Chapter 1361: Gold Leaf Boiling Balloon Flower

1

Heavenly Family Cottage would not gain any benefits by attacking the First Emperor Shark Clan. However, the seemingly eclipsed sky was the glaring truth.

If Shark Pride did not step in quickly to receive Heavenly Family Cottage's revenge, Du Miao might stop acting soon.

Hence, Shark Pride had no choice but to release its true power.

Shark Pride smiled evilly as he watched the Blood Sea Millstone and the two purple pagodas locked in a stalemate.

Night Leaning Moon thinks too much of herself if she thinks using her sacred source lifeform to fight with its celestial phenomenon is sufficient. If she were here fighting me personally, I would be afraid. Both of us are pinnacle experts. She's daydreaming if she thinks that she can kill me from so far away.

Shark Pride walked on the surface of the sea. The sea beneath it turned red with every step that it took.

It turned into its main body and flew toward the Blood Sea Millstone. When the two made contact, they fused, and a shark with a rope around it appeared in front of the Blood Sea Millstone.

The sea of blood gathered under the millstone.

The shark wagged its tail, and an immense amount of night energy was sucked into the millstone and immediately ground up.

The red residue left over from the ground-up night power turned into giant thorn-covered hands that lunged toward the purple pagodas.

One of the purple pagodas failed to dodge and was trapped in the dark red giant hands' grip.

The giant hands tried to drag the pagoda into the millstone.

The black forms that had emerged from the first three layers of the pagodas flew to the giant hands, and both sides started to engage in an aggressive tug-of-war.

Inside the imperial court of the Radiance Federation, Night Leaning Moon sat expressionlessly as she held onto the Dark Sky Prajna. Her grip was so tight that the veins in her hand turned white.

Just as she was about to activate the Dark Sky Prajna again, she sensed a pure wave of night energy shooting into the sky. This night power was enough to aid the Dark Sky Prajna.

Night Leaning Moon allowed the Dark Sky Prajna to receive and use the night power. With the help of the night power, the purple pagoda had enough power to wrench free of the dark red hands.

Another unidentifiable black demon flew out of the fourth level of the pagoda. Shark Pride widened his eyes as he was confused by Night Leaning Moon's sudden eruption of power.

At that moment, Blood New Moon was standing beside White Phoenix in his true form. Thick night power rose from White Phoenix's feathers and rose up to the night sky.

Blue Lotus' expression shifted slightly when she saw White Phoenix injecting night power into the sky.

As much as Du Miao did not want to cross Heavenly Family Cottage, the latter did not want to make an enemy of the Freedom Federation either.

Blood New Moon had activated the sun and called down the ribbon of sunlight because the Blood Sea Millstone had snapped his child's ribbon of sunlight. Hence, his action was justifiable.

However, White Phoenix's actions plainly displayed support for the Radiance Federation's Night Empress.

The Freedom Federation prioritized benefits, but they were not weak. If their benefits were threatened, their royalty would go mad.

Nonetheless, Blue Lotus did not say a word to White Phoenix as the Moon Empress had done Heavenly Family Cottage a massive favor by helping Blood Love to survive the awakening of her Heavenly Family Fey bloodline. Hence, no matter White Phoenix's illogical actions, she did not stop him.

When White Phoenix saw Blue Lotus' expression, he said seriously, "The Night Empress' night power has completely blanketed the night sky. Only she will be able to sense the night power I'm sending to the sky. As long as she doesn't mention anything, no one from the sea clans or the Freedom Federation will find out.

"The Night Empress helped Sister Jade Sundial and Blood New Moon in the past. If not for her, Little Love would probably have been killed by Fifth Page Truth, and Blood New Moon would have been killed. One of the reasons for our visit to the Radiance Federation is to find that Heavenly Family Fey that can absorb weather. We have no idea what the situation is. We might need help from the royalty to make it easier for us to find that Heavenly Family Fey in the Radiance Federation."

Blue Lotus nodded and had a feeling that the Radiance Federation and Heavenly Family Cottage were going to become close soon.

Du Miao squinted at the purple pagodas and the night sky. He could not tell what was different, but his sixth sense told him that this abrupt skyrocket in power was not normal.

He had already secured benefits through working with the First Emperor Shark Clan.

Besides the possibility of being dragged into the matter, he also would not be able to receive his benefits if the First Emperor Shark Clan was destroyed.

The First Emperor Ray Clan would definitely target the First Emperor Shark Clan.

If that happened, he would no longer be able to gain resources from the First Emperor Shark Clan.

Since the First Emperor Shark Clan had shouldered the resentment from Heavenly Family Cottage, Du Miao would take it upon himself to handle the Night Empress.

Since the Night Empress dared to cause such a large commotion in the sea near the Freedom Federation's territory, no one could blame Du Miao for releasing roiling lava onto the Radiance Federation.

Du Miao's tangerine-colored hair danced in the wind like a burning flame. It was as though there was lava flowing in his hair.

"Bloom, Gold Leaf Boiling Balloon Flower!" shouted Du Miao.

The latest_emi_sodes are on_the LIBREAD.COM. website.

Suddenly, tens of thousands of stars appeared in the dark sky. But how could these stars be appearing in a sky so dark that it even blocked out the sunlight?

It did not take long for the things in the sky that people in the main world assumed were stars to expand until they became flower seeds rapidly. However, instead of sprouting, the seeds bloomed into gorgeous five-petal flowers.

The edges of the petals were light yellow, and the color became increasingly brighter as they approached the center of the flower. The center of the flower was a fiery tangerine color.

These flowers did not have buds and seemed to be brewing something. Soon, the flower cores turned into enormous volcanoes that decorated the sky.

The volcanoes were boiling and releasing large amounts of tangerine-red lava.

These petals appeared above the Radiance Federation, and the lava started raining down.

Previously, Night Leaning Moon had not unleashed the Dark Sky Prajna's full power as she attacked the First Emperor Shark Clan. Now, Du Miao's Gold Leaf Boiling Balloon Flower was releasing a shower of lava in retaliation.

The lava was like a disaster that arrived so swiftly that the people in the Radiance Federation did not have time to react.

Even emperor-class experts felt that they were insignificant in the face of such power.

At that moment, the elderly man sitting in the Radiance Federation's imperial court jumped to his feet. He grabbed the cane next to the chair and gently rapped it on the ground.

Chapter 1362: Giant Tree Growing From the Radiance Federation

One small, delicate branch sprouted from the chair and tunneled out of the imperial court.

The roots planted themselves in the soil in the imperial court, and the branch continued to grow longer and longer.

10 meters, 100 meters, 1,000 meters, 10,000 meters, and 100,000 meters. Eventually, the tree became as thick as a dragon's torso and grew lush golden leaves like phoenix feathers. This tree covered the entire Radiance Federation.

It turned into a sturdy and protective umbrella that sheltered the Radiance Federation from the rain of lava.

The tree stretched millions of meters, shone with golden light, and received the lava falling from the sky. The tens of thousands of branches stretching from the tree and its golden leaves resembled bolts of lightning that cupped balloon flowers of lava.

It did not take long for the golden leaves to be crushed by the lava.

A look of terror came over Du Miao's face when he saw the enormous golden tree growing out of the Radiance Federation.

While Du Miao was considering whether he should continue, a raspy elderly voice boomed from the ancient golden tree. "The First Emperor Shark Clan had the gall to attack someone from the Radiance Federation over the ownership of a whale fall right outside of Raging Waves City.

"First, the Emperor Shark Clan publicly broke the agreement between the Radiance Federation and the Eight Clans of Sea Emperors and trampled all over it like it was no different than trash.

"Within a month, the First Emperor Shark Clan must send someone to the Radiance Federation to settle this matter!

