand and formed a pillar of water.

Lin Yuan noticed that the pillar of water was much larger than the Moving Source Water's body.

This meant that the Moving Source Water was a body of highly compressed water.

As he sensed the attacking power of the quicksand, Lin Yuan could tell that the Elite/Epic Moving Source Water had an attacking power equivalent to 400 kilograms of force.

Lin Yuan glanced at the Spirit Lock spatial zone before taking the Moving Source Water and a handful of water-elemental pearls with him out of the Spirit Lock spatial zone.

He planned to quickly evolve the Moving Source Water's grade and choose from one of three exclusive skills when it reached Bronze.

Lin Yuan immediately left the mansion and headed to the Submerged Flood Dragon Lake.

'The Moving Source Water followed him. But, it no longer looked like balls of water. Instead, it looked like 12 moving snakes.

It only turned back into balls of water when Lin Yuan stopped.

He tossed the handful of heavenly-maiden-grade elemental pearls into the Moving Source Water.

The Spirit Craftsmen building the pavilions on the Sunlight King Lotus' leaves saw the suspended balls of water around Lin Yuan grow larger and started to spin until they turned into 12 transparent blue water dragons.

As the Moving Source Water grew larger, its grade evolved.

'When the Moving Source Water reached Bronze, Lin Yuan noticed three exclusive skills.

[Scorching Water]: The hottest thing in the world is not necessarily fire. It can also be water. When subjected to high pressure, the temperature of the water can expand and start to bubble. The water can become even hotter than lava.

Lin Yuan shook his head wordlessly.

He felt that this exclusive skill was rather humorous. It was not surprising that water could be hotter than fire.

Many types of heavy water were hot.

For example, the Flame Sea Melting Water's temperature could compare to or even be higher than that of strange flames.

If Lin Yuan wanted to use this high-temperature attack, he could just order the Moving Source Water to absorb heavy water with fire characteristics.

This would save one of the Moving Source Water's exclusive skills.

Now that he had cast the first exclusive skill aside, Lin Yuan moved on to check on the second exclusive skill.

### **Chapter 1035: The Shrine in Lin Yuan's Soul**

[Ancestor of Water]: Every time a water-elemental feature is added, there will be increased control over water-type feys. Once the water elements reach a certain extent, it will be able to use various water-elemental characteristics to manipulate an area of water.

Lin Yuan's eyes lit up.

The Ancestor of Water would be able to take out any water-type fey.

If the Moving Source Water chose Ancestor of Water, Lin Yuan would be able to have an advantage over all water-type feys he encountered in the future.

It would be difficult for most people to increase the water elements in the Moving Source Water.

However, this was easy for Lin Yuan. All he needed was heavy water as every type of heavy water contained a unique water-elemental characteristic.

Although water world dimensional rifts were the rarest amongst all dimensional rifts, they occasionally appeared in cities that were close to the sea, like Indigo Azure City.

Obtaining heavy water would be no issue as long as he had resources and the proper channels.

Moreover, Yin Lin also planned to use heavy water to trade for heavenly-maiden-grade elemental pearls with him.

Yin Lin wanted to use the Radiance Azure Waterway. Given the Island Whale's speed, it would be able to make four or five trips in a year.

Hence, she would probably trade for a large amount of heavenly-maiden-grade elemental pearls each time, allowing Lin Yuan to gain a large amount of heavy water as well.

However, the absorption of the heavy water's characteristics was not due to Ancestor of Water but rather the Moving Source Water's innate ability.

Ancestor of Water could only target water-type feys.

Although it held absolute power over water-type feys and could control other areas of water using water elements, it was still very limited.

Lin Yuan decided to see the third exclusive skill before making a decision.

If the third exclusive skill was just as useless as the first one, he would pick Ancestor of Water.

However, when he saw the Moving Source Water's third exclusive skill, he was stunned.

[Power Water Soul]: Choose a power and condense it into the soul of the Moving Source Water. Any power can be chosen, but the choice cannot be undone. The power will affect the Moving Source Water's future abilities and exclusive skills. When the Moving Source Water receives a certain level of feedback

from the power, the Moving Source Water can comprehend any Willpower Rune according to the water-elemental characteristics in its body.