"The Gold Leaf Boiling Balloon Flower has reached pinnacle 10 Stars and has the strong ability to manipulate a celestial phenomenon. However, it should not be used against the Radiance Federation. I implanted the Radiant Source Imprint in the Gold Leaf Boiling Balloon Flower. It can be removed in a year. If it's removed forcefully, you can face the consequences yourself."

Now, every living creature in the main world, from all factions and federations large and small, knew why this fight was happening.

Du Miao had noticed a change in the Gold Leaf Boiling Balloon Flower even before the raspy elderly voice spoke, but he had not had the chance to investigate the golden imprint.

When he heard the elderly man say that this was the Radiant Source Imprint, he looked extremely upset.

Another elderly voice spoke from the Freedom Federation's Freedom Mystic Temple. However, this voice sounded much more sly than the kind voice that had come from the ancient golden tree.

"The Radiance Federation started it. Although the First Emperor Shark Clan residing in the Freedom Federation has a grudge with the Radiance Federation, that does not justify the Radiance Federation taking action in our sea territory. But since Du Miao has also retaliated against you, we can consider this matter equalized. We can talk again during the Major Federation Meeting."

It had indeed been inappropriate for Night Leaning Moon to attack the First Emperor Shark Clan in the Freedom Federation's territory. However, it had been to settle a grudge.

It was different from how the Gold Leaf Boiling Balloon Flower had unleashed lava on the 32 cities in the Radiance Federation.

The elderly man from the Freedom Mystic Temple was clearly distorting the facts. He also had not mentioned the Radiant Source Imprint, which made it clear that he did not care about Du Miao's benefits at all.

However, the elderly man had voiced an important point.

The enmity between the Radiance Federation and the Freedom Federation had been ongoing for some time.

One of the Freedom Federation's royalty had died in the Moon Empress' hands, and she in turn had paid the horrible price of having her lifespan shortened to only three more years ten years ago. The bad blood between them ran too deep to be resolved.

1

If they truly started a clash to death, the entire main world would be destroyed in the process.

Hence, in order for one of them to emerge victorious, the best plan would be for each federation to send out a team to fight against each other at the Major Federation Meeting.

The elderly voice from the giant golden tree calmly agreed.

At this point, Night Leaning Moon and Shark Pride had halted their attacks.

The voice from the Freedom Federation said, "Since we're going to fight it out at the Major Federation Meeting, we should make it more exciting. If the Radiance Federation loses, I want you to set up Star Web in the Freedom Federation."

The voice from the ancient golden tree calmly replied, "If the Freedom Federation loses, you will give up one complete Class 5 Creation Master path legacy to the Radiance Federation."

The elderly voice from the Freedom Federation agreed without hesitation. It was as though he had set up countless schemes which led him to utter the words of agreement. It seemed that the Freedom Federation had absolute confidence that they were going to win the fight.

This fight between the top experts of the world who had used their fully-grown sacred source lifeforms shocked every lifeform in the world and the factions that lacked fully-grown sacred source lifeforms. These factions now knew how important fully-grown sacred source lifeforms were.

1

However, the shock they felt about the fight could not compare to the overwhelming excitement they felt when they heard the stakes of the battle.

Star Web was the Radiance Federation's specialty and completely unique to them.

Star Web was a coincidental creation that came from three sacred source lifeforms. One of them had been a fully-grown sacred source lifeform.

If the Freedom Federation wanted the Radiance Federation to bet Star Web, it would be the equivalent of asking the Radiance Federation to give up the second world that they prided themselves on.

Any federation that possessed Star Web would be able to expand rapidly.

The latest_epi_sodes are on_the LIBREAD.COM. website.

However, the Freedom Federation's stake was equally astonishing.

The Memory Stone was one of the Freedom Federation's Secure Federation Treasures. It could copy all of an expert's legacy on that expert's death bed.

The complete legacy of one Class 5 Creation Master was stored in the Memory Stone. If this legacy was released, the Memory Stone would lose access to it forever.

This stake was the equivalent of the Freedom Federation giving up one Class 5 Creation Master.

It was difficult to say whether a Class 5 Creation Master or Star Web was more precious. One of them benefited all the people in a federation while the other benefited the federation's experts. Regardless, these stakes were world-shattering.

Two years later, it seemed that the fight at the Major Federation Meeting would be at the peak of fierce intensity because neither federation could afford to lose its stake.

Everything reverted to peace. The night power faded away to reveal the setting sun, and the spring breeze was still warm.

However, Shark Pride and the First Emperor Shark Clan members beside it were exceptionally stern.

At that moment, Shark Pride was utterly befuddled. It was clear that the Radiance Federation's Night Empress had attacked the First Emperor Shark Clan first. So how had it become the First Emperor Shark Clan who had broken the agreement first?

Shark Pride asked the man in red armor, who bore some similar features to Shark Pride and asked, "Second Brother, who did we assign our territory that's closest to the Radiance Federation to?"

The man in red armor was momentarily speechless.

Chapter 1363: The Faith Power has Stopped Increasing

As one of the top three clans in the Eight Clans of Sea Emperors, the First Emperor Shark Clan had an abundance of sea resources. There was no need for their members to take up territory near the federations.

The man in red armor was in charge of the members' assignment of territories, and he did not remember assigning any territory that was near to the Radiance Federation.

Moreover, the First Emperor Shark Clan had moved to the Freedom Federation's territory, and many members had been recalled. There were very few of them left outside of the territory.

Suddenly, the man in red armor thought about his third younger sister, Shark Awn.

Shark Awn had grown up spoiled by their oldest brother. When it voiced its unwillingness to return, their oldest brother had permitted it. Shark Awn had not been assigned any territory because, as the oldest princess of the First Empress Shark Clan, Shark Awn was free to go to any part of the First Emperor Shark Clan's territory.

Could it have gone to the sea near the Radiance Federation, tried to kill someone from the Radiance Federation for some reason, and was found out?

Given Shark Dominate's understanding of Shark Awn, it was possible that it would go as far as to break the agreement for the sake of sufficient benefits.

Shark Pride noticed Shark Dominate's look of contemplation and could not help but ask, "Second Brother, don't hold back your thoughts and speak them out. If the Radiance Federation is trying to frame us, we must teach them a lesson."

Shark Dominate shook its head. If the Radiance Federation was truly trying to frame the First Emperor Shark Clan, the other sea clans would be sure to set their differences with the First Emperor Shark Clan aside to band together for the sake of securing the overall might and benefits of all sea clans.

However, if the First Emperor Shark Clan was at fault, they would be doomed if they allowed the Radiance Federation to seek leverage.

Additionally, the other sea clans were not reliable. The First Emperor Ray Clan would definitely seize the opportunity to deal the First Emperor Shark Clan a blow.

Eventually, Shark Dominate told Shark Pride about his guess.

Shark Pride's expression changed when he heard what Shark Dominate said. It knew that this was probably the truth.

But it seemed too ludicrous! It only involved the lives of a few normal people. Why did it warrant such serious repercussions? It seemed that this trip to the Radiance Federation would be slightly sticky.

Just as Shark Pride was wondering if it should go to the Radiance Federation personally, Shark Dominate said, "Big Brother, we still need to move the clan."

It glanced at the austere-faced Du Miao and continued. "You have to be here for the collaboration with the Freedom Federation. I shall be the one to go to the Radiance Federation. The Radiance Federation is one of the three major factions and must be appropriately gracious. Their royalty can't detain me."

Shark Pride nodded. Although it did not want to send Shark Dominate into danger, it was undoubtedly more suitable for Shark Dominate to go.

Shark Pride pointed at the young man with short red hair and said, "East, go with your Second Uncle and remember to listen to what he says."

The young man with short red hair hurriedly said, "Don't worry, Father. I will follow Second Uncle's words to a tee."

Shark Pride nodded in satisfaction, but Shark Dominate's brows were furrowed.

By sending Shark East on this journey, Shark Pride was trying to strengthen Shark East's authority in the First Emperor Shark Clan.

Shark Pride's trying to set up Shark East to become the next leader! It seems that he has no clue what kind of person his son is. Shark East might be docile and obedient when you're around. But he becomes extremely pompous once he's out of your eye line. I hope he doesn't cause any trouble on this trip to the Radiance Federation.

2

Whenever Shark East encountered members from the other seven clans of Sea Emperors, it could throw the First Emperor Shark Clan's status in their faces. However, this behavior would not fly in the Radiance Federation.

However, since Shark Pride had instructed Shark East to go, there was nothing that Shark Dominate could do. It knew that it would have to give Shark East pointers and advise it to exercise self-restraint.

The Radiance Federation's threatening command was directed not just at the First Emperor Shark Clan but also the other seven clans of Sea Emperors.

Currently, the other seven clans all had their own ideas about how they should address the matter of the agreement when they went to the Radiance Federation.

At that moment, every person in the Radiance Federation had their head craned toward the sky as they watched the giant golden tree shrink until it finally disappeared.

Lin Yuan's thoughts were in a jumble.

On the one hand, this fight between royalty had shown him how weak he was. They would deeply impact only those affected by celestial phenomena.

Unless he had a fully-grown sacred source lifeform, he would always fall short of pinnacle experts.

The Sacred Sword Wielding Queen was only 3 Stars, and it would be some time before it could evolve to 4 Stars. Lin Yuan had no clue when it would finally be able to evolve into a fully-grown sacred source lifeform.

Luckily, he had amassed so many Law Source Crystals that he did not have to worry for now. However, his stock would eventually be used up, and he would need to search for more.

From a certain angle, this incident deepened Lin Yuan's yearning to leave the marsh world and work with the major cities.

On the other hand, the voice from the giant tree deepened the sense of belonging that Lin Yuan felt toward the Radiance Federation.

Shark Awn had targeted Lin Yuan, Liu Jie, and An He. However, the voice that had settled the matter did not mention that they were the disciples of royalty. This meant that the person was quietly protecting every person in the Radiance Federation, normal or otherwise.

This was the graciousness of the Radiance Federation and the graciousness of royalty! This sense of responsibility could not be held up by shoulders. It was a promise to every single person in the Radiance Federation.

Lin Yuan felt that it was worth protecting a federation like this.

The Mother of Bloodbath saw the thick and moving ribbon of sunlight and snapped its own link to the sun.

Since they were already acquainted, the Mother of Bloodbath only had to wait to reunite with its family.

Lin Yuan fell asleep in the mansion after eating the delicious food Liu Jie had prepared.

When he woke up, he noticed that the faith power in his shrine had stopped increasing.

Lin Yuan found this to be strange. He logged onto Star Web and checked the forums and posts.

This allowed him to understand.

There were three main topics being discussed on Star Web.

First was the strange celestial phenomena that had taken place yesterday. The second was the scuffle between the Radiance Federation and the Freedom Federation. The third was the startling stakes for the Major Faction Meeting that would take place two years later.

These three topics were so overwhelmingly popular that they squashed all other possible topics.

Chapter 1364: Where is Gao Feng?

Lin Yuan knew that even if he used his status as the Moon Empress' disciple now to convince Sky City's City Lord to give up on targeting Connected Beast Park, it would not help in the slightest.

He would only be able to snatch back the popularity stolen by these three events after he waited for the buzz surrounding them to calm down.

However, this matter could not be dragged on for too long, or else the original fires of interest would be extinguished forever.

1

Hence, Lin Yuan planned on waiting for a few days until he was just about to leave for the Divine Wood Federation, during which he would handle the tasks in the Radiance Federation before helping Connected Beast Park.

However, he had no clue that Connected Beast Park no longer wanted his help.

At first, Miao Zhenshan had been increasingly frantic. The prideful Connected Beast Park acted like he was possessed as he continued to check the forums on Star Web despite knowing that they were filled with insults for him. Support our Bon novel.com

When Miao Zhenshan woke up this morning, he logged into Star Web as per usual and was promptly stunned.

What was going on? Miao Zhenshan wondered if his eyes were deceiving him.

Miao Zhenshan clicked through a few pages and noticed that none of the content mentioned Connected Beast Park.

He quickly understood that it was because the events of last night had completely taken over. It would take some time for the matter to die down, and Connected Beast Park would not be mentioned again for the foreseeable future.

Before Miao Zhenshan could fill up with joy, he remembered Lin Yuan had promised to help.

If Lin Yuan helped now, the hate comments would return.

Miao Zhenshan wanted nothing more than to call Lin Yuan to tell him not to help. However, he dared not voice this thought as it would be the equivalent of teasing the Moon Empress' disciple.

If the Moon Empress' disciple became angry and decided to target Connected Beast Park, Connected Beast Park would reach an even lower point.

...

Lin Yuan looked through his groups on Star Web and saw that Gu Lang and Zong Ze had mentioned Liu Jie to ask him about yesterday's events.

Night Leaning Moon had thrown the first stick yesterday.

Zong Ze and Gu Lang's Master had gone to the Radiance Federation's imperial court to attend a meeting at the crack of dawn.

Chef Supreme and the Bamboo Monarch were also confused about what had happened yesterday.

If Zong Ze and Gu Lang wanted to learn what had happened, the best option would be to ask Liu Jie.

Before Lin Yuan could speak up in the group, he saw that Liu Jie had responded.

Liu Jie: [This matter was started because a member of the First Emperor Shark Clan attacked first in the sea near Raging Waves City. Lin Yuan and I were right outside Raging Waves City. However, I had no time to tell Master about this matter at all, so I'm unclear on the details too.]

Long Tao, Li Xuan, Sun Ningxiang, and the rest popped out of the woodwork.

All of the members of the group had formed a faction together because of their links to Lin Yuan. They had all become friends when they met at Zong Ze's home.

Zong Ze and Gu Lang did not try to hide anything from Long Tao, Li Xuan, and Sun Ningxiang while they spoke in the group.

Long Tao, Li Xuan, and Sun Ningxiang knew to pull away when the topics included disciples of royalty. However, this matter included Liu Jie and Lin Yuan's safety, and the three of them could not hold back. Lin Yuan smiled at his friends' concern.

Lin Yuan: [Thank you for all your concern. We're both fine. By the way, where's Gao Feng?]

Gao Feng was the most personable in the group and usually the most active in the group.

However, he had basically been radio silent over the last two weeks. When he did appear, it was usually at night.

Lin Yuan mentioned Gao Feng but received no reply even after some time had passed.

At this moment, Sun Ningxiang wrote: [Lin Yuan, Grandma and I will reach the Royal Capital tomorrow. She has been thanking you throughout the entire journey. Will you be free tomorrow? There are some things I would like to say to you.]

Lin Yuan hurriedly messaged back.

Lin Yuan: [Since you brought your grandmother over, I'll definitely have time. I'll send you my address, and you can come right over. Didn't you say that Liu Jie is a great cook? Let him know whatever you feel like eating.]

1

Lin Yuan had not prepared much for Sun Ningxiang's arrival. They had known each other for such a long time that he did not need to bring out the fine china for a private meal with her.

Sun Ningxiang smiled as brightly as the summer sun when she saw Lin Yuan's response.

Lin Yuan signed when she saw Sun Ningxiang's expression.

Lin Yuan needed to speak to Li Xuan and Long Tao about a slightly complicated matter. It would not be suitable to speak about it in the group.

He was about to call them when Gao Feng suddenly appeared.

Gao Feng: [Friends, the First Emperor Shark Clan is too wicked! My Master said that Lin Yuan, Liu Jie, and An He almost died at the hands of a female expert from the First Emperor Shark Clan. I'm so glad both of you are fine. What are the rest of us supposed to do if anything happens to the two of you? By the way, I've been learning from Master, and I'm only allowed to rest at night. I'm taking a break today because Master attended a meeting at the Royal Capital. If any of you need to speak with me, just call me! I might not always be able to see your messages in the group even if you mention me.]