At that moment, Morbius' voice sounded in Lin Yuan's head. "Yuan, the Moving Source Water is interesting, The Power Water Soul will allow you to gain a new type of strength."

Lin Yuan was surprised to hear Morbius' voice.

He had evolved feys in front of Morbius before. However, Morbius had never commented on another fey's abilities or exclusive skills.

In the depths of Lin Yuan's soul, the Sacred Sword Wielding Queen pursed its lips when it heard what Morbius said.

The Sacred Sword Wielding Queen remembered that when it was combined with the Sacred Sword, it had scorned Morbius that could not even understand it.

Yet, Morbius was now complimenting the Moving Source Water.

Lin Yuan wondered what the part about choosing a power and condensing it into the Moving Source Water's soul meant.

Lin Yuan had experienced three types of powers-spiritual, source-type, and faith power.

It was easiest for Lin Yuan to obtain spiritual power, and it was also the power that was the most prominent in the main world.

Most of Lin Yuan's feys depended on spiritual power to evolve.

Source-type power was the Sacred Source Wielding Queen's specialty as it could extract source-type power from Law Source Crystals and World Source Crystals to evolve the completed laws in its skirt.

It could also transfer its source-type power to dimensional lifeforms and make them into Apostles.

Lin Yuan had already gained perfect control over source-type power and spiritual power.

This meant that the only power left to control was faith power.

"Morbis, are you referring to faith power?"

Morbis nodded and said happily, "Yuan, faith power comes from the heart. When someone adores and admires you, they're giving you faith power. Faith power won't just vanish. Instead, it's stored in your body. You just can't feel or use it. If you choose the Power Water Soul and make faith power the Moving

Source Water's soul, the faith power will no longer be locked within you. Instead, it'll turn into a type of power that you can use."

Lin Yuan looked at his hands. He did not expect there to be faith power locked within him that he was unaware of.

Faith power was the type of power used by Apostles in the dimensional world.

If he could utilize faith power, he would become a makeshift Apostle as well.

Besides the benefit of obtaining a new power, Power Water Soul also added a limitation to the Moving Source Water.

Normally, the Moving Source Water could absorb the characteristics of heavy water without limitation.

However, Power Water Soul would cause the Moving Source Water only to be able to absorb one kind of water-elemental characteristic.

This would weaken the Moving Source Water in a way and make its abilities more distinct.

Lin Yuan's biggest dilemma was that the Moving Source Water could use Power Water Soul to comprehend a Willpower Rune.

Although this meant that Lin Yuan did not need to provide the Moving Source Water with a Willpower Rune, all 12 balls of water needed to comprehend Willpower Runes for it to evolve to Myth Breed.

Lin Yuan felt that this was too difficult.

But eventually, Lin Yuan decided to choose Power Water Soul as the Moving Source Water's exclusive skill.

As complicated as it was, it was undeniably much stronger than Ancestor of Water.

After Lin Yuan chose Power Water Soul, 12 transparent blue streaks of water shot out and surrounded Lin Yuan as though they were trying to awaken his soul.

Lin Yuan needed to inject faith power into the Moving Source Water to choose faith power as the Moving Source Water's soul.

He felt lucky that he had contracted Wendy and Rising Lizard. Otherwise, he would not have any faith power to use.

Lin Yuan summoned Wendy and injected its totem's faith power into the Moving Source Water.

'The moment that the Moving Source Water felt the faith power, Lin Yuan felt a power awaken within him.. Then, a... shining golden shrine appeared in his soul!

### **Chapter 1036: Mermaid**

The shrine did not have any effect on Lin Yuan's soul, but his soul used to be the sole territory of the Sacred Sword Wielding Queen.

The Sacred Sword Wielding Queen could not help but want to touch the shrine that suddenly appeared.

Lin Yuan sensed that a power different from spiritual power and source-type power had awakened in his body.

He was surprised by this hidden power as it was much more intense than the spiritual power in his body.

Just as Lin Yuan was about to utilize the power, the doors of the shrine in Lin Yuan's soul opened, and 10,000 amber spots of light shot out.

This made the Sacred Sword Wielding Queen jump in fright.

The amber spots of light continued to pour forth from the shrine, and an amber gossamer vest appeared on Lin Yuan's actual body.

The amber vest was formed from concentrated faith power.