Lin Yuan decided to privately message Gao Feng since Gao Feng had appeared. He told Gao Feng to take over the Sea Bliss Clan's territory in Raging Waves City as well as the island outside of Raging Waves City.

Lin Yuan had formed a rising faction with Gao Feng, and they held equal ownership and were considered co-bosses.

It would be more suitable for Lin Yuan to give the Sea Bliss Clan to Gao Feng instead of taking over and managing the Sea Bliss Clan himself.

When Gao Feng saw Lin Yuan's message, he immediately guessed that Lin Yuan was Sky City's City Lord.

Lin Yuan had no intention of hiding from Gao Feng. He had been friends with Gao Feng much longer than he had been friends with Li Xuan and Long Tao.

Although Lin Yuan and Long Tao had exchanged numbers long ago, they had not interacted much.

Gao Feng had helped Lin Yuan many times.

Without Gao Feng, Lin Yuan would never have been able to obtain the young Elemental Shellfish and start amassing resources.

These initial resources enabled Lin Yuan to continue to snowball resources.

Lin Yuan was able to obtain the Floating Island Whale because of Gao Feng.

Chapter 1365: Hooked Teeth Giant Beast Dragon

At the Guard Ye Banquet, Gao Feng had stood with Lin Yuan against Miao Zhuo without hesitation despite not knowing about Lin Yuan's status.

The Gao and Miao families were top factions, but there was a significant gap between them.

Connected Beast Park was one of the top-ranked top factions, while the Gao family could be considered a bottom feeder.

Gao Feng risked causing problems for the Gao family by siding with Lin Yuan.

A person's reaction in times of difficulty revealed their true selves.

From that moment, Lin Yuan opened his heart to Gao Feng as his friend.

Gao Feng was shocked when he discovered that Lin Yuan was Sky City's City Lord. But at the same time, he felt it was to be expected. After all, he had witnessed too many miracles from Lin Yuan.

There was no question that Gao Feng would not reveal this information.

He had always been grateful to Lin Yuan. Without Lin Yuan and Liu Jie, he would never have been able to become the disciple of a member of royalty.

Lin Yuan called Long Tao after ending the call with Gao Feng.

Long Tao picked up after the call rang three times.

Long Tao was surprised that Lin Yuan was calling him because everyone was still chatting in the group.

Did Lin Yuan want to ask about the Emperor Armored Martial God Insect?

Recently, many alien insects that were as strong as Myth Breed feys had flown out of the Class 4 alien insect dimensional rifts under Coiling Dragon's Valley's control. However, none of them had been the Emperor Armored Martial God Insect, and there was nothing that Long Tao could do about the situation.

"Big Brother Long, Coiling Dragon's Valley has been nurturing dragon-species feys. Do you know which dragon-species feys are easy to maintain and have large livers?" asked Lin Yuan.

Long Tao was stunned.

It was true that Coiling Dragon's Valley nurtured dragon-species feys. However, they rarely bought and sold dragon-species spiritual ingredients. Even if they did sell some dragon-species spiritual ingredients, it was because the dragon-species fey was too far gone for Creation Masters to save it, and there was no other choice but to extract spiritual ingredients from it.

From Lin Yuan's question, Long Tao knew that Lin Yuan probably needed dragon-species feys' livers.

Instead of replying to Lin Yuan, Long Tao asked, "Brother, do you have any requirements for the dragon-species fey that provides the liver?"

Lin Yuan thought about Shiny's current power and replied, "I don't have high expectations for the bloodline as long as they're pure flood-dragon-species and terrifying-dragon-species

Long Tao choked.

This wasn't considered high expectations?

King-class experts were able to increase the purity of their dragon-species feys to pure flood-dragon-species or terrifying-dragon-species.

Suppose Lin Yuan wanted to breed flood-dragon-species and pure terrifying-dragon-species feys with the intention of harvesting their livers. In that case, Long Tao could not imagine the immense amount of resources that would have to go into this endeavor.

Besides the food costs, an enormous amount of Creation Master resources would have to go into increasing the purity of a dragon-species fey's bloodline.

Moreover, he wanted to nurture the dragon-species feys not to sell them but to harvest their livers. Once a dragon-species fey's liver was removed, the dragon-species fey would definitely die, and their body would only be useful if it was separated into spiritual ingredients and sold off.

2

No matter how expensive spiritual ingredients that came from a dragon-species fey were, Lin Yuan would not be able to break even.

Lin Yuan did know which pure flood-dragon-species and terrifying-dragon-species feys were easier to breed. The dragon-species fey he had in mind was large, and its liver had to be of proportional size.

"Brother, there is a fey called the Hooked Teeth Giant Beast Dragon. It's very easy to breed, but it grows in size very quickly. As long as it consumes feys with large amounts of flesh, it will reach full size once its

power evolves to Gold grade. At full size, the Hooked Teeth Giant Beast Dragon is almost 20 meters long, nine meters long, and its liver weighs almost 100 kilograms. It has the Ancient Explosive Dragon bloodline and is considered one of the more violent pure terrifying-dragon-species feys.

“Its liver is in charge of its emotions, and it has strong medicinal properties. Its liver is considered valuable in the spiritual ingredient market. If you want to harvest a pure terrifying-species fey’s liver, the Hooked Teeth Giant Beast Dragon is the best choice.

“Coiling Dragon’s Valley is currently nurturing Hooked Teeth Giant Beast Dragons. One of the breeder Hooked Teeth Giant Beast Dragons died recently, leaving six of its eggs. The six eggs all have the potential to become breeders,” said Long Tao.

Lin Yuan’s eyes lit up.

Flood-dragon-species feys did not like to interact, while terrifying-dragon-species feys were always passionate and left behind many descendants.

However, the eggs produced by a terrifying-species fey about to die produced offspring with the best genes.

Given that Coiling Dragon’s Valley was a top faction, the breeder dragon they chose was definitely of good quality. Hence, the genes of the six Hooked Teeth Giant Beast Dragons had to be outstanding.

Lin Yuan decided to feed the Hooked Teeth Giant Beast Dragon’s liver to Shiny.

“Big Brother Long, you mentioned that you wanted to start a rising faction. Why don’t you work with me to nurture the Hooked Teeth Giant Beast Dragons?” said Lin Yuan.

Long Tao’s eyes lit up. He never expected Lin Yuan to invite him when it came to such matters. This was his chance!

He immediately agreed and said, “It will be good if I can start a rising faction on my own, but even better if I can start one with you. I have limited Creation Master resources on hand. I’ll only be able to supply one Class 4 Creation Master and five Class 3 Creation Masters to nurture the Hooked Teeth Giant Beast Dragon. After the Hooked Teeth Giant Beast Dragon’s liver is harvested, the rest of its body can be carefully separated and sold as spiritual ingredients. I have experience in managing, breeding, extracting, separating, and selling dragon-species feys, so leave it all to me.”

Long Tao’s voice was clear as he listed all the contributions he could provide to the faction. Lin Yuan felt relaxed working with Long Tao and said, “Big Brother Long, let me provide the Creation Master resources. I will have to trouble you for the other tasks.”

Long Tao was taken aback by Lin Yuan’s nonchalant attitude toward Creation Master resources. He only had to provide labor.

He could not take advantage of Lin Yuan during their collaboration, so he said, “If that’s the case, you can have 70% ownership of the rising faction while I’ll just take 30%.”

Long Tao was sincere, but Lin Yuan said, “Big Brother Long, since we’re starting a faction together, we should each have 50% ownership. My need for the quality of the dragon liver will only increase in the future, and there’ll be no lack of work for you.”

However, Long Tao still insisted on only taking 30%.

Chapter 1366: Nirvana Phoenix Flower

Eventually, Lin Yuan said, "Why don't we do this, Big Brother Long? I'll take whatever dragon-species spiritual ingredients I need from the faction in the future. I will probably need a large amount of dragon-species spiritual ingredients in the future. If we each take 50% ownership, I'll actually be the one taking advantage of you."

Long Tao gave in.

When they hung up the call, he rushed off to handle the affairs related to setting up a faction.

Meanwhile, Lin Yuan acted the same way he did when he started a faction with Gao Feng and leaned back to relax.

Now that he had settled the issue of dragon liver, only the phoenix blood was left. It would not be as easy to solve the issue of the phoenix blood because he only wanted to use the blood from main-phoenix-species feys.

But now that Lin Yuan was going to nurture main-dragon-species feys' livers, he could not afford to do so. Given his current situation, he had no choice but to lower his standard.

Unlike essence blood, extracting phoenix blood would not put the main-phoenix-species fey in danger. At the very most, the main-phoenix-species fey would be weak for some time if too much blood was drawn from it.

As for the avenue through which he would obtain the main-phoenix-fey blood, only Dark Clouds Bird Shrine came to his mind.

Previously, Lin Yuan and Dark Clouds Bird Shrine had traded for Golden Lotus Brocade Pearls, and he had formed a friendly relationship with them. This trade was the reason Li Xuan had been chosen to become the Young Leader out of all the young members of Dark Clouds Bird Shrine.

Lin Yuan would not approach Dark Clouds Bird Shrine directly with regards to the phoenix blood. He would ask Li Xuan to be a middleman who would discuss with the elders on Lin Yuan's behalf.

Lin Yuan immediately called Li Xuan. When the call went through, Lin Yuan immediately said, "Big Brother Li, I need your help."

Li Xuan replied cheerily, "Brother Lin, let me know whatever you need help with. I'll get on it right now if it's within my means. If it's too much for me, I'll try to come up with a way to help you get it done."

Li Xuan had always been thankful to Lin Yuan. If not for Lin Yuan, Li Xuan would have lost the position of Young Leader to his younger siblings.

Ever since Li Xuan's younger siblings reached 15 or 16 years old, they had been trying to steal from Li Xuan. Li Xuan was very aware of this, but he always hesitated about doing something about it.

Just when he reached his limit and was about to defend his position in the family, Lin Yuan appeared and convinced the elders to make a decision. From then on, Li Xuan no longer had to worry about his siblings.

He always felt that Lin Yuan had not only helped him raise his position in the family but also saved his virtue.

Given Lin Yuan's status, Li Xuan did not know what he could do to repay him. But now that Lin Yuan had come to him for help, he finally had his chance.

Lin Yuan said with a smile, "Big Brother Li, is it true that Dark Clouds Bird Shrine has many main-phoenix-species feys?"

Li Xuan did not know why Lin Yuan had asked this question, but he still replied, "In Dark Clouds Bird Shrine, the fundamental condition for joining the elders is to own a main-phoenix-species fey. There are about 40 elders, and they have at least 50 main-phoenix-species feys."

Lin Yuan was delighted. With 50 main-phoenix-species feys providing Shiny with blood, it would be enough for Shiny to reach Myth Breed.

If Lin Yuan could work with Dark Clouds Bird Shrine, he would not have to worry about sourcing for main-phoenix-species feys' blood for a long time.

"Big Brother Li, I would really like your help in obtaining large amounts of blood from the elders in Dark Clouds Bird Shrine."

Li Xuan gulped and was momentarily speechless. Lin Yuan's request had frightened him.

He could not imagine the expression on the elders' faces when he asked them to give blood from their main-phoenix-species feys. It was even possible that they would strip him of his position as Young Leader.

However, he had promised Lin Yuan that he would do whatever he could to help him. Now, he was in an awkward position.

Lin Yuan did not let Li Xuan stay awkward for too long.

"Big Brother Li, Dark Clouds Bird Shrine probably needs spiritual ingredients like the Nirvana Phoenix Flower to feed to the main-phoenix-species feys, right? What if I say that I can provide one Nirvana Phoenix Flower every time I take blood from the main-phoenix-species feys? Will this offer make it easier for you to talk to the elders?"

Li Xuan let out a breath of relief.

The spiritual ingredient that Dark Clouds Bird Shrine's elders fought over the most was the Nirvana Phoenix Flower.

The Nirvana Phoenix Flower was a plant-type fey that could activate main-phoenix-species feys' bloodlines. They were as useful to main-phoenix-species feys as the Dragon's Mouth Orchid was to dragon-species feys.

However, it was much more difficult to nurture the Nirvana Phoenix Flower.

Just like the Dragon's Mouth Orchid, the Nirvana Phoenix Flower needed pure spirit qi once it reached a certain quality. However, the Nirvana Phoenix Flower needed fire-elemental energy as well. As such, the Nirvana Phoenix Flower was five times more expensive than the Dragon's Mouth Orchid.

If Lin Yuan could produce the Nirvana Phoenix Flower, the elders in Dark Clouds Bird Shrine would be willing to work with him in order to help their main-dragon-species feys' bloodline to improve.

2

Before Li Xuan could agree, Lin Yuan went on to say, "Big Brother Li, if Epic quality Nirvana Phoenix Flowers aren't enough, I can also offer various heavenly-maiden-grade elemental pearls."

Li Xuan hurriedly replied, "Brother Lin, the Nirvana Phoenix Flowers will be enough. I am confident that this will be enough for me to convince the elders. I'll be able to give you a response soon."

Lin Yuan nodded.

He did not have Nirvana Phoenix Flowers at the moment. Just like Dragon's Mouth Orchid, the Nirvana Phoenix Flower rarely appeared on the market.

Lin Yuan was certain that he could produce many Nirvana Phoenix Flowers to trade for main-phoenix-species feys' blood with the elders of Dark Clouds Bird Shrine because he had seen ten Nirvana Phoenix Flowers at Connected Beast Park's vault when he was there.

Although most of these Nirvana Phoenix Flowers had not reached Epic quality, Lin Yuan did not mind.

As long as he could obtain the Nirvana Phoenix Flowers after he helped them, he would easily be able to evolve them to Epic quality. He might even be able to evolve some of the better ones to Legend quality.

Chapter 1367: Soon to Evolve Mountain River Eternal Life Carp

2

When the Nirvana Phoenix Flower was planted in the Spirit Lock spatial zone, it would be able to produce new flowers after it was plucked as long as its roots were not damaged.

After hanging up the call, Li Xuan used his title as Young Leader for the first time to call for a meeting with the elders.

He had been chosen to become the Young Leader because the elders valued his link to Lin Yuan.

Previously, the elders had all supported different young members according to their respective motives. Even though Li Xuan had officially become the Young Leader, he still had not been acknowledged by every elder. He intended to use this chance to cement a collaborative relationship with the elders.

Ever since he started a faction with Lin Yuan, Gu Lang, Zong Ze, and the rest, his position in the family had only grown more secure.

With this matter on top of it, Li Xuan felt that he would become the most reputable person in Dark Clouds Bird Shrine.

Although Lin Yuan was the one who had asked for his help, he knew that he owed Lin Yuan far more.

If Lin Yuan only needed the blood from main-phoenix-species feys, he could announce his offering of the Nirvana Phoenix Flower on Star Web's trade message, and the experts with main-phoenix-species feys would happily take him up on his offer.

As Lin Yuan continued to supply the Nirvana Phoenix Flowers to Dark Clouds Bird Shrine, he would help Dark Clouds Bird Shrine to increase its power and strengthen its foundation.

Li Xuan planned on telling all the elders about this during the meeting so they would also feel indebted to Lin Yuan.

...

Lin Yuan spent the day organizing his gains from Raging Waves City.