This sight stunned all the Spirit Craftsmen working on the Sunlight King Lotus.

All of them stopped working and turned their attention to Lin Yuan. They all regretted not immediately taking up Hu Quan's offer of working in isolation.

Freedom was nothing compared to Bronze/Epic feys.

Moreover, they would only have to be away for a decade at the most and would receive twice their normal pay.

The more daring Spirit Craftsmen were wondering if they should try their luck and ask Lin Yuan if they were still able to join.

However, the materialization of the amber vest on Lin Yuan stopped the Spirit Craftsmen.

Lin Yuan looked like a prince as he stood at the edge of the Submerged Flood Dragon Lake. He looked extremely natural and amicable.

'The moment the amber vest appeared, Lin Yuan's aura completely changed.

He no longer looked like a human. Rather, a celestial being that had just descended.

This aura made Lin Yuan feel as though he would be able to stain the sky red with a wave of his hand and dip a brush in to write on the Submerged Flood Dragon Lake.

The change to Lin Yuan dumbfounded all the Spirit Craftsmen in the Submerged Flood Dragon Lake.

Wendy clung to Lin Yuan and sniffed the faith power emanating from him.

The faith power soothed it and made the totem on its body light up.

Lin Yuan did not notice any of this because he was mesmerized by the faith power coming from his soul.

He knew that every spot of light that flew out of the shrine represented a person that had faith in him.

Lin Yuan did not expect that in his humble and subdued life, so many people had faith in him.

He immersed himself in the faith power and felt as though he could see every individual life that had faith in him.

Some larger spots of light were in the center of all the spots of light.

Lin Yuan realized that they came from Chu Ci, Liu Jie, Wen Yu, Listen, and the rest.

He could not help but smile when he felt their faith.

The only part that Lin Yuan had a problem with was that he did not know how to use the faith power.

He injected his faith power into Wendy and realized that Wendy could not absorb it.

But after Wendy sensed his faith power, it would be able to stimulate its own faith power.

Lin Yuan placed his hand on Wendy's totem and circulated his faith power to engage the faith power stored in Wendy's totem.

The faith power in Wendy's totem was naturally pulled toward Lin Yuan, and it would flow into his body at any moment.

Lin Yuan hurriedly stopped moving.

Faith power was the root power of Apostles, and any tampering would result in serious damage.

Wendy was Lin Yuan's fey, so he did not want to harm it.

Lin Yuan sensed that the Moving Source Water was yearning for something, It was as though it needed more faith power to complete its weak soul.

Lin Yuan had used his soul to contract the Moving Source Water, and it was a part of Lin Yuan's power. He did not reject the Moving Source Water and injected his faith power into the Moving Source Water to improve its new soul.

Lin Yuan wanted to see how much the Moving Source Water would be able to benefit from the faith power in his body.

'When he injected his faith power into the Moving Source Water, all 12 balls of water started to glow amber.

The 12 balls of water started to glow brighter, and even the blue water below the 12 balls of water turned tea-colored.

At that moment, the 12 balls of water joined together and became a three-meter long, hundred-meter-tall tea-colored waterspout.

The amber light was centered in the eye of the waterspout as though something was going to be birthed from the waterspout.

Lin Yuan increased the rate at which he injected faith power into the Moving Source Water.

Just as the shrine in Lin Yuan's soul was about to be emptied, a blue girl appeared from the center of the tea-colored waterspout.

The girl crossed her arms around her body, and the water around her transformed into her skirt and hair.

The swaying of the skirt revealed a fishtail.

As the fishtail moved about, the young girl's body elongated.

At that moment, she opened her eyes and waved her hands.

The enormous waterspout turned into 12 twirling hoses.

The 12 hoses wrapped around Lin Yuan, and the girl flapped her tail as she said, "Master, thank you for waking me up. Please give me a name."

Lin Yuan's eyebrow twitched as he gazed at the mermaid.

The process by which he created this mermaid seemed similar to the transformation of source-type feys when they evolved to Myth II.

However, it was fundamentally different..

### **Chapter 1037: Faith Application**

The mermaid seemed like a newly born sacred source lifeform.

Lin Yuan remembered the Sacred Sword Wielding Queen asking him for a name at the beginning as well.

However, the mermaid would not live in Lin Yuan's soul like other sacred source lifeforms.

The mermaid casually swished its hair and looked slightly hurt. It was like a little girl trying to get closer to its parent but was received coldly.

Lin Yuan hastily said, "Let's call you Dark Blue!"

The mermaid murmured the name to herself and smiled innocently.

The cool water splashed across Lin Yuan's face.

The hoses around Dark Blue were clearly smaller than the pillar of water, so he asked, "Dark Blue, can you control the size of the hoses?"

Dark Blue nodded and replied gently, "Master, I can control the size of the hoses by adjusting the concentration of water elements."

Its blue hair lifted as it flapped its tail.

The 12 hoses changed into 12 blue strands that wrapped around Dark Blue's tail.

Dark Blue flapped its tail, and the 12 strands started to expand rapidly until they were enormous pillars that were 50-meters-long and half a meter wide each.

Now that Lin Yuan knew that Dark Blue could easily control the size of the hoses, he said, "Dark Blue, wrap the 12 hoses around your tail. I'll give you more water-type heavenly-maiden-grade elemental pearls to increase your power."

Dark Blue nodded happily.

Nothing made a fey happier than when it could increase its power.

Just as he was about to take Dark Blue back to the Spirit Lock spatial zone, Lin Yuan looked at the Spirit Craftsmen and noticed that there were several faint spots of amber light on the Spirit Craftsmen's heads.

There were about 20 Spirit Craftsmen that did not have amber spots of light on their heads.

Lin Yuan blinked in amazement. After awakening his faith power, he did not expect himself to see the world differently.

Now, he could decide how close he was with another person by seeing their faith in him.

He looked at Wendy and asked, "Wendy, do you know where your faith power is coming from?"

Wendy shook its head in confusion.

Morbius explained, "Faith power comes from feelings. Different feelings result in different faith power. The blessings of elders, the firmness of friendships, and the admiration and respect of experts all result in faith power. However, love is not included.

"Yuan, you can tell if others are providing you with faith power and how much faith power they're providing you with to see if they have other intentions against you."

Lin Yuan immediately understood what Morbius meant.

If a person seemed friendly but did not provide him with any faith power, they would not be sincere.

There was also the possibility that they loved him.

Everyone desired this power because it gave one the ability to see into another person's heart.

Lin Yuan noted the Spirit Craftsmen who did not have faith in him. He would not provide them with any resources besides their original wage.

Once he brought Dark Blue back to the Spirit Lock spatial zone, he took out all the water-type heavenly-maiden-grade elemental pearls and fed them to Dark Blue.

Given the concentration of spirit qi in the Spirit Lock spatial zone, there was no need to stock up on water-type heavenly-maiden-grade elemental pearls.

The rate at which the Aquamarine Elemental Shellfish produced heavenly-maiden-grade elemental pearls was sufficient for the Floating Island Whale.

Even after consuming a whole trunk-load of heavenly-maiden-grade elemental pearls, Dark Blue's grade did not rise as quickly as Lin Yuan expected.

Lin Yuan immediately realized the crux of the matter.

The important part of the heavenly-maiden-grade elemental pearls was their purity and not their quantity.

All that heavenly-maiden-grade elemental pearls were only enough to evolve Dark Blue to Gold II/Legend.

Lin Yuan checked on Dark Blue's True Data.

(Fey Name]: Moving Source Water (Stream)

[Eey Species]: Source genus/Sacred Source Species

[Fey Grade]: Gold (2/10)

(Eey Type]: Water

[Fey Quality]: Legend

Abilities:

[Flowing]: The water will rush rapidly, and the energy from the water can allow the water to flow in any location.

[Halted Flow]: It can separate from the main body and turn all the water-clement energy in the body into raging energy that shoots toward the target.

[Faith Water]: Change faith power into a warm stream of water that can nurture other lifeforms that use faith power. Faith Water can increase the rate at which faith power heals and replenishes the lifeform and slows down the faith power in larger bodies. Faith Water can also be used to draw back faith

power that was given out, along with any additional faith power that was gained by the target.

[Faith Application]: The owner can be combined with the Moving Source Water and use all the power in the Moving Source Water. The owner can also inject faith power into the Moving Source Water to increase the strength of the Moving Source Water's abilities.