As a pinnacle Immortal Sea Emperor, the dead Shark Awn could not be controlled by Red Thorn using the Tongue of Relinquish even though the Mother of Bloodbath had already absorbed its blood energy. Hence, it could only be turned into various spiritual ingredients.

Shark Awn's skin could be used by Wen Yu to be turned into clothes. The skin was soft and light yet possessed very strong defensive capabilities. Additionally, its scales were resistant to wind and could be used to attack enemies.

After Shark Awn died, Lin Yuan also retrieved something else from its body. He knew that it could be the Immortal body that the Moon Empress had spoken of.

The Immortal body was formed from Willpower Runes.

Willpower Runes, Law Crystals, World Crystals, and the Immortal body were things that feys gained as they evolved from Fantasy Breed to Immortal Breed.

When Lin Yuan first touched the Immortal body, he felt the Sacred Sword Wielding Queen pulse in his soul as though it had just sensed some sort of treasure.

However, the Sacred Sword Wielding Queen was not as desperate for the Immortal body as it had been for the World Crystal.

Through communicating with the Sacred Sword Wielding Queen, he found out that it could not absorb Immortal bodies before its adolescent stage, which was the period between 7 Stars and 9 Stars.

It seemed that there was no use for Shark Awn's Immortal body as of now, and Lin Yuan would need to store it for some time.

Shark Awn's Immortal body contained parts of its soul.

Lin Yuan would be able to use the Remembrance Soul Whale to solidify Shark Awn's soul. However, he would not do so.

Ever since the Remembrance Soul Whale fell into his hands, Lin Yuan thought about reviving his parents. However, they were humans. Not only were their souls too weak, but souls also dissipated quickly after death.

Lin Yuan knew that his parents were buried in an alien insect dimensional rift, and it was likely that their bodies had already been torn apart by insect tides long ago.

He had two Spirit Guard crests and the letter written in blood left to him by his parents. They meant for him to think of them whenever they saw these items, so it was as though they were always by his side.

Lin Yuan was overwhelmed by fear for the first time and did not have the courage to allow the Remembrance Soul Whale to check on the two crests and the letter.

Although he already knew the truth in his heart, sometimes, lying to himself to keep the hope alive was preferable.

After carefully considering it and trying to muster the courage countless times, Lin Yuan decided to go for it.

He nervously summoned the Remembrance Soul Whale and placed the crests and letter in front of it.

In the end, the answer turned out to be just as cold and heartbreaking as he had expected.

The voice from the giant golden tree had allowed Lin Yuan to understand what the Radiance Federation meant to him.

As he gazed at the two Spirit Guard crests now, it dawned on him why his parents had left him and Chu Ci at home to fight for the Radiance Federation despite knowing the dangers that would be involved.

He had been confused when he first received the two Spirit Guard crests. But now, it was clear to him.

Both he and the Moon Empress had chosen to take the same path his parents had.

Lin Yuan held the crests to his chest and looked at the blood letter as he missed and longed for his parents. This lasted the entire night. At that moment, he seemed more like a fresh 18-year-old young man than he ever had. [Support our FreeWebNovel.com](http://FreeWebNovel.com)

The morning light floated through the window and shimmered on Lin Yuan's body.

As he looked at the light of dawn, he stored away the two crests and blood letter like they were the most precious treasures in the world.

He opened the door of his room and went downstairs to find Liu Jie preparing dumpling soup. With one sniff, Lin Yuan immediately knew that Liu Jie was making pork and leek dumplings which were Lin Yuan's favorite.

Liu Jie knew that Sun Ningxiang and her grandmother would be arriving at the mansion soon and had asked Sun Ningxiang in the group what she wanted to eat.

After washing the dishes, Liu Jie dove straight into preparing lunch.

As Lin Yuan sat on the water rhinoceros leather sofa and looked at the red sandalwood longevity fish tank, he realized that the red sandalwood longevity fishtank seemed slightly small. It could also be said that the three Mountain River Eternal Life Carps and 99 Five Fortune Ranchus had grown larger.

Coincidentally, Submerged Flood Dragon Lake's construction was done.

For the sake of Blackie's exclusive skill, Lin Yuan had nurtured the Telescope Spirit-Siphon Goldfish, and they had all been released into Submerged Flood Dragon Lake.

The Angelfish of Bliss were very gentle and would not attack the Spirit-Siphon Goldfish.

Lin Yuan felt that it would be a good idea to release the Mountain River Eternal Life Carps and Five Fortune Ranchus into Submerged Flood Dragon Lake as well.

The spirit qi released by the 99 Five Fortune Ranchus would enable the flowers in the pavilions atop the Sunlight King Lotus to bloom even more brilliantly.

The red sandalwood longevity fish tank would also not be left there to collect dust as he could fill it with any fortuitous aquatic fey that could be nurtured indoors in the future.

The Mountain River Eternal Life Carps had grown to three meters long, and there was almost no space for them to move in the 9.9-meter-wide red sandalwood longevity fish tank.

When the Mountain River Eternal Life Carps were released into Submerged Flood Dragon Lake, Lin Yuan noticed something was happening to their bloodlines.

Apparently, the three Mountain River Eternal Life Carps were about to evolve.

Chapter 1368: Sun Ningxiang's Resolution

Lin Yuan had raised the Mountain River Eternal Life Carps ever since they were young. Fish-species feys did not have high intelligence, but they felt a lot of affection for Lin Yuan.

After spending some time with Lin Yuan by the edge of Submerged Flood Dragon Lake, the three Mountain River Eternal Life Carps swished their tails and swam out into Submerged Flood Dragon Lake.

The Mountain River Eternal Life Carps had the exclusive skill Place of Life. When they swam into Submerged Flood Dragon Lake, the Angelfish of Bliss and precious plants in the pavilions spread out their leaves with delight.

When Lin Yuan saw the beautiful scenery he had created, he breathed out a breath that he had not known he had been holding.

Suddenly, he entered a mystical state.

Creation could bring people happiness. A Willpower Rune of creation appeared in Lin Yuan's spirit.

Naturally, Lin Yuan was elated to comprehend another Willpower Rune. However, it was not suitable for the Remembrance Soul Whale.

At that moment, he heard a clear bird chirp from the mansion's entrance. He looked out and saw that Sun Ninxiang had arrived.

There was a short woman who shared Sun Ningxiang's eyes next to Sun Ningxiang.

Lin Yuan knew that Sun Ningxiang's parents had passed, so this woman had to be Sun Ningxiang's grandmother, the thearch-class expert Liu Yuan.

He rushed up to them to usher them into the house.

Before Sun Ningxiang could speak, Liu Yuan knelt on one knee and said solemnly, "My name is Liu Yuan. Thank you for saving my life with the Moon Dew Revival Pill."

Lin Yuan anxiously helped Liu Yuan up. He was friends with Sun Ninxiang and could not handle her grandmother thanking him in such a manner.

He had not thought about the Moon Dew Revival Pill's value when he saved Liu Yuan. Even when he thought back on it, he did not regret using the Moon Dew Revival Pill to save Liu Yuan's life. He could not stand and watch his friend's family die when he had the ability to save them.

Sun Ningxiang saw that her grandmother was about to thank Lin Yuan again and was afraid that Lin Yuan would be put on the spot. She gently held Liu Yuan's hand.

Lin Yuan and Sun Ningxiang had not known each other for a long time, and he had been wearing a mask the last time they met. Hence, she had not noticed the changes in him.

But now, as she looked at Lin Yuan's exquisite features and growing aura of elitence, she could not help but be stupefied.

Liu Yuan gently tugged Sun Ningxiang's arm when she saw her granddaughter spacing out.

When Sun Ningxiang regained her senses, her face flushed, and she lowered her head in embarrassment.

Lin Yuan had not noticed the change in Sun Ningxiang's expression. He was too busy praying that Liu Yuan would not get down on her knees again.