Exclusive Skill:

[Power Water Soul]: Choose a power and condense it into the soul of the Moving Source Water. Any power can be chosen, but the choice cannot be undone. The power will affect the Moving Source Water's future abilities and exclusive skills. When the Moving Source Water receives a certain level of feedback from the power, the Moving Source Water can comprehend any Willpower Rune according to the water-elemental characteristics in its body.

Lin Yuan was elated when he saw the Dark Blue's two new abilities.

He was most excited about Faith Water as it would allow the faith power in Wendy and Rising Lizard's totem to increase rapidly.

### **Chapter 1038: Gray is a Heavenly Family Fey?**

When Lin Yuan evolved Wendy and Rising Lizard, he would also be able to receive faith power.

Although he was still in the experimental phase of using his faith power, it would still increase the amount of faith power storage of the shrine in Lin Yuan's soul.

According to the description of the abilities, Faith Water would be able to change Dark Blue's body into an item.

If Lin Yuan gave Faith Water to the rest of the Apostles in the marsh world, would he be able to gain the friendship of the other Apostles?

If this were possible, the Apostles in the marsh world would all become his tools, and he would be able to use them to gather faith power.

Lin Yuan planned on testing this possibility.

Faith Application would allow Lin Yuan to use his faith power to strengthen Dark Blue's abilities.

Faith Application seemed similar to Xin Ying's Gold cat-species fey's Fusion.

As he looked at Dark Blue, Lin Yuan wondered if he would become a merman as well when he fused with Dark Blue.

However, Lin Yuan had never heard of a merman.<sup>4</sup>

He stopped thinking about the matter as Faith Application was not an absolutely necessary ability to him.

'When he faced strong opponents, he had other methods to combat them.

Lin Yuan took Dark Blue out of the Spirit Lock spatial zone and appeared next to the Submerged Flood Dragon Lake again.

Dark Blue was now much larger than when it was Bronze, and there were many accessories made of water elements on its body. There were even seals embossed on Dark Blue's scales.

Lin Yuan said, "Dark Blue, release water-elemental energy so that I can see what your water has become."

True Data had stated that Dark Blue's water had reached the level of streams.

Dark Blue waved its tail, and the 12 threads around its tail became 12 50-meter-long and 10-meter-wide streams.

Lin Yuan could tell how turbulent they were from the thrashing light within the streams.

In order to protect the mansion's decorations and environment, Dark Blue directed the 12 twirling streams toward the sky.

Lin Yuan felt that the moment the water stopped, a giant waterfall would crash down from the sky.

All the Spirit Craftsmen working on the Sunlight King Lotus watched this unfold in astonishment.

He did not know how the Spirit Craftsmen were feeling, but the spots of light that represented their faith had become larger.

A few of the Spirit Craftsmen who had not had lights on their head earlier now had them as well.

Nonetheless, Lin Yuan did not change his mind about these Spirit Craftsmen who had just started to have faith in him. It was not worth it for him to spend resources to nurture these Spirit Craftsmen.

At that moment, Morbius, Genius, and Chimey's voices echoed in his head.

"Yuan, come back to the Spirit Lock spatial zone. Something's wrong with Gray! No, something is wrong with the Spirit Lock spatial zone!"

Lin Yuan immediately brought Dark Blue back with him to the Spirit Lock spatial zone.

Once he entered the Spirit Lock spatial zone, he felt his hair stand on end.

It looked as though the Spirit Lock spatial zone had been the scene of a robbery.

Lin Yuan saw that all the spirit qi and elemental pearls were flying toward the egg that Gray was in.

Amist had appeared around the shell, and it seemed like a hungry child.

Lin Yuan needed to make a decision.

He did not know how long Gray had been absorbing spirit qi at this rate.

If it had been going on for some time, the Floating Island Whale and Elemental Shellfish would have been affected.

The spirit pool was like flood gates that had been opened, and it revealed the energy ores in the golden discs.

Lin Yuan hurriedly took out the golden discs and noticed that over 80 of them no longer had any energy ores.

He realized that he had not checked on the depletion of spirit qi in the Spirit Lock spatial zone for a month.

He hurriedly took energy ores out of his storage and poured them into the golden discs.

After some contemplation, Lin Yuan decided not to stop what was happening to Gray.

Gray was consuming the pure elemental energy from the elemental pearls alongside the spirit qi.

A hypothesis was formed in Lin Yuan's mind.

He remembered the Moon Empress mentioning to him during a question-and-answer session that earth-shattering changes accompanied the birth of Heavenly Family Feys.

However, the birth of Heavenly Family Feys had such serious repercussions that it always drew the attention of many feys.

The newly hatched Heavenly Family Feys were extremely nutritious to other feys.

Hence, without the protection of strong feys, it was difficult for the Heavenly Family Feys to continue surviving.

Since the Spirit Lock spatial zone was 160-square-meters wide, it was difficult to tell the changes that were taking place.

If they were outside the Spirit Lock spatial zone, Gray's absorption of spirit qi and elemental energy would empty out all the spirit qi and elemental energy from around the Royal Capital. This would result in earth-shattering repercussions.

Every Heavenly Family Fey required a large number of resources to hatch.

If the resources were insufficient, the Heavenly Family Fey would hide its bloodline within itself and degrade a portion of its genetic model to preserve its life.

'The degraded portion of the genetic model was as good as lost, and it was almost impossible for it to surface again.

Lin Yuan had been slightly curious when Gray evolved to a Heaven and Earth fey.

Now, it seemed that a large portion of Gray that he had discovered in the Endless Forest when it had just hatched and still had an incomplete genetic model was a Heavenly Family Fey whose genetic model had been degraded to preserve its life.

But now, Gray had the chance to regain the lost genetic model due to the spirit qi and elemental energy available in the Spirit Lock spatial zone.

After it regained its genetic model, Gray would become the Heavenly Family Fey that it rightfully was.

‘This was the chance that Gray had fought for itself, and Lin Yuan did not plan on becoming a burden to it.

Gray seemed to have absorbed enough spiritual power in less than two minutes and stopped itself.

‘The spirit qi the poured forth from the spirit pool quickly enabled the concentration of spirit qi to reach its peak.

Lin Yuan let out a sigh of relief.

However, he soon inhaled that breath back in sharply..

### **Chapter 1039: Lin Yuan has Zero Resources**

Although Gray had stopped absorbing spirit qi, it was still absorbing the elemental energy from the elemental pearls.

One by one, the elemental pearls with outer layers flew toward Gray’s egg.

The various elemental pearls shattered upon contact with Gray’s egg, and Gray relaxedly absorbed the pure energy.

Lin Yuan felt himself go slightly numb as he watched the heavenly-maiden-grade elemental pearls being used up.

‘The heavenly-maiden-grade elemental pearls used to be able to form a small mountain in the Spirit Lock spatial zone.

But the seven different Bronze/Legend Elemental Shellfish produced heavenly-maiden-grade elemental pearls at a high rate, and Lin Yuan had been rather busy the last month.

‘The Wind Speed Rapid Antelope had separated the elemental pearls by type and did not pick out those with outer layers.

Hence, Lin Yuan still had not had the chance to store these heavenly-maiden-grade elemental pearls.

‘There were fewer earth-type and water-type heavenly-maiden-grade elemental pearls because he had fed them to the Kill Food Sky Butterfly and Dark Blue.

Meanwhile, there were close to 2,000 fire-type and wind-type heavenly-maiden-grade elemental pearls.

However, before Lin Yuan could feel any reluctance about these depleted heavenly-maiden-grade elemental pearls, he felt Gray’s desperate craving for elemental energy.

Naturally, he could not take Gray out of the Spirit Lock spatial zone so that it could absorb the elemental energy from the natural surroundings.

‘The repercussions caused by a hatching Heavenly Family Fey would be so serious that not even he, the Moon Empress’ disciple, would be able to handle it.

The changes that would take place would be visible not just in the Radiance Federation but also in the other federations of the main world.

Given how precious Heavenly Family Feys were, their hatching would definitely be the start of ill-intent from other federations.

The Radiance Federation was powerful enough that the other federations would not dare to start direct confrontations. However, any federation with the Island Whale would be able to cross the seas to secretly start trouble in the Radiance Federation as well as search for the Heavenly Family Fey.

This would definitely cause trouble for the Radiance Federation.

Moreover, there were other powerful beings in the world besides humans. There were also some powerful feys that had started their own private factions, albeit there were none in the Radiance Federation. Even if there were, they would have been disbanded by the Spirit Guards.