After exchanging a few words with Liu Yuan, he led her and Sun Ningxiang into the mansion.

When Sun Ningxiang sat down on the sofa, she decided to tell Lin Yuan what needed to be said.

Lin Yuan poured out cups of Three Treasures Tea for Sun Ningxiang and Liu Yuan. Before he could finish filling Sun Ningxiang's cup, she said, "Lin Yuan, Condense Fairy Orchard would like to be attached to Sky City from now on and become one of your branches just like the Listening Heron Chamber of Commerce is."

Instead of looking happy, Lin Yuan frowned. He felt that a large part of this decision was motivated by gratitude toward him for saving Liu Yuan.

If Lin Yuan and Sun Ningxiang were not friends, he would be more than willing to take her up on her offer.

However, he considered her his good friend, and this decision made him feel like she regarded their relationship as transactional.

Thus, he asked her seriously, "Did you decide to attach Condense Fairy Orchard to Sky City as a way of thanking me? If so, there is no need. If you would really like to repay the debt of the Moon Dew Revival Pill, you can repay me with resources once Condense Fairy Orchard has expanded sufficiently."

Sun Ningxiang shook her head gently.

It was true that she had made the decision to express her gratitude. However, she was the decision-maker of a top faction and had to look past the surface of matters.

She had also made this decision after taking the entire Condense Fairy Orchard into consideration. By attaching Condense Fairy Orchard to Sky City, Condense Fairy Orchard's future expansion would be secured.

Even if Liu Yuan had regained her health, Condense Fairy Orchard would still only be left with one thearch-class expert.

They had no Creation Master resources or martial force. Hence, it would be difficult for Condense Fairy Orchard to forge a better future for itself.

Sun Ningxiang sorted out her emotions before saying, "Condense Fairy Orchard is fully reliant on Sky City for Creation Master resources. Without Sky City, our plant-type fey role will crumble in an instant. By attaching ourselves to Sky City, Condense Fairy Orchard will have a light waiting for us at the end of the tunnel.

"Lin Yuan, if you are satisfied with us, please take us in! From today onward, Grandma and I will focus on expanding Condense Fairy Orchard, and we won't have to worry about being targeted by other factions. It is us who would like to take shelter under the tree that is Sky City."

Liu Yuan felt her heart ache when she heard Sun Ningxiang say such things. She felt that her granddaughter was speaking in an excessively inferior manner. It was clear that her decision came from a place of gratitude, yet she made Condense Fairy Orchard sound even lousier in case Lin Yuan was unwilling to accept them. Liu Yuan did not understand this side of her granddaughter.

But from the moment Liu Yuan looked into Lin Yuan's clean and clear eyes, she knew that he had no unsavory intentions.

This was not surprising. The Moon Empress' disciple was going to fight to become a Radiance Envoy two years later, and he would not allow himself to be blinded by his emotions.

Lin Yuan fell silent when he heard what Sun Ningxiang said.

Amid his silence, Sun Ningxiang said, "Lin Yuan, if Sky City will not accept Condense Fairy Orchard, I might as well demote Condense Fairy Orchard into a veteran faction and sell off our breeding bases to Sky City. We are old friends. Considering our friendship, I'm sure you won't reject our spirit plant breeding bases that supply 20% of plant-type feys to the market."

Lin Yuan shook his head in frustration.

"Since you've brought this matter up, Condense Fairy Orchard shall become the second faction under Sky City. I will not question Condense Fairy Orchard's expansion. You just need to send general reports to Wen Yu just like the Listening Heron Chamber of Commerce does."

Chapter 1369: Lin Yuan the Hoarder

Lin Yuan said after a moment of silence, "As a welcome gift to Condense Fairy Orchard for joining Sky City, I will provide Condense Fairy Orchard with 2,000 various types of heavenly-maiden-grade elemental pearls, 300 Bronze/Epic feys, 10 Bronze/Legend feys, 500 pieces of mid-grade marsh soil, and 50 pieces of high-grade marsh soil this year."

In spite of Lin Yuan's calm tone, Liu Yuan and Sun Ningxiang were floored. The same thought popped into their heads.

Are we joining Sky City to repay our debt of gratitude or to gain a brighter future? Lin Yuan is putting too many resources into Condense Fairy Orchard!

When Lin Yuan previously worked with Condense Fairy Orchard, he had provided them with Bronze/Epic feys. The Bronze/Epic feys were what allowed Condense Fairy Orchard to increase their influence in the plant-type fey market by 300% despite not having any Class 4 Creation Masters and only being left with their most fundamental members.

Condense Fairy Orchard and Sky City had worked together for so long, but they had not gained 300 Bronze/Epic feys yet.

If all the Bronze/Epic feys that Lin Yuan provided Condense Fairy Orchard were plant-type feys, they could be nurtured as ramets, and Condense Fairy Orchard would gain even more control over the plant-type fey market.

However, Lin Yuan had promised them more than 300 Bronze/Epic feys. There were also 10 Bronze/Legend feys.

In order to save Liu Yuan, Sun Ningxiang had frantically sought out the Bronze/Legend Muscle Growth Camellia but turned up empty-handed. Clearly, Bronze/Legend feys were invaluable.

Condense Fairy Orchard had accumulated less than 20 Bronze/Legend feys in the past century.

Lin Yuan's provision of Bronze/Legend feys would allow Condense Fairy Orchard to increase their control over the plant-type fey market by 1/3.

Sun Ningxiang and Liu Yuan could never have imagined such a situation. Moreover, these were not all the precious resources that Lin Yuan was going to provide Condense Fairy Orchard.

2,000 heavenly-maiden-grade elemental pearls were more valuable than 300 Bronze/Epic and Bronze/Legend feys combined.

Heavenly-maiden-grade elemental pearls were the specialty of Class 4 Creation Masters.

Condense Fairy Orchard would never not need various elements when they nurtured plant-type feys.

After the incident that caused all of Condense Fairy Orchard's Creation Masters to leave, it became difficult for Sun Ningxiang to obtain elemental pearls.

Sun Ningxiang and Liu Yuan were utterly dumbfounded by Lin Yuan's gift of 2,000 heavenly-maiden-grade elemental pearls. They felt as though they were dreaming.

The soil was the most basic condition in order to nurture plant-type feys. Condense Fairy Orchard had high expectations for the soil they used when they nurtured plant-type feys.

Hence, the plant-type feys that Condense Fairy Orchard put out into the market were always of higher quality than those from other factions with the same role.

The secret of Condense Fairy Orchard's superior soil was that they were not stingy about using marsh soil. Marsh soil was the reason Condense Fairy Orchard had gained such a good reputation over the years.

After the incident happened, Sun Ningxiang no longer had the resources to inject marsh soil into the soil in the breeding bases.

As a result, the plant-type feys put out by Condense Fairy Orchard over the last few months had received complaints from consumers that the quality had dropped, and they were in danger of being excluded by consumers.

Now that Lin Yuan was going to provide them with so much mid-grade and high-grade marsh soil, Condense Fairy Orchard would be able to put out plant-type feys of better quality, and they would not have to receive any more complaints.

If Lin Yuan truly pumped so many resources into Condense Fairy Orchard, Sun Ningxiang was confident that Condense Fairy Orchard would be able to control 50% of the plant-type fey market soon. Once this happened, Condense Fairy Orchard would truly dominate the Radiance Federation's plant-type fey market.

No other faction with plant-type feys as their role would be able to threaten Condense Fairy Orchard's position. In order to continue expanding, they would have no choice but to work with Condense Fairy Orchard.

Condense Fairy Orchard would then be able to integrate the resources in the market and start taking control of even more of the plant-type fey market.

It could be said that Lin Yuan's one statement allowed Sun Ningxiang to see a beautiful future. She felt more and more that Lin Yuan's shoulder was like a warm harbor where she could not help but want to take shelter.

However, Lin Yuan had already used a Moon Dew Revival Pill to save her grandmother and had rescued Condense Fairy Orchard from sticky situations many times.

Sun Ningxiang had come to express her gratitude. But now, how was she supposed to repay her debts if Lin Yuan was going to give Condense Fairy Orchard such an enormous amount of resources?

Setting aside kinship and only considering a business standpoint, Condense Fairy Orchard had only just joined Sky City and had yet to make any contributions. She could not receive benefits before putting in any work, much less when the benefits were such an immense amount of resources.

Liu Yuan looked between Sun Ningxiang and Lin Yuan.

When she first saw Lin Yuan, she assumed that Sun Ningxiang had become smitten with his appearance and aura. A young man with such looks and aura was too attractive for any female.

But now, it was clear that those were not the only reasons.

Lin Yuan was obscenely wealthy, decisive, and capable of great things. If any woman did not feel touched by the offering of such resources, she would be as good as heartless!

When Sun Ningxiang did not nod in agreement immediately and Lin Yuan saw her conflicted expression, he smiled and said, "I won't be giving Condense Fairy Orchard these resources for free. I have a request for you. Once you obtain the resources, I hope that Condense Fairy Orchard will be able to expand your breeding bases and try your best to supply all the types of plant-type feys that the market needs. Also, in case of emergency, I want you to stock up on plant-type feys that are necessary in large quantities for daily needs."

When Sun Ningxiang heard Lin Yuan mention that he had a request, she assumed that he would want to take control of as much of the market as possible. However, his actual request took her by surprise.

Condense Fairy Orchard had over 2,000 main plant breeding bases, and they were situated at locations in the Radiance Federation that had the best soil.

Sun Ningxiang's grandfather had invested in Condense Fairy Orchard when he was still around.

Each of the 2,000 breeding bases had tens of smaller breeding bases attached to them.

These breeding bases were the reason Condense Fairy Orchard was able to dominate the plant-type fey market.

However, in spite of the high number of breeding bases, they were still insufficient to meet Lin Yuan's request.

Chapter 1370: Full of Resources

Lin Yuan's request did not seem like a business investment to Sun Ningxiang. It seemed that he wanted to use Condense Fairy Orchard to prepare for something.

Sun Ningxiang thought about the fight between Chief Guard Ye, the First Emperor Shark Clan, and the Freedom Federation yesterday. Her heart skipped a beat when a guess entered her mind.

“Lin Yuan, are you asking Condense Fairy Orchard to prepare various plant-type fey resources in anticipation of war?”

Lin Yuan nodded. This was exactly what he had in mind.

Yesterday, the lava that fell from the sky had allowed him to understand the devastation that war could cause a city. If any expert used celestial phenomena to attack and destroy a city, many of the current infrastructures would collapse. When that happened, the city would need a sufficient stock of resources to handle the crisis.

This was exactly the preparation that Lin Yuan wanted to carry out.

“You’re right. While Condense Fairy Orchard is stocking up on resources, your ranking as a top faction will not increase significantly. In fact, I hope that Condense Fairy Orchard will remain as under the radar as possible and invest all your effort into accumulating plant-type fey-related resources. A large number of resources will be used up in this process, but I will supply Condense Fairy Orchard with these resources.”

Previously, Lin Yuan wanted to rely on nurturing the Soldier Ration Radish to provide food for a large group of people. Once the Soldier Ration Radish was separated to a certain extent, it was even possible that he would be able to provide food for the entire Radiance Federation.

However, yesterday’s events made Lin Yuan aware that he had thought of everything too simply.

Food was a necessity. But besides food, people also needed many more things in order to survive. If these things were not prepared, any abnormal situation would bring about disaster.

Plant-type feys supported the entire ecosystem. By stocking up on plant-type fey-related resources, Lin Yuan would be able to handle anything that came his way in the future.

The Radiance Federation actually had special stocks. The department that handled this was Cultivated Garden which Lin Yuan had traded with Revival Soil for heavenly-maiden-grade elemental pearls.

Just like the Spirit Guards, Cultivated Garden was managed by a member of royalty, Tian Feng.

It was not that Lin Yuan did not believe in Cultivated Garden’s stock but that he was the type to prepare to the greatest extent.

Moreover, the Spirit Lock spatial zone was a storeroom that did not require much investment but could still maintain a high influx of resources. Lin Yuan could afford to use up resources with the Spirit Lock spatial zone around.

Sun Ningxiang immediately knew what she could do for Lin Yuan and felt a wave of motivation swell up within her.

“Lin Yuan, I never hoped for Condense Fairy Orchard’s ranking to increase after we joined Sky City. Tomorrow, my grandmother and I will publicly announce that Condense Fairy Orchard shall be staying out of the public eye.

“Condense Fairy Orchard will start focusing on gathering plant-type fey-related resources. From now on, I will let you know of any resources I need without holding back so that I’ll be able to stock up on resources as quickly as possible.

“Unfortunately, other factions have bought most of the places with good-quality soil that is suitable to build breeding bases. The other places will need to be renovated to some extent.”

Lin Yuan had a solution. Places with soil that was suitable for planting were rare in the Radiance Federation. However, they were in abundance in the marsh world.

Lin Yuan had taken over the Dark Scorpion’s territory, which was as large as a major city in Radiance City. Although most of the territory was a marsh, Lin Yuan had the ability to change the marsh world as he needed.

White Spear protected the entire territory, so there was no question of safety.

Lin Yuan could set aside a wide area within the territory on which he would create a plant-type fey breeding base.

However, this area would need people to willingly leave their current lives to tend to.

Lin Yuan said, “Sun Ningxiang, I have a place with soil that’s suitable for constructing a breeding base. However, the people who work there will have to leave their current lives. As compensation, I will give them ten times the pay they would receive for doing the same work anywhere else. The workers’ parents can also move to stay at this place. How many of such people do you think Condense Fairy Orchard has?”

Sun Ningxiang did not immediately agree.

“These people exist in droves in Condense Fairy Orchard. Most of the people working in a breeding base are ordinary people or experts that do not have much combat power. They work in four shifts of six hours every day and are given a salary of about 4,000 Radiance dollars every month. If they’re given ten times the normal pay, it’s unlikely that any of them will say no.”

Sun Ningxiang had more things to say to Lin Yuan but did not know how to voice them.

In Sun Ningxiang’s eyes, Lin Yuan was the disciple of royalty and Sky City’s City Lord. He possessed an untold amount of resources. As such, he could not understand the hardships that a regular person had to struggle with.

As a direct descendant of a top faction, Sun Ningxiang also should not be aware of it.

She only came to learn about them because she had spent time training under her grandfather at Condense Healing. During that time, she came to understand the ins and outs of an ordinary person’s life.

Lin Yuan nodded.

Sun Ningxiang did not know Lin Yuan's life had been even harder than those ordinary people working at breeding bases.

At that time, he would drag his ailing body around as he managed a spirit lifeform store. Even with Auntie Zhang's care, he only earned 2,000 Federation dollars each month.

He had used 300 Federation dollars on food and 200 Federation dollars to occasionally switch up Genius and Chimey's food. Lin Yuan carefully saved up the remaining 1,500 Federation dollars for the sake of Chi Ci's education.

No one else knew better than Lin Yuan how unbearable life could be.

Lin Yuan emphasized, "Please help me pick out some people. You need to emphasize that they will need to retreat from society for the rest of their lives."

2

Sun Ningxiang was slightly stunned. Retreating from society for up to a decade was one thing, but never being able to return to their original lives again was too extreme!

Lin Yuan had his own considerations. He could not verify the loyalty of the people working at the breeding base. Hence, the best way to prevent the circumstance of the marsh world from being leaked was to keep them in the marsh world forever.