However, there were numerous private factions started by feys in other federations.

Heavenly Family Feys were much more attractive to powerful feys than they were to spirit qi professionals.

Lin Yuan dared not imagine the consequences of numerous strong feys changing into human form and infiltrating into the Radiance Federation.

Lin Yuan was slightly concerned over what would happen when the Mother of Bloodbath broke through Myth III.

If the Mother of Bloodbath really managed to awaken its Sky Sundial Jade Spider bloodline, it would definitely transform just like Gray.

However, the Mother of Bloodbath and Gray's situations were different.

The Mother of Bloodbath needed to overcome three World Cleansings, and Lin Yuan could not take it back to the Spirit Lock spatial zone.

'The earth-shattering repercussions that accompanied the Mother of Bloodbath's transformation were bound to happen.

He let out a sigh.

"This sure is a headache!"

A thought struck him, and his eyes lit up.

When the Mother of Bloodbath transformed into a Heavenly Family Fey, he could take it to the Divine Wood Federation.

'Whatever happened in the Divine Wood Federation would not be any of his concern. He might even be able to gain benefits during the chaos in the Divine Wood Federation.

Since Gray craved elemental energy, he could not take it out of the Spirit Lock spatial zone as elemental energy was not as abundant in the outside world.

'Thus, Lin Yuan had to take out the elemental pearls in the amber-button-shaped Diamond fey storage box that he had organized a month before.

There were 1,000 elemental pearls of each type.

Lin Yuan regarded the 4,000 heavenly-maiden-grade elemental pearls as his stored goods meant for emergencies.

He did not even use them to recover the Kill Food Sky Butterfly's bloodline or evolve Dark Blue.

At that moment, Lin Yuan felt that he had good foresight.

If he had not saved these 4,000 heavenly-maiden-grade elemental pearls, Gray's evolution to Heavenly Family Fey would have failed.

However, Lin Yuan could not guarantee that the 4,000 heavenly-maiden-grade elemental pearls would be enough for Gray.

Nonetheless, he no longer had any more heavenly-maiden-grade elemental pearls.

Even if it was insufficient, he had tried his best and would only not be able to do anything else.

Regardless of how many heavenly-maiden-grade elemental pearls Gray needed, Lin Yuan opened the box and placed it in front of Gray so that it could take as much as it needed.

Within five minutes, Gray reached the bottom of the box, and its craving for elemental energy had eased.

After Lin Yuan offered up the heavenly-maiden-grade elemental pearls that the seven Bronze/Legend Elemental Shellfish just produced, Gray's egg cracked, and translucent clouds flowed out from the cracks.

Acrane emerged before Lin Yuan, and an adorable and hurt voice said, "Dad, I used too many precious resources. I didn't do it on purpose. I just couldn't control my need for elemental energy."

Lin Yuan was shocked.

He regarded all his feys as his children.

However, this was the first time that one of them called him 'Dad'.

This gave Lin Yuan an odd feeling.

Gray was truly a Heavenly Family Fey as it could speak from the moment it hatched.

From Gray's words, it seemed that it remained conscious while in its shell.

Since Lin Yuan had given the heavenly-maiden-grade elemental pearls to Gray, he would not blame it.

"It's okay, Gray. As long as I have any left, you can use as many heavenly-maiden-grade elemental pearls as you need.."

## Chapter 1040: Cloudy Weather

“Luckily, you don’t need any more heavenly-maiden-grade elemental pearls. Otherwise, I wouldn’t have enough for you.”

Previously, if all the heavenly-maiden-grade elemental pearls in the Spirit Lock spatial zone were used up, Lin Yuan would still have some in storage.

But now, he did not have a single heavenly-maiden-grade elemental pearl besides those that the seven Bronze/Legend Elemental Shellfish were currently producing.

Gray proclaimed in a clingy tone, “Dad, I love you.”

The crane silhouette wrapped in light mist moved toward Lin Yuan, and he soon felt a weight land in his arms. He felt a pair of wings wrap around him, but he could only see a cloud when he looked down.

It was only when he took a closer look that he could make out the silhouette of a crane.

Lin Yuan was shocked by Gray’s ability to obscure itself.

He was so close to Gray but could not see it unless he focused.

If Gray were flying in the sky and hidden amongst the plumes of clouds, not even feys that were skilled at surveillance would be able to spot Gray easily.

Lin Yuan decided to check on Gray’s True Data to see if it had truly transformed into a Heavenly Family Fey after absorbing so much pure spirit qi and elemental energy.

(Fey Name]: Sky Clouded Crane

[Eey Species]: Crane species/Red Crane species

[Fey Grade]: Normal (1/10)

(Eey Type]: Natural

[Fey Quality]: Normal

Abilities:

[Cloudy Weather]: The body will present itself as a cloud and will be compatible with any weather. The body can absorb the weather. Once the weather is absorbed into the cloud, it will become a new ability. No new abilities will come from evolution.

Lin Yuan’s eyes narrowed as his face stretched into a smile.

According to Wen Yu’s information, Lin Yuan knew that he could use a fey’s type to discern if it was a Heavenly Family Fey.

Amongst all the feys, only Heavenly Family Feys were natural-type.

Now, Lin Yuan was certain that Gray was genuinely a Heavenly Family Fey.

Lin Yuan also finally knew that Gray looked like a shapeless cloud because of the ability Cloudy Weather.

Cloudy Weather could combine active and passive abilities.

Gray's current form was Cloudy Weather's passive ability, and it amazed Lin Yuan.

Heavenly Family Feys needed more than just spirit qi to evolve. They also needed energy from the natural world.

This was why Heavenly Family Feys were natural-type.

For example, once the Mother of Bloodbath evolved to the Sky Sundial Jade Spider, it would need to absorb energy from the sun.

Unlike the Sky Sundial Jade Spider, Gray needed to absorb the energy from various weather conditions.

The weather conditions could include clear weather, cloudy weather, rainy weather, snowy weather, and so on.

Gray would then need to absorb the weather into its cloud and produce a new ability.

This would allow Gray to create multiple new abilities.

There were also limitations to the abilities that could be created.

There would not be any new abilities when Gray evolved.

From True Data, Lin Yuan also knew that the created abilities could be strengthened continuously.

If Gray absorbed the same type of weather more than once, the ability that came from that type of weather would be strengthened.

While Lin Yuan was looking at Gray's True Data, he felt a strange spiritual fluctuation.

Soon, Lin Yuan noticed that a tight link had been formed between him and Gray.

The link was Gray's method of contraction.

Before Gray hatched, Lin Yuan had sliced open his palm multiple times to allow his blood to drip onto Gray's shell.

This was so that Gray would form an attachment to his bloodline and want to form a contract with him when it hatched.

Gray was the first Heavenly Family Fey with which Lin Yuan had formed a contract.

As a Heavenly Family Fey, Gray needed to comprehend a Willpower Rune from the environment itself.

Hence, Lin Yuan would not need to prepare a Willpower Rune for it.

Neither of the Willpower Runes available in Lin Yuan's mind were suitable for Gray.

"Dad, I want to eat the fish you gave me last time."

Gray looked rather bashful as it made its request, as though it felt embarrassed to be asking for food from Lin Yuan.

Lin Yuan hurriedly took out the fish from the amber-button-shaped fey storage box that he had prepared for Gray.

Lin Yuan had put in a lot of effort in order to help Gray put some meat on its bones.

He had fed the fish feys with medicinal properties so that Gray would be nourished by the fish when it consumed them.

Since Gray had suddenly turned into a shell, Lin Yuan had stored the fish that Gray had not finished eating.

Ever since Gray started evolving, it had not eaten.

Lin Yuan laid out the 10 fish on the ground and said, "Gray, dig in. If they are not enough, there are still 20 more in the Diamond fey storage box. Now that you're done transforming, your body has fully recovered, and you'll be able to eat even tastier food. I'll prepare new food for you over the next two days."

Gray replied obediently, "Thank you, Dad. I'm going to start eating!"

Lin Yuan felt the weight in his hands lift as Gray flew away.

The cloud flew around the fish, and one of the fish soon disappeared.

The moment one of the fish disappeared, Lin Yuan caught sight of the silhouette of a crane moving.

The 10 fish were soon gobbled up by Gray.

Lin Yuan could tell that Gray was not full but was too embarrassed to say so. As such, he poured the rest of the fish into the basin..
